## MĀNOA

## 2014–2015 Catalog

This *Catalog* was prepared to provide information and does not constitute a contract. UH Mānoa reserves the right to change, delete, supplement, or otherwise amend at any time and without prior notice the information, requirements, and policies contained in this *Catalog*.

UH Mānoa recognizes its obligation to provide program accessibility for persons with disabilities. Contact the KOKUA Program at (808) 956-7511 (Voice/Text) to obtain information to the existence and location of services, activities, and facilities that are accessible to persons with disabilities. This *Catalog* is available in alternate format upon request by persons with disabilities.

The University of Hawai'i at Mānoa is accredited by the Western Association of Schools and Colleges (WASC) Senior College and University Commission, 985 Atlantic Avenue, Suite 100, Alameda, CA 94501, tel: (510) 748-9001, fax: (510) 748-9797, email: [wascsr@wascsenior.org](mailto:wascsr@wascsenior.org), web: [www.wascweb.org](http://www.wascweb.org)

# How to Use This Catalog

The 2014-2015 *University of Hawai'i at Mānoa (UH Mānoa) Catalog* is a comprehensive guide to UH Mānoa programs, course offerings, services, tuition, financial aid, faculty, facilities, academic policies, and other information of general importance to UH Mānoa students. The information in this *Catalog* is not necessarily complete; names and contact numbers for other publications and offices, which may offer additional information about specific areas of interest, have been included.

The *Catalog* is divided into five major sections:

- Information about the University and the campus, student services, academic policies, tuition and financial aid;
- Information about the individual colleges and schools and their academic programs;
- Descriptions of courses offered;
- Lists of administrators, faculty, and staff with their academic backgrounds; and
- Campus policies and information, glossary, and index.

If you are a prospective freshman or transfer undergraduate student, consult the sections on undergraduate education, Undergraduate General Education Requirements, tuition, financial aid, and student life. In addition, you should read the program section of the department, college or school that interests you. Before selecting classes, read the course descriptions for prerequisites, credit hours, and other relevant information. For additional information on specific programs of study, consult the department chair, program director, or major advisor.

If you are a prospective graduate student, consult the graduate education section and the graduate chair of the program in which you are interested for information regarding admission requirements, degree options, registration, and related procedures.

If you are a continuing student, keep this *Catalog* handy as a source of general information. Familiarity with its contents can smooth your progress toward your degree.

Although every effort is made to keep the *Catalog* correct and current, there will be changes in courses offered and program requirements. Check the *Registration Guide* at [www.hawaii.edu/myuh/manoa](http://www.hawaii.edu/myuh/manoa) and your department, college or school for the most current information.

**Web Information:** This *Catalog* is available online at: [www.catalog.hawaii.edu](http://www.catalog.hawaii.edu).

**General Campus Information:** For further information on UH Mānoa, contact:

UH Mānoa General Information  
Campus Center 212  
2465 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-7235 (Voice/Text)  
Web: [www.hawaii.edu](http://www.hawaii.edu)

The University of Hawai'i is an equal opportunity/affirmative action institution.

**Acknowledgments:** This edition of the *Catalog* would not have been possible without the assistance of many people. Thank you to Krystyna Aune, Ronald Cambra, Patricia Cooper, Jan Costa, April Drexel, Lisa Fujikawa, Joy Hakoda, Kay Hamada, Stella Hieda, Kevin Hu, Lisa Imai, Holli Kihara, Aaron Lee, Julianne Maeda, Kurt Minato, Diane Nakashima, Michelle Saoit, Ryan Yamaguchi, and Myrtle Yamada.

**Cover and Section Heads:** This is the tenth year a "Design the *Catalog* Cover" competition was presented to the UH Mānoa student community. Mitchell Fong is a graphic design major. The concept for his cover represents UH Mānoa with images that were chosen for their properties relating to learning, the arts, school spirit, and friendship. The green "swoosh" represents a leaf, which is echoed on the back cover with kalo leaves. The pictures blended together with the leaf create a growing, thriving community.

**Photographs:** Cover photographs courtesy of Creative Services and Jose Magno, Office of Admissions. Inside photographs courtesy of the schools and colleges.

**Comments:** Contact the Mānoa Catalog Office at (808) 956-9947, 2600 Campus Road QLCSS 102, Honolulu, HI 96822, or email [mcatalog@hawaii.edu](mailto:mcatalog@hawaii.edu) to comment on this publication.

# Chancellor's Message

As Chancellor of the University of Hawai'i at Mānoa, I am delighted to introduce you to the *2014-2015 General Catalog*. These pages contain the information you need to begin an academic journey at the nation's most unique campus of higher education—a land-grant, world-class university situated in the middle of the Pacific Ocean, where East meets West.

UH Mānoa is committed to achieving academic and research excellence, and we are being recognized for our efforts. In 2013, we were invited to join the Association of Pacific Rim Universities, the leading consortium of research universities for our region.

Our students are learning, doing research, developing critical thinking, and being imbued with a global sense of citizenship. And they are matriculating on a campus grounded in the traditional values of the Native Hawaiian culture.

Begin the journey by reviewing this updated *Catalog*, filled with general information on our colleges, schools, programs, courses, and personnel. Discover the academic programs and dedicated individuals united by a singular mission—transforming students' lives.

Aloha,  
Tom Apple  
Chancellor  
UH Mānoa

# The University of Hawai'i

## The University of Hawai'i System

The University of Hawai'i (UH) is a postsecondary education system composed of 10 campuses throughout the 50th state. In addition to the flagship campus at Mānoa, the UH system includes UH Hilo, a four-year campus located on the island of Hawai'i, and UH West O'ahu, a four-year campus located on the leeward side of O'ahu. There are four UH Community College campuses on O'ahu (Honolulu Community College, Kapi'olani Community College, Leeward Community College, and Windward Community College) and one on each of three neighbor islands (UH Maui College, Kaua'i Community College, and Hawai'i Community College), making college classes accessible and affordable in easing the transition from high school to college for many students.

The mission of the UH system is to provide quality college and university education and training; create knowledge through research and scholarship; provide service through extension, technical assistance, and training; contribute to the cultural heritage of the community; and respond to state needs. The campuses, organized under one board, differentially emphasize instruction, research, and service. The system's special distinction is found in its Hawaiian, Asian, and Pacific orientation and international leadership role. Core values bind the system together: Hawai'i's gracious spirit of aloha; collaboration and respect; academic freedom and intellectual vigor; institutional integrity and service; access, affordability, and excellence; active learning and discovery; diversity, fairness, and equity; leveraged technology; Hawaiian and Asian-Pacific advantage; innovation and empowerment; accountability and fiscal integrity; and mālama'āina sustainability.

The UH seal contains a torch and a book titled *Mālamalama* in the center of a circular map of the Pacific, surrounded by the state motto, *Ua mau ke ea o ka 'āina i ka pono* ("The life of the land is perpetuated in righteousness"). The UH motto, inscribed in both the Hawaiian and English languages on Founders' Gate at UH Mānoa is *Maluna a'e o nā lāhui a pau ke ola o ke kanaka* ("Above all nations is humanity"). The motto is reflected in the ethnic diversity of UH students: 23.9 percent Hawaiian or part Hawaiian, 18.9 percent Caucasian, 13.1 percent Filipino, 8.5 percent Japanese, 4.5 percent Chinese, 13.2 percent mixed ethnicity, and 17.9 percent other.

UH governance is vested in the Board of Regents, appointed by the governor of Hawai'i and confirmed by the State Legislature. The regents in turn appoint a president of the UH.

## The UH Mānoa Campus

University of Hawai'i at Mānoa (UH Mānoa) is a research university of international standing. It creates, refines, disseminates, and perpetuates human knowledge; offers a comprehensive array of undergraduate, graduate, and professional degrees through the doctoral level, including law and medicine; carries out advanced research; and extends services to the community. Students have special opportunities for Asian, Pacific, and Hawaiian educational experiences and involvement in research activities, service learning, and co-curricular activities.

UH Mānoa has widely recognized strengths in tropical agriculture, tropical medicine, oceanography, astronomy, electrical engineering, volcanology, evolutionary biology, comparative philosophy, comparative religion, Hawaiian studies, Asian studies, Pacific Islands studies, and Asian and Pacific region public health. UH Mānoa offers instruction in more languages than any U.S. institution outside the Department of State.

The main UH campus located in Mānoa valley on the island of O'ahu began in 1907 as a land-grant college of agriculture and mechanic arts. With the addition of a College of Arts and Sciences in 1920, the college became the University of Hawai'i. In 1972, it became UH Mānoa to distinguish it from the other units in the growing UH system.

Today, 20,000-plus students are enrolled in UH Mānoa courses, on campus or via distance delivery, studying toward bachelor's degrees in 94 fields of study, master's degrees in 84, doctorates in 52, first professional degrees in architecture, law, and medicine, and a total of 60 undergraduate and graduate certificates. UH Mānoa also offers 5 post-baccalaureate certificates. There are 298 degrees and certificates offered. In addition, 72.5 percent of UH Mānoa students are undergraduates, 55.8 percent are women, and 74 percent attend school full-time. The mean age of students is 25.

The beauty of Mānoa valley serves as a backdrop for a unique yet inviting campus. Wander through the campus and find an authentic Japanese tea house and garden located on East-West Center grounds, a studies center that is a replica of a Korean king's throne hall, and a Hawaiian taro patch. Other structures include the Pacific Ocean Science and Technology building on campus and a privately donated marine biology facility on Coconut Island.

UH Mānoa is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges. Professional programs are individually accredited by appropriate agencies.

A popular campus symbol is the rainbow, a frequent sight in Mānoa valley. Green and white are UH Mānoa's colors.

## 2014 Fall Semester

\*Orientation/academic advising/registration for continuing, new, and unclassified students

Visit [manoa.hawaii.edu/graduate/content/graduate-programs](http://manoa.hawaii.edu/graduate/content/graduate-programs) for deadline information as graduate admission deadlines vary by program. The Graduate Division begins processing applications around September 1 for the following fall semester.

August 15 (F)

Holiday: **Statehood Day** (non-instructional day)

August 25 (M)

First day of instruction

September 1 (M)

\*\*Spring admission application priority deadline for undergraduate students; final deadline for second bachelor's degree students and international undergraduate students

Holiday: **Labor Day** (non-instructional day)

September 2 (Tu)

\*Last day to drop courses (tentative)

September 3 (W)

\*Last day to register/add courses/change grading option (tentative)

September 12 (F)

Last day for undergraduates to file application for graduation for fall  
*Last day for classified graduate students to file application for graduation for fall*

October 1 (W)

\*\*Spring admission application final deadline for undergraduate students  
*Last day for returning classified graduate students to file for spring readmission*

October 24 (F)

Last day for restricted withdrawals

November 3 (M)

Last day for instructors to submit "I" removal grades for spring and summer to the Office of the Registrar  
 Last day to apply for credit by examination for fall semester

November 4 (Tu)

Holiday: **Election Day** (non-instructional day)

November 7 (F)

*Theses and dissertations due in Graduate Division*

November 11 (Tu)

Holiday: **Veterans Day** (non-instructional day)

November 14 (F)

*Last day to file petition for admission to doctoral program (only by currently enrolled Mānoa campus master's candidates graduating at end of semester)*

November 26 (W)

Last day for examinations before finals

November 27 (Th)

Holiday: **Thanksgiving Day** (non-instructional day)

November 28 (F)

Non-Instructional Day

December 11 (Th)

Last day of instruction

December 12-13 (F-Sa)

Study days

December 15 (M)

*Spring admission application deadline for post-baccalaureate unclassified students*

December 15-19 (M-F)

Final examinations

December 20 (Sa)

Commencement; semester ends

December 25 (Th)

Holiday: **Christmas Day**

## 2015 Spring Semester

\*Orientation/academic advising/registration for continuing, new, and unclassified students

Visit [manoa.hawaii.edu/graduate/content/graduate-programs](http://manoa.hawaii.edu/graduate/content/graduate-programs) for deadline information as graduate admission deadlines vary by program. The Graduate Division begins processing applications around May 1 for the following spring semester.

January 1 (Th)

Holiday: **New Year's Day**

January 5 (M)

\*\*Fall admission application priority deadline for undergraduate students; final deadline for second bachelor's degree students and international undergraduate students

January 12 (M)

First day of instruction

January 19 (M)

Holiday: **Martin Luther King, Jr. Day** (non-instructional day)

January 20 (Tu)

\*Last day to drop courses (tentative)

Admission requirements for UH Mānoa are similar to those of comparable state institutions of higher education. Applicants are advised to consult appropriate UH Mānoa colleges and schools for specific information since individual academic programs may have special admission policies and procedures.

The following regulations and procedures are subject to change without prior notice. Prospective students should consult the most current *Catalog* and/or an advisor before applying for admission.

International students should refer to “Admission of International Applicants” within this section of the *Catalog*.

## Admission of Classified Students

Classified undergraduates are those admitted to approved programs of study leading to UH Mānoa baccalaureate degrees. Students who have earned 0–24 credit hours are freshmen; those with 25–54 credit hours are sophomores; those with 55–88 credit hours are juniors; and those with 89 or more credit hours are seniors.

Freshmen and sophomores are lower division students, while juniors and seniors are upper division students.

## Admission of Freshmen

Students applying for admission as a freshman must complete the Self-Reported Application. The initial admissions decision will be based on self-reported data. Upon request from the Office of Admissions, an official transcript and official College Board (SAT) or American College Test (ACT) scores must be submitted. Applicants taking the General Education Development (GED) high school-equivalency test must submit GED results in addition to the Self-Reported Application. Applicants who have been home-schooled must submit GED scores, or SAT subject tests (minimum of the subjects) including math, or ACT subscores in addition to the Self-Reported Application. A high rating in one area will not ensure admission, nor will poor performance in an area exclude applicants if other evidence shows they may be successful in university-level work.

**SAT or ACT.** Candidates for fall admission should take the SAT or ACT no later than November of their senior year in high school. Candidates for spring admission should take the test before July. Applicants must also take and submit scores of the writing test. Information is available from high school coun-

selors or from the testing agencies. For SAT, contact College Board, P.O. Box 025505, Miami, FL 33102. For ACT, contact American College Testing Program, P.O. Box 414, Iowa City, IA 52243.

**High School Record.** Applicants should have grades high enough to place them in the upper 40 percent of their graduating class.

**Minimum Unit Requirements.** Applicants should complete 22 units of high school work (grades 9–12) of which at least 17 are college preparatory. The term “unit” means satisfactory completion of a full school year’s course of study or the equivalent in laboratory and shop exercises. A listing of courses and grades from the ninth through twelfth grades must be included. College-preparatory subjects must include at least four units in English; three in mathematics including college-preparatory geometry and second-year algebra; three in natural sciences; three in social sciences; and four additional units, which may include higher mathematics, additional science, additional social studies, and foreign language. All other courses for which the high school grants credit may be offered to satisfy the remaining unit requirements, although there should be no less than a half-unit nor more than two units in any one subject.

Students entering curricula in engineering, mathematics, and biological and physical sciences must meet the special mathematics requirements listed in the college sections of this *Catalog*.

**Profile of Admitted Students.** All applications are evaluated on an individual basis. Generally, successful applicants attain a B (not B-) average for all college-preparatory high school course work, achieve SAT scores of 510 (critical reading), 510 (writing), and 510 (math) or ACT score of 22 in each section, and rank in the upper 40 percent of their graduating class.

UH Mānoa accepts all Hawai‘i residents who meet UH Mānoa admissions standards.

Nonresident applicants should await notice of acceptance before coming to Hawai‘i. By Board of Regents policy, the number of nonresidents admitted is limited.

Admission decisions are made independent of the availability of financial aid and housing. Students must apply separately for financial aid and housing. (See the “Tuition, Fees, and Financial Aid” and “Student Life” sections of this *Catalog*.)

## Admission of Requirements of Homeschooled Applicants

Complete homeschooled applicants are expected to meet the minimum admissions requirements indicated for freshman applicants. Please review the detailed requirements below for homeschooled applicants.

### Required Documents

Complete the Self-Reported Application if your homeschool transcript reflects a traditional high school curriculum. If you are in a non-traditional program, please include a separate statement that includes titles and descriptions of all coursework completed. Other additional information such as textbooks used, methods of teaching, and methods of evaluation and the resulting grades or structured assessments must be entered in the “Comment” box. If the additional information exceeds the amount of space given, attach an additional sheet to the hard copy Self-Reported Supplement or submit an email if you completed the online version.

Also, one of the following: GED scores, SAT subject tests (minimum of three subjects) including math, or ACT subscores.

## Admission of Transfer Applicants

Transfer applicants are those currently or previously enrolled at a college or university other than UH Mānoa. Transfer applicants include those who previously attended UH Mānoa and subsequent to their UH Mānoa attendance enrolled at another UH college, university, or UH Mānoa. To obtain an application form, refer to “Application Procedures” within this section of the *Catalog*.

Applicants who have earned at least 24 semester credit hours of work or completed 12 transferable credits and have at least 12 credits in progress in courses comparable to UH Mānoa offerings at a regionally accredited U.S. college or university must submit an application and have each postsecondary institution previously attended send an official transcript (including withdrawals, courses taken, and grades received) directly to the Office of Admissions. Unofficial transcripts, hand-carried transcripts, faxed transcripts, and student copies of transcripts or grade reports will not be accepted.

Applicants who have earned fewer than 24 acceptable credit hours or who have enrolled in an unaccredited institution must submit high school transcripts and official SAT or ACT scores in addition to official transcripts from all postsecondary institutions previously attended. Admission will be based on both college and high school work.

Transfer applicants are expected to present a satisfactory academic record in courses comparable to UH Mānoa offerings. Nonresident candidates must present a better than average record. The number of nonresidents admitted is limited by Board of Regents policy.

Applicants enrolled at another college or university must have a final transcript submitted to the Office of Admissions at the end of the current term. Until this is received, any acceptance is provisional. Failure either to submit the transcript within a reasonable time or to complete the semester’s work satisfactorily will result in denial of admission or, in the case of registered students, cancellation of registration.

Credit hours in courses taken at U.S. regionally accredited colleges or universities that are substantially equivalent to UH Mānoa offerings and in which grades of D (not D-) or better have been earned will be transferred. Grades and grade points from other institutions are not transferred. Credit/No credit and pass/fail credits may be accepted if the standard for these credits is equivalent to that at UH Mānoa (see “Grades” within this section of the *Catalog*).

However, not all transfer credits accepted will necessarily satisfy curricular requirements toward a particular degree. UH Mānoa applies no more than 60 credit hours from non-UH junior or community colleges to satisfy degree requirements.

Transfers from unaccredited colleges or universities must also meet UH Mānoa campus admission standards for new freshmen. Students who complete a minimum of 30 credit hours with an average of C (not C-) or better at UH Mānoa may be granted credit for the courses completed at unaccredited institutions that are candidates for accreditation. These courses, which must be substantially equivalent to UH Mānoa courses, will be counted only as lower division credits to a maximum of 60 credit hours.

The department or program in which the student is pursuing a degree may decide that certain courses required for the major that were taken in the past must be retaken. Courses that are declared outdated for the major will still count toward the Gen-

eral Education Core if they meet core requirements. Students should consult with their respective academic advisor in their major field of study for details.

International applicants should refer to “Admission of International Applicants” within this section of the *Catalog*.

All colleges previously attended must be disclosed. Incomplete, incorrect, or false information is subject to disciplinary measures.

## Evaluating Transfer Credits

UH Mānoa reserves the right to accept or reject credits earned at any other institution of higher education. In general, UH Mānoa accepts credits earned at institutions fully accredited by U.S. regional accrediting associations, provided that such credits are substantially equivalent to courses at UH Mānoa, and have been completed with a grade of D (not D-) or better. An evaluation of transfer credits will be undertaken only after a student has been admitted to a program leading to a degree and has confirmed his or her intention to enroll.

Transfer decisions about courses taken at other UH campuses are guided by the UH Articulation Agreement. Only course credits are accepted in transfer. Grades and grade points from other institutions do not transfer to UH Mānoa.

## Notable Restrictions on Transfer Credit

Although all qualified courses may be transferred from two-year colleges, UH Mānoa applies no more than 60 credits from non-UH community or junior colleges toward the credits required for a bachelor’s degree. Other notable restrictions on transfer credit include:

- Courses taken out of sequence (backtracking): Credit is not awarded for lower level courses if they are taken subsequent to or concurrently with a higher level course for which there are explicit or implicit prerequisites.
- College Level Examination Program (CLEP) and Advanced Placement (AP): Credits awarded for CLEP and AP examinations do not count toward meeting the 24-credit requirement for admission as a transfer student nor do they exempt other applicants from submitting SAT/ACT scores and high school transcripts.
- Correspondence school credit: No more than 30 credits of correspondence course work from regionally accredited U.S. colleges and universities will be accepted in transfer.
- Life experience: UH Mānoa does not award credits for life experience. By individual arrangement, enrolled students may arrange for credit by examination.
- Military service or schooling: Course work taken through military schools may be considered for credit with the consent of the appropriate UH Mānoa department. The student’s DD-214 or DD-295 form or American Council of Education (ACE) Registry transcript must be submitted. Credits awarded for military schooling do not count toward meeting the 24-credit requirement for admission as a transfer student nor exempt other applicants from submitting SAT/ACT scores and high school transcripts.
- Courses with nontraditional grades: Courses completed with nontraditional grades such as CR (credit), P (pass), S (satisfactory) may be transferable only if the grade represents a D (not D-) or better. Generally, courses with nontraditional grades will be accepted as elective credit only and will not fulfill UH Mānoa, college, school, or departmental requirements.

- Courses receiving no credit: Courses not accepted for transfer credit include (but are not limited to) the following:
  - Courses from unaccredited institutions: Course work taken at any institution not fully accredited by a regional U.S. accrediting association is not transferable. After completing a minimum of 30 credits at UH Mānoa with a GPA of 2.0 or better, a student may be granted credit for course work completed at unaccredited institutions which were candidates for accreditation at the time of the student's attendance there. No more than 60 credits from such institutions may be applied to degree requirements at UH Mānoa.
  - Developmental or remedial courses
  - Repeated or duplicate courses: Transfer credit is generally not awarded for courses that duplicate material for which academic credit has already been given. Credit will not be awarded for a repeated course in which a passing grade was previously earned, nor for more than one version of a cross-listed course.
  - Courses that provide instruction in a particular religious doctrine
  - Vocational or technical courses
  - Mathematics courses considered below college level: courses include (but are not limited to) basic math and business math.

### Admission of International Applicants

International students wishing to apply should request an application and a form called "Supplementary Information for International Students." The deadline is **January 5** for fall admission and **September 1** for spring admission. If admitted, international students must receive two clearances in order to register: (1) University Health Services clearance documenting adherence with health regulations, and (2) International Student Services (ISS) clearance documenting adherence to international student regulations and proof of adequate health insurance. **Note:** International applicants with a non-immigrant visa status other than student status should contact the ISS. Federal restrictions on full-time study may apply.

### Additional Requirements

**Transcripts.** In addition to the application, applicants must present evidence of having completed or received the equivalent of a U.S. high school diploma. Official transcripts of all secondary and postsecondary work must be sent directly to the Office of Admissions by each institution attended. Certified photocopies of the certificates and results of any qualifying examinations (e.g., General Certificate of Education) must also be submitted. Certified English translations must be attached to documents and transcripts written in a foreign language.

Applicants enrolled in a secondary school or another college or university must have a final transcript submitted to the Office of Admissions at the end of the current term. Until this is received, any acceptance is provisional. Failure to submit the transcript or to complete the semester's/year's work satisfactorily will result in denial of admission and/or cancellation of registration.

**Examinations.** Applicants also must submit official results of the SAT or American College Test (ACT) (see "SAT or ACT") and the Test of English as a Foreign Language (TOEFL). These examinations are normally required of all foreign applicants, including students who either have been

admitted to or have matriculated at other universities. SAT applications may be obtained by writing to the College Board, P.O. Box 025505, Miami, FL 33102. ACT applications may be obtained by writing to the American College Testing Program, P.O. Box 414, Iowa City, IA 52243. TOEFL applications may be obtained by writing to Educational Testing Service, P.O. Box 6151, Princeton, NJ 08541.

**ACT or SAT Exemptions.** Students who have earned at least 24 semester hours of acceptable credits—excluding English Language Institute and/or English as a Second Language courses—are exempt from submitting the ACT or SAT results. The credits must have been completed at a regionally accredited U.S. college or university and must be equivalent to UH Mānoa offerings.

**TOEFL Requirements and Exemptions.** Applicants are required to score a minimum of 61 (internet-based), 173 (computer-based), or 500 (paper-based) on the TOEFL. The following applicants are exempt from the TOEFL examination: (a) those whose native language is English; (b) those who hold a bachelor's or master's degree from a regionally accredited university in the U.S. or a recognized university in Australia, Britain, Canada (excluding Quebec), Ireland, or New Zealand; (c) those who score 510 or better on the verbal and 510 or better on the writing sections of the SAT; (d) those who score 22 in English and 22 in reading sections of the ACT; (e) those who have completed six years of continuous schooling through the high school or college level in American Samoa and/or Guam and in one of the countries listed above under (b); (f) those who have completed English composition at a regionally accredited U.S. institution with a D or better grade; or (g) those who completed at least three years of high school in Hawai'i with a cumulative GPA of 3.2 and SAT critical reading of 460 and SAT writing of 460. Admission to summer ELI classes does not imply a waiver of the TOEFL exam for fall or spring semester admission.

**English Language Institute.** International and immigrant students who are admitted to UH Mānoa and whose native language is not English are referred to the English Language Institute to determine if they must take the ELI placement tests and the Mānoa Writing Placement examination. If a student does not fulfill this obligation, ELI will place a hold on the student's registration. Please contact the Department of Second Language Studies for additional information. (See the "ELI" section of this *Catalog*)

### Admission of International Exchange Students

Students matriculating at a university outside the U.S. may apply for admission as an international exchange student in the third or fourth year of study, through the Mānoa International Exchange (MIX). Admission may be granted for a maximum of two semesters as a "Visiting Student." Priority is given to students from institutions with a formal exchange agreement with UH; however, other qualified students from any foreign institution may also be considered.

Those sponsored by their home government or an external scholarship program such as Fulbright or Rotary International may also be admitted as exchange students, either as a classified, degree-seeking student, or as a non-degree visiting student. Exchange students may enter the U.S. under either the F-1 or J-1 visa, depending on the funding source and preferences of the sponsoring agency.

Exchange students must submit standard admission materials, official TOEFL scores of 68 (internet-based), 190 (computer-

based), or 520 (paper-based) unless exempt (see “Admission of International Applicants” for exemption criteria), and for those engaged in non-degree study, a special MIX application. For further information, contact International Student Services, Queen Lili‘uokalani Center for Student Services, 2600 Campus Road, Honolulu, HI 96822 or visit [www.hawaii.edu/issmanoa](http://www.hawaii.edu/issmanoa).

### Admission of Returning Students

A student who experiences a break in enrollment at UH Mānoa without having taken an approved leave of absence or who has been suspended or dismissed must apply for readmission. A student who has attended another college or university, or UH campus subsequent to attendance at UH Mānoa must apply as a transfer student (see “Admission of Transfer Applicants”). Readmission is not automatic because of enrollment limitations and changes in academic regulations. Students who are readmitted will be subject to the General Education Core, major, and graduation requirements in effect at the time of readmission. Questions concerning readmission should be directed to the student academic services office in the college/school to which the student is applying.

### Admission of Unclassified Students

Persons who wish to take UH Mānoa courses but do not wish to enroll in degree programs may apply for admission as unclassified students through the Office of Admissions. Undergraduate applicants must meet the admission standards for a regular classified, degree-seeking undergraduate. Post-baccalaureate applicants should contact the Graduate Division.

Classified applicants receive admission priority; thus, unclassified applicants may be denied admission because of enrollment restrictions.

Persons interested only in taking courses offered by Outreach College should refer to the “Outreach College” section of the *Catalog*, or should inquire at Outreach College, (808) 956-7221 or (1-800) 862-6628.

### High School/Dual Enrollment Program

High school students who have demonstrated exceptional academic achievement, have completed most of their high school graduation requirements, and can no longer benefit from high school offerings may enroll concurrently in UH Mānoa courses while enrolled in high school. Eligibility is restricted to high school juniors and seniors.

Students wishing to take advantage of this program should follow the procedures for “Admission of Freshmen.” Eligible students must present outstanding high school grades and SAT or ACT scores, be recommended by school authorities, and have the permission of their parent(s) or legal guardian to participate in the High School/Dual Enrollment Program.

Regular UH Mānoa admission deadlines, normal tuition and fee schedules, course prerequisites, and admission requirements other than high school graduation all apply to the High School/Dual Enrollment Program.

### Application Procedures

To obtain an admission application form and/or related information, prospective students should consult their high school counselors (in Hawai‘i) or write to the Office of Admissions, 2600 Campus Road Room 001, Honolulu, HI 96822. The application is also available online ([apply.hawaii.edu](http://apply.hawaii.edu)). The

application is valid only for the semester specified. For deadline information, refer to the “Calendar.”

For information regarding application procedures for non-U.S. citizens and/or nonnative speakers of English, refer to “International Admission Process.”

### Deadlines

The admission application initial deadline for the fall semester is **January 5**; the final deadline is **May 1**. The initial deadline for the spring semester is **September 1**; the final deadline is **October 1**. Some professional schools and individual programs may have earlier deadlines. Consult the appropriate student academic services dean for specific deadlines.

In addition to the application form, applicants must submit official test scores and arrange to have official transcripts of all schools, colleges, universities, business, and postsecondary schools attended sent directly from each institution involved by the appropriate deadline. Unofficial transcripts, hand-carried transcripts, faxed transcripts, and student copies of transcripts or grade reports will not be accepted. All other required credentials, as noted in the application, should also be sent with the application form. No applications, even those received before the closing date, will be acted upon after enrollment is filled for a program. Applications and documents submitted to UH Mānoa are deemed the property of UH Mānoa and therefore will not be returned to the applicant nor be available for copying.

### Application Fee

Applications must be accompanied by a nonrefundable, non-transferable application fee. The application and fee are valid only for the semester specified on the application.

### Special Instructions

#### Student Identification Numbers

UH Mānoa will issue student identification numbers at the point of acceptance and intent to enroll to all students for use as his or her permanent identification.

#### Student Ethnicity Data

Students are urged to supply racial/ethnic information on applications and other forms when requested, since UH Mānoa must provide a number of federal, state, and educational agencies with this data each year. Whenever such information is lacking, UH Mānoa personnel must make an educated guess. Self-identification is preferable.

## Email Correspondance

Electronic mail is a Board of Regents approved communications method. Email communications to students will be sent to email addresses submitted on the students' admissions application. Email communications will be sent to the student's University of Hawaii email address after the student's user account has been established.

## Change of Address

Students are responsible for keeping UH Mānoa's Office of the Registrar (Queen Lili'uokalani Center for Student Services 010) informed of their correct address (i.e., mailing, permanent, email, etc.). Change of address may also be completed through the *MyUH Portal* at myuh.hawaii.edu.

## Misrepresentation

By UH Mānoa policy, all applicants for admission are **required** to list all current and previous enrollment in any postsecondary institution on the application form. Applicants for admission who fail to inform UH Mānoa of such enrollment at the time of application or who submit, or have submitted on their behalf, any required information or document that is inaccurate, incorrect, or fraudulent or that has been altered without proper authorization may be denied admission to UH Mānoa. If the omissions and/or alterations are discovered after the student is enrolled, the student's admission may be rescinded and his or her enrollment canceled. Credits earned at any unreported college or school are not accepted in transfer. The student or prospective student may also be referred to the Student Conduct Committee for possible disciplinary action.

## Academic Advising

Academic advising at UH Mānoa is an expression of our educational mission and ideals. Advising helps students to integrate and discern meaning from the many facets of their academic journey and to locate their unique journey within the context of their hopes, dreams, abilities, goals, interests, and in fact, within the full trajectory of their lives. Advising conveys higher education's modes of thinking, learning, and decision making, teaches students to think critically about their roles and responsibilities, and encourages students to become active members in our higher education community as well as leaders in our global community.

Overseen by the Assistant Vice-Chancellor for Undergraduate Education and coordinated through the Council of Academic Advisors, academic advising is college- and school-based, so that students' primary connection remains with their academic unit.

UH Mānoa provides academic advising for undergraduate students through the student academic services office in their college/school. In addition, students can log onto the STAR system via *MyUH Portal* (myuh.hawaii.edu) to see how courses taken might fulfill degree requirements. STAR is an advising tool that allows students to manage their academic coursework, but should not be considered a substitute for meeting with advisors to verify degree requirements. Academic advisors bring to their responsibilities as educators not only knowledge of academic disciplines, but also understanding of the rationale that underlies the curricula of the colleges, schools, and UH Mānoa. Students are strongly encouraged to seek advising assistance early in their academic journeys.

Academic advising involves:

- Assisting students in clarifying, articulating, and attaining academic and life goals;
- Facilitating students' adjustment to the campus;
- Educating students on how to develop educational plans and assess their academic progress;
- Explaining and clarifying requirements, policies, and procedures;
- Encouraging students to think critically about their roles and responsibilities as students and as members of a democratic and global community;
- Helping students locate and access available resources and to engage in the UH Mānoa community;
- Counseling students on personal issues as they relate to academic progress; and
- Serving as advocates and mediators for students.

College or school advisors complement departmental advisors, who are specialists in their subjects. Departmental advisors advise on major requirements, available opportunities, career options, and graduate or professional degrees in their discipline. Students can locate their academic advisors at manoa.hawaii.edu/academics/advising.

## Mandatory Advising and Declaration of Majors

All students will benefit from two major academic policies related to advising. First, they will receive mandatory advising every semester for their first two years. Second, students will be required to declare their major prior to the start of their junior year. These policies were introduced to encourage early identification of potential majors, support efficient graduation, and promote each student's engagement in his or her academic journey.

## Registration and Enrollment

### Registration Procedures

Registration is open to those students officially admitted to UH Mānoa by the appropriate admissions office and to students in good standing who are continuing in an approved program of study. Students who have graduated, withdrawn, or have not been continuously enrolled must complete the admission process before being permitted to register. New, transfer, and returning classified students who are admitted to UH Mānoa are required to pay a nonrefundable, nontransferable tuition deposit to confirm their admitted status. Admitted students may be barred from registration until they have complied with all UH requirements, including but not limited to, medical clearances, the purchase of health insurance by nonimmigrant foreign students, and required English language placement testing. Students may also be barred from registering until they have cleared all academic or financial obligations.

Students are assigned specific appointment times in which to register. All registration activity is conducted by personal computer through the World Wide Web. The *MyUH Portal* website at myuh.hawaii.edu provides the UH community with secure, personalized access to enrollment services such as registration. Each student's registration time will be available through the *MyUH Portal* approximately two weeks before registration.

Information on registration procedures is contained in the online *Registration Guide* at www.hawaii.edu/myuh/manoa/, which includes registration dates and instructions. The *Registration Guide* is available shortly before registration begins each fall and spring semester. The listing of course offerings with up-

to-date class location and meeting times is found at the Check Class Availability website: [www.sis.hawaii.edu/uhdad/avail\\_classes?i=MAN](http://www.sis.hawaii.edu/uhdad/avail_classes?i=MAN).

Unclassified students and auditors register after classified students.

### Auditors

Auditors are regularly admitted students who enroll for informational instruction only, and attend classes with the consent of the instructor. Auditors receive no credit, and they do not take course examinations. The extent of their classroom participation is at the instructor's discretion. Auditors are not generally allowed in art studios, laboratory science, mathematics, elementary and intermediate Hawaiian and foreign languages, creative writing, English composition, physical education, communication and other performance courses, or in classes where they might displace credit students. Audit courses are entered on student transcripts with a grade of L and are subject to regular tuition and fee charges. Audit courses are not counted in determining a student's enrollment status.

### Late Registration

Students who failed to register during the designated registration period may still register for credit during the first 10 calendar days of instruction (see the "Calendar"). There is a fee for late registration.

### Maximum Registration

Undergraduate students who request enrollment in 20 or more credit hours of work in any semester must obtain special approval from their college student academic services office and process their changes during the Change of Registration period after instruction begins. Students may not register for courses in Outreach College, for credit or audit, in excess of the maximum registration allowed by the college/school in which they are enrolled unless given permission for an overload by the college/school.

### Enrollment Status

For academic purposes, students may be classified as either part-time or full-time students. A full-time undergraduate carries a minimum of 12 credit hours. Undergraduate students carrying fewer than 12 credits are classified as part-time. Audited courses are not counted in determining the enrollment status of a student.

### Change of College or Major

Classified students may apply for transfer from one college to another during the fall or the spring semester. Application for transfer must be made on a form supplied by the student academic services office of the college/school that the student wishes to enter. The application must be approved by the dean of that college/school. Deadlines for transfers within UH Mānoa are determined by individual student academic services offices. Contact the college/school directly for deadlines. Students planning to transfer into professional schools should consult the dean's office for deadlines. Students wishing to enter the College of Education should follow the procedures specific to that college.

Changes of college, school, curriculum, or major are not permitted during registration periods.

Unclassified students who wish to become degree candidates must complete the regular application process.

### Changes in Registration

All deadlines for adding courses, partial withdrawal, or complete withdrawal are subject to change. Refer to the current *Registration Guide* for applicable deadlines and procedures.

### To Add a Course

Courses may be added during the first 10 calendar days of instruction.

### To Drop a Course (Partial Withdrawal)

A course may be dropped through the sixth day of instruction without notation on the student's record. Thereafter, grades of W will be posted. The colleges/schools differ in their policies, but, in general, a course may be dropped from the seventh day of instruction up to Friday of the ninth week of instruction with the consent of the instructor and the approval of the student's college/school dean.

After the ninth week no withdrawals are permitted except for unusual or extenuating circumstances beyond the control of the student. These withdrawals require the consent of the student's college/school dean, and consent may be given only after the dean consults the instructor.

If students do not officially complete the withdrawal procedure, an F or NC, as appropriate, may be awarded by the instructor in place of a passing grade.

### Complete Withdrawal

Students occasionally find, for a wide variety of reasons, that they are unable to complete the semester and need to withdraw completely from the university. Students should note that once school starts, they have incurred a financial obligation to the university. Withdrawing completely from UH Mānoa does not release the student from his or her financial obligations.

Prior to the first day of instruction, students can withdraw online. No course registration will appear on their records, and the students will incur no financial obligation for tuition and fees.

From the first to the sixth day of instruction, students withdrawing completely from UH Mānoa will have a withdrawal action noted on their records. No courses will be listed for that semester.

From the seventh day through the ninth week of instruction, students withdrawing completely from UH Mānoa will receive a W grade for each course on their record.

After the ninth week of instruction, students are not allowed to withdraw except in unusual or extenuating circumstances beyond their control. Withdrawing after the ninth week requires petitioning for approval from the student's college/school dean. Students who receive approval will receive a W grade for each course on their record.

To apply for a complete withdrawal, students should see the student academic services office of their college/school. Once the student receives approval to withdraw, the student must obtain all signatures as indicated on the forms and submit the completed forms to the UH Mānoa Cashier's Office.

Complete withdrawal does not release the student from his or her financial obligations to the university. The refund schedule for withdrawal is noted in both the "Tuition, Fees, and Financial Aid" section of this *Catalog* and in the *Registration Guide*.

When withdrawing, a continuing classified undergraduate student who has completed at least one semester at UH Mānoa may choose to apply for a leave of absence. Leave of absence forms are available through the student academic services office

of the student's college/school and require approval by the college/school dean. Students who do not obtain a leave of absence must apply for readmission by submitting the UH System Application Form to the Office of Admissions before the specified deadline and must be readmitted before they are able to register.

### Retroactive Withdrawals

Retroactive withdrawals are partial or complete course withdrawals processed after the semester has ended. UH Mānoa is obligated to insure the integrity of the transcript as an historical document, which must reflect the actual history of a student's experience at UH Mānoa. Because of this, the student who is requesting a retroactive withdrawal will need to present a convincing case and provide relevant documentation that supports the existence of circumstances beyond their control that prevented them from initiating the withdrawal request in a timely manner. Any request submitted two or more years after the course ended will not be reviewed. Should a retroactive withdrawal be approved, the action will result in the grade being changed to a W. Tuition refunds will not be considered and any academic action applied for that semester will remain on the student's record.

If you were a financial aid recipient during the semester in which you are seeking a withdrawal, be sure to check with Financial Aid Services to determine whether this will result in a financial obligation or future ineligibility for financial aid.

### Credits and Grades

Work accomplished by students is usually recognized in terms of credit hours, grades, grade points, and grade point averages.

Students must complete a minimum of 120 (45 upper division (300+ level)) credits and have a minimum of a C (not C-) average (minimum GPA of 2.0) to earn a baccalaureate degree. Colleges, schools, and degree programs have specific requirements. Students should check with their college/school advisor.

### Credit Hours

Credit hours (or credits) for course work are determined on a semester or semester-equivalent basis for work satisfactorily accomplished. Credit hours granted for specific courses are listed in this *Catalog* and the *Check Class Availability* website each semester.

### Grades

Student achievement is designated by the following grades: A+, A, A- (excellent), B+, B, B- (above average), C+, C, (average), C-, D+, D, D- (minimal passing), F (failure), CR (credit), NC (no credit), I (incomplete), and L (audit). A grade of I is given to a student who has not completed a small but important part of a semester's work if the instructor believes that the incomplete was caused by conditions beyond the student's control. Each student receiving a grade of I should consult his or her instructor promptly to determine the steps to be taken and the deadline to complete the course work for changing the grade of I to a final grade. The designated November and April deadlines (see the "Calendar") refer to the dates instructors must report adjusted grades. Student deadlines for completing their course work must be adjusted accordingly.

An instructor recording a grade of I on the final grade sheet will also record the grade that will replace the I if the work is not made up by the deadline; that grade is computed on the basis of what grades or other evidence the instructor does have,

averaged together with Fs or zeros for all incomplete work (including the final examination, if it has not been taken). If the work is completed prior to the deadline, the instructor will report a change of grade, taking the completed work into consideration. If the instructor does not submit a grade to replace the incomplete, the grade of I will be replaced by an F or an NC (as appropriate) as of the April or November deadline. All grades of I must be cleared by a student's college prior to graduation.

### Credit/No Credit Option

The credit/no credit option encourages students to broaden their education by venturing into subjects outside their fields of specialization without risking a relatively low grade. The CR designation denotes C (not C-) caliber work or better. However, students should be aware that some colleges and many graduate and professional schools evaluate CR as C and NC as F. The same is true of some employers and scholarship awarding agencies.

Certain courses may be designated as mandatory CR/NC. In addition to any such mandatory CR/NC courses, no more than 40 credit hours of CR may be counted toward the degree. Neither CR nor NC is computed in the grade point average. The CR/NC option must be exercised during the registration period. The CR/NC option is limited to elective courses; this option is not allowed for any course taken to fulfill a UH Mānoa undergraduate general education, college, school, or department nonelective requirement, with the exception of those courses offered for mandatory CR/NC.

### Grade Points

Grade points for each credit hour received in a course will be computed as follows:

A+ = 4.0	B+ = 3.3	C+ = 2.3	D+ = 1.3	F = 0.0
A = 4.0	B = 3.0	C = 2.0	D = 1.0	
A- = 3.7	B- = 2.7	C- = 1.7	D- = 0.7	

Students entering as undergraduates are not given grade points for work done outside UH Mānoa.

### Grade Point Averages

Grade point averages (GPA) are determined by dividing the total number of grade points by the total number of credit hours for which a student has received letter grades (excluding I, NC, CR, W, or L).

The semester GPA is calculated on any one semester's credits and grade points. The cumulative GPA is calculated on all such work taken at UH Mānoa.

### "Repeatable" Courses

Some courses are designated "repeatable" in the *Catalog* and can be taken for credit a limited number of times, as indicated by the course description.

Students may take "repeatable" courses as many times as allowed by the *Catalog* description. For these courses, all grades are permanently recorded on the transcript and impact the Grade Point Average, (GPA). Students can count up to the designated limit of credits toward degree requirements.

When students take "repeatable" courses beyond the designated limit, grades continue to be recorded on the transcript,

but those grades do not impact the GPA and the credits are not counted toward degree requirements.

All courses that are not designated “repeatable” can only be taken for credit once. This means that only one set of credits (i.e., 1 credit for a 1-credit course; 3 credits for a 3-credit course, etc.) can count toward degree requirements, even if you repeat the course.

UH Mānoa will not provide financial aid for a course that is not listed as repeatable in the course description or if a student repeated the course more than the number of times listed in the course description. Financial aid recipients who are repeating courses should see the Financial Aid Services Office with any questions.

### Repeating Failed Courses

Students who receive an F or NC earn no credits. Students may repeat any course in which they received an F or NC for that semester. Starting with Fall 2012, for courses taken as a repeat, the last grade received for the course shall be included in the student’s cumulative GPA. The grade from the previous attempt shall be excluded from the GPA. Grades for each attempt are permanently recorded on the transcript.

### Repeating Courses with Grades of C-, D+, D, or D-

Students who receive grades of C-, D+, D, or D- earn the credits for that course. Students may repeat any course in which they received a grade of C-, D+, D, or D-. Starting with Fall 2012, for courses taken as a repeat, the last grade received for the course shall be included in the student’s cumulative GPA for that semester. The grade from the previous attempt shall be excluded from the GPA. Grades for each attempt are permanently recorded on the transcript. Only one set of credits (i.e., 1 credit for a 1-credit course; 3 credits for a 3-credit course, etc.) can count toward degree requirements. Students should check with their academic advisor on repeating courses that they have already received a minimal passing grade.

For students who receive financial aid repeating courses in which they received a grade of C-, D+, D, or D-, their enrollment status may not include the repeat course and may affect the amount of aid received. Students should check with the Financial Aid Services Office on repeating courses that they have already received a minimal passing grade in regards to their eligibility for financial aid.

### Repeating Courses with Grades of C or Higher

Students who have already received a grade of C or higher for a course that is not designated as “repeatable” may repeat it only with the permission of the instructor or of the department offering the course. Grades for each attempt are permanently recorded in the transcript, but only the first grade (not the repeat) is included in the GPA. Only one set of credits (i.e., 1 credit for a 1-credit course; 3 credits for a 3-credit course, etc.) can count toward degree requirements.

For students on financial aid, repeating courses in which they received a passing grade, their enrollment status will not include the repeat course and may affect the amount of aid received.

### Duplicate Credits

Students can earn only one set of credits (i.e., 1 credit for a 1-credit course, 3 credits for a 3-credit course, etc.) for courses that are equivalent or comparable in content. Examples include:

- Cross-listed courses (e.g., BIOL 402 and MBBE 402)

- Transfer equivalencies (e.g., ZOOL 141 and PHYL 141, ENG 255 and ENG 271)
- Different levels of the same material (e.g., CHEM 151 and CHEM 161)
- Equivalent credits earned through exams, such as AP, IB, CLEP, etc.

### Backtracking

“Backtracking” refers to taking either a prerequisite course or the lower level course in a tracked sequence concurrently with or after a more advanced course. Examples include:

- Completing Korean 211 and then taking Korean 102, its prerequisite
- Completing Japanese 202 and then taking Japanese 101, a lower level
- Taking Math 432 and then taking Math 431, a two-semester sequence that must be taken in order

If students choose to backtrack, credit is not awarded for the lower-level/prerequisite course, and although the grade is recorded in the transcript, it does not impact the GPA. In some cases, students may backtrack with the express permission of the student’s college/school academic services office.

### Excess Credit Policy

A student who by the end of any semester has earned 24 credit hours beyond those required for graduation and has fulfilled all specific program and UH requirements may be graduated by action of the student’s college/school.

### Grades

Grades are available through the *MyUH Portal* one week after the final examination period each semester. Grades for courses taken through Outreach College do not follow this schedule.

### Examinations

#### Course Examinations

Final examinations are required in all undergraduate courses (except writing courses, directed reading, creative arts, research, seminars, internships, and field experiences) and must be taken during the scheduled examination period. No examinations (other than laboratory tests and short quizzes) are allowed during the two calendar weeks before the last day of instruction. Take-home final exams may be distributed at any time but may not be required to be turned in before finals. The schedule of final examinations is published in the *Registration Guide*.

#### Language Courses

Students who plan to continue the study of a language begun elsewhere must take a placement test to determine the course in which they should enroll.

For specific regulations governing courses that native or bilingual speakers may take for credit, students should consult the department chairs of European languages, East Asian languages, Hawaiian language, or Indo-Pacific languages.

#### Advanced Placement Examination

The Advanced Placement examinations are administered in high schools by the Educational Testing Service for the College Entrance Examination Board for students who have completed specific college-level courses in high school. Students should consult the Office of Admissions for the most current UH Mānoa credit granting policy.

## Credit by Examination

Students who wish credit by examination for basic courses in calculus, general biology, general chemistry, economics, English literature, psychology, and sociology should consult the Counseling and Student Development Center. Students apply to the center, pay the fee, and take the corresponding subject examination under the College-Level Examination Program (CLEP). A satisfactory score on these examinations, as determined by the appropriate department, yields course credit.

If a written exam is appropriate in other courses, it is prepared under the auspices of the department concerned, is more comprehensive than the usual “final examination,” and is designed to serve as the scholastic equivalent of the course.

Applicants must be enrolled classified students; must present evidence that they have a mastery of the content of the courses (but have not received college credit); must apply, with department approval, to the dean’s office by the specified deadline; and must pay the current fee. Applications are available in the college/school student academic services office.

Courses passed by examination do not carry grades or grade points.

## Recognition of International Baccalaureate

UH Mānoa recognizes the international baccalaureate for course credit. Students should submit higher-level examination scores to the Office of Admissions. Course credit is granted for acceptable scores. Contact the Office of Admissions for more information.

## Academic Programs

### Undergraduate Certificate Programs

UH Mānoa offers a number of undergraduate certificate programs, some of which are interdisciplinary. Certificates require a minimum of 15 credit hours of specified courses and a 2.5 GPA in those courses.

Undergraduate certificate programs are listed in the “Degrees, Minors, and Certificates” section.

### Bachelor’s Degree

#### Objectives

Institutional learning objectives include both academic and co-curricular learning and are listed on page 25. The baccalaureate academic program provides the student with a coherent undergraduate education that includes a comprehensive set of integrated learning opportunities. There are five basic components (listed below). Students can see the five components and requirements on bachelor degree program sheets at [manoa.hawaii.edu/ovcaa/programsheets/](http://manoa.hawaii.edu/ovcaa/programsheets/).

#### Requirements

**General Education Requirements.** The General Education requirements are based on the conviction that an educated person has access to a shared body of knowledge; a comprehension of the major divisions of learning; and an understanding of the commonality in our ways of thinking, of experiencing self, and of acquiring new knowledge and skills. The common body of knowledge focuses broadly on heritage; values; political, economic, and social life; and a relationship with nature. Its study requires critical reading and listening, careful judgment, and clear exposition. The common thread in general educa-

tion is the interconnectedness of human knowledge. See the “Undergraduate General Education Requirements” section for more information.

**Graduation Requirements.** See the “Focus” and “Hawaiian or Second Language” parts of the “Undergraduate General Education Requirements” section.

**Degree Requirements.** Some programs have degree-specific requirements, such as course requirements that distinguish a Bachelor of Arts from a Bachelor of Science.

**College or School Requirements.** Colleges/schools may specify which General Education courses should be taken to meet their requirements. They may also have additional requirements. Students should refer to specific college/school sections for more information.

**Major or Academic Specialization Requirements.** The major consists of a specific number of credit hours and required courses in a particular field or discipline and related courses in other subjects that are associated with and contribute to that discipline. Students must satisfy the requirements for the selected major and, if applicable, the minor or concentration selected. Detailed information can be found in the appropriate major or academic specialization sections. Students may also consult the bachelor degree program sheets at [manoa.hawaii.edu/ovcaa/programsheets/](http://manoa.hawaii.edu/ovcaa/programsheets/).

**Minor Requirements.** Some departments offer a minor, which is a set of courses that relate to an approved baccalaureate degree. A minor course of study consists of a minimum of 15 credit hours of non-introductory work (i.e., upper division courses and 200-level courses that have a college-level prerequisite) that is completed with a grade of C (not C-) or better. Minors are listed in the “Degrees, Minors, and Certificates” section.

#### Concurrent Degrees

Qualified students may seek concurrent undergraduate degrees in any two different schools or colleges. Admission is subject to approval by both schools or colleges; priority for admission into any baccalaureate program is given to students seeking their first undergraduate degree. Students seeking concurrent degrees must (1) have a 3.25 GPA and show strong promise of success in the proposed concurrent programs; (2) complete the college, academic specialization, and graduation requirements for **both** colleges or schools; (3) complete the General Education Core Requirements in their initial degree program; and (4) complete a minimum of 30 credits in each degree program. Concurrent degree students may not use the same course to satisfy major requirements in both degree programs, unless the specific course is required by both programs. Interested students must complete the UHM-3 Form (UH Mānoa Concurrent Undergraduate Degree Application), which may be obtained from academic advisors.

#### Second Bachelor’s Degree

Applicants for a second bachelor’s degree must meet admission and graduation requirements of UH Mānoa, the college/school and the academic specialization. Students seeking their first bachelor’s degree have priority for admission and registration. Admitted students should confer with their academic advisors about graduation requirements.

## Graduation Requirements and Policies

### Progress Toward the Bachelor's Degree

Students are expected to complete their academic work and apply for a degree in a timely manner (see "Excess Credit Policy"). The department or program in which the student is pursuing a degree may decide that certain courses required for the major that were taken in the past must be retaken. Courses that are declared outdated for the major will still count toward the General Education Core if they meet core requirements. Students should consult with their academic advisor in their major field of study for details.

### Residency Requirements

Students must earn a minimum of 30 credit hours in residence (i.e., taking credit courses or their equivalent by examination) at UH Mānoa. However, meeting the residency requirements does not necessarily mean that degree requirements have been met; the latter are determined by individual colleges or schools.

A degree candidate must be registered and in attendance during the semester (or summer session) he or she completes the requirements for his or her degree, unless permission has been given for graduation in absentia by the appropriate college/school dean.

### Application for Degree

An application for graduation must be obtained at the student academic services office of the appropriate college/school. This must be done by the deadlines specified in the "Calendar."

## Academic Honors

### Dean's List

Undergraduate students are awarded the Dean's List distinction if they: (1) earn a semester grade point average of 3.5 or higher based on 12 credits or more taken for a grade, and (2) do not receive grades of W, I, F, or NC for that semester. The grades used for calculation of grade point average will be those earned by a date determined by the Office of the Registrar. Colleges or schools may establish independent criteria for the award of Dean's List distinction with the approval of the Vice Chancellor for Academic Affairs.

### Graduating with Honors

Honors degrees are granted only to participants in the UH Mānoa Honors Program (see page 21).

### Graduating with Distinction

Graduating seniors who have completed 30 or more credit hours of work at UH Mānoa with the following cumulative GPA are eligible for graduation with distinction as noted:

- 3.5 to 3.74 *cum laude*
- 3.75 to 3.9 *magna cum laude*
- over 3.9 *summa cum laude*

Graduation with distinction is subject to the following stipulations:

1. The 30 or more credit hours from UH Mānoa must come from courses carrying grade points (this excludes CR/NC);
2. The cumulative GPA for graduating with distinction is calculated on the total college work (which encompasses academic work at UH Mānoa and all other colleges and universities, if any). This academic work includes both transfer-

able and nontransferrable credits carrying grade points but excludes CR/NC or other non-letter grade options such as pass/fail; and

3. Candidates for second degrees are not eligible.

The appropriate designations will be recorded on the diploma and transcripts.

### Honor Societies

Alpha Epsilon, *National Honor Society for Extension Service*  
 Alpha Kappa Delta, *International Sociology Honor Society*  
 Alpha Omega Alpha, *National Honor Society in Medicine*  
 Beta Alpha Psi, *National Accounting Honor Society*  
 Beta Gamma Sigma, *National Business Honor Society*  
 Beta Phi Mu, *International Library Science Honor Society*  
 Chi Epsilon, *National Civil Engineering Honor Society*

 Sigma Xi The Scientific Research Society, *National Sciences Honor Society*  
 Tau Beta Pi, *National Engineering Honor Society*  
 Tau Sigma, *National Honor Society for Transfer Students*

For further information on these honor societies, contact the appropriate academic unit.

### Satisfactory Academic Progress Toward a Degree, Minimum UH Mānoa Academic Standard, and Good Academic Standing

Once a student has attempted at least 24 college credits at UH Mānoa, he or she shall make satisfactory academic progress toward a degree and remain in good academic standing by maintaining a cumulative grade point average of 2.0.

## Academic Probation, Suspension, and Dismissal

No academic action shall be taken until a student has attempted 24 credit hours.

- Suspension and dismissal actions for all students will only be taken after spring semester.
- All students who have or would have had an academic action taken will be directed to see their academic advisor immediately and a “hold” will be placed on their registration until that meeting has occurred. The college advising office will work proactively with the student over the course of the semester to help improve academic performance.
- All retention and continuation data will be collected from colleges and units at the end of spring semester to assess the effectiveness of their intervention strategies.

Undergraduate and unclassified students seeking exemption for cause from regulations and requirements contained in this *Catalog* should consult the dean of student academic services of their college/school. UH Mānoa reserves the right to withhold the degree or to request the withdrawal of a student for cause.

### Probation

Students may be placed on academic probation at the end of any semester when their cumulative GPA falls below 2.0 or when they fail to maintain the minimum academic requirements of their college, school, or program. Probationary students may register for classes at UH Mānoa, but must achieve a current GPA of at least 2.0 in each probationary semester to be allowed further registration. Failure to meet these conditions may result in suspension or dismissal.

Unless an extension has been granted by the college/school’s student academic services dean, students may be put on probation if they have taken 24 credit hours beyond those required for graduation but still have not completed their specific program requirements.

Regulations governing academic probation will be applied at the end of each semester.

### Suspension

Students may be suspended when they fail to achieve a cumulative GPA of at least 1.7 after attempting 24 credit hours or when they fail to meet the terms of probation.

Once suspended, a student is not eligible for readmission to UH Mānoa or Outreach College for one full semester (fall or spring). A suspended student who is currently registered in an Outreach College summer course may complete the course. However, completion of the course will not change the suspension.

Regulations governing academic suspension are applied at the end of each spring semester.

### Applications for Return from Suspension

Students who wish to return after suspension should apply to the Office of Admissions—for the fall semester by the initial deadline of **January 5** or final deadline of **May 1**, and for the spring semester by the initial deadline of **September 1** or final deadline of **October 1**.

Suspended students who attend another institution will be considered “transfer students” when reapplying to UH Mānoa, and must meet all transfer requirements. They will have their work evaluated by the college/school in order to determine eligibility for readmission.

Students who take no courses after being suspended for the required one semester are eligible to be readmitted into the college/school from which they have been suspended provided they submit an application form by the official deadline. However, readmission is not automatic if the student stays out beyond the required period.

Students readmitted after suspension are placed on probation and must meet the terms and conditions of probation as specified above. Failure to do so will result in dismissal.

### Dismissal

Students who have been suspended and who subsequently fail to maintain the minimum academic requirements of UH Mānoa or their college, school, or program or fail to meet the terms of probation may be dismissed. Such students will be readmitted only in unusual circumstances. Students admitted on probation may be dismissed if they fail to maintain the minimum academic requirements or to meet the terms of probation.

Once dismissed, a student is not eligible for readmission to UH Mānoa or Outreach College for a minimum of one academic year (fall and spring semester). A dismissed student who is currently registered in an Outreach College Summer Session course may complete the course. However, completion of the course will not change the dismissal.

Regulations governing academic dismissal are applied at the end of each semester (fall or spring).

The following conditions apply to students who have been dismissed one or more years:

1. To apply for readmission as a classified or unclassified student at UH Mānoa, the student should do so on the admissions application form, following established procedures and deadlines. The student must meet the standard admission criteria applicable to all students. The Colleges of Arts and Sciences require a written statement from the student explaining the circumstances of the dismissal and a rationale for reinstatement. If readmitted, the student is placed on academic probation and must meet established terms of probation;
2. To enroll in Outreach College, the student is eligible if he or she has attended any UH system campus or other regionally accredited college or university subsequent to the dismissal and earned a cumulative post-dismissal GPA of 2.0 or better for a minimum of 12 earned credits. Transcripts will be required to establish eligibility; or
3. To enroll in Outreach College, the student who has not earned a cumulative post-dismissal GPA of 2.0 or better for a minimum of 12 earned credits at another UH system campus or other regionally accredited college or university subsequent to dismissal may petition the dean of Outreach College for special enrollment consideration.

### Other Provisions

Upon finding that a student is suffering from a physical or mental condition detrimental to the student or to UH Mānoa, the vice chancellor for students will, on medical advice, recommend proper action to the appropriate college/school’s student academic services dean. The dean may request that the student be withdrawn officially, without prejudice or academic penalty. Readmission is contingent upon review and recommendation by the college/school’s student academic services dean and the vice chancellor for students.

## Leave of Absence

Continuing classified undergraduate students may apply for a leave of absence for a specified period of one or two semesters if they (1) have just completed their prior semester (fall or spring) at UH Mānoa, (2) are in good standing (neither on probation nor subject to suspension or dismissal), and (3) are not enrolled at any institution. Students who do not meet the requirements may consult their College Student Academic Services offices. Students may not take more than two regular semesters of leave before graduation; additional semesters of leave will be granted only under extenuating circumstances. The granting of a leave of absence indicates a continuing relationship with UH Mānoa and allows students to resume studies at a specific time without applying for readmission. Students who take a leave of absence will continue to be subject to the core, major, and graduation requirements in effect at the time their leave began.

Students have two options for taking an official leave of absence: (1) a planned leave, and (2) a leave taken at the time of withdrawal from UH Mānoa. To apply for a planned leave for the upcoming semester, students should submit an application for leave of absence prior to the beginning of the semester that the leave is to be taken. Application for a leave can also be submitted at the time of complete withdrawal from UH Mānoa. Applications for a leave of absence are available in the student academic services office at the student's college/school. The date of return from leave must be specified at the time of application.

Students who do not reenroll at UH Mānoa at the end of their leave of absence will be considered to have withdrawn without notice; they will be required to apply for readmission to UH Mānoa and will be subject to the core, major, and graduation requirements in effect at the time of readmission.

Students should be aware that taking a leave of absence may affect their residency status and eligibility for programs such as financial aid, intercollegiate athletics, etc. Upon return from an approved leave of absence, students may also find that registration in courses with fixed faculty/student ratios may be dependent upon availability of space.

## Programs

### Financial Literacy Program

Crawford Hall Room 225  
2550 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-6572  
Email: [finlit@hawaii.edu](mailto:finlit@hawaii.edu)  
Web: [manoa.hawaii.edu/undergrad/finlit/](http://manoa.hawaii.edu/undergrad/finlit/)  
Coordinator: S. Miyashiro

The Financial Literacy Program (FLP) provides tools and solutions to our UH Mānoa students equipping them to become responsible and financially independent by better managing their personal finances, improving their economic opportunity and to obtaining a desirable quality of life. FLP offers free workshops, presentations, seminars, resources and interactive activities on a variety of financial topics such as goal setting, personal budgeting, savings, obtaining and managing credit, student loans, investing, retirement, insurance and much more. Our workshops and seminars include practical tips and

strategies that students can apply to their personal financial situations. All of our services are available to our UH Mānoa community.

### First-Year Programs

Student Success Center  
Gregg M. Sinclair Library  
2425 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-8626  
Email: [freshman@hawaii.edu](mailto:freshman@hawaii.edu)  
Web: [www.manoa.hawaii.edu/undergrad/freshman/](http://www.manoa.hawaii.edu/undergrad/freshman/)  
Coordinator: K. Van Duser

First-Year Programs ease the transition of new students into the academic and social communities at UH Mānoa. First-Year Programs provide the opportunity to develop personal relationships with faculty and other students, enhance active involvement in the educational process, and build connections to UH Mānoa. In addition, First-Year Programs familiarize students with the array of resources and programs available at UH Mānoa.

### Access to College Excellence

Tel: (808) 956-8626  
Web: [manoa.hawaii.edu/undergrad/freshman/access-to-college-excellence/](http://manoa.hawaii.edu/undergrad/freshman/access-to-college-excellence/)  
Coordinator: K. Van Duser

Access to College Excellence (ACE) learning communities offer a combination of three general education courses and a small group, 1-credit integrating seminar (CAS 110: Integrating Seminar I). Courses are grouped to provide freshmen with an introduction to various academic perspectives while fulfilling graduation requirements. CAS 110 is led by an upperclassman peer mentor who supports freshmen cohorts in their new learning environment. Successful college students themselves, peer mentors assist with the development of successful academic strategies, creation of social and interpersonal networks, and involvement in a variety of campus events. ACE espouses a well-rounded, multifaceted approach to college education. Freshmen who are eager to learn, enthusiastic about making friends while increasing independence, and excited about getting involved will benefit from what ACE has to offer.

### Freshman Seminars

Tel: (808) 956-8626  
Web: [manoa.hawaii.edu/undergrad/freshman/program-overview/](http://manoa.hawaii.edu/undergrad/freshman/program-overview/)  
Coordinator: K. Van Duser

Freshman Seminars offers freshmen a variety of courses, which enable them to learn in small class environments (classes are limited to 10 students). The purpose of this program is threefold:

1. To create an intimate learning community for faculty and students who place a high value on the human dimension of education;
2. To provide students with small classes in which they take an active and responsible part and receive constant peer stimulation, support, and feedback;
3. To offer advanced students an opportunity to gain experience in leadership and mastery over their major by teaching.

The three credit seminars are mainly, but not limited to, General Education Core classes led by qualified advanced students under the direction of department faculty. These seminars provide valuable learning experiences for both the students taking the class and the students leading the class. Courses vary each semester, but may include: communicology, ethnic studies, library and information systems, political science, religion, and sociology. They are listed in the *Registration Guide* under each department.

## General Education Office

Bilger Hall 104  
2545 McCarthy Mall  
Honolulu, HI 96822  
Tel: (808) 956-6660  
Fax: (808) 956-9170  
Email: [gened@hawaii.edu](mailto:gened@hawaii.edu)  
Web: [www.hawaii.edu/gened](http://www.hawaii.edu/gened)  
Faculty Administrator: T. Sammons

The General Education Office (GEO) is the administrative support arm of Mānoa's faculty-governed General Education (GenEd) Program. GEO staff assist the faculty groups that oversee GenEd by coordinating faculty review of proposed and existing GenEd courses, maintaining records of the GenEd Program, and assisting with faculty development and training efforts.

## Honors Program

Greg M. Sinclair Library 128  
2425 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-8391  
Web: [manoa.hawaii.edu/undergrad/honors/](http://manoa.hawaii.edu/undergrad/honors/)  
Director: V. Gonzalez

The Honors Program provides opportunities for talented and motivated undergraduates to excel in their academic studies. Students complete a challenging enquiry-based curriculum that encourages learning through independent research and creative expression. They enjoy intimate and personalized educational experiences within the setting of a large research university through small classes, dedicated advising, peer mentorship, and faculty-guided projects. The Honors Program encourages critical thinking and excellence in oral and written communication; instills respect for diversity and commitment to social justice; and develops the capacity for civic engagement and leadership. It fosters among its students and faculty a sense of identity and a joy of learning, which it promotes within the university and beyond.

## Selected Studies

Selected Studies is the lower division component of the Honors Program. It offers both its own Honors courses, conducted in seminar format and specially designated "A Sections," which are small, discussion-based versions of regular departmental offerings. These courses are designed to meet the general education requirements of students in the Honors Program. A full list of Honors (HON) courses is available in the "Courses" section.

A certificate for Sophomore Honors is awarded to students in Selected Studies who complete sufficient credits in Honors courses and who maintain a minimum GPA of 3.25 in those courses and overall. In addition, a special notation is made on the student's transcript.

Admission to Selected Studies is by invitation to high school students with outstanding academic records and aptitude test scores. Others may be nominated or may apply with the recommendation of a high school teacher or counselor. UH Mānoa students may also apply in their first year with the recommendation of a university instructor.

## Upper Division

Honors degrees are awarded in most disciplines at UH Mānoa, but candidates must be enrolled in the UH Mānoa Honors Program. Upper Division Honors students take a sequence of 12 credits that culminates in a Senior Honors Project, which is independent thesis research or creative work completed under the supervision of a faculty member. The sequence begins with a Junior Honors Seminar and an upper-division seminar course on research methods. Subsequently, students pursue a two-semester program of independent research for the Senior Honors Project under the supervision of their faculty advisor. The Senior Honors Project is presented or performed at the Fall Forum or the Spring Symposium. The full list of courses is available in the "Courses" section of this *Catalog* under Honors (HON).

To graduate with Honors, students must complete the requirements for a bachelor's degree and maintain a minimum cumulative GPA of 3.2 in both their major and in their senior-junior years. In addition, at least one of these GPAs must be in the top 25% of the graduating class in their college/school. The Honors Council receives written assessments of performance from instructors and thesis supervisors for all coursework in Upper Division Honors, and receives a copy of the Honors Senior Project. Assessing this evidence, the Honors Council decides whether candidates are awarded "Honors," "High Honors," or "Highest Honors." Students receive a diploma, their achievement is acknowledged at Commencement, and a notation is made on their transcript.

Admission to the Honors Program is by invitation to those on Deans' lists, but others may be nominated or may apply with the recommendations of instructors and faculty at UH Mānoa. Students need at least three semesters to complete the requirements so it is best to apply in the second semester of the sophomore year or early during the junior year.

## Interdisciplinary Studies

Krauss 116  
2500 Dole Street  
Honolulu, HI 96822  
Tel: (808) 956-7296  
Web: [manoa.hawaii.edu/undergrad/is/](http://manoa.hawaii.edu/undergrad/is/)  
Director: J. Odin

The objective of the Interdisciplinary Studies (IS) Program is to provide students with an opportunity to pursue a course of study that is not restricted to conventional departmental or unit boundaries. A crucial feature is the advising process, which aims to develop the student's ability to formulate a major equivalent comprised of upper division courses with thematic integrity and continuity. This ensures flexibility in the curriculum while precluding loss of academic substance and rigor. Thus students create their own degree proposals that must draw upon no less than three disciplines in the UH Mānoa *Catalog* in the study of a particular problem or theme, along with specifically designed IS courses.

While the IS program encourages creation of individually-conceived curricula, it also serves to accommodate students in a variety of fields that lack an undergraduate major and are interdisciplinary in nature. These include:

1. Pre-professional majors (e.g., pre-law, pre-med, pre-optometry, pre-physical therapy);
2. Undergraduate majors that are established at UH Mānoa only as graduate programs (e.g., astronomy, educational psychology, linguistics); and
3. Interdisciplinary majors for which there is no currently existing department or program (e.g., criminology, gerontology, disability studies, health studies, globalization studies, international studies).

Students interested in these programs should see both the program in Interdisciplinary Studies for an orientation at Krauss Hall 116 and an advisor from the relevant program.

Degree proposals must focus upon the identified academic theme, be made in writing, and be accepted by the interdisciplinary studies faculty before the student enrolls for 21 of the 36 credits required in the major equivalent.

In all cases, IS students must satisfy the UH Mānoa degree graduation requirements and General Education Core in order to be eligible for a bachelor's degree. Students must also maintain a minimum 2.5 GPA for the major equivalent courses. These courses may not be taken CR/NC, unless mandatory. Successful candidates earn a bachelor of arts in Interdisciplinary Studies from the Colleges of Arts and Sciences in the appropriate interdisciplinary program.

Details about admission to the IS program offered in the Colleges of Arts and Sciences, and assistance in preparing an individually designed major are available at the program office.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Learning Assistance Center

Student Success Center, Gregg M. Sinclair Library  
2425 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-6114  
Email: [learning@hawaii.edu](mailto:learning@hawaii.edu)  
Web: [www.manoa.hawaii.edu/undergrad/learning/](http://www.manoa.hawaii.edu/undergrad/learning/)  
Director: R. Woodruff

The Learning Assistance Center (LAC) is a developmental education program that provides academic counseling services and assists students in developing learning skills to increase academic success. The LAC assists students in becoming autonomous, confident, and effective learners in order to successfully meet academic standards. It assists students in the ongoing development of academic and affective skills that contribute to positive adjustment and performance in the learning environment. Students can participate in individual or group sessions to become more proficient in managing time, reading, writing, taking notes, taking exams, and to enhance academic motivation. A tutoring program that provides help for courses that students find particularly challenging is available. Initial assessment, counseling and support services for students with learning disabilities are also provided.

### Mānoa Advising Center

Queen Lili'uokalani Center for Student Services 101  
2600 Campus Road  
Honolulu, HI 96822  
Email: [macadv@hawaii.edu](mailto:macadv@hawaii.edu)  
Web: [manoa.hawaii.edu/undergrad/MAC/](http://manoa.hawaii.edu/undergrad/MAC/)  
Director: M. Makino-Kanehiro

The Mānoa Advising Center (MAC) is an advising office for students who have not yet declared a major.

- MAC provides advising to select pre-majors (students who must apply/be admitted to or be selected as majors) such as Pre-Business, Pre-Medical Technology, Pre-Dental Hygiene, Pre-Social Work, Pre-Medicine, Pre-Pharmacy, and Pre-Law with special attention paid to admission requirements and planning to facilitate successful transition into their chosen majors.
- MAC assists exploratory students who have not yet selected a major with their selection process by presenting options and providing general education advising.

Students with declared majors are referred to appropriate major, school, and college advisors.

MAC is staffed by academic advisors and peer advisors (specially selected and trained upperclassmen).

### Mānoa Transfer Coordination Center

Student Success Center, Gregg M. Sinclair Library  
2425 Campus Road  
Honolulu, HI 96822  
Email: [niwasaki@hawaii.edu](mailto:niwasaki@hawaii.edu)  
Web: [manoa.hawaii.edu/undergrad/Transfer/](http://manoa.hawaii.edu/undergrad/Transfer/)  
Coordinator: Nicole Iwasaki

The Mānoa Transfer Coordination Center (MTCC) is to help students transfer smoothly from a UH community college to UH Mānoa and provide advising support throughout the transfer process, including the Ka'ie'ie Degree Pathway Program.

Transfer advisors can:

- Explain the various transfer options for UH Mānoa
- Identify and provide contact information of specific college and major advisors at UH Mānoa
- Identify UH Mānoa campus resources
- Address transfer issues
- Provide guidance to students in the Ka'ie'ie Degree Pathway Program.

## Mānoa Writing Program

Bilger Hall 104  
2545 McCarthy Mall  
Honolulu, HI 96822  
Tel: (808) 956-6660  
Fax: (808) 956-9170  
Email: mwp@hawaii.edu  
Web: manoa.hawaii.edu/mwp/  
Director: J. Henry

The Mānoa Writing Program was created by the UH Board of Regents in 1987 to administer General Education writing requirements. Its efforts are guided by a board of seven professors, each from a different department. The faculty board reviews requests to give classes writing-intensive (W) Focus designations, offers faculty workshops on teaching with writing, and surveys students, who must complete five W courses to graduate. Administering over 500 W sections per semester, the Mānoa Writing Program's ultimate goal is to prepare all UH Mānoa graduates for the different writing tasks that society and their professions will present to them.

## New Student Orientation

Campus Center 208  
2465 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-3667  
Email: nso@hawaii.edu  
Web: www.hawaii.edu/nso  
Coordinator: M. Westfall-Senda

Before the spring and fall semesters begin, the Office of Student Life and Development offers New Student Orientation (NSO) sessions for incoming freshman and transfer students as well as their parents and family members. Student sessions have been designed to help prepare incoming students for their first year at UH Mānoa by providing important information about campus life and how to access campus resources. Students who attend NSO sessions also learn how to get involved in co-curriculum programs, engage with other new students, and network with current UH Mānoa students. Participants in parent sessions learn about the campus, available resources, and current policies to provide support and encouragement to their student during their time at UH Mānoa.

## Pre-Health/Pre-Law Advising Center

Queen Lili'uokalani Center for Student Services 101  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-4045  
Email: uhpac@hawaii.edu  
Web: www.manoa.hawaii.edu/undergrad/PAC/  
Director:

The Pre-Health/Pre-Law Advising Center (PAC) is a walk-in resource center for students interested in law, medicine (allopathic, chiropractic, naturopathic, osteopathic, podiatric), or any of the health sciences (dentistry, occupational therapy, optometry, pharmacy, physician assistant, physical therapy, public health, veterinary medicine, etc.). PAC advisors help students clarify their career goals, choose a major, plan appropriate coursework, research professional programs, find opportunities to gain experience, and apply to professional programs.

## Service Learning Program

Queen Lili'uokalani Center for Student Services 209  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-4641  
Fax: (808) 956-3394  
Email: slp@hawaii.edu  
Web: manoa.hawaii.edu/undergrad/servicelearn/  
Director: A. Pascua

The Service Learning Program offers UH Mānoa students and community agencies the opportunity to participate in a partnership of volunteer service.

The Service Learning Program functions as a clearinghouse. It links UH Mānoa students interested in donating their valuable time and experience with volunteer agencies within the community.

Students receive information on the volunteer experience, and agencies have access to enthusiastic, energetic, and skilled student volunteers.

The Service Learning Program serves as the headquarters for Hawai'i/Pacific Islands Campus Compact, a membership organization comprised of presidents and chancellors to promote civic engagement in higher education. Hawai'i/Pacific Islands Campus Compact also provides opportunities for students to become members of Americorps, a federal service program.

## Student Athlete Academic Services

Nagatani Academic Center  
1337 Lower Campus Road, PE/A  
Honolulu, HI 96822  
Tel: (808) 956-3388  
Fax: (808) 956-5042  
Web: manoa.hawaii.edu/undergrad/SAAS/  
Department Chair: J. Matsuda

Student Athlete Academic Services (SAAS), is the academic support program for student-athletes at UH Mānoa. Working closely with instructional faculty, coaches, and campus resources, academic advisors assist students in formulating and meeting their academic goals while participating in intercollegiate athletics. SAAS is conveniently located in the Nagatani Academic Center (NAC), adjacent to the Stan Sheriff Arena in the Athletic Department complex.

SAAS provides orientation programs, academic and athletic advising, and registration assistance. Learning services include peer mentoring, subject tutoring, and small group study sessions.

## Student Success Center

Gregg M. Sinclair Library  
2425 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-5425  
Email: geary@hawaii.edu  
Web: manoa.hawaii.edu/undergrad/ssc/  
Interim Coordinator: K. Van Duser

The Student Success Center at Sinclair Library offers students a welcoming and convivial place to study and learn and provides them the information and skills they need to be successful in their academic career and beyond. The center provides comfortable seating, is open long hours, permits students to bring their own snacks, all in a space that has nature light and air.

The Student Success Center occupies the first floor of Sinclair Library and provides a place for students to work with librarians, mentors, tutors, advisors, counselors, and/or teachers, to meet their individual needs. At the entrance to the center, the Information Concierge Desk has staff available to assist students in finding the help they need to succeed in their academic work from many departments on campus. In addition, the center hosts a number of partners including the First Year Programs, Honors Program, Writing Center, English 100 Mentoring Program, and the Wong Computer Lab and Digital Media Center where students can find equipment for word processing and production of digital media products. Generous study spaces with electrical power for personal laptop computers are spread throughout the first floor. Group study rooms with media equipment for powerpoint or video presentations are available for student use via online reservation. More details about the center are available at [manoa.hawaii.edu/undergrad/ssc/](http://manoa.hawaii.edu/undergrad/ssc/).

## Student Support Services

Krauss 114  
2500 Dole Street  
Honolulu, HI 96822  
Tel: (808) 956-8402  
Fax: (808) 956-9763  
Email: [sss@hawaii.edu](mailto:sss@hawaii.edu)  
Website: [manoa.hawaii.edu/undergrad/ssc/](http://manoa.hawaii.edu/undergrad/ssc/)  
Director: M. Yoshimoto

Student Support Services (SSS) is a federally funded program that provides academic advising and planning, special courses, financial aid advice, graduate and professional school advising, tutoring, mentoring, and academic enrichment activities to program students enrolled at UH Mānoa.

Students are selected to participate based on income and financial aid eligibility, whether parents have completed a bachelor's degree, and potential to benefit from program services.

The goal of SSS is to increase college retention, academic success and graduation rates of program participants. For application and other information, please contact SSS Advisors Gary Tachiyama and Barbara Watanabe at (808) 956-8402.

## Study Abroad Center

Moore 115  
1890 East-West Road  
Honolulu, HI 96822  
Tel: (808) 956-5143  
Fax: (808) 956-9319  
Email: [uhmsac@hawaii.edu](mailto:uhmsac@hawaii.edu)  
Web: [www.studyabroad.org](http://www.studyabroad.org)  
Director: S. Rai

The Study Abroad Center (SAC) collaborates with various UH Mānoa academic departments to provide opportunities for students to study, and faculty members to teach and conduct research, in another country. SAC develops, implements, and evaluates UH Mānoa study abroad programs. The center provides informational, advisory, and support services to students and faculty concerning international educational opportunities.

SAC programs are offered for a summer term, a semester, or an academic year. The essence of SAC programs is to acquire knowledge through academic work and to develop a cross-

cultural understanding through cultural immersion. Students earn UH Mānoa credits for course work completed abroad. The courses offered in these study abroad programs may be used to fulfill a student's major, language, general education, graduation, or elective course requirements. Any Study Abroad course may be used as an exemption to fulfill a focus requirement. Students on Study Abroad may use the focus exemption to satisfy an appropriate 3-credit diversification and/or focus requirement. Courses taken overseas will appear on UH Mānoa transcripts as UH Mānoa courses.

SAC provides faculty members with opportunities to develop courses and publications based upon research and teaching experiences within the global arena. In addition, faculty members who lead study abroad programs have a wide range of responsibilities in their capacity as "in-country" resident directors.

SAC programs and course offerings may vary each academic term.

## Semester and Year Programs

SAC offers semester programs in Australia, Denmark, England, France, Italy, Japan, and Spain. The Year-in-Japan program is offered only for a full academic year. Students enrolled in these programs must register for a minimum of 12 credit hours each term. All programs offer several content courses that are taught in English.

## Summer Programs

SAC summer programs require enrollment in a minimum of 6 credit hours. Course offerings include, but are not limited to, archaeology field schools (Tuscany and Cyprus), architecture and design, environmental sustainability, social sciences, international business, health policy (Copenhagen), Arabic (Seville), business, humanities/social sciences (Paris), Engineering (Lille), European art and architecture (various locations in Western and Eastern Europe), French (Annecy and Angers), German, business humanities and political science (Berlin), Italian humanities (Florence), Japanese (Kobe), Mandarin (Hainan), Russian (Vladivostok), and Spanish and Latin American film and literature (Mendoza).

## Self-Designed Study Abroad Programs

Students can design a study abroad program different from those offered by SAC and receive UH Mānoa credits. Such a program may fall under the category of the Self-Designed Study Abroad Program. A Self-Designed Study Abroad Program can be created for countries and/or cities where UH Mānoa does not have an existing study abroad program. Students have conducted Self-Designed Study Abroad Programs in Austria, Brazil, Cambodia, China, Costa Rica, Egypt, Greece, Ghana, India, Israel, Japan, Mexico, Morocco, Nepal, New Zealand, South Africa, Spain, Switzerland, Taiwan, Vietnam, and United Arab Emirates.

## Study Abroad Internships

Study Abroad internships are available in Florence, London, Paris, and Seville. Internships are carefully planned and each student is placed in a working environment that has been requested and carefully selected according to specific criteria. Internships are generally unpaid. Internship credits will be based on the field of the internship. Internship credits range from 2, 3, 4, or 6 credits in the areas of Academy of Creative

Media, Apparel and Product Design and Merchandising, Business, Finance, Human Resources, Management and Information Systems, Marketing, Real Estate, Social Work, and Travel Industry Management.

### Admission Requirements

SAC programs are designed primarily for undergraduate students who have completed a minimum of 24 credits with a cumulative GPA of 3.0. UH Mānoa Financial Aid is applicable and available to eligible students. Several program specific scholarships are also available. Admission to some intensive language programs require a minimum of one year of language study at the college level. For program brochures, detailed information, and an application, contact SAC or visit the website at [www.studyabroad.org](http://www.studyabroad.org).

## Initiatives

### Exploratory Student Initiative

Queen Liliuokalani Center for Student Services 101  
2600 Campus Road  
Honolulu, HI 96822-2217

The Exploratory Student Initiative will require all exploratory students to select one of seven broad interest areas upon entering UH Mānoa. The broad interest areas are as follows: Sciences; Multidisciplinary Studies; Business and Industry; Language Studies; Humanities and Social Sciences; Visual, Creative and Performing Arts; and Exploratory. Students will use the STAR pre-registration system to help guide them into one of the seven broad interest areas and select appropriate courses. Students will complete an assessment examining their values, interests, and career goals. The Exploratory Student Initiative will provide advising, a series of major/occupational workshops and co-curricular opportunities designed to support first-year exploratory students in their declaration of a major and encourage active student engagement within the UH Mānoa community.

### Mānoa Peer Advisors

Queen Liliuokalani Center for Student Services 101  
2600 Campus Road  
Honolulu, HI 96822-2217  
Email: [uhmpa@hawaii.edu](mailto:uhmpa@hawaii.edu)  
Web: [www2.hawaii.edu/~uhmpa/](http://www2.hawaii.edu/~uhmpa/)

Supervisors: M. Makino-Kanehiro, R. Mitsunaga, D. Nakaoka, R. O. Bingham

The Mānoa Peer Advisors (MPA) program provides peer advisors for advising offices throughout campus. The purpose of MPA is to increase students' access to academic advising,

relieve workload for academic advisors, develop valuable skills, and provide role model representatives for UH Mānoa. MPAs are selected each spring in a competitive application process to be trained intensively during Summer Session I on UH Mānoa General Education requirements, advising practices, the philosophy and techniques of advising, and the resources available to students. Upon successful completion of training, MPAs are matched with advising offices, where they provide advising to fellow students during the academic year.

### Mānoa Sophomore Experience (MSE)

Email: [secondyr@hawaii.edu](mailto:secondyr@hawaii.edu)

Web: [manoa.hawaii.edu/undergrad/sophomore/](http://manoa.hawaii.edu/undergrad/sophomore/)

Coordinators: K. Shiroma and R. Tagalicod

The Mānoa Sophomore Experience (MSE) is a committee dedicated to helping sophomores navigate academic requirements and campus life so they become engaged with the campus community and invested in their college experience. Committee members include faculty and staff from various departments in Student and Academic Affairs, student representatives, and a dedicated peer mentor.

### Mānoa Institutional Learning Objectives for Undergraduate Students

Institutional Learning Objectives (ILOs) encompass the UH Mānoa undergraduate experience as a whole—academic and co-curricular. It is through the combined efforts of faculty, students, staff, and administrators that students achieve the ILOs.

#### 1. **Know—Breadth and Depth of Knowledge**

Students develop their understanding of the world with emphasis on Hawai'i, Asia, and the Pacific by integrating

- a. General education knowledge (arts and humanities, biological sciences, languages, physical sciences, social sciences, technology);
- b. Specialized study in an academic field; and
- c. Understanding of Hawaiian culture and history.

#### 2. **Do—Intellectual and Practical Skills**

Students improve their abilities to

- d. Think critically and creatively;
- e. Conduct research; and
- f. Communicate and report.

#### 3. **Value—Personal and Social Responsibility**

Students demonstrate excellence, integrity, and engagement through

- g. Continuous learning and personal growth;
- h. Respect for people and cultures, in particular Hawaiian culture;
- i. Stewardship of the natural environment; and
- j. Civic participation in their communities.

# Undergraduate General Education Requirements

To graduate from UH Mānoa, a student must satisfy (a) General Education requirements, (b) requirements of the student's college or school, and (c) requirements of the student's specific academic major. (Consulting his or her college/school advising office can help a student select courses that simultaneously satisfy more than one requirement.) This section of the *Catalog* describes the four components of the UH Mānoa General Education requirements:

1. Foundations
2. Diversification
3. Focus
4. Hawaiian or Second Language

Foundations and Diversification together are UH Mānoa *Core* requirements. Focus and Hawaiian or Second Language together are UH Mānoa *Special Graduation* requirements.

Students who transfer to UH Mānoa having completed the Foundations/Basic requirements at another UH system school are considered to have fulfilled UH Mānoa Foundations requirements. Students who transfer to UH Mānoa having completed the Diversification/Area requirements at another

UH system school are considered to have fulfilled UH Mānoa Diversification requirements. Finally, students who transfer to UH Mānoa having completed both the Foundations/Basic and the Diversification/Area requirements at another UH system school are considered to have fulfilled the UH Mānoa Core (Foundations and Diversification) requirements.

A grade of D (not D-) or higher is required for a course to fulfill General Education requirements. The Credit/No Credit option is not allowed for any course taken to fulfill a General Education requirement, with the exception of those courses offered only for CR/NC. (See "Grades" on p. 15 of the *Catalog* for additional information.)

## 1. Foundations Requirements: 12 credits

The Foundations requirements are intended to give students skills and perspectives that are fundamental to undertaking higher education. Students complete the Foundations requirements during their first year at UH Mānoa. Courses taken to fulfill the Foundations requirements may not be used to fulfill Diversification or Focus requirements.

## General Education Overview

### UH Mānoa Core Requirements

1. Foundations Requirements..... p. 26
  - Written Communication (FW\*; 3 credits)
  - Symbolic Reasoning (FS\*; 3 credits)
  - Global and Multicultural Perspectives (FGA\*, FGB\*, FGC\*; 6 credits)
2. Diversification Requirements ..... p. 28
  - Arts, Humanities, and Literatures (a total of 6 credits from 2 areas)
    - Arts (DA\*)
    - Humanities (DH\*)
    - Literatures (DL\*)
  - Social Sciences (DS\*; a total of 6 credits from 2 different departments)
  - Natural Sciences (3 credits biological science, 3 credits physical science, 1 credit science lab)
    - Biological Science (DB\*)
    - Physical Science (DP\*)
    - Laboratory (science) (DY\*)

### UH Mānoa Special Graduation Requirements

3. Focus Requirements ..... p. 28
  - Contemporary Ethical Issues (E or ETH\*\*;
  - 1 course, 300- or 400-level)
  - Hawaiian, Asian, and Pacific Issues (H or HAP\*\*;
  - 1 course, any level)
  - Oral Communication (O or OC\*\*;
  - 1 course, 300- or 400-level)
  - Writing Intensive (W or WI\*\*;
  - 5 courses, at least two of which are at the 300- or 400-level)
4. Hawaiian or Second Language (HSL\*; competence at the 202 level) ..... p. 29  
(Some colleges/schools have waived or modified this requirement. Consult your college/school advisor.)

\* These abbreviations appear after course descriptions to identify courses that meet specific requirements. See the "Courses" section in the back of this *Catalog* to view course descriptions.

\*\* The STAR Degree Check indicates Focus classes by "E," "H," "O," and "W." "Check Class Availability" on the UH Mānoa Registration Homepage, [www.hawaii.edu/myuh/manoa](http://www.hawaii.edu/myuh/manoa), indicates Focus sections with "ETH," "HAP," "OC," and "WI."

### ■ Written Communication (FW): 3 credits

Written Communication courses introduce students to the rhetorical, conceptual, and stylistic demands of writing at the college level; courses give instruction in composing processes, search strategies, and composing from sources. Courses also provide students with experiences in the library and on the internet and enhance their skills in accessing and using various types of primary and secondary materials.

#### FW Courses

- ENG 100, 100A Composition I
- ENG 190 Composition for Transfer Students to UH Mānoa
- ESL 100 Composition I for Second Language Writers

To enroll in a course that meets the Written Communication requirement, students must first determine their course eligibility by visiting [www.manoa.hawaii.edu/mwp](http://www.manoa.hawaii.edu/mwp). Non-native speakers of English should visit [www.hawaii.edu/eli](http://www.hawaii.edu/eli) or contact the English Language Institute at (808) 956-8610, [uhmeli@hawaii.edu](mailto:uhmeli@hawaii.edu).

Students can satisfy the FW requirement by earning specified Advanced Placement examination scores. (See [www.manoa.hawaii.edu/admissions/undergrad/pdf/AP.pdf](http://www.manoa.hawaii.edu/admissions/undergrad/pdf/AP.pdf) for details.) Students may also be able to satisfy this requirement through submission of a collection of writing. For eligibility criteria and other information, visit [www.manoa.hawaii.edu/mwp](http://www.manoa.hawaii.edu/mwp) or contact the General Education Office at (808) 956-6660, [gened@hawaii.edu](mailto:gened@hawaii.edu).

### General Education Goals

UH Mānoa provides an environment in which both faculty and students can discover, examine, preserve, and transmit the knowledge, wisdom, and values that will enrich present and future generations. UH Mānoa's special and global distinction is found in its Hawaiian, Asian, and Pacific orientation. The academic program structure and research enterprise take special advantage of Hawai'i's unique environment.

General Education at UH Mānoa involves a flexible and diverse multi-disciplinary curriculum. The General Education requirements foster a deeper appreciation of the complexities and potentialities of the human experience from the perspectives of the arts, humanities, and the natural and social sciences. They also encourage an understanding of imagination and creativity through the application of abstract and intuitive thinking. Upon graduation, students will be able to:

- Appreciate the values and ideas of cultures as they have evolved and as they find expression in literature, history, philosophy, religion, art, and music;
- Reason and analyze effectively;
- Communicate clearly and effectively in Standard English;
- Know the aims and methods of science;
- Recognize the ways in which individuals and social institutions organize and shape behavior.

### ■ Symbolic Reasoning (FS): 3 credits

Symbolic Reasoning courses expose students to the beauty and power of formal systems, as well as to their clarity and precision; courses do not focus solely on computational skills. Students learn the concept of proof as a chain of inferences. They learn to apply formal rules or algorithms, engage in hypothetical reasoning, and traverse a bridge between theory and practice. In addition, students develop the ability to use appropriate symbolic techniques in the context of problem solving and to present and critically evaluate evidence.

#### FS Courses

- BUS 250\* Applied Math in Business
- ICS 141 Discrete Mathematics for Computer Science I
- ICS 241\* Discrete Mathematics for Computer Science II
- MATH 100 Survey of Mathematics
- MATH 112\* Math for Elementary Teachers II
- MATH 140\*\* Precalculus
- MATH 161 Precalculus and Elements of Calculus for Economics and the Social Sciences
- MATH 203\*\* Calculus for Business and Social Sciences
- MATH 215\*\* Applied Calculus I
- MATH 241\*\* Calculus I
- MATH 251A\*\* Accelerated Calculus I
- NREM 203 Applied Calculus for Management, Life Sciences, and Human Resources
- PHIL 110, 110A Introduction to Deductive Logic
- PHIL 111 Introduction to Inductive Logic

\* Has a prerequisite.

\*\* Requires placement by Math Department's Precalculus Assessment; visit [www.math.hawaii.edu](http://www.math.hawaii.edu).

### ■ Global and Multicultural Perspectives (FG): 2 courses, 6 credits

Global and Multicultural Perspectives courses provide thematic treatments of global processes and cross-cultural interactions from a variety of perspectives. Students will gain a sense of human development from prehistory to modern times through consideration of narratives and artifacts from diverse cultures. At least one component of each of these courses will involve the indigenous cultures of Hawai'i, the Pacific, or Asia.

#### FG Courses

To satisfy this requirement, students must take a total of six credits; the six credits must come from two different groups.

**Group A** (courses marked FGA in this *Catalog* and online; courses cover the time period prehistory to 1500)

- ANTH 151, 151A Emerging Humanity
- ART 175 Survey of Global Art I
- HIST 151 World History to 1500
- HIST 161A World Cultures in Perspective
- LLEA 151 World Myth to 1500 C.E.
- WS 175 History of Gender, Sex, and Sexuality in Global Perspectives to 1500 CE

**Group B** (FGB; courses cover the time period 1500 to modern times)

- AMST 150 America and the World
- ANTH 152, 152A Culture and Humanity

- ART 176 Survey of Global Art II
  - FSHN 141 Culture and Cuisine: The Global Diversity of Food
  - GEOG 102 World Regional Geography
  - HAW 100 Language in Hawa‘i: A Microcosm of Global Language Issues
  - HIST 152 World History since 1500
  - HIST 162A World Cultures in Perspective
  - LING 105 Language Endangerment, Globalization, and Indigenous Peoples
  - TIM 102 Food and World Cultures
  - WS 176 History of Gender, Sex and Sexuality in Global Perspective, 1500 CE to the Present
- Group C** (FGC; courses cover the time period prehistory to modern times)
- BOT 105, 105A Ethnobotany
  - GEOG 151, 151A Geography and Contemporary Society
  - HIST 156 World History of Human Disease
  - LLL 150 Literature and Social Change
  - MUS 107 Music in World Cultures
  - REL 150, 150A Introduction to the World’s Major Religions

#### For Non-UH System Transfer Students Only

Students who transfer from a non-UH System school with one or more western civilization courses will be required to take only three credits of Global and Multicultural Perspectives. If the course or courses that they have taken are time-period specific, the credits that they take at UH Mānoa must cover a different time period.

## 2. Diversification Requirements: 19 credits

The Diversification requirements are intended to assure that every student has exposure to different domains of academic knowledge, while at the same time allowing flexibility in choice of courses for students with different goals and interests.

Students can complete the Diversification requirements over the full four years of their academic program. Students may satisfy the Diversification requirements by taking approved courses for which they meet course prerequisites. Some courses that satisfy Diversification requirements may also simultaneously satisfy Focus and/or major requirements. (See the “Can a single course satisfy more than one requirement?” table on the next page.)

### Please Note:

Additional courses that satisfy General Education Core requirements may have been approved after the publication of this *Catalog*. Check the online *Registration Guide* for the most up-to-date information. All students should be aware that UH Mānoa’s individual schools and colleges may (a) have additional program requirements and (b) require specific General Education courses to meet their program requirements. Consult your college advisor. (See p. 30 for contact information.)

#### ■ Arts, Humanities, and Literatures (DA, DH, DL): 6 credits

To satisfy this requirement, students must take six credits; the six credits must include two of the three different areas: Arts “DA,” Humanities “DH,” and Literatures “DL.”

#### ■ Natural Sciences (DB, DP, DY): 7 credits

To satisfy this requirement, students must take three credits in Biological Sciences “DB,” three credits in Physical Sciences “DP,” and one credit of Science Laboratory “DY.”

#### ■ Social Sciences (DS): 6 credits

To satisfy this requirement, students must take a total of six credits from two different departments.\*

#### Diversification Courses

Diversification courses are identified in this *Catalog* on pp. 366-512 with the following letters after the course description:

DA = Arts	DP = Physical Sciences
DB = Biological Sciences	DS = Social Sciences
DH = Humanities	DY = Laboratory (science)
DL = Literatures	

## 3. Focus Requirements

The Focus requirements identify important additional skills and knowledge necessary for living and working in diverse communities. Courses fulfilling Focus requirements are offered in departments across the curriculum and vary each semester. To meet a Focus requirement, a course must have official UH Mānoa Focus designation during the semester in which it is taken. Courses taken outside the UH System cannot be used to fulfill Focus requirements. Instead, non-UH System transfer students’ Focus requirements are adjusted according to the number of credit hours awarded by UH Mānoa for non-UH System courses. (See next page.)

#### ■ Hawaiian, Asian, and Pacific Issues (H or HAP): 1 course, any level

These courses focus on issues in Hawaiian and Asian or Pacific cultures and history; they promote cross-cultural understanding between nations and cultures.

#### ■ Contemporary Ethical Issues (E or ETH): 1 course, 300- or 400-level

These courses involve significant readings on, and discussion of, contemporary ethical issues; they give students tools for the development of responsible ethical judgments.

#### ■ Oral Communication (O or OC): 1 course, 300- or 400-level

These courses provide students with training in oral delivery and give them the opportunity to do individual and/or group oral reports.

\*Some departments have multiple course alphas. Students who take their two DS courses from the same department but with different course alphas are considered to have fulfilled the DS requirement. For example, the Family and Consumer Sciences Department offers two course alphas: Family Resources (FAMR) and Fashion Design and Merchandising (FDM). A student who takes FAMR 230 and FDM 200 is considered to have fulfilled the DS requirement.

Can a single course satisfy more than one requirement?						
Requirements	Hawaiian/Second Language	Foundations	Diversification	Focus	Major	Minor/Certificate
Hawaiian/Second Language	----	no	no	YES	no	no
Foundations	no	----	no	no	YES	no
Diversification	no	no	----	YES	YES	no
Focus	YES	no	YES	----	YES	YES
Major	no	YES	YES	YES	----	no
Minor/Certificate	no	no	no	YES	no	----

### ■ Writing Intensive (W or WI): 5 courses, including at least two at the 300- or 400-level

These courses collectively help students both to learn course content and to communicate through writing. Small writing-intensive classes, in which instructors work with students on writing related to course topics, are offered in nearly all departments.

**Note:** Students are strongly encouraged to satisfy the Foundations-Written Communication (FW) requirement before they enroll in writing-intensive courses.

#### Focus Courses

Focus courses change each semester. Therefore, Focus designations are not shown in this *Catalog*, but appear each semester on Class Availability at [www.sis.hawaii.edu/uhdad/avail\\_classes?i=MAN](http://www.sis.hawaii.edu/uhdad/avail_classes?i=MAN). Focus designations are indicated in the GenEd/Focus column as ETH, HAP, OC, and/or WI.

#### Focus Requirements for Students with Non-UH System Credits

Students who transfer credits from a non-UH System institution may have adjusted (“prorated”) Focus requirements. The adjustment is based on the number of non-UH System transfer credit hours accepted when a student is admitted to UH Mānoa.

Therefore, non-UH System credits completed while an active UH Mānoa student are not included in proration (summer courses, Study Abroad, National Student Exchange, etc.).

Number of accepted non-UH credit hours:	Focus Requirement			
	W	H	E	O
0-36	5*	1	1	1
37-54	4*	1	1	1
55-88	3*	1	1-E	1-O
89+	2*	1	0	0

\*At least two “W” courses must be numbered at the 300- or 400- level.

#### Focus Requirements for UH System Transfer Students

Students who enter the UH System in Fall 2011 and thereafter must meet all of the Focus requirements. Students who entered the UH System from Spring 2005 through Spring 2011 must meet requirements given in the following table. Students who entered UH prior to Spring 2005 should check with a UH Mānoa college/school advisor to determine their Focus

requirements. Depending on the number of UH transfer credit hours accepted, E and O requirements for transfer students may be reduced. The W and H requirements are not affected, since students may transfer approved UH System courses to help them satisfy the W and H Focus requirements.

Number of accepted UH credit hours:	Focus Requirement			
	W	H	E	O
0-54	5*	1	1	1
55-88	5*	1	1-E	1-O
89+	5*	1	0	0

\*At least two “W” courses must be at the 300- or 400- level.

#### Exemption from a Focus Requirement

Students who have engaged in an extraordinary educational experience that took place outside of the ordinary university curriculum may request a one-course exemption from a Focus requirement that is directly related to that educational experience. To request an exemption, students must demonstrate to the General Education Committee that the experience fulfilled the goals of the Focus area. If approved, the exemption reduces the number of courses required for the appropriate Focus requirement; however, it does not reduce the total number of credit hours needed to graduate. Students are limited to one exemption. Restrictions apply. For information, students should consult a college/school academic advisor and visit [www.hawaii.edu/gened/focus\\_exemption.htm](http://www.hawaii.edu/gened/focus_exemption.htm).

## 4. Hawaiian or Second Language Requirement

Knowledge of a second language encourages deeper awareness of the structure of language and its relation to thought. It develops sensitivity to other ways of ordering personal experience and social institutions, provides a direct way of comparing another culture to one’s own, and provides insight into the workings of one’s native language.

Before graduation, students must show competence at the 202 (or equivalent) level in Hawaiian or a second language by doing one of the following:

- Completing a four-semester sequence (usually 101, 102, 201, and 202) in a single language.

- b. Demonstrating competence by taking a UH Mānoa language-competency exam if one is offered. Check with the language department in question.
- c. Receiving a language-requirement waiver by demonstrating 202-level second language competency. For example, waivers may be given to students who are native speakers of a language other than English. Contact an academic advisor in your college for further information.

**Important Note:** The Hawaiian or Second Language requirement has been modified or waived for students in the following schools and colleges: Shidler College of Business; College of Education; College of Engineering; John A. Burns School of Medicine; School of Nursing and Dental Hygiene; School of Ocean and Earth Science and Technology; Myron B. Thompson School of Social Work; College of Tropical Agriculture and Human Resources. (See [www.hawaii.edu/gened/hsl.htm](http://www.hawaii.edu/gened/hsl.htm) for additional information.) Students in these colleges/schools should consult a college/school advisor.

**Students should be aware that changing their major may involve a change in their college/school and thus change their Hawaiian or Second Language requirement.** A list of majors and their respective colleges/schools can be found on pp. 74-78.

### Credits for Previous Language Experience

All students under the current General Education requirements with experience in a language other than English (including native speakers) may earn “back credits.” These students may take any UH Mānoa course appropriate to their level of proficiency in which there is significant use of that language. (Appropriate level is determined by a placement exam or an advisor; significant use is determined by the course content.) Upon completion of this course, students will receive between 3 and 16 back credits if they earn a letter grade of C (not C-) or better. (The course must be the *first* Hawaiian or second language course taken since high school; and it must be taken for a letter grade, not CR/NC.) Back credits may be earned for only one language. Other restrictions apply. Check with the appropriate language department for details and forms. Information is also available at [www.hawaii.edu/gened/hsl.htm](http://www.hawaii.edu/gened/hsl.htm).

### Languages in which a Four-semester Sequence is Offered

Arabic, Cambodian, Chamorro (Khmer), Filipino, French, German, Greek, Hawaiian, Hindi/Urdu, Ilokano, Indonesian, Italian, Japanese, Korean, Latin, Mandarin, Maori, Portuguese, Russian, Samoan, Sanskrit, Spanish, Tahitian, Thai, Tongan, Vietnamese.

Some language courses are not offered regularly, and this is noted in the course description section of this *Catalog*.

American Sign Language also fulfills the language requirement. Courses in American Sign Language are not offered at UH Mānoa, but the campus will consider students who complete American Sign Language to the second level of study as having met UH Mānoa’s Hawaiian or Second Language requirement.

### Academic Planning: Tips for New Students

UH Mānoa has a wide range of fields, majors, and courses from which to choose and build a dynamic and satisfying academic program. Here are some tips to help students get started:

- **Contact an advisor.** Assistance in planning an academic program is available. Resources include:
  - New Student Orientation and Fall Extended Orientation workshops, (808) 956-3667, [www.hawaii.edu/nso](http://www.hawaii.edu/nso);
  - College/school and major advisors. (See contact information at the end of this section.)
- **Explore different academic areas.** Most freshmen are exploring possible majors during their first year. These students may select General Education Foundations and Diversification courses that allow them to sample different fields, which can help in deciding on a major. See pp. 26-27 for a list of Foundations courses; see the “Courses” section of this *Catalog* to find courses with a Diversification designation. The “Courses” section also lists course prerequisites.
- **Plan ahead.** Majors and colleges/schools may have requirements that should be met in the first year. Once students decide on a major, they should find out what particular courses are required for the major and also by the college/school in which the major is located. (Program requirements and four-year academic plans for all undergraduate majors can be found at [manoa.hawaii.edu/ovcaa/programsheets](http://manoa.hawaii.edu/ovcaa/programsheets).) Students who have not yet decided on a major should become familiar with potential majors and with their college/school requirements in order to take recommended courses when possible.
- **Enhance educational experience through special opportunities.** Consider participating in one of the following:
  - First-Year Programs, (808) 956-8626, [manoa.hawaii.edu/undergrad/freshman/](http://manoa.hawaii.edu/undergrad/freshman/);
  - Honors Program, (808) 956-8391, [manoa.hawaii.edu/undergrad/honors/](http://manoa.hawaii.edu/undergrad/honors/);
  - Student Life and Development (formerly Co-curricular Activities, Programs and Services), (808) 956-8178, [www.manoa.hawaii.edu/studentlife/](http://www.manoa.hawaii.edu/studentlife/);
  - A research project or internship (see major department);
  - Service Learning, (808) 956-4641, [manoa.hawaii.edu/undergrad/servicelearn/](http://manoa.hawaii.edu/undergrad/servicelearn/);
  - National Student Exchange, (808) 956-6772, [www2.hawaii.edu/~nse/](http://www2.hawaii.edu/~nse/); and
  - Study Abroad Program, (808) 956-5143, (808) 956-6958, [www.studyabroad.org](http://www.studyabroad.org).

### Transfer Students

Transfer students should contact an advisor as soon as possible. An advisor can often help a transfer student make choices that will help the student make steady progress toward graduation. Students with a major should contact an advisor from the college or school in which the major is located; students who have not yet chosen a major should contact the Mānoa Advising Center. (See list of advising offices on the next page.)

Many requirements, including General Education Foundations, Diversification, and Hawaiian or Second Language requirements, may be met by transferring articulated courses from other campuses. Students can check the Office of the Registrar

### Graduate Council

Members of the Graduate Council are appointed by the Faculty Senate. The council advises the dean on graduate courses, programs, and administrative matters.

### Graduate Assembly

The Graduate Assembly is composed of the chairs of each graduate program. It functions as an advisory board to the dean on major policy matters and serves as a forum for discussion on matters pertaining to graduate study.

### Chairs of the Graduate Programs

The chairs of the graduate programs are appointed by the dean of the Graduate Division. The chairs in turn recommend faculty advisors or committees for graduate students working toward advanced degrees. If the dean of the Graduate Division concurs, he/she appoints the persons recommended by the chairs.

The chairs of the graduate programs serve as the liaison with the Graduate Division in matters of policy, procedural changes, program effectiveness, and general graduate student affairs. They advise the Graduate Division on admission of graduate students, advise graduate students on their degree programs, review graduate student petitions, keep records on their graduate students, and certify that degree candidates have completed all requirements.

### Graduate Student Organization

See the "Student Life" section for information on this organization.

### WICHE Regional Graduate Programs

See the "Tuition, Fees, and Financial Aid" section for information on these programs.

## Academic Policies

The following regulations and procedures governing admission to the Graduate Division of UH Mānoa are subject to change without prior notice. Prospective students should consult with the Graduate Division for updated policies.

Although UH Mānoa attempts to accommodate the course requests of students, course offerings may be limited by financial, space, and staffing considerations or may otherwise be unavailable. Nothing in this *Catalog* may be construed to promise or guarantee registration in any course or course of study (whether required or elective), nor may anything be construed to promise or guarantee the completion of an academic program within a specified length of time.

## Student Responsibility

It is the responsibility of students to know and observe all regulations and procedures relating to the program they are pursuing, as well as those of UH Mānoa and the Graduate Division. In no case will a regulation be waived or an exception granted because students plead ignorance of or contend that they were not informed of the regulations or procedures. Questions on regulations and their interpretation pertaining to studies at the graduate level should be addressed to the Dean, Office of Graduate Education.

Students planning to graduate should familiarize themselves with the dates relating to application for graduation and other pertinent deadlines (see the “Calendar”). It is necessary to apply for graduation by the specified deadline in order to graduate in a particular term, whether or not the student plans to attend the commencement ceremonies.

Students must satisfy the degree requirements of the *Catalog* in force during the term for which they were admitted; or they may, with the consent of their advisors, meet graduation requirements by complying with the provisions of a later *Catalog*. Students readmitted to a degree program must meet degree requirements of the *Catalog* in force at the time of the later admission (or of a subsequent *Catalog*, as provided above). Aside from degree requirements, all students are subject to the regulations and policies stated in the *Catalog* currently in force. Exceptions to the regulations contained in the *Catalog* require the written approval of the Graduate Division, unless otherwise stated in the *Catalog*.

Students admitted to the Graduate Division are assumed to be mature adults and are expected to behave accordingly. All written work should observe high editorial standards, and high standards of academic honesty are expected. Though advisory services are provided to assist the student, the student alone is responsible for following the procedures and completing the steps required in the degree program. Requirements of the Graduate Division, both procedural and substantive, may be waived only by written request of the student and/or committee concerned and must have the written approval of the Graduate Division. Petition forms are available in department offices, the Graduate Division Student Services Office, and online at [manoa.hawaii.edu/graduate/](http://manoa.hawaii.edu/graduate/).

## Academic Integrity

UH Mānoa has adopted policies and procedures for dealing with academic (and research) misconduct by its students, faculty, and staff. The guidelines, which are available in department offices and in the Office of the Dean of the Graduate Division, pertain to the intentional commission of any academic

misconduct, including falsification of research results, improper assignment of authorship, plagiarism, deceptive manipulation of experiments or of research procedures, and misappropriation of research funds.

If a graduate student fails to maintain the standards of academic or professional integrity expected in his or her discipline or program, the student’s admission to the program may be terminated. (See “Campus Policies” for further discussion of policy pertaining to academic honesty.)

## Research with Human or Animal Subjects

Students intending to conduct research using human or animal subjects should be aware of federal, state, and UH Mānoa regulations and review processes to ensure compliance with protective standards. These regulations cover research funded by non-UH Mānoa sources, sponsored by UH Mānoa, or conducted by or under the direction of any employee or agent of UH Mānoa in connection with his or her institutional responsibilities or using any UH Mānoa property or facility. These regulations also cover research involving the use of UH Mānoa’s non-public information to identify or contact research subjects.

Students and UH Mānoa employees should refer to the “Campus Policies” section for more information on federal research guidelines and check with their respective graduate chairperson for guidance.

## Admission

Applicants for advanced degree programs must hold a bachelor’s degree from a regionally accredited U.S. college or university or its equivalent from a recognized foreign institution of higher learning. The standards of the degree in question must be equivalent in both the distribution of academic subject matter and in scholarship achievement requirements to those maintained at UH Mānoa.

All applicants should have outstanding academic records. The evaluation is based on the applicant’s academic record, as well as test scores, the statement of objectives, and where appropriate, professional experience. Applicants may submit unofficial copies of transcripts and test scores while applying for admissions. However, admitted students are required to submit official transcripts and test scores in order to enroll at UH Mānoa.

Completed applications are screened by the Graduate Student Services Office. Applications that meet the requirements of the Graduate Division are forwarded to the respective graduate program, where the standards applied may be more stringent than those set by the Graduate Division. There the applications are subjected to a more comprehensive and intensive review by the graduate faculty. Where admission is intensely competitive, admission decisions are reached through a comparison of the relative merits of all applicants applying in the program or in an area of concentration, if applicable, for that particular semester. The graduate program then makes a recommendation to the Graduate Division either to admit or deny the applicant. The final decision to make a formal offer of admission rests with the Graduate Division, which takes into full consideration the recommendation of the graduate program. Admission is valid only for the semester of which the student was accepted.

Applicants may be denied admission for any number of reasons. Some of the more common bases of denial are undis-

tinguished academic records and poor test scores, inadequate preparation and background for advanced academic or professional study, unclear or unfocused objectives for graduate study, or inability of the program to accommodate all qualified applicants due to limited space or lack of faculty to guide the students in specified areas of interest. It is suggested that applicants consult the chair of the selected program concerning their interests and availability of faculty members in their intended areas of study.

The Graduate Division notifies each applicant of its decision. Official notification of acceptance or rejection is generally mailed between February and June for fall admission, depending on when the completed application is received and when a decision is reached. Most of the notifications are mailed in April and May. For spring, notification is generally between October and December. In programs with intense competition, selections are often made early. Applicants should not make definite arrangements to attend UH Mānoa until they receive formal notice of acceptance from the Graduate Division.

All applicants are required to specify on the application form all current and previous enrollment in any postsecondary institution. Any applicant who fails to inform UH Mānoa of such enrollment or who submits or has submitted any required information or document that is fraudulent or that has been altered without proper authorization may be denied admission to UH Mānoa. If the omissions and/or alterations are discovered after the student is enrolled, enrollment may be canceled and the student may be referred to UH Mānoa's Student Conduct Committee for possible disciplinary action.

### Application Procedures and Deadlines

You may apply for graduate admission by downloading an application form or by electronic application from the website listed below. Specific program information should be obtained directly from the appropriate graduate program. For a listing of graduate programs contact information, visit the website: [manoa.hawaii.edu/graduate/](http://manoa.hawaii.edu/graduate/). Communication should be addressed to the graduate chair of the appropriate graduate program.

For further information on general graduate admissions, write or email the Graduate Student Services Office at [graduate.education@hawaii.edu](mailto:graduate.education@hawaii.edu). Business, medicine, and law are not part of the Graduate Division. Applicants should apply directly to the Shidler College of Business, John A. Burns School of Medicine (see the "John A. Burns School of Medicine" section) or to the William S. Richardson School of Law (see the "William S. Richardson School of Law" section).

### Application Requirements

Students applying for admission to graduate programs must submit the following:

#### To the Graduate Division

1. On-line application form and application fee—no fee waivers;
2. One official transcript from each postsecondary institution attended, sent directly from the institution to the Graduate Division or received in a sealed institutional envelope. Transcripts are **NOT** required for course work completed at any of the UH campuses. The Graduate Student Services Office will obtain UH transcripts on behalf of applicants;
3. Official Test of English as a Foreign Language (TOEFL) or IELTS Academic Modules Test score report, if required (for

international applicants, as well as some immigrant and U.S. applicants); and

4. Verification of financial status (for international applicants).

If more than 25 percent of a student's undergraduate course work at a U.S. institution has been graded under a nontraditional grading system (i.e., pass/fail, credit/no credit, satisfactory/unsatisfactory, etc.), then:

1. Transcripts must be accompanied by official course performance reports, i.e., faculty evaluations (one copy each of transcripts and performance reports);
2. Transcripts from nontraditional grading systems must include course descriptions and grade conversion information; and
3. The applicant must take the Graduate Record Examination (GRE) General Test and have the results forwarded to the Graduate Division. [Applicants to the Shidler College of Business and the School of Accountancy should take the Graduate Management Admission Test (GMAT) in place of the GRE. Applicants to the School of Travel Industry Management may take the GMAT instead of the GRE.]

#### To the Graduate Program

1. Letters of recommendation if required by the graduate program;
2. One official transcript from each postsecondary institution attended, sent directly to the graduate program by the institution, if required by the graduate program;
3. Standardized test scores (excluding TOEFL and IELTS) such as GRE, GMAT, if required by the graduate program;
4. Special application forms, statement of objectives and long-range goals if required by the graduate program; and
5. Samples of work (slides, manuscripts, portfolio, or tapes), résumés, and writing samples if required by the graduate program.

For details, refer to the specific graduate program brochure and application instructions. Materials submitted in support of an application are not released for other purposes and cannot be returned to the applicant. Failure to fill out the application completely according to instructions may result in delays and/or file closure.

### Application Deadlines

Please refer to the Graduate Division Prospective Student section at [manoa.hawaii.edu/graduate/](http://manoa.hawaii.edu/graduate/) or specific graduate program brochure for specific application deadlines. Each graduate program may have different deadlines and some programs do not have spring admissions.

In many cases, admission offers include financial support, such as assistantships, scholarships, fellowships, and tuition waivers. Frequently, this support is awarded early to highly qualified applicants. Applications are processed by the Graduate Division as early as **September 1** for the fall semester and **May 1** for the spring semester. It is recommended that a completed graduate admissions application be submitted as early as possible.

### International Applicants

International applicants must submit official academic records in the original language accompanied by certified English translations. These translations must bear either the embossed seal or inked stamp of the issuing institution or governmental

agency or the original signature of the translator, and they must be complete and exact word-for-word translations of the original documents.

The following lists the *minimum academic qualifications* expected of international applicants from the following selected countries or areas for admissions consideration. These qualifications must be completed prior to enrollment. Not all regions and countries are represented and admission eligibility is determined upon review of all required application materials.

- Australia, Canada, South Africa: Bachelor's degree requiring at least four years of study or an honours bachelor degree.
- Baltic and East European States, former Soviet Republics: Diplom, Inzenyr, Magister, Oklevél: diploma requiring four to five years of post-secondary study.
- Bangladesh, India, Myanmar, Nepal, and Pakistan: Completed master's degree at the time of application or a four-five year bachelor's degree such as the B. Engineering, B. Technology, or B. Agriculture.
- United Kingdom and British patterned systems: Honours bachelor degree.
- France or French patterned systems: Maîtrise or title of Ingénieur; four-five year degree.
- Germany: University Diplom, Magister Artium, or Staatsexamen. The vordiplom alone is not sufficient.
- Philippines: Bachelor's degree from chartered higher education institutions (state universities and colleges) or CHED approved institutions and degree programs or FAAP certified level II or III accreditation status.
- Bologna-compliant three year bachelor degrees will be given consideration.

If admitted, international students must receive two clearances in order to register: (1) University Health Services clearance documenting adherence with health regulations; and (2) International Student Services (ISS) clearance documenting adherence to international student regulations and proof of adequate health insurance. **Note:** International applicants with a non-immigrant visa status other than student status should contact the ISS. Federal restrictions on full-time study may apply.

### Concurrent Pursuit of Multiple Graduate Programs

Current UH Mānoa graduate students who wish to pursue an additional graduate degree concurrently are required to obtain advance approval from their program chair and the Graduate Dean. Upon approval, students may apply for admission to an additional program after completing one semester of study in their initial program.

Students must submit the Petition to Apply for Concurrent Degree to their current program chair for approval prior to applying for an additional graduate program. It is recommended that the petition be submitted at least two weeks prior to the program's admission deadline. The petition is located on the Graduate Division website at [manoa.hawaii.edu/graduate/](http://manoa.hawaii.edu/graduate/).

Upon approval from the graduate chair, the student submits the approved petition, a new graduate admissions application, and the application fee to the Graduate Student Services Office. Approval of this petition only grants permission to apply and does not imply admission.

Approval is not required to apply to official dual degrees or to graduate certificate programs. Concurrent doctorates are

not permitted and multiple doctoral degrees are generally not permitted. If approved, each degree must be distinct, and representing a unique body of knowledge. Each dissertation must be distinct and not incorporate parts of a previous dissertation.

### Concurrent Graduate Certificates

Current UH Mānoa graduate students who wish to pursue an additional graduate certificate concurrently are required to apply directly to the Graduate Student Services Office. The Concurrent Graduate Certificate Program application can be downloaded from the Graduate Division website at [manoa.hawaii.edu/graduate/](http://manoa.hawaii.edu/graduate/). The application and application fee must be submitted to the Graduate Student Services Office, 2540 Maile Way, Spalding 353B, Honolulu, HI 96822.

### English Language Institute

International and immigrant students admitted to UH Mānoa whose native language is not English may be referred to the English Language Institute to determine if they must take the ELI placement examinations. If a student does not fulfill this obligation, ELI will place a hold on the student's registration. Please refer to the "English as a Second Language" section within the Colleges of Arts and Sciences for additional information.

### Standardized Examinations

Standardized test application forms are available at the Counseling and Student Development Center, (808) 956-3454. Out-of-state students and applicants from international countries should write to the address designated for each examination (see pertinent section).

Individuals with visual, physical, hearing, or learning disabilities who are required to take either the GRE or GMAT should contact the Educational Testing Service for information regarding special arrangements to take these examinations.

### Graduate Record Examination

The GRE and subtests may be required by some graduate programs and recommended by others. For the requirements of the individual graduate programs, consult the relevant graduate program descriptions in this *Catalog*. The GRE General Test (Package 1) is also required by the Graduate Division for students who have completed 25 percent or more of their undergraduate work at a U.S. institution under a nontraditional grading system. Test information is available through the Counseling and Student Development Center, (808) 956-3454. Applicants may request test registration forms directly from Graduate Record Examinations, Educational Testing Service (ETS), Box 6000, Princeton, NJ 08541-6000, web: [www.ets.org/gre/](http://www.ets.org/gre/). Submit completed registration forms and test fees to ETS at least one month before the examination date.

### Evidence of English Language Proficiency

Applicants whose native language is not English must submit official Test of English as a Foreign Language (TOEFL) scores or International English Language Testing System (IELTS) Academic Modules test results. The TOEFL score report and IELTS test results must be from a test taken within the last 2 years. A minimum TOEFL score of 500/61 (paper/internet) or IELTS overall band test result of 6.00 is required. Many programs require higher scores. The minimum score for teaching assistantship applicants is 600/100 for TOEFL and 7.00 for the IELTS.

Applicants who have completed a bachelor's or advanced degree program within the last five years at a regionally accredited/recognized institution in the U.S., Australia, Canada, Ireland, New Zealand, Singapore, or United Kingdom need not submit English language proficiency test scores.

Final admission requires submission of the official TOEFL/IELTS results. Applicants should, therefore, obtain the *TOEFL Bulletin of Information* early to check on the availability of the test and should take the test in time to meet graduate admissions application deadlines.

The TOEFL is administered at centers throughout the world. Applicants who wish to take the TOEFL outside the U.S. should obtain the *TOEFL Bulletin of Information for Candidates, International Edition*. This bulletin is generally available at U.S. embassies and consulates and at binational educational commissions and consulates abroad. Applicants may also order a bulletin directly from the representative who serves the area or country in which they plan to take the test. For complete information about the TOEFL, visit [www.ets.org/toefl/](http://www.ets.org/toefl/).

### International English Language Testing System (IELTS)

Applicants should contact the nearest British Council/Embassy/Consulate or IDP Education Australia Office in their country for the nearest testing center. It is advised that you also check the IELTS website for the most up-to-date information for testing centers. Web: [www.ielts.org/](http://www.ielts.org/)

## Additional Requirements and Information

### Reapplication

Newly accepted students who do not register in the program during the semester for which they are admitted or who withdraw from all courses within the designated withdrawal period (see the "Calendar" for designated withdrawal dates) are considered no-shows and their admission status is rendered invalid. A new application is required for readmission consideration.

### Change in Graduate Program

Applicants for a change in program are considered in competition with all other applicants to the new field. East-West Center students must consult their program officer before initiating any changes in graduate programs. The applicant must submit a Graduate Admissions application along with all documentation required by the new program (letters of recommendation, transcripts, test scores, etc.) to the Graduate Student Services Office within the standard admission deadlines for the graduate program. [If a change is granted, it becomes effective in the following semester contingent upon receipt of the Statement of Intention to Register (SIR) form.]

Students who are admitted to a new program are considered to be withdrawing from their current program. A student may return to the current graduate program only by petition to, and approval of, the graduate program and the Graduate Division.

### Readmission

Classified graduate students who wish to re-enroll after a lapse in enrollment of one or more semesters must apply for readmission. The readmission application form is found at: [manoa.hawaii.edu/graduate/](http://manoa.hawaii.edu/graduate/). The following documents must be submitted to the Graduate Division Student Services Office by the established deadlines:

1. Application form;
2. Application fee;

3. Confidential Financial Statement for International Applicants (if applicable);
4. Transcripts reflecting any studies since last admission to the UH Mānoa Graduate Division; and
5. Any other material requested by the graduate program (e.g., current test scores).

Students who are readmitted will be subject to the degree requirements in effect at the time of readmission.

### Document Retention

Applications and supporting documents in the following categories are retained by the Graduate Division for limited periods as indicated:

- Incomplete applications—two years.
- Applications with no action taken by graduate program; denials (those denied admission); no-shows (those not enrolled in the semester of admission); transcripts and test scores (TOEFL scores, master file of GRE scores)—two years.
- Academic records of graduated students—five years.
- Academic records of inactive students—seven years.

### Classification of Students

Only students who have been admitted to an advanced degree, certificate program, or special non-degree program by the Graduate Division are designated as classified (regular, provisional, or special non-degree) graduate students.

### Regular Graduate Student

An applicant will be eligible for admission as a "regular" classified graduate student if he or she has the following:

1. A GPA of 3.0 or better in the last four semesters or approximately 60 semester credits (or the equivalent in quarter credits) of work as an undergraduate;
2. A master's degree with a GPA of 3.0 or better; or
3. A GPA of 3.0 or better in at least 12 credit hours of relevant upper division and/or graduate-level post-baccalaureate work.

Students who have taken courses after receiving a bachelor's degree and whose GPA for 12 or more credit hours of upper division and/or graduate-level post-baccalaureate work is below 3.0 are not generally admissible even if they meet the minimum GPA requirements in category 1. International students with a GPA of less than a B average in their undergraduate work and/or less than a B average in 12 credit hours of post-baccalaureate work are generally not admissible.

### Provisional Graduate Student

Students whose bachelor's and/or master's degrees were incomplete at the time they filed applications for admission are "provisional" graduate students. They must submit an official transcript certifying completion of their degree to the Graduate Student Services Office. This must be submitted within 60 days after the award of the degree. Registration will be denied for the following semester to those who fail to meet this requirement.

### Special Non-degree Graduate Students

Special non-degree graduate students are admitted by the Graduate Division as classified graduate students for a specified program of study, research, or training without degree objectives for a limited period of time (usually one year) under the sponsorship of an educational institution or government agency.

### Post-Baccalaureate Unclassified Students

Individuals who wish to take UH Mānoa courses as a post-baccalaureate unclassified (PBU) student, must apply to the Graduate Student Services Office, University of Hawai'i at Mānoa, 2540 Maile Way, Spalding Hall 353B, Honolulu, HI 96822. (International applicants on an F-1 Student VISA are not eligible to apply.)

Students must submit an on-line application, application fee, and an official transcript verifying degree conferral of a bachelor's degree or advanced degree, from a regionally accredited U.S. college or university or its equivalent from a recognized foreign institution of higher learning. Applicants who received their bachelor's degree from a foreign institution are also required to submit official Test of English as a Foreign Language (TOEFL) scores or International English Language Testing System (IELTS) Academic Modules test results.

Applicants may download the PBU application from the Graduate Studies website at [manoa.hawaii.edu/graduate/](http://manoa.hawaii.edu/graduate/) or complete the graduate on-line application and select Post-Baccalaureate Unclassified as their intended program. Admission as an unclassified post-baccalaureate student does not constitute admissions as a classified student, nor does it guarantee future admissions as a classified student to a degree program. PBU students may not be eligible for certain benefits and services such as Veterans Affairs benefits, social security benefits, some types of federal financial aid, etc. PBU students are subject to graduate tuition rates. PBU students will need approval to take 600-800 level courses at UH Mānoa.

### Summer Session

Students who take course work at the graduate level in a summer session but who have not been admitted to an advanced degree program at UH Mānoa register as post-baccalaureate unclassified students. However, appropriate but limited credit hours earned from summer session courses while in unclassified status prior to admission to the Graduate Division are countable toward an advanced degree at the recommendation of the graduate programs involved. See "Post-Baccalaureate Unclassified Students" above.

Application for admission to a summer session should be made to Outreach College, University of Hawai'i at Mānoa, 2440 Campus Road, Box 447, Honolulu, HI 96822. Admission to a summer session does not imply or guarantee eventual admission to the Graduate Division.

## Registration

### Regular Registration

Registration dates and instructions are given in the online *Registration Guide* at [www.hawaii.edu/myuh/manoa/](http://www.hawaii.edu/myuh/manoa/), which is available a few weeks before registration each semester. The listing of course offerings with up-to-date class location and meeting times is found at the Check Class Availability website: [www.sis.hawaii.edu/uhdad/avail.classes?i=MAN](http://www.sis.hawaii.edu/uhdad/avail.classes?i=MAN).

### Late Registration

Students may register for credit hours through the last day of registration. There is a fee for late registration.

The late registration period is also the final time for classified graduate students to register to audit graduate courses, in accordance with the procedures outlined under "Course Auditing."

### Course Auditing

Classified graduate students may audit courses with the consent of the instructor. An audit approval form, available in the graduate program department office, must be completed and presented for registration. Audit courses are entered on student transcripts with a grade of L and are included in the tuition calculation. Audit courses may not be used for purposes of determining full-time or part-time enrollment status or graduate assistantship eligibility.

### Course Changes

Refer to the *Registration Guide* for complete information regarding procedures for course changes.

### Withdrawal from Courses

Refer to the *Registration Guide* for complete information regarding procedures for withdrawal from courses.

### Complete Withdrawal

To withdraw from all courses prior to the beginning of classes, students should consult with the department and follow directions in the *Registration Guide*.

Continuing students who withdraw from all courses after classes begin must obtain a Complete Withdrawal Form from the Graduate Student Services Office, obtain the necessary signatures as indicated on the form, and turn in the completed form to the UH Mānoa Cashier's Office, Queen Lili'uokalani Center for Student Services 105. A semester in which a cancellation or withdrawal is made is considered a semester of nonattendance. Thus, students must petition for readmission or file a renewal application, whichever is appropriate, to return to their studies in the same program. Petitions for readmission and renewal applications are considered along with all new applications for that semester. Students who are readmitted will be subject to the degree requirements in effect at the time of readmission.

Newly admitted students who cancel or withdraw from all courses before the drop period ends (see the *Registration Guide* for the date) are considered "no shows," and their admission status becomes invalid. To return, they must reapply for admission. Newly admitted students who withdraw after the drop period (see the *Registration Guide* for the date) must complete a Petition for Readmission form if they wish to return the following semester. Petitions for readmission are considered along with all new applications for admission for that semester.

ter. Students who are readmitted will be subject to the degree requirements in effect at the time of readmission.

### **Retroactive Withdrawals**

Retroactive withdrawals are partial or complete course withdrawals processed after the semester has ended. UH Mānoa is obligated to ensure the integrity of the transcript as an historical document, which must reflect the actual history of a student's experience at UH Mānoa. Because of this, the student who is requesting a retroactive withdrawal will need to present a convincing case and provide relevant documentation that supports the existence of circumstances beyond their control that prevented them from initiating the withdrawal request in a timely manner. Any request after two years of the course ending will not be reviewed. Should a retroactive withdrawal be approved, the action will result in the grade being changed to a W. Tuition refunds will not be considered and any academic action applied for that semester will remain on the student's record. Students who were financial aid recipients during the semester in which they are seeking a withdrawal should check with Financial Aid Services to determine if this will result in a financial obligation or will result in future ineligibility for financial aid.

### **Failure to Withdraw**

If students cease to attend classes without officially withdrawing, they will receive final grades at the instructors' discretion. If the instructor does not award a grade, an F or NC will be assigned.

### **Denial of Registration**

The Graduate Division will deny further registration to any student whose course work is below the required level or who is not making satisfactory academic progress.

### **Enrollment Requirements**

#### **Continuing Enrollment**

After admission, students must be enrolled at UH Mānoa every fall and spring semester for at least course work, thesis, dissertation, or research credit. Students graduating in summer must be enrolled in at least one session. Students who are neither enrolled nor on approved leaves of absence, will be regarded as withdrawn from their degree programs. They will be required to apply for readmission in accordance with established regulations if they wish to resume their studies.

#### **Leave of Absence**

A leave of absence for a period of time no longer than one calendar year may be granted to currently enrolled students in good standing (minimum GPA of 3.0) after (1) completion of at least one semester of course work relevant to the degree as a classified graduate student, and (2) upon recommendation of the chair of the graduate program and approval by Graduate Division. The date of return from a leave must be set at the time the leave is requested. Forms are available on the website.

Students must withdraw from courses if requesting a leave of absence. Students not returning from leave on time will be required to petition for readmission to UH Mānoa in accordance with the established regulations. Students who are readmitted will be subject to the degree requirements in effect at the time of readmission.

Students on approved leave do not pay tuition or fees. No leave should be requested if the student will be using UH Mānoa facilities or faculty or staff services. Time on approved leave is not counted against the seven-year limit for completion of degree programs.

Students on probation are not granted an approved leave of absence.

### **Credit Hours**

#### **Course Loads**

Sixteen credit hours in a semester and 8 credit hours in a six-week summer session are considered maximum course loads and may be exceeded only with the approval of the graduate chair and the Graduate Division. The minimum full-time load for graduate students is 8 credit hours of course work. Courses taken for audit do not count toward determining full- or part-time enrollment status.

Eligible doctoral candidates may be considered as carrying a full academic load (full-time status) when enrolled for 1 credit hour of Dissertation 800.

Eligible master's candidates may be considered as carrying a full academic load (full-time status) when enrolled for 1 credit hour of Thesis 700F after completing all required credits for the graduate degree including the program's requirements for Thesis 700.

For graduate assistants, the full-time load is 6 credit hours of course work relevant to their degree. Audit hours do not count toward the minimum. Because their duties ordinarily require 20 hours per week, they are restricted to a maximum of 9 credit hours. However, with special permission from the graduate chair and the Graduate Division, graduate assistants may register for 12 credit hours, including audits.

#### **Variable Credit Courses**

The number of credit hours obtainable in most courses is stated in this *Catalog*. Certain courses, designated (V) in *Catalog* course listings, offer variable credit. Students in these courses usually pursue individual work. The number of credit hours a student will earn in such a course must be approved by the instructor at the time of registration. Students must register for a definite number of credit hours and may earn no more or less than the stated number.

#### **Graduate Credit for Seniors**

Seniors at UH may earn credit toward an advanced degree for some courses completed during their last semester as undergraduates provided (1) the courses taken are in excess of the requirement for the bachelor's degree, and (2) such courses fulfill requirements in the prospective graduate field. A Petition for Submission of Credit Toward an Advanced Degree for Courses Taken by an Undergraduate form is available at the Graduate Division Student Services Office at Spalding 353B and on the web. It must be approved by the academic advisor, the college dean, and the chair of the department in which the course is offered, and it must be filed with the Graduate Division Student Services Office during the registration period. The granting of such permission does not guarantee that the credit hours taken will be accepted by a graduate program as fulfilling degree requirements. Courses taken under this rule are counted in the graduate GPA at the time of graduation. Failure to complete the baccalaureate degree as scheduled nullifies any approval granted by the Graduate Division.

### Credit by Examination

Graduate students may obtain credit by examination in courses numbered 300-498 (excluding 399) with the approval of the chair of the graduate program, the instructor concerned, and Graduate Division, subject to general UH regulations and procedures. There is no limit on the number of examinations that a graduate student may take during any one semester. Credit may not be obtained by examination in courses numbered 600 or above.

### Extension and Correspondence Course Credits

No graduate credit is allowed for extension and correspondence courses.

### Undergraduate Deficiencies

Undergraduate deficiencies are courses required by a graduate program, prerequisites, or other requirements for admission that the student did not complete prior to admission. Courses in directed research/reading are not to be used to make up deficiencies.

### Transfer of Credits

Credits from institutions other than UH Mānoa or taken as a post-baccalaureate unclassified (PBU) at UH Mānoa can be considered for transfer upon submission of (1) a memo approved by the chair of the graduate program, or (2) the Petition to Transfer/Substitute Credits form, which is available on the web.

Courses being considered from institutions other than UH Mānoa must be accompanied by an official transcript, transcript guide, and course syllabus if substituting for a required course.

Doctoral students may not transfer credits. Graduate certificate students may transfer six UH Mānoa PBU credits.

### Policy Governing Transfer of Credits from Other Institutions

1. The request for transfer of credit hours must be made during the *first* semester the student is enrolled in the program.
2. Only credit hours from an accredited university are transferable.
3. Regardless of the number of credits transferred, more than half of the total number of credits used to fulfill master's degree requirements must be earned at UH Mānoa while enrolled as a graduate student. For example, if the master's degree requires 30 credits total, 16 or more credits must be earned at UH Mānoa while enrolled as a graduate student.
4. With approval from the graduate program and the Graduate Division, up to 6 credit hours of work completed at another accredited institution following advancement to candidacy at UH Mānoa may be transferred, providing such transfer does not exceed the maximum allowable.
5. Credit hours used to obtain a previous degree will not be transferred.
6. No credit hours may be transferred from another institution unless the grade is B- or better. Course grades of S, CR, and P are not transferable.
7. Credit hours to be transferred must have been completed within seven years preceding the date upon which the advanced degree is to be conferred by UH Mānoa.
8. Quarter credit hours are converted to semester hours by using this formula:  $2/3$  times number of quarter credit hours equals number of semester credit hours (rounding off to the

lower whole number). Conversion is done by the Graduate Division and is calculated for the total credit hours requested for transfer rather than for individual course credit hours.

9. Credit hours earned in international institutions must be certified by the departments as to the equivalent level of the courses being transferred (i.e., whether 300-398, 400-498, or 600-798 level).
10. The minimum residence requirement of full-time study must be upheld regardless of the number of credit hours transferred to UH Mānoa.
11. Transfer of courses to meet practicum, seminar, thesis, or dissertation requirements is not permitted.
12. Extension credits from other universities are not transferable.
13. Directed reading/directed research credits (x99) are not transferable.
14. Transfer credits are not included in GPA calculations except for the final calculations when the student graduates.

If the petition is approved, the units (or UH Mānoa equivalent) will be counted as part of the student's degree program.

### Double Counting

A student who pursues two distinct master's degrees at UH Mānoa, either simultaneously or consecutively, may apply to have up to 6 credit hours of graduate course work accepted for credit in both degree programs under the following provisions:

1. The courses being double counted are electives in both programs;
2. Written approval of the graduate chairs of both programs (only approval by the second chair is required if the degrees are being pursued sequentially) and the Graduate Division is obtained; and
3. The course work for each degree is completed within the prescribed time limits.

### Dual Degree

A student in a UH Mānoa-approved "dual degree" program who fails to meet the academic requirements specified for that program will be dismissed from the dual degree program and the Graduate Division.

### Examinations

The schedule of final examinations is published in the *Registration Guide*. No examinations (other than laboratory tests and short quizzes) are allowed during the two weeks prior to the final examination period.

### Grades

Student achievement is designated by: A+, A, A- (high achievement), B+, B, B- (meets expectations), C+, C, C-, (below expectations), D+, D, D- (inadequate performance), F (failure), CR (credit), NC (no credit), NG (no grade and work in progress), S (satisfactory), and I (incomplete). L is the designation given to audited courses. Grades lower than C- may not be used to fulfill requirements for advanced degrees.

The 500 course is offered as a 1-credit course, with credit awarded upon completion of the Plan B requirements. Credit for this course does not count toward meeting degree requirements or toward meeting full-time enrollment status. Students must be registered during the term in which the degree is to be awarded.

An I is given to students who fail to complete a small but important part of a semester's work before the semester grades are determined, if the instructor believes that the failure was caused by conditions beyond the student's control and not by carelessness and procrastination. Students are expected to complete all courses. Therefore, students receiving an I should contact the instructor to determine the steps to be taken to remove the I. The deadline for removing an I received in the fall semester is the following **April 1**; for removing an I received in the spring semester or the summer session, the deadline is the following **November 1**.

Instructors who record a grade of I for undergraduate courses (100-499) must also record the grade that will replace the I if the work is not made up by the deadline; that grade is computed on the basis of what grades or other evidence the instructors have, averaged together with Fs for all incomplete work (including the final examination, if it is not taken). This alternate grade may be the appropriate letter grade, or if the course was taken under credit/no credit, CR/NC. (The designation W cannot be used as an alternate grade.)

Instructors who record a grade of I for graduate courses (600-799, excluding 700) have the option of recording an alternate grade to replace the I if the work is not made up by the deadline. This includes courses taken for letter grade or for credit/no credit, CR/NC. If the instructor chooses to record an incomplete for a graduate course with no alternate grade, the instructor may (1) allow the grade of I to remain permanently unaltered on the student's record; (2) submit to the Office of the Registrar a change-of-grade form, with the grade computed on the basis of work completed by the deadline noted above; (3) after the deadline for removing the I, at the student's request submit a Change of Grade form to the Graduate Division Student Services Office requesting a conversion of the I to a grade. Such conversions may be permitted on a case-by-case basis only during the two semesters immediately following the semester in which the I was received. After that period, the I will be permanent.

If work for a course in which an I has been assigned is completed prior to the deadline, the instructor will report a change of grade, taking the completed work into consideration. A grade of F or NC, as appropriate, will be assigned in those cases where an instructor has not assigned a grade to a student who has never attended or has ceased to attend class without officially withdrawing.

### Change of Grades

Grades may be changed only within one full academic year following the end of the semester in which the course was completed. To change a grade, the course instructor completes and submits a Change of Grade form to the Graduate Division Student Services Office. The instructor must state the reason for the grade change on the form and sign the form. "Additional work submitted" is not an acceptable reason for changing a grade.

### Repeated Courses

Solely for the purpose of graduate academic actions in the computing of the GPA of students who retake a course that is otherwise non-repeatable, only the most recent grade will be included.

Students switching from either Plan A or Plan B to Plan C must have a minimum GPA of 3.0 in all courses completed

(300-398, 400-498, 600-798). Credit hours taken under the credit/no credit option (except 699) while under Plan C will not be counted toward degree requirements for either Plan A or Plan B.

### Credit/No Credit Option

The major purpose of the credit/no credit option is to encourage students to broaden their education by venturing into subject areas outside their fields of specialization without hazarding a relatively low grade. Under the option, students receive grades of CR (credit) or NC (no credit). These do not carry grade points and, therefore, are not computed in the student's GPA.

The option must be exercised at the time of registration and only under the following conditions:

1. Except as noted, courses taken under the CR/NC option may not be applied toward the requirements for the master's degree. Only 699 directed reading/research courses may be taken on CR/NC at the option of the graduate program and may be granted credit toward a master's degree within the limits already prescribed by the Graduate Division (see master's degree requirements, Plan A and Plan B).
2. A course for which a grade of NC is received may be retaken under the CR/NC option.
3. The CR designation in the non-letter grade system denotes C caliber work or better.
4. The NC designation and the course in which it is received will appear in official records as part of the student's academic history.
5. The NC designation affects neither the credit hour total nor the grade point total of the student.

### Requirements for Continued Registration

#### Satisfactory Progress

To remain eligible for further graduate work and to be awarded a graduate degree, students must maintain progress towards completion of their programs and must have a B average (3.0 GPA) for all courses completed at UH Mānoa applicable to the degree. Students must also have a B average for all courses taken as a classified graduate student and for all graduate courses numbered 600 and above.

The Graduate Division disregards grades or credit hours for courses numbered 100-198, 200-298, 399, and 499, except those required to fulfill undergraduate deficiencies.

Satisfactory academic progress in a program also involves maintaining the academic and professional standards expected in a particular discipline or program; failure to maintain these standards may result in termination of student's admission to the program.

#### Fulfillment of Credit Hour Requirements

Credit hour requirements for graduate degrees can only be fulfilled by grades of A, B, and C. Grades of A, B, C, and CR can be used to make up undergraduate deficiencies. Grades of CR for 699 directed reading or research courses are counted in credit hour requirements within stated rules but are not computed for GPAs. Grades of NC are neither counted nor computed. Grades of D and F are not counted toward the completion of requirements for advanced degrees but are computed in the GPA, along with grades for all courses taken to satisfy undergraduate deficiencies and courses counted toward advanced degrees.

## Probation and Dismissal

A regular student whose cumulative GPA fails to meet the minimum requirements after completing at least 8 credit hours of course work will be placed on academic probation for the following semester. The student must be registered in the semester he or she is placed on probation.

A conditional student whose GPA since admission fails to meet the minimum requirements after completing one semester of course work will be placed on academic probation for the following semester. (ESL students are subject to dismissal.)

All grades for courses taken during the probationary semester, as well as the grades for all previously taken classified credits, will be included in calculating the GPA at the end of the probationary semester. No extensions of the probationary semester may be granted due to incompletes I.

A student on academic probation who fails to attain the minimum standards at the end of the probationary semester will be denied further registration in that program.

For purposes of these rules, a “semester” is the calendar period, regardless of the number of credit hours taken.

For students pursuing approved concurrent graduate degree programs, the requirements stated above are applicable to both programs but will be applied toward each program independently.

## Policy on Reinstatement after Dismissal

To be reinstated to the same program after academic dismissal, the student must submit completed readmission forms to the Graduate Division Student Services Office and meet the standard admission criteria applicable to the graduate program. The graduate program must submit a petition to the Graduate Division on the student’s behalf, providing **strong** justification for the action. If reinstated, all courses applicable to the degree are subject to the seven year rule (i.e., must be completed within seven years of the date the degree is to be awarded) and the student will be subject to the degree requirements in effect at the time of reinstatement.

To be admitted to a new program after academic dismissal or voluntary withdrawal, the student must submit a new application to the Graduate Division Student Services Office and meet the standard admission criteria applicable to the graduate program. Such students will be treated like new students.

## Policy on Disciplinary Suspension

To be reinstated to the same program after suspension for disciplinary reasons, the student must submit completed readmission forms to the Graduate Division Student Services Office and meet the standard admission criteria applicable to the graduate program. Students suspended for disciplinary reasons must adhere to posted application deadlines and may not be re-admitted mid-semester.

## Special Non-degree Students

Special non-degree graduate students are not subject to the B average rule.

## Diplomas

The Graduate Application for Degree form must be filed at the beginning of the semester (see the “Calendar” for dates and deadlines) in which the student expects to complete the degree requirements. Students can also obtain a Hawaiian language version of their degree. Application forms may be obtained at

the Graduate Division Student Services Office, and the fee paid at the Cashier’s Office or online through the student’s MyUH account.

## Degree Checks

A degree check will be made for all students who file a degree application form.

The Graduate Division may delete from the graduation list the name of any student whose final grade report contains either a grade of I (incomplete) or a missing grade, or whose records have any other discrepancies.

## Conferring of Degrees

Degrees are conferred and diplomas awarded three times annually, in December, May, and August. Students completing their degree requirements may, upon request, receive certification from the Graduate Division that the degree will be conferred at the end of the appropriate semester. Diplomas are issued by the Office of the Registrar. Inquiries regarding diplomas should be addressed to the Office of the Registrar, Queen Lili’uokalani Center for Student Services, Room 010, 2600 Campus Road, Honolulu, HI 96822 [tel. (808) 956-8010], and not to the Graduate Division.

## Transcripts

Transcripts may be obtained from the Office of the Registrar.

## Certificate Programs

UH Mānoa offers a number of graduate-level programs that culminate in the awarding of a certificate. These programs are available to classified graduate students who are enrolled in one of the master’s or doctoral degree programs described in this *Catalog*. In a few areas, applications may be considered from non-degree-seeking students. Certificates require a minimum of 15 credit hours of specified courses and a 3.0 GPA in those courses. Detailed information may be obtained by writing to the appropriate graduate chairs.

Certificate programs are offered in the following fields:

- Advanced library and information science
- Advanced women’s studies
- Chinese studies
- Clinical psychology
- Conflict resolution
- Disability and diversity studies
- Disaster management and humanitarian assistance
- Early Childhood Pk-3
- Gerontology
- Global health protection and security
- Historic preservation
- International cultural studies
- Japanese studies
- Korean studies
- Museum studies
- Nursing
- Ocean policy
- Online learning technology
- Pacific Islands studies
- Philippine studies
- Planning studies
- Public administration

- Public policy
- Reading K-12
- Resource management
- Second language studies
- South Asian studies
- Southeast Asian studies
- Telecommunications and information resource management
- Urban and regional planning

## Master's Degree Programs

UH Mānoa confers the degrees of master of architecture, master of arts, master of education, master of education in teaching, master of fine arts, master of geoscience, master of library and information science, master of music, master of public administration, master of public health, master of science, master of social work, and master of urban and regional planning.

Faculty or staff members at rank 3 and above may not be awarded a master's degree by UH Mānoa in the graduate program administered by the department in which they are employed.

The master of accounting degree is offered through the Shidler College of Business for students who are contemplating careers in professional accountancy.

The master of arts degree is offered through the Colleges of Arts and Sciences, the School of Pacific and Asian Studies, and the Hawai'i inuiākea School of Hawaiian Knowledge for advanced course work including research in the following disciplines:

- American studies
- Anthropology
- Art and art history
- Asian studies
- Communication
- Communicology (formerly Speech)
- Dance
- East Asian languages and literatures
- Economics
- English
- French
- Geography
- Geology and Geophysics
- Hawaiian
- Hawaiian studies
- History
- Linguistics
- Mathematics
- Music
- Pacific Islands studies
- Philosophy
- Political science
- Psychology
- Religion
- Second language studies
- Sociology
- Spanish
- Theatre

The master of education degree is offered through the College of Education for advanced course work including research in the following disciplines:

- Curriculum studies
- Early childhood education
- Educational administration
- Educational foundations
- Educational psychology
- Educational technology
- Special education

The master of education in teaching degree is offered through the Institute of Teacher Education.

The master of fine arts degree is offered through the Department of Theatre and Dance and the Department of Art and Art History for creative endeavors.

The master of geoscience for professionals is offered through the Department of Geology and Geophysics.

The master of library and information science degree is offered through the Department of Information and Computer Sciences as preparation for careers in information services in public, college, school, and technical libraries. Graduates are also prepared for careers in other types of information environments.

The master of music degree is offered through the Department of Music for composition and performance in music.

The master of public administration degree is offered through the Public Administration Program.

The master of public health degree is offered through the Public Health program to provide individuals with a broad background for professional practice in the field of public health at local, state, national, and international levels.

The master of science degree is offered through the Public Health program, the Colleges of Arts and Sciences, Education, Engineering, Tropical Agriculture and Human Resources and the Schools of Ocean and Earth Science and Technology, Medicine, Nursing and Dental Hygiene, Travel Industry Management, and for advanced course work including research in the following disciplines:

- Animal sciences
- Astronomy
- Biological engineering
- Biomedical sciences
- Botany
- Cell and molecular biology
- Chemistry
- Civil and environmental engineering
- Communication sciences and disorders
- Computer sciences
- Developmental and reproductive biology
- Electrical engineering
- Entomology
- Food science
- Geology and geophysics
- Kinesiology and rehabilitation science
- Marine biology
- Mechanical engineering
- Meteorology
- Microbiology
- Molecular biosciences and bioengineering
- Natural resources and environmental management
- Nursing
- Nutritional sciences
- Ocean and resources engineering

- Oceanography
- Physics
- Public health
- Travel industry management
- Tropical medicine
- Tropical plant and soil sciences
- Tropical plant pathology
- Zoology

The master of social work degree is offered through the School of Social Work. The program prepares graduates for counseling individuals, families, and groups; for social policy formulation and community organization; and for research and administration in the human services.

The master of urban and regional planning degree is offered through the Department of Urban and Regional Planning.

### **Requirements and Procedures for Master's Degrees**

The rules and requirements listed below are those of the Graduate Division and must be observed by all students pursuing a master's degree. Note that some graduate programs have special requirements.

#### **Residence**

The minimum residence requirement is two semesters of full-time work or four six-week summer sessions or the equivalent in credit hours applicable to the student's degree program.

#### **Language Requirements**

At the option of the graduate program, the intended candidate for the master's degree may be required to demonstrate comprehension of one or more foreign languages. For specific language requirements in particular graduate programs, see the appropriate graduate program listed in this *Catalog*. English is not considered a foreign language in this context. These requirements must be passed before the student can be advanced to candidacy.

#### **Time Allowed**

Candidates for the master's degree will be expected to complete all requirements within seven years after admission into the master's program. Candidates who fail to complete all requirements within five years of admission will be placed on probation. If not completed after seven years, candidates are automatically dropped from the program. Extensions of time are allowed only upon petition by the graduate chair explaining why more time might be justified.

#### **Types of Master's Degree Programs**

In general, there are three types of programs that students may follow to earn a master's degree; thesis, portfolio, and examination. Not all plans are available in all programs.

Graduate Division uses progress forms to track thesis and dissertation students. These forms are available on the website.

### **Thesis (Plan A)**

#### **Credit Hour Requirements**

A minimum of 30 credit hours is required including 18 credit hours of approved course work, excluding 699s and Thesis 700, at least 12 of which must be in courses numbered 600-798; at least one graduate seminar in the major or related field; and at least 6 credit hours of Thesis 700. The thesis

research credit requirements are set uniformly for each graduate program by the faculty in that program.

Candidates must be registered in the thesis research course (700) each semester during which the thesis is being written. Candidates who accumulate the maximum number of thesis research credit hours, but fail to complete the thesis must register for a minimum of 1 credit hour of thesis research at the beginning of the term in which all requirements for the degree will be completed.

#### **Thesis Requirement**

When a thesis proposal has been approved by the student's committee, the chair of the graduate program sends to the Graduate Division a Student Progress Form II (approval of thesis topic). The student may then enroll in the thesis research course (700) at the beginning of the next term. Students must register for Thesis 700 during the announced registration period. Failure to make satisfactory progress on a thesis does not entitle a student to a refund of tuition.

Upon request by the thesis committee, relevant work done by the student in directed reading/research (course 699) may be utilized as part of the thesis research. In such instances, the total credit hours for such directed reading/research (course 699) and thesis research (700) to be applied toward the minimum requirement for the degree shall not exceed the maximum total credit hours specified for thesis research in the graduate program.

The thesis committee is made up of three members of the graduate faculty.

The chair of the thesis committee is primarily responsible for directing and guiding the candidate's research and writing activities. It is the student's responsibility to keep all members of the committee informed of the scope, plan, and progress of both the research and the thesis. The committee members approve via Progress Form II and Progress Form IV (signature page). Guidelines for thesis preparation are available at the Graduate Division website.

The electronic submission of the thesis is required. Submit a pdf file on a disc (two discs if publishing with ProQuest Information and Learning). Theses must be deposited with the Graduate Division by the specified deadline (see the "Calendar").

#### **General Examination**

At the option of the faculty of the graduate program, a general examination may be required before a student is advanced to candidacy for a master's degree. All students within a particular graduate program must take the examination if it is required. The examination is usually given during the first semester of residence. It is designed to reveal the quality of the student's preparation for advanced work in the program and the ability of the student to pursue graduate work at the master's level. The examination also enables the student's committee or advisor to assist in planning a program that will overcome any deficiencies in the student's background.

A student who passes the examination may be recommended for advancement to candidacy for the master's degree. A student who fails the general examination may repeat it once upon approval by the graduate program. However, students failing the general examination a second time are dropped from the program.

In graduate programs not requiring a general examination, the student may be advanced to candidacy upon the recommendation of the advisor and/or the graduate faculty of the program concerned. It is assumed that in these cases the recommendation for advancement to candidacy will be based on some evaluation of the student's potential performance other than a general examination. Students who are denied advancement to candidacy are dropped from the program and lose their status as classified graduate students.

### **Final Examination**

A final oral examination covering the thesis and related areas may be required by individual graduate programs. All Plan A students within a particular graduate program must take the examination if it is required at all. It should be held prior to the specified deadline before the end of the term during which the degree is conferred. It is conducted by the thesis committee and is open to all graduate faculty members. As an alternative, the committee chair may have the candidate present results of the thesis at a departmental graduate seminar, but all members of the thesis committee must be present.

Students failing the final examination may repeat it only once upon petition approved by the graduate program and the Graduate Division. Students who fail the final examination a second time are dropped from the program and lose their status as classified graduate students. If the graduate program does not require a final examination, the chair of the graduate faculty concerned reports the completion of all degree requirements on Student Progress Form III.

### **Portfolio (Plan B)**

#### **Credit Hour Requirements**

A minimum of 30 credit hours is required. A minimum of 18 credit hours must be earned in courses numbered 600-798 (excluding Thesis 700) including at least one graduate seminar in the major program or in a related program. Not more than 9 credit hours in directed reading/research (course 699) may be applied to meet degree requirements. This degree plan typically includes a final project, practicum, or similar culminating experience.

When the student is advanced to candidacy, the chair of the graduate program appoints a program advisor or a program committee made up of members of the graduate faculty. The program advisor/committee advises the candidate and approves a coherent program of courses for the candidate.

Candidates must be enrolled during the term in which they complete the requirements for the degree; regular course work or the appropriate Master's Plan B Studies 500 may be used to meet this requirement. The 500 course is offered as a 1-credit course with a mandatory grading of S/NG but does not carry credit toward meeting degree requirements.

#### **General Examination**

At the option of the faculty of the graduate program, a general examination may be required before a student is advanced to candidacy for a master's degree. All students within a particular graduate program must take the examination if it is required at all. The examination is usually given during the first semester of residence. It is designed to reveal the quality of the student's preparation for advanced work in the program and the ability of the student to pursue graduate work at the master's level. The examination also enables the student's commit-

tee or advisor to assist in planning a program that will overcome any deficiencies in the student's background.

A student who passes the examination may be recommended for advancement to candidacy for the master's degree. A student who fails the general examination may repeat it once upon approval by the graduate program. However, students failing the general examination a second time are dropped from the program.

In graduate programs not requiring a general examination, the student may be advanced to candidacy upon the recommendation of the advisor and/or the graduate faculty of the graduate program concerned. It is assumed that in these cases, the recommendation for advancement to candidacy will be based on some evaluation of the student's potential performance other than performance in the general examination. Students who are denied advancement to candidacy are dropped from the program and lose their status as classified graduate students.

### **Final Examination**

At the option of the faculty of the graduate program, a final examination may be required of Plan B candidates for the master's degree. If required, it is designed to determine the candidate's achievement in the graduate program at the master's level. This examination has several possible forms. It may be a seminar appearance, a written comprehensive examination, an oral examination, some equivalent, or a combination of these. If a final examination is required by the graduate program, it must be given prior to the established deadline before the end of the term during which the degree is conferred.

Students failing the final examination may be permitted to repeat it only once upon approval by the graduate program and the Graduate Division. Students failing the examination a second time are dropped from the program and lose their status as classified graduate students.

### **Examination (Plan C)**

Neither a thesis nor a certain number of credit hours is required by this plan. The student must demonstrate competence by examination and must meet the minimum residence requirement of two semesters of full-time study.

A preliminary conference will be held to discuss the student's objectives and how to meet them and to determine the general program the student will follow to prepare for the required examinations. The conference will be conducted by the chair of the graduate program or by a designated member of the graduate faculty. The plan of study developed at this conference may include course work and/or independent study and research. Plan C is available in second language studies, linguistics, mathematics, natural resources and environmental management, physics, and tropical plant and soil sciences. Each graduate program specifies its own requirements in addition to the following:

Candidates must be enrolled during the term in which they complete the requirements for the degree; regular course work or the appropriate Master's Plan C Studies 500 may be used to meet this requirement. The 500 course is offered with a mandatory grading of S/NG but does not carry credit toward meeting degree requirements.

#### **General Examination**

A general exploratory examination (oral and/or written) will be given to determine if the intended candidate should be

admitted to candidacy for the master's degree under Plan C and to ascertain weaknesses in the student's academic preparation. This examination is designed to reveal the quality of the student's preparation for advanced work in the program and the ability of the student to pursue graduate work at the master's level. The examination will be conducted by the student's interim advisor and the graduate faculty of the program or a committee thereof consisting of at least three members of the faculty. It is given during the first semester of residence and is from one to two hours in length. A student who fails the general examination may repeat it upon recommendation from the graduate program and approval by the dean of the Graduate Division. A student who fails the general examination a second time is dropped from the program and loses classified graduate student status.

### Final Examination

A final examination or series of examinations, written and oral, will be given to determine the candidate's comprehension of the graduate program at the master's level. Since there are no course requirements for this plan, the final examinations will be designed to give the student opportunity to demonstrate a level of achievement consonant with the level of achievement required by Plans A and B. It is assumed that many students will prepare themselves for the examinations by taking courses recommended by advisors.

Specifications for the number of written examinations required, what they cover, and the amount of time required for each (two or more hours for written examinations and one or more for the oral portion) are set forth in the statement of requirements in each graduate program. The written examinations may be given by the candidate's committee or by an examination committee of graduate faculty members constituted for that purpose.

The oral portion of the final examination follows the written portions and must be held prior to the specified deadline before the end of the term during which the degree is conferred. It is conducted by the candidate's committee and is open to all members of the faculty. The examination must be announced in the weekly *News@UH*. It may be scheduled on any working day during normal working hours. Arrangements for the final examination must be made at least three weeks prior to the date of examination for fall and spring semesters, and four weeks prior to the date of the examination for the summer.

Candidates failing the final examination may be allowed to repeat it upon approval by the graduate faculty concerned and the Graduate Division. Students failing the final examination a second time are dropped from the program and lose their status as classified graduate students.

### Doctor of Philosophy Programs

Faculty or staff members at rank 3 and above may not be awarded a doctoral degree by UH Mānoa in the graduate program administered by the department in which they are employed.

The doctor of philosophy (PhD) degree is awarded only for the most distinguished scholarly achievement. The quality of a candidate's work is judged by a variety of means, culminating in a set of comprehensive and final examinations and a dissertation. The dissertation describes completed research and must be a significant original contribution to knowledge in the candi-

date's chosen program. The additional, special requirements in any given graduate program prepare the candidate for the examinations and successful completion of the dissertation.

Candidates are accepted only in graduate programs in which the teaching staff, library, laboratory equipment, and cooperative relationships with other research institutions make it possible to offer training.

The doctor of philosophy is offered in the following areas:

- American studies
- Anthropology
- Astronomy
- Botany
- Cell and molecular biology
- Chemistry
- Civil and environmental engineering
- Clinical research
- Communication and information sciences
- Computer science
- Developmental and reproductive biology
- East Asian languages and literatures
- Economics
- Education
- Educational psychology
- Electrical engineering
- English
- Entomology
- Epidemiology
- Geography
- Geology and geophysics
- History
- International management
- Linguistics
- Marine biology
- Mathematics
- Mechanical engineering
- Meteorology
- Microbiology
- Molecular biosciences and bioengineering
- Music
- Natural resources and environmental management
- Nursing
- Nutrition
- Ocean and resources engineering
- Oceanography
- Philosophy
- Physics
- Political science
- Psychology
- Second language studies
- Social welfare
- Sociology
- Theatre
- Tropical medicine
- Tropical plant and soil sciences
- Tropical plant pathology
- Urban and regional planning
- Zoology

### Doctor of Education

The degree of Doctor of Education (EdD) is awarded for distinguished academic preparation for professional practice in the field of education. The quality of a candidate's work is judged by a variety of experiences, culminating in an internship, a set of comprehensive and final examinations, and a dissertation. The dissertation is based on a selected research problem and is a significant part of the candidate's field experience or internship.

### Doctor of Public Health

The degree of Doctor of Public Health (DrPH) is awarded for distinguished academic preparation for professional practice in the field of public health. The quality of a candidate's work is judged by a variety of means, culminating in a set of comprehensive and final examinations and a dissertation. The dissertation must be a significant original contribution to knowledge in the field of public health practice. Required course work is designed to prepare the candidate for the examinations and the dissertation.

### Doctor of Nursing Practice

The degree of Doctor of Nursing Practice (DNP) is awarded for distinguished academic preparation for professional practice in the field of nursing. Candidates must progress through course work and a series of capstone experience culminating in a final project. The student must produce a tangible and deliverable academic product that is derived from practice immersion experience and is reviewed and evaluated by the faculty.

## Requirements and Procedures for Doctoral Degrees

### Time Allowed

Doctoral students are expected to complete all requirements within seven years after admission into the doctoral program. Candidates who fail to complete all requirements within seven years of admission will be placed on probation and are subject to dismissal at any point after, but automatically after 10 years. Extensions of time are allowed only upon petition by the graduate chair explaining why more time might be justified.

### Credit Hour Requirements

There is no minimum number of required course credit hours set for doctoral degrees. Registration in courses by doctoral students is governed by (1) the judgment of advisors or faculty in charge of the relevant program of study as to the importance of particular course work to the training and preparation of the candidate for the writing of examinations and/or the dissertation; (2) residence requirements; and/or (3) provisions of graduate assistantships, fellowships, or scholarships. For information regarding required or recommended courses, see the section appropriate to the graduate program.

### Language Requirements

At the option of the graduate program, intended candidates for the doctoral degree may be required to take a written examination to demonstrate comprehension of one or more foreign languages. To pass the examination they must be able to read research materials in their graduate program at a reasonable speed. English is not considered a foreign language in this context.

No limit has been placed on the number of times students may take the examination. However, it must be passed before students can be advanced to candidacy and take the comprehensive examination.

### Doctoral Committee

The doctoral committee may be selected at any time after a student becomes an intended candidate. The chair of the graduate faculty of the program recommends to the Graduate Division appointment of a doctoral committee consisting of at least five members of the graduate faculty. The committee must include one graduate faculty member from another field of study. This university representative must be a full member of the regular graduate faculty. The majority of the committee and the committee chair must be from the graduate program in which the degree program is offered. This committee, appointed by the Graduate Division, prescribes for the candidate a course of study in preparation for the comprehensive and oral examinations described below. It also approves the dissertation research topic and the dissertation itself.

It is the student's responsibility to select an appropriate dissertation topic coinciding with the expertise and interest of a graduate faculty member who is willing to work with him/her.

### Examinations

Doctoral candidates must pass the following examinations:

#### Qualifying Examination

A qualifying examination may be required by some graduate programs. The purpose of this examination is to determine whether to encourage students to proceed in a doctoral program and, if encouraged, to enable advisors to assist students in planning a program that will familiarize them with the requisite knowledge and techniques of their chosen graduate program. Graduate programs requiring this examination give it early in the intended candidate's program (often coinciding with the master's final examination). It may be oral and/or written and is conducted by a special examination committee appointed by the graduate chair of the graduate program or by the student's doctoral committee. A student who fails the qualifying examination may repeat it once at the discretion of the graduate faculty concerned. However, students failing the qualifying examination a second time are dropped from the program and lose their status as classified graduate students.

#### Comprehensive Examination

The comprehensive examination is an important step in the sequence of study toward the doctoral degree. This examination covers the major graduate program and work fundamental thereto and minor fields as may be required by the graduate program. Its purpose is to ascertain the student's comprehension of the chosen graduate program.

The examination is given only after the student has completed the foreign language requirement, if any, and when, in the judgment of the graduate faculty, the student has had sufficient preparation in the graduate program either through course work or other individual study and research. The comprehensive examination may be either oral or oral and written. It is conducted by a committee of the graduate faculty.

A student who fails the comprehensive examination may repeat it once at the discretion of the graduate faculty concerned. A student who fails the examination a second time is dropped from the program and loses classified graduate student status.

The student who passes the examination is eligible, at the option of the various graduate programs, to receive a UH Mānoa certificate indicating that all requirements of the doctorate except for the dissertation have been completed.

### Final Examination

A final examination in defense of the dissertation may also cover related subjects and is required of all candidates for the doctoral degree. The examination is oral and is conducted by the candidate's doctoral committee. It is never less than one hour in length. Arrangements for the final examination must be made at least two weeks prior to the date of examination, since an announcement must appear in the *News@UH*. The examination must be held while UH Mānoa is in session and must be open to the public.

A candidate who fails the final examination may be allowed to repeat it upon approval by the graduate faculty concerned and the Graduate Division. A candidate who fails the final oral examination twice is dropped from the program and loses classified graduate student status.

A candidate who passes the examination, and who has met all other requirements, will be awarded the doctoral degree at the end of the appropriate term.

### Dissertation

The doctoral dissertation for the PhD is expected to be a scholarly presentation of an original contribution to knowledge resulting from independent research.

An essential aspect of dissertation research is the free and full dissemination of research results. Moreover, all dissertations must be publicly defended in an oral examination. Therefore, proprietary or classified information is not suitable for a dissertation; data which cannot be made public at the time of the final defense should not be incorporated into the student's research.

When the dissertation topic has been approved by the doctoral committee, it will notify the Graduate Division through submission of Student Progress Form II. The candidate may then register for the dissertation research course (800) during the next registration period.

A candidate should look to the chair of his or her doctoral committee for primary direction regarding research methods and the preparation of results. It is the joint responsibility of the chair and the student to see that all members of the committee are kept informed of the scope, plan, and progress of both the research and the dissertation. Guidelines for preparation of the dissertation can be obtained at the Graduate Division website.

Copies of the completed dissertation must be submitted to committee members at least four weeks prior to the date of the final oral examination. Please check with Graduate Division Student Services (or the website) regarding the submission procedures for thesis and dissertations.

A majority of the members of the doctoral committee, including the committee chair, must approve both the dissertation and the oral defense of the dissertation. A minority member has the right of appeal to the Graduate Division for a final decision. The chair must ensure that the final form of the dissertation, including revisions and amendments agreed upon, is acceptable to a majority of the committee. The committee members express their approval on the Student Progress Form III and Student Progress Form IV (formerly signature page).

Candidates must be registered in the appropriate dissertation research course (800) during the term in which the work for the degree is completed. Failure to make satisfactory progress on the dissertation does not entitle a student to a refund of tuition.

The graduate chair of a program has the privilege of being an ex officio member of all doctoral committees in the field.

All doctoral students are required to publish their dissertation (in its entirety) with ProQuest Information and Learning or an equivalent publishing firm suggested by the student and approved by the Graduate Division.

# Student Life

Services and programs are provided on the campus to help students make the transition to UH Mānoa, to secure basic financial assistance and housing, to obtain the personal assistance needed to achieve academic goals, and to plan for productive careers.

Co-curricular programs offer students opportunities for leadership development and cultural, social, and recreational experiences. These programs provide excellent opportunities to gain leadership skills, to serve the community, and to obtain insights into community organization and development. Students are urged to participate in campus programs as involvement enhances the learning experience and leads to a more enjoyable and successful student life on campus.

## Vice Chancellor for Students

Queen Lili'uokalani Center for Student Services 409  
 2600 Campus Road  
 Honolulu, HI 96822  
 Tel: (808) 956-3290 (Voice/Text)  
 Fax: (808) 956-9682

The Office of the Vice Chancellor for Students coordinates educational services and programs within the Office of Student Affairs and acts as a resource on the development of UH Mānoa policies related to student affairs. The Office of the Vice Chancellor for Students also advises and assists students regarding discrimination, academic disputes and grievances, conduct code issues, and other related matters.

## Housing

Student Housing Services  
Frear Hall  
2569 Dole Street  
Honolulu, HI 96822-2381

### On-Campus

Tel: (808) 956-8177  
Fax: (808) 956-5995  
Email: [uhmsh@hawaii.edu](mailto:uhmsh@hawaii.edu)  
Web: [manoa.hawaii.edu/housing](http://manoa.hawaii.edu/housing)

UH Mānoa has approximately 3,800 bed spaces available on campus. Facilities range from residence halls with shared doubles or suites with a limited number of singles, to apartments with shared one-bedroom and two-bedroom units. A limited number of modified and accessible units are also available. Students with families live in the apartment area.

Living on campus provides students with a residential learning experience that is supported and enhanced by live-in housing staff. Residence Directors and Resident Assistants actively serve as resources, help to develop positive communities, and organize activities and programs. Residents are able to make stronger connections with other students and their academic pursuits while experiencing a greater engagement in campus life.

Residents living in the traditional residence halls are required to select and purchase a dining plan from a variety of dining plans offered. A dining plan is optional for apartment residents. Residents dine at the Hale Aloha or Gateway House cafeterias. Detailed dining plan information is available at our Student Housing Services website.

Applications received by the application deadline are prioritized by predetermined categories. Placement is offered only to those applicants who have been accepted into classified programs of study and have confirmed their intent to attend the university. Applications received after the application deadline are assigned on a first come, first serve basis. Neither on-time nor late applications are guaranteed an assignment offer.

### Off-Campus Housing Referral Program

Tel: (808) 956-7356  
Fax: (808) 956-6732  
Email: [och@hawaii.edu](mailto:och@hawaii.edu)  
Web: [www.housing.hawaii.edu/och](http://www.housing.hawaii.edu/och)

The UH Mānoa Off-Campus Housing Referral Program (OCH) is a referral service provided and maintained by Student Housing Services. Students, faculty, and staff may access online referrals for off-campus rentals. The program also provides a Guide to Living Off-Campus, which includes information on landlord-tenant laws, utilities, and average costs of Honolulu housing.

You must be a registered student or faculty/staff member at UH Mānoa to access the listing pages. Students, faculty, and staff are required to use their UH Mānoa username to gain access to the listing database. For incoming or affiliated students, faculty, and staff, the creation of a temporary account is possible. Temporary accounts are issued for a maximum of 30 days.

A listing on the website does not indicate approval or endorsement as UH Mānoa does not investigate, endorse

or guarantee the accuracy of any referrals listed on the Off-Campus Housing website.

### Commuting and Parking (formerly Parking)

Commuter Services  
Queen Lili'uokalani Center for Student Services 014  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-8899  
Fax: (808) 956-9811  
Email: [parking@hawaii.edu](mailto:parking@hawaii.edu)  
Web: [www.manoa.hawaii.edu/commuter](http://www.manoa.hawaii.edu/commuter)

The mission of Commuter Services (formerly known as Parking Services) is to maximize access to the UH Mānoa campus through a commitment to innovation, environmental sustainability, resource management, and quality customer service.

Students, faculty, and staff employ various modes of transportation to campus. Alternative options to driving alone include Honolulu's bus system (TheBus), biking, walking, and carpooling.

Currently, full-time students (after paying their mandatory \$30/semester Transportation Fee) qualify for a U-Pass, which allows them to ride TheBus at no cost 24/7 during the fall and spring semesters. The U-Pass sticker is affixed to the student's ID and issued at the Ticket, Information, and ID Office in the Campus Center. UH Mānoa is served by bus routes 4, 6, 13, and 18, plus express routes A, 80A, 85, 85A, 90, and 94. Real-time bus schedules are available at [www.thebus.org/Route/Routes.asp](http://www.thebus.org/Route/Routes.asp). For more information, call (808) 848-5555 or go to [www.thebus.org](http://www.thebus.org).

The University's Rainbow Shuttle system consists of multiple routes through campus and the neighboring vicinity, day and evening. This free service includes regular runs to and from residence halls, as well as adjacent neighborhoods, and off-campus parking locations. For shuttle schedules and route maps, get the app "UHM Shuttle" or go to [www.uhmshuttle.com](http://www.uhmshuttle.com).

Bike parking on campus is also free—cyclists are reminded to lock their bike to one of the many authorized racks to avoid citation.

UH Mānoa's car sharing program, a partnership with Enterprise Rent-A-Car, provides those commuting to or living on campus without a vehicle the option of a short-term car rental. Shared cars are conveniently parked at various locations around

campus. Learn more about this low-cost, environmentally-friendly membership program at [manoa.hawaii.edu/commuter/carshare.html](http://manoa.hawaii.edu/commuter/carshare.html).

If you plan to drive to Mānoa, a limited number of parking permits are available to UH Mānoa affiliates. Read more about the permit application process on our website. Apply for regular day permits, as well as carpool (students only), evening, and medical permits. Visitors and students may also pay a daily fee to park, on a space-available basis, in designated locations, such as the Lower Campus Parking Structure. Motorcycles and mopeds must also have a paid permit to park in designated lots on campus.

Parking regulations are enforced 24 hours daily throughout the year. Vehicles in violation are subject to citation and/or towing. Please familiarize yourself with UH Mānoa parking regulations on our website; plus the campus policy governing bikes, skateboards, and other coasting devices at [manoa.hawaii.edu/movewithaloha](http://manoa.hawaii.edu/movewithaloha).

Commuter Services Office is open Monday through Friday, 7:45 a.m. to 4:30 p.m.; closed on holidays.

## Security

Campus Security and Emergency Management

1951 East-West Road

Honolulu, HI 96822

For emergencies: Call 911

To report a crime or request assistance: (808) 956-6911

For assistance during power outages: (808) 590-5400,  
973-2899

Campus Security Escort Service: (808) 956-SAFE (7233)

Business Tel: (808) 956-8211

Fax: (808) 956-8495

Email: [uhcs@hawaii.edu](mailto:uhcs@hawaii.edu)

Web: [www.hawaii.edu/security](http://www.hawaii.edu/security)

Campus Security is dedicated to providing and promoting a safe and secure campus, and serving our community with aloha.

Campus Security provides protection and security for the university and campus community 24 hours a day throughout the year. Its duties include patrolling the UH Mānoa campus and property in the surrounding community, and enforcing UH Mānoa rules and regulations. Duties also include crime prevention, and investigating reports of suspicious persons and incidents. Security escort is offered to students and employees walking alone at night from one facility to another. 72 Emergency Call Boxes or stations identified by a red box or push-button phone are located throughout campus. They are easily identified at night by blue lights and provide instant communication with Campus Security.

UH Mānoa Campus Security complies with the 1999 Clery Act. For information concerning Campus Security policies, the Clery Annual Security Report, and crime prevention and other safety tips, visit [www.hawaii.edu/security](http://www.hawaii.edu/security).

## Mānoa Bookstore

2465 Campus Road

Honolulu, HI 96822

Tel: (808) 956-8252

Fax: (808) 956-4323

Web: [www.bookstore.hawaii.edu/manoa](http://www.bookstore.hawaii.edu/manoa)

University of Hawai‘i at Mānoa Bookstore (Mānoa Bookstore), an operation of UH Mānoa Campus Services, offers a great selection of textbooks, school and office supplies, technology products, apparel, spirit items, and more. Located in Campus Center, its regular hours of operation are: Monday-Friday from 8:00 a.m. to 4:30 p.m., Saturday from 9:00 a.m. to 12:30 p.m., and closed on Sundays and holidays. All proceeds from Mānoa Bookstore sales benefit the University of Hawai‘i.

The book department provides required textbooks for all courses, supplemental study guides, books by University of Hawai‘i authors, and hardback bestsellers. Textbooks are requested by faculty and made available for purchase at the start of each academic term. Mānoa Bookstore offers many affordable options for textbook purchases: new, used, rental, and/or digital books, when available. Books may be ordered online or by phone for at-home delivery or in-store pick-up. Prices of books in-store may also be compared with online retailers at [www.bookstore.hawaii.edu/manoa](http://www.bookstore.hawaii.edu/manoa). For students who wish to sell books they no longer need, the Bookstore hosts a textbook buyback session six times a year.

Because college is not all about books, Mānoa Bookstore carries general office and school supplies as well as a wide variety of art supplies recommended by academic instructors. In addition, the Bookstore offers convenience items, snacks and beverages, health and beauty aids, greeting cards, alumni accessories, and small gifts. When it's time to graduate, students shop for their caps and gowns, commencement announcements, and diploma frames in Mānoa Bookstore's supplies department.

For new computer, laptop, or tablet purchases, ask about the Bookstore's educational pricing for UH Mānoa students and staff (valid UH ID or current registration required). Mānoa Bookstore is an Adobe software seller, Dell University retailer, and an Apple Authorized Campus Store with Apple-certified technicians. The computer department also carries headphones, laptop cases, portable speakers, adapters, and other tech accessories.

For document services, see the Bookstore's Campus Solutions, conveniently located next to the Customer Service counter. Campus Solutions is a one-stop shop for affordable copying and printing on campus. Campus Solutions also handles document finishing, faxing, scanning, and laminating services for students, staff, and visitors. Simple printing jobs may be ordered online at [www.bookstore.hawaii.edu/manoa](http://www.bookstore.hawaii.edu/manoa).

In addition to classroom necessities, Mānoa Bookstore features official University of Hawai‘i licensed logo clothing and spirit items, including brand name athletic wear, T-shirts, alumni apparel, and game gear for University of Hawai‘i fans. The Bookstore's Campus Road fashion line also carries trendy, non-logo apparel. Handbags, backpacks, hats, drinkware, dorm accessories, and jewelry are other popular items in-store.

Mānoa Bookstore has everything for college life and more. Information about special events, contests, sales, new products, and seasonal hours may be found on the Bookstore's website ([www.bookstore.hawaii.edu/manoa](http://www.bookstore.hawaii.edu/manoa)), Facebook page ([www.facebook.com/manoabookstore](http://www.facebook.com/manoabookstore)), Twitter (@manoabookstore),

and Instagram (@manoabookstore), or by signing up for the Bookstore's monthly e-newsletter.

## Library Services

### Hamilton Library

2550 McCarthy Mall  
Honolulu, HI 96822  
Tel: (808) 956-7203 (Voice/Text)  
(808) 956-2534 (Voice/Text)  
Web: library.manoa.hawaii.edu

### Sinclair Library

2425 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-8308 ext. 52 (Voice/Text)  
(808) 956-5417 (Voice/Text)  
Web: guides.library.manoa.hawaii.edu/sinclairlibrary

### Library Hours

Web: library.manoa.hawaii.edu/about/hours.html

### Library Departments, Collections & Services

Web: library.manoa.hawaii.edu/departments/colldept.html

### Library Staff Directory by Departments and Collections

Web: library.manoa.hawaii.edu/about/directory/department.php

UH Mānoa Library (housed in Hamilton and Sinclair facilities) provides the largest collection of information research materials in the state. More than 3.4 million volumes, including about 44,000 currently received print and electronic journal titles, make this the 57th largest research library in the U.S. Its website provides access to local and national indexes, specialized databases, internet resources, unique, local digitized collections, and library catalogs throughout the nation.

Hamilton Library contains the main book, periodical, and microform collections. Separate components include the Asia Collection; Archives & Manuscripts; Hawaiian & Pacific Collections; Special Research Collections (including rare books); the Charlot Collection; Government Documents; Maps, Aerials, and GIS (MAGIS); Business, Humanities and Social Sciences; and Science and Technology (including medicine). Librarians provide reference services, online information retrieval, research paper consultation, and instruction on library use, and information literacy. The Interlibrary Loan service helps faculty and students obtain research material from off-campus sources. A Computerized Learning and Information Center is staffed in partnership with Information Technology Services. Graduate students may reserve lockers and private study carrels in Hamilton on a space-available basis.

Sinclair Library houses the Reserve Materials Collection, the Wong Audiovisual Center, the Wong Computer Lab, the Student Success Center, and the Music Collection. Older bound periodicals are also housed in Sinclair. The Wong Audiovisual Center has a large collection of video and sound recordings that may be reserved for classroom showings or individual use. The Student Success Center offers tutoring and workshops on study skills, test-taking strategies, career planning, writing, and information literacy.

## Health Services

University Health Services Mānoa  
1710 East-West Road  
Honolulu, HI 96822  
Tel: (808) 956-8965 Reception Desk  
(808) 956-6221 Specialty Clinics  
Fax: (808) 956-0853  
Web: www.hawaii.edu/shs/

University Health Services Mānoa (UHSM) offers medical services and health promotion programs for students, faculty, and staff. Patient Care: Monday through Friday, 8:30 a.m. to 4 p.m. Hours of operation: Monday through Friday, 7:45 a.m. to 4:30 p.m. For overnight and weekends, medical professional telephone consultation is available. For clinic hours, appointments, or information, please call UHSM, or visit the website above.

## Health Clearance

The State of Hawai'i mandates that certain health requirements be met for entrance to post-secondary educational institutions. (Hawai'i Administrative Rules, DOH Title 11, Chapter 157)

**You may not register for classes until you have received health clearance.**

### Health Clearance Requirements are:

- **Submit Health Clearance Form.** Information on obtaining the Health Clearance Form is given to students along with their acceptance packet. Complete the front page of this form to the best of your ability. The back page can be completed by your physician or, if you have your own personal immunization records, you can submit a copy of the records.
- **Comply with State of Hawai'i tuberculosis clearance guidelines.** ALL students enrolled at UH Mānoa must have tuberculosis (TB) clearance. A negative TB skin test (PPD-Mantoux) within one year prior to your enrollment is required. Skin test results must be read in 48 to 72 hours and results documented in millimeters, i.e., 0mm. If positive, a chest x-ray is required. TB tests must be performed by a U.S. licensed provider.
- **Returning or Transferring Students from a post-secondary school in Hawai'i** (i.e., UH Hilo, Community Colleges, Chaminade, HPU, etc.):
  - When you re-enroll in another post-secondary school in Hawai'i, a copy of your original certificate shall meet the Tuberculosis requirements for certification.
  - The Tuberculosis certificate must be done in Hawai'i for a post-secondary school.
  - Hawai'i students with a history of a positive PPD and negative chest x-ray must complete and return the Tuberculosis Symptom Screening form.
- **Provide documentation of immunity to measles, mumps, and rubella (MMR)**
  - You need two live doses of measles vaccine, with at least one being an MMR (Measles, Mumps, and Rubella) vaccine.
  - Your first dose must have been given on or after your first birthday.
  - Your second MMR vaccine must have been given at least 4 weeks after the first vaccine.
  - Measles, Mumps, and Rubella immunizations may be waived if:

- You have a blood test to prove your immunity to measles, mumps, and rubella. The measles, mumps, and rubella titers are needed, OR
- You were born before 1957.

## Clinical Services

### General Medical Clinic

Physicians and nurses provide primary medical care for illness and injury. Services also include immunizations, travel counseling, allergy shots, and physical examinations. A clinical laboratory provides testing, and the pharmacy stocks prescription and over-the-counter medications. UHSM assists patients in obtaining specialized medical services in the community.

### Specialty Clinics

Specialty clinics include sports medicine, dermatology, and psychiatric services. The following special services are also offered:

- Nutritional counseling is provided for medical conditions and weight, sports, and fitness concerns.
- The Women's Health Clinic offers examinations, pap tests, contraception and emergency contraception, tests and treatment for sexually transmitted infections, pregnancy tests, and education and counseling.

### Fees

Services, supplies, and medications are provided at reasonable cost to clients with and without billable insurance. UHSM will submit claims for visits and procedures to the endorsed UH student insurance plans and other non-HMO companies.

### Health Promotion Program

Queen Lili'uokalani Center for Student Services, 313D  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-3574 Health Promotion and Mānoa Alcohol  
Project Resource Center  
Fax: (808) 956-6371

### Student Health Insurance

All students are strongly urged to purchase medical insurance. Nonimmigrant international students are required to have insurance coverage. UH Mānoa endorses student health insurance plans with enrollment periods at the beginning of each semester. The endorsed plans cover visits at UHSM. Contact the Health Promotion Resource Center or visit the UHSM website for information on these plans.

### Health Resource Center

The Resource Center provides a wide range of health education materials for personal use and class presentations and papers. Resource center personnel are available to assist students, faculty, and staff.

### Peer Education/Service Learning Program (LOKAHI Program)

Based at the Health Resource Center, LOKAHI is a peer education/service learning program through which staff and trained student educators provide presentations for classes and other campus groups. Topics include responsible sexuality; safe dating; body image; tobacco; alcohol and other drugs; wellness; and stress management.

### Alcohol and Other Drug Education Program (ADEP)

ADEP provides education, brief intervention, counseling, and referral in regard to alcohol and other drugs. This includes work with students who have violated alcohol and/or drug use guidelines, as well as self-referrals. Visit the website at [www.hawaii.edu/shs/health\\_promotion/adepphp](http://www.hawaii.edu/shs/health_promotion/adepphp).

### Mānoa Alcohol Project (MAP)

Mānoa Alcohol Project (MAP) is a grant-funded project providing primary prevention services to reduce underage and harmful consequences of drinking. Visit the website at [www.facebook.com/UH.MAP](http://www.facebook.com/UH.MAP).

### Student Employment and Training Opportunities

Paid employment opportunities are listed at the Mānoa Career Center. Volunteers serve in peer education programs and on the Student Health Advisory Council (SHAC). Students also receive training to fulfill academic requirements in medicine, nursing, social work, psychology, and public health. Staff members assist students with research projects.

### Food Service

Mānoa Dining Services: A partnership between Student Affairs and Sodexo  
2573 Dole Street  
Honolulu, HI 96822  
Tel: (808) 956-2131  
(808) 956-8721  
Fax: (808) 956-9671  
Web: [www.uhmdining.com](http://www.uhmdining.com)

Mānoa Dining Services has a variety of options for students, staff, faculty, and visitors on campus. Centrally located at Campus Center, you'll find favorites such as Starbucks, Jamba Juice, Pizza Hut, Taco Bell, Simply To Go, and Campus Center Food Court. Ba-Le, located in Hemenway Hall, specializes in Vietnamese-style sandwiches, pho, bubble teas and an assortment of grab and go salads and sandwiches. Located on lower campus are Hale Aloha Café and Gateway Café, all-you-care-to-eat dining halls for students, staff, faculty, and visitors.

Mānoa Dining Services also offers catering for all tiers of events. Try our Shoestring menu, which includes ala carte items like furikake mochiko chicken or baked manapua—great for student groups and their budget! Our Community menu is perfect for the casual affair, with themed buffets or party packages featuring wings, tacos, and sandwich options. The Flavors menu is designed to showcase our full service catering. Menu choices range from the Classic Continental breakfast buffets to served luncheons and dinners featuring tasty entrees like Roasted Chicken Florentine. In need of something different? Our Executive Chef is able to design custom menus for your next special event!

### Meal Plans

Student Affairs Dining offers meal plans to students living on-campus, as well as for faculty, staff, and student commuters. Full meal plans ranging from 50 meals per semester to 19 meals per week are available for our frequent diners.

Also, Flash Cash, our debit card system, allows you to add cash to your UH ID card. Flash Cash allows you to leave the credit card and cash at home and use your UH ID for your dining purchases. It's quick, convenient, and easy to reload.

Additionally, you'll earn up to 10% in bonus points for every deposit. Flash Cash can be purchased at the Campus Center Ticket, Information, and ID Office.

The Resident Dining Club Card is also available for anyone that would like to dine at Hale Aloha and Gateway Cafés. The club card gives you a free all-you-care-to-eat meal after the cash purchase of any 5 meals at either location. You can pick up your club card when you dine at either of these locations.

To view our menu and hours of operation visit us online at [www.uhmdining.com](http://www.uhmdining.com).

## Mānoa Career Center

Queen Lili'uokalani Center for Student Services 212  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-7007  
(808) 956-9318  
Fax: (808) 956-4082  
Email: [careers@hawaii.edu](mailto:careers@hawaii.edu)  
Web: [manoa.hawaii.edu/careercenter](http://manoa.hawaii.edu/careercenter)

The Mānoa Career Center empowers students to engage in career life planning through awareness, exploration, experience, and reflection. As a student-centered organization, the center contributes to the engagement and retention of students in career life planning through counseling; experiential, work-based learning programs; outreach activities, and workshops that promote professional and personal development. Over 9,000 students engage in an array of services and programs. The Mānoa Career Center motto: Careers begin here.

## Career Development

### Counseling and Offerings

A variety of offerings are available to assist in career planning for employment and/or graduate or professional schools.

### Resources

- Career and experiential listings from local, mainland, and overseas employers
- Job search and applying to graduate school handouts
- Salary information, employer literature, employment market trends, career search related books, and magazines
- Graduate school directories and information

### Services

- Personalized career counseling
- Job skills workshops, resume, cover letter, and personal statement reviews
- Credential files
- Employer recruitment program
- Practice interviews

## Experiential and Career

### Programs and Opportunities

Experience before graduation provides tremendous opportunities to clarify career expectations and develop professional workplace skills. Consider the following experiential and career opportunities.

### University

- Students work on the campus community

## Federal Work Study

- Students utilize need-based aid in campus or community service positions

## Non-University

- Part-time, full-time, and seasonal work opportunities

## Co-op and Internships

Students receive career-related experience before graduation:

- Enhance communication and other transferable skills
- Put theory into practice and gain professional skills
- Engage in job search strategies
- Network with professionals
- Develop and build your career plan and portfolio

## Child Care

Children's Center Administrative Office  
Queen Lili'uokalani Center for Student Services 407  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-7963  
Fax: (808) 956-4157  
Email: [uhmcc@hawaii.edu](mailto:uhmcc@hawaii.edu)  
Web: [www.hawaii.edu/childrenscenter](http://www.hawaii.edu/childrenscenter)

Child care is available at the Children's Center on the Mānoa campus for a limited number of two- to five-year-old children of students, faculty, and staff. The facility offers full-time and a limited number of part-week care to approximately 90 children each semester. The Children's Center follows the UH calendar and is open from 8 a.m. to 5 p.m.

The developmental approach to early childhood education offers each child individual attention in an atmosphere that is conducive to building a strong self-concept, interactive skills, and an experiential base. Group sizes and adult-child ratios are favorable, and teachers are degreed and experienced in early childhood education. The program includes a wide range of opportunities for parental involvement. Applications should be made well in advance of the semester needed.

## Counseling Services

### Counseling and Student Development

Counseling and Student Development Center  
Queen Lili'uokalani Center for Student Services 312  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-7927  
Fax: (808) 956-9682

The challenges of choosing the right career, achieving or maintaining one's independence, relating successfully to others, and leading a happy and successful life converge during a student's college years. College life adds the concerns of exams, term papers, quizzes, and class reports. Even students who are prepared to do their best in college may experience problems. The Counseling and Student Development Center (CSDC) provides the following services to assist students.

### Career Counseling

Students should choose their majors before they progress very far in their academic programs. Most students expect their academic studies to lead to specific careers upon graduation. Career counseling explores strengths and limitations, interests and values, personality and skills, and applies this understand-

ing to developing academic and occupational plans. (See also “Career Development and Student Employment.”)

### Personal Counseling

Some people occasionally, even regularly, feel worried, unhappy, and depressed. Lack of confidence, fear, low self-esteem, inability to get along with others, loneliness, not being able to cope with people and situations, and similar problems can be discussed with one of CSDC’s professional counselors. All matters discussed in counseling are confidential and will not affect academic standing.

### Psychiatric Consultation

People who find themselves seriously depressed, unable to control their behavior, or doing things they don’t understand may want and need psychiatric consultations. A talk with a counselor is recommended to determine whether psychiatric consultation is required.

### Testing

Testing is frequently used as part of counseling to help students understand themselves better and plan their careers. Counselors will discuss which tests to take and interpret them after they are scored. In addition, the Testing Office now administers the computer-based GRE, TOEFL, and PRAXIS exams. An appointment to schedule an exam can be made over the phone with a major credit card by calling (808) 956-3454, or with a check at the Testing Office, Queen Lili’uokalani Center for Student Services Room 307. Information about registration for paper-based admissions or certification exams, including SAT, ACT, LSAT, MCAT, and PRAXIS also is available at this office.

### Outreach

Workshops and seminars to promote personal development and academic success are offered throughout the year. Stress management, assertiveness, improving self-esteem, career and life planning, and coping with difficult people are just a few of the topics that are available. Sessions to address specific needs can be developed and conducted at the request of faculty or a group of students.

### Consultation

CSDC provides consultation services for individual students, faculty, and groups that may need help in solving organizational problems, overcoming interpersonal difficulties, and planning staff development programs.

### Office of Judicial Affairs

Queen Lili’uokalani Center for Student Services 207  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-4416  
Fax: (808) 956-2537  
Email: oja@hawaii.edu

Anchored by theoretical and philosophical approaches of adult development and education, the Office of Judicial Affairs is committed to ensuring the rights and upholding the responsibilities of students to create a safe and welcoming campus learning environment.

## Support Services

### Office of Admissions-Campus Recruitment

Queen Lili’uokalani Center for Student Services 001  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-7137  
Fax: (808) 956-4148  
Email: visituhm@hawaii.edu  
Web: manoa.hawaii.edu/admissions/undergrad/visit/

Admissions Counselors work with school staff and community organizations to encourage their students to pursue higher education. Services that facilitate students’ undergraduate enrollment to UH Mānoa are provided by this office. In addition, the Office of Admissions offers campus tours and on-campus and off-campus recruitment programs to prospective undergraduate students and their families.

The Office of Admissions also coordinates the Student Ambassador program. This program creates a cadre of current UH Mānoa students to represent UH Mānoa at various campus events. Student Ambassadors escort visiting high school students to their classes, speak on student panels, give campus tours, participate in student forums, and mentor new freshmen.

Individuals and groups wishing to learn more about UH Mānoa undergraduate programs and resources may contact the Office of Admissions. Campus tours are offered daily (Monday through Friday) by appointment at: manoa.hawaii.edu/admissions/undergrad/visit/ or email: visituhm@hawaii.edu. Neighbor Island and continental U.S. calls are accepted toll free at (877) 447-3233.

### Advocacy Office

Queen Lili’uokalani Center for Student Services 210  
2600 Campus Road  
Honolulu, HI 96822

The Advocacy Office falls under the UH Mānoa Chancellor’s Office. It provides assistance and advocacy for students, staff, and faculty at UH Mānoa through direct services, training, and consultation regarding various areas of civil rights, gender discrimination, and gender-based violence. The specific areas and services available to the UH Mānoa community are described below.

### Civil Rights Specialist

Tel: (808) 956-4431  
Fax: (808) 956-4541  
Email: jln@hawaii.edu

The Civil Rights Specialist advises students, employees, applicants, and the public on the UH’s complaint process and procedures. The Civil Rights Specialist also advises and counsels students and employees on their rights under state and federal nondiscrimination laws.

The Civil Rights Specialist sets up alternative dispute resolutions and assists in resolving disputes through informal procedures.

The Civil Rights Specialist conducts training workshops systemwide that cover policies, procedures, and laws pertaining to civil rights, affirmative action, and other discrimination issues. The Civil Rights Specialist can be contacted in person, by phone, by mail, or through email.

### Gender Equity Specialist

Tel: (808) 956-9977

Fax: (808) 956-4541

Email: [rosejenn@hawaii.edu](mailto:rosejenn@hawaii.edu)

Web: [manoa.hawaii.edu/mco/Gender\\_Equity](http://manoa.hawaii.edu/mco/Gender_Equity)

The Gender Equity Specialist provides advocacy services to students, faculty, and staff members on matters relating to sexual harassment, sexual assault, domestic violence, stalking, and gender discrimination. Services include counseling; filing informal complaints through the university; developing long-term coping strategies; short and long-term case management; implementing vital safety plans for daily life; outreach to off-campus resources; and arranging informal resolutions. In addition, the Gender Equity Specialist can assist in filing formal complaints with the Equal Employment Opportunity/Affirmative Action (EEO/AA) Office of the Vice Chancellor for Students. The Gender Equity Specialist will answer questions, listen to complaints, offer advice on filing procedures, advocate for the best interests of the client, and help protect the grievant from retaliation.

In addition to individual advocacy, the Gender Equity Specialist offers comprehensive training to the campus population on interpersonal, inter-gender, and cross-cultural communication; the rights and responsibilities of students, faculty, and staff on issues relating to sexual harassment in academia; and interpretation of state and federal laws and guidelines. The Gender Equity Specialist is also intimately involved in raising awareness of gender-based violence and discrimination to the UH Mānoa community through workshops, seminars, and outreach.

Students, faculty, and staff members may contact the Gender Equity Specialist in person, by phone, by mail, or through email.

### Bridge to Hope

Queen Lili'uokalani Center for Student Services 211

2600 Campus Road

Honolulu, HI 96822

Tel: (808) 956-8059

Fax: (808) 956-9314

Email: [bthinfo@hawaii.edu](mailto:bthinfo@hawaii.edu); [gotkids@hawaii.edu](mailto:gotkids@hawaii.edu)

Web: [www.hawaii.edu/bridgetohope/](http://www.hawaii.edu/bridgetohope/)

[www.manoa.hawaii.edu/studentparents](http://www.manoa.hawaii.edu/studentparents)

Bridge to Hope (BTH) provides student support services to students with children. The Student Parents At Mānoa (SPAM) program serves all student parents while Bridge to Hope assists with on-campus student employment and other services to help welfare (TANF) participating students succeed in their educational goals. Bridge to Hope (TANF) is available on every UH campus. The systemwide coordinator is located at UH Mānoa in the Women's Center.

### College Opportunities Program

Queen Lili'uokalani Center for Student Services 308

2600 Campus Road

Honolulu, HI 96822

Tel: (808) 956-6186

Fax: (808) 956-6837

Email: [copuhm@hawaii.edu](mailto:copuhm@hawaii.edu)

Web: [www.hawaii.edu/cop/](http://www.hawaii.edu/cop/)

The College Opportunities Program (COP) offers a state-wide entry-level freshman program that provides a summer

and first-year residential college experience. Its mission is to recruit, screen, select, and prepare Hawai'i residents for a successful freshman year at UH Mānoa. The program recruits individuals who may not meet the requirements for regular UH Mānoa admission, are academically under-prepared, economically disadvantaged, non-traditional, or in need of a structured college entry. Selected students who participate in and meet the summer program requirements gain admission to the UH Mānoa in the fall semester.

### Graduate and Professional Access (GPA)

Queen Lili'uokalani Center for Student Services 413

2600 Campus Road

Honolulu, HI 96822

Tel: (808) 956-4642

Fax: (808) 956-9240

Email: [maileg@hawaii.edu](mailto:maileg@hawaii.edu)

Graduate Professional Access (GPA) addresses underrepresented students in graduate and professional degree programs. Through partnerships with current student support programs serving underrepresented ethnic minorities in the public school system, GPA conducts research on access to higher education, provides internship opportunities in STEM fields, service learning projects, and test preparation for entry into graduate degree programs. GPA provides support and retention activities that increase the entry and graduation rate of underrepresented students from graduate and professional degree programs that will diversify the workforce in Hawai'i and the Pacific.

### Health Careers Opportunity Program

Queen Lili'uokalani Center for Student Services 413

2600 Campus Road

Honolulu, HI 96822

Tel: (808) 956-4642

Fax: (808) 956-9240

Email: [hcop@hawaii.edu](mailto:hcop@hawaii.edu)

The Health Careers Opportunity Program (HCOP) strives to build diversity in the health workforce by providing high school and college students from disadvantaged backgrounds an opportunity to develop the skills needed to enter, and graduate from health professions schools. The goal of HCOP is to increase the number of health professionals serving in areas of need in Hawai'i and the Pacific. HCOP provides career exploration and shadowing; learning skills development; academic, financial aid, and personal counseling; preparation for college majors in health programs; and certification in first aid and CPR.

### KOKUA Program (Office for Students with Disabilities)

Queen Lili'uokalani Center for Student Services 013

2600 Campus Road

Honolulu, HI 96822

Tel: (808) 956-7511 (Voice/Text)

(808) 956-7612 (Voice/Text)

Fax: (808) 956-8093

Email: [kokua@hawaii.edu](mailto:kokua@hawaii.edu)

Web: [www.hawaii.edu/kokua](http://www.hawaii.edu/kokua)

The KOKUA Program provides disability access services to UH Mānoa students with documented physical and/or mental

disabilities, e.g., health disabilities, hearing impairments, learning disabilities, mobility restrictions, psychological disabilities, visual impairments, etc. Services include alternate media, campus intervention, disability access counseling, early registration, faculty liaison, note-taking, sign language interpreting, technology access, testing accommodations, etc. Accessible on-campus transportation may be available. Students with disabilities who may require disability access services are strongly encouraged to contact KOKUA of their needs as far in advance as possible to ensure better campus access.

New students should contact KOKUA for program orientation at least two months prior to the start of their entering semester. Although KOKUA strives to ensure campus access for students with disabilities, it is necessary to note that the century old campus (located on hilly terrain) does pose architectural barriers that are being addressed by on-going projects.

The university is committed to ensuring equal access to the Mānoa experience for students with disabilities. Creating equal access is a shared responsibility involving the student, KOKUA, and the rest of the campus community.

### **Kua'ana Native Hawaiian Student Development Services**

Office of Student Equity, Excellence and Diversity  
Queen Lili'uokalani Center for Student Services 406  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-2644  
Email: kuumeaa@hawaii.edu

Kua'ana Native Hawaiian Student Development Services (Kua'ana) reflects the belief that higher education is a major factor in ensuring a better future for Hawaiians as individuals and as a people. Kua'ana focuses on encouraging and facilitating the entry of Hawaiian students into UH Mānoa and supports them in fulfilling their academic expectations through the development of new programs and the use of existing resources. Kua'ana services include scholarship awards, peer support, the Annual Hapai Pu Financial Aid Fair, a comprehensive community service program designed especially for Hawaiian students to interact with programs, projects and issues in the Hawaiian community, access to scholarship opportunities, and support for all Native Hawaiian students in STEM-related programs.

### **Lesbian, Gay, Bisexual, Transgender and Intersex Student Services**

Queen Lili'uokalani Center for Student Services 211  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-9250  
Fax: (808) 956-9314  
Email: lgbtq@hawaii.edu  
Web: manoa.hawaii.edu/lgbt/index.html

Lesbian, Gay, Bisexual, Transgender, and Intersex (LGBTI) Student Services strives to maintain a safe and inclusive campus environment for all students of UH Mānoa regardless of their gender identity or sexual orientation. Our office offers a lending library on LGBTI issues and Queer Theory; a WiFi wireless hotspot; lounge to relax or bring your lunch; and meeting area to read or study. LGBTI Student Services also offers a range of educational, information and advocacy programs.

1. Crisis response and professional referral services relating to harassment and bias-related incidents, and other specialized needs.
2. Resources and individualized support on issues such as “coming out,” positive identity development, healthy relationships, and academic/career planning.
3. The Safe Zone Training Program for allies of LGBTI people raises awareness of LGBTI issues on campus and sharpens skills of allies to help end harassment. Ally participants receive a poster to display to indicate that they are part of a professional network of student support.
4. Student support via weekly drop-in groups for LGBTI and ally students and support for student run programs, events and clubs, including our weekly LGBTI and Ally Coffee Hour.
5. Educational programs and events, including National Coming Out Day in October; “The Gathering,” our annual UH Systemwide LGBTI conference; and Rainbow Graduation, which celebrates the achievements of our graduating LGBTI and ally students.

### **Office of Multicultural Student Services**

Queen Lili'uokalani Center for Student Services 309  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-7348  
Fax: (808) 956-4622  
Web: omss.ssc.hawaii.edu

The Office of Multicultural Student Services (OMSS) seeks to increase the awareness and appreciation of multicultural issues impacting UH Mānoa and the larger community. To accomplish this mission, OMSS seeks to (a) provide employment, training, and educational support to UH Mānoa students who wish to tutor and advise public school students; (b) address the problem of underrepresentation of minorities in higher education by recruiting students of underrepresented ethnic groups to apply for admission to UH; (c) coordinate special projects for under-served populations and communities; and (d) conduct UH Mānoa campus activities that identify and increase awareness of multicultural issues. OMSS also functions as a university partner with community agencies and organizations having similar goals of addressing ethnic-racial prejudice and discrimination in Hawai'i.

### **PAU (Prevention, Awareness, Understanding) Violence Against Women Program**

Queen Lili'uokalani Center for Student Services 211  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-8059  
Fax: (808) 956-9314  
Email: pauvaw@hawaii.edu

The PAU (Prevention, Awareness, Understanding) Violence Against Women Program provides training and education to students, faculty, and staff around issues of relationship violence, sexual assault, and stalking. Housed under the Women's Center, the PAU Violence Program also coordinates a campus-community partner response team known as the Sexual Assault Task Force, which meets regularly to develop, implement, and evaluate victim-centered policies and procedure related to sexual and relationship violence issues for UH Mānoa students. PAU

Violence also provides crisis support and referrals to survivors of sexual and relationship violence.

### **Senior Citizen Visitor Program–Nā Kūpuna**

Queen Lili‘uokalani Center for Student Services 413  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-4642  
Fax: (808) 956-9240  
Email: nakupuna@hawaii.edu

The Senior Citizen Visitor Program (SCVP) or Nā Kūpuna, administered by Student Equity, Excellence, and Diversity (SEED), is available to residents of Hawai‘i who are age 60 years and older. The program allows senior citizens to participate in UH Mānoa classes offered during the fall and spring semesters, provided they have the consent of the instructor. Participation in SCVP entitles the visitor to use libraries and other UH facilities. Visitors are exempt from tuition; course credit is not awarded, and permanent records are not maintained. Senior citizens wishing to receive credit for courses must apply for admission to the university and must pay all tuition and fees.

### **Office of Student Equity, Excellence, and Diversity**

Queen Lili‘uokalani Center for Student Services 413  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-4642  
Fax: (808) 956-9240  
Email: seed@hawaii.edu  
Web: www.hawaii.edu/diversity

The Office of Student Equity, Excellence, and Diversity (SEED) coordinates various programs, projects, and committees at UH Mānoa and other campuses that support diversity on our campus, including services for students with disabilities, Native Hawaiians, and ethnic groups underrepresented in higher education, women, lesbian, gay, bisexual, transgendered, and intersex students, academically talented students, as well as underprepared and disadvantaged students.

SEED administers several programs aimed at specific constituencies such as: Bridge to Hope, Children’s Center, College Opportunities Program, Graduate and Professional Access, Health Careers Opportunities Program, KOKUA, Kua‘ana Student Services, LGBTI Center, Office of Multicultural Students Services, Senior Citizen Visitor Program, and the Women’s Center. In addition, SEED has major grant-funded programs including: GEAR UP Mānoa Waipahu Complex, Manawa Kūpono, Mānoa Educational Talent Search, Nā Pua No‘eau, Program for Afterschool Literacy Support, PLACES (Place based Learning and Community Engagement in School) and the Sexual Violence Prevention Program.

### **Women’s Center**

Queen Lili‘uokalani Center for Student Services 211  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-8059  
Fax: (808) 956-9314  
Web: www.hawaii.edu/womenscenter/

The Women’s Center functions as a safe gathering place for students. It offers study lounges and meeting space, crisis sup-

port and referrals to survivors of relationship violence, sexual assault, stalking, academic and personal development workshops, educational lectures and programs, a reading resource library, and a comprehensive community information center.

The programs housed at the Women’s Center are: the Bridge to Hope Program; Student Parents at Mānoa; the Lesbian, Gay, Bisexual, Transgender and Intersex Student Services Office; the Sexual Violence Prevention Project; and the PAU Violence Against Women Program.

### **Veterans Affairs**

Queen Lili‘uokalani Center for Student Services 010  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-7737  
Fax: (808) 956-7830

The Veterans Affairs (VA) Certifying Official, located in the Office of the Registrar, assists military veterans and their dependents who are eligible for Montgomery GI Bill benefits. Every semester, after students meet with their academic advisors, the VA Certifying Official certifies that students are enrolled in courses that are applicable to their VA-approved degree programs. Once certified, students will receive monthly benefits from the Department of Veterans Affairs.

### **Visual and Performing Arts**

#### **University of Hawai‘i Art Gallery**

Art Building, first floor  
2535 McCarthy Mall  
Honolulu, HI 96822  
Tel: (808) 956-6888  
Fax: (808) 956-9659  
Email: gallery@hawaii.edu  
Web: www.hawaii.edu/art/exhibitions/art\_gallery/

One of the finest temporary exhibitions spaces in the nation, the UH Art Gallery is in the center of the Art Building’s bamboo court. Besides student and faculty exhibits, a varied exhibition program plays a significant role in providing information about the visual arts in a contemporary context. To enhance a specific theme, the installation design is completely changed for each major exhibition. The gallery has received numerous awards for the excellence of its exhibitions and publications.

Gallery hours are Monday through Friday from 10 a.m. to 4 p.m. and Sunday from noon to 4 p.m. Admission is free.

### **Commons Gallery**

Art Building, first floor  
2535 McCarthy Mall  
Honolulu, HI 96822  
Tel: (808) 956-6888  
Fax: (808) 956-9659  
Email: gallery@hawaii.edu  
Web: www.hawaii.edu/art/exhibitions/commons\_gallery/

The Commons Gallery serves an important role as a showcase for exhibitions of works by art faculty and students and visiting artists. The exhibits change bi-weekly.

Gallery hours are Monday through Friday from 10 a.m. to 4 p.m., and Sunday from noon to 4 p.m. Admission is free.

### **John Young Museum of Art**

Krauss Hall, first floor  
2500 Dole Street  
Honolulu, HI 96822  
Tel: (808) 956-7198  
Email: mcadora@hawaii.edu  
Web: www.outreach.hawaii.edu/JYmuseum/default.asp

The purpose of the John Young Museum of Art (JYMA) is to enhance the knowledge and appreciation of art, to further art education at the university for the benefit of students and the community, and to serve as a research center for scholars. Its collection represents the University of Hawai'i's special interests in Asia and the Pacific region and was largely contributed by the late John Young, whose vision and inspiration for a museum on the campus became the university's first museum. The JYMA grounds include a courtyard with a water garden and reflecting pool. (JYMA is currently closed for roof and facility maintenance. Re-opening TBA.)

### **John F. Kennedy Theatre**

1770 East-West Road  
Honolulu, HI 96822  
Tel: (808) 956-7655 (box office) (Voice/Text)  
(808) 956-7677  
Web: www.hawaii.edu/kennedy/

The John F. Kennedy Theatre is home to the classes and productions of the Department of Theatre and Dance and hosts touring productions from around the globe whenever possible. This 600-seat facility is among the best in the world for presentations of Asian and Western theater and dance. The department is internationally known for its English language presentations of kabuki and Beijing opera. Kennedy Theatre serves as a laboratory for student technicians, actors, dancers, designers, musicians, choreographers, and directors.

A typical season at Kennedy Theatre might include the annual Dance Concert, a classic Western play, an Asian theater production, youth theatre, and a contemporary/experimental play. Auditions are open to all UH Mānoa students interested in learning about performance or production.

The Earle Ernst Lab Theatre, an intimate 100-seat house that serves as an adjunct performing space, features student productions, late-night theater, workshops, and experimental presentations.

UH Mānoa students are entitled to special discount prices on tickets for most productions at Kennedy Theatre through funding from their student activity fees. Students must present a validated UH Mānoa photo ID to obtain the specially priced

tickets. Tickets are available at the box office approximately two weeks prior to the opening of each production.

### **Mae Zenke Orvis Auditorium**

2411 Dole Street  
Honolulu, HI 96822  
Tel: (808) 956-8742 (recorded information)  
(808) 956-7756  
Fax: (808) 956-9657  
Email: uhmmusic@hawaii.edu  
Web: www.hawaii.edu/uhmmusic

With the best acoustics of any concert hall its size in the state, the Mae Zenke Orvis Auditorium is the site of numerous recitals and concerts. The auditorium seats 400, providing an intimate yet formal setting for soloists and small ensembles. The auditorium is used throughout the year for performances of both Western and ethnic music by the music department, the UH Mānoa community, and local and international artists.

Tickets for most music department events may be reserved by calling (808) 95-MUSIC (68742) or may be purchased in advance at the UH Mānoa Campus Center Information Desk. Remaining tickets will be available at the door one hour before each performance. Many events are free.

Call Music at Mānoa Events Information for recorded concert information, or visit the music department's website.

## **Recreation**

### **Intercollegiate Athletics**

Physical Education/Athletics Complex  
1337 Lower Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-6580 (student affairs)  
(808) 956-3388 (student academic services for athletics)  
(808) 956-7523 (sports information)  
(808) 956-7301 (athletics director)  
(808) 956-6508 (football)  
(808) 956-6247 (baseball)  
(808) 956-6501 (men's basketball)  
(808) 956-4505 (men's volleyball)  
(808) 956-4498 (women's sports and other men's sports)  
Fax: (808) 956-4637

Intercollegiate sports at the NCAA Division I level provide the UH Rainbow Warriors and Rainbow Wahine the opportunity to compete against the nation's finest teams. The football team competes in the Mountain West Conference. The men's volleyball, men's and women's swimming and diving, and indoor track and field teams compete in the Mountain Pacific Sports Federation. All other men's and women's teams compete in the Big West Conference.

Men's sports include baseball, basketball, football, golf, swimming and diving, tennis, and volleyball. Women's sports include basketball, cross-country, golf, soccer, softball, swimming and diving, tennis, indoor and outdoor track and field, indoor volleyball, sand volleyball, and water polo. The sailing team and cheerleading squad are open to both men and women. Intercollegiate athletics operates under a policy of gender equity. See "Campus Policies and Information" for details.

## Student Recreation Services

Physical Education/Athletics Complex 200  
1337 Lower Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-7694/6468  
Fax: (808) 956-4810  
Web: [www.manoa.hawaii.edu/studentrec](http://www.manoa.hawaii.edu/studentrec)

Student Recreation Services provides a variety of recreational activities and services.

**Informal Recreation (including the Warrior Recreation Center at the Campus Center, the University Fitness Center at Stan Sheriff Center, and the athletic facilities in the Lower Campus):** Athletic facilities are available for students to use for the following activities: basketball, volleyball, swimming, tennis, table tennis, badminton, and jogging. The Warrior Recreation Center and the University Fitness Center provide strength and cardiovascular equipment for student use. A schedule of hours is provided at the start of each semester.

**Intramural Sports:** Organized leagues and tournaments are scheduled for various team and individual sports. Sports include flag football, basketball, volleyball, soccer, and softball. Visit us at [www.imleague.com](http://www.imleague.com) for more information and registration.

**Warrior Fitness Program:** Non-credit classes and activities are available through the Warrior Fitness Program, which is designed to promote a healthy, balanced lifestyle. The fitness and wellness classes provide the perfect stress relief from school work. For more information, contact us at [cclp@hawaii.edu](mailto:cclp@hawaii.edu).

**Outdoor Education Program:** Non-credit classes and activities are available through this program. Classes include surfing, sailing, hiking, snorkeling, stand-up surfing, SCUBA, kayaking, and much more. Check out the activities/classes at [www.facebook.com/UHMRecServ](http://www.facebook.com/UHMRecServ).

**Outdoor Equipment/Sports Equipment Rental:** A check-out program at minimal cost is provided.

**Rec Sports Board Activities:** The Rec Sports Board provides weekly (usually Friday night) activities throughout the school year. These activities include many traditional sports as well as some less familiar albeit fun and entertaining ones. Check them out on [www.facebook.com/recsportsboard](http://www.facebook.com/recsportsboard).

## Campus Center Complex

Campus Center Ticket Information and ID Office  
Campus Center 212  
2465 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-7235 (Information Hotline)  
(808) 956-7236  
Fax: (808) 956-3917  
Web: [www.hawaii.edu/campuscenter](http://www.hawaii.edu/campuscenter)

Campus Center Complex (CCC), the university's student union, includes Hemenway Hall and the Campus Center buildings and serves as the "community center" of UH Mānoa. It provides facilities for programs, services, and opportunities offered by the Campus Center Board (CCB) and other student organizations, resulting in a comprehensive plan for the community life of the campus.

The complex includes an information desk/ticket window, computer lab, dining rooms, ID card services, catering services, lounges, game room, banking facilities, barber shop, photocopying service, RIO center for student organizations, graphics

services, an open market, and meeting rooms of various sizes, including a ballroom.

Many student organizations are housed in the two buildings, providing opportunities for practical experience in leadership development and social responsibility through student-run programs, activities, and services. In addition to these volunteers, more than 70 part-time student assistants within the student union are employed in diverse and challenging jobs vital to the operation of the complex. These jobs offer valuable work experience to UH Mānoa students in a supportive atmosphere, encouraging and rewarding personal responsibility and growth while supporting the educational and developmental mission of UH Mānoa.

## Student Organizations

### Office of Student Life and Development

Campus Center 208  
2465 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-8178  
Fax: (808) 956-4810  
Web: [www.manoa.hawaii.edu/studentlife/](http://www.manoa.hawaii.edu/studentlife/)

Learning and development take place in many ways on a college campus. Office of Student Life and Development (SLD) offers opportunities to make new friends, try new activities, test new ideas, and acquire new skills. SLD coordinates a variety of student-administered programs, activities, and services that make out-of-class time a positive educational experience. SLD also provides leadership training through a variety of credit and noncredit classes.

More than 200 student, faculty, and staff organizations are registered with SLD. Organizations that register with SLD have access to campus facilities and other resources. These organizations represent varied interests and activities including academic, professional, political, social, religious, recreational, and service groups. A complete list of organizations and detailed information on joining a Registered Independent Organization (RIO) is available from SLD.

SLD assists UH's six chartered student organizations in achieving their goals and objectives; provides administrative services for more than 200 RIOs; fosters educational, recreational, cultural, and social programs and activities; provides trained, experienced advisors who teach leadership and organizational skills; and promotes responsible citizenship.

### Associated Students of the University of Hawai'i

Campus Center 211A  
2465 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-4822  
Fax: (808) 956-5360  
Web: [asuh.hawaii.edu](http://asuh.hawaii.edu)

The Associated Students of the University of Hawai'i (ASUH) is the chartered student organization whose membership includes all full-time (12 credit hours or more per semester) classified undergraduates. It is governed by the ASUH Senate, elected annually each spring. The senate is made up of four executive officers and 34 senators who represent students in the various academic colleges and students at large. Any ASUH member in good academic standing may seek elective office.

The senate works toward improving the quality of undergraduate student life and represents the needs, interests, and concerns of its constituents through participation in UH policy-making and advisory committees, research and lobbying action on campus and community issues, and the sponsorship and funding of a variety of programs and activities.

### **Board of Publications**

2445 Campus Road  
Hemenway 107  
Honolulu, HI 96822  
Tel: (808) 956-7043 (Ka Leo O Hawai'i - Editorial & Advertising)  
Fax: (808) 956-9962  
Web: [www.kaleo.org](http://www.kaleo.org) (Ka Leo O Hawai'i - Online)  
[www.kaleo.org/hawaii\\_review/](http://www.kaleo.org/hawaii_review/)

The Board of Publications (BOP) is the publisher for UH Mānoa student publications. This 14-member governing board consists of nine students, three faculty/staff, one alumni, and one professional member. BOP publishes the campus student newspaper, *Ka Leo O Hawai'i* and the student literary journal, *Hawai'i Review*.

Student publications offer student volunteers the opportunity for personal and pre-professional development experience, including personnel and business management, public contact, writing, journalism, marketing, and graphic arts.

### **Broadcast Communication Authority**

Hemenway 220B  
2445 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-4841  
Fax: (808) 956-4810  
Email: [bca@hawaii.edu](mailto:bca@hawaii.edu)  
Web: [ktuh.org](http://ktuh.org) (KTUH online)

The Broadcast Communication Authority (BCA) consists of 9 voting members, including students, faculty, staff members, and community representatives. The board governs the student-run campus radio station, KTUH-90.3 FM, and the Student Video and Filmmakers' Association. By radio, video, film, and the World Wide Web, the BCA provides a variety of cultural, educational, informational, and musical programs for the university community. Through the operation of the 24-hour radio station and the production of locally televised video programs, BCA offers students opportunities to manage, produce, and engineer radio and video/filmmaking projects.

### **Campus Center Board**

Campus Center 313  
2465 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-9670  
Fax: (808) 956-4810  
Web: [www2.hawaii.edu/~ccbac/Activities\\_Council/Home.html](http://www2.hawaii.edu/~ccbac/Activities_Council/Home.html)

The Campus Center Board (CCB) is the governing, policy-making authority for the programs, services, and facilities of the Campus Center Complex, the college union facility on campus. The 17-member board represents various campus constituencies: students, faculty, staff, and alumni. CCB serves its constituents in two ways: a multifaceted activities program and a comprehensive array of services in Campus Center and Hemenway Hall.

CCB also sponsors programs through its Activities Council committees, which plan recreational activities, educational support programs, dances, personal wellness events, concerts, and cultural programs.

### **Graduate Student Organization**

Hemenway 212  
2445 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-8776  
Fax: (808) 956-4810  
Web: [gso.hawaii.edu](http://gso.hawaii.edu)

The Graduate Student Organization (GSO) represents the academic interests of over 5,000 graduate students attending UH Mānoa, the flagship campus of the UH System.

The GSO places a particular emphasis on fostering excellence in research at both the PhD and master levels. As such, the GSO endeavors to facilitate research initiatives from graduate students through its Grants and Awards program.

The GSO also provides input on all issues affecting UH graduate students and the UH Mānoa campus. It has representatives sitting on over 40 university committees and participates in a wide variety of graduate student, campus, and community events.

### **Student Activity and Program Fee Board**

Hemenway 220C  
2445 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-4842  
Fax: (808) 956-4810  
Web: [www.manoa.hawaii.edu/sapfb/](http://www.manoa.hawaii.edu/sapfb/)

The Student Activity and Program Fee Board (SAPFB) is an eleven-member board composed of students, faculty, and staff members that makes recommendations to the Mānoa Vice Chancellor for Students regarding the allocation of the student activity and program fee. This fee supports a variety of co-curricular activities, programs, and services. SAPFB solicits and reviews requests for funding from campus organizations, departments, and programs that are not funded by other chartered organizations.

# Tuition, Fees, and Financial Aid

## Tuition, Fees, and Expenses

Cashier's Office  
 Queen Lili'uokalani Center for Student Services 105  
 2600 Campus Road  
 Honolulu, HI 96822-2205  
 Tel: (808) 956-7554  
 Fax: (808) 956-2098

Tuition and fees are charged according to the number of credit hours carried by the student. For regular, Outreach College Continuing Education, and Summer Session tuition schedules, refer to the following page. Auditors (those enrolled in a course for no credit) must pay the same tuition and fees as students enrolled for credit. For tuition purposes only, a full-time student is any student enrolled for 12 or more credit hours.

The regular tuition to be charged is determined by the degree status of the student and not by the level of the courses taken. For example, students who have earned a baccalaureate degree will be charged graduate tuition, except for students admitted for a second baccalaureate degree. Students admitted to the law or medical school will be charged the stated tuition for that school.

Medical, law, graduate nursing, or graduate business students concurrently enrolled in the Graduate Division must pay the stated tuition for the medical school, law school, nursing school, or business college.

All tuition and fee charges at the UH campuses are subject to change in accordance with requirements of state law and/or action by the Board of Regents or the UH administration.

### Tuition Deposit

All new, transfer, and returning classified undergraduate students are required to make a tuition deposit of \$200. All new medical and law students are required to make a partial advance tuition payment of \$250. Scholarship/fellowship recipients are not exempt from this deposit, if applicable. This tuition deposit is applied at registration time toward tuition for that semester. The payment is nonrefundable and nontransferable if the student does not register (except when the student is denied further registration by UH Mānoa). Continuing classified students are not required to make the tuition deposit.

### Additional Fees and Expenses

#### Caps and Gowns

Caps, gowns, and master's and doctoral hoods are required for participation in commencement ceremonies. Caps and gowns are available for purchase from the UH Mānoa Bookstore.

#### Outreach College Fees

Students registered in courses offered by Outreach College pay additional tuition and fees. For information, see their website at [www.outreach.hawaii.edu](http://www.outreach.hawaii.edu) or contact Outreach College at [ochelp@hawaii.edu](mailto:ochelp@hawaii.edu).

#### Credit by Examination

A \$15-per-course fee is assessed at the time of application.

#### Diplomas and Certificates

A charge of \$30, payable at time of application, is assessed for each bachelor's degree, advanced degree, and professional certification.

#### Late Registration Fee

A \$30 late registration fee is assessed when a student registers during the late registration period.

#### Replacement of Laboratory Equipment

For broken or lost items, the cost of replacement is assessed.

#### Returned Checks

Payments tendered to UH Mānoa or any department therein, and returned from the maker's bank for any reason

All tuition and fee charges at UH campuses are subject to change in accordance with requirements of state law and/or by the Board of Regents or the UH administration. See "Campus Policies" section for definition of resident, nonresident, and 150% resident.

(e.g., insufficient funds, closed bank account, incorrect bank information) will result in a \$25 charge and a hold will be placed on your account. DO NOT place a STOP PAYMENT on checks. A stop payment on a check is considered a returned check and is not acknowledged as an official drop from courses or withdrawal from UH Mānoa.

### Special Examination

Various fees are assessed. Refer to Testing Office at [www.manoa.hawaii.edu/counseling/testing\\_office/](http://www.manoa.hawaii.edu/counseling/testing_office/).

### Student Transcripts

Regular processing is \$5 per copy, and rush processing is \$15 per copy.

## Payment of Tuition and Fees

Full payment for tuition and fees must be made or be enrolled in the MyUH installment payment plan by the end of the 10<sup>th</sup> calendar day of the semester. You are responsible for payment of tuition and fees incurred because of registration.

UH Mānoa offers a 4 month, 3 month, or 2 month installment payment plan for the fall and spring terms only. The non-refundable enrollment fee is \$30 per student per semester per plan to participate. Detailed information is available at [myuh.hawaii.edu/myuh/IPP\\_FINAL.pdf](http://myuh.hawaii.edu/myuh/IPP_FINAL.pdf).

All checks or money orders should be made payable to University of Hawai'i for the exact amount due. The student's UH number should be written on the **memo section (bottom left)** of the check. Students who have their tuition being paid by a third party sponsoring agency (e.g., World Health Organization, East-West Center, Alu Like, Vocational Rehabilitation, U.S. Armed Forces Branch, State of Hawai'i Department of Education, etc.), **must** submit their letters of financial guarantee, purchase orders, or authorization letters from their sponsor to the UH Mānoa Cashier's Office by the payment deadline. University grants and scholarships will be posted to the student's account.

## Financial Obligations

Students who have not met their financial obligations (traffic fines, library fines, locker fees, lab breakage charges, transcript fees, loans, rental contracts, etc.) to the satisfaction of UH Mānoa may be denied a variety of enrollment services including registration, withdrawal, and transcripts. Notation of the financial obligation may appear on transcripts.

Enrollment at UH Mānoa signifies consent to, and acceptance of all policies and procedures governing enrollment, including financial liability. If student's third party sponsoring agency does not make payment for any reason after being billed by the university, the student will be responsible for paying any unpaid balances. Students who fail to remit payment when due, agree to pay UH Mānoa all reasonable costs for collection, to include collection agency, attorney's, and court fees.

Copies of the delinquent financial obligations policy and procedures are available for inspection at the Office of the Vice Chancellor for Students and the UH Mānoa Cashier's Office.

## Refunds of Tuition and Fees

### Regular Tuition and Fees

Tuition and special course fees are refunded as indicated below:

- A 100 percent refund of tuition for **complete withdrawal** or **decrease in credits** made on or before the 10<sup>th</sup> calendar day of the semester, unless otherwise stipulated by federal regulations.
- A 50 percent refund of tuition for **complete withdrawal** or **decrease in credits** made between the 11<sup>th</sup> to the 21<sup>st</sup> calendar days of the semester, unless otherwise stipulated by federal regulations.
- No refunds of tuition for **complete withdrawal** or **decrease in credits** from the 22<sup>nd</sup> calendar day of the semester (start of the 4<sup>th</sup> week of instruction), unless otherwise stipulated by federal regulations.

Student activity fees are only refundable **before** the first day of instruction, or if you **completely withdraw** from all UH campuses during the 100 percent period.

Penalties apply even if payment for tuition and fees has not been made at the time registration status is changed.

After students have secured all required approvals, the withdrawal or change in registration must be processed according to instructions in the online *Registration Guide* at [www.hawaii.edu/myuh/manoa/](http://www.hawaii.edu/myuh/manoa/). In no case shall a refund be made when a student fails to follow these instructions within two weeks of the date of change in registration (e.g., withdrawal, change in status, or change in tuition rate).

Refunds are made by the UH Mānoa Cashier's Office after the procedures for complete withdrawal from UH Mānoa have been followed. See the "Undergraduate Education" and "Graduate Education" sections of this *Catalog*.

Federal regulations mandate a refund policy for all students who are receiving federal financial aid and who process a complete withdrawal before 60% of the semester has elapsed. A detailed refund policy is available in the *Registration Guide*.

If you paid by credit card within the past 90 days, your credit card may be credited the refund amount in the order of credit card used. For payments older than 90 days, your refund will be deposited directly into your designated eRefund account or mailed to your current mailing address on file at UH Mānoa. If you paid by cash or check, your refund will be deposited directly into your designated eRefund account or mailed to your current address on file at UH Mānoa. Students should verify and update their mailing address and permanent address, as all refund checks will be mailed to their address in the following priority: 1) Mailing Address, and 2) Permanent Address (if mailing address is null or expired). Mailing address corrections can be made online through MyUH, and permanent address corrections made by mailing the Student Data Change Form at [manoa.hawaii.edu/records/pdf/data\\_change.pdf](http://manoa.hawaii.edu/records/pdf/data_change.pdf) or completing it in-person at the Office of the Registrar, Queen Lili'uokalani Center for Student Services, Room 010 (ground floor).

UH Mānoa offers students the option to have refunds direct deposited into a bank account. View information on eRefunds at [www.hawaii.edu/news/docs/eRefunds.pdf](http://www.hawaii.edu/news/docs/eRefunds.pdf).

### Outreach College Extension and Summer Sessions Tuition and Fees

See the Outreach College website at [www.outreach.hawaii.edu](http://www.outreach.hawaii.edu) for refund information.

## Residency for Tuition Purposes

Students who do not qualify on the first day of instruction as *bona fide* residents of the state of Hawai'i for tuition

purposes pay the nonresident tuition. An official determination of residency status is made at the time of application. Applicants may be required to provide documentation to verify residency status. Once classified as a nonresident, students continue to be so classified during their enrollment at UH Mānoa until they present satisfactory evidence to the residency officer that proves residency. For definition of Hawai'i residency for tuition purposes, statutory exemptions, etc., refer to the "Campus Policies" section.

## WICHE Programs

Bachman 109H  
2444 Dole Street  
Honolulu, HI 96822  
Tel: (808) 956-6625

UH Mānoa participates in three exchange programs of the Western Interstate Commission for Higher Education (WICHE).

Through the Western Undergraduate Exchange (WUE) program, a limited number of students from participating states who are not residents of Hawai'i may enroll at UH Mānoa in designated programs at a 150% resident tuition (plus other fees that are paid by all students). WUE students do not pay the higher charge for nonresident tuition. (Hawai'i residents may enroll under the same terms in designated institutions and programs in other participating states.) Hawai'i residents may obtain information about WUE programs in other states from the WICHE Certifying Officer for Hawai'i (see the location above); from participating institutions; or at [www.wiche.edu/wue](http://www.wiche.edu/wue).

The John A. Burns School of Medicine participates in the WICHE-administered Professional Student Exchange Program (PSEP). PSEP allows legal residents of the states of Alaska, Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Utah, Washington, and Wyoming (states without a public professional school in a health care field to enjoy Hawai'i-resident status for admission and tuition purposes at UH Mānoa. Students who are pursuing graduate degrees in Asian and Comparative Philosophy, Asian Theatre and Dance, Communication and Information Sciences, East Asian Languages and Literatures, Natural Resources and Environmental Management, Oceanography, Second Language Studies, Tropical Entomology, Tropical Medicine, Tropical Plant and Soil Sciences, and Urban and Regional Planning are eligible for resident tuition under the WICHE Program. Students who receive certification from their home states receive preferential admission consideration and, if accepted, are charged Hawai'i-resident tuition rates. To be certified for PSEP, students must apply to the WICHE certifying officer in their home state before **October 15** the year prior to admission. State eligibility requirements vary, and the number of students funded by each state depends upon appropriations by the state's legislature. For addresses of state certifying officers, visit [www.wiche.edu/psep](http://www.wiche.edu/psep).

UH Mānoa also participates in the WICHE Regional Graduate Program. Under this arrangement, legal residents of the other WICHE member states (AK, AZ, CA, CO, ID, MT, ND, NV, NM, OR, SD, UT, WA, WY) will be charged resident tuition if they are exceptional candidates for admission in specific graduate programs. Approved fields are Asian and Comparative Philosophy, Asian Theatre and Dance (MA and MFA, and PhD), Communications and Information Sciences (PhD), East Asian Languages and Literatures (MA and PhD),

Natural Resources and Environmental Management (MS and PhD), Oceanography (MS and PHD), Pacific Island Studies (MA), Second Language Studies (PhD), Tropical Entomology (MS and PhD), Tropical Medicine in the biomedical sciences (MS and PhD), Tropical Plant and Soil Sciences (MS and PhD), and Urban and Regional Planning (MA and PhD). For detailed information, contact the appropriate graduate chair or see the respective field of study listings at the Graduate Division Office or visit [wrgp.wiche.edu/](http://wrgp.wiche.edu/).

## Financial Aid

Financial Aid Services  
Queen Lili'uokalani Center for Student Services 112  
2600 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-7251  
Fax: (808) 956-3985  
Email: [finaid@hawaii.edu](mailto:finaid@hawaii.edu)  
Web: [www.hawaii.edu/fas](http://www.hawaii.edu/fas)

Scholarships, grants, loans, and work-study programs are provided to eligible students by the federal and state governments and private donors. Some programs are based on merit or academic records, and others on demonstrated financial need.

UH Mānoa encourages students who believe they may not be able to enroll or continue their education because they lack financial resources to apply for financial aid through the Financial Aid Services office.

The federal government is a major source of grants, loans, and work-study funds to undergraduate and graduate students. With the enactment of the Higher Education Amendment of 1992, applicants are **required** to submit the Free Application for Federal Student Assistance (FAFSA) form to the federal processor for the determination of eligibility for federal, state, and some institutional program funds.

If you have been selected for verification, you must submit federal tax transcripts, a verification worksheet, and other forms as required by Financial Aid Services. Students interested in applying for financial aid may visit our website at [www.hawaii.edu/fas/](http://www.hawaii.edu/fas/) for financial aid information and forms.

The offer of aid may include funds from public and private sources, depending on the applicant's residency, degree of need, date of file completion, major, class level, and availability of funds. Recipients are advised to read their rights and responsibilities, including the description of the type of funds awarded and disbursement procedures on the financial aid website.

### Deadlines

The priority date is **March 1**; however, applications will be accepted after that date with awards offered contingent on available funds.

### Types of Financial Aid

#### Scholarships

Scholarships are awarded to exceptional UH Mānoa students on the basis of academic excellence and exceptional promise; students in specific majors, colleges, or schools; Hawai'i residents; students of a particular class standing; or students with demonstrated financial need. Noteworthy scholarships include the following among others:

### **B+ Scholarship**

Scholarships awarded to incoming freshmen and continuing students who complete a rigorous high school curriculum with a minimum overall GPA of 3.0 (4.0 scale) at a Hawai'i public school, and are residents of the state of Hawai'i with preference to those with financial need.

### **Manoa Merit Scholarships**

Scholarship awarded to high achieving incoming freshmen students with a 3.5 cumulative high school GPA and evidence of superior academic achievement or creative endeavor. These awards are renewable up to 8 consecutive semesters. Students must maintain an overall 3.0 GPA. For more information, visit [manoa.hawaii.edu/admissions/undergrad/financing/index.html](http://manoa.hawaii.edu/admissions/undergrad/financing/index.html).

### **Manoa Chancellor's Scholarship**

Scholarships awarded to incoming freshman students who have graduated from a Hawai'i high school with a minimum overall GPA of 3.5 (4.0 scale) and a 1600 SAT or 25 ACT score. Evidence of superior academic achievement or creative endeavor and record of academic, co-curricular, and community service activities. For more information, visit [manoa.hawaii.edu/admissions/undergrad/financing/chancellors\\_scholarship.html](http://manoa.hawaii.edu/admissions/undergrad/financing/chancellors_scholarship.html).

### **Regents Scholarship**

Sixteen scholarships for full tuition plus \$4,000 per year are awarded to entering first-year students who are residents of Hawai'i and have a combined SAT score of at least 1950 and a high school GPA of 3.5 or better. This scholarship is renewable for up to four years upon maintenance of eligibility and includes a one-time academic travel grant of up to \$2,000. For more information, visit [www.hawaii.edu/raps](http://www.hawaii.edu/raps).

### **Presidential Scholarship**

Seven scholarships for full tuition plus \$4,000 per year awarded to juniors who have a minimum cumulative GPA of 3.7, have demonstrated sustained academic progress, show superior academic achievement or creative endeavor, and are residents of Hawai'i. This scholarship is renewable for one year upon maintenance of eligibility and includes a one-time academic travel grant of up to \$2,000. For more information, visit [www.hawaii.edu/raps](http://www.hawaii.edu/raps).

### **ROTC Scholarships**

Scholarships are awarded for up to four years to qualified applicants by the UH Mānoa Army ROTC and Air Force ROTC programs. Scholarships cover tuition, books, laboratory fees, and a \$300-500 tax-free monthly allowance during the school year. Contact respective campus ROTC programs (see "ROTC Programs").

### **Other Scholarships**

Other tuition scholarships for residents and nonresidents are awarded to classified students who participate in special programs and/or meet criteria set by colleges or schools. Contact the specific department for details.

The tuition scholarship program is subject to change by the Board of Regents.

### **Grants**

A grant is a type of federal or state financial aid that does not have to be repaid. Usually, these awards are based on financial need.

### **UH Opportunity Grants**

UH Opportunity Grants are awarded annually to qualified undergraduate and graduate students who qualify on the basis of financial need as determined by the FAFSA available at the Financial Aid Services office.

### **Federal Pell Grant**

This award to undergraduate students is based solely on financial need as determined by congressional methodology. The amount received depends on the degree of need and schedule of awards as determined by the federal government. FAFSA required. Eligibility for the Pell Grant is limited to 12 full-time semesters. Contact the Financial Aid Services office for details.

### **Federal Supplemental Educational Opportunity Grant**

This award is provided to undergraduate students with exceptional financial need who are also eligible for the Federal Pell Grant. FAFSA required. Contact the Financial Aid Services office for details.

### **Teacher Education Assistance for College and Higher Education (TEACH) Grant**

For undergraduate and graduate students enrolled in the College of Education who intend to teach full-time in high need subject areas for at least four years at schools that serve students from low-income families. Must have a cumulative GPA of 3.25.

### **Other Grants**

Students are encouraged to contact a reference librarian at the nearest college for other publications listing grants for students. For additional information on these and other grants, check with the Financial Aid Services office or specific departments.

### **Loans**

A financial aid package based on demonstrated financial need may include a long-term, low-interest federal or state loan. Repayment of these loans begins after a student graduates, withdraws from school, or drops to less than half-time.

**Federal Perkins Loan.** This loan is available to students with financial need. FAFSA required. Contact the Financial Aid Services office for details.

**Federal Direct Loans.** These loans, the Federal Direct Loan (subsidized and unsubsidized), the Federal Direct PLUS Loans for parents of undergraduate dependent students, and the Federal Direct Graduate PLUS loan for graduate students are available through the U.S. Department of Education. Interest accrued may be subsidized by the federal government, depending on the degree of financial need. FAFSA required. Contact the Financial Aid Services office for details.

**State Higher Education Loan.** This loan is available to bona fide residents of the state of Hawai'i who demonstrate financial need. FAFSA required.

**Short-Term, Emergency Loans.** These institutional loans are designed to meet temporary or emergency financial needs of registered students. Contact the Financial Aid Services office, the Graduate Student Organization, or specific departments.

**Other Loans.** Students are encouraged to contact the reference librarian at the nearest library for other publications listing private loans for students. For additional information on these and other loan programs, check with the Financial Aid Services office, UH Foundation, or specific departments.

### Work-Study

The Federal Work-Study (FWS) Program enables students to meet part of their financial need through part-time employment. The program is funded by the federal government with matching funds from UH Mānoa. Employment may be on or off campus with nonprofit organizations. FWS earnings are not calculated as income when applying for financial aid.

Generally, students are provided the work-study program as a part of their financial aid package. The Center for Career Development and Student Employment coordinates the work-study program. Job opportunities are available in many fields and require skills ranging from entry-level to highly technical. Community service jobs are also available, including tutoring positions in the America Reads and Counts Challenge. For further information, see the "Student Life" section of this *Catalog*.

### Standards of Satisfactory Academic Progress for Recipients of Financial Aid

**Satisfactory Academic Progress.** To be eligible for federal, state, and specific institutional aid programs, you must meet all three Satisfactory Academic Progress (SAP) standards regardless of whether you have received financial aid previously. For more information, visit [www.hawaii.edu/fas/policies/sap.php](http://www.hawaii.edu/fas/policies/sap.php).

**GPA Standard.** Maintain minimum GPA standards. Undergraduate students must maintain a minimum cumulative grade point average of 2.0 or as required by the student's specific program of study. Graduate students must maintain a minimum cumulative grade point average of 3.0 or as required by the student's specific program of study. The cumulative grade point average includes all courses attempted by degree level at UH Mānoa. Students on academic suspension are not eligible for financial aid.

**Pass Rate Standard.** Students must pass at least 67% of all credit hours attempted during the academic year at UH Mānoa. Measurement of each student's pass rate will occur at the completion of each spring semester. Grades of W, F, I, NG and repeated courses are not considered to be adequate grades for completion.

**Maximum Credit Hour Standard.** Undergraduate students must complete their undergraduate degree with less than 180 attempted credit hours (e.g., 150% above the 120 minimum

credits for a baccalaureate degree). Master's program students must complete their degree within 4-10 semesters based on the minimum number of credits required. Doctoral students must complete their degree within 14 semesters (includes master's degree credits). All courses you register for or transfer to UH Mānoa are included in the maximum credit hour standard.

### Enrollment Status for Recipients of Financial Aid

Courses that do not count toward a student's degree cannot be used to determine enrollment status for financial aid purposes. Students may receive aid to repeat a previously passed course one additional time.

### Graduate Assistantships

UH Mānoa offers assistantships to graduates of accredited institutions of higher learning who have satisfactory scholastic records, an adequate undergraduate background in the major program, and evidence of a high level of English proficiency. Graduate assistants, chosen on a competitive basis, serve as part-time teaching or research assistants. A graduate assistant must be enrolled in a classified master's or doctoral graduate program (see Master's Degree programs and Doctor of Philosophy programs). Graduate certificate, PBU (post-baccalaureate unclassified), law, medicine, Shidler College of Business (master's only) students are not eligible for graduate assistantships. All graduate assistants must be registered for and must complete at least 6 credit hours of degree-related course work each semester, while holding the assistantship. Moreover, they must maintain at least a 3.0 GPA to continue in the position. The maximum course load typically is 9 credit hours. The period of service for each year for teaching assistants is typically from two weeks prior to the beginning of instruction through spring commencement; research assistants normally serve for 11 months. Graduate assistants are awarded tuition exemptions, but they are not exempt from the general fees, special course fees listed in the *Catalog*, and the Graduate Student Organization fee. Applications should be sent to the chair of the appropriate department before **February 1**. Each application must be accompanied by three letters of recommendation from former professors or employers.

Information on assistantships and application forms may be requested from the chair of the appropriate graduate program.

### Graduate Fellowships and Scholarships

Applicants are advised that UH Mānoa has joined the Council of Graduate Schools in approving the following resolution:

Acceptance of an offer of financial aid (such as a graduate scholarship, fellowship, traineeship, or assistantship) for the next academic year by an actual or prospective graduate student completes an agreement that both student and graduate school expect to honor. In those instances in which the student accepts the offer before **April 15** and subsequently desires to withdraw, the student may submit in writing a resignation of the appointment at any time through **April 15**. However, an acceptance given or left in force after **April 15** commits the student not to accept another offer without first obtaining a written release from the institution to which a commitment has been made. Similarly, an offer by an institution after **April 15** is conditional on presentation by the student of the written release from any previously accepted offer.

The Graduate Division has available general information on fellowship competitions open to American graduate students

and administered by outside foundations or agencies. For application purposes, it is important to distinguish between (1) those awards made directly by the sponsoring agency to individual students and administered by an institution, and (2) those awards made by the sponsoring agency to an institution to be awarded, in turn, to students for study at the specific institution.

Awards in the first category are generally made by national organizations and allow students to choose their institution of affiliation. Applications are submitted by students to the sponsor, usually in early fall preceding the year graduate study is to begin. The National Science Foundation Graduate Fellowships program is an example.

Awards in the second category, which vary in source from federal to local, include a large number of programs. At UH Mānoa, nominations for these awards are generally made by the graduate programs that are eligible. In some cases (e.g., Fulbright awards), the student may apply through the Graduate Division. Students are urged to exercise their initiative to explore the various possibilities. Initial inquiries should be directed to the chair of the program.

Information on fellowships is available by checking the following website: [manoa.hawaii.edu/graduate/content/fellowships-scholarships](http://manoa.hawaii.edu/graduate/content/fellowships-scholarships).

## UH Mānoa Scholarships

The scholarships listed below are only a selection of the more than one thousand scholarships, fellowships, and other awards available to UH students. More information is available from academic advisors, the UH Mānoa Library, Financial Aid Services, or the chairs of departments. Information is also available at [www.star.hawaii.edu](http://www.star.hawaii.edu).

### School of Architecture

Allen R. Johnson-Roy C. Kelley Architectural Research Travel Scholarship  
Construction Specifications Institute Scholarship Fund  
Hawai'i Architectural Foundation Scholarship  
HonBlue Architectural Grant  
American Institute of Architects Honolulu Chapter Scholarship  
School of Architecture Alumni Association Scholarship  
R. Richard Morris Memorial Scholarship  
Sam Chang Scholarship at the School of Architecture  
School of Architecture Practicum Fund  
Barry John Baker Scholarship  
Donald G. Deer Memorial Scholarship  
Leighton Liu Scholarship

### Colleges of Arts and Sciences

Arts and Sciences Advisory Council Awards  
Aspect Technology Fund Grants (open to all UH Mānoa students, administered by Arts and Sciences)  
K. S. Cheng Memorial Scholarship Fund  
Colleges of Arts and Sciences Alumni Association Scholarship  
Colleges of Arts and Sciences Alumni Association Study Abroad  
Richard and Mildred Kosaki Awards  
Anna Toy Ng Memorial Scholarship  
Rodney P. Santos Scholarship  
The John Young Scholarship in the Arts

### Academy for Creative Media

Grace Abernethy Screenwriting Award  
Ito-en Production Support Fund  
Cinema Italiano, Hawai'i Future Filmmaker Award  
HIFF SMART Exchange Award  
Roy & Hilda Takeyama Student Support Fund

### Department of American Studies

Brown-Denney Award  
Glen Grant Endowed Scholarship Fund  
Goto of Hiroshima Foundation Endowed "Fumiko Kaya" Scholarship  
Japanese Women's Society Foundation Endowed "Kokoro" Scholarship  
James M. McCutcheon Memorial Endowed Scholarship Fund

### Department of Anthropology

Jocelyn Armstrong Merit Award in Anthropology  
Carol Eastman Scholarship (undergraduates majoring in Anthropology)  
Richard W. Lieban Endowed Scholarship for Anthropology  
Mānoa Achievement (tuition) Scholarship Graduate Division

### Department of Art and Art History (for current majors only)

Jean Charlot Foundation Scholarship  
Geraldine P. Clark Memorial Fellowship  
David H. and Doris C. Crowell Award  
Stephen Doue Scholarship  
Helen Gilbert-Bushnell Memorial Award  
H. John Heide Fellowship in Art (graduate)  
Honolulu Printmakers Scholarship  
Shore Hodge Lipsch Memorial Award (undergraduate and graduate)  
Matt Smith Award  
Diane Sullivan Memorial Scholarship  
Yun T. and Chen Chuan Tu Student Travel Endowment in Art

### College of Arts and Humanities

Diamond Head Theatre's Burnett/Selleck Scholarship  
Danny Kaleikini/Kāhala Hilton Scholarship  
Hands of Hope

### Department of Botany

Isabella Aiona Abbott Undergraduate Botany Fund for Excellence  
Beatrice Krauss Fellowship Fund in Botany  
Charles H. Lamoureux Fellowship in Plant Conservation Fund  
Torrey-Degener-Rock Scholarship Endowed Fund  
Winona Pi'ilani Char Endowed Scholarship Fund

### Department of Chemistry

Giichi Fujimoto Scholarship  
Shigeo and Hatsu Iwamoto and Paul J. Scheuer Scholarship  
William W. Y. Young Fellowship in Chemistry

### School of Communications

Blom Journalism Book Award  
Pierre L. Bowman Memorial Scholarship  
Carol Burnett Fund for Responsible Journalism  
James H. Couey Jr. Memorial Scholarship  
Pat Pitzer Memorial Scholarship  
Eugene Tao Scholarship  
Louise Hess Miller Travel Fund  
Ed Sheehan Scholarship in Journalism  
McNeil Wilson Communications Fund  
Bonnie J. Wiley Memorial Fund  
John Luter Memorial Fund  
F. R. Moulton Memorial Fund  
Sharon Ishida/UH Journalism Alumni Award

### Department of Communicology (formerly speech)

Department of Communicology Service Award  
Joseph Fielding Smith Memorial Award  
Department of Communicology Outstanding Graduate Student Award  
Department of Communicology Outstanding Graduate Teaching Assistant Award

### Department of East Asian Languages and Literatures

The James T. Araki Endowed Scholarship in Japanese Literature  
Mānoa Achievement (tuition) Awards Undergraduate Majors  
Mānoa Achievement (tuition) Scholarship Graduate Division  
Red Mandarin and Lady Yi-suen Shen Tuition Scholarship in Chinese Language

**Department of Economics**

Burnham O. Campbell Dissertation Award in Economics (graduate)  
 Chris Grootaert Scholarship  
 Dolores Ann Sanchez Memorial Fund  
 The Hung Family Fellowship (graduate)  
 Professors Henry M. K. Mok and James Mak Endowed Scholarship (graduate)  
 Seiji Naya Student Awards Fund (graduate)

**Department of English**

Abernethy Scholarship in Creative Writing (graduate)  
 The Academy of American Poets Prize  
 James W. and Eleanor B. Frierson Endowed Scholarship  
 Ernest Hemingway Awards for Undergraduate Poetry and Fiction  
 Red Mandarin and Lady Yi-suen Shen Tuition Scholarship (graduate)  
 Patsy Sumie Saiki Award (short story)  
 Stephen C. Stryker and William H. Stryker Prize For Creative Writing  
 Yun T. Chen Chuan Tu Student Travel Endowment in English

**Department of Ethnic Studies**

Roland Kotani Scholarship  
 Sarah and Francis Sogi Smithsonian/Hawai'i Fellowship Scholarship

**Department of Geography**

Neal M. Bowers Memorial Award  
 Abraham Pi'ianai'a Graduate Scholarship  
 H. J. Wiens Memorial Award (graduate)

**Department of History**

Jerry H. Bentley Endowed Scholarship in World History (graduate)  
 Hung Family Endowed Fellowship (graduate)  
 John F. Kennedy Memorial Fellowship in History (doctorate)  
 Daniel W. Y. Kwok Endowed Fund (graduate)  
 Mānoa Achievement (tuition) Scholarship Graduate Division  
 James M. McCutcheon Memorial Endowed Scholarship for History (graduate)  
 Idus Newby Award (doctorate/junior faculty)  
 Barbara Bennett Peterson Graduate Student Support Fund (graduate)  
 Robert K. Sakai Award for East Asian History (doctorate)  
 Ishi Sakurai Scholarships (undergraduate)

**Department of Indo-Pacific Languages and Literatures**

Samuel H. Elbert Graduate Scholarship  
 Amos P. and Edna Lee Leib Scholarship for Graduate Study of Literature of the Pacific  
 Jack Haven Ward Graduate Scholarship

**Department of Information and Computer Sciences**

Fred and Annie Chan Scholarship

**College of Languages, Linguistics, and Literature**

Hands of Hope Foundation Scholarship

**Department of Languages and Literatures of Europe and the Americas**

(French)  
 Mira Baciú-Simian Memorial Fellowship  
 Anita Hecht Scholarship  
 Betsy Tan Scholarship  
 (Russian and Russian Area Studies)  
 Frederick and Ella Wiswell Scholarships  
 (Spanish)  
 Linda Rudoy Memorial Scholarship

**Library and Information Science Program**

Beta Phi Mu-Xi Chapter Scholarship  
 Robert and Rita Blair Memorial Award  
 Mary Edward Professional Award  
 Friends of the Hilo Library Scholarship  
 Friends of the Library (Hawai'i) Scholarships  
 LIS Professional Award  
 Ralph R. Shaw Memorial Award  
 H. W. Wilson Scholarship

**Department of Mathematics**

Kern-Clark Memorial Award Fund

**Spark M. Matsunaga Institute for Peace and Conflict Resolution**

Jacob Peace Memorial Award (UH system)  
 Nobumoto Tanahashi Peace Scholarship (UH Mānoa)  
 Nobumoto Tanahashi Peace Fellowship (UH Mānoa)

**Department of Music**

Louella Shipwright Buchenau Applied Music Scholarship (piano)  
 Ernest Chang Piano Studio Scholarship (piano)  
 Chancellor Virginia Hinshaw Hawaiian Music Scholarship  
 Chinese Music Scholarship  
 Cooke Chamber Music Endowed Scholarship  
 Cooke Piano Scholarship  
 Beau Gard Dixon Memorial Scholarship (ethnomusicology)  
 Friends of Music at Mānoa Scholarship  
 Reiko Fujimoto Scholarship (voice, piano)  
 Graduate Fellowship in Ethnomusicology  
 Gregory C. Goetz Music Scholarship (music education, choral)  
 Gregg Hagiwara Memorial Scholarship (percussion, gamelan)  
 Fritz Hart Foundation Scholarship (performance or composition)  
 Hawai'i Music Teachers Association Scholarship  
 Heide Student Assistance in Music  
 Honolulu Chinatown Lions Club Piano Scholarship (piano)  
 Honolulu Piano Teacher's Association Scholarship (piano)  
 Geoffrey Lloyd Memorial Scholarship (voice or musicology)  
 Ellen Masaki Endowed Piano Scholarship (piano)  
 Donald Matsumori Music Award (research)  
 Marianne Miyamura Piano Scholarship  
 Mary Fayeweather Montano Scholarship (Hawaiian music)  
 Music Department Scholarships  
 Musical Moments with June Chun Scholarship  
 Aya Noda Piano Scholarship (piano)  
 The Andrew Nyborg Fellowship in Music (graduate)  
 NESTA Obermer Chamber Music Scholarship (string instruments)  
 Orvis Endowed Scholarship (voice)  
 Orvis Vocal Student Grants (voice)  
 William Pfeiffer Memorial Scholarship (voice or ethnomusicology)  
 Presser Foundation Scholarship  
 Ho'oulu Richards Scholarship (hula and Hawaiian chant)  
 Ruth Small Memorial Scholarship (performance)  
 Stephenson Endowed Music Scholarship  
 Allen Trubitt Memorial Fund  
 Peter Coraggio Memorial Scholarship (piano)  
 UH Band Tuition Waivers  
 UH Symphony Orchestra Tuition Waivers  
 Richard Vine Scholarship (voice)

**Department of Philosophy**

David L. Hall Prize (undergraduate)  
 Ashok Kumar Malhotra "Seva" Award (undergraduate or graduate)  
 Uehiro Graduate Student Essay Award in East Asian Philosophy (graduate)  
 Wing-Tsit Chan Graduate Fellowship (graduate)

**Department of Physics and Astronomy**

Vincent Peterson Scholarship

**Department of Political Science**

Harry Friedman Memorial Award  
 Thomas Hale Hamilton Memorial Award  
 Carl Knobloch Award  
 Richard Kosaki Award  
 Norman Meller Award  
 Jorge Fernandes Memorial Fellowship  
 Glendon Schubert and James Neal Schubert Political Science Endowed Scholarship

**Public Administration Program**

Herman S. Doi Fellowship  
 D. William Wood Endowed Scholarship for Pacific Island Health Administrators

**Department of Religion**

Buddhist Studies Scholarship Fund  
Henry Gengo and Riu Wakai Memorial Scholarship

**Department of Second Language Studies**

Carr-Holmes Scholarship  
Craig Chaudron Memorial Fund  
Ruth Crymes Scholarship  
'Oihana Maika'i Fund for Professional Development  
Charlene Sato Memorial Fund

**Department of Sociology**

Gary Sakihara Scholarship (Graduate)  
Bernard Hormann Award (Graduate and Undergraduate)  
Joseph Seldin Travel Award (Graduate)

**Department of Theatre and Dance**

Department of Theatre and Dance Tuition Scholarships in Theatre and Dance

**Department of Urban and Regional Planning**

American Planning Association–Hawai'i Chapter Scholarship  
Kem Lowry Award  
SSFM International Graduate Scholarship in Planning

**Department of Zoology**

Edmondson Fellowships and Research Grants  
E. Alison Kay Scholarships  
Jessie D. Kay Memorial Fellowships

**Shidler College of Business**

Accounting Student Educational Support  
Association of Government Accountants of Hawai'i Endowed Scholarship Fund  
Roland Casamina and House of Finance, Inc. Endowed Scholarship  
T. C. and Angeli Chan Endowed Scholarship Fund  
Chew Jay Family Endowed Scholarship Fund  
Stanley and Sandy Lee Chin Endowed Scholarship Fund  
Dennis Ching Memorial/First Interstate Bank Foundation Program  
The T. N. Ching Scholarship Fund  
The City Mill Company, Ltd./C. K. Ai Foundation Scholarship  
CW Associates, CPAs Scholarship  
Deloitte & Touche Scholarship Endowment Fund

## Endnotes

- <sup>1</sup> The Undergraduate Certificate in Aging and the Advanced Certificate in Gerontology is offered by the Center on Aging.
- <sup>2</sup> The BA in Art is offered with a studio focus or an Art History focus.
- <sup>3</sup> The BS in kinesiology and rehabilitation science is offered in Health, Exercise Science and Lifestyle Management and in Health and Physical Education. The MS in kinesiology and rehabilitation science offers specializations in athletic training (entry level and post professional), physical activity, adapted physical activity, and rehabilitation counseling.
- <sup>4</sup> The MS and PhD in biomedical sciences is offered in tropical medicine.
- <sup>5</sup> The Undergraduate Certificate for Indo-Pacific Languages is offered in Filipino, Hindi, Ilokano, Indonesian, Khmer (Cambodian), Malay, Samoan, Sanskrit, Tahitian, Thai, and Vietnamese.
- <sup>6</sup> The MA and PhD in East Asian Languages and Literatures are offered in Chinese, Japanese, and Korean.
- <sup>7</sup> The MA in Asian Studies has concentrations in Chinese Studies, Japanese Studies, Korean Studies, Philippine Studies, and Southeast Asian Studies.
- <sup>8</sup> The PhD in Education is offered in the following specializations: curriculum and instruction, educational administration, educational foundations, educational policy studies, educational technology, exceptionalities, and kinesiology.
- <sup>9</sup> The BA in Korean in East Asian Languages and Literatures has a concentration in Korean for Professionals.
- <sup>10</sup> Students can receive a BA in interdisciplinary studies in a wide variety of individualized BA programs, including but not restricted to: astronomy, aquaculture, cognitive science, conflict resolution, criminology, developmental disabilities, environmental studies, gerontology, human relations in organizations, international studies, linguistics, peace studies, pre-law, pre-medicine, and pre-physical therapy.
- <sup>11</sup> The BA in Philippine Language and Literature has concentrations in Filipino or Ilokano.
- <sup>12</sup> The Graduate Certificate in Ocean Policy is coordinated by the Department of Geography.
- <sup>13</sup> The BA in interdisciplinary studies for Indo-Pacific languages has several concentrations: Hindi, Indonesian, Khmer (Cambodian), Samoan, Sanskrit, Thai, and Vietnamese.
- <sup>14</sup> A Post-baccalaureate Certificate for Clinical Training in Medical Technology is offered by the School of Medicine.
- <sup>15</sup> A BEd in elementary or secondary education with a major in music is offered in conjunction with the Department of Music and the College of Education.
- <sup>16</sup> The Department of Second Language Studies offers an Advanced Graduate Certificate in Second Language Studies.
- <sup>17</sup> The PhD in social welfare is offered by the School of Social Work.
- <sup>18</sup> The Post-baccalaureate Certificates in Secondary Education and Special Education are undergraduate professional certificates.
- <sup>19</sup> There is no admittance to the BA and BS in Zoology degrees effective Spring 2013.
- <sup>20</sup> The Agribusiness Management Certificate is offered in Tropical Plant and Soil Sciences.
- <sup>21</sup> The Department of Geology and Geophysics offers the Master s in Geology and Geophysics and the Professional Masters in Geoscience.

## Abbreviations Key

### Degrees

BA—bachelor of arts  
 BBA—bachelor of business administration  
 BEd—bachelor of education  
 BEnvD—bachelor of environmental design  
 BFA—bachelor of fine arts  
 BMus—bachelor of music  
 BS—bachelor of science  
 BSW—bachelor of social work  
 DArch—doctor of architecture  
 DNP—doctor of nursing practice  
 DrPH—doctor of public health  
 EdD—doctor of education  
 JD—juris doctor  
 LLM—master of laws  
 MA—master of arts  
 MAcc—master of accounting  
 MBA—master of business administration  
 MD—doctor of medicine

MEd—master of education  
 MEdT—master of education in teaching  
 MFA—master of fine arts  
 MGEO—master of geoscience for professionals  
 MHRM—master of human resource management  
 MLISc—master of library and information science  
 MMus—master of music  
 MPA—master of public administration  
 MPH—master of public health  
 MS—master of science  
 MSW—master of social work  
 MURP—master of urban and regional planning  
 PhD—doctor of philosophy  
 PBCSE—post-baccalaureate certificate in secondary education  
 PBCSPED—post-baccalaureate certificate in special education

### College/School/Unit

A&S—Colleges of Arts and Sciences  
 ARCH—School of Architecture  
 BUS—Shidler College of Business  
 EDUC—College of Education  
 ENGR—College of Engineering  
 SHK—Hawai'i inuiākea School of Hawaiian Knowledge  
 IP—Interdisciplinary Programs  
 LAW—School of Law  
 MED—School of Medicine  
 NURS—School of Nursing and Dental Hygiene  
 SOEST—School of Ocean and Earth Science and Technology  
 SPAS—School of Pacific and Asian Studies  
 SW—School of Social Work  
 TIM—Travel Industry Management  
 CTAHR—College of Tropical Agriculture and Human Resources  
 UED—Office of the Assistant Vice Chancellor for Undergraduate Education

# Campus Policies and Information

## Academic Rights and Freedoms of Students

UH Mānoa, like all state universities, embraces those aspects of academic freedom that guarantee the freedom to teach and the freedom to learn. Free inquiry and free expression for both students and faculty are indispensable and inseparable. Students, whether from the U.S. or from foreign countries, as members of the academic community are encouraged to develop a capacity for critical judgment and to engage in a sustained and independent search for truth.

For its part, UH Mānoa guarantees all students the freedom of silence. No student is required to engage in research on any topic or to make statements of any kind, unless it is the student's wish to do so.

## Student Conduct

It is a privilege to be a member of the UH Mānoa community. This privilege provides the student with the opportunity to learn and participate in the many programs that are offered on campus. Along with that privilege, the individual is expected to be responsible in relationships with others and to respect the special interests of the institution. These special interests are fully set forth in the UH System's Student Conduct Code.

Information, advice, or a copy of the code may be obtained from the Office of Judicial Affairs, Queen Lili'uokalani Center for Student Services 207 or explore [www.studentaffairs.manoa.hawaii.edu/policies/conduct\\_code/](http://www.studentaffairs.manoa.hawaii.edu/policies/conduct_code/).

## Confidentiality Policy for Student Employees

Student employees are governed by policies and procedures stated in APM 9.980. The following is an excerpt from those policies:

Student employees at UH Mānoa may have access to confidential information relating to other students, faculty, and staff and/or pertaining to UH Mānoa in the course of performing their duties and responsibilities as student employees.

Under FERPA, federal law and UH Mānoa policy, educational records are protected from disclosure to third parties unless pursuant to narrow exceptions and that other confidential records must not be disclosed.

As part of their duties and responsibilities, student employees shall maintain the confidentiality of all such records during and after their period(s) of employment at UH Mānoa. They shall not, directly or indirectly, disclose to any person other than their supervisor, or an individual approved by their supervisor, any information concerning such records. Any unauthorized disclosure may be grounds for immediate termination, prohibition of future employment and/or disciplinary action up to and including dismissal from UH Mānoa.

## Academic Integrity

The integrity of a university depends upon academic honesty, which consists of independent learning and research. Academic dishonesty includes cheating and plagiarism. The following are examples of violations of the Student Conduct Code that may result in suspension or expulsion from UH Mānoa.

### Cheating

Cheating includes, but is not limited to, giving unauthorized help during an examination, obtaining unauthorized information about an examination before it is administered, using inappropriate sources of information during an examination, altering the record of any grade, altering an answer after an examination has been submitted, falsifying any official UH Mānoa record, and misrepresenting the facts in order to obtain exemptions from course requirements.

### Plagiarism

Plagiarism includes, but is not limited to, submitting, to satisfy an academic requirement, any document that has been copied in whole or in part from another individual's work without identifying that individual; neglecting to identify as a quotation a documented idea that has not been assimilated into the student's language and style; paraphrasing a passage so closely that the reader is misled as to the source; submitting the same written or oral material in more than one course without obtaining authorization from the instructors involved; and

“dry-labbing,” which includes obtaining and using experimental data from other students without the express consent of the instructor, utilizing experimental data and laboratory write-ups from other sections of the course or from previous terms, and fabricating data to fit the expected results.

### Disciplinary Action

The faculty member must notify the student of the alleged academic misconduct and discuss the incident in question. The faculty member may take academic action against the student as the faculty member deems appropriate. These actions may be appealed through the *Academic Grievance Procedure*, available in the Office of Judicial Affairs. In instances in which the faculty member believes that additional action (i.e., disciplinary sanctions and a UH Mānoa record) should be established, the case should be forwarded to the Office of Judicial Affairs.

### Academic Grievance

A student who believes that a faculty member has failed to meet specific responsibilities outlined in “Responsibilities of Faculty and Students and Academic Grievance Procedures for Students, UH Mānoa” may register a grievance. Students and faculty are encouraged to resolve their differences through consultation and mediation. Where these efforts are ineffective, the policy sets forth the process that is available to the student grievant. The decisions of the Academic Grievance Committee are final within UH Mānoa. Information, advice, or a copy of the relevant policies and procedures may be obtained from the Office of Judicial Affairs, Queen Lili‘uokalani Center for Student Services Center 207 or explore [www.studentaffairs.manoa.hawaii.edu/policies/academic\\_grievance/](http://www.studentaffairs.manoa.hawaii.edu/policies/academic_grievance/).

### Class Attendance

Regular attendance at class and laboratory sessions is expected for all courses in which a student enrolls. Unavoidable absences should be explained to the instructor.

### Excused Student Absences for Official University-Sponsored Events

Faculty members will make all reasonable attempts to accommodate student absences from class due to their participation in a university-sponsored event, such as an intercollegiate athletic competition or academic event at which the student represents his or her department or UH Mānoa.

For regularly-scheduled events, students are to notify instructors within the first two weeks of the semester. For special events or tournaments, students are to notify their instructors as soon as they learn of the anticipated absence. In both cases, students who must miss class for such events will be responsible for completing all assigned work as expeditiously as possible.

### Nondiscrimination Policy

UH Mānoa is an equal opportunity/affirmative action institution and is committed to a policy of nondiscrimination on the basis of race, sex, gender identity and expression, age, religion, color, national origin, ancestry, citizenship, disability, genetic information, marital status, breastfeeding, income assignment for child support, arrest and court record (except as permissible under State law), sexual orientation, national guard absence, status as a covered veteran, and domestic or sexual violence victim status. This policy covers admission and access to, and participation, treatment, and employment in UH Mānoa’s programs, activities, and services. With regard to employment, UH Mānoa is committed to equal opportunity in all personnel actions such as recruitment, hiring, promotion, and compen-

sation. Sexual harassment and other forms of discriminatory harassment are prohibited under UH Mānoa policy.

UH Mānoa strives to promote full realization of equal opportunity through a positive, continuing affirmative action program in compliance with federal Executive Order 11246. The program includes measuring performance against specific annual hiring goals, monitoring progress, and reporting on good faith efforts and results in annual affirmative action plan reports. As a government contractor, UH Mānoa is committed to an affirmative policy of hiring and advancing in employment qualified persons with disabilities and covered veterans. For information on equal opportunity policies or complaint procedures for the UH Mānoa campus, contact:

- **Students:** Lori Ideta, Assistant Vice Chancellor and Dean of Students and Title IX and ADA Coordinator, QLCSS 409, phone (808) 956-3290 (Voice/Text)
- **Students with Disabilities:** Ann Ito, Director, KOKUA Program, QLCSS 013, phone (808) 956-7511 (Voice/Text) or (808) 956-7612 (Voice/Text)
- **Employees (and Affirmative Action Plan):** Mie Watanabe, Director of EEO/AA, Title IX and ADA Coordinator, Administrative Services Building 1, Room 102, phone (808) 956-7077, [www.hawaii.edu/eeo](http://www.hawaii.edu/eeo)
- **Sexual Harassment/Gender Equity:** Jennifer Rose, Gender Equity Counselor, QLCSS 210, phone (808) 956-9977
- **Civil Rights Counselor:** Jill Nunokawa, Civil Rights Counselor, QLCSS 210, phone (808) 956-4431

UH Mānoa recognizes its obligation to provide equal access to programs, services, and activities to students with disabilities. Contact the KOKUA (disabled student services) program for accessibility information and services.

### Gender Equity in Intercollegiate Athletics

Gender equity in athletics extends the doctrine of fairness to all areas of athletic activity at the university level. It is activated by a sense of moral obligation that exceeds any specific duty to comply with legal requirements, although it also recognizes the necessity of observing the tenets of Title IX. Its desired effect is to offer women and men equal opportunities to participate in sports for which there is demonstrated interest among athletes in Hawai‘i and to provide equitable levels of support for coaching, travel, scholarships, operating expenses, and facilities used. Beyond these specific goals, gender equity also fosters an attitude and establishes an environment in which men’s and women’s sports are encouraged in comparable ways. Those who support gender equity are willing to cooperate in frequent self-evaluations and to implement change so that all student-athletes can have the same opportunity to realize the highest level of their abilities.

### Student Records

Pursuant to Section 99.6 of the rules and regulations implementing the Family Educational Rights and Privacy Act of 1974 (hereinafter the Act), students in attendance at UH Mānoa are hereby notified of the following:

1. It is the policy of UH Mānoa to subscribe to the requirements of Section 438 of the General Education Provisions Act, Title IV, of Public Law 90-247, as amended, and to the rules and regulations implementing the Act, which protect the privacy rights of students.
2. The rights of students under the Act include the following, subject to conditions and limitations specified in the Act:
  - (a) the right to inspect and review education records, (b) the

right to request to amend education records, (c) the right of protection from disclosure by UH Mānoa of personally identifiable information contained in education records without permission of the student involved, (d) the right to waive certain rights under the Act, and (e) the right to file complaints concerning alleged failure by UH Mānoa to comply with the Act.

3. Students are advised that institutional policy and procedures required under the Act have been published as Administrative Procedure A7.022, "Procedures Relating to Protection of the Educational Rights and Privacy of Students." Copies of APA7.022 may be obtained from the Office of the Vice Chancellor for Students.
4. Directory Information. Students are advised that certain personally identifiable information is considered by UH Mānoa to be directory information and, in response to public inquiry, may be disclosed in conformance with state law, at UH Mānoa's discretion, without prior consent of the student unless the student requests that UH Mānoa not disclose such information. This includes (a) name of student, (b) current address and ZIP code, (c) telephone number, (d) email address, (e) major field of study, (f) educational level (e.g., freshman, sophomore, etc.), (g) dates of attendance, (h) enrollment status (full-time or part-time), (i) participation in officially recognized activities and sports, (j) weight and height of members of athletic teams, (k) most recent educational institution attended, and (l) degrees and awards received. A student has the right to request that any or all of the above items not be designated directory information with respect to that student. Should a student wish to exercise this right, he or she must in person and in writing, not earlier than the first day of instruction, nor later than 14 calendar days from the first day of instruction for the academic term or semester, or the fourth day of a summer session, inform the campus registrar which of the above items are not to be disclosed without the prior consent of that student.
5. A parent or spouse of a student is advised that information contained in educational records, except as may be determined to be directory information, will not be disclosed to him/her without the prior written consent of the student.

## Student Graduation Rates

### Graduation and Persistence of First-time Full-time Degree-seeking Undergraduates

The information in this graph provides a partial description of the graduation and enrollment patterns of students and describes averages for groups of students. It should not be used to infer or predict individual graduation or enrollment behavior.

This information is provided for the Student Right-to-Know Act, Public Law 101-542 published in the Federal Register, December 1, 1995.

### Residency Requirements for Tuition Purposes

Students who do not qualify on the first day of instruction as bona fide residents of the state of Hawai'i, according to UH Mānoa rules and regulations, must pay the nonresident tuition. An official determination of residency status will be made at the time of application. Applicants may be required to provide documentation to verify residency status. Once classified as a nonresident, a student continues to be so classified during his or her enrollment at UH Mānoa until he or she can present satisfactory evidence to the residency officer that proves otherwise.

### UH Mānoa Graduation and Persistence Rates First-Time, Full-Time, Degree-Seeking Undergraduates

	Fall 2007 Cohort

A pound sign (#) denotes any cohort/subcohort with fewer than ten students.  
This information is provided for the Student Right-to-Know Act, Public Law 101-542. It provides a partial description of the graduation and enrollment patterns of students. It should not be used to infer or predict individual behavior.  
Institutional Research and Analysis Office, University of Hawai'i February 2014

Some of the more pertinent UH Mānoa residency regulations follow. For additional information or clarification, contact the residency officer in the Office of Admissions.

### Definition of Hawai'i Residency

A student is deemed a resident of the state of Hawai'i for *tuition purposes* if the student (19 years old or older) or the student (under 19 years old) and the student's parents or legal guardians have done the following:

1. *Demonstrated intent to establish domicile* in Hawai'i (see below for indicia);
2. Been *physically present in Hawai'i* for 12 consecutive months prior to the first day of instruction and subsequent to the demonstration of intent to establish domicile in Hawai'i; and
3. The student, whether adult or minor, *has not been claimed as a dependent for tax purposes* for at least 12 consecutive months prior to the first day of instruction by his or her parents or legal guardians who are not residents of Hawai'i.

To demonstrate the intent to make Hawai'i a person's domicile, the following indicia apply, but no single act is sufficient to establish residency for tuition purposes:

1. Filing Hawai'i resident personal income tax return;
2. Voting/registering to vote in the state of Hawai'i; and
3. Other indicia, such as permanent employment and ownership or continuous leasing of a dwelling in Hawai'i.

### Other Legal Factors

Other legal factors involved in making a residency determination include the following:

1. The age of majority is 18 years. However, a person between the ages of 18 and 19, unless emancipated, cannot claim residency solely on the basis of himself or herself because he or she does not have the minimum 12 months residency, which commences on his or her 18th birthday. Therefore, the applicant must claim a portion of the required 12 months on the basis of his or her parents or legal guardian;
2. The 12 months of continuous residence in Hawai'i shall begin on the date upon which the first overt action (see indicia above) is taken to make Hawai'i one's domicile. Residency status will be lost if it is interrupted during the 12 months immediately preceding the first day of instruction;

3. Residency in Hawai'i and residency in another place cannot be held simultaneously;
4. Presence in Hawai'i primarily to attend an institution of higher learning does not create resident status, regardless of the length of stay. A student cannot establish residency by simply being enrolled in school. If a student is a nonresident, it is presumed that he or she is living in Hawai'i primarily to attend school and his or her presence is temporary even if the student lives in Hawai'i during vacation and other breaks from study. For example, the student may be presumed to live in Hawai'i primarily to attend school if he or she is enrolled in school half-time or more, appears to be receiving significant financial support from family members who reside outside Hawai'i, is absent from the state for more than 30 days per year during school vacation period, or receives student financial assistance based on residency in another state or jurisdiction;
5. The residency of unmarried students who are minors follows that of the parents or legal guardian. Marriage emancipates a minor;
6. Resident status, once acquired, will be lost by future voluntary action of the resident inconsistent with such status. However, Hawai'i residency will not be lost solely because of absence from the state while a member of the U.S. Armed Forces, while engaged in navigation, or while a student at any institution of learning.

### Exemptions

Nonresidents may be allowed to pay resident tuition if they qualify as one of the following:

1. U.S. military personnel and their authorized dependents (as defined by the armed services) during the period such personnel are stationed in Hawai'i on active duty;
2. Members of the Hawai'i National Guard or Hawai'i-based Reserves;
3. Full-time employees of UH Mānoa and their spouses and legal dependents (as defined under Internal Revenue Service rules);
4. East-West Center student grantees pursuing baccalaureate or advanced degrees; or
5. Hawaiians, descendants of the aboriginal peoples that inhabited the Hawaiian Islands and exercised sovereignty in the Hawaiian Islands in 1778.

Citizens of an eligible Hawai'i Pacific island district, commonwealth, territory, or insular jurisdiction, state, or nation which does not provide public institutions that grant baccalaureate degrees may be allowed to pay 150% of the resident tuition. These currently include the following: American Samoa, Commonwealth of the Northern Marianas, Cook Islands, Federated States of Micronesia, Futuna, Kiribati, Nauru, New Caledonia, Niue, Republic of Palau, Republic of Marshall Islands, Solomon Islands, Tokelau, Tonga, Tuvalu, Vanuatu, and Wallis.

### Misrepresentation

A student or prospective student who provides incorrect information on any form or document intended for use in determining residency status for tuition purposes will be subject to the requirements and/or disciplinary measures provided for in the rules and regulations governing residency status.

### Appeal Process

Residency decisions may be appealed. Contact the residency officer for information on how to initiate an appeal before the Committee on Resident Status.

### Compliance with Federal Guidelines Concerning Research

There are a number of offices and committees at UH Mānoa that play key roles in overseeing and developing policy for various aspects of the research process. Federal, state, and UH Mānoa regulations require that certain proposed research projects are reviewed and approved to ensure that the proposed research complies with protective standards.

UH Mānoa students who intend to conduct the following types of research should check with their respective academic offices and the committees and office below for guidance and information pertaining to their research project.

1. Research funded by non-UH Mānoa funds.
2. Research sponsored by UH Mānoa.
3. Research conducted by or under the direction of any employee or agent of UH Mānoa in connection with his or her institutional responsibilities.
4. Research conducted by or under the direction of any employee or agent of this institution using any property or facility of this institution.
5. Research involving the use of UH Mānoa's non-public information to conduct research or identify research subjects.

General information regarding standards applicable to research activities can be obtained from the Office of Research Services, 2425 Campus Road, Sinclair Library Room 1, Honolulu, HI 96822, (808) 956-8658 or visit their website at [www.ors.hawaii.edu/](http://www.ors.hawaii.edu/).

### Institutional Animal Care and Use Committee

UH Mānoa employees and students who intend to conduct research involving nonhuman, vertebrate animals are required to submit an application to the Institutional Animal Care and Use Committee (IACUC) for review and approval prior to any such use of animals. Applications and information may be obtained from the Animal and Veterinary Service Program or visit the website at [www.hawaii.edu/LAS](http://www.hawaii.edu/LAS). Students should check with their departments or course instructors for further guidance.

### Human Studies Program

UH Mānoa employees and students who will conduct research involving human subjects are required to submit an application to the Human Studies Program for review and approval prior to the involvement of human subjects in the research project. This includes biomedical, behavioral, humanities, and social science projects whether funded or not. Applications and information may be obtained from the Human Studies Program at [www.hawaii.edu/irb](http://www.hawaii.edu/irb) or by calling (808) 956-5007. Students also should check with their departments or course instructors for further guidance.

### Environmental Health and Safety Office

Employees and students whose research projects may involve radioactive materials, SCUBA diving, or hazardous materials should contact the Environmental Health and Safety Office at (808) 956-8660 or visit their website at [www.hawaii.edu/ehso](http://www.hawaii.edu/ehso) for information and guidance. For more details, go to the "Instructional Support and Research Units" section.

environmental design problems that often have competing economic, social, and political parameters. The profession of architecture attracts those who have a wide range of interests and skills and wish to make a unique contribution to society.

### **Vision: Global Connections**

The School of Architecture inspires transformative design at the global scale with preeminence in the Asia-Pacific region.

### **Mission Statement: Building for the 21st Century**

The School of Architecture responds to our unique location in the Asia-Pacific region and recognizes the privilege and responsibility to address cultural, environmental, and social diversity. We commit to passionate and engaging community participation through teaching, learning, research, professional practice, and service.

### **Accreditation Notice**

*In the U.S., most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.*

*Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.*

The School of Architecture offers the following NAAB-accredited degree program:

#### **Doctor of Architecture**

- Track I: (preprofessional degree in architecture [126/120 credits] + 90 graduate credits)
- Track II: (non-professional degree [120 credits min.] + 108 graduate credits)

Next accreditation visit: 2018

### **Admissions Overview**

All applicants for admission to the school must complete a UH System Application Form by the stated deadline for the semester in which initial enrollment is sought. For information on the application process, see [arch.hawaii.edu/admissions](http://arch.hawaii.edu/admissions).

Acceptance to UH Mānoa and the school is based on various criteria, including previous academic performance, types of courses previously taken, and the quality of prior experiences.

### **Placement**

The Office of Admissions will complete an undergraduate transfer credit evaluation for prior completed post-secondary level coursework or approved Advanced Placement (AP) high school coursework. The School of Architecture will complete a transfer credit evaluation for prior completed post-secondary level coursework taken in architecture or related subjects after an applicant is accepted by UH Mānoa. Architecture course requirements will be waived only for transfer credits that are

deemed equivalent to courses offered by the school. No graduate credit is transferable to the DArch degree, if it has been counted for another graduate degree.

Students entering the pre-professional undergraduate program directly from high school may potentially complete the program in four years of full-time study. The time to complete the program by transfer students is based on a case-by-case evaluation of transfer credit.

Students entering the program holding a baccalaureate degree in a field unrelated to architecture enter the 108 credit professional DArch program. They may complete the program in approximately three or four years of full-time study dependent on evaluation of previous coursework of undergraduate equivalence.

Students entering the program holding a four-year pre-professional baccalaureate degree (e.g., BS architecture studies, BA architecture studies, BA environmental design) enter the 90 credit professional DArch program. Evaluation of previous coursework on a case by case basis is also undertaken for undergraduate equivalence.

### **Application Procedures**

#### **Undergraduate Application Procedures**

All applicants for admission to the pre-professional undergraduate bachelor degree must complete a UH System Application at [www.manoa.hawaii.edu/apply/](http://www.manoa.hawaii.edu/apply/).

#### **Graduate Application Procedures**

All applicants for admissions to the professional program (DArch) must hold a baccalaureate degree or higher and must apply online at our school's website at [www.arch.hawaii.edu](http://www.arch.hawaii.edu) using a UH Mānoa systems application. Applicants must also submit a School of Architecture Supplemental Information for Admission form and the required documents by the stated deadline directly to the School of Architecture.

We encourage you to visit the UH Mānoa campus and the School of Architecture. Please contact our student services office to arrange appointments or tours of the school.

### **Application Deadlines**

#### **Undergraduate Application Deadlines**

Fall priority deadline is **January 5** and final deadline is **March 1**. Spring priority deadline is **September 1** and final deadline is **October 1**.

## Graduate Application Deadline

Fall priority deadline is **January 5** and final deadline is **March 1**. Spring priority deadline is **September 1** and final deadline is **October 1**.

The School Admissions Committee reviews completed applications in the order in which they are received. Early application is therefore advisable. All required application materials listed above must be received by the above listed deadlines to be eligible for consideration for admission. Applicants should advise the school immediately of any changes of address. The school assumes no responsibility for missed deadlines resulting from a failure to notify the school of a change of address.

## Deferred Admission

The school and UH Mānoa do not grant deferred admission. Applicants wishing to defer admission must reapply to UH Mānoa and the school.

## Ownership of Supplemental Documents

Supplemental documents submitted by applicants become the property of the school and will not be retained after the admissions decisions of the School of Architecture have been made.

## Advising

Informal academic advising may be requested by prospective students by contacting the school's Student Services Office. Students who have been accepted to the school should contact the Student Services Office for information regarding orientation and required advising before registration.

## Program Requirements

Students enrolled in the pre-professional Bachelor of Environmental Design (BEnvD) must meet UH Mānoa General Education Core Requirements and maintain UH Mānoa academic standards. Enrolled students wishing to enter the 90 credit professional DArch program must maintain a minimum 3.0 GPA at the graduate level and successfully complete a portfolio review process before taking any graduate coursework.

Students in the 108 credit professional DArch program must attain a minimum cumulative GPA of 3.0 at the graduate level and make reasonable academic progress. All graduate students whose cumulative GPA falls below 3.0 are placed on academic probation. Upon completion of the probationary semester if the cumulative GPA is not raised to 3.0, or if special conditions established by the dean are not met, the student may be dismissed or suspended from the program.

## Undergraduate Program

### Bachelor of Environmental Design (BEnvD)

The pre-professional 4-year undergraduate degree program at UH Mānoa, the Bachelor of Environmental Design (BEnvD), emphasizes the interdisciplinary nature of architecture and provides a liberal arts and sciences education that takes full advantage of the greater university setting. An entering undergraduate student interested in architecture may choose from one of the six undergraduate concentrations leading to the BEnvD; construction management, historic preservation, interior design, landscape design, urban design, and architecture design. Each of these concentrations requires a minimum of 45 semester hours of general (non-architecture) studies.

## Graduate Program

### Doctor of Architecture (D.Arch.)

The School of Architecture offers the only NAAB accredited Doctor of Architecture degree. The primary activities in the D.Arch. program include: Framing architectural inquiries within social, cultural, and interdisciplinary studies with emphasis on Asia and the Pacific; investigating local/global relations evidenced in theory and practice with an emphasis on the quality of the built and natural environment; critically testing and expanding the definitions of, and relationships between the academy and the profession; using research as a basis for the grounding of design and as a primary means to expand knowledge in the discipline; and participating with local and international partners in applied design research and community.

### Global Track/China Focus

In partnership with Tongji University College of Architecture and Urban Planning (Shanghai, China), the UH Mānoa School of Architecture has implemented a Global Track/China Focus as a part of its Doctor of Architecture degree. Students who successfully complete this track will have the option to obtain Tongji University's College of Architecture and Urban Planning NBAA accredited Masters of Architecture degree along with the School of Architecture NAAB accredited Doctor of Architecture degree. Nowhere else in the world can a student enroll in a single track and graduate with two accredited architecture degrees from the world's two largest construction economies.

### Special Requirements

All students are required to have their own personal computer for completion of required coursework. A laptop computer is strongly recommended. Software may be required to be purchased by students for the successful completion of courses and to use the school's advanced graphic and digital fabrication equipment.

### Additional Information

For information about the school or degree programs, contact the Student Services Office.

For information regarding student loans and scholarships, contact the Financial Aid Services Office.

### Professional Fee

All school students are assessed a professional fee each semester at the time tuition is paid. The professional fee for the 2014-2015 academic year is \$500 per semester.

### Other Requirements

Waiver or substitution of any required course must be approved by the appropriate undergraduate or graduate chair.

### Executive Education Program: Global [EX:ED]

The Executive Education Program at the School of Architecture connects the world's industry leaders with the most distinguished award-winning architects and experts together at the midway between Asia and North America. This program is an exceptional opportunity for talented architects and leaders to gain new insights toward sustainability, cultural and political factors that significantly impact the architecture field. It also creates a high speed rail for top level collaborations among the

highest level respected participants to succeed in today's highly competitive marketplace.

### Alternative Campus of the Future Research Group

The Alternative Campus of the Future Research Group has been established since August 2008. Students and faculty affiliated with the Hawai'i Research Center for Futures Studies, and students and faculty affiliated with the School of Architecture of UH Mānoa have been engaged in a project called "Campuses 2060." The project explores the history, present situation, and alternative futures of institutions of higher education worldwide according to the overall "future" these institutions find themselves in, and the specific mission, participants, resources, pedagogy, and physical campus that they develop in response to each future. There have been three public presentations of their ongoing work so far. While the initial focus has been on UH Mānoa, it is the intention of the project, still ongoing, to become a global resource for ideas and information about the futures of higher education anywhere.

### Environmental Research & Design Lab

The Environmental Research and Design Laboratory, an inter-disciplinary research laboratory located in the School of Architecture, was formed to advance sustainable design through research, education, and community outreach, with the aim of improving the dynamic interaction among the built, natural, and human environments. The laboratory not only directly supports the teaching mission of the school, but regularly provides exceptional research and design assistance to the university, the local community, the State of Hawai'i, and the greater professional community. The lab, which supports student assistantships, has undertaken evaluation of the classroom space and energy audit throughout the campus and the Design Futures Lab has participated in long range planning for the university.

### Heritage Center

The Heritage Center of the School of Architecture promotes the preservation of cultural and architectural heritage in Hawai'i and the Asia-Pacific Region by providing expertise, research, documentation, and training opportunities; by disseminating heritage information to the general public; and by increasing interaction and cooperation on heritage issues within the Asia-Pacific area between government agencies, non-profits, and the general public. The Heritage Center wrote the Getty-funded Campus Heritage Plan for the Chancellor's Office and designed the HUD-funded Ka Papa Loi o Kanewai Community Center for the School of Hawaiian Knowledge.

### Student Organizations

The school houses a chapter of the American Institute of Architecture Students (AIAS). The organization engages in a number of social and community service activities and has won numerous national awards.

The Gamma Mu Chapter of the Tau Sigma Delta Honor Society is open to DArch students who maintain a 3.0 or higher GPA and are at the top twenty percent of their class at the end of year two.

### Scholarships and Awards

ARCC King Student Medal for Excellence in Architectural + Environmental Design Research

Alpha Rho Chi Medal, National Professional Architectural Fraternity Award

Henry Adams Medal, American Institute of Architects Award

Henry Adams Certificate, American Institute of Architects Award

Bergum Scholarship

Gilman Hu Honolulu Chapter CSI Endowed Scholarship

Allen R. Johnson-Roy C. Kelley Architectural Research Travel Scholarship

Construction Specifications Institute Scholarship Fund

HonBlue Architectural Grant

American Institute of Architects Honolulu Chapter Scholarship

School of Architecture Alumni Association Scholarship

R. Richard Morris Memorial Scholarship

School of Architecture Practicum Fund

Barry John Baker Scholarship

Donald G. Deer Memorial Scholarship

Leighton Liu Scholarship

# Degrees, Minors, and Certificates

The Colleges of Arts and Sciences offer undergraduate and graduate degrees, minors, and certificate programs in the following areas. Changes in programs and degrees approved after December 2013 may not be reflected in this listing.

Field	Degree or Certificate
American Studies (p. 96)	Min, BA, MA, PhD
Anthropology (p. 98)	Min, BA, MA, PhD
Art and Art History (p. 101)	Min, BA, BFA, MA, MFA
Astronomy (p. 103)	MS, PhD
Biology (p. 105)	Min, BA, BS
Botany (p. 107)	Min, BA, BS, MS <sup>1</sup> , PhD <sup>1</sup>
Burmese (p. 128)	U Cert <sup>6</sup>
Chemistry (p. 110)	Min, BA, BS, MS, PhD
Chinese (p. 115)	U Cert, Min, BA, MA <sup>2</sup> , PhD <sup>2</sup>
Classics (p. 134)	U Cert, BA
Clinical Psychology (p. 156)	G Cert
Communication (p. 111)	BA, MA, G Cert, PhD
Communicology (formerly Speech) (p. 113)	Min, BA, MA
Computer Science (p. 130)	Min, BS, MS, PhD
Conflict Resolution (p. 148)	G Cert
Creative Media (p. 95)	BA
Dance (p. 168)	Min, BA, BFA, MA, MFA
Disaster Management and Humanitarian Assistance (p. 172)	G Cert
East Asian Languages and Literatures (p. 115)	MA <sup>2</sup> , PhD <sup>2</sup>
Economics (p. 116)	U Cert, Min, BA, MA, PhD
English (p. 120)	Min, BA, MA, PhD
English as a Second Language (p. 161)	BA <sup>4</sup> , MA, PhD
Environmental Studies (p. 123)	U Cert, BA <sup>4</sup>
Ethnic Studies (p. 124)	U Cert, BA
Ethnobotany (p. 107)	BS
Filipino (p. 128)	U Cert <sup>6</sup> , Min, BA <sup>7</sup>
French (p. 134)	U Cert, BA, MA <sup>3</sup>
Geography (p. 125)	Min, BA, G Cert., MA, PhD
German (p. 134)	U Cert, BA
Hindi (p. 128)	U Cert <sup>6</sup> , BA <sup>5</sup>
Historic Preservation (p. 98)	G Cert
History (p. 127)	Min, BA, MA, PhD
Ilokano (p. 128)	U Cert <sup>6</sup> , Min, BA <sup>7</sup>
Indonesian (p. 128)	U Cert <sup>6</sup> , BA <sup>5</sup>
Indo-Pacific Languages (p. 128)	U Cert <sup>6</sup> , BA <sup>5</sup>
Information and Computer Sciences (p. 130)	BA
Islamic Studies (p. 101, 127, 150, 160)	U Cert
Japanese (p. 115)	U Cert, Min, BA, MA <sup>2</sup> , PhD <sup>2</sup>
Journalism (p. 134)	BA
Khmer (Cambodian) (p. 128)	U Cert
Korean (p. 115)	U Cert, Min, BA <sup>9</sup> , MA <sup>2</sup> , PhD <sup>2</sup>

- 1 The MS and PhD in botanical sciences are offered in botany.
- 2 The MA and PhD in East Asian languages and literatures are offered in Chinese, Japanese, and Korean.
- 3 The MA in Languages and Literatures of Europe and the Americas is offered in French and Spanish.
- 4 Students can receive a BA in interdisciplinary studies in environmental studies, European cultural studies, Indo-Pacific languages, linguistics, and peace studies. In addition, students can design their own majors utilizing this program.
- 5 The BA in interdisciplinary studies for Indo-Pacific languages has several concentrations: Hindi, Indonesian, Samoan, Sanskrit, Thai, and Vietnamese.
- 6 The Certificate in Indo-Pacific Languages is offered in Burmese, Filipino, Hindi, Ilokano, Indonesian, Khmer, Samoan, Sanskrit, Tahitian, Thai, and Vietnamese.
- 7 BA in Philippine Language and Literature with concentration in Filipino or Ilokano
- 8 The Department of Geography coordinates the Graduate Certificate in Ocean Policy.
- 9 The BA in Korean in East Asian Languages and Literatures has a concentration in Korean for Professionals.
- 10 There is no admittance to the BA and BS in Zoology degrees effective Spring 2013.

Field	Degree or Certificate
Languages and Literatures of Europe and the Americas (p. 134)	MA <sup>3</sup>
Latin America and Iberian Studies (p. 134)	U Cert
Law and Society (p. 89)	U Cert
Library and Information Science (p. 136)	G Cert, MLISc
Linguistics (p. 138)	BA <sup>4</sup> , MA, PhD
Marine Biology (p. 104)	BS, MS <sup>11</sup> , PhD <sup>11</sup>
Marine Option Program (p. 90)	U Cert
Mathematical Biology (p. 105, 140)	U Cert
Mathematics (p. 140)	Min, BA, BS, MA, PhD
Microbiology (p. 142)	Min, BA, BS, MS, PhD
Molecular Cell Biology (p. 142)	BS
Museum Studies (p. 98)	G Cert
Music (p. 144)	U Cert, Min, BA, BEd, BMus, MA, MMus, PhD
Ocean Policy (p. 125)	G Cert <sup>8</sup>
Peace Studies (p. 148)	U Cert, BA <sup>4</sup> , G Cert
Philosophy (p. 150)	Min, BA, MA, PhD
Philippine Language and Literature (p. 128)	BA
Physics (p. 152)	Min, BA, BS, MS, PhD
Planning Studies (p. 172)	G Cert
Political Science (p. 154)	Min, BA, MA, PhD
Psychology (p. 156)	BA, BS, MA, PhD
Public Administration (p. 158)	G Cert, MPA
Public Policy (p. 159)	G Cert
Religion (p. 160)	Min, BA, MA
Russian (p. 134)	U Cert, BA
Russian Area Studies (p. 161)	U Cert
Samoan (p. 128)	U Cert <sup>6</sup> , BA <sup>5</sup>
Sanskrit (p. 128)	U Cert <sup>6</sup> , BA <sup>5</sup>
Second Language Studies (p. 162)	BA, MA, G Cert, PhD
Social Sciences & Health (p. 116, 154, 166)	U Cert
Sociology (p. 166)	Min, BA, MA, G Cert, PhD
Spanish (p. 134)	U Cert, BA, MA <sup>3</sup>
Tahitian (p. 128)	U Cert <sup>6</sup>
Telecommunications Information Resource Management (p. 111)	G Cert
Thai (p. 128)	U Cert <sup>6</sup> , BA <sup>5</sup>
Theatre (p. 168)	Min, BA, MA, MFA, PhD
Urban and Regional Planning (p. 172)	G Cert, MURP, PhD
Vietnamese (p. 128)	U Cert <sup>6</sup> , BA <sup>5</sup>
Women's Studies (p. 175)	U Cert, BA, G Cert
Zoology (p. 178)	Min, BA <sup>10</sup> , BS <sup>10</sup> , MS, PhD

11. The MS and PhD in marine biology are offered in the Marine Biology Graduate Program (College of Natural Science/SOEST).

BA—bachelor of arts  
 BFA—bachelor of fine arts  
 BMus—bachelor of music  
 BS—bachelor of science  
 G Cert—graduate certificate  
 MA—master of arts  
 MFA—master of fine arts  
 Min—minor  
 MLISc—master of library and information science  
 MMus—master of music  
 MPA—master of public administration  
 MS—master of science  
 MURP—master of urban and regional planning  
 PhD—doctor of philosophy  
 U Cert—undergraduate certificate

Dean: Denise E. Konan  
Interim Associate Dean: Ross A. Sutherland

Departments, schools, and programs: Anthropology, Communications, Economics, Ethnic Studies, Geography, Journalism, Peace Studies, Political Science, Psychology, Public

Administration, Public Policy Center, Social Science Research Institute, Sociology, Urban and Regional Planning, Women's Studies

# General Information

The Colleges of Arts and Sciences (A&S) are comprised of four colleges that offer an integrated curriculum leading to baccalaureate and graduate degrees, minors, and certificates in their respective colleges. Each college includes an administrative unit and a number of academic departments and programs.

An excellent education is the primary mission of UH Mānoa, and the Colleges of Arts and Sciences is at the heart of this mission, providing students with a comprehensive learning experience in a vibrant academic climate.

UH Mānoa undergraduates take many of their first UH Mānoa courses in the Colleges of Arts and Sciences as they undertake the General Education Core curriculum that is part of all the bachelor degrees offered on the campus. This liberal arts curriculum stresses the integration of knowledge to enhance students' understanding of life, the human condition, and the world in which we live. The core curriculum also entails critical thinking, which enables students to evaluate arguments, ideas, and theories, and to develop creative and meaningful applications of what they learn. The core gives students the tools of inquiry, enabling them first to identify important questions and then to seek, analyze, and interpret possible answers to issues of their lives, world, and universe. The curriculum also provides opportunities to develop students' artistic and creative imaginations and their oral and written communication skills so that they can effectively present their ideas, thoughts, and feelings. Since values guide human actions, the core curriculum allows students to examine their own values and learn about those of others in order to help the students understand themselves and others around the world.

Students who earn their degrees in one of the Colleges of Arts and Sciences will find that the programs of the colleges are designed with the conviction that, beyond the core curriculum, liberally educated persons should have both broad exposure to and an intensive knowledge of at least one field of the arts, the humanities, the languages, the natural sciences, or the social sciences. An ideal education, based in the liberal arts, prepares students for productive lives and careers, enlightened citizenship, and lifelong learning. The colleges strive to enhance excellent learning opportunities by promoting active student participation.

## Accreditations and Affiliations

All academic programs are reviewed and evaluated regularly by campus and external faculty committees. Some academic programs, because of the nature of the discipline, are accredited or certified also by national organizations. Check with individual academic departments and programs for their accreditation status or affiliation with national or international organizations.

## Degrees, Minors and Certificates

For a listing of the degrees, minors, and certificates offered by the Colleges of Arts and Sciences, see table on p. 88.

**Bachelor's Degrees:** Bachelor of Arts (BA), Bachelor of Fine Arts (BFA), Bachelor of Music (BMus), Bachelor of Science (BS)

**Master's Degrees:** Master of Arts (MA), Master of Fine Arts (MFA), Master of Library and Information Science (MLISc), Master of Music (MMus), Master of Public Administration (MPA), Master of Science (MS), Master of Urban and Regional Planning (MURP)

**Doctoral Degrees:** Doctor of Philosophy (PhD) degrees in various disciplines

## Certificate Programs

In addition to the major concentrations that are part of every bachelor's degree, students may choose to pursue a certificate in an area of personal interest. Certificates signify that a student has completed a defined body of work in a particular department or program. Certificates can be conferred as soon as the student completes the program's requirements. The right to confer certificates has been granted to certain programs and departments by the Board of Regents; some certificates are only for graduate students. Certificates entail a minimum of 15 credit hours of non-introductory course work (including all upper division courses and those at the 200 level that have college-level course prerequisites), completed with a grade of C (not C-) or better and an overall GPA of 2.5 or better for those courses. Information on specific certificates can be obtained from the appropriate department or program office. See page 88 for a complete listing of certificate programs offered by the Colleges of Arts and Sciences.

## Marine Option Program

The Marine Option Program (MOP) is a unique opportunity for undergraduates with an interest in the ocean. It is open to students in all fields and provides a clearinghouse for marine-oriented experiential education as well as a chance for students with common interests to meet. MOP sponsors a wide variety of marine activities, including field trips, workshops, seminars, symposia, and noncredit courses.

A certificate is awarded to undergraduates who successfully complete at least 12 credit hours of marine-related courses (including OCN 201, ORE 202, ZOOL 200, or an equivalent survey course; one 3-credit interdisciplinary ocean course; 6 credit hours of marine electives). In addition, students must complete the MOP Seminar (IS 100/BIOL 104) followed by the MOP skill project. The unique MOP skill project (worth 3 or more credits, e.g. IS 400/BIOL 400) allows students to design and conduct a personal marine or aquatic project related to their educational goals. Past projects have run from scientific research to endeavors in the arts. Classified and unclassified graduate students are also eligible to enroll in MOP and earn a certificate.

Students interested in MOP or in marine careers and curricula should visit the Marine Option Program offices in Dean Hall, room 105A; tel. (808) 956-8433; Email [manoamop@hawaii.edu](mailto:manoamop@hawaii.edu); [www.hawaii.edu/mop/](http://www.hawaii.edu/mop/); Facebook ID: [uhm mop](#).

Fax: (808) 956-9796

Web: [www.advising.hawaii.edu/artsci/](http://www.advising.hawaii.edu/artsci/)

Within the context of a liberal arts education, the Colleges of Arts and Sciences Student Academic Services (CASSAS) assist students to clarify their life and career goals, develop meaningful educational plans, and prepare for productive lives, enlightened citizenship, and life-long learning.

Students at UH Mānoa have an exceptional amount of freedom in crafting their college experience. Students are able to explore connections between fields, engage in co-curricular activities, and develop unique combinations of majors, minors, and certificates. Students are expected to be active partners in the advising process by initiating contact with both their major department and CASSAS and should come to all advising sessions prepared.

CASSAS has developed learning outcomes for Arts and Sciences majors based on current programs and services. The level of achievement for each of these outcomes becomes increasingly more complex throughout a student's college career. As an active participant in the CASSAS advising partnership:

- Throughout their academic career, students can identify and explain their interests, strengths, values, and career/life goals.
- Students can develop and implement an academic and educational plan.
- Students understand how the A&S degree prepares them for success in their personal, academic, and professional lives.

Besides meeting all mandatory advising initiatives required by their major departments, declared Arts and Sciences majors can meet with their college advisors for clarification of degree requirements and for resolution of complex academic issues and individual concerns throughout their career at UH Mānoa.

## Incoming Students and Freshmen

Through group advising at New Student Orientation and individual appointments during their first year, new students will have the opportunity to begin the educational planning process with CASSAS advisors. Freshmen should also meet with an advisor in their major department (see department listing).

## Sophomores

Sophomores should continue to seek the advice of both major and college-level advisors in order to clarify their goals, interests, and strengths. Students should reflect upon their academic and co-curricular activities to ensure that they have chosen the appropriate major and are making progress toward graduation. The educational planning begun in their first year should continue and, if possible, include curricular and co-curricular courses and events established on a timeline.

## Juniors

Juniors should research the prerequisites for their future academic and/or professional lives (i.e., application materials, essential skills). Juniors should prepare for graduation by filing

for graduation and creating an educational plan that reflects remaining course work and activities applicable toward their degree and future goals.

## Seniors

Seniors should refine their educational plan to account for all academic and co-curricular components necessary for graduation. Students should be able to reflect on the meaning of their undergraduate education in the context of their goals, interests and strengths. Seniors should use this understanding to identify and take concrete steps towards planning for post-graduation life.

## Undergraduate Programs

The Colleges of Arts and Sciences offer Bachelor of Arts (BA), Bachelor of Fine Arts (BFA), Bachelor of Music (BMus), and Bachelor of Science (BS) degrees in 52 different majors. In addition, the Colleges of Arts and Sciences offer 27 minors and 33 different certificates. Detailed program information is available at the Student Academic Services office (QLCSS 113) or at [www.advising.hawaii.edu/artsci](http://www.advising.hawaii.edu/artsci).

During their first year at UH Mānoa, A&S students should meet with their college and major advisors to discuss their educational plans.

Students interested in an A&S major should declare their major at least by the end of their sophomore year by submitting a Declaration of Major form to the A&S Student Academic Services office. Some majors, such as those in the performing arts and the sciences, should be declared as soon as possible, preferably during the freshman year, because they require courses that must be taken in a specific order. Information on specific majors, minors, and certificates is available through the respective academic departments and their websites.

## Admission Requirements

Admission requirements for the Colleges of Arts and Sciences are the same as those for UH Mānoa.

Some majors, however, have specific admission requirements (see departments' sections).

## Steps to Graduation

1. **Complete the four requirement areas for undergraduate degrees** as described in the following section and remain in good academic standing (see "UH Mānoa Graduation Requirements" under "GPA").
2. **File for graduation one to two semesters in advance** by completing an Online Grad session available on the CASSAS website.
3. **Pay the UH Mānoa diploma fee** in order to receive a diploma.

## Requirements for Undergraduate Degrees from the Colleges of Arts and Sciences

A&S degrees and a liberal arts education offer a broad-based and integrated perspective on the world and human experiences; better self-understanding; societal, civic, and global knowledge; an independent and inquiring mind; a desire and capacity for life-long learning; and valuable transferable skills.

Students are encouraged to explore connections between disciplinary fields, engage in co-curricular activities, and develop unique combinations of majors, minors, certificates, and electives.

A&S students must fulfill the following four requirement areas: UH Mānoa General Education Core, UH Mānoa Graduation, A&S Degree, and A&S Major. Students should refer to their respective "Program Requirement Sheets" on the CASSAS website to assist them in selecting courses that incorporate UH Mānoa General Education requirements with A&S requirements.

### UH Mānoa General Education Core Requirements

A&S students must fulfill the UH Mānoa General Education Core, which consists of **Foundations** and **Diversification** requirements. Some of the courses that fulfill these Core requirements may be double dipped with other requirements (see "General Education").

The minimum course grade to fulfill Core requirements is a D (not D-). These requirements must be taken for a letter grade, unless the course is offered only with the CR/NC grade option.

### UH Mānoa Graduation Requirements

A&S students must fulfill the UH Mānoa Graduation requirements, which consist of **Focus** and **Hawaiian or Second Language** (HSL), **credit**, and **grade point average** (GPA) requirements (see "General Education" and "Undergraduate Education").

The minimum course grade to fulfill Focus and HSL requirements is a D (not D-). These requirements must be taken for a letter grade, unless the course is offered only with the CR/NC grade option.

BMus students concentrating in voice may fulfill the HSL requirement by completing the first year of study in two languages. This substitution must be approved by the department chair. All other A&S students must meet the stated HSL requirement.

### Credits

- Students must earn a minimum of 120 total applicable credits, of which 45 credits must be upper division (300-level and above) and at least 30 credits must be completed in residence at UH Mānoa. Natural Sciences majors should contact CASSAS for exceptions to the upper division credit limit.
- Students must complete their academic work and apply for a degree in a timely manner (see "Excess Credit Policy").

## REQUIREMENTS THAT MAY BE DOUBLE-DIPPED

This double-dip chart applies only to A&S degrees/majors on a 2002-2003 core year or later.

/Requirements	Foundations	Diversification	Hawaiian or Second Language	Focus	Major*	Second Major*	Minor	Certificate
Foundations	--	NO	NO	NO	YES	YES	NO	NO
Diversification	NO	--	NO	YES	YES	YES	NO	NO
Hawaiian/Second Language	NO	NO	--	YES	NO	NO	NO	NO
Focus	NO	YES	YES	--	YES	YES	YES	YES
Major*	YES	YES	NO	YES	--	NO	NO	NO
Second Major*	YES	YES	NO	YES	NO	--	NO	NO
Minor	NO	NO	NO	YES	NO	NO	--	NO
Certificate	NO	NO	NO	YES	NO	NO	NO	--

\*\*Assumes A&S majors

### Grade Point Average (GPA)

- Students must be earn at least a 2.0 GPA (C average) for all UH Mānoa registered credits and must not be on academic action (i.e., not on probation, suspension, dismissal). Some majors or programs have specific GPA requirements (see department's sections).

### A&S Degree Requirements

The Colleges of Arts and Sciences offer Bachelor of Arts (BA), Bachelor of Fine Arts (BFA), Bachelor of Music (BMus), and Bachelor of Science (BS) degrees, each of which has specific requirements as listed below. Courses used to fulfill these requirements can double dip with UH Mānoa General Education Core, UH Mānoa Graduation, and A&S Major requirements.

#### Bachelor of Arts (BA), Bachelor of Fine Arts (BFA) and Bachelor of Music (BMus)

- One of the following (these courses may also satisfy the UH Mānoa General Education Core "FS" requirement when they are designated as "FS" courses):  
BUS 250, ICS 141, 241, MATH 100, 112, 140, 161, 203, 215, 241, 251A, NREM 203, PHIL 110, 110A, 111, or SOCS 150

#### Bachelor of Science (BS)

- Calculus I: MATH 215, 241, or 251A (these courses also satisfy the UH Mānoa General Education Core "FS" requirement)
- Calculus II: MATH 216, 242, or 252A
- Chemistry: CHEM 161/161L and 162/162L or 171/171L or 181A/181L
- Physics: PHYS 151/151L and 152/152L or 170/170L and 272/272L

(These Chemistry and Physics lecture courses also satisfy the UH Mānoa General Education Core "DP" requirement. These lab courses also satisfy the UH Mānoa General Education Core "DY" requirement.)

**Note:** Many introductory science and mathematics courses require an assessment examination to determine appropriate placement. Information about assessment exams appears each semester in UH Mānoa's *Registration Guide* or on the website at [www.hawaii.edu/myuh/manoa/](http://www.hawaii.edu/myuh/manoa/).

### A&S Major Requirements

A&S major requirements offer students specialization in an academic field of study and develop liberal arts skills. Major requirements contribute to the ideal liberal arts education, which prepares students for productive lives and careers, enlightened citizenship, and lifelong learning.

Major requirements are explained in each department's sections in this *Catalog*, in the online *Catalog*, and on the department's websites.

The minimum course grade to fulfill major requirements is a C (not C-). These requirements must be taken for a letter grade, unless the course is offered only with the CR/NC grade option.

A&S students should meet regularly with both their major advisor at their respective department office and with an A&S college advisor in the Student Academic Services office (QLCSS 113).

### Second or Multiple Majors and Minors

A&S students are encouraged to consider applying for a second major or a minor or a combination of both. Pursuing additional academic fields of study in the form of a second major, or with the addition of a minor, can benefit students in several ways, including the opportunity to discover relation-

ships across disciplines, develop diverse perspectives, strengthen one's appreciation for the acquisition of knowledge in more than one academic field and enhance one's ability to problem-solve and communicate in a variety of settings. Applicants for multiple majors/minors need to:

- be enrolled as a classified Arts and Sciences student,
- be in good academic standing,
- be seeking majors under one degree program (e.g. BA/psychology and communicology, or BS/physics and mathematics),
- be able to complete degree requirements within the maximum total credits as specified by UH Mānoa's excess credit policy (see "Undergraduate Education").

The Colleges offer minors in 27 disciplines. Most minors require a minimum of 15 credits of non-introductory and upper division level course work, completed with a grade of C (not C-) or better.

Academic advisors are available to discuss with students the way that a second major or minor can complement the first major to help students formulate an academic plan so that adding a second major or a minor does not delay graduation unnecessarily.

Holders of a first baccalaureate degree who wish to pursue a second major rather than a complete second baccalaureate degree should pursue their academic major as an unclassified post-baccalaureate candidate. Students interested in pursuing the post baccalaureate second major option should meet with the undergraduate advisor in the second major in order to request permission to pursue a post baccalaureate second major and to identify the major requirements they need to fulfill. During a student's last semester, a "Colleges of Arts and Sciences Graduation Worksheet Major Requirements" (goldenrod) form must be submitted to the Colleges of Arts and Sciences Student Academic Services.

## Second Baccalaureate Degree

Priority for admission into any Arts and Sciences baccalaureate program is given to students seeking their first undergraduate degree. Applications must be received by the Office of Admissions by the established deadlines.

All applicants must meet admissions requirements for the degree program to which they are applying. Applications for a second baccalaureate degree will be considered only if there is a demonstrable difference in curricula and objectives between the two degrees and majors. Course work used towards a major/minor/certificate in the first degree cannot be used to satisfy major/minor/certificate requirements in the second degree, unless specific courses are required in the second degree. Second degree students must earn a minimum of 30 credits in courses taken at UH Mānoa **upon admission as a second baccalaureate degree candidate** while continuously enrolled in the colleges, and must satisfy all program requirements current at the time of official admission into the program. For more information, see the Arts and Sciences Student Academic Services website, [www.advising.hawaii.edu/artsci/](http://www.advising.hawaii.edu/artsci/).

The colleges may approve concurrent multiple baccalaureate degrees for exceptional students. Students should speak with an advisor in the Arts and Sciences Student Academic Services office for further information.

## Professional Programs

Pre-professional students, i.e., students who plan to pursue careers such as Education, Engineering, Law, Medicine, Social Work, etc., often need extra course work and preparation and should seek academic advising as early as possible.

For almost all professional schools, a liberal arts education such as that offered in the Colleges of Arts and Sciences provides an essential foundation. Some professional schools admit undergraduate students in transfer; others require that students complete a baccalaureate degree before being admitted. Most professional schools also have specific prerequisites that students must complete before applying.

Pre-professional students should consult both the recommendations set by the appropriate national organization and the specific prerequisites of the professional schools they hope to attend.

Students interested in health and law careers should visit the Pre-Health/Pre-Law Advising Center (PAC), a walk-in resource center located in QLCSS 101. PAC is staffed by trained peer advisors who assist students in clarifying career goals, choosing a major, planning appropriate course work, finding opportunities to gain experience, and applying to schools.

## Graduate Programs

Information regarding graduate programs and admission is in the "Graduate Education" section of the *Catalog*. Each department also includes information in its description about their specific program(s). Check specific departments for program requirements.

## Student Organizations

Societies and clubs associated with many departments within the Colleges of Arts and Sciences give students opportunities to explore a field from an informal perspective, get acquainted with other students with similar interests, and learn of the options available upon graduation. The Colleges of Arts and Sciences highly recommend active student involvement in these associations for the academic and professional enhancements they provide. Check with your departmental advisor for information.

## Honors and Awards

### Scholarships and Awards

The Colleges of Arts and Sciences and their departments provide scholarships and awards to exceptional students. For a selective list of scholarships, see "Tuition, Fees, and Financial Aid." If you wish specific information on prizes or scholarships offered through the Colleges of Arts and Sciences, contact the appropriate department.

### Honor Societies

Honor societies at UH Mānoa in the Colleges of Arts and Sciences include Alpha Kappa Delta (sociology), Beta Phi Mu (library science), Delta Phi Alpha (German), Golden Key National Honor Society (undergraduate), Kappa Tau Alpha (journalism), Lambda Delta (freshmen), Mortar Board (seniors),

Omicron Delta Epsilon (economics), Phi Alpha Theta (history), Phi Beta Kappa (liberal arts and sciences), Phi Eta Sigma (freshmen), Phi Kappa Phi (general scholarship), Pi Delta Phi (French), Pi Kappa Lambda (music), Pi Sigma Alpha (political science), Psi Chi (psychology), Sigma Delta Pi (Spanish), Sigma Pi Sigma (physics), and Sigma Xi The Scientific Research Society (sciences).

## Instructional and Research Facilities

### Center for Biographical Research

The Center for Biographical Research (CBR) is dedicated to the interdisciplinary and multicultural study of life writing. CBR programs include teaching, publication, and outreach activities.

In conjunction with the Department of English, CBR offers thesis advising for PhD and MA projects, and awards the Biography Prize annually for work in life writing by a UH Mānoa graduate student. The Department of English also offers a number of graduate and undergraduate courses in life writing. A BA program in biography is offered through the Interdisciplinary Studies Program.

CBR publishes *Biography: An Interdisciplinary Quarterly*, the premier scholarly journal in the field. Appearing continuously since 1968, *Biography* explores the theoretical, historical, generic, and cultural dimensions of life writing. CBR also sponsors the Biography Monograph series, a book publishing enterprise designed to further the study and practice of life writing in all its forms.

CBR maintains a library and resource collection and has hosted, since 1988, the public lecture series Brown Bag Biography, part of the center's commitment to supporting and publicizing contributions to life writing. CBR is a founding partner of *Biography Hawai'i*, a television documentary series that focuses on residents whose lives have had a lasting impact on these islands. The center also hosts [iaba-l@hawaii.edu](mailto:iaba-l@hawaii.edu), the listserv and discussion forum for the International Auto/Biography Association.

### Center for Language and Technology Moore Hall (formerly Language Learning Center)

Web: [clt.manoa.hawaii.edu](http://clt.manoa.hawaii.edu)

The mission of the Center for Language & Technology (CLT) is to support the informed use and integration of technology into instruction and research in the curriculum of the College of Languages, Linguistics and Literature.

The CLT fulfills its kuleana by: a) supporting the research and development of technology-based materials for language teaching and learning; b) providing faculty development opportunities for technology integration into the curricular areas of the college; c) providing professional enrichment opportunities to teaching assistants; d) providing expertise in media design, production and delivery; e) researching and supporting innovative technology tools and pedagogical approaches that are specific to the curricular areas of the College; and f) providing technology resources and services that are specific to the curricular areas of the college.

The CLT additionally provides leadership and guidance in the creation of online learning experiences. In the last few years, activities in this area have included the creation and implementation of a review process to assist online-teaching faculty in the development and maintenance of quality online courses. The CLT also supports faculty by providing expert feedback throughout the process as well as numerous opportunities for professional development in this area, with a particular emphasis on the academic areas of the college.

To fulfill its mission to support informed use of technology in instruction, the CLT provides flexible, technology-rich physical spaces that are designed with consideration of the specific academic areas of the college. Faculty can avail themselves of facilities such as broadcast-standard video and audio production suites, a state-of-the-art project development room, a high-end theater projection room, web-conferencing meeting rooms, and a smart classroom primarily intended for instructional research and special projects. Technologies available to instructors include physical and virtual technology tools. The former includes a variety of audio-visual equipment available for check out; the latter includes specialized technologies developed in-house.

The CLT regularly hosts local, national, and international events sponsored by various units in the college, collaborates with several campus units, and also conducts outreach activities to support Hawai'i's language-teaching community.

### Second Language Teaching and Curriculum Center

The Second Language Teaching and Curriculum Center was established in 1988 with the broad mission of improving language instruction in the College of Languages, Linguistics and Literature, and facilitating cooperative efforts among departments. The center coordinates professional development programs, provides curriculum and materials development services to departments, supports faculty research and development projects, and conducts outreach activities to support Hawai'i's language-teaching community.

## National Foreign Language Resource Center

Web: [nflrc.hawaii.edu](http://nflrc.hawaii.edu)

The National Foreign Language Resource Center (NFLRC) is one of the first three Language Resource Centers established by the U.S. Department of Education in 1990. The ultimate mission of the NFLRC is to improve the learning and teaching of world languages while focusing primarily on the underserved populations of both teachers and students of the less commonly taught languages of Asia and the Pacific.

Taking advantage of Hawai'i's geographic location and drawing on the rich expertise of the College of Languages, Linguistics and Literature, the NFLRC works to improve teaching through the production and dissemination of a broad range of resources, including instructional materials, scholarly books, and edited collections. Online resources include three e-journals, video and audio archives, and bibliographic databases.

NFLRC works closely with the Center for Language & Technology on a number of initiatives, for example, developing and researching instructional models that combine distance and face-to-face instruction and collaborating in the design and development of technologies that support those models. Throughout the year, the NFLRC hosts and co-hosts local, national, and international conferences and workshops.

## Academy for Creative Media

College of Arts and Humanities  
Crawford 210

2550 Campus Road

Honolulu, HI 96822

Tel: (808) 956-7736

Fax: (808) 956-6662

Email: [acm@hawaii.edu](mailto:acm@hawaii.edu)

Web: [www.hawaii.edu/acm/](http://www.hawaii.edu/acm/)

### Faculty

A. Misawa, MFA (Chair)—cinematic and digital production

M. Booth, MFA—documentary, critical studies

D. Boulos, MFA—animation

T. Brislin, PhD—media ethics; critical studies

L. Flanary, MFA—screenwriting, indigenous filmmaking

V. Hereniko, PhD—critical studies, cinematic and digital productions, screenwriting

V. Mih, MFA—animation

J. Moffett, MFA—screenwriting, cinematic & digital production

K. Ng, PhD—critical studies

G. Wang, MFA—post production

**Degree Offered:** BA in creative media

### The Academic Program

The Academy for Creative Media (ACM) emphasizes narrative, or storytelling, theories, skills, and application across multiple platforms of digital media and within a context of cultural and aesthetic values. More than just a “film school,” ACM seeks to empower students to tell their own original and authentic stories of Hawai'i, the Pacific, and Asia rather than have those stories told for them through a different cultural lens that is distant and often distorted.

ACM offers a core curriculum and specialized courses in three tracks: Digital Cinema, Computer Animation, and Critical Studies. A catalog of courses, academic planning guidelines, and program information can be found on the Academy's website at: [www.hawaii.edu/acm](http://www.hawaii.edu/acm).

## Undergraduate Study

### Bachelor's Degree

Students have the flexibility to design an academic program around a core of ACM courses and electives including a variety of UH Mānoa departments offering courses in film and media studies. Students work in close consultation with faculty to develop a program that reflects the development of academic, writing, creative, and critical thinking skills.

### Requirements

To declare a major in Creative Media, students must:

- Have completed or be enrolled in Cinema and Digital Media (ACM 255), and have completed 12 or more credit hours with an overall 2.75 GPA;
- Be enrolled in the Colleges of Arts and Sciences.

To complete the creative studies major, students must design a detailed and acceptable academic plan, under the guidance of an ACM faculty advisor, consisting of 36 credit hours that emphasizes one of the three ACM tracks, includes the required core of ACM courses, and is supplemented with elective courses. Six credit hours of electives may be taken from departments outside of ACM.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Required Courses

- ACM 255
- ACM 310 or 316
- ACM 350 or 355
- 9 credits from any of the following: ACM 352, 360, 380, 382, 385, 460, 480, 482, 485, and 490
- 12 credit hours from one of three ACM degree tracks

### Computer Hardware and Software Requirements

The curriculum of the Academy for Creative Media requires students to have access to a laptop computer. Hardware and software specifications can be found at [www.hawaii.edu/acm/computer](http://www.hawaii.edu/acm/computer).

### Advising

Introductory information on the academy, including guidelines for academic planning, can be found at [www.hawaii.edu/acm](http://www.hawaii.edu/acm). All students accepted for the major are assigned a faculty advisor. Advising is mandatory to design the student's academic plan, and for any subsequent changes.

# American Studies

College of Arts and Humanities  
 Moore 324  
 1890 East-West Road

 Email: amstuh@hawaii.edu  
 Web: manoa.hawaii.edu/amst/

## Faculty

- \*D. Stannard, PhD (Chair)—social and cultural history, race and racism, colonialism and genocide
- \*W. Chapman, PhD—historic preservation
- \*E. Colwill, PhD—gender, slavery, and Revolution in the Atlantic world
- \*J. Eagle, PhD—film/media, gender studies, U.S. cultural history
- \*V. Gonzalez, PhD—American empire, tourism and militarism, gender and sexuality, ethnic and cultural studies
- \*N. Kahanu, JD—public humanities and Native Hawaiian programs
- \*K. Kosasa, PhD—visual and cultural studies, museum studies, critical pedagogy
- \*L. J. Mariano, PhD—Filipino American studies, diaspora studies, Asian American studies
- \*B. McDougall, PhD—indigenous studies, literary studies
- \*D. Ogawa, PhD—intercultural and Japanese American studies
- \*R. Perkinson, PhD—southern and western history, race and class, crime and punishment, American empire
- \*K. Sands, PhD—religion in America, religion and law, women in religion, Christian history, theory of religion
- \*J. Stanton, PhD—culture and arts
- \*M. Yoshihara, PhD—U.S. cultural history, U.S.-Asian relations, Asian American studies, literary and cultural studies, gender studies

## Cooperating Graduate Faculty

K. Ng, PhD—religion in America, religion and law, Christian history, theory of religion

## Affiliate Graduate Faculty

A. Kikumura-Yano, PhD—Japanese-American studies, Asian American studies, museum studies  
 K. Yamazato, PhD—American literature and culture

**Degrees and Certificates Offered:** BA (including minor) in American studies, MA in American studies (including dual AMST/MLISc MA), PhD in American studies, Graduate Certificate in Historic Preservation, Graduate Certificate in Museum Studies

## The Academic Program

Since its inception in the 1930s, American Studies (AMST) has offered an integrated multidisciplinary exploration of the historical and contemporary American experience. This involves the study of American popular and high culture; environmental issues; institutional structures, including political and economic institutions; systems of thought and belief; and gender, ethnic, racial, and cross-cultural relationships. A combination of historical, literary, social-scientific, and other methodological approaches is used. In addition to such traditional aims, American studies at UH Mānoa also explores the role of Hawai'i, the Pacific, Asia, and, to a lesser extent, other parts of the world

within the American experience, an objective that imparts a cross-cultural dimension to its program and differentiates it significantly from most other programs in the field.

At the undergraduate level, American studies offers a balanced general education experience, as well as excellent preparation for both advanced study in the field and professional studies ranging from law to travel industry management. Advanced degrees are intended primarily as preparation for college and university-level teaching, but recipients are also engaged in such activities as journalism, library management, business administration, and government service. A dual MA can be taken in cooperation with the Library and Information Science Program. In addition to regular degrees, graduate certificates are offered in historic preservation and museum studies.

## Affiliations

The department is affiliated with the American Studies Association, American Association of Museums, Hawai'i Museums Association, National Council of Preservation Education, and National Trust for Historic Preservation.

## Advising

The undergraduate advisor advises all undergraduate majors, and the graduate chair advises all graduate students.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

Students must complete 30 credit hours, including:

- 21 credit hours of AMST upper division courses, including AMST 381, 382, 480, and 481 or 482 (one lower division course may now be counted)
- 9 remaining credit hours may include upper division courses in either AMST courses and/or allied humanities and social sciences courses (no more than 3 credit hours of 499 may be counted). These courses must be approved by the undergraduate advisor or be listed in the “pre-approved” allied course list on the department website.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

#### Minor Requirements

Students must complete 15 credit hours, including:

- AMST 381 and 382
- 9 credit hours of 300- or 400-level American studies electives

## Graduate Study

### Application Requirements

Applicants for graduate programs should present an academic record indicating a broad range of study in the humanities and the social sciences with an emphasis on American culture. In addition to the admission requirements of the Graduate Division, the applicant should have a copy of his or her latest GRE scores, Graduate Program Supplemental Information form, Statement of Objectives, and at least two letters of recommendation sent directly to the department. Each letter of recommendation should have the “Waiver of Access to Confidential Letters/Statements” form attached to it. PhD applicants are also required to submit a writing sample, preferably a paper that was writ-

ten for a graduate course. Applications for graduate admission are considered for either fall (September-December) or spring (January-May) semester. Application deadlines for local and mainland applicants are: **February 1** for fall; **September 1** for spring. Application deadlines for foreign applicants are: **January 15** for fall; **August 1** for spring. There is no summer admission to advanced degree programs in the Graduate Division. There is an application fee.

Proficiency in a foreign language is not required unless it is necessary for dissertation research. Students having a special career interest in Asia may select courses offered in the Asian studies program to satisfy some degree requirements in American studies.

Courses for the graduate program are to be selected from among the courses listed in the back of the *Catalog*, from appropriate American studies graduate courses and upper division and graduate courses in related fields. Consent of the departmental graduate chair is required for enrollment in all undergraduate courses and all graduate courses in other fields. The courses listed in the back of the *Catalog* are numbered and grouped as follows: 500, Master's Plan B/C Studies; 600-609, introductory courses; 610-689, fields of study courses; 690-699, special topics courses; and 700-800, thesis and dissertation research. AMST 500V, 699V, 700V, and 800V are offered each semester; AMST 600, 601 and 602 are offered annually, and most other 600-level courses are offered once every three years.

### **Master's Degree**

MA candidates are expected to possess the BA degree and have a background knowledge of American culture.

#### **Requirements**

MA students may select either the Plan A or Plan B program. Students must complete 33 credit hours as follows:

#### **Plan A (Thesis)**

- 6 credit hours of AMST 700
- 18 credit hours in courses numbered 600 and above, including AMST 600, 601, 602 and a graduate seminar course
- 9 credit hours in a chosen field of specialization
- oral examination

#### **Plan B (Non-thesis)**

- 18 credit hours in courses numbered 600 and above, including AMST 600, 601, 602 and a graduate seminar course
- 15 credit hours in a chosen field of specialization
- written and oral examinations

More specific requirements are detailed on the American studies website at: [manoa.hawaii.edu/amst](http://manoa.hawaii.edu/amst).

### **Doctoral Degree**

PhD candidates are expected to possess the MA degree in American studies or its equivalent and should have a scholarly attainment of a high order and widespread intellectual interests. In most instances, admission to the PhD program requires applicants to possess an MA degree. However, occasionally an applicant with a BA and exceptionally strong credentials may be admitted directly into the doctoral program.

### **Requirements**

Students must complete 48 credit hours including:

- 18 credit hours in courses numbered 600 and above, including AMST 600, 601 and 602 and a graduate seminar course
- 30 credit hours in a chosen field of specialization

### **Students must also complete:**

- A qualifying examination consisting of two written parts covering the two areas of specialized fields of student's choice and an advanced graduate syllabus followed by an oral examination dealing with all three areas
- An oral comprehensive examination administered by the dissertation committee
- A dissertation of high quality and its successful oral defense

### **Certificate**

#### **Graduate Certificate in Historic Preservation**

Candidates for the Certificate in Historic Preservation must possess a BA degree. The Certificate in Historic Preservation combines course work and applied experience.

#### **Requirements**

Students must complete 15 credit hours of graduate course work:

- 3 credit hours of ANTH 645, Historic Preservation
- 3 credit hours of AMST 675, Preservation: Theory and Practice
- 3 credit hours of AMST 695, Historic Preservation Practicum
- 6 credit hours in field of specialization

A maximum of 6 credit hours may be applied simultaneously to the historic preservation certificate and to another degree. Internships are usually undertaken with local firms and organizations that have a preservation interest or with individuals who are qualified to direct independent work in preservation. The program concludes with a formal colloquium presentation. More information is available on the Historic Preservation Program's website at [manoa.hawaii.edu/amst/historic-preservation/the-field/](http://manoa.hawaii.edu/amst/historic-preservation/the-field/).

#### **Graduate Certificate in Museum Studies**

Candidates for the Certificate in Museum Studies must possess a BA degree. The Museum Studies Graduate Certificate Program provides an opportunity to learn about museums, acquire professional experience, and develop research skills.

#### **Requirements**

Students must complete 18 credit hours of graduate course work:

- 3 credit hours of AMST 683, Museums: Theory, History, Practice
- 3 credit hours of AMST 684, Museums and Collections
- 3 credit hours of AMST 685, Museums and Education
- 3 credit hours of AMST 690, Research Seminar
- 6 credit hours of electives

A maximum of 6 credit hours may be applied simultaneously to the Museum Studies Certificate and to another degree. Internships are usually undertaken with local museums and related institutions or organizations and under the direction of a supervisor qualified to direct independent work in a museum related project. The program concludes with a formal colloquium presentation. For more information, see [manoa.hawaii.edu/amst/museum-studies/about-museum-studies/](http://manoa.hawaii.edu/amst/museum-studies/about-museum-studies/).

## Faculty

- \*C. J. Bae, PhD (Graduate Chair)—biological anthropology, paleoanthropology, vertebrate taphonomy, Out of Africa I, modern human origins; China, Korea, Japan
- \*A. Golub, PhD (Undergraduate Advisor)—cultural anthropology, kinship and identity, governance, indigenous land tenure, mining and natural resources, common and intellectual property, semiotic technologies, Papua New Guinea, Melanesia, massively multiplayer online video games
- \*J. M. Bayman, PhD—archaeology, craft economies; North America, U.S. Southwest, Hawai'i
- \*C. F. Blake, PhD—critical and interpretive theory, ethnography and biography, popular ideologies, social movements and entrepreneurship in the modern world economy; China, U.S.
- \*J. Brunson, PhD—medical anthropology, fertility and reproduction, maternal health, new medical technologies, structural and interpersonal violence, gender, family; Nepal
- \*J. Padwe, PhD—environmental anthropology; agro-ecology; war and the environment; ethnicity; Southeast Asia (Cambodia), South America (Paraguay, Bolivia)
- \*C. E. Peterson, PhD—archaeology, comparative study, early complex societies, regional settlement patterns, household archaeology, quantitative methods; China
- \*M. Pietrusewsky, PhD—physical anthropology, skeletal biology, forensic anthropology; Oceania, SE and East Asia, Australia
- \*B. V. Rolett, PhD—archaeology; Pacific Islands, Southeast China
- \*E. J. Saethre, PhD—medical anthropology, indigenous health, HIV/AIDS, biomedical interventions; Aboriginal Australia, South Africa
- A. M. Sakaguchi, PhD—medical anthropology, public health, medical malpractice, globalization and its impact on emerging and re-emerging diseases, health disparities, health care disparities, Japanese literature and history
- \*M. Stark, PhD—archaeology ecology, early village economics, ceramics, ethnoarchaeology; Southeast Asia, U.S. Southwest
- \*T. P. K. Tengan, PhD—cultural anthropology, indigenous theory and methodology, colonialism, nationalism, identity, gender, cultural politics; Pacific, Hawai'i
- \*G. M. White, PhD—cultural anthropology, history and memory, self and emotion, ethnographic methods; Pacific Islands, America
- \*C. Yano, PhD—cultural anthropology, popular culture, ethnomusicology, cultural nationalism, emotions; Japan, Japanese Americans

## Cooperating Graduate Faculty

- C. Beaulé, PhD—Andean/Latin American archaeology, household organization, origins of complexity, Colonialism
- D. Brown, PhD—physical anthropology, medical anthropology; Polynesia
- R. Cann, PhD—physical anthropology, anthropological genetics, human populations

- W. Chapman, PhD—historic preservation, historical archaeology, history of anthropology
- C. Clayton, PhD—cultural anthropology; sovereignty and colonialism; nationalisms and transnationalisms; history, memory and place-making; China and East Asia
- E. Drechsel, PhD—historical sociolinguistics, ethnohistory, North American Indians; North America
- S. Falgout, PhD—cultural and historic anthropology; Micronesia
- M. Hamnett, PhD—applied policy research, economic development, research management; Oceania
- G. G. Maskarinec, PhD—anthropology of language (Nepalese oral texts), western biomedical clinical medicine, medical education and indigenous medical systems of S. Asia; religions (belief systems, ritual and performance)
- P. Mills, PhD—archaeology, culture contact, lithic analysis, ethnohistory; Polynesia, North Pacific, North America
- W. Nishimoto, PhD—oral history, ethnographic interviewing; Hawai'i
- J. Y. Okamura, PhD—ethnicity and ethnic relations, Asian American studies; Philippines, Hawai'i
- M. Sharma, PhD—political economy, development, class formation and gender relations, radical feminist theory; India

## Affiliate Graduate Faculty

- M. S. Allen, PhD—prehistory of Oceania, evolutionary, ecological, and biological theory, zooarchaeology, human paleoecology, subsistence change, prehistoric environments, exchange and interaction, Polynesian fishing technologies; Oceania, Polynesia
- A. R. Arno, PhD—legal anthropology, ethnography of communication, kinship and social organization; Pacific
- J. S. Athens, PhD—evolutionary and agricultural ecology, origin of agriculture, development of complex societies, tropical paleoenvironmental (Ecuador, Oceania), archaeology of Ecuador, Micronesia, and Hawai'i, CRM issues, management and administration
- N. Barker, PhD—cultural anthropology, religious self-mortification, culture concept, theory of ritual, self-sacrifice and the body; Philippines, Asia
- R. A. Bentley, PhD—complexity theory, the prehistoric spread of agriculture into Europe and the effects of human interaction on cultural evolution
- K. Brown, PhD—cultural anthropology; family histories; farmer production decision; religious syncretism; ethnicity and the Emperor; globalization and food, family and car culture; Japan
- E. Cochrane, PhD—evolutionary theory, cultural transmission, archaeological science, Oceania, Fiji, ceramics
- S. Collins, PhD—archaeology, human and faunal osteology, historic preservation compliance and practice; Hawai'i and the Pacific
- M. T. Douglas, PhD—physical anthropology, skeletal biology, bioarchaeology, paleopathology; Oceania, Southeast Asia
- T. Dye, PhD—archaeology; Hawai'i and the Pacific
- J. Fox, PhD—land use, forest resources and management GIS and spatial information technology; South Asia, SE Asia
- T. D. Holland, PhD—physical and forensic anthropology, skeletal biology; U.S. Midwest, Southeast Asia
- T. Jiao, PhD—transition from hunting-gathering to farming, maritime adaptation, complex society, early state formation; China, southeast Asia
- J. Kahn, PhD—archaeology, lithic technology, household archaeology, monumental architecture and landscapes; Hawai'i, French Polynesia, and the Pacific
- G. Marten, PhD—population dynamics, ecosystem ecology, animal behavior, statistics, mathematical modeling, population genetics

- L. Lindstrom, PhD—cultural anthropology, sociolinguistics, ethnohistory, social theory; Oceania, Vanuatu
- J. A. Peterson, PhD—archaeology, historical ecology, landscapes, historical archaeology; Hawai'i-Pacific, Philippines, American Southwest
- J. Silverstein, PhD—archaeology, militarism; the evolution, rise and fall of complex societies; hydraulic constructions; GIS; survey; modern military archaeology in Asia and Europe; urban archaeology; Mesoamerican; and Greco-Roman Egypt
- M. Tomlinson, PhD—cultural and linguistic anthropology, religion and ritual, discourse analysis, Christianity; Fiji, Oceania
- E. Wittersheim, PhD—political and urban anthropology and documentary filmmaking, nationhood and state-building; Vanuatu, Melanesia, Oceania
- D. Y. H. Wu, PhD—cultural anthropology, ethnicity, anthropology of food; China and Chinese diaspora
- D. Yen, PhD—ethnobotany; Oceania, Southeast Asia
- H. Young Leslie, PhD—cultural construction of health, medical professionals and medical systems (across time and space), midwifery, gender, the body, development, qualitative methodologies, and women's material culture

### Adjunct Faculty

- J. Baker, PhD—medical and nutritional anthropology, anthropology of food, ethnopharmacology, science and technology studies; Oceania
- N. I. Cooper, PhD—socio-cultural anthropology, performance, gender, expressive culture, ritual and religion; Southeast Asia, Indonesia, Java, Singapore
- L. Gollin, PhD—edical anthropology, ethnobotany and ethnobiology, local ecological knowledge, cultural resource management, oral histories; Indonesia and Hawai'i
- J. Jin, PhD—zooarchaeology, vertebrate taphonomy, human skeletal biology, forensic anthropology, paleoanthropology; China, Korea
- G. Pigliasco, PhD—cultural and legal anthropology, visual anthropology, ritual and performance commodification and tourism; Oceania, Fiji
- J. Rensel, PhD—socioeconomic history, housing change, migrant communities; Polynesia
- P. J. Ross, MA—quantitative methods, nutritional and medical anthropology, human ecology, medical systems, field methods in cultural anthropology; West Africa

**Degrees Offered:** BA (including minor) in anthropology, MA in anthropology, PhD in anthropology

### The Academic Program

Anthropology (ANTH) is the comparative study of human societies, of the origin and evolution of our species, and of the ways of life of ancient and modern people. It is divided into four main subdisciplines: archaeology, cultural anthropology, linguistic anthropology, and physical anthropology. While physical anthropologists focus upon our biological nature, cultural anthropologists deal with ways of life past and present. Anthropological linguists look at language as a part of human behavior, while archaeologists study the remains of past cultures to reconstruct former lifestyles.

Students of anthropology gain a basic understanding of the cultural basis of human society, and of the origin and development of humanity useful both for understanding the human condition and as a preparation for work in many fields, not just in anthropology. For example, the department offers a uniquely broad range of courses on the cultures of Asia and the Pacific, as well as on aspects of American society, that provide

students with a fund of cultural knowledge and insights upon which to build a career in law, medicine, public health, teaching, business, and other professions. While some BA graduates in anthropology find employment in anthropology, normally an MA or PhD is required to work as an anthropologist in a university, museum, or other institution. The department has a long-standing graduate program, which trains students in all aspects of anthropology, focusing especially on Asia and the Pacific. The training emphasizes field research; in any one year students are engaged in such projects as excavating an ancient religious temple on Tahiti, recording ritual life in rural Java, or analyzing the social system of a Japanese factory.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

Students must complete 31 credit hours, including these required courses:

- ANTH 152, 210, 215, 215L and 490
- Six 300- and 400-level courses

Three of the 300- and 400-level courses may be from related disciplines with prior approval of the student's advisor.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor

#### Requirements

Students must complete 15 credits of upper division anthropology courses which include one theory course and one methods course. It is highly recommended that students take ANTH 300 (Study of Contemporary Problems) to complete the theory requirement. Alternatively, they may take any 400 level course designated as a theory course by the Department of Anthropology. Students must also take one upper division course designated as a methods course by the Department of Anthropology. Courses will be chosen by the student, in consultation with the undergraduate advisor, to suit the student's needs and interests. Courses must be completed with a grade of C (not C-) or better.

## Graduate Study

Intended candidates for the MA or PhD need not have an undergraduate background in anthropology. All applicants must submit to the department GRE General Test scores and three letters of recommendation at the time of application. Lack of previous training in anthropology may result, however, in study to fill gaps in knowledge. All incoming students are required to attend the Anthropology Colloquium Series in the first two semesters. Applications for admission will be considered for the fall semester only. The deadline for submission of applications, including international students, is **December 1**.

The MA program ensures that graduates grasp fundamentals in their elected subfields, while the PhD program provides an opportunity for further specialization.

### Master's Degree

Admission to MA candidacy is based upon a candidacy conference with the student and his or her three-person committee held sometime prior to the end of the student's second semester

in residence. At that time the student submits in writing, a proposed program of study that the committee must accept before the student is admitted to candidacy.

### Requirements

A candidate for the MA must take three out of four core courses (archaeology, linguistic anthropology, physical anthropology, and cultural anthropology). A core course may be repeated once. A student may take additional core courses to fulfill other course requirements.

An MA candidate must also pass two courses in each of the following categories: method or technique, theory or topic, and culture area. If a candidate needs a course from one of the three categories in his or her program of study and that course is not offered by the department on a timely basis, he or she may petition the graduate chair to substitute a course from outside the department, provided petition is made prior to registration for the course in question. A candidate is required to earn 30 credit hours. A minimum of 18 credit hours must be taken in the department. Graduate students must maintain at least a B (3.0) average. All courses taken for degree credit must be taken for a letter grade.

### Plan A

- 24 credit hours of course work
- Thesis (6 credit hours)
- Minimum of 12 credits in graduate level courses numbered 600 and above

### Plan B

- 30 credit hours
- Three papers on anthropological topics, one of which shall be a research proposal to the committee as evidence of scholarly ability
- Minimum of 18 credits in graduate level courses numbered 600 and above

### MA Track in Applied Archaeology

Please consult departmental and graduate college guidelines for application instructions. Applicants to our Applied Archaeology MA program should explicitly note in their statement of purpose and other correspondence that they are applying to the MA Track in Applied Archaeology, which is a Plan B program. Students who are admitted to the applied program will be assigned an interim advisor upon their acceptance. By the end of the second semester, a student must select a committee of three anthropology faculty, one of whom will serve as her or his committee chair. A student must complete a report on original research, or three publishable papers.

Students who wish to enter the doctoral program, upon completion of the MA Track in Applied Archaeology, must re-apply for admission to the anthropology program.

### Doctoral Degree

A student completing the requirements for the MA may request admission to the PhD program by filling out a Petition for Admission to a Doctorate in Same Discipline (found on the Graduate Division website) and submitting the form to the departmental Academic Specialist. This form will be forwarded to Graduate Division based upon the approval of the graduate chair.

Before the graduate chair can formalize his recommendation, a meeting must be convened consisting of all Anthropology

faculty members with whom the student has taken graduate-level courses. They will evaluate the MA thesis or three papers and review the quality of previous graduate work. The faculty will then make their recommendations to the graduate chair to admit or not to admit the student to the doctoral program.

Admission to the PhD program requires a two-thirds majority of favorable versus unfavorable recommendations from the Anthropology faculty members. The student will receive written notification from the Graduate Dean.

### Requirements

PhD candidates must fulfill the requirements for an MA degree in anthropology as a prerequisite. Requirements for obtaining a PhD include submitting an acceptable program plan at a candidacy conference, passing a comprehensive examination, formulating an acceptable dissertation proposal, writing an acceptable dissertation, and successfully defending this dissertation.

A student entering the PhD program with an MA degree from another department of anthropology must pass the core course in his or her area of specialization with a grade of B (3.0 GPA) or better. This course may be challenged by examination in lieu of taking it for credit. All students are required to take graduate courses (other than reading courses) from at least four different members of the anthropology department.

After admission to the PhD program, the student will form a five-member PhD committee. More members may be added if deemed desirable and consistent with a candidate's interest. At least one person must be a graduate faculty member of another department, but the majority of members must be from the Department of Anthropology. Substitutions may be made at any time if a member of the committee is unavailable.

All students entering the PhD program, including those obtaining an MA from the department, are strongly advised to hold a candidacy conference and gain written approval of their five-member committee for the projected program of study by the second semester.

Approximately one semester prior to the comprehensive examination, the student shall submit a detailed description of the areas to be covered, complete with bibliography. The candidate is expected to have read the items contained in the bibliography and be prepared to discuss them in some depth. It is the responsibility of each committee member to suggest additional readings for the bibliography and to suggest any other changes in the proposed agreement. After all committee members have been duly consulted, the student will prepare a final description to be signed by all concerned, including the student, and to be filed with the graduate chair.

The comprehensive examination shall be administered in two parts: (a) a written examination, and (b) an oral exam, at which the student will be given the opportunity to clarify and amplify answers to the written component. The written exam will consist of one essay question submitted by each member of the student's committee. It will be closed-book; students will not be permitted to use notes or other aids. An allotment of three hours per question will be given. Scheduling will be flexible, but the total exam must be taken within a two week period.

The oral examination is expected to be scheduled not less than one week and no more than two weeks after the written examination. All members of the committee must be present at the examination. At the oral exam the student will be asked to

explain and/or defend answers to the written component. Two hours are to be allotted for this exercise.

If a student fails the comprehensive examination, he or she may be allowed to repeat it. If this examination is failed a second time, the student will be dropped from the graduate program. The committee will provide each student with a written statement detailing the reasons for a negative decision.

After successfully completing the comprehensive examination, the student is required to submit a research proposal for review by the degree committee. A meeting of the committee will be scheduled within two weeks of submission of a final draft of the proposal; the committee will determine whether or not the student is adequately prepared for the fieldwork proposed. A candidate whose field research proposal is approved and who has completed all other requirements is eligible to receive a university ABD certificate.

A student conducting dissertation research among people who do not speak the student's native language will be required, before leaving for the field, to show evidence of oral competence in the most useful field language or training in linguistic field techniques.

Following the student's submission of a final draft of the dissertation, an oral defense will be scheduled. It is the student's responsibility to see that each member of the committee has a copy of the complete final draft of the dissertation at least four weeks before the scheduled date of the oral defense. All members must be present at the oral defense. Procedures for determining final acceptance of the dissertation and awarding the PhD degree are set forth by the Graduate Division. A candidate must complete all the requirements within seven years after admission to the doctoral program. A student unable to meet this deadline may request an extension by written petition to the graduate chair describing reasons for the delay. If approved, the request will be sent to the graduate dean for a final decision.

## Art and Art History

College of Arts and Humanities  
Art 142

- \*R. Mills, MFA—glass, sculpture
- \*F. Roster, MFA—sculpture
- S. Spangler, MFA—ceramics
- \*J. Stanton, PhD—Western art history
- \*J. Szostak, PhD—Japanese art history
- \*B. Taylor, MFA—ceramics
- \*D. Waite, PhD—Pacific art history

### Affiliate Graduate Faculty

J. Feldman, PhD—Pacific art history

**Degrees Offered:** Undergraduate Certificate in Islamic Studies, BA in art with either a studio or Art History focus (including minor), BFA in art, MA in art history, MFA in art

### The Academic Program

The Department of Art and Art History (ART) offers two separate but interrelated programs. Art history, leading to the BA, affords the opportunity to study the arts of Asia, the Pacific, and the West in a historical and cultural context. The art studio programs provide students either with a broad-based, liberal arts approach via the BA or with a more focused studio specialization leading to the BFA. The latter is considered more appropriate for students intending to pursue the MFA at the graduate level.

The department is housed in an excellent three-story facility with painting studios, photography and computer labs (Macintosh equipped for graphic design, PCs for electronic arts), and fully equipped printmaking, sculpture, ceramics, fiber, and glass facilities. The UH Art Gallery is a prominent feature of the department's programs. Six or seven major exhibitions are presented each year, many of which have received national recognition. Visiting artist programs supplement the regular course offerings.

## Advising

Advising is mandatory for all art and art history majors. For advising, see the associate chair, Kate Lingley, in Art 142A, email: [lingley@hawaii.edu](mailto:lingley@hawaii.edu).

## Undergraduate Study

### BA Degree

This broad-based art degree provides students with a choice of a studio focus, where a wide range of visual arts media can be explored, or an art history focus, where the visual arts are studied in a historical context.

### Requirements

#### Studio Focus

Students must complete 42 credit hours, including:

- 6 credits of art studio core: ART 113 and 116
- 12 credits of art history: ART 175, 176, and 6 credits at the upper division level
- 24 credits of art studio: 12 credits must be upper division

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

#### Art History Focus

Students must complete 42 credit hours, including:

- 11 art history courses (33 credit hours), including ART 175, 176, and 395
- Three studio classes (9 credit hours), selected in consultation with advisor

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BFA Degree

The BFA degree in art is designed for those students who desire a focused preparation in the visual arts or who intend to pursue an advanced degree or career in art. Areas of specialization include: ceramics, digital imaging, drawing, electronic arts, fiber, glass, graphic design, painting, photography, printmaking, and sculpture. Students are encouraged to cross media boundaries, and qualified students may opt to construct an individualized inter-media plan of study with faculty guidance and approval.

Students seeking admission to candidacy for the BFA must be a BA Art major and pass a portfolio review, which can take place only after the following requirements have been met.

1. Completion of art studio core requirements: 113 and 116.
2. Completion of art history core requirements: ART 175 and 176.
3. Completion of one 200-level studio elective not in student's chosen area.
4. Completion of a minimum of 9 credit hours in chosen area with an average of B (not B-) or better.
5. Completion of 18 credits in UH Mānoa core requirements exclusive of art department courses.

All studio areas will hold an annual BFA Portfolio Review in late spring, at least one week prior to registration.

### Requirements

Students must complete 63 credit hours, including:

- Seven courses in one of the 11 program areas as indicated at the time of declaration (last 9 credit hours must be completed at UH Mānoa)
- Two art studio core courses (6 credit hours): ART 113, 116
- Three art history core courses (9 credit hours): ART 175, 176, 302
- Four art history elective courses (12 credit hours)
- Five art elective courses (15 credit hours)

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor

#### Requirements

- 21 credits in art, 15 of which must be from non-introductory courses

Courses used to meet General Education Core requirements cannot be credited toward the minor.

Students interested in pursuing a teaching career in elementary and secondary art education should seek advisement from the College of Education.

### Undergraduate Certificate in Islamic Studies

The purpose of this certificate is to increase understanding of Islam as a world religion through critical analysis of primary and secondary materials, to foster knowledge about the complexity among Islamic societies and their diverse cultural expressions, and to explore the role of Islam and Muslims in present and past world affairs.

This certificate is housed within the College of Arts and Humanities. The participating departments are Art and Art History, History, Philosophy, and Religion. Minimum prerequisites for acceptance into the program for undergraduates are sophomore or higher standing with a minimum GPA of 2.5 and the completion of at least one introductory course within one of the four participating departments with a grade of B or better.

A more complete description and the requirements are described under the Department of Philosophy.

### Graduate Study

The Department of Art and Art History offers two master's degrees, the MA in art history—Plan A (thesis) or Plan B (non-thesis), and the MFA in studio—Plan A only.

#### MA in Art History

The MA in art history emphasizes the arts of Asia and the Pacific. Applicants for the degree must hold a bachelor's degree from an accredited U.S. college or university or its equivalent from a recognized foreign institution. An undergraduate major in art history is desirable, but not necessary. In support of the application for admission, all applicants are required to send three original letters of recommendation, a sample of written work (preferably an art history seminar or term paper), and General Test scores from the GRE directly to the art department prior to the application deadline. The application form for graduate admission should be sent under separate cover to the Graduate Division.

**Plan A Requirements:**

Students must complete 36 credit hours, including:

- ART 670 Art Historical Methodology
- 9 credit hours of seminars in Asian and Pacific art history
- 6 credit hours of ART 700 or thesis

Students intending to engage in studies leading to the PhD are strongly encouraged to complete course work beyond the minimum MA Plan A requirements.

**Plan B Requirements:**

The non-thesis program is for students wishing to teach in community colleges or at the high school level. Required are 36 credit hours of which 18 must be taken in courses numbered above 600 including:

- ART 670 Art Historical Methodology
- 9 credit hours of seminars in Asian and Pacific art history

In either plan, up to 9 credits, with advisor's approval, may be earned in appropriate advanced courses in other UH Mānoa departments.

The more suitable plan will be mutually determined by the faculty and the student.

Students must also demonstrate a reading knowledge in a foreign language appropriate to their field of specialization, chosen in consultation with the area advisor. For more information on the MA in art history, contact Paul Lavy, PhD, email: paullavy@hawaii.edu.

**MFA Degree**

The MFA is the terminal degree in studio art. The normal period of study is three years in residence. Areas of specialization include ceramics, electronic arts, fiber, glass, painting, photography, printmaking, and sculpture. Although most MFA applicants apply to one of the above media specializations for admission, students may take electives in more than one medium and are encouraged to investigate new genres.

Applicants for the MFA must present evidence of a BFA or a BA with a strong studio art and art history background. The Department of Art and Art History acknowledges that some MFA applicants may not fit traditional criteria and will thus consider exceptional bachelor's degree recipients that exhibit relevant backgrounds, strong commitment, and distinct potential in the visual arts. An applicant with a transcript of 25% or more nontraditionally graded undergraduate or graduate credit hours must submit GRE scores and course performance report forms.

Supporting material of 20 samples of original work should be submitted on a cd (still images in jpeg format, no more than 1.5 mb each and video samples in .mov format) that illustrates abilities in an area of specialization, as well as potential for development within the scope of the department's facilities and personnel. This visual material and three letters of recommendation should be sent to the Department of Art and Art History. The application form for graduate admission should be sent under separate cover to the Graduate Division.

Deficient or incompatible undergraduate preparation may result in admission on a conditional basis and will require, at the discretion of the graduate faculty, additional course work.

After acceptance into the graduate program, admission to candidacy for the MFA degree will be based upon results of the graduate evaluation and a positive review of course work. Those failing must successfully pass on their second attempt or they will be dismissed from the program.

Failure to meet the requirements for continued registration or to show progress in course work will lead to probation and/or dismissal from the graduate program.

**Requirements**

Students must complete 60 credit hours, including:

- 24 credit hours with 6 credits each in ART 611, 612, 613, 614. Conditional or unclassified graduate students may enroll only in ART 611 for a maximum of 6 credits. Consent of instructor is required.
- 15 credits of electives, including ART 699 (not more than 9 credits)
- 6 credits of two art history courses (numbered 300 or above)
- 3 credits of ART 690
- 12 credits of ART 700 thesis, including an exhibition and written documentation

As part of the 60-credit degree requirement, ART 699 Directed Work may be taken for a maximum of 9 credits. Art courses numbered 300 and above and not required at the undergraduate level in the area of specialization are acceptable for graduate credit. Elective courses also may be selected from any other UH Mānoa department, provided such study is deemed useful and pertinent to the student's degree plan. All elective courses require appropriate preparation and the consent of the instructor and graduate student's advisor. For more information on the MFA program, contact gradart@hawaii.edu.

- \*A. S. Cowie, PhD—interstellar matter
- \*L. L. Cowie, PhD—extragalactic astronomy
- \*S. R. Habbal, PhD—solar and heliospheric physics
- \*D. N. B. Hall, PhD—infrared astronomy
- \*G. Hasinger, PhD—X-ray astronomy
- \*K. Hodapp, PhD—infrared astronomy
- \*A. W. Howard, PhD—exoplanets
- \*E. M. Hu, PhD—extragalactic astronomy
- \*R. Jedicke, PhD—asteroids
- \*R. Joseph, PhD—infrared astronomy
- \*N. Kaiser, PhD—theoretical astronomy
- \*R-P. Kudritzki, PhD—stellar astronomy

- \*J. R. Kuhn, PhD—solar astrophysics
- \*H. Lin, PhD—solar physics
- \*M. Liu, PhD—stellar astronomy
- \*J. Lu, PhD—star formation
- \*K. Meech, PhD—planetary astronomy
- \*R. Mendez, PhD—star formation
- \*B. Reipurth, PhD—star formation
- \*I. Szapudi, PhD—cosmology
- \*D. Tholen, PhD—planetary science
- \*A. T. Tokunaga, PhD—infrared astronomy
- \*J. Tonry, PhD—extragalactic astronomy
- \*R. B. Tully, PhD—galaxies and cosmology
- \*R. Wainscoat, PhD—asteroids
- \*J. Williams, PhD—submillimeter astronomy

**Degrees Offered:** MS in astronomy, PhD in astronomy

## The Academic Program

Astronomy (ASTR) is the branch of science that studies the structure and development of the physical world beyond Earth. It includes the study of planets and other objects of the solar system; the sun and stars and their evolution; the interstellar medium; the nature and dynamics of star clusters, galaxies, and clusters of galaxies; and the study of the nature and history of the universe itself—of the physical world taken in its largest extent in space and time.

Incomparable facilities for ground-based observational astronomy in the optical, infrared, and submillimeter regions of the spectrum reside in Hawai‘i. UH Mānoa’s facilities are located on Haleakalā on the island of Maui at an elevation of 3,000 meters and on Mauna Kea on the Big Island of Hawai‘i at an elevation of 4,200 meters. The summit of Mauna Kea is internationally recognized as the best observing site in the world. As a consequence, the major telescopes of 11 nations are located there, and UH Mānoa is guaranteed access to them. The Institute for Astronomy of UH Mānoa has major programs in the study of galaxies and cosmology, stellar and interstellar astronomy, solar astronomy, infrared and submillimeter astronomy, and planetary astronomy.

## Graduate Study

Most students entering the astronomy graduate program do so with the goal of achieving the PhD degree, but they must first obtain an MS degree unless they already have a closely related master’s degree from another university.

Applicants to the Astronomy Graduate Program should normally have a bachelor’s degree in physics, astronomy, or a related field. Requirements for admission include a minimum of 35 undergraduate credit hours in physics or astronomy, some of which must be in atomic and nuclear physics, electromagnetism, mechanics, optics, and thermodynamics. We require the GRE General Test, and the subject test in physics.

In selecting applications for entry to the astronomy program, we pay attention to high academic achievement, especially in physics, and to the letters of recommendation. Research experience at the undergraduate level is extremely valuable.

## Master’s Degree

The program offers both the Plan A (thesis) and Plan B (non-thesis) MS degrees, but almost all students opt for the Plan B program as it dovetails better with the requirements of qualification for PhD candidacy. The only real advantage of the Plan A master’s is that it can be completed within four semesters; it is therefore of interest only to those students who want to get a terminal master’s degree in the minimum time.

### Requirements

All MS students must take 30 credits of graduate level astronomy courses unless substitution is approved by the graduate chair. They must include ASTR 633 (Astrophysical Techniques) and at least three credits of ASTR 734-736. Plan A students must complete a thesis in accordance with UH Mānoa regulations, while Plan B students must pass the final examination (which is also the PhD qualifying examination) and satisfactorily complete at least one directed research project as judged by the qualifying exam committee.

## Doctoral Degree

Besides the course work required for the MS degree, PhD students are expected to undertake two directed research projects during their first two years, and present the results to the faculty both as a written report and an oral presentation. Students must pass the Qualifying Exam Assessment (which also serves as the Plan B MS degree final exam) by the end of their 5th semester in the astronomy graduate program.

### Requirements

Students who bypass the MS degree (because they already have an MS degree) must register for at least 3 credits of astronomy course work in each semester prior to the semester in which they will take the qualifying exam assessment; they must also take at least three credits of ASTR 734-736.

Students must pass the comprehensive exam, which takes the form of an in-depth review of the dissertation proposal, and achieve PhD candidacy by the end of their 6th semester in the astronomy graduate program. Finally, students must research, write, and defend a dissertation on a subject approved by their committee.

## Faculty

- \*S. Robinow, PhD (Chair)—neurogenetics
- \*J. H. Bailey-Brock, PhD—invertebrate zoology, reef ecology, Polychaetes
- K. M. Bennett, PhD—neuroscience and nephrology utilizing magnetic resonance imaging
- \*M. Butler, PhD—evolution ecology, adaptive radiation, functional morphology, biomechanics
- \*D. Carlson, PhD—evolution population biology, invertebrate biology
- \*K. Cole, PhD—ichthyology, behavioral ecology, reproductive biology, morphology and morphogenesis, microgravity biology
- \*H. G. de Couet, PhD—molecular cell biology, development biology, evolution
- \*L. A. Freed, PhD—evolutionary and behavioral ecology, ornithology, conservation biology
- M. A. Hixon, PhD—marine ecology and conservation biology
- \*C. L. Hunter, PhD—conservation biology, coral reef ecology, biology and ecology of marine invertebrates
- S. D. Kraft-Terry, PhD—academic advising and assessment
- P. B. J. Marko, PhD—biogeography, evolution and conservation
- A. L. Moran, PhD—marine ecology and evolution
- \*F. A. Reed, PhD—population genetics
- \*A. D. Taylor, PhD—population, theoretical, and insect ecology
- \*R. Thomson, PhD—evolutionary biology and phylogenetics
- \*T. Tricas, PhD—marine animal behavior
- \*L. Watling, PhD—impacts of humans on benthic environments; crustacean biology
- \*C. Z. Womersley, PhD—environmental physiology, biochemical adaptation, parasitology

## Cooperating Graduate Faculty

- W. W. L. Au, PhD—marine bioacoustics and echolocation
- B. Bowen, PhD—molecular genetics of marine vertebrates
- R. Cowie, PhD—evolutionary biology, biogeography, ecological genetics, snails, termites
- M. J. Donahue, PhD—spatial ecology of marine systems
- D. Duffy, PhD—conservation biology, sea birds
- R. Gates, PhD—molecular biology, developmental genetics, cell biology, physiology and ecology of corals
- E. G. Grau, PhD—comparative endocrinology, environmental physiology
- D. K. Hartline, PhD—quantitative neurophysiology and simulation of simple networks
- B. S. Holland, PhD—conservation biology of Native Hawaiian tree snails
- K. N. Holland, PhD—physiology, behavior, ecology of aquatic organisms
- T. D. Humphreys, PhD—cellular, molecular, biochemical, developmental biology in marine organisms
- P. J. Jokiel, PhD—coral reef biology, biogeography and ecology

- K. Y. Kaneshiro, PhD—systematics, evolution, insect behavior
- S. A. Karl, PhD—molecular ecology, systematics, and phylogeography of marine animals
- P. Lenz, PhD—neuroecology of zooplankton sensory systems
- P. E. Nachtigall, PhD—behavior and sensory processes of marine mammals
- R. Richmond, PhD—invertebrate zoology, conservation biology
- F. I. Thomas, PhD—marine ecology, biology of larvae
- R. Toonen, PhD—molecular genetics of marine organisms

## Affiliate Graduate Faculty

- G. Aeby, PhD—coral reef ecology
- R. Allison, PhD—systematics, biogeography and ecology
- C. Birkeland, PhD—conservation biology regarding coral
- A. Friedlander, PhD—marine ecology, marine conservation biology
- S. Miller, PhD—ecosystem and population conservation biology
- K. Rodgers, PhD—coral reef ecology

**Degrees Offered:** Undergraduate Certificate in Mathematical Biology, BA (including minor) in biology, BS in biology, BS in marine biology, minor in zoology, MS in zoology, PhD in zoology

## The Academic Program

The Department of Biology (BIOL) provides an academic home to students who wish to pursue a broad training in the biological sciences. It offers a BA degree, a BS degree in biology, a BS degree in marine biology, a minor in biology, an MS in zoology, and a PhD in zoology.

Biology is of fundamental importance in a science or liberal arts education, as it provides students with a keener insight into and a deeper appreciation of the many facets of living systems. Most students plan to use their training as preparation for professional work, such as aquaculture, biotechnology, biological research, dentistry, marine biology, medicine, optometry, park services, pharmacy, and teaching. Our graduates have an outstanding record of acceptance in advanced degree programs at dental, medical, pharmacy, and graduate schools. Many of our graduates also become teachers after obtaining a post-baccalaureate teaching certificate at the College of Education.

The biology curricula are designed to provide students with a strong background in the principles of biology and with rigorous upper division instruction in a number of basic areas. This combination of breadth and in-depth instruction allows students to develop the intellectual foundations and the skills necessary to deal with the specific biological concerns of today and the flexibility to meet the needs of the various professions. From this base, our graduates can pursue future specialization with confidence.

## Advising

Undergraduate student advising is mandatory. Prospective majors should come to Edmondson 216 for advising immediately, to design a curriculum that satisfies program requirements.

## Undergraduate Study

### BA Degree in Biology

#### Requirements (C [not C-] grade minimum)

- BIOL 171, 172, 265, 275, and 375 plus laboratories
- 20 credit hours in approved courses, including one each from microbiology and physiology, and one or more laboratory courses at the 300 level or above

#### Related Requirements (C [not C-] grade minimum)

- CHEM 161, 162, 272 plus laboratories and 273
- PHYS 151 and 152 or 170 and 272 plus laboratories
- MATH 215 or 241 or 251A

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BS Degree in Biology

#### Requirements (C [not C-] grade minimum)

- BIOL 171, 172, 265, 275, and 375 plus laboratories
- One course and laboratory from morphology/systematics
- One course from the approved list of physiology courses
- BIOC 441 or BIOL 402
- 16 credit hours in approved courses, including one or more laboratory courses at the 300 level or above: no more than 6 credits of BIOL/ZOOL 499 can apply to this requirement
- The above courses to include one or more courses at the 300 level or above from microbiology

#### Related Requirements (C [not C-] grade minimum)

- CHEM 161, 162, 272 plus laboratories and 273
- PHYS 151 and 152 or 170 and 272 plus laboratories
- MATH 215 and 216 or 241 and 242 or 251A and 252A
- ECON 321 or NREM 310 or SOCS 225 or MATH 243 or 304 or 373 or 472

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BS Degree in Marine Biology

#### Requirements (major of 2.5 GPA or higher)

- BIOL 171, 172, 265, 275, and 375 plus laboratories
- OCN 201
- BIOL 301 plus laboratory
- BOT 480
- ZOOL 475 plus laboratory
- BIOL 402 or BIOC 441
- MICR 401 plus laboratory
- 4 credits of directed research in approved disciplines or BIOL 403
- BIOL 404
- 6 credit hours in approved courses

#### Related Requirements (major of 2.5 GPA or higher)

- CHEM 161, 162, and 272 plus laboratories and 273
- PHYS 151 and 152 or 170 and 272 plus laboratories
- MATH 215 and 216 or 241 and 242 or 251A and 252A
- ECON 321 or NREM 310 or SOCS 225 or MATH 373 or MATH 472

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor in Biology

#### Requirements (C [not C-] grade minimum)

- Students must complete BIOL 265/265L, 275/275L, and 375/375L; and a minimum of 3 credits from the following:
- BIOL 301/301L, 331, 363, 390, 395, 401, 402, 407, 408/408L, 425, and 499
  - Approved upper level botany, biochemistry, microbiology, physiology, and zoology courses

### Minor in Zoology

Please go to page 179 for more information on this degree.

### Undergraduate Certificate in Mathematical Biology

The purpose of the certificate is to induce students to pursue the interdisciplinary study of biology and mathematics together with research. The course work will be similar to, but less than, that required to receive a minor in mathematics or biology. However, the students will also have to do a substantial amount of research in addition to the course work. The emphasis in the certificate is different, however, in that the majority of the work is interdisciplinary.

Students will be considered accepted into the Mathematical Biology Certificate Program upon formal request for acceptance and completion of either MATH 304 or 305 with a grade of C or better. To receive the certificate, students must complete 15 credits of approved course work with no grade below a C and attain a GPA of 2.5 in the collection of courses used to satisfy the certificate requirements. Due to the interdisciplinary nature of the certificate, 6 credits of required electives will differ depending on a student's major. Courses used towards the certificate can only be double-dipped with focus requirements.

#### Prerequisites to the Certificate

- BIOL 171 (lab not required)
- CHEM 161 or 171 (lab not required)
- year of calculus (MATH 215/216, MATH 241/242, MATH 251A/252A)
- electives may have additional prerequisites

#### Requirements for the Certificate (15 credits)

- required courses (9 credits): MATH 304, 305, MATH/BIOL 490 (capstone)
- math majors (6 credits): BIOL 172, and 265 or 275 (lab not required)
- life science majors (6 credits): two courses selected from MATH 243/253A, 301, 302, 303, 307, 311, 371, 373, 402, 403, 407, 414, 416, 471, 472
- other majors: completion of above required courses, and at least 6 credits of electives approved by the Committee

Participation in an interdisciplinary Mathematical Biology research project is required. These projects must be substantial, requiring at least the effort of a 5 credit 400-level course; examples include a senior honors research project, summer Research Experiences for Undergraduate programs, and the Undergraduate Biology and Mathematics Research Program; students are advised to discuss their projects with an advisor from the Mathematical Biology Certificate Coordinating Committee before commencing. A research paper based on this research project must be submitted to and approved by the Committee. Students are expected to present their research to an approved symposium or conference.

## Graduate Study in Zoology

Please see page 180 for more information.

## Botany

College of Natural Sciences  
St. John 101  
3190 Maile Way  
Honolulu, HI 96822  
Tel: (808) 956-8369  
Fax: (808) 956-3923  
Web: [www.botany.hawaii.edu](http://www.botany.hawaii.edu)

### Faculty

- \*T. A. Ranker, PhD (Chair)—systematics and evolution
- \*A. R. Sherwood, PhD (Graduate Chair)—systematics, evolution and biogeography of algae
- \*A. S. Amend, PhD—evolutionary ecology
- \*K. A. Barton, PhD—evolutionary ecology
- \*C. C. Daehler, PhD—population biology, invasive plants, plant-herbivore interactions
- \*D. R. Drake, PhD—ecology and conservation
- \*D. C. Duffy, PhD—conservation, restoration ecology
- \*O. G. Gaoue, PhD—quantitative ecology and ethnoecology
- \*N. A. Hynson, PhD—community ecology
- \*S. C. Keeley, PhD—molecular systematics, evolution in island systems
- \*M. Merlin, PhD—biogeography, ethnobotany, natural history of the Pacific
- \*C. W. Morden, PhD—molecular systematics and evolution of plants and algae
- \*C. M. Smith, PhD—physiological ecology of marine macrophytes, marine ecology, cell biology
- \*A. H. Teramura, PhD—global climate change, ozone depletion, physiological ecology
- \*T. B. Ticktin, PhD—ethnoecology, conservation
- \*G. J. Wong, PhD—mating systems and biosystematics of basidiomycetes

### Cooperating Graduate Faculty

- D. Borthakur, PhD—plant molecular genetics
- D. A. Christopher, PhD—gene regulation of photosynthesis, uv effects
- C. L. Hunter, PhD—reef ecology
- R. Ostertag, PhD—ecology

### Affiliate Graduate Faculty

- C. Dunn, PhD—conservation, habitat restoration
- S. James, PhD—plant ecology, systematics, phycology
- L. Loope, PhD—ecology and conservation
- D. H. Lorence, PhD—systematics of flowering plants (Kaua'i)

### Adjunct Faculty

- A. K. Chock, MS—Hawaiian ethnobotany
- D. R. Herbst, PhD—endangered and threatened Pacific flora, plant morphology

### Retired Faculty In Residence

- K. W. Bridges, PhD—systems ecology, ethnobotany
- D. Mueller-Dombois, PhD—ecology
- C. Smith, PhD—conservation, Hawaiian lichens

**Degrees Offered:** BA (including minor) in botany, BS in botany, BS in ethnobotany, MS in botany, PhD in botany

## The Academic Program

The Department of Botany (BOT) trains students to understand and appreciate the diversity of plants, algae, and fungi that sustain the world's terrestrial, freshwater, and marine ecosystems. The curriculum provides broad-based training, from traditional field methods to the latest molecular techniques, and the program offers excellent opportunities for research experience for undergraduates and graduate students.

The department's programs take advantage of Hawai'i's unique location by offering students unparalleled opportunities to explore the botanical diversity of tropical freshwater, marine, and terrestrial ecosystems through a wide range of field and laboratory experiences. Students may focus on topics ranging from the ecology, evolution, and conservation of Hawai'i's unique ecosystems and flora, to the threats posed by invasive species, to the uses of plants by humans.

At the undergraduate level, the department offers a BA, BS, and minor degree in botany and a BS in ethnobotany. The MS and PhD in botany are offered at the graduate level. All botany faculty members, regardless of rank, teach courses at both the undergraduate and graduate levels. Financial support for undergraduates is available via competitive tuition waivers and scholarships. Tuition waivers and teaching and research assistantships are available to graduate students. Undergraduate majors will be prepared for careers as naturalists, environmental planners, policy makers, conservation biologists, teachers, researchers, and museum or organizational directors. Recipients of advanced degrees commonly follow careers with government agencies, conservation organizations, and colleges and universities in the U.S. and abroad.

The department's website at [www.botany.hawaii.edu](http://www.botany.hawaii.edu) provides glimpses into the many environments and special plants in Hawai'i, and provides further information about faculty interests and research.

### Affiliations

Botanical studies are enhanced by cooperative working relationships between the department and Hawai'i Institute of Marine Biology, Harold L. Lyon Arboretum, Kewalo Marine Laboratory of the Pacific Biomedical Research Center, Pacific Cooperative Studies Unit of the National Park Service, The Nature Conservancy, State of Hawai'i Department of Land and Natural Resources, U.S. Fish and Wildlife Service, National Tropical Botanical Garden, Honolulu Botanical Garden, Herbarium Pacificum and the Department of Botany of the B.P. Bishop Museum, Hawai'i Agriculture Research Center (formerly Hawaiian Sugar Planters' Association), and Waikiki Aquarium.

### Advising

An undergraduate advisor guides undergraduates through the academic program and is available to talk with prospective majors about their interests. Graduate students entering the department are assigned an interim committee of three faculty members who provide general advice. The student's committee and the graduate program chair oversee requirements and provide a link between the Graduate Division and the student. Graduate students are encouraged to interact with each faculty to become acquainted with various research approaches and areas of expertise. Once a research topic has been identified, a permanent committee will be established to provide specific assistance.

## Undergraduate Study

### BA Degree in Botany

The BA degree provides students flexibility to pursue a broad liberal arts education and still gain a sound foundation in botany with an area of particular interest. Courses are available in conservation, ecology, ethnobotany, evolution, physiology, structural botany, systematics, and selected faculty research specialties. The courses applied toward the botany major may be selected with the student's interest area in mind.

#### Requirements

- Students must earn a grade of C (not C-) or higher in each course applied to the major, including required courses in Chemistry, Physics, and Math
- 4 credits required seminars: BOT 100, 200, 300, 400
- 42 credits of the following:
  - BOT 101/101L
  - BOT 201/201L
  - BOT 202/202L
  - BOT 301/301L
  - BOT 302
  - BOT 303
  - BOT 420
  - BOT 462
  - BIOL 171/171L
  - BIOL 275/275L
  - BIOL 375/375L
- Minimum 9 credits of electives
  - Two of either BOT 401, 450, or 499
  - One of BOT 430/430L, 461, or 480
  - Any of the following to fulfill minimum total credit requirement of 55 credits of Botany and Biology: BOT 350, 430/430L, 444, 453, 454, 456, 461, or 480
- 19 credits other required courses: CHEM 161/161L, 162/162L, 272/272L, PHYS 100/100L, and MATH 100

Prospective majors should consult the department promptly to design a curriculum that satisfies these requirements.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BS Degree in Botany

The BS degree is designed for those students who plan a career in science with an emphasis on plants, especially those intending to do graduate studies. A full complement of basic courses in biology, chemistry, math, and physics is required in addition to botany courses. As with the BA degree, students may choose among a variety of courses to fulfill requirements for the major.

#### Requirements

- Students must earn a grade of C (not C-) or higher in each course applied to the major, including required courses in Chemistry, Physics, and Math
- 4 credits required seminars: BOT 100, 200, 300, 400
- 42 credits of the following:
  - BOT 101/101L
  - BOT 201/201L
  - BOT 202/202L
  - BOT 301/301L

- BOT 302
- BOT 303
- BOT 420
- BOT 462
- BIOL 171/171L
- BIOL 275/275L
- BIOL 375/375L
- Minimum 9 credits of electives
  - Two of either BOT 401, 450, or 499
  - One of BOT 430/430L, 461, or 480
  - Any of the following to fulfill minimum total credit requirement of 55 credits of Botany and Biology: BOT 350, 430/430L, 444, 453, 454, 456, 461, or 480
  - 27 credits of other required courses: CHEM 161/161L, 162/162L, 272/272L, PHYS 151/151L, 152/152L, MATH 215 (or higher), and MATH 216 (or higher)

Prospective majors should consult the department promptly to design a curriculum that satisfies these requirements. BOT 135 and 160 do not fulfill major requirements.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BS Degree in Ethnobotany

The BS in ethnobotany provides a unique learning environment in which biological and social science theories are integrated. Study in ethnobotany will enable students to work in areas related to the conservation of biological and cultural diversity, work in natural health care businesses and practices, enter graduate school programs in ethnobotany, botany, anthropology, and related fields or enter advanced medical training programs.

#### Requirements

- 4 credits required seminars: BOT 100, 200, 300, 400
- 42 credits of the following:
  - BOT 101/101L
  - BOT 105
  - BOT 201/201L
  - BOT 202/202L
  - BOT 301/301L
  - BOT 399/499
  - BOT 420
  - BOT440
  - BOT 461
  - BIOL 171/171L
  - ANTH 152
- 9 credits of electives
  - Two of either: BOT 442, 444, 446, or BIOL 440
  - One other 400 level BOT course
- 12 credits other elective courses
  - Two 400-level social science courses in ANTH, GEOG, HWST, or other culture-focused courses not applied to other requirements in the Ethnobotany degree program
  - Biogeography: two of either: BIOL 320, 360, 410, GEOG 309, 408, 409, 422, 426 or other biogeography course
- Other required courses: CHEM 161/161L, 162/162L, 272/272L, PHYS 151/151L, PHYS 152/152L, MATH 215, and MATH 216

Prospective majors should consult the department promptly to design a curriculum that satisfies these requirements. BOT 135 and 160 do not fulfill major requirements.

## Minor

### Requirements

Students must complete 15 credit hours in non-introductory courses with a grade of C (not C-) or higher.

#### For Ethnobotany:

- BOT 440 and 461
- Two of: BOT 442, 444, or 446
- One 400 level Social Science course that forms part of an ethnobotany theme with the other courses

#### For Evolutionary Botany:

- BOT 201/201L and 462
- Electives: BOT 420, 430, 450, 461, or 480

#### For Tropical Field Botany:

- BOT 453
- Electives: BOT 201/201L, 450, 454, and 461

Individual programs may be designed by the student and advisor for approval by the faculty.

## Graduate Study

The department offers programs leading to MS and PhD degrees. Hawaii's location offers unique opportunities to study the patterns and processes of evolution, ecology, and morphological and physiological variations within a geographically variable yet isolated setting. Abundant opportunities are available for research in marine, aquatic, and terrestrial environments, and faculty expertise spans a phylogenetically diverse set of organisms including land plants, algae, and fungi. The faculty is composed of a number of nationally and internationally recognized scientists in conservation, ecology, ethnobotany, and systematics.

Recipients of the MS degree often teach at the high school level, pursue careers with state or federal government agencies, or work with environmental organizations and consultancies. Those with a PhD may teach and/or conduct research in colleges and universities, work as environmental consultants, and pursue careers with environmental organizations or the government.

A listing of faculty members and their research areas and publications is available on the department website: [www.botany.hawaii.edu](http://www.botany.hawaii.edu). Applications for admission and opportunities for financial aid and support are available upon request.

At the time of application, three letters of recommendation from persons who can appraise the student's aptitude for advanced work are required. In their statement of objectives; applicants should identify a specific area of study within botany: conservation, ecology, ethnobotany, general botany, marine botany, systematics/evolution, or whole plant biology. Minimum curriculum requirements for each track are available at the department website. Applicants will be evaluated for their level of preparation and potential to successfully complete their proposed plan of study. Application deadlines are **January 15** for fall semester. Normally, teaching assistantships are available for the beginning of fall semester, but openings may occur mid-year.

MS and PhD students are admitted to candidacy when they have successfully completed any requirements and pre-program deficiencies identified by their committee and after they have demonstrated the ability to collect, analyze, integrate, and communicate scientific information effectively in the English language.

Because scientific findings are typically presented orally as well as in writing, all students must gain and demonstrate proficiency in the presentation of seminars. Students must complete BOT 610 to satisfy this requirement. In addition, MS Plan A and PhD students must present two public seminars: first, outlining the background of a research problem and the student's proposed research program; and second, at the conclusion of their program, describing the research results and conclusions. The latter seminar also includes a final examination by the thesis or dissertation committee. The final examination for the MS Plan B students includes the presentation of a public seminar summarizing the results of one of their directed research studies.

## Master's Degree

Plan A (thesis) and Plan B (non-thesis) are separate MS programs with distinct purposes. Before admission to candidacy, the plan that a candidate intends to follow must be declared and approved. Plan A is the usual program to be taken by candidates intending a research-related career. Plan B is for students who do not intend to make research in botanical sciences their profession. Both plans require students to take a comprehensive written exam in general botany.

### Plan A (Thesis) Requirements

For Plan A, a minimum of 30 credit hours is required. Of that, a total of 12 credit hours shall be for thesis and a minimum of 18 additional credit hours for courses approved by the candidate's committee.

### Plan B (Non-thesis) Requirements

For Plan B, a minimum of 30 credit hours is required. Of that, a total of 18 credit hours shall be earned in the major field or an approved related field in courses numbered 600 and above (excluding BOT 699 and BOT 700). Of these credits, at least 6 (but not more than 9) must be for directed research in aspects of botanical sciences chosen by the candidate in consultation with his or her committee.

## Doctoral Degree

The PhD program includes gaining a working knowledge in an approved foreign language or other research-tool subject, as well as passing a comprehensive examination and writing a dissertation. Suitability of the language or tool subject is determined by the graduate faculty according to the student's area of specialization, and proficiency is ordinarily determined by examination or satisfactory completion of a specific course of study.

### Requirements

The comprehensive examination is a combination of oral and written parts. The former is conducted by the candidate's committee, plus any members of the graduate faculty who wish to attend. In addition to general botany, the candidate is examined in-depth in areas of related disciplines that have been previously agreed upon by the student and the committee.

The dissertation is expected to be an original contribution based on independent research. It is initiated by the preparation

of a critical review of the literature that becomes the basis for a dissertation proposal. Dissertation research for the PhD degree is carried out in an aspect of botanical sciences for which a member of the graduate faculty of the field will accept responsibility as committee chair.

## Chemistry

College of Natural Sciences  
 Bilger 239  
 2545 McCarthy Mall  
 Honolulu, HI 96822  
 Tel: (808) 956-7480  
 Fax: (808) 956-5908  
 Email: chemdept@hawaii.edu  
 Web: www.manoa.hawaii.edu/chem

### Faculty

- \*K. K. Kumashiro, PhD (Chair)—physical chemistry, solid-state nuclear magnetic resonance of proteins and peptides
- \*P. G. Williams, PhD (Associate Chair)—organic and natural products chemistry
- \*W. J. Chain, PhD—organic chemistry, synthesis of natural products
- \*J. D. Head, PhD—theoretical chemistry, electronic structure determination of large molecules and clusters
- \*T. K. Hemscheidt, PhD—organic and bioorganic chemistry, biosynthesis of natural products
- \*J. T. Jarrett, PhD—biochemistry, enzymology, structure and function of metalloenzymes
- \*C. M. Jensen, PhD—inorganic and organometallic chemistry, polyhydride and dihydrogen metal complexes, homogeneous catalysts, hydrogen storage materials
- \*R. I. Kaiser, PhD—physical chemistry, reaction dynamics, chemistry in extraterrestrial environments
- \*H. L. Ng, PhD—membrane protein crystallography
- \*M. A. Tius, PhD—organic chemistry, synthesis of natural products

### Cooperating Graduate Faculty

- T. Apple, PhD—physical chemistry, solid-state NMR
- D. M. Jameson, PhD—fluorescence spectroscopy, protein interactions
- C. J. Simmons, PhD—inorganic chemistry, metal-dioxygen and Jahn-Teller copper complexes, structure determination by X-ray crystallography

**Degrees Offered:** BA (including minor) in chemistry, BA in biochemistry, BS in chemistry, BS in biochemistry, MS in chemistry, PhD in chemistry

### The Academic Program

Chemistry (CHEM) stands at the crossroads between physics and biology. As biological processes are examined in ever finer detail, chemistry is increasingly called upon to provide the insights, techniques, and materials needed to understand the workings of living organisms, including ourselves. Chemistry is thus a popular major for those interested in biomedical careers. In another direction, chemistry is also essential to the search for solutions to the ecological problems created by the ever-expanding range of human activities. Chemists create new substances with new properties that find application throughout our civilization.

As a major, chemistry provides a solid foundation of scientific knowledge and experimental skills that enables one to specialize in many directions toward careers in research, teaching, business, or professional practice. Also, because virtually all constructed things we see and use in our daily lives involve chemistry, there is a huge pool of jobs for chemists in the manufacturing industries.

## Undergraduate Study

### BA in Chemistry Degree

#### Requirements

- 27 credit hours in CHEM courses numbered 200 and above, including CHEM 272/272L, 273/273L, 274/274L, 351, 352/352L, and either 425/425L or 445/445L
- MATH 243 (Calculus III) or 253A
- PHYS 170/170L, and 272/272L
- Recommended languages: German, French, Russian, or Japanese

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BS in Chemistry Degree

#### Requirements

- 41 credit hours in CHEM courses numbered 200 and above, including CHEM 272/272L, 273/273L, 274/274L, 351, 352/352L, 372 or BIOL/MBBE/PEPS 402 or BIOC 441, 425/425L, 427, and 445/445L
- A minimum of three credits from CHEM 399, 601, 602, 622, 641, 642, 643, 651, 653, or 657
- MATH 243 (Calculus III) or 253A
- PHYS 170/170L and 272/272L
- Recommended electives: MATH 244 and PHYS 274
- Recommended languages: German or French

To view a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BA in Biochemistry Degree

#### Requirements

- 24 credit hours or more in CHEM courses numbered 200 and above, including CHEM 272/272L, 273/273L, 274/274L, 361 or 351/352, and 372
- BIOL 171/171L, 172/172L, 275/275L, and 402
- MATH 215 or 241 or 251A and 242 or 252A
- PHYS 170/170L and 272/272L
- Three elective lecture courses and one accompanying laboratory course from select CHEM, BIOL, MBBE, or MICR courses numbered 300 or higher\*.

\*Upon approval of a Chemistry Department Advisor and the Chair, the elective requirements may be modified to accommodate a special emphasis or interdisciplinary program that is appropriate for a major in Biochemistry.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## **BS in Biochemistry Degree**

### **Requirements**

- 30 credit hours or more in CHEM courses numbered 200 and above, including CHEM 272/272L, 273/273L, 274/274L, 361 or 351/352, 372, 462, 463L.
- BIOL 171/171L, 172/172L, 275/275L, and 402.
- MATH 215 or 241 or 251A and 242 or 252A
- PHYS 170/170L and 272/272L
- 14 credit hours or more, which must include two laboratory courses, from the following:
  - At least one course from CHEM 352L, 399, 425/425L, 427, 445/445L
  - At least two courses from MICR 351/351L, BIOL 375/375L, BIOL/MBBE 401, BIOL/MBBE 407, BIOL 408, BIOL/MBBE 483, MBBE 412, MBBE 480, MICR 431/431L, MICR 461/461L, MICR 463/463L, MICR 475/475L, MICR 490/490L, ZOOL 430/430L\*.

\*Upon approval of a Chemistry Department Advisor and the Chair, the elective requirements may be modified to accommodate a special emphasis or interdisciplinary program that is appropriate for a major in Biochemistry.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### **Minor**

#### **Requirements**

- 17 credit hours in CHEM courses numbered 200 and above, including CHEM 272/272L, 273/273L, 274/274L, and 351

### **Graduate Study**

The department offers MS and PhD research and study opportunities in inorganic, organic, and physical chemistry, with specialized research opportunities in geochemistry and marine-related chemistry.

Intended candidates for the MS or PhD must present the minimum undergraduate preparation in general, organic, analytical, and physical chemistry courses. Foreign applicants for the MS and the PhD must take the GRE General Test.

Graduate study in chemistry consists of course work, independent study, teaching, and research. A thesis or dissertation based on original research is the most important part of the master's or doctoral degree respectively. Candidates for advanced degrees are required to serve as teaching assistants for a portion of their program.

Additional details concerning MS and PhD degree requirements, as well as assistantships available to prospective students, are outlined in brochures available upon request from the department.

### **Master's Degree**

#### **Requirements**

The candidate for the MS in chemistry (Plan A only) is granted 12 credit hours for an acceptable thesis. The remaining 18 credit hours must be selected from acceptable graduate courses in chemistry (listed in this *Catalog*) or from graduate offerings in mathematics and the natural sciences. Required courses are CHEM 691 or 692, and 700.

## **Doctoral Degree**

### **Requirements**

Doctoral candidates must complete a minimum of six semesters of graduate study of which at least three semesters must be in residence at UH Mānoa. Courses are selected from acceptable graduate courses in chemistry listed in this *Catalog* and from graduate offerings in related disciplines as directed by the faculty. Candidates must demonstrate mastery of core material in graduate courses in their chosen areas. Each candidate must pass a comprehensive oral examination consisting of the defense of an original research proposal written by the candidate and a résumé of the candidate's dissertation research and its current status.

The most important requirement for the PhD degree is the research project that culminates in the dissertation. Prior to beginning the second semester of study, each candidate selects one member of the chemistry graduate faculty to serve as his or her research director. The research director works with the candidate throughout his or her program and chairs the candidate's dissertation committee.

More information about the chemistry department and its programs can be found on its website.

## **Communication**

School of Communications  
College of Social Sciences  
Crawford 320  
2550 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-8715  
Fax: (808) 956-5396  
Email: [comm@hawaii.edu](mailto:comm@hawaii.edu)  
Web: [www.communications.hawaii.edu](http://www.communications.hawaii.edu)

### **Faculty**

- \*A. Auman, PhD (Chair)—journalism, media ethics
- \*J. Winter, PhD (Graduate Chair)—emerging communication technology and policy
- \*W. Buente, PhD (Undergraduate Chair)—information and communication technologies
- \*P. Buskirk, MFA—multimedia, visual media
- \*F. Dalisay, PhD—mass communication
- G. Kato, MA—broadcast news, law, reporting
- \*T. Kelleher, PhD—public relations, social media
- \*H. Kramer, PhD—intercultural communication
- \*M. Moody, MFA—video and film production

### **Cooperating Journalism Graduate Faculty**

J. C. Ady, PhD—organizational communication  
T. Brislin, PhD—mass communication, ethics  
C. Ho, PhD—communication technologies  
D. Lassner, PhD—telecommunication, public relations  
N. Okamura, PhD—telecommunication  
M. Shapiro, PhD—political science

### **Affiliate Graduate Faculty**

C. Clarke, MA—intercultural organizational intervention  
W. Dissanayake, PhD—intercultural counseling  
R. Halverson, PhD—telecom, political communication, software development

K. Kawamoto, PhD—digital media, health communication  
S. Wu-Bott, PhD—mediated interpersonal communication

**Degrees Offered:** BA in communication, MA in communication, PhD in communication and information sciences (interdisciplinary), Graduate Certificate in Telecommunications Information Resource Management

## The Academic Program

Communication (COM) study provides undergraduate and graduate students an academic climate consistent with the mission of the College of Social Sciences. The program focuses on active learning and inquiry in fundamental communication processes with specific emphasis on media arts (digital cinema and multimedia), communication in communities (local, global, organizational, and intercultural), and information and communication technologies (ICTs) as preparation for fruitful careers, enlightened citizenship, and lifelong learning.

In addition to the faculty and staff, resources include both a state-of-the-art media laboratory and computer-communication laboratories. The internship program facilitates the merging of academic knowledge with applied experience in students' fields of interest.

### Affiliations

The East-West Center, Pacific Telecommunications Council, Telecommunications and Social Informatics Research Program (TASI), and the many international conferences dealing with Asian/Pacific affairs provide a stimulating environment for international and intercultural communication.

### Advising

Each undergraduate major is assigned a faculty advisor. In addition, an undergraduate chair provides a general point of contact for aspiring and declared majors. The graduate program parallels the undergraduate advising structure. However, once a student is admitted to candidacy, the student chooses a permanent advisor for the remainder of his or her program.

## Undergraduate Study

The undergraduate program offers courses that provide students with a sound understanding of fundamental communication processes in contexts ranging from small groups to formal organizations, the community, and society at large. The program also provides students the opportunity to select courses that allow them to specialize in one or more of three areas of concentration: media arts, communication and communities, and ICTs and policy.

### Bachelor's Degree

#### Requirements

Students must complete 33 credit hours of communication courses, including the following:

- Introduction to Communication (COM 201)
- three foundation courses (COM 310, 320, and 330)
- one capstone course (COM 476, 477, 478, or 479)

To declare a major in communication, students must be enrolled in, or have completed with a B (3.0) or better in COM 201, Introduction to Communication, and have completed at least 12 credit hours with a 2.5 GPA. Upon declaration of their major, students are assigned a personal faculty advisor

to assist them in their progress through the program. Students select the remaining number of credit hours from courses that will support their personal and career interests. Students are also responsible for meeting the prerequisite requirements for at least one of the capstone courses in order to graduate in a timely manner. Students must earn a C (2.0) or better in every course counted toward the major degree requirements.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Graduate Study

### Master's Degree

The School of Communications offers a graduate program leading to the MA degree in communication. The program areas of specialization reflect the expertise of our graduate faculty in intercultural communication, global communication, information and communication technologies, social media, public relations, and communication policy and planning. Both individual faculty members and the program as a whole work within sociocultural and sociotechnical perspectives. The goal of our program in terms of student learning is to help our students build and exchange knowledge in areas relevant to the broad field of communication and to our specific areas of specialization.

Qualified applicants are admitted to the program in the fall semester only. Applicants are not required to have an undergraduate communication degree. All applicants must fulfill the UH Mānoa Graduate Division's admission requirements. Applicants to the program must submit to the school a statement of academic objectives and the planned role of our program in helping meet those objectives. Applicants must also arrange for three letters of recommendation to be sent to the school. These letters should be written by persons who are familiar with the student's academic accomplishments. Letters from former professors are preferred. Students applying from non-English-speaking countries must have a minimum TOEFL score of 600 (paper-based) or 250 (computer-based). Applicants whose academic objectives match our program specializations will be admitted as classified students on a space-available basis.

Each classified student admitted into our program is assigned an interim advisor who assists the student in the initial planning of his or her degree program. The student may, at any time, change that advisor by informing the program staff of the change. Once the student has selected a thesis or practicum committee chair (see below) that faculty member becomes his or her permanent advisor. The student remains, however, primarily responsible to ascertain that all program requirements are met in a timely fashion.

Each student must complete a minimum of 33 credits with at least a 3.0 grade point average. These credits are to be distributed by taking:

- Both foundation courses 611 Communication Theories and 612 Communication Inquiry (6 credits).
- Two core courses (6 credits) from our specializations in Organizational and Intercultural Communication (623 and 643), Telecommunication and New Media (633 and 634), or Global Communication and Journalism (644).
- One seminar 691 (3 credits) (repeatable up to 6 credits).
- One capstone activity (6 credits) selected from 700 (Plan A-Thesis) or 695 (Plan B-Practicum).

- The remaining 12 credits are selected from: additional core courses, advanced courses 646 and 660; courses from the school's Graduate Certificate Program in Telecommunication and Information Resource Management (TIRM) 680, 681, 682, 683, 684; Directed Research 699; 400-level augmented undergraduate courses, or graduate courses outside the program (both the latter require approval of committee chair; maximum 6 credits).

Each student is expected to take at least one 3-credit course or seminar each semester. All substitutions, exceptions, and/or courses external to the program must be approved by the thesis or practicum committee chair and noted in the student's official records. If students are not enrolled for courses during a semester they must apply for an official leave of absence. In pursuit of their academic goals students often earn more than the minimum 33 credits. The program can be compressed into 15 months or stretched out over 60 months. Typically, however, students complete the program in 18 to 24 months.

On completing 611 and achieving a 3.0 grade average in all completed course work, each classified student is eligible for admission to candidacy allowing him or her to formally identify a degree plan from the two options available. These options are to complete either a thesis (Plan A) or practicum (Plan B) as his or her capstone activity. At the same time the student selects the chair and members of the thesis or practicum committee. That committee is responsible for supervising and evaluating the student's thesis or practicum activity. The committee must be comprised of at least three members of the graduate faculty from the university with at least two of those members, including the chair, from our program. Both the committee members and the topic of the activity must be approved by the Graduate Division and research to be conducted approved by the university's Institutional Review Board (IRB). At the completion of the student's program, he or she must take a two-hour oral exam on their knowledge of the field and defense of their thesis or practicum report.

For further information please visit our website at [www.communications.hawaii.edu/com/graduate/](http://www.communications.hawaii.edu/com/graduate/).

### **Doctoral Degree in Communication and Information Sciences**

The School of Communications is one of the academic programs that participates in an interdisciplinary doctoral program in Communication and Information Sciences (CIS). See the "Interdisciplinary Program" section for more information on that program.

## **Communicology** (formerly Speech)

College of Arts and Humanities  
George 326  
2560 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-8202  
Fax: (808) 956-3947  
Email: [COMG@hawaii.edu](mailto:COMG@hawaii.edu)  
Web: [manoa.hawaii.edu/communicology](http://manoa.hawaii.edu/communicology)

### **Faculty**

- \*R. K. Aune, PhD (Chair)—message and information processing, natural language processing, research methods
- \*A. S. E. Hubbard, PhD (Graduate Chair)—nonverbal communication, conflict and relational management, deception
- \*W. F. Sharkey, PhD (Undergraduate Chair)—family communication, interpersonal, conflict management, interviewing and interrogation
- \*K. S. Aune, PhD—relational management, emotion
- \*R. Boller, EdD—argumentation and debate, public speaking, interpersonal and intercultural communication, leadership
- \*R. E. Cambra, PhD—interpersonal and instructional strategies, negotiation, intercultural
- \*J. Gasiorek, PhD—social cognition, intergroup & intergenerational communication, research methods
- \*M. S. Kim, PhD—intercultural communication, persuasion and social influence
- \*H-R. Lee, PhD—health communication, campaigns, persuasion and social influence
- \*H. E. Lee, PhD—research methods, intercultural communication, interpersonal communication in business settings
- J. Matayoshi, MA—public presentations, interpersonal and persuasive communication
- \*R. Tokunaga, PhD—communication technology in human relations, media selection and effects; statistical methods
- \*J. Zhang, PhD—interpersonal/intergroup communication, evolutionary theory and communication, research methods

**Degrees Offered:** BA (including minor) in communicology, MA in communicology

### **The Academic Program**

The Department of Communicology (formerly Speech) (COMG) has as its primary objectives the development of knowledge in and instruction concerning the process of communication. This involves three fundamental areas of emphasis. The first area is human message processing, which involves understanding the function and structure of the various codes, verbal and nonverbal, used to form messages in communication as well as examining the encoding and decoding processes involved in communication. The second area is relational communication, which focuses on factors that influence growth, maintenance, and termination of relationships. The third area, social influence, deals with the processing of beliefs, attitudes, and behavioral modification, including gaining compliance, conflict resolution, persuasive campaigns, and propaganda.

Communicology is predominantly a discipline of systematic, purposeful thinking and communicating. Students obtain a liberal education of considerable breadth and depth in regard to communication theory. Furthermore, they are afforded ample opportunity to develop their communicative skills by applying

theory in such diverse activities as interviewing, persuasion, group discussion, organizational communication, conflict management, intercultural communication, public speaking, relational communication, deceptive communication, and health communication. Indeed, the basic philosophy of this department—and it is stressed in every course and co-curricular program offered—is that there is no surer preparation for professional life and participation in society than an education that enhances the ability of the individual to maintain lifelong learning and the skills to communicate effectively.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

Students must complete 33 credit hours, including:

- COMG 251, 301, 302, 364, 371, and 381
- 5 upper division elective courses

COMG 301 and 302 should be taken no later than the semester after the major is declared. In residence policy: A minimum of 15 credit hours which includes COMG 302, must be taken in the Department of Communicology at UH Mānoa. Introductory courses do not count as electives. Electives must have a prerequisite or be numbered 300 or above and only three (3) credit hours of COMG 399 or COMG 499 (or a combination of the two classes), and/or up to three (3) credit hours of COMG 453 may be applied to the communicology major degree.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor

#### Requirements

Students must complete 15 credit hours of communicology, including:

- COMG 364, 371, and 381
- 2 upper division elective courses
- Introductory courses, COMG 399, and COMG 499 *do not* count toward the minor. Electives must have a prerequisite or be numbered 300 or above and cover a specific content area.

## Graduate Study

### Master's Degree

The Department of Communicology offers an innovative MA program emphasizing the central processes and functions of human communication. To that end, course work, seminars, and student research develop a cross-situational understanding

of theory and research in the three areas central to the discipline: message processing, relational communication, and social influence. In addition, given our cultural and geographical advantages at UH Mānoa, the Department of Communicology excels in teaching and research in intercultural communication.

All applicants for the MA program in communicology must supplement the application and transcripts required by the Graduate Division with three letters of recommendation (preferably from professors with whom the applicant has worked), a one-page statement of goals, and the GRE General Test scores. These supplementary items should be sent directly to the department.

Intended candidates for the MA should have a strong undergraduate preparation in communication or a closely allied discipline. Students who lack this preparation must make up deficiencies either before or during graduate study. In the latter case, the student will be admitted conditionally, pending removal of the deficiencies. Applicants may be interviewed as well.

Further details on the program may be requested from the graduate chair.

#### Requirements

The department offers both Plan A (thesis) and Plan B/C (non-thesis: applied project or comprehensive exams) programs. The Plan A thesis program requires a minimum of 33 credit hours of graduate work, at least 27 of which must be in communicology courses numbered 600 and above, including 6 credit hours of COMG 700 Thesis Research. The Plan B applied project program requires a minimum of 33 credit hours of graduate work in courses numbered 600 and above, which includes at least 3 credit hours of COMG 500 Master's Plan B. The comprehensive exam program requires a minimum of 33 credit hours of graduate work in courses numbered 600 and above and one credit of COMG 500. Communicology courses numbered 400 to 499 and courses from allied disciplines may be counted toward the degree only with prior consent of the graduate chair. COMG 601 and 602 are required for both Plan A and Plan B programs. Plan A also requires COMG 702 (COMG 620 does not count towards the degree).

Successful completion of Plan A requires each candidate to present an acceptable thesis and pass a final oral examination based on the thesis. Plan B requires each student either complete an applied research project or pass written comprehensive exams. Plan B candidates must also pass a final oral examination based on either the research project or the comprehensive exams.

# East Asian Languages and Literatures

College of Languages, Linguistics and Literature  
Moore 382  
1890 East-West Road  
Honolulu, HI 96822  
Tel: (808) 956-8940  
Fax: (808) 956-9515  
Web: [www.hawaii.edu/eall/](http://www.hawaii.edu/eall/)

## Faculty

- \*R. N. Huey, PhD (Chair)—classical Japanese literature (especially *waka*)
- S. Chang, MA—Korean language teaching
- \*S.-Y. Cheon, PhD—Korean phonology and phonetics, second language phonology, content-based instruction (CBI), and media-based instruction
- \*H. M. Cook, PhD—Japanese linguistics, sociolinguistics, discourse analysis and pragmatics; language socialization
- S. A. Curry, PhD—Japanese language teaching
- \*S. Fukuda, PhD—syntax, lexical semantics and their interface phenomena in Japanese, experimental approaches to syntax and lexical semantics, syntax of understudied Asian languages (Vietnamese and Burmese), first language acquisition of syntax-lexical semantics interface phenomena in Japanese and Korean
- S. H. Hirate, MA—Japanese language teaching
- C. I. Hitosugi, PhD—Japanese language teaching
- \*H.-I. Hsieh, PhD—Chinese language, linguistics, and culture; mathematical linguistics; semantics; cognitive grammar
- \*K. K. Ito, PhD—modern Japanese literature, particularly fiction of the Meiji period (1908-1912); cultural studies, narratology, and reception studies
- T. Iwai, PhD—Japanese language teaching
- \*S. Iwasaki, PhD—Japanese linguistics, Ryukyuan linguistics, Thai linguistics, language documentation, functional linguistics, discourse analysis
- \*L. Jiang, PhD—syntax, semantics, syntax-semantics interface, language universals and variation, comparative linguistics, Chinese linguistics (Chinese dialects, minority languages and sign languages), language acquisition
- \*S. Jiang, PhD—Chinese language and linguistics, cognitive linguistics, Chinese historical syntax, Chinese dialects, language acquisition and pedagogy, technology-assisted language learning
- \*K. Kanno, PhD—Japanese linguistics, syntax, second language acquisition, parsing
- \*M. S. Kim, PhD—discourse-functional linguistics, conversation analysis, vocabulary acquisition, Korean language pedagogy
- \*Y.-H. Kim, PhD—modern Korean women writers; modern Korean literature; Korean culture; East Asian women writers and society
- \*K. Kondo-Brown, EdD—Japanese language pedagogy, second language assessment, heritage language development
- \*D.-K. Kong, PhD—Korean language and linguistics, language acquisition, pedagogy, assessment
- M. Lachmann, MA—Japanese language teaching
- J.-Y. Lu-Chen, PhD—Chinese language teaching, translation and interpretation
- K. A. Masunaga, MA—Japanese language teaching
- \*D. R. McCraw, PhD—classical Chinese literature, especially poetry, particularly *Tang shi*, *Song shi* and *ci*, and *Qing ci*

- N. T. McPherson, MA—Japanese language teaching
- E. Murayama, PhD—Japanese language teaching
- G. E. Nakahara, PhD—Japanese language teaching
- M. Ogasawara, MA—Japanese language teaching
- D. T. Ogawa, MA—Japanese language teaching
- \*M. J. Park, PhD—Korean language and linguistics, pedagogy, pragmatics
- \*Y. Peng, PhD—20th century Chinese literature and visual culture, Chinese film, critical theory
- G. E. Ray, MA—Japanese language teaching
- \*K. A. Reynolds, PhD—Japanese socio-historical linguistics, and sociolinguistics (gender and class)
- \*S. Shibayama, PhD—Classical Japanese literature, especially poetry and prose from the twelfth-century; commentary culture of medieval Japan; comparative study of the European Middle Ages and medieval Japan
- \*H.-M. Sohn, PhD—Korean language and linguistics, Korean-Japanese comparative syntax, general linguistics
- \*Y. Tateyama, PhD—pragmatics, Japanese language pedagogy, discourse analysis, translation and interpretation
- \*A. H. Thornhill, PhD—medieval Japanese literature and religion
- H. Uchida, MA—Japanese language teaching
- \*A. V. Vovin, PhD—Japanese, Korean and Tungusic historical and descriptive linguistics; Central Asian linguistics; the Ainu language
- Y. Wada, MA—Japanese language teaching
- \*H. Wang, PhD—Chinese syntax, semantics, and phonology; Chinese language pedagogy; teaching Chinese for professionals
- P. C.-K. Woo, MA—Japanese language teaching
- \*D. R. Yoshimi, PhD—Japanese second language acquisition and pedagogy; discourse analysis, pragmatics and sociolinguistics
- \*M.-B. Yue, PhD—20th century Chinese literary and cultural studies, visual culture and media studies, transnational Chinese writings, constructions of Chineseness and diasporic consciousness in Asian-American, exile, and immigrant writings, theories of ideology and representation, feminism, psychoanalysis, film criticism, [Inter-Asia] cultural studies
- S. M. Zeng, PhD—Chinese language teaching, translation and interpretation

## Cooperating Graduate Faculty

- G. Kasper, PhD—second-language discourse analysis, conversation analysis, pragmatics, qualitative research methods

**Degrees and Certificates Offered:** Certificate in Chinese, Certificate in Japanese, Certificate in Korean, Certificate in Korean for Professionals, Minor in Chinese, Minor in Japanese, Minor in Korean, BA in Chinese, BA in Japanese, BA in Korean, BA in Korean for Professionals, MA in East Asian Languages and Literatures, PhD in East Asian Languages and Literatures

## The Academic Program

The Department of East Asian Languages and Literatures (EALL) is the largest department of its kind in the country and offers a curriculum unparalleled in its breadth, depth, and variety of courses in Chinese, Japanese, and Korean language, linguistics, and literature.

At the undergraduate level, language skill courses help students develop a high level of proficiency in both the spoken and written aspects of the languages. There are separate BA and Certificate programs to prepare American students to function in Korean in given professional fields. Other courses provide both introductory survey coverage and advanced, theme-specific

investigations of the literary cultures of East Asia and the linguistic analysis of Chinese, Japanese, and Korean. Cultural awareness as well as language proficiency are further promoted through extra-curricular activities such as student clubs, video/film showings, lectures, and study abroad programs. Our students have the opportunity to participate in study abroad programs in Hainan, China; Kobe and Machida, Japan; and Seoul, Korea. The graduate programs are designed to provide students with advanced professional training in two tracks: 1) language/linguistics, and 2) literary studies.

While most students enroll in language courses to fulfill the general education core requirement for foreign languages, there are many who plan to use Chinese, Japanese, or Korean in research or graduate studies. Those who plan to enter the work force immediately upon completing their undergraduate studies find that their language proficiency opens doors to employment in the local travel industry and other internationally oriented businesses.

## Undergraduate Study

### BA in Chinese

#### Requirements

Students must complete a minimum of 34 credit hours, including the following upper division courses:

- CHN 301, 302 or 303, 401, 402 or 404, and 461
- 6 credit hours from the following, at least one course must be taken from each of the following group:
  - (a) CHN 451, 452, 455, 456, 457, 470
  - (b) EALL 361, 362, 363B, 363C
- 9 credit hours of approved courses in Chinese language and literature

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BA in Japanese

#### Requirements

Students must complete a minimum of 36 credit hours, including:

- JPN 350, 370, 401 or 403, 402 or 404, and 407E
- JPN 407B, 407C, or 407D
- EALL 271 and 272
- 12 credit hours in approved courses

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BA in Korean

#### Requirements

Students must complete a minimum of 36 credit hours, including:

- KOR 301, 302, 401, 402, 451, 452, and 470
- EALL 281 or 282
- 12 credit hours in approved courses

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Korean for Professionals Track

### Requirements

Students must complete a minimum of 36 credit hours, including:

- KOR 401, 402, 403, and 404 [KOR 307, 308 may replace exempted KOR 401, 402]
- KOR 421, 422, 425 (6 credits), 470, 480, 485, and
- 1-year overseas program year at Korea University

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor

Students planning to declare a minor should have completed successfully four semesters of language skill courses or their equivalent and must have a GPA of 2.0 or higher. A minimum of 15-17 credits from five courses in one of the three languages (Chinese, Japanese, Korean) will be required. At least 9 credits will be from non-language skills courses with a focus on linguistics or literature. In the case of native speakers, they will be required to take five non-language skill courses. All courses selected must have the approval of advisors in both the student's major department and the EALL Department. Only courses with a C (not C-) or above will be counted. All courses must be taken within the UH system, with minimum of at least three courses taken at UH Mānoa. A detailed description of program requirements is available at the department office in Moore Hall 382.

### Certificate

Certificates in Chinese, Japanese, Korean, and Korean for Professionals are offered to eligible students. A minimum of 15 credit hours from 301 or above in the language of choice must be earned with a minimum GPA of 2.5. A detailed description of the program requirements is available from the department office in Moore 382.

## Graduate Study

Complete details on the graduate programs are available from the department office in Moore Hall 382 and on the department's webpage. All of our graduate degree programs are academic in nature, and focus on the disciplines of linguistic and literary study.

MA graduates of the programs have obtained positions as instructors in private schools, two- and four-year colleges and universities; as translators; and in various capacities in private firms and government service. PhD graduates have obtained teaching positions at universities in the U.S. mainland, Canada, and in several Asian countries.

The MA and PhD are recognized Western Interstate Commission for Higher Education (WICHE) regional graduate programs. Residents of Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming are eligible, upon admission with a GPA of 3.50 or higher, to enroll at Hawai'i-resident tuition rates. See the "Tuition, Fees, and Financial Aid" section of this *Catalog* for more information on WICHE programs.

The MA degree is offered in the fields of Chinese language, Chinese literature, Japanese language, Japanese literature, Korean language, Korean literature, and Korean for Profession-

als. The PhD degree is offered with concentrations in the same fields, but not in Korean for Professionals. All applicants for the MA program must have a BA in the language of their concentration or equivalent preparation and must submit three letters of recommendation and GRE General Test scores. All applicants for the PhD program must have a BA, must have earned with distinction an MA in the language or literature of their concentration, must submit three letters of recommendation, GRE General Test scores, and a sample of their scholarly writing in English. Normally, each newly-admitted MA student is required to undergo a diagnostic evaluation and each PhD student is required to undergo an assessment, differing according to subfield, as well as fulfill any language requirement, in order to be eligible for advancement to candidacy. Students emphasizing Japanese Language/Linguistics and Korean Language/Linguistics must also fulfill a publishable paper requirement in order to be eligible for advancement to candidacy.

The MA candidate may select either the Plan A (thesis) or Plan B (non-thesis) program; Plan A must have the approval of the graduate chair. The MA in Korean for Professionals is a Plan B program only.

## **Master's Degree**

### **Requirements**

For Plan A, students must complete a minimum of 30 credit hours, including at least 18 credit hours in the major field and 6 credit hours of thesis research. A minimum of 12 credit hours in the major field must be earned in courses numbered 600 or higher, including a 700-level seminar and excluding 699V.

For Plan B, students must complete a minimum of 30 credit hours, including at least 21 credit hours in the major field. A minimum of 18 credit hours in the major field must be earned in courses numbered 600 or higher, including a 700-level seminar and excluding 699V.

## **Doctoral Degree**

### **Requirements**

In order to be advanced to candidacy, PhD students are expected to master four fields, at least one of which will be outside the students' areas of specialization and must pass a comprehensive examination covering the four fields. PhD students in Japanese and Korean Language/Linguistics must master three fields and a comprehensive examination covering these three fields and produce a scholarly paper. After being advanced to candidacy, all PhD candidates must complete an original dissertation, and pass a final oral examination in defense of the dissertation. Apart from having a command of English and their language of concentration, candidates must have knowledge of a second East Asian language equivalent to two years of study; in some cases a third East Asian language or an additional European language may be required.

## **Economics**

College of Social Sciences  
Saunders Hall 542  
2424 Maile Way  
Honolulu, HI 96822  
Tel: (808) 956-8496  
Fax: (808) 956-4347  
Email: econ@hawaii.edu  
Web: www.economics.hawaii.edu

### **Faculty**

- \*B. Gangnes, PhD (Chair)—international macroeconomics, econometric modeling
- \*C. Bonham, PhD—applied macroeconomics, monetary theory
- \*P. Fuleky, PhD—time series econometrics, economic forecasting
- \*T. Greaney, PhD—international economics, industrial organization
- \*T. Halliday, PhD—health economics, economic development, econometrics
- \*R. Juarez, PhD—microeconomic theory
- \*B. Karacaovali, PhD—international trade, political economy of trade policy, development economics
- \*D. E. Konan, PhD—international trade
- \*S. La Croix, PhD—economic history, development economics, industrial organization
- \*S. H. Lee, PhD—population economics, labor economics
- \*I. Love, PhD—development economics, finance
- \*J. Lynham, PhD—environmental and resource economics, experimental economics, marine ecology, behavioral economics
- \*A. Mason, PhD—population economics, macroeconomics
- \*M. Roberts, PhD—environmental and resource economics, agricultural economics
- \*J. Roumasset, PhD—development economics, public resource allocation, resource economics
- \*K. V. Sherstyuk, PhD—experimental economics, game theory
- \*N. Tarui, PhD—environmental and resource economics, applied microeconomics, applied game theory
- \*J. R. Traczynski, PhD—economics of education, law and economics
- \*L. Wang, PhD—monetary economics, macroeconomics, search and matching theory
- \*X. Wang, PhD—macroeconomics, monetary economics, econometrics, applied microeconomics, labor economics

### **Cooperating Graduate Faculty**

- K. Burnett, PhD—environmental and resource economics
- I. Cintina, PhD—labor economics, health economics
- P. Garrod, PhD—marketing and production economics
- E. Im, PhD—econometrics, statistical theory
- P. S. Leung, PhD—production economics, quantitative methods
- S. G. Rhee, PhD—Asia-Pacific financial markets
- T. B. Vu, PhD—development economics, international economics

### **Affiliate Graduate Faculty**

- L. Cho, PhD—population economics
- L. Endress, PhD—growth theory
- F. Fesharaki, PhD—energy economics
- H. He, PhD—macroeconomics, health economics
- B. Kaiser, PhD—environmental economics, microeconomics
- I Noy, PhD—international finance

**Degrees Offered:** Undergraduate Certificate in Social Sciences and Health; BA (including minor) in economics; MA in economics; PhD in economics

## The Academic Program

Economics (ECON) is the social science that deals with the allocation and use of human and material resources under conditions of scarcity and uncertainty. It examines this subject matter at the micro level (the consumer, the household, the firm, and the industry) and the macro level (the region, the labor force, the government, the nation, and the world). Courses in these topics are complemented by instruction in the statistical and mathematical tools necessary for modeling, data collection and analysis, and hypothesis testing. Students of economics will learn a body of knowledge that is essential to understanding many aspects of the modern world and contemporary public policy issues, including such vital matters as international trade, economic development, the environment, Hawai'i's economic challenges, regulation, business cycles, and consumer behavior. A BA in economics is an excellent background for demanding analytical and policy positions in the public and private sectors; it is also a highly regarded preparation for graduate work in law, business, and public policy, as well as economics.

Economics at UH Mānoa is consciously directed toward policy challenges in the Asia Pacific region, which comprises the nations of the Pacific rim and the Pacific Islands, as well as Hawai'i. Geographic and subject matter interests of students and faculty contribute to a regional specialization in accord with UH's overall mission.

## Exchange Programs

The Department of Economics participates in academic and educational exchanges with Nihon University, Tokyo, Japan; Yonsei University, Seoul, South Korea; and Thammasat University, Bangkok, Thailand.

## Advising

Advising is mandatory for all graduate and undergraduate economics majors. Contact the department office for specific information.

## Undergraduate Study

### Interdisciplinary Certificate in Social Science and Health

The purpose of this certificate is to supplement the disciplinary major of students who wish to pursue careers in the field of health and health care by enhancing the breadth, quality, and coherence of their education through taking health-related courses in a variety of different academic disciplines. A more complete description and the requirements are described under the Department of Sociology.

### Bachelor's Degree

The BA in economics provides students with an intensive knowledge of the theory and practice of economics, with an emphasis on the analysis of contemporary policy challenges of Hawai'i and the U.S. in the Asia Pacific region. Majors study a wide range of current economic policy issues and learn a powerful framework for analyzing these issues. They also develop reasoning and communication skills that are useful across disciplines. As a result, the BA program has been successful in preparing graduates for advanced study in economics, business,

law, and other social sciences, as well as challenging careers in business management, technical analysis, policy evaluation, and education.

## Requirements

Majors must complete 24 credit hours of upper division courses including ECON 300, 301, and 321. At least six credit hours must be earned by completing Upper Division II ECON courses, and students must earn a C (not C-) or better in all courses designated as counting toward the major.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Minor

### Requirements

Students must complete 15 credit hours of approved upper division courses, including ECON 300 and 301.

## Graduate Study

The department offers a graduate program leading to the MA and PhD degrees. Graduate alumni are successful economists, entrepreneurs, and government policy experts in a variety of settings and institutions, especially in Hawai'i, Asia, and the Pacific region. Faculty research interests facilitate graduate field specializations with regional emphasis on Hawai'i, Asia, and the Pacific. Student and faculty research focuses on analyses of policy issues of importance to countries in Asia and the Pacific.

The MA program prepares students for policy analysis in government, international agencies, and the private sector, emphasizing application of theory to economic decision-making. The PhD program provides state-of-the-art theoretical and empirical training for high level academic, government, and private-sector careers.

The department maintains strong links with the East-West Center, particularly with the center's programs on population, economics, and energy. Relationships also exist with various country centers located in the School of Pacific and Asian Studies and with other programs in the College of Social Sciences. In conjunction with the Shidler College of Business, the department also offers a program leading to a PhD in economics and business.

Entering graduate students are expected to have a bachelor's degree, not necessarily in economics, and to have completed courses in intermediate micro-and macroeconomics theory, elementary statistics, and a mathematics background that includes at least two 3-credit semester courses in calculus. For the PhD program, we recommend the completion of two additional courses prior to entry in any of the following subjects: advanced calculus, linear algebra, differential equations, real analysis, or related areas. Students with deficiencies must make them up prior to entering the program or within the first year of study.

TOEFL scores (for all applicants from foreign countries where English is not the primary means of communication) and two letters of recommendation must be submitted by applicants. Students applying for the graduate program must submit official GRE General Test scores.

## Master's Degree

An MA student must be in residence for at least two semesters, and all work must be completed within seven years of admission. A student following normal progress should be able to earn the MA degree within two years.

## Requirements

A student must earn 30 credit hours in economics, including at least 21 hours of 600- or 700-level courses. Up to 9 credit hours of 400-level courses may apply to the 30 credit hour requirement. Graduate credit will not be granted for 300-level courses. A student must have a B average (3.0 GPA) for all courses completed at UH Mānoa applied toward the degree, and a B average for all 600-level and 700-level courses.

The MA requires completion of the following:

- A four-course common core comprising ECON 606, 607, 627, and 628, with a B average;
- A two-course area of concentration; and
- An individual research project, constituting the capstone experience for the degree.

A student may also choose to write a master's thesis in lieu of the individual research project. Students who complete the PhD core may substitute a passing grade on either of the PhD qualifying exams for the individual research project requirement for a master's degree.

A student who completes the MA degree may apply to the PhD program. By taking appropriate courses, a student may be able to earn both MA and PhD degrees within five years.

## Doctoral Degree

A PhD student must be in residence for at least three semesters and complete all requirements within seven years of admission to the graduate program. A student following normal progress should be able to earn the PhD degree within five years.

## Requirements

The PhD in economics requires successful completion of

- seven core courses comprising ECON 606, 607, 608, 609, 627, 628, and 629 with a grade of B- or better in each course;
- qualifying examinations in microeconomic theory and macroeconomic theory;
- seven 600-level and 700-level courses in economics (including ECON 730) beyond the core;
- two fields;
- a research paper;
- an oral comprehensive exam, administered jointly with the defense of the dissertation proposal;
- a final oral exam, including defense of the final dissertation; and
- submission of the final dissertation manuscript to the Graduate Division.

Normal progress requires students to take and pass both theory qualifying exams at the end of the first two semesters of study, and to complete all core courses in the first three semesters of enrollment. Students failing a qualifying examination may retake it only once.

Students choose two fields, each consisting of two courses, from among the following five fields offered by the department:

1. Economic development (ECON 610 and 611)
2. International economics (two of ECON 660, 662, and 664)
3. Public economics (ECON 650 and 651)
4. Resource and environmental economics (ECON 637 and 638)
5. Human resources (two of ECON 670, 672, and 674)

Some field courses are offered annually, others less frequently. Students may petition to substitute a field in another discipline or another field in economics for one of the five fields listed above.

Before the end of their fourth semester, students should, in consultation with the graduate chair, reach agreement with a UH Mānoa economics faculty member to serve as their research paper advisor. Any member of the economics graduate faculty may serve as your paper advisory, and the arrangement is by mutual agreement. You then invite two other faculty members to serve as readers of your paper. Have your paper advisor and readers indicate their willingness to serve by having them sign the research paper form, which can be obtained from the staff in the economics department office. Submit the form to the graduate chair for approval before or during the fall semester of your third year of graduate study. During that semester, you are required to register for ECON 730, Research Seminar, and make substantial progress on your research paper. You are encouraged to consult with your paper advisor periodically as you work on your research paper. You may also consult with your second and third readers. Upon completion of the paper, submit it to your advisor and readers, who will evaluate the paper and assign a grade of "pass," "high pass," or "fail." Students who receive a grade of "fail" will have one opportunity to revise the paper provided they meet the appropriate deadlines. The deadline for submitting your paper is **May 1** of your third year of graduate studies and the deadline for resubmissions is **August 1**.

The comprehensive examination—of which the written qualifying examinations are a part—will include a broad probing of the candidate's general economic knowledge. The oral part of the PhD comprehensive examination will be administered jointly with the defense of the dissertation proposal, before a dissertation committee chosen by the student and approved by the graduate chair and the Graduate Division. A student who fails the comprehensive examination may repeat it once. A student who fails a second time is dismissed from the program. Students who pass the oral exam are advanced to candidacy for the PhD.

The final examination, which is oral, covers the candidate's defense of the final dissertation draft. It is administered orally and is open to the public. Candidates failing the final examination may be allowed to repeat it once upon petition approved by the graduate faculty concerned and the dean of the Graduate Division. Those failing it twice are dismissed from the program.

Finally, a dissertation accepted by the dissertation committee is submitted to the Graduate Division. The final dissertation must also conform to UH Mānoa standards in content and format.

### Faculty

- \*J. Carroll, PhD (Chair)—rhetoric and composition, American novel, fiction
- \*C. Bacchilega, PhD—folklore, narrative, fairy-tale studies, 20th-century fiction, feminist criticism, literary theory, translation studies
- \*K. Beautner, PhD—fiction and creative nonfiction
- \*S. Canham, PhD—Victorian and juvenile literature, the novel
- \*J. Caron, PhD—19th-century American literature, Mark Twain, comic art and literature, popular culture
- \*U. Chakravarty, PhD—early modern literatures
- \*R. W. Dasenbrock, PhD—modernism, literary theory, post-colonial literature, comparative literature
- \*D. Desser, PhD—20th-century rhetorics, writing and difference, composition studies
- \*C. Franklin, PhD—contemporary women's literature, ethnic American literatures, feminist theory
- \*M. Fuchs, PhD—modern American literature, autobiography, women writers
- \*C. Fujikane, PhD—literatures of Hawai'i, Asian American literatures, feminist/nationalist critical theory and practice
- \*S. Goldsberry, PhD—creative writing
- \*M. Heberle, PhD—Renaissance literature, American Vietnam literature
- \*J. Henry, PhD—workplace writing and subjectivity, composition studies, technical communication and its rhetorics
- \*K. Ho'omanawanui, PhD—Native Hawaiian literature, literatures of Hawai'i, folklore and mythology, children's literature, translation studies
- \*C. Howes, PhD—life writing, literary theory, research methods, 19th-century literature
- \*R. Hsu, PhD—modernism, ethnic literature, Asian American literature, feminist criticism
- \*J. Kellogg, PhD—medieval English and French literature, comparative literature, medieval women writers, Arthurian tradition
- \*J. Lew, PhD—late 18th-century literature, English and European romanticism, Gothic
- \*L. Lyons, PhD—post-colonial literatures and theory, Irish literature, cultural studies
- \*P. Lyons, PhD—19th- and 20th-century U.S. literatures, literary and cultural theory, regional and settler literatures in Oceania
- \*G. Man, PhD—film, narrative, 19th-century British literature
- \*K. McAndrews, PhD—folklore, oral narrative, American Literature (1905-present), cultural studies in relationship to gender, humor and tourism
- \*R. McHenry, PhD—Restoration and 18th-century literature, Shakespeare, literature and art

- \*L. Middleton, PhD—19th-century British literature, women's literature, psychology and literature
- \*R. Morales, MA—creative writing, Pacific literature, American ethnic literature
- \*J. Morse, PhD—American literature, literary history
- \*R. Nettell, PhD—20th-century drama, applied linguistics, history of the language, literary and cultural theory
- \*P. Nicholson, PhD—Old English, Chaucer, medieval literature, English language
- \*G. Nordstrom, PhD—composition and rhetoric
- \*G. Pak, PhD—creative writing, literature of Hawai'i and the Pacific, Asian American literature, ethnic American literature
- \*D. Payne, PhD—composition and rhetoric, computer-mediated writing, collaborative learning
- \*J. Peters, PhD—modern British and American literature, narratology, the British novel (1700-1945)
- \*P. Quigley, PhD—environmental literature, ecocriticism, critical theory, 19th century American and British literature, cyber literature
- \*J. Rieder, PhD—literary and cultural theory, science fiction, British Romanticism
- \*T. Sammons, PhD—Renaissance and 17th-century literature, Milton, science fiction, rhetoric
- \*C. Santos Perez, MA—creative writing, international poetry, indigenous literature and theory, Pacific and Chamorro studies
- \*S. Schultz, PhD—20th-century poetry in English, American literature, creative writing
- \*S. Shankar, PhD—postcolonial literature and theory, South Asian literatures, translation and translation studies
- \*C. Sinavaiana, PhD—Pacific literature and drama, ethnic literatures, folklore, feminist criticism
- \*F. Stewart, MA—creative writing, modern and contemporary poetry and poetics, American nature writing
- J. Taylor, PhD—African American literature, visual culture, critical theory
- \*A. Te Punga Somerville, PhD—Maori, Pacific and Indigenous literatures and cultural production, Maori studies, Pacific studies, Indigenous studies, Maori and Pacific history, Maori diasporas, postcolonial and gender studies, Indigenous research methodologies
- \*C. Ward, PhD—critical theory, post-colonial literature, popular culture, oral and performance theory, the novel
- \*S. Yang Ryan, MA—creative writing, Asian American literature, speculative and social protest fiction
- \*J. Zuern, PhD—computer-mediated communication, comparative literature

**Degrees Offered:** BA (including minor) in English, MA in English, PhD in English

### The Academic Program

The Department of English encourages students to develop their critical reading, writing, and creative skills through study of a variety of literatures in English, composition and rhetoric, and creative writing. The department recognizes the unique diversity of cultures in Hawai'i and employs a variety of approaches, including multicultural and Asia Pacific perspectives, to address this uniqueness. Students work directly with faculty in relatively small classes. The department participates actively in UH Mānoa's Honors Program and its Study Abroad Semester and offers professional internships for interested students in the senior year.

The goals of the undergraduate English program are: (a) to offer a comprehensive range of courses in literary and cultural studies, composition, rhetoric, and creative writing; (b) to develop students' critical thinking and reading skills; and (c) to develop students' interests and abilities in rhetoric and writing across a variety of genres. Many of our courses recognize Hawai'i's geographical and cultural location in the Pacific.

The graduate program enriches students' knowledge of literature, composition and rhetoric, creative writing, and cultural studies. MA students are asked to take approximately half of their course work in a specific concentration so that they begin to develop an area of expertise while broadening their understanding of other areas of study. The MA thesis or final project at the end of the program gives them the opportunity to do extended research and writing on a topic of their own choosing.

The doctoral program prepares students to become professionals in the field. Required courses are not its focus; rather, it offers students considerable latitude in course selection and requires disciplined, independent work on examinations and the dissertation. Candidates completing the program should have the skills and experience to function as critics, scholars, and writers in an area associated with the profession of English.

## Undergraduate Study

### Bachelor's Degree

The Department of English offers the BA degree with informal emphases in American, British, and Pacific literatures; composition and rhetoric; and creative writing.

### Requirements

For Arts and Sciences students, one FW and one ENG DL course are prerequisites for the English major and minor. Students enrolled in colleges other than Arts and Sciences may elect ENG DL courses (as per current policy). Students must complete 33 credit hours of upper division courses, as follows:

### Level Requirements

- at the 300 level:
    - A. ENG 320, Introduction to English Studies; this course is foundational and should be taken in the student's first or second semester of upper division English work; 3 credits
    - B. 5 300-level courses are recommended in addition to ENG 320; 15 credits. Several of these courses should be in areas prerequisite to/preparatory for specific courses at the 400 level
  - at the 400 level (ENG 320 and one 300-level course are prerequisite to *Studies* courses):
    - C. Single Author (440 Single Author; 442 Chaucer; 445 Shakespeare; or 447 Milton); 3 credits
    - D. 2 additional elective courses; 6 credits. At least one 400-level course must be a designated *Studies* course
  - at the 300 or 400 level:
    - E. 2 elective courses; 6 credits
  - No more than two upper division English large enrollment courses may be counted toward the major
- Total: 33 credits

### Breadth Requirements

Breadth of Field: the five 300-level courses in addition to ENG 320 must come from at least two different categories:

- Composition/Language/Rhetoric (300-308, 311)
- Creative Writing (311, 313)

- Genre (360-65)
- Literature and Culture (370-85)

Historical Breadth: of the nine courses in addition to Introduction to English Studies and Single Author, one must be pre-1700, one 1700-1900, and one after 1900.

Only courses in which a student receives a C or better may be counted toward the major.

For a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Non-English Department Course

With the consent of the student's advisor or the director of the undergraduate program, one appropriate three-credit upper division course from outside English may be counted as a major elective.

### Advising

Advising is mandatory for majors; new majors will be assigned an advisor when they meet with the director of the undergraduate programs for their required orientation session. Call (808) 956-7619 for an appointment.

### Minor

English offers a fifteen-credit minor for students who wish to emphasize a specific aspect of English studies without completing the actual major. Beyond the two required courses, the minor may focus on literary studies, creative writing, cultural studies, or rhetoric and composition. The student may also take electives from any of these areas.

For Arts and Sciences students, one FW and one ENG DL course are prerequisites for the English major and minor. Students enrolled in colleges other than Arts and Sciences may elect ENG DL courses (as per current policy). All UH Mānoa courses applied to the English minor will come from the Department of English or cross-listed courses. Appropriate upper division transfer credits may apply toward the minor.

The minor consists of:

1. ENG 320, Introduction to English Studies. This course is foundational and should be taken in the student's first or second semester of upper division English work; 3 credits
2. Single author course (440 Single Author; 442 Chaucer; 445 Shakespeare; or 447 Milton); 3 credits
3. 300-level ENG elective; 3 credits
4. 400-level ENG elective; 3 credits
5. 300- or 400-level ENG elective; 3 credits

No more than one upper division English large enrollment course may be counted toward the minor. Only courses in which a student receives a C or better may be counted toward the minor.

### Graduate Study

The department offers the MA in English with four concentrations: literary studies in English, composition and rhetoric, creative writing, and cultural studies in Asia/Pacific. It offers the PhD in these and other areas, for the doctoral program is sufficiently flexible to allow students to develop individualized courses of study. Students applying for the MA are expected to have acquired between 24 and 30 upper division undergraduate credit hours in English or closely related subjects. PhD applicants normally will have completed the MA in English. In addition to the application and transcripts required by the Graduate

Division, all applicants must submit directly to the department three letters of recommendation and the GRE General Test scores. Applicants must also submit a comprehensive statement of professional goals and objectives; PhD students must submit a representative sample of their writing (scholarly paper or MA thesis); those interested in a dissertation with a creative emphasis must also submit examples of their creative work. The completed application should be sent to the Graduate Division by **December 1** for the PhD program and **January 1** for the MA program. Complete information on the graduate program is provided on the department's website.

Courses for the MA and PhD are to be selected from the list of English (ENG) courses, although advanced courses in other disciplines may be substituted with the prior approval of the graduate director. The consent of the instructor is required for ENG 691, 699, 700, and 800; the consent of the graduate director is required for all graduate courses. The following courses may be repeated for credit, since content differs from semester to semester: ENG 613, 625, 691, 699, 705, 709, 727, 730, 735, 740, 760, 780, and 790.

### Master's Degree

Graduates of the MA program in English have taught in secondary schools, junior and community colleges, four-year colleges, and universities. Some have pursued doctoral work; others have combined their work in English with another professional field (e.g., business, law, library studies). Still others have found employment in writing, editing, or research-related fields.

MA candidates are required to select a concentration by the end of their first semester in the program. Plan A (thesis) applies only to those admitted into the concentration in creative writing. Plan B (non-thesis) applies to those who have selected the concentrations in literary studies in English, composition and rhetoric, or cultural studies in Asia/Pacific.

### Plan A (Thesis) Requirements

- Applicable only to those students admitted to the concentration in creative writing. Students should submit a writing sample during the admission process or apply to the chair of creative writing for admission to the concentration during their first semester in the program
- 27 credit hours of course work, including 21 credit hours of courses numbered 600 and above
- 6 additional credit hours of work on the MA thesis
- ENG 625D—plus an additional 625, both taken during the first semester
- Final oral examination on the thesis
- A minimum of 12 credit hours of course work in creative writing and 12 credit hours of course work outside of that concentration. Courses listed in different concentrations may be applied to either area.
- One graduate course in a subject area before 1900. In exceptional cases, the graduate director may approve the use of a 400-level course to meet this requirement.
- One course with substantial content in Asia/Pacific at the 400-, 600- or 700-level, in or out of the English department while in residence at UH Mānoa
- Reading knowledge of one foreign language

### Plan B (Non-thesis) Requirements

- 33 credit hours of course work, including 27 credit hours in courses numbered 600 and above. Applies to all students except those in creative writing
- Two courses taken from the 625 sequence, to be taken in the first semester, 6 credits
- ENG 691—a minimum of 3 credit hours and a maximum of 6 credit hours required for work on the MA final project
- Final oral examination on the MA project
- One course in the English language (ENG 402, 403, 404, 601 or equivalent)—taken prior to entering the program. Students may meet this requirement within the program by taking an undergraduate course in the English language in addition to the total of 33 credit hours required for the MA degree or by taking an appropriate graduate course, such as 601, which will count towards the MA degree but may not also be used to fulfill the pre-1700 or pre-1900 course requirement.
- One course with substantial content in Asia/Pacific, at the 400-, 600-, or 700-level, in or out of the English department, while in residence at UH Mānoa.
- Reading knowledge of one foreign language
- Requirements for those in literary studies: between 12 and 24 credit hours of course work in the student's concentration, including ENG 625B; one graduate course in a subject area before 1700.
- Requirements for those in composition and rhetoric: ENG 605, 625C, 705 and 709; a minimum of 12 credit hours of course work outside the concentration; one graduate course in a subject area before 1900. Courses listed in different concentrations may be applied to either area.
- Requirements for those in cultural studies in Asia/Pacific: a minimum of 12 credit hours of course work in the concentration, including ENG 625E and 3 credit hours in Hawai'i's local literature, Asian American literature, or Pacific literature; a minimum of 12 credit hours of course work outside the concentration; one graduate course in a subject area before 1900. Courses listed in different concentrations may be applied to either area. Students in cultural studies will be allowed to meet 3 credit hours of work in their concentration with a course outside of the English department with permission of their concentration advisor.

### Doctoral Degree

Since the PhD program offers diverse courses and the opportunity to specialize in a range of different areas, graduates may pursue careers from among several professions, including teaching, research, and writing.

### Requirements

PhD candidates must fulfill the residency requirement and are required to take seven graduate-level courses in the Department of English; two courses, normally at the 400 level or above, in a field outside of English but related to the student's research interests; one course with substantial content in Asia/Pacific at the 400-, 600-, or 700-level, in or out of the English department, while in residence at UH Mānoa. They must pass three area examinations and a comprehensive examination and demonstrate competence in two languages other than English (one of which, if appropriate to the candidate's research, may

be a computer language) or in one language at an advanced level of proficiency. Candidates will be required to complete an original scholarly or creative dissertation representing a substantial contribution to the discipline of English, suitable for publication, and a final oral examination on the dissertation.

## Environmental Studies

Colleges of Arts and Sciences  
Krauss Annex 19, 2500 Dole Street  
Honolulu, HI 96822

### Faculty

J. Cusick, PhD (Advisor)—environmental studies, education for sustainability, ecotourism, political ecology, protected areas, Pacific Basin

### Affiliate Faculty

C. L. Andrade, PhD—traditional navigation, Malama‘aina: traditional resource management, indigenous geography, Hawaiian music  
L. J. Cox, PhD—community economic development  
E. P. Dashiell, MA—environmental and facilities planner, environmental impact statements, environmental investigations  
E. H. DeCarlo, PhD—aquatic and environmental geochemistry, oceanography, freshwater  
D. Duffy, PhD—conservation, restoration ecology  
D. R. Drake, PhD—botany, ecology, Polynesian plants  
S. Meder, ArchD—architecture, design, environmental systems  
M. D. Merlin, PhD—biogeography, natural history of Hawai‘i  
J. K. Odin, PhD—Interdisciplinary Studies advisor, cultural studies of science and technology, literary and political ecology, new technologies and their impact on higher education  
T. Radovich, PhD—vegetables, sustainable farming  
J. E. Schoonmaker, PhD—Global Environmental Sciences advisor, oceanography  
B. Szuster, PhD—geography, coastal resource management, environmental impacts assessment

**Degree and Certificate Offered:** Certificate in Environmental Studies, BA in interdisciplinary studies (major equivalent in environmental studies)

### The Academic Program

Environmental studies (EVS) is an individually designed, interdisciplinary program established in 1965 and coordinated by the Environmental Center. Students wishing to earn a BA degree with a major equivalent in environmental studies may do so under the Interdisciplinary Studies Program. The program encourages a great deal of self direction to accommodate the student's individual goals and interests.

Environmental studies students may focus their curriculum on either the social or natural/physical sciences and find employment in both the public and private sectors as environmental resource managers, environmental specialists, hazardous waste managers, or any number of related fields. Others pursue graduate studies in environmental sciences, law, chemistry, biology, public health, planning, geography, resource manage-

ment, etc. A unique feature of the program is the ability to undertake an internship with a local agency or organization chosen by the student. In this internship (IS 489), students design and carry out an environmental research project complete with proposal, progress and final reports, and formal oral presentation to the internship sponsors. The EVS program has enjoyed the consistent cooperation and enthusiasm of more than 40 federal, state, and county agencies and departments and many private organizations as sponsors of EVS students.

### Undergraduate Study

#### Bachelor's Degree

The equivalent of an undergraduate major in environmental studies is available in the BA in interdisciplinary studies program. For information, contact the Environmental Center or Interdisciplinary Studies Program. Interested students should refer to "Interdisciplinary Studies" within the Undergraduate Education section.

#### Requirements

- Introductory courses:
  - BIOL 101/101L or BIOL 171/171L
  - CHEM 151/151L or 161/161L or 171/171L
  - ECON 120 or 130
- Major courses: Students must complete a minimum of 36 credit hours, including:
  - BIOL 310 or OCN/OEST/MET 310
  - BOT 454 or ZOOL 200/200L
  - GEOG 404
  - OCN 320
  - IS 489
- 20 to 24 credit hours in courses specific to the student's area of environmental studies specialization

Students must maintain a 2.5 GPA in the major course work. For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

#### Certificate in Environmental Studies

A Certificate in Environmental Studies signifies that a student has completed substantial environmental course work in addition to the requirements of his or her regular major. Certificate candidates are required to submit a proposal and complete 15 credit hours of course work, including two required courses and three electives from an approved list of courses. The required courses are BIOL 310 or OCN/OEST/MET 310, and IS 489. Electives for social science or humanities majors are two courses in the natural sciences and one from the social sciences. Natural science majors must select two courses from the social sciences and one from the natural sciences.

- Electives for the natural science courses include the following:
  - BIOL 360, 410, 425
  - BOT 450, 453, 454, 455
  - GEOG 300, 305, 309, 401, 404, 405, 410
  - GG 455
  - OCN 320, 330, 331
  - ZOOL 439/439L, 450, 485
- Electives for the social science courses include the following:
  - AMST 320, 420
  - ANTH 415, 435

- ARCH 341
- ECON 358
- GEOG 330, 335, 380
- IS 361
- NREM 302
- PLAN 310, 399
- SOC 412

## Ethnic Studies

College of Social Sciences  
2560 Campus Road, George Hall 301  
Honolulu, HI 96822  
Tel: (808) 956-8090  
Fax: (808) 956-9494  
Email: esdept@hawaii.edu  
Web: www.ethnicstudies.hawaii.edu

### Faculty

- T. Tengan, PhD (Chair)—identity, gender, indigenous theory and methodology, Hawai'i and the Pacific
- I. G. Aoudé, PhD—Hawai'i political economy, Middle East politics, social movements in Hawai'i and the South Pacific
- B. Chung, PhD—Chinese diaspora, transnationalism, Chinese Americans, popular culture and music
- M. Das Gupta, PhD—South Asians in America, race and gender politics, U.S. immigration policies
- U. Hasager, PhD—associate specialist in civic engagement
- N. Kent, PhD—political economy in Hawai'i and the Pacific, American ethnic relations
- R. Labrador, PhD—Filipino culture, history and politics in Hawai'i and the U.S., culture, race, ethnicity, class, diaspora
- D. McGregor, PhD—Hawaiian history, social movements in Hawai'i and the Pacific
- J. Y. Okamura, PhD—race and ethnicity, minority access to higher education, ethnic relations in Hawai'i, Japanese in Hawai'i, Filipinos in Hawai'i, Asian Americans
- F. L. Uperesa, PhD—American ethnic and race relations, racism and ethnicity in Hawai'i

### Affiliate Faculty

- A. Castanha, PhD—political science (indigenous cultures)
- W. Nishimoto, PhD—education (oral history)
- L. Petranek, PhD—political science (political economy)
- L. Wang, PhD—American studies (immigration law and critical race theory, Asian American politics and public policy, feminist ethnography)

**Degree and Certificate Offered:** Certificate in Ethnic Studies, BA in ethnic studies

### The Academic Program

The Department of Ethnic Studies (ES) is an interdisciplinary program with emphasis on undergraduate education. Initiated in 1970, ethnic studies combines traditional and contemporary methodologies with new perspectives on issues of race, ethnicity, and class. The focus is Hawai'i with its rich legacy of multiethnic heritages, but the research, teaching, and service components also involve the U.S. as a whole and comparative studies of societies around the globe.

Ethnic studies provides introductory and advanced courses on theories and practices of ethnicity, race, class, and gender. The program also offers courses on the history and experiences of specific groups, including African Americans and Native Americans. Among groups in Hawai'i, Chinese, Filipinos, Hawaiians, and Japanese are subjects of separate courses. There are also courses dealing with critical topics such as ethnic identity, land tenure, social movements, and labor history.

Students may earn a BA or the Certificate in Ethnic Studies. Graduates have gone on to successful work in public service, social service, business, law, labor organization, education, and other fields that require sensitivity to people and their backgrounds.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

Students must complete 30 credit hours, including:

- ES 101 and 380
- 12 credit hours on the history and social dynamics of ethnic groups from ES 221, 305, 306, 330, 331, 333, 338, and 339
- 12 credit hours on the history, theories, and problems of ethnic groups and ethnicity in the framework of social, economic, and political change from ES 301, 310, 318, 320, 340, 350, 360, 365, 370, 372, 373, 375, 381, 390, 392, 397, 399, 410, 418, 420, 443, 455, 456, 460, 480, 492, 493, 495, and 496
- A 2.0 GPA in ethnic studies and the 6 credit hours of related courses must be approved by a departmental advisor

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Certificate

#### Requirements

- Complete 18 credit hours in ethnic studies with a 3.0 GPA
- ES 101 (301 may be substituted)
- 6 credit-hours on the history and dynamics of ethnic groups from ES 221, 305, 306, 330, 331, 333, 338, and 339
- 9 credit-hours on the history, theory, and problems of ethnic groups and ethnicity in the framework of social, economic, and political change from ES 301, 310, 318, 320, 340, 350, 360, 365, 370, 372, 373, 375, 380, 381, 390, 392, 397, 399, 410, 418, 420, 440, 443, 455, 456, 460, 480, 492, 493, 495, and 496

## Faculty

- \*E. A. Wingert, PhD (Chair)—cartography, remote sensing
- \*D. Beilman, PhD—biogeography, long-term ecology, terrestrial carbon accumulation, paleoenvironmental change
- \*Q. Chen, PhD—remote sensing, geographic information systems, geostatistics, spatially-explicit modeling
- \*T. W. Giambelluca, PhD—climatology, hydrology
- \*H. Jiang, PhD—cultural geography, environment, perception of nature, China
- \*R. Jones, PhD—political geography, globalization, borders, sovereign state system, nationalism, South Asia
- \*S. M. Jorgensen, PhD—evolutionary biogeography, landscape and ecological genetics, conservation
- \*M. G. McDonald, PhD—agricultural change, social theory, political geography, Japan
- \*M. McGranaghan, PhD—computer cartography, geographic information systems
- C. Mora, PhD—interlinks between biodiversity patterns, processes, threats and human welfare
- M. Mostafanezhad, PhD—cultural politics of tourism, politics of consumption, Thailand
- \*A. Rieser, J.D., LL.M.—marine environmental governance; marine science and policy; political geography of the oceans; ocean policy and climate change
- \*K. Suryanata, PhD—political ecology, agricultural geography, natural resource management, Third World
- \*R. A. Sutherland, PhD (Associate Dean)—geomorphology, soil erosion, water quality
- \*B. Szuster, PhD—coastal resource management, environmental impacts assessment, marine recreation, Thailand

## Cooperating Graduate Faculty

M. D. Merlin, PhD—biogeography, natural history of Hawai'i

## Affiliate Graduate Faculty

M. Finucane, PhD—environmental perception  
J. Fox, PhD—social forestry  
N. Lewis, PhD—medical geography  
J. Maragos, PhD—coastal and marine resources  
T. A. Siddiqi, PhD—energy technology, environmental policy

**Degrees Offered:** BA (including minor) in geography, MA in geography, PhD in geography, Graduate Certificate in Ocean Policy

## The Academic Program

Geography (GEOG) provides a broad and flexible academic program that explores the human and environmental systems that shape the surface of the Earth. The discipline investigates the interaction of culture, society, ecology and physical environ-

ments that characterize particular places and studies how these relationships vary across space. The undergraduate program at UH Mānoa focuses on three interlocking subdisciplines: human geography, environmental geography, and geographic technologies. Human geography investigates the cultural, economic, and political processes that shape human experiences on the Earth; the relationship between the environment, society, and culture; and the nature of place in the Asia-Pacific region. Environmental geography engages in a systematic study of the Earth's physical environment (atmosphere, biosphere, hydrosphere, and lithosphere) and considers the challenges associated with natural resource management and global environmental change. Geographic technologies include the study of cartography, geographic information systems (GIS), and remote sensing science.

Students who study geography obtain a holistic understanding of the world and a set of methodological tools that can be applied to a wide range of domestic and international career opportunities. Geographers are involved in environmental planning, natural resource management and social policy development with all levels of government, private firms, non-profit organizations, educational institutions, and international agencies. Hawai'i's unique historical, socio-cultural and environmental context also provides a fascinating setting for geographical investigations into the wider Asia-Pacific region.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

Students must complete 16 core credit hours including:

- GEOG 101/101L, 104, 151, 380, and 493

In addition to the core requirements, each student must elect one of three of the following streams and complete at least 21 credit hours in the upper division courses specific to each stream.

- Environmental stream:
  - two environmental geography courses
    - GEOG 300, 302, 303, or 309
  - one geotechnical course
    - GEOG 370, 376, 391, or 388
  - one human geography course
    - GEOG 322, 325, 330, or 335
  - three upper division environmental geography courses (two from the list below)
    - GEOG 400, 401, 402, 403, 404, 405, 408, 409, 410, 411, 412, or 413
- Geotechnical stream:
  - two geotechnical courses
    - GEOG 370, 376, 391, or 388
  - one environmental geography course
    - GEOG 300, 302, 303, or 309
  - one human geography course
    - GEOG 322, 325, 330, or 335
  - one intern or research topic course
    - GEOG 468 or 492
  - two upper division courses from the list below
    - GEOG 470, 472, 476, or 489

- Human stream:
  - two human geography courses
    - GEOG 322, 325, 330, or 335
  - one environmental geography course
    - GEOG 300, 302, 303, or 309
  - one geotechnical course
    - GEOG 370, 376, 391, or 388
  - three upper division human geography courses (two from the list below)
    - GEOG 421, 422, 423, 424, 425, 426, 435, or 436

Individual programs are designed in consultation with the undergraduate advisor.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Minor

### Requirements

The minor in geography requires 15 credits of upper division course work in geography, which should include at least one course in each of the three areas: human geography; environmental geography; and geotechnology.

## Graduate Study

The department offers programs of graduate study and research leading to the MA and PhD degrees. Faculty interests and supporting strengths of UH Mānoa provide advantages for study of the following general topics: (a) environmental studies and policies; (b) resource management and systems; (c) conservation, urbanization, and regional development; (d) cartography, remote sensing, and geographic information systems; and (e) Pacific and Asian regional problems.

Applicants are expected to have a broad-based undergraduate education encompassing basic courses in the physical sciences, social sciences, and humanities. They should have a firm grasp of the fundamentals of environmental and human geography and of basic cartographic and quantitative techniques. Intended candidates for the MA or PhD need not have an undergraduate major in geography; students from related fields are welcome, but any subject-area weakness must be remedied by course work.

Holders of graduate degrees in geography are employed in research and administrative positions in county, state, federal, and international agencies; research positions in private business, especially consulting firms; and teaching positions in secondary schools, community colleges, colleges, and universities.

## Master's Degree

Applicants for admission to the MA program in geography must provide two transcripts, GRE scores (General Test only), completed application forms (available from the department, the Graduate Division, and the Web), and three letters of reference.

### Requirements

The department offers a Plan A (thesis) program. In consultation with an advisory committee, the candidate plans a coherent program of study drawn from departmental offerings and pertinent courses from other UH Mānoa departments and programs. Each MA student must complete a minimum 31-credit program, including:

- 7 credit hours of core classes (GEOG 692, 695, 696)
- 15 credit hours in the chosen field of specialization
- 3 credit hours in advanced research skills
- 6 credit hours in GEOG 700 Thesis Research

## Global Ocean Policy Certificate Program

Guiding state governance and community stewardship of the oceans requires an interdisciplinary approach grounded in both theory and empirical study of the human-marine environment relationship. The Global Ocean Policy Certificate Program is designed as a concurrent program for classified graduate students and law students in good standing. Community professionals and practitioners who meet minimum admissions requirements are eligible also to build their skills in coastal conflict resolution, maritime boundaries and marine GIS, species recovery, and ecosystem-based management of marine resources. An advisor assists each student in custom-designing a 15 credit program that draws on marine-related courses at UH in geography, law, history, marine science, environmental and resource economics, public policy, conflict resolution, and planning. A major paper or internship project and participation in an interdisciplinary seminar are required. For further information and applications, see the department's web page.

## Doctoral Degree

The PhD program is highly selective, and admission is based upon demonstrated competence in previous work and promise of research ability. In addition to the materials required for MA admission, PhD applicants must submit representative samples of research writing and a comprehensive statement of professional goals and objectives. Students who have completed MA degrees in fields other than geography may be considered for admission to the PhD program. If admitted, however, they must undertake any remedial course work recommended by the department.

### Requirements

The PhD program consists of advanced courses and research seminars in the department, independent reading and research, and work in related disciplines. Each candidate will be expected to have taken the core program required for MA candidates or its equivalent. In addition, the following are common elements of all geography PhD programs:

1. Attendance and participation, while in residence, in the geography colloquium;
2. Familiarity with the general development of geographic thought (GEOG 695);
3. Minimum of 15 credit hours in graduate courses in a departmental field of specialization (course work taken at the MA/MS level may be used in partial fulfillment of this requirement);
4. Minimum of 6 credit hours in research methods or techniques (statistics, cartography, remote sensing, GIS, quantitative or qualitative methods, computer applications, field methods, experimental methods, laboratory techniques or bibliographic techniques);
5. Passing of written and oral comprehensive examinations; and
6. Submission and defense of a satisfactory dissertation.

- \*C. K. Matteson, PhD—modern Europe, France, environmental history
- \*M. T. McNally, PhD—Tokugawa Japan, social and intellectual
- \*N. Njoroge, PhD—U.S., Caribbean and Latin America, race and critical theory
- \*R. L. Rapson, PhD—U.S., cultural and intellectual
- \*R. C. Rath, PhD—U.S., early America, Atlantic world, Native American, sensory
- \*S. J. Reiss, PhD—U.S. foreign relations, Latin America and Caribbean, African
- \*M. P. Romaniello, PhD—early modern Europe, Russia, Soviet Union, gender
- \*J. P. Rosa, PhD—Hawaiian Islands, 20th century Hawai'i, U.S. social and cultural
- \*S. Schwartz, PhD—ancient Europe, classical history, gender, law
- \*M. P. Speidel, PhD—ancient Europe, Greece and Rome, Roman military, epigraphy
- \*Y. Totani, PhD—modern Japan, Pacific
- \*W. Wang, PhD—classical China, Ming/Qing China, politics and culture
- \*T. J. Yoo, PhD—modern Korea, colonialism, gender and cultural studies
- \*H. F. Ziegler, PhD—modern Europe, Germany, Holocaust, world history

## Cooperating Graduate Faculty

B. Andaya, PhD—Southeast Asia

**Degrees Offered:** Undergraduate Certificate in Islamic Studies, BA (including minor) in history, MA in history, PhD in history

## The Academic Program

History (HIST) is the study of change and continuity in human society over time. Drawing upon concepts and methods of many disciplines, history provides perspective on the human condition, past and present. The discipline of history develops skills in evaluating evidence, organizing information, clarifying and structuring concepts, and writing narratives and expositions. History is a core around which liberal education can be structured. The study of history lays a foundation upon which one can develop a cultural, social, and intellectual life that enriches an understanding of the wider world.

Majoring in history is an excellent way to move into specialized study in such areas as teaching, library and information science, foreign service, medicine, law, and business. Those who plan to pursue a career as professional historians will want to continue their education and obtain the MA and PhD degrees. The Department of History of UH Mānoa offers a full range of courses in American, Asian, European, Pacific, and world history.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

Students must complete eleven courses (33 credit hours) in history with a grade of C (not C-) or better, distributed as follows:

- Minimum of five courses (15 credit hours) in one of the following four fields (U.S., Europe, Asia/Pacific, Europe, or Comparative/World)
- One upper division course (3 credit hours) in each of the other three fields
- HIST 396 and 496
- One additional history course

No more than two 200-level courses (6 credits) may be used toward the history major, and no 100-level course may be counted.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor

#### Requirements

For a student to minor in history, the declaration of intent should be made as early as possible after matriculation. The student must contact the undergraduate advisor of the department and complete the appropriate forms. The minor requires the successful completion with a grade of C (not C-) or better of 15 credit hours of upper division history courses. It is possible to concentrate in a particular area of history, but it is not necessary to do so. No one specific course is required for the minor.

### Undergraduate Certificate in Islamic Studies

The purpose of this certificate is to increase understanding of Islam as a world religion through critical analysis of primary and secondary materials, to foster knowledge about the complexity among Islamic societies and their diverse cultural expressions, and to explore the role of Islam and Muslims in present and past world affairs.

This certificate is housed within the College of Arts and Humanities. The participating departments are Art and Art

History, History, Philosophy, and Religion. Minimum prerequisites for acceptance into the program for undergraduates are sophomore or higher standing with a minimum GPA of 2.5 and the completion of at least one introductory course within one of the four participating departments with a grade of B or better.

A more complete description and the requirements are described under the Department of Philosophy.

## Graduate Study

The Department of History offers the MA and PhD degrees in the American, Asian, European, and Pacific fields. A field of world history is offered at the PhD level only. All applicants for advanced degree programs in history are requested to supplement the application and transcripts required by the Graduate Division with letters of recommendation (two for the MA, three for the PhD), preferably from professors with whom the applicant has worked; a sample of written work such as a term paper, seminar paper, or MA thesis; and the General Test scores from the GRE. These supplementary items should be sent directly to the department.

Complete details on all graduate programs in history, as well as financial aid available to prospective students, are outlined in the departmental website, [www.manoa.hawaii.edu/history](http://www.manoa.hawaii.edu/history) or by email at [gradhist@hawaii.edu](mailto:gradhist@hawaii.edu).

Recipients of advanced degrees in history have undertaken careers as teachers of history and social studies in secondary schools, community colleges, colleges, and universities. In addition, the study of history provides an excellent background for alternative careers in museology, library and archival work, government service, historical preservation, business and marketing research, and allied research fields. The department has a placement officer to assist graduates with career choices and in locating employment opportunities.

Courses for the graduate programs are to be selected from among the history courses listed in back of the *Catalog* and from graduate offerings in related disciplines as directed by the student's supervisory committee. The consent of the instructor is required for admission to all courses numbered 600 and above. Courses numbered over 600, except HIST 602 and 790, may be repeated *once* for credit.

## Master's Degree

Intended candidates for the MA degree must present a minimum undergraduate preparation of 18 upper division credit hours in history or some closely allied field such as Asian studies or American studies. Students who lack this preparation or who wish to undertake study in an area of history other than that of their undergraduate preparation must make up deficiencies either before or during graduate study. In the latter case, the student will be admitted only conditionally, pending removal of the deficiencies.

The prospective MA candidate may select either Plan A (thesis) or Plan B (non-thesis). Both plans require the intended candidate to give evidence of competence in a foreign language appropriate to the field of major interest. In addition, students in the U.S. or East Asia history areas in either Plan A or Plan B must also meet seminar distribution requirements, which raise the minimum required 600-level work to 18 credit hours.

## Plan A (Thesis) Requirements

Plan A requires a minimum of 24 credit hours of graduate work, at least 15 of which must be in courses numbered 600 and above (including HIST 602), plus 6 credit hours of HIST 700 Thesis Research, a written thesis, and a final oral examination, which is a defense of the thesis.

## Plan B (Non-thesis) Requirements

Plan B requires a minimum of 30 credit hours of graduate work, at least 18 of which must be in courses numbered 600 and above (including HIST 602), comprehensive examinations in two fields of history (a major and a minor), a final oral examination covering those two fields of history, and submission of two major research papers from graduate seminars, one in the major field and the other in the minor field.

## Doctoral Degree

Intended candidates for the PhD degree are expected to possess the MA degree in history or its equivalent. The PhD candidate must demonstrate the capability of pursuing a successful career as a professional historian by showing initiative in historical research and by giving evidence of the ability to present findings both orally and in writing.

## Requirements

The candidate must prove competence by the acquisition of a broad background in general history, passing four comprehensive examinations in two broad geographic areas of history and completing an original dissertation and a final oral examination. The candidate must also demonstrate a knowledge of at least two foreign languages related to the dissertation topic; for students of American or Hawaiian history an alternative requirement may, at the discretion of the doctoral committee, be substituted for one of the languages.

## Indo-Pacific Languages and Literatures

College of Languages, Linguistics and Literature  
Spalding 255  
2540 Maile Way  
Honolulu, HI 96822

Web: [www.manoa.hawaii.edu/ipll/](http://www.manoa.hawaii.edu/ipll/)

## Faculty

- J. F. Mayer, PhD (Chair)—language learning and teaching, language in society, Samoan
- A. S. Agcaoili, PhD—Philippine literature and culture, creative writing: poetry, fiction, drama, Ilokano language and literature, philosophy of language, literary relations, literatures of exile and diaspora
- P. C. Arboleda, PhD—Philippine literature, creative writing, Ifalig orature and Philippine folklore, gender studies, literary theory, and Southeast Asian traditional culture
- \*S. Bhatawadekar, PhD—Hindi, Urdu language, foreign and heritage language teaching, pedagogy, curriculum and material development and program building; South Asian cinema and culture; film

adaptation of literature, Hindi and Buddhist religious philosophies and their reception in the West; German-Indian comparative philosophy

- M. T. Boyce, PhD—applied linguistics, Corpus linguistics, lexicography; Maori language learning and teaching; immersion education; children’s productive reo Maori, resources for literacy; literature in Maori for adults and children, traditional song poetry; language maintenance and shift, language and power
- S. T. Chailloux, MA—linguistic anthropology, the power’s dimension of the Tahitian language in the political and religious area; anthropology of Christianity, syncretism and contextual theology in the Tahitian Protestant Church; contemporary history of Tahiti; Tahitian oratory art (traditional speech)
- I. Gasmen, MA—Filipino (Tagalog) language learning and teaching; language and multimedia; educational communication, distance education
- L. Hamedani, PhD—linguistics, Persian language syntax, testing, translation, Persian culture, and modern and classical Persian literature as well as pedagogy and second language acquisition
- Y. Hoonchamlong, PhD—Thai linguistics, language learning and teaching, information technology in language research and language learning
- J. R. Knutson, PhD—Assistant Professor of Sanskrit and Bengali, Sanskrit literature and literary theory, ancient and early medieval history and literary history of South Asia, Early Middle Bengali poetry, comparative premodern poetry and poetics
- U. Kozok, PhD—Indonesian language and literature, prehistory and paleography of Island Southeast Asia, Sumatran philology
- F. Lesa, PhD—language learning and teaching, Samoan
- R. E. S. Mabanglo, PhD—Philippine literature, poetry, drama, creative writing, Filipino language
- S. D. O’Harrow, Doceo—Vietnamese language, philology and civilization, Sino-Vietnamese
- L. C. Pagkalinawan, PhD—Filipino (Tagalog) language learning and teaching, Filipino linguistics; Philippine literature, creative writing, sociolinguistics
- C. Sak-Humphry, PhD—Khmer language, linguistics and literature; development of Khmer language teaching materials, linguistics research on Old Khmer inscriptions (Pre-Angkor to Angkor period)
- L. Q. Santiago, PhD—Philippine studies, Philippine literatures, Ilokano and Filipino (Tagalog) languages and literatures, poetry, fiction, creative writing and critical writing, comparative literature, women and feminist literatures, and translation studies
- M. F. Simanu-Klutz, PhD—Samoan language learning and teaching, pedagogy, traditional literature and forms of entertainment, intersections of oral traditions and cultural history, creative writing
- J. Soria, PhD—Ilokano language, second/foreign, and heritage language teaching and learning, curriculum development and evaluation, media literacy and electronic portfolio

**Degrees and Certificates Offered:** Undergraduate Certificate in Indo-Pacific languages (Filipino, Hindi, Ilokano, Indonesian, Khmer, Samoan, Sanskrit, Tahitian, Thai, or Vietnamese); BA in Philippine Language and Literature; BA in interdisciplinary studies (concentration in Hindi, Indonesian, Samoan, Sanskrit, Thai, or Vietnamese); minor in Filipino and Ilokano Language and Culture

## The Academic Program

Indo-Pacific Languages and Literatures (IPLL) provides instruction in the languages of the Indo-Pacific area to a broad spectrum of students at UH Mānoa. The department’s coverage

of these languages is unique in the U.S.: This department is the only one to offer programs of study in four Polynesian languages, most of the national languages of Southeast Asia, as well as classical and modern Indian languages as well as Arabic, Urdu, and Persian. Beyond language, the department offers courses in the literatures and cultures of the area, including literature in translation of South and Southeast Asia, Polynesia, and the Philippines. Opportunities are available for study abroad in certain areas. The department at UH Mānoa provides an opportunity without parallel elsewhere in the country for students to acquire an in-depth knowledge of the languages and cultures of that part of the world that encompasses more than 25 percent of the Earth’s population and an unusual diversity of peoples.

All the department’s elementary- and intermediate-level language courses may be used to fulfill the Hawaiian or second language requirement for all bachelor’s degrees at UH Mānoa. Students of Indo-Pacific languages and cultures can also enhance their opportunities to find a career in international relations; provide service to the community in such fields as social work, public health, nursing, medicine, and law; perform research on Asia and the Pacific; and develop cross-cultural awareness and understanding in Hawai‘i’s multicultural environment.

Language offerings include Arabic, Cambodian (Khmer), Chamorro, Filipino, Hindi, Ilokano, Indonesian, Maori, Marshallese, Persian, Samoan, Sanskrit, Tahitian, Thai, Tongan, Urdu, and Vietnamese. For additional languages and topics, see Indo-Pacific languages (IP) courses listed at the back of the *Catalog*.

## Undergraduate Study

### Certificates

On recommendation of the Department of Indo-Pacific Languages and Literatures, UH Mānoa confers certification of achievement in Filipino, Hindi, Ilokano, Indonesian, Khmer, Samoan, Sanskrit, Tahitian, Thai, and Vietnamese.

### Requirements

15 credit hours beyond the intermediate level in the language of choice, including:

- 6 credit hours in continuing language study
- 9 credit hours in language, literature, or structure courses selected to complement the major field of study

A 3.0 GPA in courses leading to the certificate is required.

### BA Degree in Philippine Language and Literature (with concentration in Filipino or Ilokano)

The program has the following objectives: prepare students for future careers in community service and education; prepare students for advanced research and/or graduate studies in various fields in the humanities and social sciences; and ultimately, serve students of Filipino ancestry by providing them with a better understanding of Philippine culture and proficiency in a Philippine language.

To view the Bachelor Degree Program Sheets with Filipino and Ilokano concentrations, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Requirements

A minimum of 36 credit hours, made up of 24 credits in required language and literature courses in Filipino or Ilokano

- 12 credits language skill courses: 301-402
- 12 credits literature and culture courses
- and 12 credits upper division and outside electives

### **Minor in Filipino**

Students completing the program would have both oral and written competence in Filipino as well as cultural content sufficient for use in professional careers, graduate work or research, and field work.

#### **Requirements**

A minimum of 15 credit hours from five non-introductory courses in Filipino and Philippine culture is required.

- at least 9 credits culture and literature courses
- 6 credits language skill courses

### **Minor in Ilokano**

Students completing the program would have both oral and written competence in Ilokano as well as cultural content sufficient for use in professional careers, graduate work or research, and field work.

#### **Requirements**

A minimum of 15 credit hours from five non-introductory courses in Ilokano language and culture is required.

- at least 9 credits culture and literature courses
- 6 credits language skill courses

## **Honors and Awards**

### **Samuel H. Elbert Graduate Scholarship**

Offered to encourage graduate-level research and study for students specializing in Pacific Island language and related fields, this scholarship provides an award of up to \$5,000 per semester to students registered in graduate programs at UH Mānoa.

### **Amos P. and Edna Lee Leib Scholarship for Graduate Study of Literature of the Pacific**

Offered to support graduate students pursuing the study of literature of the Pacific.

### **Ilokano BA Scholarship**

The scholarship provides academic recognition to an undergraduate student in the College of Arts and Sciences pursuing a Bachelor of Arts in Philippine Language and Literature with Concentration in Ilokano.

### **Roshan Institute Graduate Fellowship for Persian Linguistics, Language Acquisition and Applied Linguistics**

Offered to support graduate students pursuing the study of Persian, Roshan Cultural Heritage Institute provides two renewable Graduate Fellowships for outstanding PhD students in Persian Linguistics, Language Acquisition, and Applied Linguistics.

### **Roshan Institute Graduate Student Fellowship for Persian**

Offered to support graduate students pursuing the study of Persian, Roshan Cultural Heritage Institute provides two annual non-renewable fellowships of \$5,000 for graduate students.

### **Jack Haven Ward Graduate Scholarship**

Promoting the study of Tahitian (first priority) and any other language of French Polynesia or Balinese.

## **Information and Computer Sciences**

College of Natural Sciences

POST 317

1680 East-West Road

Honolulu, HI 96822

Tel: (808) 956-7420

Fax: (808) 956-3548

Web: [www.ics.hawaii.edu](http://www.ics.hawaii.edu)

### **Faculty**

- \*D. Chin, PhD (Chair)—artificial intelligence, natural language processing, user modeling
- \*K. Baek, PhD—computer vision, neural computation, machine learning
- \*E. Biagioni, PhD—networks, systems, languages
- \*K. Binsted, PhD—artificial intelligence, human-computer interaction, cognitive science, natural language processing
- \*H. Casanova, PhD—high performance computing, distributed systems
- \*M. E. Crosby, PhD—human-computer interaction, cognitive science
- \*R. Gazan, PhD—social aspects of information technology
- \*P. Johnson, PhD—software engineering, artificial intelligence
- G. Lau, MS—educational specialist
- \*J. Leigh, PhD—big data visualization, virtual reality, high performance networking, human augmentics, video game design
- \*D. Li, PhD—security, privacy and performance in systems, software, networks and databases
- \*L. Lim, PhD—database systems
- \*M. B. Ogawa, PhD—educational specialist
- \*J. Patriarche, PhD—applications of computers to medicine
- \*D. Pavlovic, PhD—security, software, search and networks, quantum computation
- \*G. Poisson, PhD—cognitive informatics, bioinformatics, machine learning
- \*L. Quiroga, PhD—information retrieval, databases, library systems, website design
- \*N. Reed, PhD—artificial intelligence, autonomous agents
- \*S. P. Robertson, PhD—human-computer interaction, digital government and digital democracy
- \*P-M. Seidel, DrEng habil—formal methods, computer arithmetic, computer architecture, algorithms
- \*N. Sitchinava, PhD—algorithms and data structures, parallel and distributed computation, I/O- and cache-efficient computation
- \*J. Stelovsky, DrTechSc—computer-hypermedia, human-computer interaction
- \*S. Still, PhD—bioinformatics/theoretical biology, information theory, machine learning
- \*K. Sugihara, DrEng—algorithms, distributed computing, visual languages
- \*D. Suthers, PhD—human-computer interaction, computer-supported collaborative learning, technology for education, socio-technical networks and online communities

## Affiliate Graduate Faculty

D. R. Stoutemyer, PhD—computer algebra, mathematical software

\*D. Streveler, PhD—medical informatics

**Degrees Offered:** BA in information and computer sciences, BS (including minor) in computer science, MS in computer science, MLISc in library and information science, PhD in computer science, and PhD in communication and information sciences (interdisciplinary)

## The Academic Program

Information and computer sciences (ICS) is the study of the description and representation of information and the theory, design, analysis, implementation, and application of algorithmic processes that transform information. Students majoring in ICS will learn to use computer systems, a valuable skill which can be applied in all fields of study. Students will also learn the scientific principles and technology required to develop new computer systems and applications. The curriculum covers all major areas of computer science with special emphasis on software engineering, computer networks, artificial intelligence, human-computer interaction and bioinformatics, and areas uniquely suited to Hawai'i's role as a multicultural and geographical center of the Pacific.

## Undergraduate Study

### Bachelor's Degree

To be admitted into the program, first-year students entering UH Mānoa directly from high school must first be admitted into the Colleges of Arts and Sciences. For continuing students, a cumulative GPA of at least 2.0 is required for admission.

### BA in Information and Computer Sciences

#### Requirements

Students pursuing this degree are required to submit a short proposal listing the courses they intend to take to complete their ICS major. An ICS faculty advisor must approve this proposal in writing. Samples of course proposals are available at the ICS department office. Students must complete the following courses (49 credits):

- ICS 111, 141, 211, 212 or 215, 241, 311, 312 or 331, 313 or 361, 321, and 332
- At least three ICS courses at the 400-level or above,
- Four upper division (300-level or above) courses in some area of concentration. The area of concentration courses do NOT have to be from the same department.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BS in Computer Science

#### Requirements

- Students must complete the following courses (47 credits):
- ICS 111, 141, 211, 212 or 215, 241, 311, 312 or 331, 313 or 361, 314, 321, and 332
  - At least five ICS or other approved courses at the 400 level or above

Substitutions are permitted with the written approval of an ICS faculty advisor.

Waiver of certain requirements, such as by Advanced Placement CS Exam, must be approved by the ICS faculty advisor.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor

A cumulative GPA of at least 2.0 and a grade of B (not B-) or higher in ICS 111 in computer science are required for admission.

### Requirements

Students must complete ICS 211 with a grade of B (not B-) or higher, 212, and 241 and their prerequisites, 111 and 141, and three ICS courses at the 300 level and above with a grade of C (not C-) or better.

## Graduate Study

The department offers the MS degree in computer science, the MLISc degree in library and information science (see the "Library and Information Science" section within the Colleges of Arts and Sciences for more information), and the PhD degree in computer science. The department is one of four academic programs that cooperate in an interdisciplinary doctoral program in communication and information sciences (see the "Communication and Information Sciences" section within the Colleges of Arts and Sciences for more information).

Applicants for the MS and the PhD in computer science are required to take the GRE General Test. The subject area examination in computer science is highly recommended. Applicants from foreign countries must be academically qualified, proficient in English (TOEFL or IETLS with scores above the minimum required by the Graduate Division, with the additional requirement that TOEFL scores be 580/237/92 or above for admission to the MS program, and 600/250/100 or above for admission to the PhD program, where scores are listed as paper/computer/internet), and sufficiently financially supported.

The department offers three forms of financial aid: teaching assistantships, research assistantships, and tuition waivers. The department offers a limited number of assistantships each semester, most of which are teaching assistantships. Teaching and research assistants work approximately 20 hours per week under the supervision of a faculty member and receive a stipend as well as a tuition waiver. Teaching assistants support instruction and research assistants support extramurally funded research projects. Teaching assistantships are awarded to those applicants who can best support the instructional program. Similarly, research assistantships are awarded to those applicants who can best assist faculty with their research projects. Applicants accepted for admission may be eligible for partial financial aid in the form of a tuition waiver from the Graduate Division and foreign applicants from Pacific or Asian countries may be eligible for Pacific-Asian Scholarships. Prior to submitting a tuition waiver application form, foreign applicants must submit TOEFL/IETLS scores and documentation of financial support for expenses other than tuition to the Graduate Division Admissions Office. To apply for any of these forms of support, students should submit the ICS Graduate Assistantship Application along with three letters of recommendation using the Graduate Assistantship Evaluation Form. Because we can offer assistance to only a small fraction of applicants, we highly

encourage students to also seek other forms of support, such as the East-West Center or computer-assisted databases.

### **Master's Degree**

The master's program is intended for students planning to specialize in computer science or to apply computer science to another field. Applicants who do not possess an undergraduate degree in computer science from an accredited institution will need to complete equivalent course work.

#### **Requirements**

Plan A (thesis) and Plan B (non-thesis) are available. A minimum of 31 credit hours is required under both plans. A minimum B average must be maintained in all courses.

#### **Plan A (Thesis) Requirements**

1. At least six ICS graduate courses, i.e. courses with numbers between ICS 600 and ICS 692, with the exception of ICS 690. At least one course must be taken from each of four areas of concentration in the program to ensure breadth of knowledge. 3 credits of ICS 700 may be substituted for one of these six courses;
2. Two additional elective 600-level courses must be taken either from the ICS department or some related discipline (such as LIS, EE, MIS, etc.) on a topic related to computer science. Elective courses must have prior approval from the ICS graduate chair as to the suitability prior to enrollment in the courses;
3. Thesis research taken as 6 credits of ICS 700 is required for the degree. These credits are typically taken close to or during the final semester in the program consist of six credits of ICS 700; and
4. ICS 690 (taken for CR/NC) for one semester.

#### **Plan B (Non-thesis) Requirements**

1. At least six ICS graduate courses, i.e. courses with numbers between ICS 600 and ICS 691, with the exception of ICS 690. At least one course must be taken from each of four areas of concentration in the program to ensure breath of knowledge;
2. Two additional elective 600-level courses must be taken either from the ICS department or some related discipline (such as LIS, EE, MIS, etc.) on a topic related to computer science. Elective courses must have prior approval from the ICS graduate chair as to the suitability prior to enrollment in the courses;
3. A final project taken as ICS 699 (a maximum of six credits is counted toward the degree) under the supervision of a faculty member with a written report of the final project is required at the end of the student's program of study; and
4. ICS 690 (taken for CR/NC) for one semester.

The administrative procedures for the program include the following rules:

1. The student must meet with the graduate program chair during the first semester;
2. Upon completion of a least 12 credit hours of courses applicable to the degree, students are encouraged to propose a degree plan by selecting Plan A (Thesis) or Plan B (Non-Thesis) options;
3. Plan A students are encouraged to choose a thesis topic and committee upon completion of 18 credit hours of applicable courses; and

4. All requests for changes in degree plan must be submitted in writing by the student and approved by the graduate program chair before the diploma application is filed.

### **PhD in Computer Science**

The department offers a PhD in computer science that prepares students for creative research, teaching, and service. There are two programs leading to the PhD degree, one designed for the applicant entering with bachelor's degrees, and the other for those who already have master's degrees. Students may begin their program either in the fall or spring semesters.

Applicants with bachelor's degrees must first satisfy the admission and degree requirements of the master's degree in computer science. Advantages to this route are (1) students are admitted at an early stage to the PhD program; (2) they will, in practice, usually take a year LESS to obtain their PhD since the MS portion of the program will prepare them for their qualifying examination; and (3) students who have completed the MS requirements will have the option of obtaining a master's degree even if they do not continue with the PhD program.

Applicants with master's degrees in areas other than computer science may be admitted to the program, but will be required to fulfill their program deficiencies with additional course work.

Requirements for students to complete the PhD program are:

1. Passing a qualifying examination demonstrating core competency in computer science no later than the end of the first year of their PhD studies;
2. Preparing a portfolio showing research readiness by the end of the second year of their PhD studies;
3. Defend their PhD proposal;
4. Final defense of PhD dissertation.

In addition, students must continue to pass a seminar course(s), ICS 690, during the "PhD portion" of their program. After passing the oral examination covering their general preparation for the research involved, students must write a dissertation that must be approved by the doctoral committee.

### **Interdisciplinary Doctoral Degree Program**

The ICS department participates in an interdisciplinary program in Communications and Information Sciences (CIS) that integrates computer science, library science, communication and management information systems. Due to the broad knowledge base required to support the program, it draws on a variety of majors such as behavioral science, economics, engineering, and political science. The computer science program is one of four academic programs (COM, ICS, ITM, and LIS) that support this degree. See the "Interdisciplinary Program" section for more information on this program.

## Interpretation and Translation Studies

College of Languages, Linguistics and Literature  
Center for Interpretation and Translation Studies  
TP 104 (Temporary Portable)  
1859 East-West Road  
Honolulu, HI 96822

Web: [cits.hawaii.edu](http://cits.hawaii.edu)

### Faculty

- \*L. Aranda, PhD (Director)—translation studies, U.S. Latino literature, Spanish  
J. Y. Lu-Chen, PhD, CerT—translation and technology, translation pedagogy, Mandarin  
S. Zeng, PhD, CerT—translation and interpretation theory, consecutive and simultaneous interpretation, community, medical and court interpretation, Mandarin

### The Academic Program

The Center for Interpretation and Translation Studies (CITS) was established in 1988 at UH Mānoa within the College of Languages, Linguistics and Literature. The center's primary goal is to provide basic training in translation and interpretation. Emphasis is on the sociolinguistic and communication skills and techniques needed to facilitate cultural, scientific, and technical exchanges in cross-cultural and multi-national settings. These skills can be used at international conferences, as well as in medical, legal, and social service settings. Given our commitment to the community, a number of CITS courses are made available to non-UH Mānoa students through Outreach College. Generic courses are conducted in English, and any language speaker is welcome. Language-specific courses may require proof of language proficiency before enrollment. Currently interested students can receive a BA in Translation and/or Interpretation through Interdisciplinary Studies.

The center offers a six-week Summer Intensive Interpreter Training program (SIIT) every other year. This high-level certificate training program is offered in English in combination with Japanese, Mandarin, Spanish, and Korean. Certificate programs for other languages will also be offered if demand is sufficient.

## Journalism

School of Communications

- A. Auman, PhD—multimedia reporting, editing, media ethics, publication design, race, ethnicity, gender and media  
G. Y. Kato, MA—broadcast news, law, reporting

**Degree Offered:** BA in journalism

### The Academic Program

Journalism (JOUR) education develops students' critical thinking skills and ability to gather, analyze, and organize information and to communicate it clearly, effectively, and responsibly using multiple media platforms such as print, broadcast, online, and other new media. Journalism education embraces the social, cultural, and historic contexts of reporting on public and social institutions as well as on individuals and groups. It stresses the importance of a free, vigorous and responsible press to the maintenance of an informed citizenry in order to exercise the rights of self-governance in a democracy.

The journalism degree program is professional in its orientation. Admission to the major requires sophomore standing with a minimum 2.5 GPA after completion of JOUR 250 with a B or better. Majors should follow the recommended course sequencing. All students wishing to enroll in JOUR 250 and above must have earned a C or better in ENG 100. All students must take either ICS 101 or 110 or 111 before enrolling in JOUR 401 or 402.

Students are encouraged to work for campus media such as *Ka Leo O Hawai'i* or KTUH-FM news and to participate in an extensive program of professional internships and the UH Mānoa chapter of the Society of Professional Journalists (SPJ).

### Advising

Advising is mandatory for all journalism majors.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

- Admission to the major is restricted to students with sophomore standing and at least a 2.5 GPA after completion of JOUR 250 with a B or better.
- Students are required to take ICS 101 or 110 or 111 or equivalent before taking 400-level courses.
- 33 credit hours minimum in journalism courses.
- All students enrolled in journalism classes requiring off-campus assignments must sign a UH Waiver Form—Assumption of Risk and Release.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

#### Required Courses

- JOUR 250, 300, 320, 330, 365, 460, each 3 credits
- JOUR 401 and 402, each 6 credits
- 3 credits of electives or internship

### Faculty

- \*P. M. Chandler, PhD (Chair)—second language acquisition, applied Spanish linguistics, Portuguese language
- \*L. V. Aranda, PhD—U.S. Latino literature, translation
- \*A. Ascunce, PhD—19th, 20th, and 21st-century Spanish literature and cultural studies
- \*C. D. Beaulé, PhD—Latin American (Andean) anthropology, household archaeology
- \*V. H. Bennett, PhD—Russian language and literature, 19th-century Russian literature, Russian symbolism, modernism and literature of the 1920s
- \*L. Bousquet, PhD—20th and 21st century French literature and culture, French Oceania, history of the novel
- J. M. Debrah, MA—French language instruction
- \*M.-J. Fassiotto, PhD—18th-century French literature, 19th-century poetry
- K. A. Galante, MA—Spanish language instruction
- \*M.-C. Garneau, PhD—19th- and 20th-century French literature, oral genres, Italian
- \*C. R. Gerhardt, PhD—20th-century German literature, culture, and film
- \*M. González-Lloret, PhD—second language acquisition, technology and language instruction, Spanish linguistics, pragmatics
- L. N. Hamasaki, MA—classical language instruction

- D. Harris-McCoy, PhD—Greek and Latin literature, intellectual history, magic and divination
- A. B. Hawajska-Waters, MA—German language instruction
- \*K. A. Hoffmann, PhD—17th-century French literature, critical theory, theatre, interdisciplinary studies
- J. M. Huss, MA—French language instruction
- K. T. Inada, MA—classical language instruction
- A. Kostetskaya, PhD—Russian *fin-de-siècle* literature and culture, conceptual integration and blending theories, Russian and German war film
- L. E. Kou, MA—Spanish language instruction
- H. M. Kurano, MA—Spanish language instruction
- \*R. J. Littman, PhD—Greek literature, ancient history, ancient medicine, Biblical studies, Egyptian archaeology
- \*J. L. Logan, PhD—Spanish American literature and cultural studies, women's studies
- R. H. Mamiya Hernandez, MA—Spanish and Portuguese language instruction
- D. Mansilla Hermann, MA—Spanish language instruction
- R. H. Nylen, MA—Spanish language instruction
- \*M. E. Overstreet, PhD—pragmatics, discourse analysis, sociolinguistics, psycho-sociolinguistic perspectives on categorization
- \*B. J. Quintana, PhD—Spanish classical theater, colonial and post-colonial studies, Mexican culture
- S. C. Reemelin, MA—Spanish and Portuguese language instruction
- \*N. R. Schweizer, PhD—18th-century German classicism, Germans in Hawai'i, Europeans in the Pacific
- \*N. Ségeral, PhD—French and Francophone women's studies, translation theory and practice, 20th- and 21st-century trauma narratives
- \*E. M. Thau, PhD—contemporary Spanish literature, film, cultural studies
- J. C. Tomé, MA—Spanish language instruction

**Degrees and Certificate Offered:** BA in Classics, BA in French, BA in German, BA in Russian, and BA in Spanish; MA in French, MA in Spanish; Certificate in Classics, Certificate in French, Certificate in German, Certificate in Russian, Certificate in Russian Studies, Certificate in Spanish, Certificate in Latin American and Iberian Studies

### The Academic Program

The Department of Languages and Literatures of Europe and the Americas (LLEA) is divided into five divisions: Classics (ancient Greek and Latin), French/Italian, German, Russian, and Spanish/Portuguese/Latin American and Iberian Studies. Language instruction at the beginning and intermediate levels is offered in French, German, Greek, Italian, Latin, Portuguese, Russian, and Spanish. Advanced courses in composition, conversation and linguistics are offered in French, German, Russian and Spanish. Courses in the literatures of France, the Francophone world, German-speaking countries, Italy, Latin America, Russia, Spain, and Wales are offered in the original language, as are courses in the literatures of ancient Greece and Rome. Cultural studies courses that use a strong interdisciplinary approach and critical interpretive perspectives to consider the politics of representation, culture, and identity include Hispanic Cultural Studies, U.S. Latino Culture and Literature, Indigenous Peoples of Latin America, Latin American Cultural Perspectives, Spanish Cultural Perspectives, Freaks and Monsters, the Ethics of Otherness, French Civilizations, French Culture for Americans, French and Italian Literature as Film. Courses designed

to acquaint students from other fields with the traditions and cultures of Europe and the Americas are also available, both in English and in the target language and in advanced courses in specialized topics: Europeans in the Pacific, French and German Civilization, and Russian Arts and Culture.

LLEA believes that the study of film allows for an array of interdisciplinary considerations ranging from the aesthetics and politics of representation to the socioeconomics of production and distribution. It enriches students' literacy concerning visual arts, narrative, sound, movement and space, at the same time that it provokes their questioning of ethical, critical, social, and moral assumptions. LLEA offers a wide range of courses focusing on the aesthetic and historical development of film in Europe and Latin America: History of World Film, International Film Criticism, Francophone, German, Italian, Latin American, Russian, and Spanish Film.

The department promotes language proficiency and cultural awareness through its sponsorship of student organizations, films, lectures, scholarships, and Study Abroad programs. Currently, the department supports programs in France (Angers, Annecy, Paris); Florence, Italy; Berlin, Germany; Vladivostok, Russia; and several sites in the Spanish-speaking World.

## Undergraduate Study

### Bachelor's Degree

A minimum GPA of 2.5 in courses counted toward the major is required of all students earning their major in this department. At least half the credits required for the major must be taken at UH Mānoa.

### BA in Classics

- 30 credit hours of coursework
  - 3 credit hours from LLEA 122, 123, GRK 101, 102, LATN 101, 102
  - 6 credit hours from either Option A LLEA 327 and 328, or Option B LATN 201 and 202, or Option C GRK 201 and 202
  - 18 credit hours from following list of elective courses
    - Of these 18 credits, 15 must be at the 300-level or above
    - 12 of the 18 credits can be substituted with GRK or LATN courses at the 300-level or above
- ANTH 381, ART 373, HIST 331, 332, 333, 334, 335, 362, 431, 434, LLEA 301, 302, 305, 306, PHIL 211, 212, 414B, 414C, REL 200, 201
- 3 credit hours of LLEA 499

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BA in French

- 33 credit hours of FR courses above the 200 level
  - FR 311, 312, 331, and 332
  - Four French 400-level courses, including three on literature<sup>†</sup>

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

<sup>†</sup>Six credits of FR 458-459 or 460 and FR 405 may be counted as one literature course. FR 499 may be counted as literature with advisor approval if course content is appropriate.

### BA in German

- 30 credit hours of GER courses above the 200 level
- 6 credit hours from LLEA 338, 340, or 342 may be taken

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BA in Russian

For a language emphasis:

- 24 credit hours of RUS courses above 202
- 9 credit hours from LLEA (or other approved department) Russian-related courses

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BA in Spanish

- 33 credit hours of SPAN courses above the 200 level
  - SPAN 301<sup>†</sup> or 310, 302<sup>†</sup>, 303<sup>†</sup>, 351<sup>††</sup>, 352<sup>††</sup>
  - SPAN 361 or 362
  - SPAN 371 or 372
  - Two 400-level courses<sup>††</sup>
  - Two electives<sup>††</sup>

<sup>†</sup>Language skill courses (SPAN 301 to 303) are normally limited to nonnative speakers of Spanish. Native and near-native speakers should consult a department advisor to determine what courses they may take.

<sup>††</sup>Recommended courses for prospective teachers: SPAN 330, 400, 403, 451, and 452

<sup>††</sup>Recommended courses for prospective graduate students: SPAN 330, 351, 352, 451, 452, and two 400-level literature courses

Approved study abroad in a Spanish-speaking country is recommended for all students completing the major and the certificate.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Certificate

A minimum GPA of 2.5 in courses counted toward the certificate is required of all students earning their certificate in this department. At least half the credits required for the certificate must be taken at UH Mānoa.

### Certificate in Classics, French, German, Russian, or Spanish

Upon recommendation of the appropriate division chair of the Department of Languages and Literatures of Europe and the Americas, UH Mānoa confers Certificates in Classics, French, German, Russian, Russian Studies, and Spanish. Students must complete 15 credit hours of courses numbered 300 and above. For the Certificate in Classics, students may complete 12 credit hours of Greek or Latin courses numbered 300 and above, plus GRK 101-102 for those emphasizing Latin and LATN 101-102 for those emphasizing Greek. For the Certificate in German, one course may be taken from LLEA 338, 340, or 342.

### Certificate in Latin American and Iberian Studies

The Certificate in Latin American and Iberian Studies provides a systematic program of study in English for students interested in the arts, traditions, values, histories, religions, socioeconomic systems, and mythologies of Latin America and the Iberian Peninsula. It combines studies on literature, history, anthropology, film, and cultural studies for a richer and more comprehensive understanding of the peoples and heritage of Latin America and Iberia. Its interdisciplinary nature treats issues of colonization, imperialism, race, ethnicity, class, neoliberalism,

eral practices, aesthetics, popular culture, and globalization as they have been played out within the Spanish, Portuguese, and Latin American context.

The requirements for the certificate in Latin American and Iberian Studies are:

- sophomore standing or consent
- 15 credit hours
- LAIS 360 (Alpha) Studies in Culture: (B) Latin America, or (C) Iberian Peninsula (should be taken the first semester in the program; it may be taken concurrently with one of the electives)
- at least one from LAIS 360B, 362, 363, 366, 368/ANTH 368, 372, 478/ANTH 478, 468/HIST 478, HIST 390, HIST 479
- at least one from LAIS 360C, 361, 365, 380, 495, HIST 350, 448

## Graduate Study

### Master's Degree

LLEA has designed MA programs that combine the study of language and literature with other forms of expressive culture in their permutations in the specific geographic regions of Europe, the U.S., Latin America, the Pacific Basin, and Africa. Graduate students are offered the following opportunities: an MA degree in French or Spanish; graduate teaching assistantships on a competitive basis; preparation for a PhD program and a career in teaching. Former students have found careers in government and foreign service; editing, publishing, and translation; law, business, and international banking; fashion, the arts, and travel industry.

### Admission Requirements

In addition to meeting the requirements of the Graduate Division, applicants must have the following:

1. A major or its equivalent in French or Spanish with a minimum GPA of 3.0 (B); applicants in French should also have taken a course in French phonetics;
2. For Spanish, the competence equivalent to two years of study at the college level in a second foreign language; applicants in French who plan to go on to a doctoral program are strongly encouraged to develop reading competence in an additional language;
3. For French and Spanish, an acceptable accent and fluency.

Applicants with minor deficiencies may be accepted provisionally, but course work taken to make up deficiencies may not be counted toward satisfaction of the degree requirements. Applicants accepted provisionally are expected to complete any deficiencies by the end of the first year of study.

### Additional Requirements

All students are required to satisfy the remaining specific requirements and to pass the comprehensive examinations in their area of concentration.

Students who select Plan A (thesis) in their area of concentration must present a thesis proposal, including justification of the topic and a bibliography, for approval by the thesis director and two members of the thesis committee before the end of the second semester of work. The completed thesis must be presented to the thesis committee at least four weeks before the Graduate Division deadline. The Graduate Division requires all theses to be written in English.

### French Requirements

Candidates in French may select Plan A (thesis) or Plan B (non-thesis). Candidates in both plans are required to take 30 credit hours. A minimum of 18 credits must be earned in courses numbered 600 and above, including 15 credits in French and at least one graduate seminar. All candidates must take either FR 409 or FR 661. Up to 6 credit hours of LLEA 600-level courses may also be included, in which candidates in French are expected, whenever possible, to read French language texts in the original. Candidates selecting Plan A (thesis) must complete 6 credit hours of LLEA 700 (Thesis Research). All candidates must pass a final comprehensive examination, covering the major periods and genres of French literature and including the history of the language.

### Spanish Requirements

Candidates in Spanish may select Plan A (thesis) or Plan B (non-thesis). Candidates in both plans are required to take 30 credit hours. A minimum of 18 of these credits must be numbered 600 and above, including at least one graduate seminar. Candidates selecting Plan A (thesis) must complete 6 credit hours of LLEA 700 (Thesis Research). Spanish graduate assistants are also required to take a course in language teaching methodology approved by the Spanish graduate faculty (e.g., SPAN 658 [Seminar in Spanish Applied Linguistics] or LLL 455 [Second Language Learning and Teaching Methodology]). Candidates of both plans must pass a final comprehensive examination in literature (Peninsular and Latin American) and in one additional area (language, film studies, U.S. Latino Studies, or cultural studies). The examination is based on the minimum reading list and is tailored to fit the background and course work of the individual candidates.

## Library and Information Science

College of Natural Sciences  
Hamilton Library, Ground Floor  
2550 McCarthy Mall  
Honolulu, HI 96822  
Tel: (808) 956-7321  
Fax: (808) 956-5835  
Email: [slis@hawaii.edu](mailto:slis@hawaii.edu)

### Faculty

- \*A. Wertheimer, PhD (Chair)—history of libraries, print culture and professional education
- \*N. Asato, PhD—Japanese librarianship, research methods
- D. Bair-Mundy, PhD—information systems
- \*R. Gazan, PhD—social aspects of information technology
- \*P. Jacsó, PhD—online technology, computer system analysis, databases
- \*R. Knuth, PhD—history of libraries, international librarianship
- R-A. Montague, PhD—school librarianship and community informatics
- \*D. Nahl, PhD—information services, human-system interaction
- \*L. Quiroga, PhD—information retrieval, databases, library systems

## Adjunct Faculty

- L. Bell, CASIT, MLS—lecturer, San Jose State University
- J. Campbell-Meier, PhD—assistant professor, University of Alabama
- M. Chohey, MLS—cataloging, Hamilton Library
- S. Dawrs, MLIS—librarian, Hamilton Library
- D. Dunn, MLIS—preservation educational specialist, Conservation, Hamilton Library Treatment, Hamilton Library
- N. Fujii-Babb, MLS—librarian, Salt Lake/Moanalua Public Library, retired
- G. Geary, MLS—Interim University Librarian, Hamilton Library
- J. Hori, MLS—curator, Hawaiian Collection, Hamilton Library
- J. Kamiya, MLISc—young adult librarian, Mānoa Public Library
- C. Kellett, MLIS—systems librarian, Library Information Technology, Hamilton Library
- E. Kleiber, MLIS, MAS—librarian, Hamilton Library
- M. Kowalsky, EdD—librarian, Rowan University
- D. Minatodani, MLIS—librarian, Hawaiian Collection, Hamilton Library
- S. N. Naluai, MLIS—librarian, Kamehameha Elementary Division
- A. Olden, PhD—senior lecturer, University of West London
- R. Pagell, MBA, MS(LIS), MAT—former University Librarian, Singapore Management University
- R. Paseng, MA, MLIS—Southeast Asia specialist, Hamilton Library
- J. Quirante, MLISc—Head Archivist, ‘Ulu ‘Ulu, Henry Ku‘ualoha Giugni Moving Image Archive of Hawai‘i
- B. Richardson, PhD—Dean of Academic Affairs, Windward Community College
- L. Roy, PhD, MLS—Professor, University of Texas
- G. Sinclair, MLIS—librarian, Government Documents, Hamilton Library
- D. Skeem, MLSc, CA—archivist, Hamilton Library
- M. Trafford, MLS—Medical Library, Tripler Army Medical Center

## The Academic Program

Founded in 1965, the Library and Information Science (LIS) Program prepares professionals for work in libraries, archives, and other types of information-handling agencies. It currently offers a master's in library and information science (MLISc) and a Certificate in Advanced Library and Information Science and participates in an interdisciplinary doctoral program in Communication and Information Sciences. The LIS program is aware of the opportunities and the responsibilities inherent in its Pacific setting and the unique cultural amalgam of Hawai‘i. Its major goals are:

1. To furnish students with the knowledge, skills, and attitudes that are basic to professional competence and career-long professional growth in the field of library and information services;
2. To expand the knowledge base of the profession through research; and
3. To share its resources by extending services to the UH and its academic units and to the people of Hawai‘i and beyond.

## Graduate Study

### Master's Degree

The MLISc degree program was first accredited by the American Library Association in 1967 and was reaccredited in 1964, 1980, 1990, 1996, 2000, and 2009. The curriculum is subject to continuous review and modification, and every effort is made in academic advising to ensure that students plan

programs of study suited to their individual goals. Entering students are expected to be computer literate. Graduate standing is the normal prerequisite for all courses.

### Degree Requirements

Students are required to take the following courses:

- LIS 601 Introduction to Reference & Information Services
- LIS 605 Metadata Creation for Information Organization
- LIS 610 Foundations of the Information Professions
- LIS 615 Collection Management
- LIS 663 Database Searching

In addition, they must take one of the following:

- LIS 650 Management of Libraries & Information Centers
- LIS 684 Administration of School Library Media Centers

In addition, the student's LIS faculty advisor must approve one course selected to meet the ICT requirement.

### Plan A (Thesis)

The normal requirement for the MLISc degree under the thesis option is a minimum of 39 credit hours of approved graduate study. At least 27 credits must be taken in LIS courses or a combination of LIS and approved information and computer sciences courses. The student must also take 6 credit hours in LIS 700 Thesis Research and 3 credit hours in a research methods course.

To advance to candidacy and become eligible to enroll in LIS 700 Thesis Research, students must complete at least 15 credits of course work, and defend a thesis proposal in a private meeting with their thesis committee. While it is strongly suggested that all committee members physically attend the thesis proposal defense meeting, remote participation is permitted. Upon approval of the committee, students advance to candidacy, conduct their research, and present their results at a public defense.

### Plan B (Non-thesis)

The normal requirement for the MLISc degree under the non-thesis option is a minimum of 39 credit hours of approved graduate study. At least 30 credits must be taken in LIS courses or in a combination of LIS and approved ICS courses. Up to 9 credits may be taken in other schools or colleges when the courses are relevant to the individual student's specialization and approved by the LIS program chair and the Graduate Division.

The maximum course load is 15 credit hours per term. Therefore, 39 credit hours would require at least two terms and a summer. A full load is a minimum of 8 credit hours per term. The program may be undertaken on a part-time basis but must be completed within five years (a two-year extension is allowed by the Graduate Division for a total of seven years).

Students who were in MLISc-degree programs from other ALA-accredited library programs may, in special circumstances, transfer up to 21 credit hours toward their MLISc degree at UH Mānoa, provided the work to be credited has been completed within the time limit previously cited. Such requests must be included in the application.

### Comprehensive Examination

All Plan B students are required to take an oral comprehensive examination as a requirement for the MLISc degree. The examination is taken during the semester the student expects to graduate.

## Distance Education

The MLISc program uses different formats for course delivery. It offers a few courses each year online. Students at remote sites may also request the use of Adobe Connect (Halawai) to participate synchronously in courses being taught at UH Mānoa. In addition, several courses are offered asynchronously throughout the year.

## Dual Master's Degree Programs

Students may pursue the MLISc degree and a second master's concurrently, cooperating with the following departments and fields of study: information and computer sciences (MS), history (MA), Pacific Islands studies (MA), American studies (MA), Asian studies (MA), educational technology (MEd), and Law (JD). For more information on these programs, contact the LIS program chair or the other respective departments.

## Doctoral Degree

### Interdisciplinary Doctoral Degree Program

LIS participates in an interdisciplinary PhD program in Communication and Information Sciences (CIS) integrating computer science, communication, library science, and management information systems. Because of the broad knowledge base required to support the interdisciplinary approach, the program also draws on political science, economics, engineering, operations research, and behavioral sciences. This unique program is sponsored by four academic faculties: communication, information technology management, information and computer sciences, and library and information science.

For information on admission and requirements, refer to the "Communication and Information Sciences" in the Interdisciplinary Programs section.

### School Library Media Specialist Licensure

The LIS program recommends graduates to the Hawai'i Department of Education for certification as school library media specialists. To be eligible, graduates must meet the MLISc degree program requirements and the course requirements approved for certification by the Hawai'i Department of Education. The National Council for Accreditation of Teacher Education (NCATE) is used in conducting periodic reviews of the program.

A student who enters the LIS program to earn this certification must also complete a state-approved teacher education program. For more specific and current information on prerequisites and required as well as recommended LIS courses, contact the LIS program chair.

### Certificate Program

The Certificate in Advanced Library and Information Science (CALIS) offers two options. Option A is available for those who complete a successful, coherent program of specialized study and research beyond the MLISc degree. The program allows for specialization in 1) applying computer and information technologies to information environments; and 2) extending information management skills in information system design, evaluation, and the development of user services.

Option B focuses on school librarianship. It allows for specialization in 1) applying computer and information science technologies in elementary and secondary school libraries, and 2) extending curriculum planning skills in information literacy and general literacy instruction.

For both options, students must complete a research paper that meets the approval of the CALIS committee and give an oral presentation of their research to students and faculty. Students are expected to remain enrolled each semester until the requirements are completed. If it is necessary to withdraw temporarily, students must reapply for admission within application deadlines before returning. Credits more than five years old cannot be applied to the certificate requirements; thus, the program must be completed in five years. For more specific information on prerequisite and elective courses, contact the LIS program chair.

## Linguistics

College of Languages, Linguistics and Literature  
Moore 569  
1890 East-West Road  
Honolulu, HI 96822  
Tel: (808) 956-9002  
Fax: (808) 956-9165

### Faculty

- \*P. J. Donegan, PhD (Chair)—phonology and phonetics; vowel systems; acquisition; variation and change; typology; Austroasiatic languages, language documentation
- \*K. Deen, PhD (Graduate Chair)—language acquisition, morphosyntax, Bantu languages; second language acquisition
- \*V. B. Anderson, PhD—phonetics-phonology interface, phonetic and phonological universals, prosody, Austronesian and Australian languages, endangered languages, speech technology
- \*A. L. Berez, PhD—language documentation; language technology; Athabaskan languages; geography and language; discourse; intonation; language change; functional approaches to grammar
- \*R. A. Blust, PhD—historical linguistics; Austronesian linguistics and culture history; field methods; lexicography; endangered and underdocumented languages
- \*L. R. Campbell, PhD—language documentation, historical linguistics, endangered languages and language revitalization, typology, field methods, American Indian languages
- \*K. K. Drager, PhD—language variation and change; sociophonetics; language and identity; language in contact; laboratory phonology
- \*W. D. O'Grady, PhD—syntactic theory and description, language acquisition, Korean, assessment of language strength
- \*Y. Otsuka, DPhil—syntax; Minimalist Program; Tongan and Polynesian languages; endangered and underdocumented languages and language planning in Polynesia
- \*K. L. Reh, PhD—phonology; Micronesian linguistics; lexicography; endangered and underdocumented languages; language contact; language planning; vernacular language education
- \*A. J. Schafer, PhD—sentence comprehension and production across languages (including Korean, Japanese, and Austronesian languages); sentence prosody; information structure; psycholinguistic approaches to language documentation and conservation
- J. Terrell, MA—language documentation; case and voice systems; tones; typology; sociolinguistics; language planning and policy; economics; North Korea; Southeast Asia

## Linguists in Other Departments

- \*R. Bley-Vroman, PhD—applied linguistics; syntax; second language acquisition theory; computational linguistics; natural language processing; corpus linguistics, and machine translation
- \*H. M. Cook, PhD—Japanese linguistics, sociolinguistics, discourse analysis and pragmatics
- \*B. Schwartz, PhD—linguistics theory and second-language acquisition and analysis, Universal Grammar, child second-language acquisition
- \*H. M. Sohn, PhD—Korean linguistics; grammaticalization
- \*A. Vovin, PhD—East Asian and Central Asian historical comparative and descriptive linguistics; Japanese, Korean, Ainu, and Manchu-Tungusic

## Emeritus Faculty—In Residence

- B. W. Bender, PhD—general linguistics, morphology, Micronesian linguistics
- D. Bickerton, PhD—language variation, pidgins and creoles, language and literature
- M. L. Forman, PhD—general linguistics, ethnographic linguistics, Philippine studies
- G. W. Grace, PhD—historical linguistics, Austronesian
- A. V. Lyovin, PhD—typology, Sino-Tibetan, historical linguistics
- A. M. Peters, PhD—language acquisition: prosody, emergence of grammatical morphemes, crosslinguistic issues
- A. J. Schütz, PhD—descriptive linguistics, field methods, lexicography, Fijian and other Melanesian languages; history of linguistics in the Pacific
- D. L. Stampe, PhD—computational linguistics, phonology and prosody, holistic typology and drift, Munda languages

## Cooperating Graduate Faculty

- J. D. Brown, PhD—language learning and teaching, language testing
- E. Drechsel, PhD—ethnolinguistics; American Indian languages
- C. Higgins, PhD—macro- and micro-sociolinguistics, qualitative research methods, conversational analysis, code-switching
- Y. Hoonchamlong, PhD—Thai linguistics (syntax, discourse, semantics), Tai/Thai dialectology, language learning and teaching, internet technology in language research and language instruction, translation
- G. Kasper, PhD—second language curriculum, discourse analysis, interlanguage, pragmatics
- C. Sak-Humphry, PhD—Khmer language, linguistics and literature
- N. Silva, PhD—Hawaiian politics, indigenous politics
- S. Warner, PhD—Hawaiian language, Hawaiian language immersion education, curriculum development and second language acquisition, educational psychology

**Degrees Offered:** BA in interdisciplinary studies (linguistics), MA in linguistics, PhD in linguistics

## The Academic Program

Linguistics (LING), also called linguistic science or the science of language, is the study of how language works—how it is acquired, how it is used, how it is represented in the brain, how it changes over time, and so on. Major subfields are phonetics, phonology, morphology, syntax, semantics, discourse analysis, pragmatics, historical linguistics, sociolinguistics, psycholinguistics (including developmental psycholinguistics), neuro-linguistics, mathematical and computational linguistics, and ethnographic linguistics.

Linguistics is relevant to many endeavors, including cognitive science, language planning, language teaching, speech synthesis and recognition, treatment of language disorders, repair

of communication breakdowns, and information technology. Our program presents unique opportunities for the study of Austronesian (Malayo-Polynesian) and Asian languages. It also has special strengths in language acquisition, psycholinguistics, sociolinguistics, and language documentation and conservation.

Our program is recognized as being among the top twenty-five in the U.S.

## Advising

All faculty in the department participate in the advising of students majoring in linguistics. Undergraduates majoring in linguistics under the Interdisciplinary Studies program are advised initially by the undergraduate advisor. Graduate majors are advised by the chair of the graduate field of study or by one of the language documentation faculty. Students are later assigned to specific faculty members for advising according to their special interests.

## Undergraduate Study

### Bachelor's Degree

Students may obtain a BA degree with a linguistics major at UH Mānoa through the Interdisciplinary Studies program. See [www.hawaii.edu/is/genInfo/applying.htm](http://www.hawaii.edu/is/genInfo/applying.htm). In this program, with the guidance of a faculty advisor, students create for themselves a major that may combine the study of linguistics with related disciplines, such as anthropology, second language studies, or psychology, or with the study of one or more foreign languages. Students majoring in linguistics in this way may include some or all of the MA core of courses in their BA program, and are thus able to do more advanced work, should they continue with an MA.

### Graduate Study

The faculty represents a variety of theoretical viewpoints. The various faculty members are especially well qualified to direct research on languages of the Pacific and parts of Asia. Fields of special competence include descriptive and comparative linguistics, general linguistic theory, language contact and variation, ethnolinguistics, language development, experimental phonetics, psycholinguistics, sociolinguistics, and cognitive linguistics.

Students admitted to graduate programs in linguistics normally have a background in at least one foreign language. Some background in mathematics or one of the sciences may also be useful. Students entering without a course equivalent to LING 320 are required to take this course to make up for this deficiency in their preparation for graduate work.

The GRE General Test is required of all applicants. Both the MA and the PhD degrees are offered.

The MA program provides a basic introduction to the subject matter and skills of the discipline. The PhD program provides full professional training for careers in research and teaching. Employment opportunities for graduates of both programs today often require additional knowledge of one or more related disciplines. Students are therefore encouraged to broaden their training in linguistics by including work in other disciplines. Such programs, and those that include many of the specializations listed above, will involve the inclusion of faculty members from other fields of study on students' program committees. Students should make known their interests to the graduate chair as early as possible so that appropriate advisors

can be chosen to direct students to courses, and any key prerequisite courses, that will help them explore their interests further. It is also possible for students to include concentrations in linguistics in their programs for the MA degree in Asian studies or Pacific Islands studies.

The guidelines listed below are offered to guide students in their preparation for the various examinations, although individual study must be done in areas not covered by course offerings. Courses bearing the 700-level numbers are seminars, and various sections of these seminars are typically offered in a given semester, depending on the interests of the resident faculty and students. Each semester there are normally a number of seminars dealing with geographical areas, particular language families, the structures of individual languages, and particular theoretical problems. A major portion of the work done beyond the MA level is in seminars and in directed research.

### Master's Degree

#### Requirements

The department offers MA Plan A and Plan B programs. In addition to the university-wide residence requirements of a minimum of two semesters of full-time work, the programs require that students demonstrate competence in one language other than their native language.

**Plan A** requires a thesis (9 credit hours) and a minimum of 21 credit hours of course work. A final oral examination covering the thesis and related areas is also required.

**Plan B** requires a minimum of 30 credit hours plus a final project near the end of course work.

The required 30 hours of course work must be taken for a letter grade (not CR/NCR or Audit), of which 18 hours must be at the 600-level or above, including 3 hours of a 700-level seminar. Students may choose between three "streams": Linguistic Analysis, Experimental Linguistics, and Language Documentation and Conservation. For all streams there is a core list from which different numbers of courses are to be selected. For details, see our MA manual, via [www.ling.hawaii.edu/graduate-program-overview](http://www.ling.hawaii.edu/graduate-program-overview).

### Doctoral Degree

#### Requirements

All students in the PhD program are required to complete a minimum of 33 credit hours of course and seminar work at UH Mānoa (exclusive of LING 800) beyond those counted towards the MA degree. Courses in phonology (LING 621), grammar (LING 622), and a Methods course are required of all PhD students. Methods courses include LING 630 Field Methods; LING 632 Laboratory Research; LING 750F Phonology and Phonetics; LING 750Q Language Acquisition; and LING 750Y Psycholinguistics. Students interested in experimental research are strongly advised to take one or more courses in statistical analysis as well (e.g., EDEP 429, SLS 490 or SLS 671.)

All PhD candidates must demonstrate competence in one language other than their native language. Students may demonstrate their language knowledge either by taking a reading/translation test involving a linguistics-related passage or by having satisfactorily taken courses in the language through the 202 level. Foreign students may use English if it is not their native tongue; certification by the English Language Institute that they are exempt from ELI courses suffices to establish their competence in English.

PhD students must present two professionally written papers, pass a comprehensive examination, and pass a final oral examination in defense of the dissertation.

For details, see our PhD manual, via [www.ling.hawaii.edu/degrees-and-requirements#phd](http://www.ling.hawaii.edu/degrees-and-requirements#phd).

## Marine Biology

See the "Interdisciplinary Programs" section of the *Catalog* for more information.

## Mathematics

College of Natural Sciences  
Keller 401-A  
2565 McCarthy Mall  
Honolulu, HI 96822  
Tel: (808) 956-4680  
Fax: (808) 956-9139  
Web: [www.math.hawaii.edu](http://www.math.hawaii.edu)

### Faculty

- \*E. Guentner, PhD (Chair)—geometrical functional analysis
- \*C. Allday, PhD—algebraic topology, transformation groups
- \*M. Chekroun, PhD—dynamical systems, climate dynamics
- \*M. Chyba, PhD—control theory
- \*T. Craven, PhD—commutative algebra
- \*G. Csordas, PhD—complex function theory
- \*K. Dovermann, PhD—algebraic topology
- \*R. Freese, PhD—lattice theory, general algebra
- \*P. Guerzhoy, PhD—number theory
- \*T. Hangelbroek, PhD—approximation theory
- \*H. Hilden, PhD—geometric topology
- \*B. Kjos-Hanssen, PhD—computability, logic, probability
- \*M. Manes, PhD—number theory
- \*Y. Mileyko, PhD—applied topology, mathematical biology
- \*D. Myers, PhD—mathematical logic
- \*J. Nation, PhD—lattice theory
- \*M. Ortel, PhD—complex function theory
- \*S. Post, PhD—mathematical physics, integrate systems
- \*L. Thomas Ramsey, PhD—harmonic analysis
- \*D. Ross, PhD—logic, probability
- \*W. Smith, PhD—analysis, function theory
- \*D. Takagi, PhD—applied math, fluid dynamics
- \*G. Wilkens, PhD—differential geometry, control theory
- \*R. Willett, PhD—noncommutative and coarse geometry
- \*L. Wilson, PhD—singularity theory

**Degrees Offered:** Undergraduate Certificate in Mathematical Biology, BA (including minor) in mathematics, BS in mathematics, MA in mathematics, PhD in mathematics

### The Academic Program

The mathematics (MATH) program offers preparation in the full spectrum of mathematical sciences, including algebra, geometry, differential equations, real and complex analysis, topology, logic, number theory, and probability and statistics, as well as various topics in applied mathematics. Mathematics majors begin with the study of calculus and linear algebra. After completion of these fundamental courses, students may choose

to specialize. The department advises each prospective major on requirements and course options to meet his or her needs and interests. Departmental advisors are also available every day to all students.

Depending upon individual interest, students of mathematics may pursue careers in a variety of fields such as teaching, computer science, operations research, statistics, business, and economics. In addition, students who continue on to the graduate program may choose to become professors and/or research mathematicians. The faculty has the competence and resources required to provide the basic mathematical preparation required for any of these professions.

A goal of all non-survey mathematics courses is the development of precision of thought and expression. This receives special emphasis in the many writing-intensive courses the department offers.

## Undergraduate Study

### BA Degree

#### Requirements

Students must complete 21 credit hours in mathematics courses numbered above 300, including:

- MATH 321
- MATH 480
- 3 credit hours in a writing-intensive mathematics course
- 6 credit hours in courses numbered above 400
- Only courses in which a student earns a grade of C (not C-) or better will be counted toward fulfillment of major requirements
- A cumulative 2.0 GPA in all completed upper division mathematics courses is required
- All mathematics majors are required to see a mathematics advisor each spring semester prior to fall registration

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BS Degree

#### Requirements

Students must complete 24 credit hours in mathematics courses numbered above 300 and 15 credit hours in additional upper division mathematics courses or appropriate non-introductory courses in related fields including:

- MATH 321
- MATH 480
- 6 credit hours in writing-intensive mathematics courses
- Only courses in which a student earns a grade of C (not C-) or better will be counted toward fulfillment of major requirements
- A cumulative 2.0 GPA in all completed upper division mathematics courses is required
- All mathematics majors are required to see a mathematics advisor each spring semester prior to fall registration

Students must also demonstrate the ability to program scientific problems on a computer.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Minor

### Requirements

Students must complete MATH 243 or 253A plus 12 credit hours in mathematics courses numbered above 300, including:

- 3 credit hours in a writing-intensive mathematics course
- 6 credit hours in courses numbered above 400

### Undergraduate Certificate in Mathematical Biology

The purpose of the certificate is to induce students to pursue the interdisciplinary study of biology and mathematics together with research. The course work will be similar to, but less than, that required to receive a minor in mathematics or biology.

However, the students will also have to do a substantial amount of research in addition to the course work. The emphasis in the certificate is different, however, in that the majority of the work is interdisciplinary.

Students will be considered accepted into the Mathematical Biology Certificate Program upon formal request for acceptance and completion of either MATH 304 or 305 with a grade of C or better. To receive the certificate, students must complete 15 credits of approved course work with no grade below a C and attain a GPA of 2.5 in the collection of courses used to satisfy the certificate requirements. Due to the interdisciplinary nature of the certificate, 6 credits of required electives will differ depending on a student's major. Courses used towards the certificate can only be double-dipped with focus requirements.

#### Prerequisites to the Certificate

- BIOL 171 (lab not required)
- CHEM 161 or 171 (lab not required)
- year of calculus (MATH 215/216, MATH 241/242, MATH 251A/252A)
- electives may have additional prerequisites

#### Requirements for the Certificate (15 credits)

- required courses (9 credits): MATH 304, 305, MATH/BIOL 490 (capstone)
- math majors (6 credits): BIOL 172, and 265 or 275 (lab not required)
- life science majors (6 credits): two courses selected from MATH 243/253A, 301, 302, 303, 307, 311, 371, 373, 402, 403, 407, 414, 416, 471, 472
- other majors: completion of above required courses, and at least 6 credits of electives approved by the Committee

Participation in an interdisciplinary Mathematical Biology research project is required. These projects must be substantial, requiring at least the effort of a 5 credit 400-level course; examples include a senior honors research project, summer Research Experiences for Undergraduate programs, and the Undergraduate Biology and Mathematics Research Program; students are advised to discuss their projects with an advisor from the Mathematical Biology Certificate Coordinating Committee before commencing. A research paper based on this research project must be submitted to and approved by the Committee. Students are expected to present their research to an approved symposium or conference.

## Graduate Study

Prospective graduate students are expected to have adequate undergraduate preparation in linear algebra, advanced calculus,

and abstract algebra. Applicants must submit to the department their scores for the GRE General Test; applicants for the graduate assistant positions are strongly encouraged to submit scores for the subject test in mathematics as well. The department requires a score of at least 650 on the quantitative section of the GRE General Test for admittance as a regular student. The department requires a general examination of all incoming graduate students for course placement purposes. This diagnostic examination consists of two parts, algebra and analysis, and is designed to evaluate the student's command of undergraduate mathematics in the areas of linear algebra, advanced calculus, and abstract algebra.

### **Master's Degree**

#### **Requirements**

Most MA students will select Plan B, which requires 30 credit hours of course work, including 611, 612, 631, and 644. Masters candidates must form a two member committee. The student is required to write and defend a paper on a research topic approved by the student's master's committee and the graduate chair. The defense will consist of a one hour public presentation on the chosen topic, followed by an oral exam. The department does not have a thesis option (Plan A), and only an exceptional student may be admitted to Plan C at the discretion of the graduate chair.

### **Doctoral Degree**

#### **Requirements**

For the PhD degree, the department requires that the student show proficiency in one of the following languages: French, German, or Russian. Teaching experience is required of all PhD students. To be admitted to PhD candidacy, the student must satisfy the language requirements and pass three written examinations: (a) linear algebra and abstract algebra; (b) real analysis and the basic facts of complex analysis and general topology; and (c) a third field chosen by the student with the approval of the graduate chair. All new students in the PhD program shall complete a minimum of five mathematics department courses numbered between 600 and 690, other than 611, 612, 631, 632, 644, 649. These five courses may be taken under the CR/NC option. Exceptions: Up to two 3-credit 649 (alpha) seminars (meeting three hours/week) may be substituted for (up to) two of these required five courses, with the written approval of the graduate chair. Also, with the written approval of the graduate chair, credit may be given for equivalent courses taken in another mathematics department or for graduate-level courses taken in another department that are recommended by the student's thesis advisor and directly related to the dissertation topic; such credit for graduate courses taken in another department is limited to a total of no more than two courses. The most important requirement for a PhD degree is the successful defense of a doctoral dissertation involving original mathematical research.

## **Microbiology**

College of Natural Sciences  
Snyder 207  
2538 McCarthy Mall  
Honolulu, HI 96822  
Tel: (808) 956-8553  
Fax: (808) 956-5339  
Web: [www.hawaii.edu/microbiology/](http://www.hawaii.edu/microbiology/)

### **Faculty**

- \*M. Alam, PhD (Chair)—microbial physiology, genomics, and bioinformatics
- \*S. M. Callahan, PhD (Graduate Chair)—genetics, cellular differentiation, and coral microbiology
- \*S. P. Donachie, PhD (Undergraduate Chair)—marine microbiology, coral microbiology, picoeukaryotes, microbial diversity, and taxonomy
- \*J. T. Douglas, PhD—medical microbiology and infectious diseases
- \*T. T. Hoang, PhD—bacterial genetics, physiology, and molecular pathogenesis
- \*H. Li, PhD—molecular virology
- \*P. Q. Patek, PhD—cellular immunology

### **Cooperating Graduate Faculty**

- S. N. Bennett, PhD—molecular evolution and epidemiology of infectious diseases
- D. Borthakur, PhD—molecular genetics of nitrogen fixation
- S. P. Chang, PhD—immunology, molecular biology, molecular approaches to vaccine development
- V. Hinshaw, PhD—virology, pathogenesis
- T. Humphreys, PhD—invertebrate immunity, evolution of the animal immune system
- J. C. Leong, PhD—virology and fish vaccines
- Y. Lu, PhD—molecular virology
- F. D. Miller, PhD—epidemiology
- V. R. Nerurkar, PhD—infectious diseases
- M. S. Rappe, PhD—microbial ecology of marine systems
- S. E. Seifried, PhD—bioinformatics, molecular biology
- B. A. Yoza, PhD—biotechnology

**Degrees Offered:** BA (including minor) in microbiology, BS in microbiology, BS in molecular cell biology, MS in microbiology, PhD in microbiology

### **The Academic Program**

Microbiology (MICR) deals with microscopic forms of life and their activities. Bacteria, algae, fungi, protozoa, and viruses are included in this discipline. The field is diverse and concerns the nature of microorganisms, as well as their interactions—both advantageous and adverse—with other organisms and with the environment. Entire academic disciplines and commercial enterprises are based on what microorganisms do. For example, the very forms that may cause infectious diseases and epidemics may also support industries that produce vaccines or antimicrobial agents. Microorganisms play an essential role in the cycling of the limited supply of nutrients available on Earth's surface by decomposing plant residues and animal remains and by being primary producers of food in the oceans. Many microorganisms or their products may be eaten, drunk, used as fuel, or carefully disposed of as undesirable. They may be used to clean

up the environment or controlled only with great effort to prevent corrosive, obnoxious, or destructive activities that they may bring about. Microbiology also deals with the physiology, biochemistry, genetics, and molecular biology of microorganisms. Many of the advances in DNA technology are mediated through bacteria, yeasts, and viruses; much of what we know about metabolism in general comes from their study.

### Advising

Students who would like to discuss career opportunities in microbiology may contact any faculty member in the department. For specific inquiries about the undergraduate microbiology program, students can contact the department's main office, [uhmicro@hawaii.edu](mailto:uhmicro@hawaii.edu), or Dr. Donachie. For general advising about the undergraduate microbiology program, students may contact the advisors in the Academic Advising and Assessment Office, Edmondson Hall 216. For general advising or inquiries pertaining to the Molecular Cell Biology degree, please contact Drs. Patek or Callahan.

### Undergraduate Study

Students must earn a grade of C (not C-) or higher in each course applied to the major, including required courses in CHEM, BIOL, PHYS, and MATH.

### BA Degree in Microbiology

#### Requirements

Students must complete the following:

- 18 credit hours in microbiology, including required courses:
  - MICR 351/351L
  - Three courses from MICR 361, 401, 431, 461, 463, 470, 475, 485, and 490, plus 4 credits of associated laboratories
- The following required related courses:
  - BIOL 171, 172, 275 plus labs
  - CHEM 161/161L and 162/162L; or 181A/181L
  - CHEM 272/272L and 273
  - MATH 215 or 241
  - PHYS 151/151L or 170/170L, and 152/152L or 272/272L
- 9 credits of approved major electives

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BS Degree in Microbiology

#### Requirements

Students must complete the following:

- 23 credit hours in microbiology, including required courses:
  - MICR 351/351L, 431, 461, 475; and one course from MICR 361, 401, 463, 470, 485, or 490, plus 6 credits of 400-level MICR lab courses
- The following required related courses:
  - BIOL 171, 172, 275 plus labs
  - BIOC 441 or MBBE 402
  - CHEM 161/161L and 162/162L or 181A/181L
  - CHEM 272/272L and 273
  - MATH 215 and 216 or 241 and 242
  - PHYS 151/151L or 170/170L, and 152/152L or 272/272L
- 6 credit hours of approved major electives

### BS Degree in Molecular Cell Biology

The BS degree in Molecular Cell Biology (MCB) is designed to prepare students for careers in fields that require advanced knowledge of molecular biology, in particular those that relate to human health and welfare. Examples of such fields include, but are not limited to, medicine, pharmacology, pathology, genetic testing and counseling, biotechnology, nanotechnology, teaching, and basic research.

#### Requirements

Students must complete the following:

- 23 credits hours including required courses:
  - BIOL 375/375L, 407, 408/408L
  - MBBE 402 or BIOC 441
  - MCB 314, 461, 472
- The following required related courses:
  - BIOL 171/171L, 172/172L, 275/275L
  - CHEM 161/161L and 162/162L or 181A/181L
  - CHEM 272/272L and 273
  - PHYS 151/151L, 152/152L or 170/170L, 272/272L
  - MATH 215 and 216 or 241 and 242
- 10 credits of approved major electives

Major electives should be chosen with the assistance and approval of an advisor in the Academic Advising and Assessment Office, Edmondson Hall 216, and in the department, to provide a well integrated and coherent program. Prospective majors should consult the microbiology/molecular cell biology advisors promptly, so as to design a curriculum that satisfies the major requirements.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor in Microbiology

#### Requirements

Students must complete 15 credits of 300- and 400-level MICR courses, of which five credits must be MICR 351/351L.

All prerequisites for these courses must be met. Persons wishing to complete the minor and graduate in four years should have completed CHEM 272, if possible, before the middle of the junior year.

### Graduate Study

The department offers programs leading to the MS and PhD in microbiology with areas of specialization in microbial ecology, biochemistry, physiology, genetics, and ultrastructure; metabolic regulation and the regulation of gene expression; marine microbiology; medical microbiology; animal and environmental virology and viral pathobiology; and immunology, immunogenetics, and immunochemistry. In addition, an option is offered in cell biology that leads to the MS and PhD in microbiology. Research programs in interdisciplinary fields are possible. Graduate students in microbiology may join two interdisciplinary graduate specializations: the Ecology, Evolution, and Conservation Biology (EECB) Program, and the Marine Biology (MB) Program.

Applicants for advanced degree programs in the department must supplement the forms and transcripts required by the Graduate Division with three letters of recommendation and the official scores from the GRE General Test. These supplementary items should be sent directly to the department.

Complete details on the graduate program in microbiology and the availability of financial aid to prospective students are outlined in a departmental brochure available on request from the department, Snyder 207, 2538 McCarthy Mall.

Courses for the graduate programs are to be selected from the list below and from other graduate offerings in related disciplines as directed by the student's advisor or advising committee. The following courses may be repeated: MICR 625, 632, 652, 671, 680, 681, 690, 699, 700, 795, and 800. However, repeated courses other than MICR 699, 700, 795, and 800 may only be used for credit once per degree. MICR 690 is a required course. Course deficiencies shall be made up before admission to candidacy.

Both the MS and the PhD are research degrees requiring a research project, a thesis or dissertation, and an oral defense. Prospective graduate students are encouraged to contact faculty or cooperating graduate faculty to determine whether there might be a laboratory that is conducting research of interest and to determine which laboratories are taking new students (see the department website at [www.hawaii.edu/microbiology](http://www.hawaii.edu/microbiology) to find areas of research and faculty contact information).

### Master's Degree

Intended candidates for the MS degree should present a minimum undergraduate preparation in biological and physical sciences including biology, genetics, microbiology, organic chemistry, physics, and calculus. Deficiencies in some of these areas do not preclude admission. Qualified students with undergraduate majors in fields other than microbiology are welcome.

### Requirements

#### Plan A Minimum Requirements - 30 credit hours

- 2 units of directed research (MICR 699);
- 1 credit of seminar (MICR 690);
- 6 credit hours of thesis (MICR 700);
- additional 12 credit hours of course work at the 600 level or higher; plus
- 9 credit hours at the 400 level or higher
- **Note:** 3 credit maximum of MICR 695 may be applied towards the MS Plan A degree.

### Doctoral Degree

The doctoral degree (PhD) is offered in microbiology in the various areas of interest represented by research programs of the department's graduate faculty.

Course work requirements for a PhD are the same as those for the MS degree (with MICR 800 replacing MICR 700). However, consideration will be given to those who already possess an MS in Microbiology or closely related field.

### Requirements

The PhD candidate must demonstrate the ability to do original experimental research and to produce an acceptable dissertation. A comprehensive examination, written and oral, is required, and the dissertation must be successfully defended before the faculty. Experience in teaching in a laboratory course is considered a desirable part of the training of the PhD candidate. The specific requirements for each of the joint degree programs are modified somewhat from those given above.

## Music

College of Arts and Humanities  
Music 3  
2411 Dole Street  
Honolulu, HI 96822  
Tel: (808) 956-7756  
Fax: (808) 956-9657  
Email: [uhmmusic@hawaii.edu](mailto:uhmmusic@hawaii.edu)  
Web: [www.hawaii.edu/uhmmusic](http://www.hawaii.edu/uhmmusic)

### Faculty

- \*L. Paxton, MM (Chair)—voice performance
- \*T. Bingham, MA—music education
- \*J. Boeckman, DMA—music education
- \*M. Felipe, DMA—choral music
- \*M. Hoover, DMA—voice performance
- \*T. Itoh, DMA—composition/theory
- \*J. Korth, DMA—piano performance
- \*F. Lau, DMA—ethnomusicology
- \*B. W. Lee, PhD—ethnomusicology
- \*I. B. Lin, DM—strings performance
- \*C. Loong, PhD—music education
- \*B. P. McLain, PhD—music education
- \*K. McQuiston, PhD—musicology
- \*J. Moulin, PhD—ethnomusicology
- \*J. Mount, MM—voice performance
- \*T. Osborne, DMA—composition/theory
- A. Sala, MA—ethnomusicology
- \*D. Womack, DMA—composition/theory
- \*L. Wright, PhD—musicology
- \*T. Yee, DMA—piano performance

**Degrees Offered:** BA (including minor) in music, BEd in elementary education (music), BEd in secondary education (music), BMus, MA in music, MMus, PhD in music

### The Academic Program

The music (MUS) department offers the bachelor of arts in music, bachelor of music, master of arts in music, master of music, and doctor of philosophy in music. In conjunction with the College of Education, the department offers the bachelor of education in elementary education (music) and the bachelor of education in secondary education (music). Information about each of these programs may be found on the Music Department website: [www.hawaii.edu/uhmmusic](http://www.hawaii.edu/uhmmusic).

The department is housed in a complex of buildings, including studios, practice and rehearsal facilities, and the Mae Zenke Orvis Auditorium, noted for its fine acoustics. In addition to many offerings in Western classical, vocal, and instrumental music, the department specializes in non-Western music, notably the musics of Asia and the Pacific.

### Accreditation

The bachelor's, master's, and PhD programs are fully accredited by the National Association of Schools of Music (NASM).

### Advising

Students interested in majoring in music, minoring in music, or participating in various ensembles may obtain information at the department office and arrange to see a music advisor. Advising is mandatory for music majors and minors.

## **New Students**

An orientation session for new students is held each fall during the week before classes begin. At that time, incoming students take theory, history, and piano placement tests and receive advising and approval for music courses.

## **Undergraduate Study**

Bachelor degree concentrations include performance, composition, music education, and general music studies.

Specific course requirements are available on the Music Department website: [www.hawaii.edu/uhammusic](http://www.hawaii.edu/uhammusic). New and transfer students must attend orientation and consult the undergraduate chair when entering UH Mānoa.

## **Admission Requirements**

In addition to the UH System Application form, prospective music majors must submit a Music Department Undergraduate Admission Application, recommendation form, and perform an audition. Forms and instructions are available from the department office and the department website at [www.hawaii.edu/uhammusic](http://www.hawaii.edu/uhammusic).

## **BA Degree**

### **Requirements**

Major requirements include 40 credit hours in various music courses. Bachelor of Arts majors work with an advisor to emphasize general music, Hawaiian music, or musical theater.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## **BMus Degree**

### **Requirements**

BMus candidates must complete 80 credit hours in music and major in composition or performance (piano, voice, and selected orchestral instruments).

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## **BEd Degree**

Prospective music education majors should see the chair of the music education committee in the Department of Music for information and requirements. This K-12 degree program is offered in conjunction with the College of Education.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

The major music requirements posted here are effective Fall 2012. Students who declared their major before this date may have different requirements. Students are advised to meet with a major advisor regarding the specific requirements that apply to them.

## **Minor**

### **Requirements**

Students can pursue a minor in music while continuing their chosen major. The minor program requires a minimum of 15 credit hours. For further information, contact the music department office or view the website at [www.hawaii.edu/uhammusic](http://www.hawaii.edu/uhammusic).

## **Graduate Study**

Entrance exams for incoming students consist of the Diagnostic Exam to test for any deficiencies and insure that students

remedy them as soon as possible in their degree programs. The General Exam (master's level)/Qualifying Exam (doctoral level) is completed before candidacy for a degree.

## **Diagnostic Exam**

Prior to enrolling for the first semester of study, each classified graduate student will take a diagnostic examination in music history (part I) and music theory (part II) to determine whether or not the general exams or qualifying exams in those areas (or specified courses in lieu of the general exams) are needed to clear pre-program deficiencies. Students are also tested in their area of concentration (part III). The purpose of this examination is twofold: (a) to assess the student's background and determine if there are deficiencies that should be remedied, and (b) to assist the advisor and the student in planning a program of study. Detailed information about the examination is available on request. Successful performance on specific parts of the diagnostic examination exempts the student from the equivalent parts I and II of the general examination or qualifying examination. Entering doctoral students who are continuing directly from a master's degree in UH Mānoa Music are exempt from taking parts I and II of the diagnostic/general exams, since the student has fulfilled this requirement. In Ethnomusicology and Composition, the student will also be exempt from part III. Musicology and Music Education doctoral students must take part III, the qualifying exam, upon entering the doctoral program.

The diagnostic/general/qualifying examination is offered in August (before the beginning of the fall semester), in January (before the beginning of the spring semester) and in the third week of April.

- Students who enter in the fall semester will take the diagnostic examination in August. If the student does not pass any portion of the diagnostic examination, he or she may re-take the examination in January and April or take the recommended course(s) between August and May and clear deficiencies in the first academic year of study by earning a grade of B or higher.
- Students who enter in the spring semester will take the diagnostic examination in January. If the student does not pass any portion of the diagnostic examination, he or she may re-take the examination in August and the following January or take the recommended course(s) between January and December and clear deficiencies in the first year of study by earning a grade of B or higher.

N.B. Students who enter in the spring semester will be exempt from taking the April examination and will not need to submit a petition for approval to the graduate faculty.

Dismissal from the graduate program will occur if the student does not pass any part of the diagnostic examination and then: (1) does not pass any part of the general examination or qualifying examination in two attempts; or (2) does not take the prescribed course(s) to clear deficiencies in their first year of study; or (3) does not earn a B or better in the prescribed course(s).

Students with deficiencies are strongly advised to take the recommended course(s). Students may also wish to study on their own and re-take the examination. Keep in mind that many classes recommended to rectify deficiencies are offered only once per year. The student should consult with his or her advisor to discuss the most suitable course of action.

## General or Qualifying Exams

Before being admitted to candidacy for a degree, each graduate student must pass the department's general examination/qualifying examination, which consists of three parts: music history, music theory, and the student's area of concentration. All parts of the general examination must be passed before the student earns more than 18 credit hours toward the degree; course work taken in excess of this limit will not be counted if the credits are earned before all three parts of the general examination are passed.

When a student does not pass any part of the diagnostic/general/qualifying examination, there are two options:

1. **Exam Option.** The student may repeat the unsuccessful portion of the exam the next time the examination is offered. If a student chooses this option but does not take the next examination, a failure is recorded. Any student who does not pass the diagnostic examination and does not pass the general examination/qualifying examination twice will be dropped from the program.
2. **Course Option.** The student may take courses to remove the deficiency and must submit the required course option form. Courses to clear pre-program deficiencies or in lieu of general or qualifying examination must be taken for grade during the first two semesters of study and passed with a grade of B (not B-) or better. These courses do not count toward graduate degrees. All deficiencies must be cleared by the end of the first year of study. Students who do not remove their deficiencies by the end of the first year of study will be dropped from the graduate program.

Any exceptions to these procedures must receive prior approval by petition to the graduate faculty. The student petitions the graduate faculty by memo, signed and dated, explaining the reason for the deferral request, no less than five weeks before the exam retest date.

## Master's Degree

The department offers programs leading to the MA in music with concentrations in ethnomusicology, music education, and musicology, and to the MMus with concentrations in composition and performance (voice, piano, and selected instruments). The MA in music education is available either on-campus or online.

## Admission Requirements

Applicants for admission to the master's degree program must have a bachelor's degree with a major in music or a bachelor's degree and evidence of musical background equivalent to a music major; three confidential letters of recommendation (not more than two years old) on forms provided by the music department; and, for non-native speakers of English, a TOEFL score of 500 (paper) 61 (iBT) minimum for performance or 540 (paper) 76 (iBT) for other concentrations and 600 (paper) 100 (iBT) with scores of 25 in listening and speaking for teaching assistants. Application forms are available at the music department and its website, or the Graduate Division and its website. The completed forms should be submitted with two copies of all transcripts by **January 15** for the fall semester, and by **August 1** for the spring semester. (Those who decide to enroll must submit official copies of all post secondary transcripts.) In the following concentrations, students must meet additional admission requirements:

- a. **Composition**—Three original scores representative of various forms and media.
- b. **Ethnomusicology**—A personal statement of 800 words minimum (3 pages) including the purpose of study. Background in cultural anthropology is desirable and, depending on the thesis research, may be required.
- c. **Music Education**—BEEd (music education) or equivalent, minimum of one year of full-time music teaching experience in a public or private school, a 20-30 minute videotape/DVD demonstrating current teaching expertise, and a lesson or rehearsal plan.
- d. **Musicology**—Sample of academic writing proficiency (a 10-page term paper in English from an upper division music history course is preferred).
- e. **Performance**—An audition of works representative of various musical styles. An applicant not residing in Hawai'i must submit an unedited tape recording or CD comparable in scope and length to an in-person audition and, if admitted, will audition before the department admissions faculty before registering for the first semester of residency to ascertain appropriate placement in the curriculum sequence. A recent UH Mānoa graduate may be admitted without a hearing if the BMus senior recital is considered to be of high enough quality by the majority of the department admissions faculty.

An applicant must declare a specific concentration within the MA or MMus; admission, if granted, is for that concentration only. If a student later wishes to change to another concentration, he or she must petition the graduate faculty in music for approval.

More detailed information and links to relevant forms for all degree programs are posted on the department's website: [www.hawaii.edu/uhammusic](http://www.hawaii.edu/uhammusic).

Some concentrations require language competence:

1. **Ethnomusicology**—A reading or speaking knowledge of a foreign language relevant to the thesis research (or equivalent competence in linguistics).
2. **Musicology**—A reading knowledge of French or German.

## Degree Requirements

Plan A requires a minimum of 30 credit hours, 22 in course work and 8 of thesis. Candidates concentrating in ethnomusicology and musicology follow this plan. An ethnomusicology thesis is usually based on fieldwork.

Under Plan A, the student arranges the oral final examination in consultation with the thesis committee, usually during the semester in which all course work has been completed and after the student has completed the thesis document. Copies of the document must be presented to the committee at least two weeks prior to the examination. At the examination, the thesis committee examines the student's knowledge and understanding of the field of concentration, with emphasis on the content of the thesis.

Plan B also requires a minimum of 30 credit hours but does not include a thesis. Candidates in performance, music education, and composition follow this plan. Plan B students in performance must fulfill the following requirements:

1. Give a public, hour-long recital.
2. Additionally, in the recital semester the student will meet with the recital committee for a one-hour oral examination to discuss historical and analytical aspects of the works performed in the graduate recital.

Plan B students in music education must fulfill the following requirements:

1. A comprehensive three-hour examination, exhibiting strength in written expression and a grasp of the essentials of the broad field of music education; and
2. A project or paper about some specific aspect of music education whose size and scope will be determined by the student and the faculty member directing the project.

Plan B students in composition must fulfill the following requirements:

1. Composition students must compose an original work in one of the larger forms, and write an essay on a topic related to their master's studies.
2. Candidates concentrating in composition must give a public, 30-45 minute recital of original works composed during their master's studies at UH Mānoa.

The master's student must spend at least two semesters in program residency at UH Mānoa. (Full-time work or the equivalent in credit hours.)

### Doctoral Program

The department offers programs leading to the PhD in music with concentrations in composition, ethnomusicology, music education, and musicology.

### Admission Requirements

Applicants for admission to the PhD program must present a master's degree in music (in the area of emphasis or equivalent), an excellent academic record (two copies of all college transcripts), three confidential letters of recommendation (not more than two years old) on forms provided by the music department, a sample of academic writing proficiency such as recent term papers as specified in certain areas, and, for non-native speakers of English, a TOEFL score of 560 (paper), 83 (iBT) or better, and, for teaching assistants, 600 (paper), 100 (iBT) with scores of 25 in listening and speaking. Application forms are available at the music department and its website, or the Graduate Division and its website. The completed forms should be submitted with two copies of all transcripts by **January 15** for entrance in the following fall semester and by **August 1** for entrance in the following spring semester. (Those who decide to enroll must submit official copies of all post secondary transcripts.)

In the following concentrations, students must meet additional admission requirements:

1. Composition—A master's degree in composition or the equivalent in terms of course work and original composition; a score of one large-scale work; scores of two shorter works; and a recording of at least one of the above.
2. Ethnomusicology—A master's degree in ethnomusicology or the equivalent in terms of course work and fieldwork. A major research paper in ethnomusicology as evidence of extensive background in musical traditions other than Western art music.
3. Musicology—A master's degree in musicology or a minimum of four graduate seminars in musicology, and a 7,500-word research paper in English on a subject in historical musicology.
4. Music Education—A master's degree in music education is preferred, but an equivalent background is acceptable. A minimum of two years full-time music teaching in a public

or private school; three confidential letters of recommendation on the applicant's teaching ability, at least two of which must be written by the applicant's job supervisors (principal or other supervisor); and one of the following: (a) a 20-30 minute videotape or DVD demonstrating current teaching expertise, or (b) an in-person teaching demonstration; and a lesson or rehearsal plan relevant to the teaching demonstration.

An applicant must declare a concentration in one of the four areas previously listed. Admission, if granted, is for that concentration only. If a student later wishes to change to another concentration, he or she must petition the graduate faculty in music for approval. Each student will have a principal advisor who must be a member of the music department's graduate faculty. An application will be denied if it is determined that no principal advisor in the applicant's area of interest is available on the music department's graduate faculty.

### Degree Requirements

This degree requires an emphasis in ethnomusicology (11 credits of specified course work) for students who are not concentrating in ethnomusicology. This emphasis ensures that all PhD graduates will be able to teach introductory courses in world music. Requirements for music PhD students also include MUS 659 Seminar in College Music Teaching, and/or supervised college teaching experiences.

The PhD student must spend at least three semesters in program residence (full-time work or the equivalent in credit hours) at UH Mānoa and must complete the degree within seven years.

Other Requirements. Before advancing to candidacy, reading proficiency must be satisfactorily demonstrated as follows:

1. Ethnomusicology—One dissertation research language and one library research language.
2. Music Education—Language appropriate to the areas of research or research statistics.
3. Musicology—Two European languages: German and one other language, preferably French.
4. Composition—Language appropriate to areas of research. Presentation of a full (50-60 minute) recital of works composed during the doctoral residency.

### Comprehensive Exam and Advancing to Candidacy.

This exam measures the student's readiness to begin significant research in the selected major area of research. It is given only after successful completion of course work, fulfillment of residency requirements, successful completion of all language requirements, and notice from the advisory committee that the student is sufficiently prepared for this examination. This two-part exam consists of a written portion and a two-hour oral portion. A student failing this exam may retake it once, but must do so within one year. Passing this exam enables the student to begin the dissertation process and receive an ABD certificate from UH Mānoa, indicating that all requirements of the doctorate except for the dissertation have been completed. Following the formation of a five-member doctoral committee, the comprehensive exam, and submission and approval of a dissertation proposal by the doctoral committee, the student is advanced to candidacy.

After this occurs, all that remains is fieldwork (for ethnomusicology majors only), research for and writing of the dissertation, and the oral defense of the dissertation.

**Final Oral Examination.** Basically a defense of the dissertation, this exam is conducted by the five-member doctoral committee, consisting of graduate faculty members appointed by the music graduate chair and approved by the Graduate Division dean. The chair of the student's advisory committee normally serves as the chair of the student's doctoral committee. At least one member must be from outside the music department, but music department members make up the majority. The committee chair and outside member must be physically present at the exam, which is subject to other regulations described at the Graduate Division website: [manoa.hawaii.edu/graduate/content/final-defense](http://manoa.hawaii.edu/graduate/content/final-defense).

The student arranges the date of the final oral exam in consultation with the doctoral committee; it usually takes place during the semester the student has completed the dissertation document. Copies of the document must be presented to the committee at least two weeks prior to the examination. At the examinations, the committee scrutinizes and judges the student's knowledge and understanding of the field of concentration, with emphasis on the content of the dissertation.

## Peace Studies

College of Social Sciences/Spark M. Matsunaga Institute for Peace and Conflict Resolution  
Saunders Hall 523 and 723  
2424 Maile Way  
Honolulu, HI 96822  
Tel: (808) 956-6433

- \*B. Barnes, JD, LL.M. (Chair, Graduate Certificate in Conflict Resolution)—conflict resolution
- \*B. Hallett, PhD—peace studies

### Cooperating Faculty

- \*I. Aoude, PhD—ethnic studies
- \*J. Barkai, JD—law
- \*K. Bennett, MSW, JD—social work
- \*J. Campos, PhD—political science, terrorism studies
- \*R. Chadwick, PhD—political science
- \*D. Chandler, PhD—sociology, conflict resolution
- \*S. Chandler, PhD—public policy/child welfare
- \*M. Coffman, PhD—environmental economics, planning
- \*D. Foley, PhD—deliberative dialogs, conflict resolution
- \*A. Hubbard, PhD—conflict and relational management
- \*M. Jones, PhD—physics
- \*G. Kent, PhD—political science
- \*K. Lowry, PhD—ADR, coastal management, community planning
- \*L. Minerbi, PhD—urban and regional planning
- \*R. Robinson, PhD—management
- L. Ruby, PhD—art
- \*W. Sharkey, PhD—conflict and relational management
- M. Soetero-Ng, PhD—teacher education, peace studies

\*L. Sponsel, PhD—anthropology

\*C. Stephenson, PhD—political science

**Degree and Certificates Offered:** Certificate in Peace Studies, BA in interdisciplinary studies (peace and conflict studies), Graduate Certificate in Conflict Resolution

## The Academic Program

The Spark M. Matsunaga Institute for Peace and Conflict Resolution is a multi-disciplinary academic community of scholars, students, practitioners, and visitors, who, through teaching, research, service, and application, seek to groom future leaders and professionals in applied peacemaking and conflict resolution. A goal of the institute is to empower students to better address contemporary problems within Hawai'i, the Asia-Pacific region, U.S., and the world.

The institute was established to carry out the vision of U.S. Senator Spark M. Matsunaga that "every student enrolled in Hawai'i's public university system will be exposed to peace studies." The institute is committed to building on Hawai'i's cultural heritage and island values: aloha, mutual aid and respect, sense of community, and caring for the land, to promote cross-cultural communication and peacemaking leadership.

Peace and conflict resolution is a dynamic field, one that is increasingly relevant to our graduates' professional careers and to other fields of academic inquiry. Students from all colleges in UH Mānoa may enroll in Peace and Conflict Education (PACE) courses, either as an intellectual endeavor or to enhance their personal and professional skills. We believe that students who understand the causes of conflict and the methods for resolving conflicts will be better equipped for a wide range of careers, including, but not limited to, positions in education, law, dispute resolution, human resource management, industrial relations, government, foreign service, security, urban and regional planning, sociology, and social work.

For students who wish to obtain an academic qualification in peace and conflict resolution, the institute offers three programs:

1. The Peace and Conflict Resolution major for undergraduates (a flexible inter-disciplinary program offered in cooperation with the Interdisciplinary Studies BA program).
2. The Certificate in Peace Studies (open to undergraduate students and equivalent to a "minor").
3. The Graduate Certificate in Conflict Resolution (open to graduate students seeking the certificate only or concurrently with another graduate-level degree program).

Inherently interdisciplinary and international in perspective, these programs encourage critical thinking and further the university's mission to expand leadership in international affairs and advance stable, peaceful, prosperous, and democratic relations in the region. The institute has also built a reputation for leadership in dispute resolution and facilitation of community dialogues on controversial issues. The requirements for the degree programs are set forth below.

## Undergraduate Study

### Bachelor's Degree in Peace and Conflict Resolution

In collaboration with the Interdisciplinary Studies program, the Matsunaga Institute for Peace and Conflict Resolution offers a flexible, self-designed BA in peace and conflict resolution. With the exception of three required courses, students are

free to design an academic program that is appropriate for their interests, needs, and goals. Students work closely with faculty advisors from the Matsunaga Institute and Interdisciplinary Studies to develop a coherent, multidisciplinary course of study. This gives students the flexibility to concentrate on a special area of interest or to take a broader approach to peace and conflict studies. Additional information is available at [www.peaceinstitute.hawaii.edu](http://www.peaceinstitute.hawaii.edu) and from Interdisciplinary Studies in the Colleges of Arts and Sciences.

### Requirements

- PACE 310 Survey Peace and Conflict Studies (3)
- Either PACE 429 Negotiation (3) or PACE 447 Mediation Skills: UH Basic (3)
- PACE 495 Practicum and Internship (or a faculty approved substitute) (3)

The remaining credit hours, to meet the major's minimum requirement of 36 credit hours, can be drawn from courses offered by the Matsunaga Institute (designated as PACE courses) as well as courses offered by other departments. Although a list of suggested electives is set forth below, students may also propose other courses, provided that they can achieve a coherent program of study that meets the requirements of the Interdisciplinary Studies program. An overall GPA of 2.5, with no grade below a C, is required in the major course work.

### Certificate in Peace Studies

The Certificate in Peace Studies (15 credit hours), which is equivalent to a minor, equips students with the fundamentals of peace and conflict studies, allowing them to broaden the reach of their major with insights from this multidisciplinary field. The certificate gives students a greater awareness of what can be done to remedy the social injustices of our times and to manage

and resolve conflict, skills that are highly valued by employers in a wide range of professional fields.

To receive a Certificate in Peace Studies, students are required to take PACE 310, 429 or 447, and 495 (or a faculty approved substitute) and six additional credit hours selected in consultation with the student's certificate advisor. A GPA of 2.5, with no grade below a C, is required in certificate courses.

Suggested optional courses for the major in Peace and Conflict Resolution and for the Certificate in Peace Studies include:

- PACE 247 Survey of Conflict Management
- PACE 315 Personal Peace: Stories of Hope
- PACE 345/ANTH 345 Aggression, War, and Peace
- PACE 373/POLS 396 Nonviolent Political Alternatives
- PACE 399 Directed Reading
- PACE 410 History of Peace Movements
- PACE 412 Gandhi, King, and Nonviolence
- PACE 413 Terrorism
- PACE 420 Introduction to Human Rights
- PACE 477 Culture and Conflict Resolution
- PACE 478 International Law and Disputes
- PACE 485\* Topics in Peace and Conflict Resolution
- PACE 489 Hiroshima and Peace (summer only)
- ANTH 423 Social and Cultural Change
- BIOL 310 Environmental Issues
- COM 340 Intercultural Communication
- COMG 455 Conflict Management
- ECON 414 Global Economic Crisis and Recovery
- FAMR 350 Leadership and Group Process
- GEOG 435 Political Geography of Oceans
- GEOG 436 Geography of Peace and War
- POLS 201 Problems of War and Peace
- POLS 319 International Organization
- POLS 375 Constitutional Law I: Institutional Power
- POLS 394 Democracy in Organizations
- SOC 433 Analysis in Law and Social Change
- SOC 446/WS 446 Gender Violence Over the Lifecycle
- WS 304 Women, War, and the Military

\*There may be more than one section of this course offered, each focusing on different specialized topics in the field. Examples include Protest Under Occupation, Indigenous Peacemaking, and Advocating for Children: Rights and Welfare. The course is repeatable one time.

### Graduate Study

#### Certificate in Conflict Resolution

The Certificate in Conflict Resolution allows students pursuing a master's or doctoral degree in another area to become acquainted with conflict resolution theory, practice, and activities. It is also available to students seeking the certificate only and considers unclassified students, as well as degree students, for admission. Students enrolled in public administration, education, law, urban and regional planning, political science, sociology, anthropology, geography, health, social work, human resource management, environmental science, and psychology are part of the program, along with professionals in the community. Students are encouraged to use the certificate program to increase their competence in conflict resolution as it relates to their major area of study. The Certificate in Conflict Resolution introduces students to the fundamentals of conflict resolution; mediation systems; dynamics for group conflict; skills for

organizing and leading group deliberations and dialogues; and culturally appropriate dispute resolution.

Students are required to complete at least fifteen (15) credits from the approved course list. Each student will be assigned a temporary advisor upon acceptance into the program, with the option of making an alternate choice at a later time. Toward the end of the course of study students will complete a “capstone” paper under the supervision of their advisor, which is intended to integrate their academic and practical experiences in the certificate. Each student will also successfully complete a “skills assessment” before the certificate is awarded. The graduate certificate in conflict resolution is available to students seeking the certificate only or concurrently with a JD or an MA, MPA, MSc, PhD, or professional degree. International students must have a 600 (paper), 250 (computer), and 100 (internet) TOEFL score to be admitted.

The approved list of certificate courses is divided into “core” and “elective” courses. Students are required to complete at least six credits from the list of core courses. Courses are multi-disciplinary in nature. The areas include negotiation, mediation, facilitation, culture and conflict resolution, international disputing/international law, ADR systems design, conflict resolution for educators, political science, and communicology. Up to two classes at the 400-level may be counted toward the certificate, subject to advisor approval. See the website at [www.peaceinstitute.hawaii.edu](http://www.peaceinstitute.hawaii.edu) or contact the program office for a complete list of courses.

The capstone paper will reflect knowledge of conflict theory and analysis and the application of resolution processes. A practicum, PACE 695, is offered as an elective with variable credits and is repeatable once up to 3 credits. The precise form is to be determined in consultation with the advisor. Practicum guidelines are available in the office or can be obtained from an advisor. Specific information about the required and elective courses, including the graduate certificate brochure, can be found on our website.

Upon completion of the core courses, students are expected to demonstrate their skills in facilitation, negotiation, mediation, or process design. The demonstration may be either an actual intervention or a simulated mediation or other problem-solving process organized by faculty. Skill outcome areas will be observed and assessed, including: ability to develop and maintain a collaborative atmosphere and approach; ability to use communication skills such as appropriate questions, summarization, active listening, and re-framing, where appropriate; ability to clarify, analyze, frame, track, and link appropriate issues; ability to identify and use objective criteria in evaluating dispute resolution proposals; ability to use interest-based negotiation principles effectively; and ability to develop and test dispute resolution options using interests and criteria.

Successful completion of the program leads to a Graduate Certificate in Conflict Resolution. Consideration for admission to the certificate program requires filing of an application form available from the department and the Graduate Division, and a supplemental program application that can be found online at [www.peaceinstitute.hawaii.edu](http://www.peaceinstitute.hawaii.edu).

## Philosophy

College of Arts and Humanities  
Sakamaki D-301  
2530 Dole Street  
Honolulu, HI 96822  
Tel: (808) 956-9049

### Faculty

- \*R. Bontekoe, PhD (Chair)—hermeneutics, epistemology, philosophy of law
- \*T. Albertini, DPhil—Renaissance and early modern philosophy, Islamic philosophy, feminist issues in philosophy
- \*R. T. Ames, PhD—Daoist philosophy, Confucian philosophy, American philosophy, philosophy of culture, comparative philosophy
- \*A. Chakrabarti, DPhil—Indian philosophy, philosophy of language, philosophy of mind
- \*C. Y. Cheng, PhD—philosophy of language and logic, American philosophy, classical Chinese philosophy, Neo-Confucian philosophy
- \*V. Dalmiya, PhD—epistemology, feminist philosophy
- \*M. Ishida, PhD—classical American philosophy, Japanese philosophy, process philosophy, history and philosophy of mathematical logic
- T. Jackson, PhD—specialist, director of philosophy in the schools; logic, comparative philosophy, philosophy for children
- \*K. Kipnis, PhD—philosophy of law, social and political philosophy, ethics
- \*S. Odin, PhD—Japanese philosophy, comparative philosophy, American philosophy
- \*R. Raghunathan, PhD—Indian and Buddhist philosophy, philosophy of religion, ancient Greek philosophy, epistemology
- \*J. Tanke, PhD—continental philosophy, aesthetics, historical ontology, social and political philosophy
- \*G. Tsai, PhD—ethics, social and political philosophy

**Degrees Offered:** Undergraduate Certificate in Islamic Studies, BA (including minor) in philosophy, MA in philosophy, PhD in philosophy

### The Academic Program

Philosophy (PHIL) is an open inquiry that involves the disciplined examination of our most comprehensive goals, standards, and criteria. For example: how should we conduct ourselves in our relations with one another? (ethics); what standards should we use to assess our institutions? (social and political theory); how may we achieve knowledge and understanding of the world around us? (epistemology, philosophy of science); what are the most general structures of thought and reality? (philosophy of logic and language, metaphysics); and what place does art have, or what place should it have, in human life? (aesthetics). In pursuing these questions, philosophy is often led to confront issues about the ultimate nature of reality and value or to consider possible limitations on our ability to answer or even to ask such questions. Philosophy proceeds with its task in part through contributing to ongoing discussions and debates within disciplines and traditions and also by cross-disciplinary and cross-cultural comparisons.

Students majoring in philosophy work to develop for themselves a comprehensive view of the aspirations and achievements

of human culture and in the process are encouraged to acquire the skills of careful reading and interpretation of texts, of writing that conveys clearly their understanding of some issue, and of responding critically to ideas that other people advance. The Department of Philosophy's faculty has expertise in an unusually diverse range of philosophic traditions. The faculty includes specialists in Chinese, Japanese, Indian, Buddhist, and Islamic thought, as well as in many of the important Western traditions. The department as a whole has long been recognized internationally for its comparative work between philosophic traditions.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

Students must complete 30 credit hours of philosophy courses, including required courses:

- Logic: PHIL 110 or 111;
- Two elective courses 200-level or above;
- Two courses in the History of Western Philosophy: PHIL 211, 212, 213, or 414 (Alpha);
- Three courses in the core philosophical fields (of ethics, aesthetics, metaphysics, political philosophy, epistemology, philosophy of science: PHIL 301, 302, 304, 306, 307, 308);
- One course in Buddhist, Chinese, Indian, Islamic, or Japanese philosophy: PHIL 330 to 380, PHIL 406; and
- PHIL 449

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor

#### Requirements

Students must complete 15 credit hours of philosophy above the 100-level. A minor will have any one of the following themes: Asian philosophy; ethics and law; science and society; humanities and the arts; and history of philosophy.

For details of which courses fall under these themes, students should consult the department undergraduate advisor.

### Undergraduate Certificate in Islamic Studies

The purpose of this certificate is to increase understanding of Islam as a world religion through critical analysis of primary and secondary materials, to foster knowledge about the complexity among Islamic societies and their diverse cultural expressions, and to explore the role of Islam and Muslims in present and past world affairs.

This certificate is housed within the College of Arts and Humanities. The participating departments are Art and Art History, History, Philosophy, and Religion. Minimum prerequisites for acceptance into the program for undergraduates are sophomore or higher standing with a minimum GPA of 2.5 and the completion of at least one introductory course within one of the four participating departments with a grade of B or better. For non-UH Mānoa students, the prerequisite is an AA or BA degree (or equivalent) that included some humanities component or relevant work experience. Non-UH Mānoa students who do not wish to enroll in a degree program may register for the courses through Outreach College.

### Requirements

- 15 credit hours are required for completion of the certificate.
- HIST 354, PHIL 330, and REL 209. It is recommended that REL 209 be taken first.
- Two electives selected from: ART 491B, 492B, 493, HIST 301, 302, 355, 432, and REL 352. (One course in Arabic language may be used as one of the electives.)
- Students are required to undertake a final research project in association with an elective class. Advanced undergraduates with GPA of 3.5 or above may, with instructor consent, use credit from the following graduate classes: ART/ASAN 792, HIST 662, or PHIL 730.

For more information, contact the undergraduate chair.

### Graduate Study

The department offers graduate training leading to the MA and PhD degrees. Students with BA degrees may apply to the MA program. Students are accepted directly into the PhD program only if they have already received the MA degree or the equivalent from an accredited institution and have met any other departmental requirements.

Specific requirements for all graduate degrees are detailed in the department's "Graduate Student Handbook" at [uhmpsa.wordpress.com/the-graduate-student-handbook/](http://uhmpsa.wordpress.com/the-graduate-student-handbook/).

Although the Western philosophical tradition remains the fundamental frame of reference for the department, the opportunity provided for specialization in the area of Asian philosophy is unique in that UH Mānoa is the only institution of higher learning in the U.S. with a regular program leading to the PhD degree with areas of specialization in Islamic, Indian, Buddhist, Chinese, Japanese, and comparative philosophy. Whatever their field of specialization, graduate students intending to complete a PhD in philosophy at UH Mānoa must acquire a thorough knowledge of the history and problems of Western philosophy. On the basis of this foundation, students may further specialize in one of three areas of study: Western philosophy, Asian philosophy, or comparative philosophy. The area of comparative philosophy is the most demanding; at the PhD level its requirements include proficiency in both the Western and Asian fields. The candidate is expected to gain a mastery of some specific topic that can be approached through the resources of two or more philosophic traditions.

All graduate students shall develop their course of study in consultation with the chair of the graduate program.

The MA and PhD in Asian philosophy are recognized Western Interstate Commission for Higher Education (WICHE) regional graduate programs. Residents of Alaska, Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, Utah, Washington, and Wyoming are eligible, on admission, to enroll at Hawai'i-resident tuition rates.

### Master's Degree

The MA program can be completed either entirely through course work or through a combination of course work and thesis preparation.

### Admission Requirements

Students seeking admission must have a BA degree, including the equivalent of 30 credit hours in philosophy. Students who lack this preparation must make up deficiencies either before or during graduate study. In the latter case, students will

be admitted only conditionally, pending removal of the deficiencies. Deficiencies may also be designated in cases where a student's background does not include a sufficient number and range of courses in Western philosophy. The GRE General Test is required of all program applicants to whom it is accessible.

### Degree Requirements

To be eligible for conferral of the MA degree, a student must maintain a minimum GPA of 3.3 while completing at least 30 credit hours of course work, at least 18 of which must be in courses numbered 600 and above. In addition, students submit three papers for a culminating exam, which includes an oral component. Also required for the MA degree are four semesters (or the demonstrated equivalent) of at least one philosophically significant language other than English: typically classical Greek, Latin, French, German, Arabic, classical Chinese, Japanese, Sanskrit, or Pali.

### Doctoral Degree

The doctoral program consists of two stages. The first stage is that leading to admission to candidacy; the second, to the awarding of the degree. Normally the first involves at least two years of course work beyond the MA in preparation for departmental and language examinations. The second stage involves writing a dissertation and passing an oral examination in its defense. Students must attain certification for PhD candidacy—that is, fulfill all the requirements for the PhD except for the writing and oral defense of the dissertation—within four years of admission to the PhD program.

### Admission Requirements

Students seeking admission must hold an MA degree or the equivalent in philosophy and have earned a minimum GPA of 3.3 in courses taken for the MA. Students may be required to make up deficiencies upon entry into the PhD program (see requirements for MA degree above). The GRE General Test is required of all program applicants to whom it is accessible.

### Degree Requirements

To be eligible for conferral of the doctor of philosophy degree, a student must maintain a minimum GPA of 3.3 while completing at least 30 credit hours of course work beyond the requirements for the MA. A minimum of 18 of these credit hours must be taken at or above the 600 level. Students are required to demonstrate competence in each of three general areas: 1) history of philosophy; 2) metaphysics, epistemology, logic, and philosophy of science; and 3) ethics, aesthetics, social and political philosophy, and philosophy of law. Course listings made available each semester will indicate the general area or areas within which each course fits. Students are required to pass two examinations in an area related to the subject matter of their prospective dissertation, to complete an original dissertation, and to pass a final oral dissertation defense. In addition, students shall demonstrate proficiency in at least one (and where deemed necessary two) philosophically significant language(s) other than English: typically classical Greek, Latin, French, German, Arabic, classical Chinese, Japanese, Sanskrit or Pali. Language proficiency examinations will be conducted through the Graduate Division and the department of UH Mānoa responsible for teaching that language.

- T. Dombeck, PhD—elementary particles, experiment
- S. Dye, PhD—particle astrophysics
- A. McDonald, PhD—particle astrophysics
- R. Morse, PhD—particle astrophysics
- R. Mussa, PhD—elementary particles, experiment
- W. Simmons, PhD—elementary particles, theory

### Cooperating Graduate Faculty

- K. Bennett, PhD—high-field magnetic resonance imaging
- V. A. Stenger, PhD—neuroscience, magnetic resonance research

**Degrees Offered:** BA (including minor) in physics, BS in physics, MS in physics, PhD in physics

### The Academic Program

Physics (PHYS) is the study of matter and energy and how they interact at the most basic levels. Areas include mechanics, optics and lasers, thermodynamics, electricity, magnetism, quantum theory, atomic and nuclear phenomena, condensed matter, and elementary particles. Physics is widely regarded as the most basic of all the sciences. UH Mānoa offers both the Bachelor of Arts and Bachelor of Science degrees in physics. Faculty members who teach physics courses are at the forefront of research in physics both in experiment and in theory. In the field of elementary particles, faculty members currently perform

experiments in Hawai'i, the mainland U.S., France, Japan, and Antarctica to study neutrinos and high-energy gamma rays coming from the stars. Others are involved in experiments at the BEPC II accelerator in China and at the KEKB accelerator in Japan, studying particle production and decay and the violation of particle/anti-particle symmetry. Faculty members are also involved in the space-based AMS experiment and on the development of techniques for dark matter searches. The particle theory group is involved in the identification of new physics that addresses new questions in particle physics and cosmology that are beyond the scope of the Standard Model, and the development of strategies that distinguish this new physics from the Standard Model phenomena. In condensed-matter physics, they investigate nano-materials and use a scanning tunneling microscope to take pictures of individual atoms. A free electron laser is operating in the physics building. This device allows scientists to carry out forefront research in fundamental and applied physics. Often, undergraduate physics majors work on these projects along with graduate students and the faculty.

### Advising

Academic advising is mandatory for all undergraduate physics majors. Contact the department office for assignment to an advisor. Note that in order to complete the program in 4 years, a physics student must begin the study of calculus in either the first or the second semester of the freshman year.

## Undergraduate Study

### BA Degree

#### Requirements

Students must complete 40 credit hours in PHYS courses, including:

- PHYS 170/170L, 272/272L, 274/274L, 310, 350, 400, 430, 450, 480, and 480L
- One course from PHYS 440, 460, 481, or 490
- Two courses from PHYS 305, 475, or 481L
- CHEM 161/161L and 162/162L or 171/171L or 181A/181L
- MATH 241, 242, 243, 244, and 311 or 307 (MATH 251A, 252A, 253A, may be substituted for MATH 241, 242, 243, 244. MATH 215, 216, may be substituted for MATH 241, 242, with consent from physics advisor.)
- Grade of C (not C-) or better in above courses

Upon approval of a physics department advisor and chair, the PHYS 170 through 272L requirements may be satisfied by PHYS 151 through 152L; and requirements for PHYS 305 (or 475 or 481L), 440 (or 460 or 481 or 490), 450, 480, and 480L, may be modified to accommodate a special emphasis or interdisciplinary program that is appropriate for the major in physics.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BS Degree

#### Requirements

Students must complete 46 credit hours in physics courses, including:

- PHYS 170/170L, 272/272L, 274/274L, 310, 311, 350, 400, 430, 450, 480, 480L, and 481

- One course from PHYS 440, 460, or 490
- Two courses from PHYS 305, 475, or 481L
- CHEM 161/161L and 162/162L or 171/171L or 181A/181L
- MATH 241, 242, 243, 244, and 311 or 307 (MATH 251A, 252A, 253A, may be substituted for MATH 241, 242, 243, 244. MATH 215, 216, may be substituted for MATH 241, 242, with consent from physics advisor.)
- Grade of C (not C-) or better in above courses

Upon approval of a physics department advisor and chair, the PHYS 170 through 272L requirements may be satisfied by PHYS 151 through 152L; and requirements for PHYS 305 (or 475 or 481L), 440 (or 460 or 490), 450, 480, and 480L, may be modified to accommodate a special emphasis or interdisciplinary program that is appropriate for the major in physics.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor

#### Requirements

- PHYS 151/151L and 152/152L or PHYS 170/170L and 272/272L
- PHYS 274 (lab not necessary)
- 15 additional upper division credit hours, including PHYS 310, 350, and 480
- Grade of C (not C-) or better in the above courses

Upon recommendation of a physics department advisor and chair, requirements for PHYS 310, 350, and 480 may be modified if an equivalent course is taken in another department.

### Graduate Study

This program offers opportunities for study and research leading to the MS and PhD degrees in physics. The staff and facilities are especially aimed toward experimental and theoretical work in elementary particle physics, nanophysics, and free electron laser physics.

Intended candidates for the MS or PhD in physics must present a minimum of 35 undergraduate credit hours in physics, including atomic and nuclear physics, electromagnetism, mechanics, quantum mechanics, and thermodynamics. Courses in general chemistry and differential equations are also required. Official scores of the GRE General Test and the subject test in physics must be submitted prior to admission.

At least one year of experience as a teaching assistant is required of all MS or PhD candidates. All graduate students are required to attend the weekly colloquium.

### Master's Degree

Students wishing to terminate their formal education with the MS degree generally select Plan A (thesis) so as to gain some research experience, as well as formal class work. These students are prepared to enter teaching positions at the community college level or industrial and civil service positions at the junior scientist and engineer level.

Students planning advanced graduate work generally complete the Plan B (non-thesis) or Plan C (examination) requirements for the MS degree. At this point most of their formal class work has been completed and further work consists mainly of seminars, directed research, and the dissertation.

## Requirements

For the MS Plan A, students must complete 30 credit hours of course work, including (a) a minimum of 18 credit hours of physics courses numbered 600 to 798, including PHYS 610, 650, 670, and 690; (b) minimum of 6 credit hours of thesis; and (c) approved electives, which may be selected from PHYS 699 for a maximum of 2 credit hours and courses in mathematics, chemistry, meteorology, engineering, and philosophy. Other courses can be included on a case-by-case basis at the discretion of the department chair. A final oral examination covers the thesis and related areas and completes the Plan A requirements.

For the MS Plan B, students must complete 30 credit hours of course work, including (a) a minimum of 18 credit hours of physics courses numbered 600 to 798, including PHYS 610, 650, 670, and 690; and (b) approved electives, as in Plan A. A written qualifying examination completes the Plan B requirements.

For the MS Plan C, there is no credit hour requirement but a minimum residency requirement must be satisfied. MS Plan C is intended for students who had completed equivalent course requirements at another institution. Admission to Plan C requires the approval of the physics graduate program advisory committee. A written qualifying examination and a final oral examination complete the requirements for Plan C.

## Doctoral Degree

The PhD degree is essentially a research degree. Students complete an original and significant piece of research and are at the forefront of one area of physics. Students are expected to enter the academic world in a teaching and research capacity or industrial and government research laboratories as senior scientists.

## Requirements

To be admitted to the PhD program, students must perform satisfactorily on a written qualifying examination followed by an advancement to candidacy oral examination. A student is allowed two attempts to pass the written qualifying examination within the student's first six semesters as a regular classified graduate student. The student's first attempt must be within the student's first four semesters as a regular classified graduate student. Students who fail twice cannot continue in the graduate program.

In addition to the courses required for the MS degree, students are responsible for the material covered in PHYS 651 and 671. A scholarly dissertation must be written, and a final oral examination in defense of the dissertation completes the requirements for the PhD.

# Political Science

College of Social Sciences  
Saunders Hall 640  
2424 Maile Way  
Honolulu, HI 96822  
Tel: (808) 956-8357  
Fax: (808) 956-6917

## Faculty

- \*D. Halbert, PhD (Chair)—public policy, political futures, law and politics, and politics of intellectual property
- \*S. Krishna, PhD (Graduate Chair)—comparative politics, international political economy, South Asian Studies, and postcolonial studies
- \*J. N. Goodyear-Ka'opua, PhD (Undergraduate Chair)—Hawaiian politics, Indigenous politics, politics of education and culture
- \*H. Aikau, PhD—contemporary native Hawaiian identity and politics, feminist theory, and critical race theory
- \*R. Chadwick, PhD—international relations, global modeling, methodology
- \*J. A. Dator, PhD—alternative political futures esp. Asia and Pacific Islands; Asian politics; governance designs for space settlements; politics of media
- \*K. Ferguson, PhD—feminist theory and methods; political theory; politics of organizations; gender, globalization, militarism
- \*P. Flowers, PhD—Japanese politics, international law, international relations
- \*J. Goldberg-Hiller, PhD—law and society, law and philosophy, sexuality politics, indigenous politics
- J. Grove, PhD—critical war studies, complexity theory and system theory
- \*M. Henningsen, PhD—European politics, genocide/Holocaust, political philosophy, political theory
- \*K. Heyer, PhD—law and society, disability politics, comparative law, social movement and civil rights
- \*E. Kimura, PhD—comparative politics, political change, Southeast Asia
- \*C. Moore, PhD—American politics, public policy, politics of bureaucracy, institutional change
- \*L. Nitz, PhD—American government; methodology; political economy; public policy; research methods; topics in political theory
- \*M. J. Shapiro, PhD—American politics; interpretive methods; politics of culture; media and popular culture; political theory; public policy
- \*N. Silva, PhD—Hawaiian politics, indigenous politics
- \*N. Soguk, PhD—international relations theory, comparative politics; international organization; international migration and diasporas, human rights, Middle East
- \*M. Steger, PhD—global politics, globalization, political ideologies, comparative political theory (mostly East-West), nonviolence
- \*C. M. Stephenson, PhD—international relations; international organization; international environmental politics; international security; peace studies, conflict resolution
- M. Yang, PhD—comparative politics, political economy of development, East Asia
- \*K. Zhou, PhD—comparative politics; Chinese & Asian politics; women and development, and public policy

## Affiliate Graduate Faculty

W. Dissanayake, PhD—Asian cinema, film theory  
 F. Farhi, PhD—Middle East politics, comparative politics  
 B. Kerkvliet, PhD—Southeast Asian politics  
 O. Lee, PhD—Chinese foreign policy, U.S.-China relations

## Cooperating Graduate Faculty

K. O. Kane, PhD—philosophy and theory, pedagogy, film and media studies, women's studies

**Degrees Offered:** Undergraduate Certificate in Law and Society, BA (including minor) in political science, MA in political science, PhD in political science

## The Academic Program

Political science (POLS) examines politics not only in government and among nations but also in private organizations, businesses, universities, families, language, and daily life.

Various methods are used to do this, ranging from the interpretive and historical to the quantitative and statistical. Political science graduates enter numerous professions: journalism, foreign service, social services, government, law, law enforcement, teaching, civil service, business, librarianship, and research. Undergraduate majors have done all of these and more. So have the department's graduate students, many of whom come from abroad and return to their home countries to become leaders in their fields. The Department of Political Science provides a sound undergraduate education that helps prepare people to think critically and constructively about the world and to be active, concerned citizens in whatever walk of life they choose. Its internship program permits undergraduates to earn academic credit while working in community or governmental institutions and processes.

At the graduate level, the department stands out in the fields of Asian politics, comparative politics, Asian politics, futures studies, indigenous politics, international relations, law and society, policy analysis, and political theory. The department is an open, informal place where students, staff, and faculty alike are encouraged to participate in departmental affairs and governance. For further information, call (808) 956-8357 or write to the department.

## Advising

Students may write to, or make appointments to see, either the graduate chair or the undergraduate chair, who will discuss the options available and assign students, if necessary, to a faculty member who specializes in a field of study.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

- Students must complete 30 credit hours, including:
- a prerequisite introductory course at the 100 or 200 level
  - 12 credit hours from courses distributed as follows: POLS 335; either POLS 301 or 302; either POLS 305 or 315; and one of either POLS 375, 376, or 385
  - POLS 390 (Political Inquiry and Analysis)
  - 9 credit hours from other 300 level courses, including 3x5 courses
  - 3-6 credit hours from 400 level courses

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor

#### Requirements

Students must complete 18 total credit hours. 15 credit hours from the 300 level or above, including one course from POLS 305, 315, 335, 375 or 385.

Students should choose one of the 100 or 200 level political science courses as part of their General Education Core in social sciences, since a 100 or 200 level course is prerequisite for 300 level courses.

### Undergraduate Certificate in Law and Society

#### Requirements

15 credits will be required to be completed with a GPA of 2.5 or above.

- POLS 374/SOC 374
- 9 credits must be upper division (300-400 level)
- 6 credits from either AMST 365, AMST 436/POLS 436/WS 436, ECON 476, HWST 495, HWST 496, HIST 475, PHIL 318, POLS 375, POLS 376, SOC 231, SOC 333, SOC 432, or SOC 435/WS 435
- Students are also required to submit a portfolio containing three essays.

### Interdisciplinary Certificate in Social Science and Health

The purpose of this certificate is to supplement the disciplinary major of students who wish to pursue careers in the field of health and health care by enhancing the breadth, quality, and coherence of their education through taking health-related courses in a variety of different academic disciplines. A more complete description and the requirements are described under the Department of Sociology.

## Graduate Study

The department has three different graduate degree programs: master's degree Plan A, for which a master's thesis is required; master's degree Plan B, for which a culminating experience is required; and the doctor of philosophy (PhD) program. The department offers specializations in alternative futures, Asian and Pacific politics, comparative politics, international relations, political theory, indigenous politics, and public policy.

Further information regarding the requirements for all three programs is available at [www.politicalscience.hawaii.edu](http://www.politicalscience.hawaii.edu).

The application deadline is **December 1** for admission in the fall semester. NO SPRING semester admissions are taken.

### Master's Degree

The department offers MA Plan A (thesis) and Plan B (culminating experience) degrees that can be tailored to a student's interests and needs. The MA program invites applicants who are prepared to think critically and constructively about political phenomena. All MA students are required to take three of the following courses regardless of program (Plan A or Plan B): POLS 610, 620, 630, 640, 650, 660, 670, and 680.

### Doctoral Degree

The department's PhD program encourages students to pursue specialized interests as well as to broaden their under-

standing of political phenomena. The department looks for students who are prepared to construct a successful course of study based on their individual interests, in conjunction with appropriate advising and course work. We encourage applicants who approach political questions in a critical and creative manner and who combine work from different specializations and disciplines to pursue their own particular projects.

## Honors and Awards

The department has several teaching assistantships, research assistantships, and scholarships that are awarded to deserving qualified students.

### Undergraduate

- Thomas Hamilton Memorial Scholarship—\$600 for a student with outstanding scholarship and all-around performance who has completed at least two courses in political theory.
- Carl Knobloch Prize Fund—\$500 for a student with an excellent academic record who also has an outstanding record of community and/or UH service.

### Graduate

- Norman Meller Award—\$1,500 for fall semester to a graduate student with an outstanding academic record.
- Harry J. Friedman Memorial Scholarship—\$700 for outstanding work in comparative politics.
- Jorge Fernandes Memorial Fellowship and Award—for spring semester to aid an outstanding graduate student to support the completion of his/her dissertation.
- Glendon Schubert and James Neal Schubert Political Science Endowed Scholarship—for spring to a graduate student who specializes in public law, law and society.

## Psychology

College of Social Sciences  
Sakamaki C-400  
2530 Dole Street  
Honolulu, HI 96822  
Tel: (808) 956-8414

### Faculty

- \*A. E. Maynard, PhD (Chair)—developmental, cultural, siblings and socialization, cognitive change
- \*C. K. Baker, PhD—community, intervention development and evaluation, domestic violence, teen dating violence
- \*J. Barile, PhD—community, neighborhood environments, health equity, quality of life and well-being
- \*D. Cicero, PhD—clinical, experimental psychopathology, psychosis, risk for schizophrenia
- \*P. A. Couvillon, PhD—behavioral neuroscience, animal learning, cognition
- \*L. A. A. Dumas, PhD—cognitive, analogy, computational models of cognition, mental representation, the development of structured thought
- \*F. J. Floyd, PhD—clinical, family and couple relationships, developmental disabilities, sexual minority growth

- \*B. N. Frazier, PhD—children's cognitive development
- \*E. H. Hatfield, PhD—social, emotions, social-psychophysiology
- \*K. Hayashi, PhD—quantitative psychology and psychometrics
- \*E. M. Heiby, PhD—clinical depression, compliance assessment, integrated behavioral theory
- \*L. A. James, PhD—social-personality, library skills, psycholinguistics
- \*J. Latner, PhD—understanding and treatment of obesity and eating disorders
- \*C. W. Mueller, PhD—child clinical, social, HIV, and health
- \*B. J. Nakamura, PhD—clinical, youth anxiety, dissemination of evidence-based practices
- \*K. Pauker, PhD—social intergroup relations, stereotyping, social perception
- \*S. C. Sinnett, PhD—cognitive, mechanisms of attention and perception
- \*C. H. Sophian, PhD—developmental, cognitive development in children
- \*L. K. Takahashi, PhD—behavioral neuroscience
- \*K. M. Vitousek, PhD—clinical, cognitive behavioral approaches, eating disorders, caloric restriction for longevity
- \*Y. Xu, PhD—children's social development and culture

### Cooperating Graduate Faculty

- D. Bhawuk, PhD—culture and community
- R. W. Brislin, PhD—social-personality
- P. W. Dowrick, PhD—video research
- E. S. Hishinuma, PhD—health, cross-cultural
- J. K. Kaholokula, PhD—Native Hawaiian Health
- P. E. Nachtigall, PhD—marine mammal behavior
- L. A. Yamauchi, PhD—educational psychology

### Affiliate Graduate Faculty

- B. F. Chorpita, PhD—clinical childhood anxiety disorders
- D. Landis, PhD—psychology
- A. Pack, PhD—marine mammal behavior
- J. E. Schiffman, PhD—child clinical
- W. G. Stephan, PhD—social psychology
- W. T. Tsushima, PhD—neuropsychology

**Degrees and Certificate Offered:** BA in psychology, BS in psychology, MA in psychology, PhD in psychology, Certificate in Clinical Psychology (Respecialization)

### The Academic Program

Psychology (PSY) can be defined as the science of mind and behavior. Some psychology majors are preparing to enter graduate school, where they will be trained to become professional psychologists and scholars. Others use psychology as a pre-professional major for other fields, such as law or medicine. The majority of psychology majors, however, are using psychology as a general interdisciplinary arts major. Psychology is qualified as a discipline for this purpose. An understanding of the spectrum of psychological knowledge, methods, and concepts facilitates and enhances productivity in virtually every area of human endeavor. This understanding also promotes interpersonal skills and sensitivities, as well as critical thinking skills. Collectively, these understandings foster a respect for others, which is a core element of the curriculum of the psychology department.

UH Mānoa is fortunate in having a psychology department composed of an unusually large number of internationally recognized figures in the field. Not only do students get to learn from these scholars in the classroom, but many receive direct training in cutting-edge research and the application of psycho-

logical knowledge. Areas of concentration include behavioral neuroscience; clinical studies (APA accredited); community and cultural psychology; developmental psychology; experimental psychopathology; social-personality; and cognition.

## Undergraduate Study

### Bachelor's Degree

#### Pre-major BA and BS Degree Requirements

Students must complete one course in methodology (PSY 212) and one course in statistics (PSY 225 or SOCS 225) with a minimum grade of C (not C-) and attend one major meeting. In addition, a minimum overall entry GPA of 2.5 in all PSY UH Mānoa course work (including PSY 100 and any transfer PSY courses) is required to declare psychology as a major.

#### BA Degree Requirements (minimum 36 credits, 15 earned at UH Mānoa)

In addition to completion of PSY 212 and PSY 225 or SOCS 225, students must complete 30 credit hours, including:

- 15 credits at the upper division level (300 level and above)
- One course from three of these four psychology foundation areas:
  - Experimental (PSY X2X courses), e.g., PSY 220, 322, 324
  - Psychobiology (PSY X3X courses), e.g., PSY 230, 331, 333
  - Developmental (PSY X4X courses), e.g., PSY 240, 341, 342
  - Social or Personality (PSY X5X or PSY X6X courses), e.g., PSY 250, 260, 352
- 3 credit hours in the advanced topic series (PSY 4X9, many 4X9 courses are designated as Writing Intensive), excluding PSY 499)

A minimum exit GPA of 2.0 in psychology must be maintained for graduation. PSY 100 is a prerequisite to all other courses except PSY 170 and may be counted toward the major and the diversification social sciences (DS) core requirement. No more than a combined total of 15 credits of practicum (PSY 407), teaching (PSY 408), and directed research (PSY 499) may be counted for the major; no more than 9 credit hours in PSY 499 may be counted. Only 3 credit hours in PSY 499 can be used to fulfill the requirement of 15 credit hours at the upper division level. Nevertheless, students intending to do graduate work are encouraged to enroll in PSY 499 and in PSY 408 or 478.

#### BS Degree Requirements (minimum 42 credits, 21 earned at UH Mānoa)

In addition to completion of PSY 212 and PSY 225 or SOCS 225, students must complete one year of Biology\* and 18 credits at the 300 and above level, including:

- one additional PSY 4X9 advanced focus (W, O, etc.) seminar (3 credits)
- two semesters of directed research PSY 499 (6 credits)
- one 3-credit course in Statistics, e.g., PSY 419, 610, or 611 is highly recommended in their senior year
- BIOL 171/171L (4 credits)
- and either BIOL 172/172L (4 credits) or PSY 331 or 333 (3 credits)

A minimum exit GPA of 2.5 in psychology must be maintained for graduation.

New majors should seek assistance from the Undergraduate Advising Office in Sakamaki D409 (psychadv@hawaii.edu)

or consult with Lorey K. Takahashi, Chair of Undergraduate Studies (LKT@hawaii.edu), as soon as possible for advising. Additional information can be found at [www.psychology.hawaii.edu](http://www.psychology.hawaii.edu).

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Graduate Study

The graduate program in psychology is designed to provide students with a strong background in theory, research methodology, and psychological issues. Currently, there are 7 concentrations in which students can receive specialized training: behavioral neuroscience; clinical studies; community and cultural psychology; developmental psychology; experimental psychopathology; social-personality; and cognition. Specific details concerning each of the concentrations, their requirements, and faculty research interests may be obtained in one of four ways: (a) by writing to the Department of Psychology, University of Hawai'i, 2530 Dole Street, Honolulu, HI 96822; (b) by faxing your request to (808) 956-4700; (c) by sending an email communication to the Chair of Graduate Studies (gradpsy@hawaii.edu); or (d) by accessing the department's website at [www.psychology.hawaii.edu](http://www.psychology.hawaii.edu).

Applications are considered only for the fall semester. Applicants should normally possess a bachelor's degree, have a minimum of 24 credit hours of undergraduate work in psychology (including courses in basic psychology such as research methodology, statistics, learning, abnormal, social, developmental, personality, cognition, and physiological psychology), a cumulative grade point average of at least 3.0, strong letters of recommendation from professors, competitive general GRE scores (past applicants admitted as graduate students in the department tend to score at or above the 600 level on the various sub-domains of the GRE), and preferably one to two years of research experience.

One can apply online at [apply.hawaii.edu/](http://apply.hawaii.edu/) or obtain materials relevant to the application process at [www.manoa.hawaii.edu/graduate/](http://www.manoa.hawaii.edu/graduate/). Completed applications must be received by the Graduate Division no later than **December 1** each year, with the exception of GRE scores (which can arrive during the month of January).

### Master's Degree

The master's degree program includes a thesis and at least 30 credit hours of courses specified by the department and specific area of concentration. Detailed descriptions of specific requirements for each area of concentration are contained in the department webpage. The department does not offer a terminal master's degree program in psychology. Only students interested in pursuing a PhD degree are considered for admission. Students with a BA degree are admitted to the master's program and, upon successful completion, petition for entry into the doctoral program.

### Doctoral Degree

Students must complete their master's degree (from UH Mānoa or another accredited institution of higher learning) prior to entering the doctoral program in psychology at UH Mānoa. Specific course work and other relevant departmental and concentration specific classes are required for the doctoral degree. Students must pass comprehensive examinations before proceeding to the dissertation.

## **Certificate Program in Clinical Psychology (Respecialization)**

The Clinical Studies Respecialization Program provides clinical training for individuals holding a PhD in a basic area of psychology from a regionally accredited university (or foreign equivalent). Individuals who are already licensed in psychology or who hold an applied degree (e.g., EdD, PsyD) are not appropriate for this program. Upon satisfactory completion of core clinical courses, practica, and internship, the Respecialization student receives a certificate from the Graduate Division and is competitive for clinical research and teaching positions as well as eligible to sit for licensure in most states. The Clinical Studies Program is APA-approved and follows a scientist-practitioner, broadly-behavioral, dual specialty approach to training in which it is encouraged of all graduate and respecialization students to integrate the literatures of a basic area of psychology with related clinical phenomena.

For further details of this certificate, please see [www.psychology.hawaii.edu/concentrations/clinical-psychology.html](http://www.psychology.hawaii.edu/concentrations/clinical-psychology.html).

\*R. Pratt, PhD—political science

### **Cooperating Graduate Faculty**

T. Brislin, PhD—Academy for Creative Media

### **Adjunct Faculty**

P. Martin, JD  
R. Alm, JD

**Degree and Certificate Offered:** MPA, Graduate Certificate in Public Administration

## **The Academic Program**

The Public Administration Program (PUBA) builds leadership in public service in Hawai'i and the Asia-Pacific region. Located in the College of Social Sciences, it offers a 30-credit master's degree and a 15-credit certificate. The program's format emphasizes interdisciplinary learning, collaborative teaching, and the development of close relationships among participants. It creates an environment in which many of the complex issues facing those with public responsibilities are addressed while also giving participants specific skills useful to their work.

Financial support for the degree and the certificate is available through the Herman S. Doi Fellowship and the Pacific Island Health Administration Scholarship. For further information, contact the program office in Saunders Hall 631 or call (808) 956-8260. Applicants may also apply to the East-West Center.

## **Graduate Study**

### **Master's Degree**

The master's degree consists of a core year, an individualized concentration, a practicum experience, and a capstone. The core year and capstone must be taken first and last in the program, respectively. Once the program begins in the fall, new admissions are not made until the following year.

The core year is an integrated, collaboratively taught curriculum offered in a format that balances lecture and discussion sessions. The curriculum is highly interdisciplinary and integrates a series of perspectives and skills important to effective work in public service. These include communications, the political context of public institutions, economic processes, public ethics, budget and policy processes, administrative law, bureaucratic structure and organizational change, and the role of personal and organizational culture.

The individualized concentration is intended to balance the common work of the core year. It allows each student to design a program of study built around a theme of special personal and professional interest. The concentration is satisfied by completion of 9 credit hours in course work, directed reading, or directed research. Themes are created by the student working in conjunction with a faculty advisor. Anyone electing the thesis (Plan A) option may substitute thesis work for concentration credits with approval of the faculty advisor. The thesis option requires the student to take at least one graduate level research methods course.

The practicum is designed to place individuals in a setting where they may compare organizational structure and processes, study leadership styles, understand community dynamics, gain an international perspective, or develop specific skills. The location of the practicum varies according to the student's learning goals. In some cases placement in one organization may be modified to become work on a project that takes place across several organizations. Students are encouraged to undertake a practicum that will have the greatest personal and professional benefits.

The capstone consists of a 1-credit planning seminar, taken during the semester preceding that in which graduation will occur, and the concluding 3-credit seminar. The focus of the capstone is on group analysis of a public issue of importance in Hawai'i and the Asia-Pacific region.

The program welcomes a diversity of professional and educational backgrounds and sees these as contributing to the learning environment. The course work is compatible with the schedules of people working full-time.

### **Requirements**

MPA candidates must complete 14 credit hours of core requirements, 9 credit hours of individual concentration, 3 credit hours of practicum, and 4 credit hours of capstone. The student must earn at least a grade of B in the practicum and both capstone courses. The thesis option may be selected to replace some or all of the concentration credits.

## Other

Up to nine credits of the MPA degree can be counted toward graduate certificates in related fields. Call the program for additional information.

## Certificate in Public Administration

The program offers two certificate tracks: (1) public service leadership, and (2) nonprofit management. Each is 15 credits.

The track in public service leadership consists of the 14-credit core year, plus a 1-credit applied professional development seminar, co-designed by those in the certificate program working with an advisor, and taken in the second semester of the core year. The core year surveys issues facing those in public service while providing skills for addressing those issues.

The track in nonprofit management is made up of two 3-credit core courses that provide an overview of issues in the field; 6 credits of electives; a 3-credit practicum.

Courses in both tracks are compatible with working schedules, and each utilizes a cohort model to enhance learning. The nonprofit management certificate may be taken in conjunction with the master of public administration (MPA) degree. The track in public service leadership shares the degree's core year and some restrictions apply to how it can be counted toward the degree.

## Public Policy Center

College of Social Sciences  
Saunders Hall 723  
2424 Maile Way  
Honolulu, HI 96822  
Tel: (808) 956-4237  
Fax: (808) 956-0950  
Email: dcsakai@hawaii.edu  
Web: www.publicpolicycenter.hawaii.edu

## Faculty

\*S. Chandler, PhD (Director)—policy analysis, child welfare, collaborative management, public administration

S. Moriwaki, PhD (Associate Director)—energy policy, sustainability, community development

\*M. Johansen, PhD—non-profit research, public management, educational policy, public policy

## Cooperating Graduate Faculty

The Public Policy Center has 53 affiliate faculty representing all of the departments within the College of Social Sciences. See our website for their names and contact information, as well as their fields of interest, research, and areas of teaching.

## The Academic Program

The mission of the Public Policy Center is to enhance the quality of community life throughout Hawai'i, the U.S., and the Asia-Pacific region. This mission is achieved through an interdisciplinary approach to teaching, research, service, and application. The center provides opportunities for students to expand their knowledge and gain experience in public policy. Its premise is that public policy analyses are critical to sound public policy decision-making and that teaching and scholarly work are intertwined and should be continually linked to the

community beneficiaries. Public policy is a discipline that seeks to solve public problems through the design, analysis, and advocacy of well thought out, evidence-based research. In all levels of government and globally, public needs and limited resources require policy choices that are economically efficient, socially and technically effective, politically and administratively responsive. Such choices exist across a broad range of critical issues, including health, education, the environment, energy, economic development, social welfare policy, and community resilience. Students with experience and knowledge about public policy offer their community essential and meaningful skills and tools needed to analyze, design, and evaluate public policy choices. Students trained with these skills are attractive to employers in the public, nonprofit, and business sectors.

## Courses in Public Policy

Students can select courses from a wide range of fields in addition to those offered by the Public Policy Center, including: political science, economics, public administration, urban and regional planning, peace studies and conflict resolution.

## Related Courses

- PPC 301 Governing, Politics, and Public Policy (3)
- PPC 330 Survey of Public Policy and Analysis (3)\*
- PPC 695 Topics in Public Policy (3)\*
  - (1) Introduction to Public Policy and Analysis\*
- POLS 670 Introduction to Public Policy (3)
- PUBA 662 Applied Policy Analysis (3)
- PLAN 603 Economic Analysis for Urban Planning and Policy (3)

\*Taught on-line in the summer session

## Cooperating Graduate Faculty

G. D. Panisnick, PhD—Western religions

**Degrees Offered:** Undergraduate Certificate in Islamic Studies, BA (including minor) in religion, MA in religion

## The Academic Program

In keeping with the goals of UH Mānoa, the Department of Religion takes advantage of the state’s strong social and cultural ties with Asia and the Pacific and seeks to enhance those ties. Within this extraordinary multicultural milieu, the Department of Religion serves as a link between the academic community and the many Asian and Pacific religious communities that flourish in Hawai‘i. Most of the major religious traditions—Buddhism, Christianity, Confucianism, Hinduism, Islam, Judaism, Shinto, Taoism, as well as Hawaiian and Polynesian religions—are represented and make Hawai‘i an ideal site and context for a study of Asian and Pacific religious communities and activities.

The Department of Religion is dedicated to the cultivation of a humanistic understanding of a wide range of religious traditions, ritual practices, philosophical speculations, ethical imperatives, and institutional histories. Its investigative approach is interdisciplinary and intercultural.

## Undergraduate Study

### Bachelor’s Degree

Undergraduate education in religion includes survey courses in Western, Asian, and Pacific religions. There are also thematic courses dealing with such issues as sexuality and death, politics and ethics, and the relationship between religion and other disciplines, such as anthropology, medicine, political science, and sociology.

### Requirements

Students must complete 30 credit hours in religion, including at least 18 credit hours in 300- and 400-level courses. A

minimum 2.5 GPA in religion courses must be maintained for graduation. Required course: REL 300.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Minor

### Requirements

Students must complete 15 credit hours at the 300 level and above. Required course: REL 300.

## Undergraduate Certificate in Islamic Studies

The purpose of this certificate is to increase understanding of Islam as a world religion through critical analysis of primary and secondary materials, to foster knowledge about the complexity among Islamic societies and their diverse cultural expressions, and to explore the role of Islam and Muslims in present and past world affairs.

This certificate is housed within the College of Arts and Humanities. The participating departments are Art and Art History, History, Philosophy, and Religion. Minimum prerequisites for acceptance into the program for undergraduates are sophomore or higher standing with a minimum GPA of 2.5 and the completion of at least one introductory course within one of the four participating departments with a grade of B or better.

A more complete description and the requirements are described under the Department of Philosophy.

## Graduate Study

### Master’s Degree

The department has developed two graduate program plans leading to the MA degree: a thesis-based MA program (Plan A) and a non-thesis track (Plan B). Both Plans A and B are two-year programs.

### Admission Requirements

Applicants to the MA program in religion must hold a bachelor’s degree from an accredited U.S. college, university, or its equivalent from a recognized foreign institution of higher learning. Applicants should include in the Statement of Objectives an explanation of how their academic background has prepared them for study in the religion MA program.

### Plan A

The thesis program provides students with an opportunity for graduate study in Asian or Polynesian religions. 30 credits are required.

Advancement to Candidacy: Candidacy may be granted after the first semester after completing 9 graduate credits plus REL 600 with a GPA of 3.0 or better (total 12 credits) and the language requirement.

### Required courses (9 credits)

- REL 600 History and Theory of the Study of Religion (3)
- REL 700 Thesis Research (3, 3)

### Area requirements (9 credits minimum)

Students must take at least three 600-level courses in their area of specialization (Asian or Polynesian).

### Electives

Electives consist of any Religion course (400 level and above, excluding 499), other than those that fulfill program and area requirements. Two complementary graduate courses (3 credits

each) from other disciplines may be accepted at the discretion of the thesis advisor and graduate chair. No more than two 400-level courses may be used to satisfy this requirement.

### Language

To achieve a mastery of language at the second-year level, students are required to complete two years of a language appropriate to their field of specialization (e.g., Chinese, Hawaiian, Hindi, Japanese, Sanskrit, Samoan, Tahitian, or another Asian or Polynesian language approved by the area advisor) with a minimum B-minus grade in the fourth semester of class.

This language requirement will be waived for students demonstrating language proficiency by an equivalency exam. These exams will be set by the student's advisor and assessed by two faculty readers (one from the Department of Religion and one from the department in which the language is taught).

Language courses will not count towards the 30 credits required for an MA in religion.

### Thesis (REL 700)

A maximum of 3 credits per semester for a total of 6 credits of REL 700, usually taken over two semesters is required. Students must be admitted to candidacy and must complete 12 credits before they can register for REL 700.

Completion of an original thesis, demonstrating a mastery of advanced research, analytic, and discursive skills, is required of all students in Plan A.

Each candidate must form a committee of three members of the graduate faculty, one of whom is from outside the department. Faculty reserve the right not to serve on a thesis committee.

After submission of a completed thesis to the committee for its consideration, the candidate must be present for the final oral examination on the subject of the thesis.

After all revisions as determined by the thesis committee have been incorporated and the thesis is in final form, the majority of the committee, including the chairperson, passes the student for the master's degree. A candidate who fails may be re-examined once, provided it is done within one calendar year of the initial examination.

After a candidate has taken 6 credits of 700, the candidate must register for 1 credit of 700 in subsequent semesters and in the semester of graduation.

One bound copy of the approved thesis shall go on file in the department office and must be submitted to the department office at the same time the final thesis is deposited with the Office of Graduate Education.

### Plan B

The Plan B degree program provides students with a non-thesis opportunity for graduate research and study in Asian or Polynesian religions. Plan B is designed for students who wish to articulate the results of their research in innovative ways using various available technologies. In place of a thesis, the culminating requirement is a Plan B Project, an original research project as described below. 30 credits are required.

#### Master's Plan B Procedures

1. Preliminary conference with the graduate chair for the purpose of determining an advisor, proposed courses to fulfill the requirements, and the foreign language for the degree.
2. Candidacy for Plan B students requires a memo from the graduate chair indicating that 12 graduate credits, including REL 600, have been taken with a GPA of 3.0 or better and that the student has prepared a preliminary proposal and secured the support of two graduate faculty members from

the Department of Religion to serve on their committee.

Committee members will have the responsibility of approving, supervising, and evaluating the project as completed in REL 688 (Plan B Research).

3. Completion of a research project demonstrating a critical understanding of religion in a particular area of Asia or the Pacific or of a topic within the overall region. The project should reveal original insights into selected religious phenomena or area of concentration. Students will be expected to present the results of their research in innovative ways that utilize the arts, various media, or developing technologies, and thereby show their relevance to scholarly discourse. Research projects will be presented in a public forum during the student's final semester.

#### Required courses (6 credits)

- REL 600 History and Theory of the Study of Religion (3)
- REL 688 Plan B Research

#### Area requirements (9 credits)

Students must take at least three 600 level courses in a particular region of Asian or in Polynesian religions.

#### Electives (15 credits)

Electives consist of any religion course (400 level and above, excluding 499), other than those that fulfill program and area requirements. Two complementary graduate courses (3 credits each) from other disciplines may be accepted at the discretion of the advisor and graduate chair. No more than two 400-level courses may be used to satisfy this requirement.

### Language

To achieve mastery of a language at the second-year level, students are required to complete two years of a language appropriate to their area of specialization (e.g., Chinese, Hawaiian, Hindi, Japanese, Sanskrit, Samoan, Tahitian, or another Asian or Polynesian language approved by the area advisor) with a minimum B-minus grade in the fourth semester of class.

This language requirement will be waived for students demonstrating language proficiency by an equivalency exam. These exams will be set by the student's advisor and assessed by two faculty readers (one from the religion department and one from the department in which the language is taught). Language courses will not count toward the 30 credits required for an MA in religion.

## Russian Area Studies

College of Languages, Linguistics and Literature

Moore 489

1890 East-West Road

Honolulu, HI 96822

Tel: (808) 956-4165

Web: [manoa.hawaii.edu/llea/?page\\_id=33](http://manoa.hawaii.edu/llea/?page_id=33)

**Certificate Offered:** Undergraduate Certificate in Russian Area Studies

To receive a Certificate in Russian Area Studies, a student must complete certain requirements in addition to a regular major. These are advanced reading and conversation courses in Russian, equivalent to at least the third-year level, and 9 credit hours of work, exclusive of courses taken as part of the major, chosen from an approved list of courses. For more information,

contact Professor Virginia Bennett, Department of Languages and Literatures of Europe and the Americas, 489 Moore Hall, bennett@hawaii.edu or (808) 956-4165.

## Second Language Studies

College of Languages, Linguistics and Literature  
Moore 570  
1890 East-West Road  
Honolulu, HI 96822  
Tel: (808) 956-9010  
Fax: (808) 956-2802  
Web: www.hawaii.edu/sls

### Faculty

- \*G. Crookes, PhD (Chair)—classroom teaching, classroom-centered research, materials and syllabus design
- \*G. Kasper, Dr. phil. (Graduate Chair)—language and social interaction, qualitative research
- \*R. Bley-Vroman, PhD—English syntax, second-language analysis, formal models of language acquisition
- \*J. D. Brown, PhD—language testing, research methods, curriculum design
- \*K. Davis, PhD—qualitative research methods, language policy and planning, literacy, bilingual education
- \*R. Day, PhD—teacher education, teaching of reading, vocabulary, materials development, literature
- E. Gilliland, PhD—writing studies, adolescent literacy, teacher education, qualitative research methods, discourse analysis
- \*T. Grüter, PhD—morphosyntax and semantics, developmental psycholinguistics, language processing, bilingualism
- \*C. Higgins, PhD—macro- and micro-sociolinguistics, qualitative research methods, discourse analysis, code-switching
- \*T. Hudson, PhD—language testing, reading, methods and materials, English for specific purposes, research methods
- \*L. Onnis, PhD—statistical learning, enhancement of learning and training based on cognitive science findings, computational modeling and corpus-based analyses, monolingual and bilingual sentence processing, language evolution
- \*B. D. Schwartz, PhD—linguistic theory and second language acquisition, second language analysis, second language processing, child second language acquisition
- \*D. Zheng, PhD—cognition and instruction, second language technology and pedagogy, bilingual education, instructional media
- N. Ziegler, PhD—second language acquisition, interaction, corrective feedback, task-based language teaching, synchronous computer mediated communication, Maritime English (English as a lingua franca, English for specific purposes in the commercial shipping industry)

### PhD in SLS Faculty Outside the SLS Department

- F. Bail, PhD—Human learning and development, instructional formats
- J. M. Bilmes, PhD—cognitive anthropology, human communication, decision-making, conversation analysis, Southeast Asia
- H. Cook, PhD—Japanese sociolinguistics, discourse analysis, language socialization and pragmatics
- K. Kanno, PhD—Japanese SLA, pedagogical grammar, language analysis
- K. Kondo-Brown, PhD—heritage language learning, assessment, Japanese language learning

W. O'Grady, PhD—syntax, first and second language acquisition, Korean

K. Rehg, PhD—phonology, bilingual education, Micronesian linguistics

### Cooperating Graduate Faculty

- M. González-Lloret, PhD—second language acquisition, technology and language instruction, Spanish linguistics, pragmatics
- A. J. Schafer, PhD—sentence comprehension and production across languages (including Korean, Japanese, and Austronesian languages); sentence prosody; information structure; psycholinguistic approaches to language documentation and conservation

### Affiliate Graduate Faculty

- E. Hauser, PhD—conversation analysis
- S. McKay, PhD—English as an international language, SL methods and materials, macro-sociolinguistics
- H. T. Nguyen, PhD—interactional competence, classroom discourse, conversation analysis
- J. Norris, PhD—language program evaluation
- L. Ortega, PhD—second language acquisition
- R. Schmidt, PhD—(Emeritus) second language acquisition

**Degrees Offered:** BA in second language studies, MA in second language studies, PhD in second language studies, Advanced Graduate Certificate in Second Language Studies

### The Academic Program

The SLS department's programs prepare students for professional and academic careers in second language and multilingual settings, including but not limited to language education. Through course work and independent research, students acquire a broad knowledge base and familiarity with a range of research approaches and an understanding of ethics and professionalism in second language studies.

Employment opportunities have expanded nationally and internationally to include various types of educational and occupational institutions. In addition to language education and administration at all levels, employment opportunities extend to such domains as publishing, test development for international agencies, and language training programs for businesses.

The department, whose MA program dates back to 1961, is regarded as one of the most prestigious second language programs worldwide. Offerings comprise a wide range of general and specialized courses. SLS faculty members are well respected nationally and internationally through their research, publications, and leadership roles at national and international levels. The department has excellent library resources. It attracts top-quality students and maintains a variety of services and activities that stimulates a high level of student satisfaction and collaboration, including post-graduation employment advice and assistance.

SLS faculty members (J. D. Brown, G. Kasper, and R. Schmidt) have served on the executive boards of the American Association for Applied Linguistics and the Teachers of English to Speakers of Other Languages International Association. Department faculty are also past and present editors of the international journals *Applied Linguistics* (G. Kasper) and *Reading in a Foreign Language* (R. Day, T. Hudson), and have been actively involved in the organizing boards of the Second Language Research Forum and the Pacific Second Language Research Forum.

## Undergraduate Study

### Bachelor's Degree

The Bachelor of Arts degree program in second language studies provides students with a comprehensive understanding of a wide range of issues related to how second and foreign languages are learned, taught, and used in local and global contexts. This program, in accord with the values of SLS graduate degree programs, takes the broad view that plurilingual and pluricultural societies have greater success at communication in and across languages, which enables mutual understanding and appreciation, conflict resolution, and negotiation of values.

The program addresses theory, research, and practice, and helps prepare students to become second language specialists who understand the nature of second language learning and use in diverse circumstances, and are able to act upon related challenges that emerge in a variety of settings. The BA in SLS also serves as an excellent preparation for entry into a variety of language-related graduate programs.

### Requirements

Students must complete 33 credit hours of upper division courses, including:

- 24 credit hours of required courses: SLS 302, 303, 380, 430, 441, 480(alpha), 485, and 490
- 9 credit hours of elective courses: 300-499 courses from SLS, or 300-499 courses from other departments (as approved by an SLS advisor)

For more information about the BA degree in SLS, see [www.hawaii.edu/sls/ba/](http://www.hawaii.edu/sls/ba/) and contact the department's undergraduate coordinator. Newly declared majors should make appointments with the SLS coordinator as soon as possible.

### Graduate Study

The department offers an MA degree in second language studies, an Advanced Graduate Certificate in second language studies, and a PhD degree in second language studies. The MA and PhD degree programs are recognized Western Interstate Commission for Higher Education (WICHE) regional graduate programs. Residents of Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming are eligible, upon admission with a GPA of 3.50 or higher, to enroll at Hawai'i resident tuition rates. See the "Tuition, Fees, & Financial Aid" section of this *Catalog* for more information on WICHE programs.

### Master's Degree

The main goal of the Master of Arts degree program is to serve the needs of prospective and practicing teachers, administrators, and researchers in the area of second and foreign language studies. Attention is given to the areas of second and foreign language acquisition, applied psycholinguistics, second language use, second language research, bilingual education, curriculum development, and teacher education, among others.

The program emphasizes theory as well as practice. In addition to the courses dealing with approaches to language teaching, materials, and testing, core courses are concerned with the linguistic, psychological, and sociological aspects of language and language learning. The core courses, which are primarily theoretical, are designed to provide an essential foundation on which the more practically oriented courses can build.

The MA in SLS does not result in teaching certification. Contact the College of Education for information regarding State of Hawai'i teacher certification.

Entry into the MA program is possible in both the fall and spring semesters. The GRE is required for all MA in SLS applicants whose first language is English or who are exempt from taking the TOEFL or IELTS. Most applicants whose first language is not English are required to take the TOEFL or the IELTS.

Application materials are required for both the UH Mānoa Office of Graduate Education and for the Department of Second Language Studies. For details about how to apply, see: [www.hawaii.edu/sls/sls/admissions/ma/](http://www.hawaii.edu/sls/sls/admissions/ma/).

### Requirements

All students in the MA program, whether Plan A, Plan B, or Plan C, are expected to have undergone second or foreign language learning (two years of college study or equivalent). Students who have not had such experience before entering the program are required to take at least a semester of language study, which does not count toward the 36-credit MA.

### Plan A (Thesis) Requirements

- Four core courses (12 credits): SLS 441, 600, 650, 660
- One core seminar (3 credits): SLS 730, 750, 760, or 775
- Five electives approved by the advisor (15 credits)
- SLS 700 thesis research (6 credits)

### Plan B (Non-thesis) Requirements

- Four core courses (12 credits): SLS 441, 600, 650, 660
- One core seminar (3 credits): SLS 730, 750, 760, or 775
- Seven electives approved by the advisor (21 credits)
- Submission of an acceptable scholarly paper

### Plan C Requirements

Plan C is an individually planned program for established language scholars who wish to pursue an additional degree. For admission requirements, contact the Graduate Chair.

### Specialization

As an option, the 36-credit MA program allows students to concentrate in a particular area of specialization. Each specialization requires a distinct selection of four courses from among various electives, as well as a related core seminar. Five areas of specialization are available:

- Critical second language studies
- Language assessment, measurement, and program evaluation
- Language and social interaction
- Language teaching ("English" can be designated)
- Second language acquisition

For further information about these specializations and the MA program, see: [www.hawaii.edu/sls/sls/programs/masters/](http://www.hawaii.edu/sls/sls/programs/masters/).

### Advanced Graduate Certificate

The Advanced Graduate Certificate program in second language studies provides advanced training to those who already have a graduate degree (master's or doctorate) in applied linguistics, foreign languages, ESL, or related fields. The program is specifically aimed at those who wish to re-specialize or to update their training to include recent developments in the field. Applicants must have completed an MA or PhD degree in an appropriate field, or they must be a continuing student in an MA or PhD program in an appropriate field at UH Mānoa before entering the certificate program. Graduate students

enrolled in other programs at UH Mānoa are permitted to apply for the certificate while they concurrently complete another graduate degree. For specific information and guidelines on the AGC application process, see: [www.hawaii.edu/sls/sls/admissions/agc/](http://www.hawaii.edu/sls/sls/admissions/agc/).

The course of study typically lasts about two semesters and includes 15 credits (five courses) and a research paper (scholarly paper) to be produced during the program. Transfer credits are not applicable toward graduate certificate requirements. However, up to six UH Mānoa PBU credits may be applied. Students who complete the graduate certificate in SLS will obtain knowledge and skills in second language studies with possibilities including second language analysis, learning, pedagogy, and use, in utilization of research findings, and application of research methods.

As a culminating activity in the program, students are required to submit a paper that demonstrates the student's ability to conduct independent, high-quality scholarly research. This paper must be new research (i.e., different from prior MA-level work) conducted under the supervision of the program's faculty.

### Doctoral Degree

The PhD program in second language studies at UH Mānoa was established in 1988. The graduate faculty of the PhD program comprises all members of the SLS faculty, as well as faculty members of the Departments of Anthropology, East Asian Languages and Literatures, and Linguistics.

The courses in the program are organized into four areas of specialization:

1. Second language analysis—Structural analysis of learners' language development; comparison of native and nonnative languages; second language varieties; differences arising from social and geographical contexts; phonological, grammatical, and discursive properties; typological factors; putative universals.
2. Second language learning—Studies of the biological, psychological, social, and cultural factors in the language learning process; the role of universals; interlanguage; processes of comprehension and production.
3. Second language use—Studies of social functions of second and foreign languages; pidgins, creoles, and dialect variation; roles of social and geographical contexts; pragmatics; discourse analysis; cross-cultural and interethnic communication; sociopolitical factors; language policy and planning.
4. Second language pedagogy—Research into learners' language needs (including immigrant needs); formulation of needs-based curriculum objectives and syllabi; task-based and content-based language teaching; computer-aided instruction; program administration; evaluation and language assessment; critical pedagogy.

The basic requirement for admission into the PhD program is the completion of an MA in second language studies, applied linguistics, or second or foreign language education. Applicants with graduate degrees in related disciplines such as anthropology, education, modern languages, linguistics, and psychology are also welcome.

Entry into the PhD program is possible in both the fall and spring semesters. The GRE is required for all PhD program applicants. Most applicants whose first language is not English are required to take the TOEFL or the IELTS. Additionally,

those required to take the TOEFL or IELTS have the following minimum scores to work as a teaching graduate assistant (GA): 600 TOEFL PBT; 250 TOEFL CBT; 100 TOEFL iBT, with subtest scores 25 listening and 25 speaking; 7.0 IELTS.

Prospective PhD students are automatically considered for a graduate assistantship at the time of application. Each year, four years of guaranteed funding are offered to the four most qualified applicants to the PhD in SLS program, pending availability of funds.

Application materials are required for both the UH Mānoa Office of Graduate Education and for the Department of Second Language Studies. For details about how to apply, go to: [www.hawaii.edu/sls/sls/admissions/phd/](http://www.hawaii.edu/sls/sls/admissions/phd/).

### Requirements

Students work closely with their advisors and doctoral committees in defining their individualized programs. In order to establish a common core of expertise among students, specific courses are designated according to the background of each student. The basic preparation expected as part of PhD students' MA training is at least one graduate-level course in each of the four areas of specialization. Beyond basic preparation, each doctoral student's program must include a minimum of two graduate-level courses in three of the four areas of specialization and a minimum of two graduate-level courses in research methods. At least two seminars (700-level) are required.

Doctoral candidates must pass a comprehensive examination before the dissertation, and a final oral examination defending the dissertation.

Students must also document and reflect on substantial, diverse learning experiences in two languages other than their first language. This requirement is fulfilled by submitting a 3- to 5-page reflective essay during the first two years of study and before advancement to candidacy. Examples of substantial and diverse language learning experience include the following:

- Attaining L2 competence for functioning successfully in an L2 academic context
- Completing a primary, secondary, or higher education degree in a language other than the first language
- Growing up with two or more languages
- Teaching a language (or in a language) other than the first language
- Engaging in research that involves the analysis of data in another language

For further information about the PhD program, see: [www.hawaii.edu/sls/sls/programs/doctorate/](http://www.hawaii.edu/sls/sls/programs/doctorate/).

### English Language Institute

College of Languages, Linguistics and Literature  
Moore 570  
1890 East-West Road  
Honolulu, HI 96822  
Tel: (808) 956-8479  
Fax: (808) 956-2802  
Email: [uhmeli@hawaii.edu](mailto:uhmeli@hawaii.edu)  
Web: [www.hawaii.edu/eli](http://www.hawaii.edu/eli)

The English Language Institute (ELI) is located in the Department of Second Language Studies. The ELI's primary purpose is to provide English instruction for international and immigrant students or others, whose native language is not English, to facilitate their academic studies at UH Mānoa. The

ELI program is only for students who have been admitted to UH Mānoa.

All potential ELI students admitted to UH Mānoa are referred to ELI to determine if they must take the ELI placement test before registering for UH Mānoa courses. If a student does not fulfill this obligation, ELI will place a hold on the student's registration. The ELI placement test is generally offered two or three times at the beginning of each semester. Information about the testing dates and times can be found on the ELI website or the UH Mānoa registration homepage. Students can sign up for ELI placement tests online or in person at Moore 570 prior to the testing date.

### **ELI Exemptions**

Students are exempt from taking the ELI placement test if they meet any of the following conditions: (a) the student is a native speaker of English; (b) the student has received a score of 100 or better on the internet-based TOEFL, a score of 250 or better on the computer-based TOEFL, or a score of 600 or better on the paper-based TOEFL; (c) the student has received a score of 7.0 or better on the IELTS; (d) the student has received a score of 460 or better on the verbal section of the GRE; (e) the student has received a score of 540 or better on the verbal section of the SAT if taken before March 2005, or a score of 540 or better on the critical reading section if taken in March 2005 or thereafter; (f) the student has received a combined score of 48 on the reading and English sections of the ACT and neither subscore (reading or English sections) is lower than 21; (g) graduate students who have received within the last five years a bachelor's degree or an advanced degree from an accredited/recognized college in the U.S., United Kingdom, Canada (except Quebec), New Zealand, Singapore, Australia, or Ireland; (h) the student has an Associate of Arts degree from a community college within the UH System; (i) the student has obtained the equivalent of 60 transferable semester credits with a GPA of 2.0 or better, all earned in classroom settings at regionally accredited colleges or universities in the U.S., or from colleges or universities whose academic standing is recognized by UH Mānoa and where English is the primary language of instruction; or (j) the student has completed six years of full-time schooling with English as the medium of instruction at a middle school, high school, college, or university in Australia, Canada (except Quebec), Ireland, New Zealand, the United Kingdom, or the U.S. Documentation of all six years is required.

These exemption criteria apply at the time students are admitted to UH Mānoa. An exemption on the basis of one of these criteria may be automatically granted by UH Mānoa, or it may be granted by the ELI office if the student can provide the appropriate documentation, including official transcripts or test results.

### **Assignment to ELI Courses**

All other potential ELI students who have been admitted to UH Mānoa must take the ELI placement test before they can register for courses. Placement into ELI courses or exemption from ELI courses will be based on the test results. Students pursuing online degrees should contact the ELI director for further information. All ELI courses must be completed within the first year of study at UH Mānoa. Students who do not complete ELI course work as planned may not be allowed to graduate.

### **Relationship to Other Course Work**

ELI courses are equivalent to 3-credit courses when considering a student's course load. Students placed into ELI courses need to reduce the number of additional credit courses they can take and should expect to make slower progress in their regular UH Mānoa studies. This is an especially important factor in some graduate programs and should be considered carefully by students whose time or financial support is limited.

### **Hawai'i English Language Program**

College of Languages, Linguistics and Literature  
Makai Campus 13-1

1395 Lower Campus Road

Honolulu, HI 96822

Tel: (808) 956-6636

Fax: (808) 956-5100

Email: [eslhelp@hawaii.edu](mailto:eslhelp@hawaii.edu)

Web: [manoa.hawaii.edu/eslhelp/wordpress/](http://manoa.hawaii.edu/eslhelp/wordpress/)

The Hawai'i English Language Program (HELP), located in the Department of SLS, is a noncredit, intensive academic English skills program for students who wish to improve their English language proficiency for academic, business, or professional pursuits. HELP is the pathway into the UH system for students who need to sharpen their academic English skills before starting courses at UH Mānoa or in another American college or university. HELP students may receive conditional admission to UH Mānoa without a TOEFL score by completing two terms at the highest level of HELP, after which they may take the ELI placement exam to see if further English preparation is needed. HELP's four-level curriculum accepts students of all levels—from those with no English background to very advanced academic English, and every level in-between. Because of HELP's more than four decades of experience in delivering the best ESL instruction, every student can achieve success at HELP.

HELP is also a teacher training center and offers customized teacher training workshops as well as the globally recognized Certificate in English Language Teaching to Adults (CELTA) program.

Admission to HELP is open to individuals 17 or older who have completed high school or its equivalent. There are four 8-week sessions each year beginning in January, March, August, and October. HELP also offers 6-week summer programs in May and July.

See [manoa.hawaii.edu/eslhelp/wordpress/](http://manoa.hawaii.edu/eslhelp/wordpress/) for more information.

## Sociology

College of Social Sciences  
Saunders Hall 247  
2424 Maile Way  
Honolulu, HI 96822  
Tel: (808) 956-7693  
Fax: (808) 956-3707  
Email: socdept@hawaii.edu  
Web: www.sociology.hawaii.edu

### Faculty

- \*V. K. Kanuha, PhD (Chair)—multicultural issues, gender violence, native Hawaiian health, HIV
- \*P. G. Steinhoff, PhD (Graduate Chair)—collective behavior/social movements, comparative sociology (Japan), political sociology
- \*S. K. Chai, PhD—social theory, economic development, comparative sociology (Asia)
- \*K. Irwin, PhD—criminology, deviance and social control, qualitative methodology
- \*D. T. Johnson, PhD—criminal justice, comparative sociology (Japan), law and society
- \*H. Koo, PhD—comparative sociology (Korea), social stratification, development
- \*Y. J. Lee, PhD—quantitative methodology, demography, gender stratification, aging and health
- \*K. Mossakowski, PhD—medical sociology, stress and mental health, life course and aging, social psychology, social epidemiology, race/ethnicity
- \*S. Nakajima, PhD—economic sociology, organizations, culture, sociology of film and media, Chinese society
- \*N. Sharma, PhD—race/ethnic/minority relations, theory/migration and immigration
- \*L. Uperesa, PhD—race and race relations, global anthropology, sociology and ethnic studies
- \*D. W. Wood, PhD—medical sociology, evaluation research, quantitative methodology, substance abuse prevention and treatment
- \*S. Wurtzburg, PhD—gender, ethnicity, violence, addictions, Pacific Islands
- \*W. Zhang, PhD—medical sociology, social epidemiology, research methods

### Cooperating Graduate Faculty

- M. Brown—UH Hilo criminology, gender and women's issues
- M. Chesney-Lind, PhD—criminology, gender and women's issues
- J. Chinen, PhD—women and work, race, class and gender, race and ethnic relations
- A. Kimura, PhD—women's studies

### Affiliate Graduate Faculty

- S. Kanaiaupuni, PhD—demography, education, Native Hawaiians
- A. B. Robillard, PhD—ethnomethodology, medical sociology, comparative disability (Pacific Islands)

### Adjunct Faculty

- P. Adler, PhD—conflict management, community studies
- J. Dannenberg, JD—law and society
- J. Manis, PhD—social psychology, social problems

**Degrees Offered:** BA (including minor) in sociology; MA in sociology; PhD in sociology

## The Academic Program

Sociology (SOC) is the study of how society organizes itself and how various groups interact with each other and the consequences of these processes. Sociology's subject matter includes marriage and family patterns, race and ethnic relations, demography, social change, class structure, formal organizations including bureaucracies, value systems, conflict, deviant behavior, medical sociology and aging, criminology, and the people and institutions of other societies.

Sociology uses a range of research techniques for studying social phenomena that can be applied to many areas, whether one is interested in the incidence of crime, client satisfaction, policy evaluations, or demographic trends. In addition to preparing people as professional sociologists in academic settings, sociology is an excellent background for careers in law, social work, public health, urban planning, public administration, and other fields. The graduate program provides students with a foundation in basic theory and methods of research. In addition, faculty and advanced graduate students are involved in several broad areas of sociological interest: the comparative sociology of Asia; the study of crime, law, deviance, and human services in the U.S.; aging and medical sociology; and race and ethnic relations.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

Students must complete a prerequisite introductory sociology course and 30 credit hours of upper division courses, including:

- three 400-level courses
- SOC 300 and 321
- one course from SOC 475, 476, 478, or SOCS 225 (**Note:** SOCS 225 is a lower division course and cannot be counted toward required upper division credit hours)

Consult the department for graduate and career opportunities.

For further information on the Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor

#### Requirements

Students must complete a prerequisite introductory-level sociology course and 15 credit hours, including:

- SOC 300
- One 400-level course
- Three other upper division sociology courses
- SOC 100 or any 200-level course is a prerequisite for all 300-level courses; SOC 300 is a prerequisite for all 400-level courses
- To fulfill major or minor requirements, courses must be passed with a grade of C (not C-) or better

### Undergraduate Certificates

For information about applying for the following certificate program and a list of the available courses, please see the undergraduate advisor in sociology.

## Graduate Study

Two programs of graduate study in sociology are offered: a PhD program, intended to provide a professional basis for research and university teaching, and an MA program, designed to offer a general sociology curriculum and specialized areas of study relevant to career lines other than university scholarship. The following are brief descriptions and do not list all aspects of procedures and requirements; the department provides a complete statement of its graduate degree program on its website at [www.sociology.hawaii.edu](http://www.sociology.hawaii.edu). All requirements specified by the Graduate Division and general university regulations also apply.

Applicants for graduate study in the department must specify whether they wish to enter the MA or PhD program. University transcripts, a Statement of Objectives, letters of recommendation, and GRE General Test scores are required of all applicants. The TOEFL or IELTS test is required for applicants who are not native speakers of English. A sample of written work is also required of applicants to the PhD program and recommended for applicants to the MA program. An undergraduate major in sociology is not required for admission, but makeup course work may be required in some cases. Applications will be accepted for either fall term or spring term admission. The application deadline for admission are **January 15** (international students) and **February 1** (domestic students) for the fall semester and **August 1** (international) and **September 1** (domestic) for the spring semester. Please see the department website for more information and links to appropriate graduate division pages.

### Master's Degree

The department offers an MA Plan A (thesis) program.

#### Plan A (Thesis) Requirements

The MA curriculum in sociology (Plan A) should prepare the student for positions involving expertise in social research. In addition, preparatory training is provided to those who are thinking of aspiring to a doctoral degree, but feel they need more preparation. However, an MA candidate cannot assume that satisfactory completion of this curriculum will lead to placement in the department's PhD program.

The Plan A program aims to provide the student with a firm foundation in sociological theory, methods and statistics, as well as their application to the study of various substantive aspects of society.

A minimum of 30 credit hours of sociology-related course work is required for this program, as well as the successful completion of an MA thesis. All candidates are required to take at least one course each in the core areas of sociological theory, research methodology, and social statistics at the 400 level or higher, as well as five substantive courses, of which four must be at the 600 level or higher. In addition, students must take 6 credits of Thesis Research (SOC 700). The thesis is a substantial research project that shows a student's ability to produce original substantive and intellectual work. All courses credited toward the 30 credit hour minimum required for the MA degree must be passed with a grade of B or better.

The first semester's work is planned in consultation with the graduate chair and a temporary advisor appointed by the graduate chair. During the first semester, under the guidance of the temporary advisor, the student prepares a statement outlining a study plan that reflects his or her special interests and meets the credit requirements of the program. By the end of the second

semester, the student should form a thesis committee of three or more faculty members, generally drawn primarily from the department.

The thesis committee assists the student in deciding upon a thesis topic. The student then writes a thesis proposal, which must be approved by the committee. Under the supervision of the committee, the student carries out the proposed research and writes the MA thesis. When the committee feels the student is ready, the student submits the final draft of the thesis, and the committee conducts a final oral examination. Both the oral examination and the written paper must meet the committee's approval for an MA to be awarded.

#### Plan B (Non-thesis) Requirements

A Plan B (non-thesis) MA is also offered only in special circumstances. Students are only admitted to the Plan A MA program.

### Doctoral Degree

This is an academically-oriented program. It is designed to provide the student with a firm foundation in sociological theory, methods, and research so the student is prepared to engage in professional research and university teaching.

The PhD program is designed to give the student systematic exposure to sociological theories, methods, and statistics, as well their application to a number of substantive areas of society. It also provides the opportunity to develop special, high-level competence within an area of research, and the training to publish and present this research in professional settings.

The first phase of the PhD program provides basic training in theory, methods, and research. The course requirement in this phase is to complete five required courses in theory, methods, and statistics, as well as 15 additional course credits consisting of substantive courses and up to three credits of SOC 699. All courses that count towards PhD requirements must be at the 600 level or higher and passed with a grade of B or above. The minimum total number of course credits necessary for graduation is 33, but most PhD students take more than the minimum in order to gain adequate knowledge. Completing non-course requirements (QR, comprehensive, dissertation) generally takes more time than course requirements. Please consult the department website for more specifics regarding each of the stages in the PhD degree.

By the third semester, the student should form a guidance committee consisting of at least three faculty members, typically drawn primarily from within the department. By approximately the fourth semester, the student submits two of their best course papers for their qualifying review. The papers are judged by a specially constituted qualifying review panel. The qualifying review must be passed before proceeding onto Phase II of the PhD program.

The second phase provides advanced training in areas of concentration and dissertation research. The course requirement in this phase is to take three additional credits of substantive courses at the 600 level or above. In addition, the student is required to take a written and oral comprehensive examination on two selected areas of concentration, write a dissertation proposal, perform the approved dissertation research, finish writing and orally defend a dissertation.

Early in the second phase, the student must organize a dissertation committee consisting of at least five members of graduate faculty, including the official university representative from the

Graduate Division's list of eligible university representatives for sociology, in accordance with the Graduate Division policies.

Preferably by the fifth semester, all PhD students must take a comprehensive examination from the dissertation committee. The written examination covers two broadly defined research areas, as determined by the student and the dissertation committee. The student develops a bibliography for each area, and the dissertation committee makes up questions from each. After the student has taken the written examination, the dissertation committee evaluates the results and proceeds to hold a closed oral examination to determine whether or not the student is prepared to undertake dissertation research.

Following successful completion of the comprehensive examination, the student prepares a dissertation proposal. This proposal describes the theoretical basis and the research strategy to be employed in the study of the dissertation problem. When it has been successfully defended before the doctoral committee, the student proceeds to the research and writing phase of the dissertation. The dissertation should represent a major original scholarly contribution to the field of sociology suitable for publication in the form of a monograph book. A PhD is given only after completion of the dissertation text and oral defense to the satisfaction of the dissertation committee.

## Theatre and Dance

College of Arts and Humanities  
Kennedy Theatre 115  
1770 East-West Road  
Honolulu, HI 96822  
Tel: (808) 956-7677  
Fax: (808) 956-4234  
Web: [www.hawaii.edu/theatre](http://www.hawaii.edu/theatre)

### Faculty

- \*P. Mitri, MFA (Chair, Director of Theatre)—acting, voice, movement
- \*G. Lizenbery, BFA (Associate Chair, Director of Dance)—modern dance, kinesiology, movement analysis
- \*P. Gaither Adams, MFA—modern dance, choreography
- \*T. H. Baker, MFA—Hawaiian theatre, playwriting
- \*I. Belton, MPhil—directing
- \*M. Branner, MFA—theatre for young audiences
- \*J. Dodd, MFA—scene design
- \*E. Fisher, DAD—modern techniques, dance history, choreography
- \*J. Iezzi, PhD—Asian theatre
- \*K. Miller, MFA—dance ethnography, visual media for dance, research
- \*L. O'Malley, PhD—theatre history, dramatic literature
- \*K. Pauka, PhD—Asian theatre
- \*A. Schiffner, MFA—creative dance and drama, pedagogy; dance/theatre teaching internships, research, theory
- \*B. Shevelenko, MFA—lighting, sound, special effects, projections
- \*C. Vasek, MFA—costume design
- \*M. Wessendorf, PhD—dramatic literature, theory
- \*E. Wichmann-Walczak, PhD—Asian theatre

### Affiliate Graduate Faculty

M. Cristofori, MA, MBA—theory and dance history  
H. Glass, MA—improvisation, choreography  
P. Leong, MA—Asian theatre, movement  
M. Wong, MA—modern dance, choreography

**Degrees Offered:** BA (including minor) in dance, BA (including minor) in theatre, BFA in dance, MA in dance, MA in theatre, MFA in dance, MFA in theatre, PhD in theatre

### The Academic Program

The Department of Theatre (THEA) and Dance (DNCE) is comprised of two separate but related disciplines.

Theatre includes the study of dramatic literature and theory; acting and directing; stage, costume, and lighting design; stagecraft; playwriting; Asian theatre, Hawaiian theatre, and TYA (Theatre for Young Audiences). Imaginative and creative individuals interested in the disciplined, practical application of classroom theory are suitable candidates as theatre majors. Teaching and professional stage, film, and television work are typical professions of theatre majors, but the analytical and practical skills, discipline and self-confidence, creativity, problem solving, and ability to work toward common production goals are applicable to a wide variety of industries and professions. Other fields known to actively recruit employees with a theatre degree include: advertising, animation, architecture, arts administration, business administration, design for public spaces, fashion, graphic design, human-computer interface design (HCI), landscaping, multi-media marketing, non-profit management, public relations, themed entertainment, urban design and planning, and video game design and performance. The theatre major will benefit from a comprehensive curriculum that includes the world's most noted Asian theatre program, a nationally respected TYA program, and our Hawaiian theatre offerings.

Dance is the art of human motion. It encompasses the study of human movement as it relates to the physical sciences, music, theatre performance and production, history, cultural context, education, visual design, and human expression. Dance majors find careers in the areas of performance, choreography, teaching, arts administration, production, history and criticism, and research. UH Mānoa's dance program offers comprehensive theory courses and a wide variety of dance techniques and styles. The program is considered unique with its offerings in dance culture and performance studies and Asian and Pacific dance.

### Affiliations

The department belongs to the Hawai'i State Theatre Council, is an institutional member of the U.S. Institute for Theatre Technology, and participates in the Kennedy Center American College Theatre Festival. The Asian theatre program is affiliated with the Association for Asian Performance.

The dance program is affiliated with the American College Dance Festival Association and the Council of Dance Administrators.

### Advising

After being admitted as majors in the theatre program, undergraduates must consult each semester with the theatre undergraduate advisor. Newly admitted theatre graduate students should consult each semester with the director of graduate studies in theatre for initial advising. After one year of study, a graduate student is expected to select from the graduate faculty a permanent advisor well-versed in the area of the student's concentration.

In dance, undergraduate majors must consult with the dance undergraduate advisor every semester. Graduate students must

consult with the director of graduate studies in dance each semester.

## Undergraduate Study

### BA in Theatre

This degree is designed for students with a broad interest in theatre and allows maximum flexibility to satisfy requirements in the greatest areas of interest. Incoming students may declare a BA major in Theatre on their university application.

Students must complete 42 credit hours, determined in consultation with an advisor and based on the student's interests within theatre while fulfilling the broad-based requirements in the areas of acting, directing, theatre history, Asian theatre, theatre for your audiences, design and technical theatre production:

- THEA 240, 311, 312, 411, and 412
- Two courses in Asian theatre (one in theory/history/literature, one in performance)
- One course each in acting, voice/movement, directing, design, and youth theatre
- 6 credits of theatre workshop
- Recommended additional courses: ART 101, DNCE 150 or 255, and MUS 106 or 107
- Graduation requirements include the submission of a portfolio of student work eight (8) weeks into the student's final semester, an exit interview, and a written assessment of the student's tenure at UH Mānoa.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BA in Dance

This degree is designed for students with a broad interest in dance and allows them maximum flexibility to satisfy requirements in their greatest areas of interest. Incoming students may declare a BA major in Dance on their university application.

Students must complete 40 credit hours: 29 credits of required courses and 11 of elective courses. BA majors are required to register for and attend a technique course each semester. Elective credit hours are determined in consultation with an advisor and based on the student's desired focus within dance, such as teaching, choreography, dance culture and performance studies, or technical theatre production.

#### Course Requirements

- DNCE 151, 255, 260, 360 or 361, 370 or 490, 452, or 453
- THEA 200C, 200D, or 200E
- 12 credits of dance technique at the 200 level or above, including:
  - 3 credits in ballet
  - 3 credits in modern dance
  - 3 credits from *two different* Asian/Pacific dance forms and at least one of these in Asian dance
- 11 credits of focus electives to be selected from:
  - DNCE 250, 360, 361, 362, 370, 371, 372, 452, 453, 459, 460, 470, 480, 490, 499, 660, 693, MUS 107, THEA 200, Asian and Pacific performance courses, related courses in ethnomusicology, Asian theatre, anthropology, Hawaiian studies, Pacific Island studies, or ethnic studies

### Other Requirements

BA Dance students are required to participate in at least **one** (1) UH dance production per year (eg., student dance concerts, main stage dance concerts, as performers or crew members). BA majors are required to attend the annual end-of-year assessment class. BA majors are required to take at least one technique class per semester.

Graduation requirements include the submission of a portfolio of student work, assessment essay, exit interview, and completion of a survey.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BFA in Dance

This program is designed for students who wish to pursue professional careers as dancers, teachers, and/or choreographers. Admission to the program is by audition held annually, usually in April.

Incoming students may declare a BA major in Dance on their university application, then audition for the BFA degree during spring semester of their first year at UH Mānoa, if interested in the BFA degree program.

#### Course Requirements

Students must complete 62 credit hours, including:

- DNCE 151, 250, 360, 361, 362, 370, 371, 372, 452, 453, 495
- 1 credit hour of DNCE 495
- 6 credit hours of DNCE 321
- 6 credit hours of DNCE 331
- 3 credit hours of DNCE 470 or 480
- 2 credit hours in two different Asian or Pacific dance performance courses and at least one of those in Asian dance
- 6 credit hours of ballet technique at the 300 level or higher (DNCE 321 or 421) or 6 credit hours of modern dance technique at the 300 level or higher (DNCE 331 or 431)
- 6 credit hours of DNCE 421 or 431
- 2 credit hours of THEA 200C, 200D, or 200E

### Other Requirements

BFA Dance students are required to participate in at least **two** (2) UH dance productions per year. At least one must be in a performance capacity. Attendance at the BFA audition is required each year by the BFA major. Prior to the senior project, BFA students must audition choreography for a fall or spring student concert by the sixth semester of the dance major. BFA majors are required to register for a technique course every semester.

Graduation requirements include the submission of a portfolio of student work, assessment essay, exit interview, and completion of a survey.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor in Dance

#### Course Requirements

Students must complete 15 credit hours numbered 200 level and above, including nine credit hours in courses numbered 300 or above. A maximum of 9 credit hours from dance technique courses may be designated for the minor.

## Minor in Theatre

### Requirements

Students must complete 15 credit hours in courses numbered 200 or above, including 9 credit hours in courses numbered 300 or above. Courses must include one from performance, one from technical theatre, and one from history/literature. Participation in two departmental productions is required. Theatre minors should consult with the undergraduate theatre advisor.

### Graduate Study

Most graduates, especially those with PhD degrees, pursue teaching careers, but there are many career opportunities in professional theatres and dance companies, radio, television, films, and community theatres, as well as the wide variety of other fields which actively recruit those with theatre degrees.

The degrees in Asian theatre are recognized Western Interstate Commission for Higher Education (WICHE) regional graduate programs. Residents of Alaska, Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, Utah, Washington, and Wyoming are therefore eligible, upon admission, to enroll at Hawai'i-resident tuition rates.

### Master's Degrees in Theatre

Master's degrees in theatre offered are the MA Plan A (thesis), Plan B (non-thesis), and the MFA Plan B (creative/performance). For the MA Plan A, the candidate does research in theatre history, theory, or dramatic literature; the thesis may be in Asian or Western theatre. For the MA Plan B, a generalist degree, the candidate takes additional advanced course work in lieu of writing a thesis. The MFA Plan B emphasizes creative or performance work in six concentrations: acting, directing, design, and playwriting (each of these four may include Western, Asian, Hawaiian, and TYA), Asian performance, and TYA.

Applicants must present an adequate undergraduate background and submit three letters of recommendation, as well as official scores from the GRE General Test. The department expects that all incoming graduate students will have taken at least two courses in dramatic literature and one course in each of the following four areas: acting, directing, design or technical theatre, and theatre history. If such courses have not been taken, they will be made up as undergraduate deficiencies while in residence for the master's program and will not count toward the credit accumulation for the master's degree. The TOEFL minimum score for foreign students is 90 (100 for Graduate Assistantship applicants). Applicants for the MA Plan A degree are also expected to submit a major paper; those seeking the MFA degree should present appropriate supplementary materials such as portfolios, video of acting audition material or material directed, or play scripts.

Application deadline for the fall semester is **January 15**. Spring semester application deadline is **August 15**. Upon the successful completion of 12 graduate credit hours within the department, the elimination of any undergraduate deficiencies, and (for MFA students) the presentation of an acceptable qualifying creative project, the student may be admitted to candidacy.

Students pursuing an MA in theatre develop, with an advisor, a program appropriate for their interests (minimum of 39 credit hours). The program must include 3 credit hours in each of the following areas: research methods (THEA 600); Asian theatre theory/history; Western theatre theory/history;

and graduate theatre workshop (THEA 690), in which students receive 1 or 2 credit hours (depending upon extent of involvement) for working on a single Kennedy Theatre production. MA (Thesis) students take an additional 6 credit hours in theatre history or theory; 3 credit hours in a creative area. MA (Non-Thesis) students take 3 credit hours each of TYA, creative drama, creative movement, or Western puppetry; Asian or Western acting or directing; design/technical theatre. A minimum of 18 credit hours must be in courses numbered 600 to 798; a minimum of 6 credit hours must be in Asian theatre (excluding 690); credit for 699 may not exceed 9 credit hours. In addition, MA (Thesis) students must complete 6 credit hours of THEA 700 Thesis Research. For both MA degrees, students will take a four-hour written comprehensive examination followed by an oral examination. MA (Thesis) students will have an additional oral comprehensive on the written thesis.

MFA students in all concentrations will take a minimum of 60 credit hours comprised of 12 credit hours of foundation courses (3 credits in research and 9 in history and/or theory); 39 credit hours of concentration courses, including enrollment in THEA 690 Graduate Theatre Workshop, in which students receive 1 or 2 credit hours (depending upon extent of involvement) for working on a single Kennedy Theatre production, and a culminating project for which the student will enroll in 6 credit hours of THEA 695 Creative Project; and 9 credit hours of electives. Of the total 60 credit hours, 30 must be at the 600 level or above. There is no written comprehensive examination for the MFA degree. However, the culminating project will include a written component that goes beyond the descriptive record of the project; the thesis committee, in conjunction with the candidate, will decide the nature, extent, and scope of the written component in each case. Additionally, each student will be given an oral examination on the culminating project.

To receive a list of specific recommended courses for meeting MA and MFA requirements, contact the departmental director of graduate studies. Students will select their elective courses (MA Plan A, 12 credits; MA Plan B, 18 credits; or MFA Plan B, 9 credits) in consultation with their advisors to reflect their special interests. Students with sufficient undergraduate preparation may take approved related graduate courses in other departments for credit toward their degree.

In consultation with an advisor, each MFA student develops a program appropriate for his or her interests within the specific requirements of one of the following concentrations:

#### Acting

For the concentration in acting, students must complete 3 credits in research; 9 credits in history and/or theory (minimum 3 credits in Asian and 3 credits in Western); 6 credits in voice; 6 credits in movement and/or dance; 12 credits in acting (minimum 3 credits in Asian and 3 credits in Western); 3 credits in additional creative/performance courses in above areas or in directing, design/technical theatre, or playwriting; 6 credits of THEA 690 Graduate Theatre Workshop (a minimum of 4 credits in acting and 1 credit in technical theatre; 1 credit may be in design, directing, playwriting, etc., and 6 credits of THEA 695 Creative Project.

#### Design

For the concentration in design, students must complete 3 credits in research; 9 credits in history and/or theory, Asian and/or Western (minimum one 3 credit seminar); minimum 6

credits in intermediate design (400 level or above) and minimum 3 credits in advanced design (600 level), excluding other requirements below; 6 credits of THEA 657 Seminar in Design; 6 credits in creative/performance courses (400 level or above) (may include acting, directing, dance, playwriting, puppetry, or others as approved); 9 credits of THEA 690 Graduate Theatre Workshop (as approved by graduate committee chair); minimum 3 credits in Asian theatre (excluding THEA 690); 6 credits of THEA 695 Creative Project (including qualifying and final projects); and minimum 3 credits THEA 699 Directed Research.

### Directing

For the concentration in directing, students must complete 3 credits in research; 9 credits in history and/or theory (minimum 3 credits in Asian and 3 credits in Western, 3 credits of which must be in theory); 3 credits in script analysis; 12 credits in graduate-level directing (minimum 3 credits in Asian and 3 credits in Western); 6 credits in design/technical theatre (in two areas—theatre design, costume, lighting, or set); 6 credits in creative/performance courses (in at least two areas—acting, choreography, dance, movement, music, playwriting, puppetry, or voice); 6 credits of THEA 690 Graduate Theatre Workshop (minimum 4 credits in directing including assistant directing and dramaturgy; 2 credits may include acting, design, playwriting, stage managing, etc.; minimum 2 credits in faculty-directed and 2 credits in student-directed shows); and 6 credits of THEA 695 Creative Project.

### Playwriting

For the concentration in playwriting, students must complete 3 credits in research; 9 credits in history and/or theory (including 3 credits in Asian and 3 credits in Western, both at 600 level or above); 9 credits in playwriting (excluding THEA 318); 3 credits in script analysis; 3 credits in contemporary dramatic literature or theatre history; 6 credits in design/technical theatre (including 3 credits in lighting design); 3 credits in acting or directing (Asian or Western); 3 credits in movement, dance, or music (Asian or Western); 3 credits in puppetry or youth theatre; 3 credits of THEA 690 Graduate Theatre Workshop in dramaturgy; electives may include an additional 3 credits of THEA 690 (in acting, design, directing, playwriting, stage managing, etc.); and 6 credits of THEA 695 Creative Project.

### Asian Performance

For the concentration in Asian performance, students must complete 3 credits in research; 9 credits in Asian theatre history/theory; 9 credits in Asian acting; 6 credits in Asian/multicultural directing; 3 credits in Asian/Pacific music and dance (minimum 1 credit in music and 1 credit in dance); 3 credits in design/technical theatre or playwriting; 6 credits of additional creative/performance courses in above areas or courses at the graduate level in Western acting or directing; 6 credits of THEA 690 Graduate Theatre Workshop (minimum 4 credits in Asian performance—acting, directing, or puppetry; 2 credits may include other courses in acting, design, directing, playwriting, stage managing, etc.; minimum 2 credits in faculty-directed and 2 credits in student-directed shows); and 6 credits of THEA 695 Creative Project.

### Theatre for Young Audiences (TYA)

For the concentration in TYA, students must complete 3 credits in research; 9 credits in Asian and/or Western history

and/or theory; 3 credits in child/adolescent development; 3 credits in creative drama/dance; 3 credits in theatre for young audiences; 3 credits in a teaching seminar; and 3 credits in a TYA seminar. Areas of specialty in the TYA concentration include acting, curriculum, design, directing, playwriting, and puppetry. Candidates must take 9 credits in any one of these areas along with minimum of 4 credits of Graduate Theatre Workshop (THEA 690) and 6 credits of Creative Project (THEA 695). An additional 12 credit hours of electives are available, although a minimum of 3 credits in Asian theatre (excluding THEA 690) are required.

### Master's Degrees in Dance

The department's graduate offerings in dance include the MA Plan A, MA Plan B, and the MFA. For admission to the master's in dance program the GRE is not required; for foreign students the minimum TOEFL score is 600. The MA Plan A requires a written thesis. The MA Plan B requires a capstone project. The MFA requires a creative performance and choreography thesis with accompanying written documentation and video. Intended dance candidates for all degrees must present an adequate undergraduate background in dance or a related field and submit three letters of recommendation. MFA candidates in dance must also submit a DVD sample of their choreography and performance. MA and MFA candidates must submit a sample of written work, such as a major paper. The application deadline for the fall semester is **February 1** (January 15 for foreign applicants). Spring semester application deadline is **September 1** (August 1 for foreign applicants). All materials should be sent directly to the Graduate Division.

Upon the successful completion of 12 graduate credit hours within the department, the elimination of any undergraduate deficiencies, and (for MFA students) the presentation of an acceptable example of creative work (the qualifying dance) the student may be admitted to candidacy.

### Dance Culture and Performance

The MA Plan A (dance culture and performance emphasis) requires a minimum of 36 credit hours, including DNCE 651, 652, 653, 654, 655, or 661 and 700 (6 credit hours); 3 credit hours in 400 level Asian or Pacific performance courses; related area electives (6 credit hours); dance electives (3 credit hours); and general electives (3 credit hours). All electives must relate to thesis research. Language courses may be required if necessary for the student's thesis research.

### Dance Education

MA Plan B (dance education emphasis), requires a minimum of 36 credit hours, including DNCE 460 or 490, 651, 652, 691, 693, and 699; 9 credit hours from 321, 331, 421, 431; 3 credit hours in 300 to 400 level Asian or Pacific dance courses; and 6 credit hours of electives (3 credits at the 600 level).

### Performance and Choreography

The MFA emphasizes performance and choreography. The MFA Plan A requires a minimum of 60 credit hours, including DNCE 421 or 431 (18 credit hours); DNCE 651, 652, 660, 661, 671, and 672 (4 credit hours); DNCE 679 (2 credit hours), 691, and 700 (6 credit hours); 2 credit hours in two different Asian or Pacific dance forms; 3 credit hours in 600 level dance electives; 6 credit hours in non-dance electives; and 1 credit hour in a general elective. MFA candidates must participate in two dance productions a year and register to at-

tend a technique course each semester. It is expected that MFA candidates present choreography every semester. Qualifying choreography on a student concert is required prior to proposing the thesis.

MFA Plan A and MA Plan B require written comprehensive examinations and an oral defense of the examination. MA Plan A and MFA Plan A require an oral defense of the thesis.

### Doctoral Degree

The Doctor of Philosophy degree given for scholarship in theatre history, theory, or criticism, not creative or artistic work, is offered in three areas: (a) Western theatre, (b) Asian theatre, and (c) comparative Asian-Western theatre. The PhD degree is not conferred for the acquisition of academic credits. It is granted only to candidates who demonstrate outstanding ability to do imaginative research and who present the results in a cogent dissertation.

A candidate for the degree is required to successfully complete three semesters of full-time residence, required courses (detailed below), other courses as deemed necessary by the student's doctoral committee, examination in the research language(s) used in the student's dissertation research, a written and oral comprehensive examination, and an oral defense of the student's dissertation. The minimum residence requirement is three semesters of full-time work or the equivalent in credits at UH Mānoa. At the end of the second semester in residence, the graduate faculty will provide the candidate with an assessment of his or her progress to date.

Required courses in the Western area are THEA 600, plus three other 600 to 700 level courses from a departmental list of approved courses; required courses in the Asian area are THEA 464, 465, and 466, as well as THEA 660 if the candidate's dissertation requires field research. The curriculum of the comparative Asian-Western theatre area is determined by the student's doctoral committee. A high level of accomplishment in the foreign language or languages appropriate to the proposed area of research is required and will be determined by examination.

Proficiency in teaching, whether lecturing before large classes or teaching smaller classes and leading discussions, is considered part of the training of all PhD candidates, who should demonstrate this proficiency by giving several such lectures or by serving as teaching assistants.

Written comprehensive examinations and two hours of oral comprehensive examinations are required of all candidates before admission to candidacy. These are given after a student has completed the language requirement and before embarking on the dissertation. Written comprehensive exams shall consist of nine questions, one or more of which will specifically address the candidate's major area of research and one or more of which may be of a special nature at the discretion of the candidate's committee. The comprehensive includes questions on both Asian and Western drama and theatre; further guidelines are available from the graduate advisor. The questions on the written portion are posed by the theatre and dance graduate faculty and members of the student's committee. The doctoral committee consists of at least five graduate faculty, of whom a majority are from the Department of Theatre and Dance and at least one from another department.

Applicants for admission to the program must submit a detailed statement of the dissertation research they propose, three letters from those acquainted with their academic work, a sample of their research (such as a seminar paper or a master's

thesis), and official GRE General Test scores. The application deadline for admission in the fall semester is **February 1** (January 15 for foreign applicants). Spring semester application deadline is **September 1** (August 1 for foreign applicants). Requirements include a broad background in the humanities, a master's degree in theatre or its equivalent, and competence in dramatic production.

Candidates for the PhD who do not complete all requirements within seven years after admission into the doctoral program may be readmitted to candidacy only on the approval of the department's doctoral faculty and the Graduate Division.

## Urban and Regional Planning

College of Social Sciences

Saunders Hall 107

2424 Maile Way

Honolulu, HI 96822

Tel: (808) 956-7381

Fax: (808) 956-6910

Email: idurp@hawaii.edu

Web: www.durp.hawaii.edu

### Faculty

- \*D. Foley, PhD (Chair)—strategies of citizen participation, collaboration, nonprofit planning and management, community building, and community-based planning
- \*M. Coffman, PhD—environmental economics and planning, energy and climate change policy, resource management, general equilibrium modeling
- \*A. Das, PhD—community participation and empowerment, slum upgrading, decentralization and local governance, role of civil society in development
- \*P. Das, PhD—urban development, basic environmental services and governance in South Asia, design and planning of the built environment
- \*P. Flachsbart, PhD—planning methods and models, environmental planning, energy, land use planning, and urban transportation planning
- \*K. E. Kim, PhD—planning theory, planning methods, infrastructure planning, and alternative tourism planning
- \*R. Kwok, PhD—urbanization in China, East Asian development, spatial planning and urban design, development and regional economics
- \*L. Minerbi, Dott Arch, MUP—comparative urbanism, settlement planning, environmental planning, urban design, community development, planning with indigenous people, and Pacific Island planning
- \*D. Spirandelli, MLA—patterns of urban development, interface between terrestrial and marine ecosystems; community planning for integrated water management and coastal ecosystem services
- \*K. Umamoto, PhD—community planning, planning theory, social theory, social policy, community economic development, and race in ethnic relations

### Cooperating Graduate Faculty

- D. L. Callies, JD—land use management and control, intergovernmental relations
- L. Cox, PhD—agricultural and resource economics
- B. Hallet, PhD—congressional war powers, humanitarian intervention, terrorism

- A. Kaufman, PhD—fundamentals of landscape design and planting design
- M. McDonald, PhD—agricultural change, social theory, political geography, Japan
- L. H. Nitz, PhD—public policy and political economics
- D. Nixon, PhD—bureaucratic politics, statistical methodology, public policy
- C. Papacostas, PhD—transportation engineering and design
- K. Suryanata, PhD—political ecology, agriculture, rural development in Asia, environment and development, community-based resource management
- B. Szuster, PhD—coastal land conservation, impact of human development activities
- W. Wood, PhD—international public health planning
- S. Yamada, PhD—disaster management and humanitarian assistance
- W. H. R. Yeh, MArch—architectural and urban design

### Affiliate Graduate Faculty

- J. Fox, PhD—land use, forest resources and management, geographical information systems and spatial information technology, South and Southeast Asia
- G. Marten, PhD—population dynamics, ecosystem ecology, animal behavior, statistics, mathematical modeling, population genetics, human ecology, environmental management
- S. Saksena, PhD—human exposure assessment to air pollution, health impacts of energy use, air quality policy, public perceptions of environmental risks

**Degree and Certificates Offered:** MURP, PhD, Certificate in Planning Studies, Professional Certificate in Urban and Regional Planning and the Certificate in Planning Studies, Graduate Certificate in Disaster Management and Humanitarian Assistance

### The Academic Program

Urban and regional planning (PLAN) is a dynamic field, that is still evolving. It emerged out of the convergence of two concerns: (1) the provision of urban infrastructure and (2) the initiation of social reform. While the underlying focus on community well-being continues, urban and regional planning today has broadened to include the development, implementation, and evaluation of a wide range of policies. Specifically, urban and regional planners, in both developing and developed countries, are concerned with the following:

1. The use of land in the city, in the suburbs, and in rural areas, particularly with the transition from one use to another;
2. The adverse impacts of human activities on the environment and the possible mitigation of those impacts;
3. The design of the city and the surrounding region so as to facilitate activities in which people need and want to engage;
4. The organization of settlement systems and the location of human activities in urban and regional space;
5. Identification of social needs and the design and provision of services and facilities to meet those needs;
6. The distribution of resources and of benefits and costs among people;
7. The anticipation of change and its impact on how people do and can live;
8. Participation of citizens in planning processes that affect their future; and
9. The way that choices are made, decisions implemented, and actions evaluated, and the means by which those processes can be improved in urban and regional areas.

The Department of Urban and Regional Planning takes a multidisciplinary approach to planning education, recognizing in particular the important contributions to planning that can be made by the social and natural sciences and by the architectural, public health, social work, and civil engineering professions; emphasizes extensive community involvement; engages in research that focuses on application of planning methodologies and implementation of planning endeavors; recognizes the close relationship between urban and regional planning and politics; acknowledges the difficulty of resolving the value differences that lie at the heart of most planning problems; and appreciates both the importance and the elusiveness of critical concepts, such as “the public interest,” to urban and regional planning.

UH Mānoa Master of Urban and Regional Planning (MURP) graduates, of whom there are about 466, hold planning and related positions in a variety of public agencies, academic institutions, nonprofit organizations, and private firms in Hawai‘i, on the continental U.S., and in the Asia Pacific region.

### Accreditation

The department is accredited by the Planning Accreditation Board.

### Graduate Study

The department offers a multidisciplinary approach to planning education. Students are provided with an opportunity to develop an individualized but integrated course of study drawing on this department and other departments and professional schools in UH Mānoa. Faculty and students engage in both funded and non-funded research and community service. The graduate curriculum focuses on theory, methodology, and practice in the following areas: community planning and social policy, environmental planning, urban and regional planning in Asia and the Pacific, and land use and infrastructure planning. Planning in the developing countries of Asia is emphasized.

For further information regarding the master’s degree or certificate programs, students should write to the department.

### Master’s Degree

Students enter the MURP program from a variety of fields, usually the social sciences, architecture, engineering, public health, social work, and, increasingly, the natural sciences, but also from such diverse fields as philosophy, human development, and history. Students coming into the program are required to have an adequate background in descriptive and inferential statistics or to acquire this background prior to enrollment in PLAN 601.

Native speakers of English are required to take the GRE General Test. Others will be expected to have achieved adequate preparation in English as evaluated by the TOEFL. Each applicant should provide two letters of reference, preferably from individuals acquainted with the applicant academically or professionally. In addition, applicants must complete a self-assessment form and an Express information form (available from the department). An interview with a member of the faculty, if feasible, is highly recommended. The deadline for application for admission is **March 1** for the fall semester and **September 1** for the spring semester.

Standards for a graduate with a MURP degree include the following:

1. Knowledge of the structure and the growth and transformation processes of human settlements;

2. Knowledge of planning theory, history, and ethics, including an understanding of the social and political nature of planning;
3. Knowledge of general methods and models appropriate to urban and regional planning, including methods appropriate to a chosen area of concentration;
4. Knowledge of planning information systems and computer applications in planning;
5. Ability to structure and evaluate alternative plans and strategies for resolving or mitigating planning problems;
6. Ability to communicate, especially in written and oral form; and
7. Ability to plan with, rather than for, clients.

MURP graduates hold a variety of planning and related positions in public agencies, nonprofit organizations, and private firms. In Hawai'i, these include the state Department of Business, Economic Development and Tourism; Department of Health; Land Use Commission; Legislative auditor; Department of Hawaiian Home Lands; House Majority Research Office; Hawai'i Community Development Authority; Housing Finance and Development Corporation; Department of Public Safety; Department of Land and Natural Resources; U.S. Department of Housing and Urban Development; Honolulu City and County Departments of Planning and Permitting, Land Utilization, Housing and Community Development, and Parks and Recreation, Office of the Managing Director, Office of Council Services; Planning Departments of the counties of Hawai'i, Kaua'i, and Maui; Mediation Center of the Pacific; banks and trust companies; consulting firms; development corporations; real estate firms; university research and extension organizations; and community colleges.

On the continental U.S., graduates are city and county planners, program analysts in federal agencies (e.g., Office of Ocean and Coastal Management and Office of Management and Budget), and planning consultants. Other graduates include a planner for a nonprofit housing corporation, a lawyer-planner, and a law professor. Overseas positions include planners with regional planning, housing redevelopment and environmental agencies, the United Nations, private development and consulting firms, as well as faculty in university programs. Several MURP graduates are pursuing doctoral degrees in planning, geography, political science, and economics, while others are seeking law degrees.

### Requirements

The MURP degree is a two-year professional program that requires a minimum of 42 credit hours. It is designed to equip students to fill professional planning and policy analysis roles in public agencies, private firms, and community groups, particularly in Hawai'i, Asia, and the Pacific Basin. All students complete the core sequence (planning theory, planning methods, economic analysis for urban and regional planning, a 6-credit-hour practicum, and two of the following courses: PLAN 610, 620, 630, and 640). The remainder of the academic program, including a second methodology course, is individually designed with concentration in a specialized area of the student's own choosing (with the consent of his or her advisor), provided adequate academic resources are available in the department and at UH Mānoa. Grades of B or better are required in PLAN 600, 601, 603, and 605, and an average of B or better must be earned in all courses counted toward the MURP degree. MURP

students receiving a grade lower than a B will be allowed one additional opportunity to achieve a B or better in each core course.

Both Plan A (thesis) and Plan B (non-thesis) programs are available. All students are required to pass a final, which includes a successful defense of the thesis on the selected area of concentration, and to meet the program standards for graduation.

### Doctoral Degree

The doctoral program provides training in advanced research in urban and regional planning. Graduates are expected to pursue academic appointments at institutions of higher education and to achieve higher levels of professional practice in the public and private sectors.

### Admission Requirements

Admission to the PhD program requires a master's degree in planning. In exceptional circumstances candidates with either an advanced research background or exceptional professional experience, but who do not have an MA degree may be admitted. Admission may be granted with the understanding that some background courses or examinations may be required. Consideration for admission requires a GPA of at least a 3.5 in previous graduate work. Applicants are also required to submit Graduate Record Examination (GRE) scores for verbal, math, and analytic sections. Non-native speakers of English are also required to submit the TOEFL; a score of 600 is required. Applicants are also expected to submit evidence of advanced work such as a research report or sole-authored plan.

### Degree Requirements

Each PhD degree student is required to complete at least fifteen credits in advanced courses (in addition to any remedial courses designated at the time of admission):

- Advanced Methods (3 credits)
- Advanced Seminar in Planning (3 credits)

In addition to these two courses, PhD candidates are required to take six credits in an allied field (to be selected in consultation with the student's advisor). Students are also required to take one three-credit course in research design/proposal writing.

Prior to starting the dissertation, PhD candidates will sit for a comprehensive examination in planning theory and planning methods. Students will be required to form a PhD committee drawn primarily, although not exclusively from the department, to guide the student through the qualifying examination and the dissertation research. Under the direction of its chair, the committee will devise a qualifying examination covering both core topics in urban and regional planning and the student's substantive area of research. Upon successful completion of the qualifying examination, students will be required to present their dissertation proposal, to a department colloquium. When the student has successfully completed the examinations and presented the dissertation proposal the student will advance to candidacy. Each student is required to conduct original research and write and present a defense of a doctoral dissertation based on the dissertation proposal. The dissertation research will be guided by the student's committee. Upon completion, the student will defend the dissertation before the committee. If successful, the candidate will be recommended for award of the PhD in Urban and Regional Planning by UH Mānoa.

## **Professional Certificate in Urban and Regional Planning**

The Professional Certificate in Urban and Regional Planning is designed for practicing planners eligible for graduate admission who are not able to attend school for the two years required to earn a MURP degree.

Professional certificate candidates specialize in one of the following four fields: community planning and social policy, environmental planning, land use and infrastructure planning, or urban and regional planning in Asia and the Pacific.

Professional certificate candidates are required to earn 18 credit hours including PLAN 600, 601, and 603, or 605. Each candidate selects a field of interest in which he or she takes two courses including PLAN 610, 620, 630, or 640. The specific courses are selected in consultation with the candidate's faculty advisor.

Applicants for the professional certificate program should apply to the Graduate Division as special non-degree students. Two letters of reference should be sent to the department from people who are familiar with the applicant's academic or professional record. Applicants must have earned a BA, BS, or a professional degree; have maintained a minimum GPA of 3.0 in the four semesters prior to admission; and have had at least three years of professional practice prior to admission.

## **Certificate in Planning Studies**

The Certificate in Planning Studies allows students pursuing a master's or doctoral degree in another area to become acquainted with planning skills and activities. Students enrolled in graduate programs in architecture, economics, engineering, geography, political science, public health, social work, and sociology are among those eligible. Students are encouraged to use the certificate program to increase their competence in planning as it relates to their major area of study.

Certificate students are required to take five courses offered by the department and complete the requirements for a master's degree in their area of study. The required courses are PLAN 600, 601 or 605, and 751. The remaining two courses are to be selected from among the following courses by the certificate student in consultation with the faculty member responsible for directing the planning studies certificate program: PLAN 601 or 605 (whichever was not taken as a required method course); 602 or 603; and one of 610, 620, 630, or 640, or one elective course.

Successful completion of the program leads to a graduate degree in the student's chosen field and a Certificate in Planning Studies. Consideration for admission to the certificate program requires filing of an application form available from the department.

## **Graduate Certificate in Disaster Management and Humanitarian Assistance (DMHA)**

UH Mānoa provides a logical location for an Asia Pacific disaster risk reduction research and institutional capacity-building program. The program responds to the compelling need to improve hazard and disaster mitigation and response in the face of increasingly frequent and severe disaster events. The Asia Pacific region suffers the greatest impact of disaster events worldwide, and Hawai'i shares many of these same vulnerabilities. By interacting with hazard and disaster researchers at UH Mānoa and Hawai'i's existing dynamic community of disaster management

organizations, students learn how to help build disaster resilient communities.

The Graduate Certificate Program in DMHA is housed in the Department of Urban and Regional Planning and is open to all graduate students. Our interdisciplinary students come from the physical and natural sciences, engineering, geography, public administration, social work, political science, and other disciplines. Some are pursuing professional degrees in law, medicine, architecture, or public health. Our students tend to be highly motivated to apply their respective disciplinary backgrounds to the problems of reducing the impacts of disaster on people and communities.

Graduate students are required to take at least three of the DMHA core courses for a base of nine units. Additional six units are selected with advisement from courses related to hazards and disaster management and response. A one unit capstone completes the requirement. Many departments offer courses which can complement the core course sequence in a coherent, rigorous, and pedagogically valid way. Contact the program director or program coordinator for more information.

## **Women's Studies**

 M. Yoshihara—American studies  
 A. Yap—Study Abroad Program  
 M. Yue—Chinese literature

**Degree and Certificates Offered:** Undergraduate Certificate in Women's Studies, BA in women's studies, Graduate Certificate in Advanced Women's Studies

## The Academic Program

The Department of Women's Studies offers an interdisciplinary transnational feminist approach to the study of women and gender issues. The purpose of the department is to provide a rigorous and integrated academic experience for students interested in feminist research and teaching, giving them a coherent program of study in contemporary scholarship with special emphasis on Asia-Pacific and Hawai'i. With a faculty trained in a variety of fields, the program investigates gender as it intersects with race, class, sexuality, and other vectors of power in shaping the study of history, psychology, anthropology, economics, sociology, political science, philosophy, literature, language, art, drama, education, law, medicine, and biology.

Women and men from all colleges at UH Mānoa take women's studies courses because of their intellectual rigor, political insight, and interdisciplinary ties to other fields of study. Many courses are cross-listed with other departments. Women's studies is a uniquely powerful avenue of self-understanding as well as a means of connecting research on women and gender to other academic fields of inquiry. Those who understand the workings of gender in personal lives and social orders can better pursue a variety of careers and life goals. Women's studies offers a unique opportunity to study racial, economic, ethnic, sexual, regional, and global matters of interest among women in Hawai'i and around the world, past, present, and future.

## Undergraduate Study

### Bachelor's Degree

Women's studies offers two tracks for majors: either a student-designed special concentration within the field of women's studies, or a general focus on the broad field of women's studies. Students work in close consultation with faculty to design and develop the academic experience that best fits their interests, goals, and needs. The aim of both tracks is to promote a coherent program of study in contemporary interdisciplinary scholarship in feminist and gender studies. A key purpose of the major is to provide an integrated academic experience for students interested in transnational feminist scholarship and gender issues, while offering flexibility and freedom in planning the degree.

### Requirements

Although students are strongly encouraged to seek department academic advising promptly when considering a major in women's studies, a summary of undergraduate program information is also available at [www.womenstudies.hawaii.edu](http://www.womenstudies.hawaii.edu). General and special women's studies degree requirements are as follows:

#### General Women's Studies Degree Focus

- Students must complete thirty (30) credit hours of total course work, with a grade of C (not C-) or better, including:
1. Feminist Theory (WS 439/POLS 339);
  2. Feminist Methods and Research (WS 440);
  3. At least 3 courses from among the WS courses focusing on gender, race and ethnicity in transnational perspective;
  4. A minimum of 9 total credit hours from 300 level WS courses (any 300 level course taken in #3 counts toward this total);
  5. A minimum of 9 credit hours from 400 level WS courses (WS 439, 440, and any 400 level courses from #3 count toward this total);
  6. Additional course work as necessary to complete 30 total hours of course work.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

#### Special Women's Studies Degree Focus

- Students must complete 30 credit hours of total course work, including:
1. Feminist Theory (WS 439/POLS 339);
  2. Feminist Methods and Research (WS 440);
  3. At least 3 courses from among the WS courses focusing on gender, race and ethnicity in transnational perspective;
  4. A minimum of 6 total credit hours from 300 level WS courses (any 300 level course taken in #3 counts toward this total);
  5. Up to 15 outside credits at 300 and 400 level, subject to approval by women's studies' advisor;
  6. Additional course work as necessary to complete 30 total hours of course work.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Advising

Students who plan to pursue a women's studies major should meet with the women's studies undergraduate program advisor (currently Dr. Kathy Ferguson) for help in choosing classes, defining their area of interest, creating and developing proposals, and finding the faculty advisor most suited to their areas of interest.

## The Undergraduate Certificate

The Certificate in Women's Studies is designed to encourage all undergraduates to acquire a more thorough background in contemporary interdisciplinary scholarship in feminist and gender studies, and to incorporate feminist perspectives and issues into their major fields of specialization. Through this interdisciplinary option, students from various majors can study the specific achievements of women, examine the many factors that determine the status of women across cultures and through time, and analyze theories and assumptions about women that particularly relate to their majors.

The certificate's practical value includes the enhancement of knowledge that develops students' abilities to think critically and constructively about their world and their lives. Further, it offers a credential that is applicable to a wide range of careers including medicine, law, business, education, counseling, and social work. The certificate can also provide the groundwork for advanced study of gender and feminism and the graduate level application of feminist theories.

All registered students in good academic standing who are working towards a baccalaureate degree other than Women's Studies at UH Mānoa may apply for a Women's Studies Certificate.

## Requirements

- Students must complete 15 credits in Women's Studies with a grade of C (not C-) or better.
- The 15 credits must include the following two requirements: a course in Feminist Theory (WS 439/POLS 339), and at least one course in gender, race, and ethnicity in transnational perspectives (list of courses available from the program).
- At least 9 credits must be at the 300 level or higher.

For administrative purposes, any cross-listed course will be counted as a women's studies course regardless of the departmental designation under which students register for the course.

## Graduate Study

Women's studies offers a Graduate Certificate in Advanced Women's Studies (AdWS Certificate). This certificate program provides a rigorous, integrated, and relevant educational experience for students whose education and career objectives will be enhanced through creative and scholarly transnational feminist analysis of women's lives and visions. The program guides students to examine the factors that affect the status of women across cultures and through time, analyze theories and assumptions about women in various disciplines, contribute to the reformulation of social knowledge, explore institutionalizing social change that highlights and supports the achievements of women locally and internationally, and understand the usefulness of gender as an analytical tool in many fields.

Graduate studies leading to the AdWS Certificate are focused in four broad areas under the general rubric of gender studies.

- Feminist methods of inquiry and theoretical analyses. Students will explore sex/gender as an analytical category, asking what this category means, what purposes are served by the prevailing binary notions of gender, and how gender is constituted in past, current, and future biological, sociopolitical, cultural, and economic contexts.
- Feminist knowledge. Students will learn about the pervasive impact of gender relations on thoughts, actions, and prevailing constructions of reality. They also will become acquainted with an array of feminist theories and arguments about issues including coalition practices, nationalism and imperialism, and social policy.
- Sex/gender and sociopolitical categories of power and privilege. Students will examine the interaction of sex/gender with race/ethnicity, class, sexuality, and other vectors of power and privilege as relevant to nearly all domains of human experience. They will have opportunities to explore the dynamics of these interactions with emphasis on the evolving multicultural milieu of Hawai'i and the Asia/Pacific region.

Recipients of the AdWS Certificate must be classified graduate students, and normally will be pursuing graduate degrees in other academic departments. The AdWS Certificate will help students learn to apply feminist methodologies, analysis and problem-solving to their other academic fields, and to integrate the rigors of the scholarship on gender into their chosen professions as a means of enhancing their professional lives and opportunities for advancement.

The department website lists research interests and publications of the members of the women's studies graduate faculty, and describes admissions and program requirements (see [www.womenstudies.hawaii.edu](http://www.womenstudies.hawaii.edu)). The following sections summarize the admissions and program requirements, but the program website should be consulted for complete details.

## Admissions

Students are admitted to the AdWS Certificate program in the fall and spring semesters. Applicants to the AdWS Certificate program must be classified graduate students at UH Mānoa. Candidates are required to submit their current and complete transcripts, three letters of recommendation, and the names of and full contact information for three additional references. Applicants also must submit a 4-5 page essay outlining their personal and professional goals as they relate to the AdWS Certificate program, and identifying potential research and/or community involvement projects they may wish to pursue as part of their AdWS Certificate work.

## Requirements

The AdWS Certificate program consists of a minimum of 18 credits, at least 12 of which must be at the 600 level or higher. Nine of these credits must come from the following four WS courses: WS 610 (1 cr), Faculty Seminar Series; WS 613 (3 cr), Feminist Research and Methods of Inquiry; WS 615 (3 cr), Feminist Theory; WS 650 (2 cr), Research in Feminist Studies; Capstone Experience.

Remaining credits will be drawn from a list of courses approved by the women's studies graduate advisor (currently Dr. Ayu Saraswati). All students will work with a specific advisor to develop an AdWS Certificate curriculum based on their academic majors that best supports their academic and professional goals and objectives. Up to 6 credits towards the certificate

may be taken in the student's home department provided that department's curriculum includes courses approved by women's studies.

Each student enrolled in the AdWS Certificate program will design, develop, and complete a research and/or community involvement project to culminate in a publishable-quality work or comparable product, and a professional quality seminar presentation given in the student's final semester of the program.

## Zoology

### Faculty

- \*S. Robinow, PhD (Chair)—neurogenetics
- \*J. H. Bailey-Brock, PhD—invertebrate zoology, reef ecology, Polychaetes
- K. M. Bennett, PhD—neuroscience and nephrology utilizing magnetic resonance imaging
- \*D. Carlon, PhD—evolution population biology, invertebrate biology
- \*K. Cole, PhD—ichthyology, behavioral ecology, reproductive biology, morphology and morphogenesis, microgravity biology
- \*H. G. de Couet, PhD—molecular cell biology, development biology, evolution
- \*L. A. Freed, PhD—evolutionary and behavioral ecology, ornithology, conservation biology
- M. A. Hixon, PhD—marine ecology and conservation biology
- \*C. L. Hunter, PhD—conservation biology, coral reef ecology, biology and ecology of marine invertebrates
- S. D. Kraft-Terry, PhD—academic advising and assessment
- P. B. J. Marko, PhD—biogeography, evolution and conservation
- A. L. Moran, PhD—marine ecology and evolution
- \*F. A. Reed, PhD—population genetics
- \*A. D. Taylor, PhD—population, theoretical, and insect ecology
- \*R. Thomson, PhD—evolutionary biology and phylogenetics
- \*T. Tricas, PhD—marine animal behavior
- \*L. Watling, PhD—impacts of humans on benthic environments; crustacean biology
- \*C. Z. Womersley, PhD—environmental physiology, biochemical adaptation, parasitology

### Cooperating Graduate Faculty

- D. Duffy, PhD—conservation biology, sea birds
- R. Gates, PhD—molecular biology, developmental genetics, cell biology, physiology and ecology of corals
- E. G. Grau, PhD—comparative endocrinology, environmental physiology
- D. K. Hartline, PhD—quantitative neurophysiology and simulation of simple networks
- B. S. Holland, PhD—conservation biology of Native Hawaiian tree snails
- K. N. Holland, PhD—physiology, behavior, ecology of aquatic organisms
- T. D. Humphreys, PhD—cellular, molecular, biochemical, developmental biology in marine organisms

- P. J. Jokiel, PhD—coral reef biology, biogeography and ecology
- K. Y. Kaneshiro, PhD—systematics, evolution, insect behavior
- S. A. Karl, PhD—molecular ecology, systematics, and phylogeography of marine animals
- P. Lenz, PhD—neuroecology of zooplankton sensory systems
- P. E. Nachtigall, PhD—behavior and sensory processes of marine mammals
- R. Richmond, PhD—invertebrate zoology, conservation biology
- F. I. Thomas, PhD—marine ecology, biology of larvae
- R. Toonen, PhD—molecular genetics of marine organisms

### Affiliate Graduate Faculty

- G. Aeby, PhD—coral reef ecology
- R. Allison, PhD—systematics, biogeography and ecology
- C. Birkeland, PhD—conservation biology regarding coral
- A. Friedlander, PhD—marine ecology, marine conservation biology
- S. Miller, PhD—ecosystem and population conservation biology

**Degrees Offered:** BA (including minor) in zoology, BS in zoology, MS in zoology, PhD in zoology

### The Academic Program

The Department of Biology at UH Mānoa offers a zoology minor and graduate programs that offer master of science and PhD degrees. Of particular note is the department's emphasis on tropical marine biology and evolutionary biology. There are few places in the U.S. where these emphases can be pursued more productively or in a more practical setting.

### Undergraduate Study

There is no admittance to the BA and BS in Zoology degrees effective Spring 2013.

### BA Degree

#### Requirements

- BIOL 171/171L and 172/172L
- BIOL 265/265L
- BIOL 275/275L
- CHEM 161/161L and 162/162L
- CHEM 272/272L and 273
- BIOC 441 or BIOL 402 (cross-listed PEPS 402 or MBBE 402) (biochemistry lab not required)
- MATH 215 or 241, or equivalent college-level calculus

Students must take an additional 20 credit hours, including:

- ZOOL 490
- Three laboratory courses from the following areas:
  - Developmental (ZOOL 420/420L)
  - Physiology (ZOOL 430/430L, BIOL 407 or 408/408L)
  - Ecology and Behavior (ZOOL 306/306L, 439/439L, or 470/470L)
  - Genetics (BIOL 375/375L)
  - Morphology and Taxonomy (ZOOL 320/320L, 340/340L, 465/465L, or 475/475L; PEPS 363)
- Non-laboratory courses applicable toward (20 credits): ZOOL 399, 499
- ZOOL courses numbered 300 and above

Zoology courses at the 200 level carry no major credit. MATH 216 or 242 and a year of college physics are strongly recommended for students planning graduate study.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## BS Degree

### Requirements

Students must complete 78 to 82 credit hours, including:

- BIOL 171/171L and 172/172L
- BIOL 265/265L
- BIOL 275/275L
- BIOL 375/375L
- CHEM 161/161L and 162/162L
- CHEM 272/272L and 273
- BIOC 441 or BIOL 402 (cross-listed PEPS 402 or MBBE 402) (labs not required)
- PHYS 151/151L, 152/152L; or PHYS 170/170L, 272/272L
- MATH 215 and 216, or 241 and 242 or 252A
- ZOOL 320/320L, or 475/475L, or PEPS 363
- ZOOL 430/430L
- ZOOL 490
- ZOOL 492 (1 credit hour)
- ZOOL 499 (Minimum of 4 credit hours)
- Nine credits of zoology electives (300 level or above in ZOOL or approved BIOL courses), 6 credits in science electives (300 level or above in approved courses in natural sciences).

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/). F

### Minor

#### Requirements

(At least 15 credits from the following courses, including 2 lab courses from 2 of the following 5 areas)

##### I. Development

- ZOOL 420/420L

##### II. Genetics

- BIOL 375/375L

##### III. Physiology

- BIOL 275/275L, 407, ZOOL 430/430L, 432

##### IV. Ecology and Behavior

- BIOL 265/265L, ZOOL 200/200L, 306/306L, 439/439L, 470/470L

##### V. Morphology and Taxonomy

- ZOOL 320/320L, 340/340L, 465/465L, 475/475L

#### Other Courses Applicable Toward Minor in Zoology

- BIOL 408
- Any ZOOL courses numbered 300 and above

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Graduate Study

The department offers programs of graduate study and research leading to the MS and PhD degrees. The major strengths of the graduate program in zoology are in the areas of animal behavior; cellular, molecular, and developmental biology; and evolution and ecology. Especially strong programs have developed in areas that utilize the resources of Hawai'i's unique island setting, including developmental biology, marine biology, and ecology, evolution and conservation biology. Much of the research in the department emphasizes the animals of Hawai'i: marine invertebrates, terrestrial arthropods, fishes, and birds.

Graduate students in zoology may join three interdisciplinary graduate specializations; the Cellular and Molecular Biology (CMB); and the Ecology, Evolution, and Conservation Biology (EECB) Program. The department also hosts the Hawai'i Cooperative Fishery Research Unit and has active affiliations with Hawai'i Institute of Marine Biology, Kewalo Marine Laboratory, Békésy Laboratory of Neurobiology, and the Center for Conservation Research and Training.

Recipients of the MS degree usually teach, pursue careers in research or government service, or pursue further graduate training. Those with the PhD ordinarily seek teaching positions in colleges and universities or research careers in university, government, or private laboratories.

A brochure listing research interests and publications of the members of the zoology graduate faculty, as well as summarizing admissions and program requirements and opportunities for financial aid, is available on request from the department; a separate graduate student handbook describes the details of program requirements and procedures. This information also is available on the Web at [manoa.hawaii.edu/biology/sites/manoa.hawaii.edu/biology/files/downloads/graduate-student-handbook.pdf](http://manoa.hawaii.edu/biology/sites/manoa.hawaii.edu/biology/files/downloads/graduate-student-handbook.pdf). The following sections summarize the admissions and program requirements, but the department brochure and handbook should be consulted for complete details.

### Admissions

Students are admitted to the graduate program only in the fall semester; the application deadline is **January 15**. Applicants must submit a completed graduate application form, the official record of performance on the GRE General Test, transcripts for all previous undergraduate and graduate studies; and letters of recommendation from three persons who can appraise the student's aptitude for graduate study. It is strongly recommended that students take the GRE Biology subject test, and include an official record of performance in their applications. An applicant also must be sponsored by a member of the graduate faculty who has indicated his or her willingness to advise the student; the applicant should communicate with prospective faculty sponsors well in advance of the application deadline.

Intended candidates for the MS or PhD degrees in zoology are expected to present a minimum of 18 credit hours of undergraduate course work in zoology and/or biology and to have completed at least three semesters of chemistry (inorganic and organic), one year of physics, and at least one course each in calculus and botany. Deficiencies in undergraduate preparation must be rectified within the first 2 years, without graduate credit, except that biochemistry or molecular biology may be taken for graduate credit if it is at the 400-700 level. A course in biochemistry or molecular biology is required of all students, but it may be taken for graduate credit.

### General Requirements

To ensure that students have broad competence in zoology, they must take a written diagnostic examination at the start of their first semester. This examination seeks evidence of competence at the level of the undergraduate major (for MS students) or the master's degree (for PhD students) in the areas of molecular-cellular, organismic, and supraorganismic zoology. Students scoring at the 90<sup>th</sup> percentile or higher on any of these sections of the GRE biology test are exempted from the corresponding section of the diagnostic exam. Students who do

not perform satisfactorily on the diagnostic examination will be required to take remedial course work, which must be completed within two years.

All entering students are required to take ZOOL 691C. All graduate students are required to take at least one graduate seminar or topics course each year.

### **Master's Degrees**

Thesis (Plan A) and non-thesis (Plan B) programs leading to the MS degree in zoology are available. In addition to the thesis, Plan A requires a minimum of 24 credit hours of course work and 6 credit hours of ZOOL 700 (thesis). The 24 credit hours must include at least 12 credit hours of 600- or higher-level course work. The 24 credit hours may include up to 6 credit hours from related departments and up to 2 credit hours of ZOOL 699.

Plan B is a non-thesis program and requires a minimum of 30 credit hours in 400- through 700-level courses. The 30 credit hours must include at least 6 but not more than 16 credit hours from related departments (excluding courses cross-listed in zoology or applicable to the zoology BA degree) at least 2 but not more than 5 credit hours of ZOOL 699, and at least 18 credit hours of 600 or higher level course work. A research paper based on original scientific work is required.

### **Doctoral Degree**

Many applicants to the PhD program will have completed a master's degree, but well-qualified applicants without a master's degree may be admitted directly into the PhD program. Students currently enrolled in the master's program also may apply for admission into the PhD program without completing the master's degree.

### **Course Requirements**

For students matriculating with a master's degree in zoology (or equivalent), there are no course requirements for the PhD degree other than the general requirements (ZOOL 691C in the first year, and at least one graduate seminar or topics course each year), and any courses required by the student's dissertation committee.

For students matriculating with a bachelor's degree, general course requirements are very similar to the requirements for students receiving a Plan A master's degree. A minimum of 24 credits are required in courses numbered 400-800. Additionally, 6 credits are required of ZOOL 800 (dissertation), for a total of 30 credit hours. Students are required to enroll in ZOOL 800 during the term in which their degree will be conferred. At least 12 of the 24 credits of required course work should be in 600-700 level courses, not counting ZOOL 699. The Department of Biology requires that 1 of the 24 course work credits include ZOOL 691C. Of the 24 required credit hours, student may include a maximum of 2 credit hours from ZOOL 699, and up to 6 of the 24 credits are allowed from courses in related departments. All courses cross-listed with zoology, and all biology courses which can be counted towards a zoology BA or BS, are considered zoology courses, not courses in a related department.

### **Other Requirements**

An oral comprehensive examination must be passed within one year of admission to candidacy; this examination will emphasize the student's research area but may cover any facet of zoology.

The research project culminating in the dissertation is the most important part of the PhD degree program. The dissertation is to be an original contribution based on independent research, carried out under the guidance of the advisor and dissertation committee. The completed dissertation is defended at a public final examination, conducted by the dissertation committee and including a public research seminar by the candidate.

### **Further Information**

Further information about the graduate program in zoology, including full details of admissions and program requirements, may be obtained from the biology department or at [manoa.hawaii.edu/biology](http://manoa.hawaii.edu/biology). Other inquiries may be sent to [biology@hawaii.edu](mailto:biology@hawaii.edu).

# Shidler College of Business

## Administration

 Associate Dean for Academic Affairs: John Butler

## General Information

The Shidler College of Business (Shidler College) prepares students for business leadership in Hawai'i and the Pacific basin. Students receive a solid foundation, both theoretical and practical, in the structures, functions, and objectives of business enterprise. Shidler College provides one of the two degrees in business (BBA) and the only MBA in the state of Hawai'i that are accredited by AACSB-International.\* The primary empha-

ses of Shidler College are international business, information technology, and entrepreneurship.

Shidler College offers both undergraduate and graduate degrees, including the bachelor of business administration (BBA), the master of business administration (MBA), the master of accounting (MAcc), the executive MBA (EMBA), the Japan-focused MBA (JEMBA), the China International MBA (CIMBA), US International MBA (USIMBA), the executive distance learning MBA, the executive MBA Vietnam (Ho Chi Minh and Hanoi), the master of financial engineering (MFE), the master of human resource management (MHRM), and the PhD in international management. Several professional development programs are also offered through Shidler College's Executive Education Center.

## Mission

The Shidler College of Business is a multicultural academic community achieving international excellence in business education, research, and practice utilizing Hawai'i's unique advantages.

The special role of Shidler College in UH Mānoa is to serve as the center of advanced graduate and professional studies in business administration while emphasizing research and providing excellence in undergraduate programs.

## Accreditation and Affiliations

Shidler College is accredited by AACSB-International\* and is a member of the Graduate Management Admissions Council (GMAC).

## Degrees

**Bachelor's Degrees:** BBA with concentrations in accounting, entrepreneurship, finance, human resources management, international business (double major only), management, management information systems and marketing.

**Master's Degrees:** MBA, Japan-focused MBA, China-focused MBA, Executive MBA, Executive MBA Vietnam (Ho Chi Minh and Hanoi), MAcc, 3/2 Master of Accounting, Master of Human Resource Management, MS Financial Engineering

**Doctoral Degree:** PhD in international management

## Advising

Academic advisors at the Shidler College Office of Student Academic Services (OSAS) assist students with program planning and course selection; learning UH Mānoa policies and procedures; fulfilling graduation requirements in a timely

manner; and exploring transfer credit, study abroad exchange, and other educational opportunities, resources, and options. Students, while responsible for their own academic progress, should consult their advisors on a regular basis to monitor their academic status and progress toward degree completion.

Advising for undergraduate students, including mandatory advising for newly admitted undergraduate students, is available in BusAd B-101, (808) 956-8215, email: [business@hawaii.edu](mailto:business@hawaii.edu). Advising for graduate students is available in BusAd G-202, (808) 956-8266, email [busgrad@hawaii.edu](mailto:busgrad@hawaii.edu).

## Undergraduate Programs

The Shidler College of Business offers a professional, upper division program designed to give students a broad liberal arts background and a sound education in the essentials of business management. The BBA degree program, therefore, is comprised of three integral parts: (a) general education, (b) business fundamentals, and (c) a specialized major area of business. Students may select a major that complements their interests, aptitude, and career goals from such fields as accounting, entrepreneurship, finance, human resources management, international business, management, management information systems, and marketing. A double major and/or minor are also options.

### The Shidler Freshman Direct Admit Program (DAP)

The Shidler Freshman Direct Admit Program (DAP) is designed for high achieving incoming freshmen who wish to enter the Shidler College of Business early and get a head start. It is an option for outstanding high school seniors entering UH Mānoa in the fall. Selective admission for the Shidler Freshman Direct Admit Program is highly competitive and merit-based.

On your UH Mānoa application, simply designate “Pre-Business” or any specific business major as your first choice major, and you will automatically be considered for the Shidler DAP. No separate application is necessary. Shidler DAP students are eligible for a scholarship upon enrollment.

### Admission Requirements

Students transfer into Shidler College upon the successful completion of the following admission requirements:

1. Minimum of 55 credit hours of college-level work (junior standing);
2. Minimum cumulative GPA of 2.5 in all courses attempted (combined UH Mānoa and transfer GPA from all other colleges attended) and a minimum cumulative GPA of 2.0 at UH Mānoa (if courses have been attempted at UH Mānoa). If 30 or more credits with a 2.5 cumulative GPA have been completed at UH Mānoa, the transfer GPA will not be used to determine admission.
3. Completion of the following pre-business courses with a combined GPA of at least 2.5, with no grade below C. (C- grades will not be accepted for admission.) Pre-business courses: ENG 100/ELI 100/ENG 190, or ENG 200; COMG 151 or 251; ACC 201 and 202; NREM 203, BUS 250 or MATH 203, 215, 241, or 251A; and ECON 130 and 131;
4. Minimum grade of C in ICS 101 (or equivalent); and
5. If three or more business courses (or equivalents) beyond the pre-business courses (e.g., business law, statistics, management, etc.) have been attempted, a combined GPA of at least 2.5 is required in those courses.

Important: The Diversification-Social Sciences requirement in the General Education Core is met by completing ECON 130, 131 and PSY 100 or SOC 100 (which is the prerequisite to BUS 315 in the business core).

### Application Procedures

Students currently enrolled as classified students at UH Mānoa can contact the Shidler College of Business, Office of Student Academic Services (OSAS), BusAd A-202, for application materials.

Non-UH Mānoa students or unclassified students enrolled in Outreach College must submit the System Application Form to the Office of Admissions, 2600 Campus Road, Room 001, Honolulu, HI 96822 (or visit the website at [manoa.hawaii.edu/admissions/](http://manoa.hawaii.edu/admissions/)).

### Application Deadlines

The application deadlines for classified UH Mānoa students are **November 1** for the spring semester and **April 1** for the fall semester.

New and transfer students should consult with the Office of Admissions for the application deadlines. Information is available online or call (808) 956-8975.

### College Requirements

1. Completion of 120 non-repeated credit hours, including the General Education Core Requirements (see the “Undergraduate General Education Requirements” section for more information) and the following College curriculum requirements:
  - a. Pre-business courses (see “Admission Requirements”);
  - b. Required business courses: BLAW 200, BUS 310, 311, 312, 313, 314, 315, 345;
  - c. Requirements for the major;
  - d. BUS 209 or ENG 209;
  - e. An upper division course in international business; and
  - f. 11 credits of non-major elective courses beyond the introductory level (must include 11 non-business credits, 11 upper division elective credits), which may include a minor and up to 3 credits of BUS 395.
2. GPA of 2.0 in all UH Mānoa registered credit hours.
3. GPA of 2.0 in all required business courses (and their equivalents) and Shidler College major courses completed at UH Mānoa.
4. Grades of C- or higher in any required business courses (and their equivalents) and Shidler College major courses completed at UH Mānoa.
5. Residency requirements for BBA degree include both:
  - a. University residency requirement of 30 credit hours at UH Mānoa and
  - b. Minimum of eight upper division business courses (24 credit hours), including a minimum of three courses in the student’s major and BUS 345, after admission to Shidler College.

Students interested in applying to Shidler College should contact the Office of Student Academic Services for current information on admission and program requirements.

### **Modification of Hawaiian/Second Language Requirement for Shidler College Students**

Shidler College students must complete one or a combination of the following options to satisfy the Hawaiian/Second language requirement:

1. A four-semester sequence of a single language (or proven competency via a language requirement waiver or completion of 202/212);
2. Participation in a study abroad or international exchange program of 12 credits or more during the fall or spring;
3. 12 credits of international culture/area courses, from one culture of study, to be chosen from an approved list of courses provided by the Shidler College Curriculum and Program Committee and the Office of Student Academic Services.
4. Four semesters of language and culture study. Only 1 language and 1 culture may be used to satisfy the requirement, but the language and culture groups do not need to match.

### **Major Requirements**

See appropriate departments in this *Catalog* for specific major requirements leading to a BBA degree.

### **Academic Policies**

#### **Sequence of Courses**

Shidler College undergraduates are required to take BUS 310 and 311 in their first semester in the Shidler College. BUS 345 as a capstone course is taken in the final graduating semester. Shidler College students must consult the course descriptions in this *Catalog* for prerequisites and proper sequencing of business and major courses toward graduation.

#### **Minimum Standards for GPA**

The minimum acceptable academic performance for Shidler College undergraduates at UH Mānoa is (a) cumulative UH Mānoa GPA of 2.0; (b) GPA of 2.0 in all required business courses (and their equivalents) and Shidler College major courses completed at UH Mānoa; (c) Grades of C- or higher in any required business courses (and their equivalents) and Shidler College major courses completed at UH Mānoa.

#### **Probation**

Shidler College students are placed on probation at the end of any semester for any of the following reasons:

1. The student's cumulative GPA falls below 2.0
2. The student's GPA in required business courses and major falls below 2.0

3. The student fails to complete BUS 310 and 311 in the first semester in the Shidler College with a grade of C- or higher.
4. Satisfactory progress toward graduation is not being made. Continued probation may lead to suspension.

Students on probation will be required to meet with their academic advisor.

### **Double Major**

Students may pursue a double major to enhance their educational spectrum and professional marketability. To qualify for a double major, students must have a minimum cumulative UH Mānoa GPA of 3.0 and a minimum UH Mānoa GPA of 3.0 in each of the two proposed majors. At the time of declaration, the student must have completed at least one course in each major. A double major shall consist of 27 or more credits which lead to a specialization in two fields of study. Courses must meet the requirements for a major in each of the fields, and may not be used to meet the non-introductory electives requirement. (**Note:** International Business is offered only as a double major.) After successfully meeting the double major requirements, students may officially declare a double major in the Office of Student Academic Services, BusAd B-101.

### **Transfer Students**

Students completing their first two years of study at a community college or at another four-year institution should take only those business courses offered at the freshman or sophomore level (e.g., introductory accounting, business law). Business courses taught at community colleges may not be used to satisfy upper division course requirements in Shidler College (e.g., business statistics). Junior-level and senior-level business courses are accepted only from colleges accredited by the AACSB and select foreign universities.

### **Seniors**

Seniors must file a graduation application by **December 31** for summer graduation, by **March 1** for fall graduation, and by **November 1** for spring graduation in the semester preceding graduation. Seniors who plan to finish their program requirements during the summer session will need to indicate on their graduation application if they would prefer their name to be printed in the spring commencement program **or** the fall commencement program. Application forms and deadline information is available online at [shidler.hawaii.edu/forms/](http://shidler.hawaii.edu/forms/).

### **Withdrawal Deadline**

**Shidler College strictly enforces a three-week withdrawal deadline for upper-division business classes. Please note that this deadline is not the same as that for non-business classes.** In general, exceptions regarding late drop requests will not be granted.

### **Dual/Concurrent Degrees**

Shidler College students may choose to pursue a concurrent degree in any other UH Mānoa college/school. The consideration of an additional field of study can increase knowledge, diversify perspectives, and enhance personal education as well as professional growth. Requirements for admission include a cumulative GPA of 3.25, approval from the current advisor, and a statement of purpose from the applicant. Current Shidler College students considering a dual degree or students interested in admission to the Shidler College as a concurrent degree

candidate should meet with an advisor in the Office of Student Academic Services to discuss individual academic programs.

### **Second Baccalaureate Degree**

Priority for admission is given to students seeking their first undergraduate business degree. Shidler College welcomes students pursuing a second bachelor's degree, however, students who have already completed a bachelor's degree in business will be denied admission to Shidler College of Business. Students should complete the application form (available online) and submit the appropriate required documents to the Office of Admissions in QLCSS 001 or call (808) 956-8975.

### **Minors**

Shidler College students may choose a minor offered in another UH Mānoa college/school to complement their business program. A minor course of study consists of a minimum of 15 credit hours of non-introductory or upper division course work that is completed with a grade of C (not C-) or better. Shidler College students may use a minor to replace the non-introductory electives requirement. Minor course work must be approved by the respective department advisor.

### **Minor in Business Administration**

The Shidler College offers a minor in Business Administration to non-business majors. This minor will provide students with a greater understanding of business in preparation for their entrance into the workforce. Applicants must meet the following prerequisites:

1. Classified undergraduate student not enrolled in the Shidler College of Business
2. Junior standing (55 or more college-level credits)
3. 2.5 cumulative GPA
4. Completion of the following courses with a C (not C-) or better:
  - a) ICS 101 (or equivalent)
  - b) ECON 120 or 130 or 131
  - c) ACC 201
  - d) Calculus (or equivalent: NREM 203 or MATH 203, 215, 241, 251A, or BUS 250) or Statistics (or equivalent: NREM 310 or ECON 321 or PSY 225 or SOCS 225)
  - e) PSY 100 or SOC 100

For more information and to receive an application, please contact the Shidler College Office of Student Academic Services in BusAd B-101 or at (808) 956-8215.

### **Graduate Programs**

Shidler College of Business offers the only AACSB-International accredited MBA and MAcc programs in Hawai'i. The AACSB seal of approval guarantees students that their programs satisfy the expectations of a wide range of quality standards relating to strategic management of resources, interactions of faculty and students in the educational process, and achievement of learning goals in degree programs. There are less than 700 AACSB accredited institutions worldwide, and Shidler College of Business is proud to be one of them.

### **Application Deadlines**

#### **Master's Degree Programs:**

The MBA and MAcc programs both admit students during the fall semester. The fall application deadline is **March 1** for international students and Full-Time MBA students interested

in scholarships and **May 1** for all other students. The fall deadline for the Master of Human Resources and the Executive MBA program is **June 1**. The fall deadline for the Executive MBA-Vietnam program is **July 1**.

The MAcc program is the only program that admits students during the spring semester. The spring application deadline for the MAcc program is **November 1**, and **October 1** for international students.

### **Master of Business Administration**

**Full-Time Global MBA**—The Full-Time Global MBA program offers students a comprehensive foundation in business fundamentals with an Asia-Pacific focus. The Full-Time Global MBA program features a first-year cohort experience designed to help students learn the inner-workings of group dynamics crucial for the leaders of today's organizations. The MBA curriculum is predominantly focused in international business and stresses developing the skills and breadth of judgment required of top-level managers and executives in both the private and public sectors.

Students spend their first year learning the principles and theories of management strategies through a sampling of courses in various functional areas. Next, students spend the summer taking part in an internship experience allowing them to build upon the foundation created during their first year. The second year is spent customizing their degree through the completion of seven elective courses. With the assistance of an advisor, students select courses that fit their personal and professional goals and interests. In their last semester, students register in the consulting practicum, synthesizing and applying knowledge from their MBA course work to an existing organization.

**Country Focus**—The Full-Time Global MBA program at Shidler College of Business offers students a comprehensive foundation in business fundamentals with an Asia-Pacific focus. Students have access to internships, career development assistance and strong networking opportunities with fellow students, alumni, and the business community at large. The Full-Time Global MBA program features a first-year cohort experience designed to help students learn the inner-workings of group dynamics crucial for the leaders of today's organizations. Throughout the program, students meet their personal and professional goals while preparing them for leadership in today's global business environment.

To receive a certificate recognizing that an MBA meets the level of a country-specific focus, international experience and language proficiency or training are both required. The international experience will generally be achieved through a combination of overseas internship and coursework. The internship will generally be accomplished during the summer following your first complete year of study in the country of focus. This will be followed by elective business coursework at one of our partner institutions in that country that will coincide with the fall term of the second year. The combination of this for-credit internship and coursework should equal twelve credit hours to maintain your pace toward graduation with in two academic years.

For the country focus certification, there is a language requirement that can be met in one of two ways. You can pass a proficiency test that would waive the requirement to take language courses. This would be administered by the language department here at UH Mānoa. The level of proficiency

required to pass this test would be equal to testing out of third year language courses. The program is not limited to those that arrive at Shidler with language proficiency, and so the language requirement can also be met by taking language courses here at UH Mānoa during the first year of the Full-Time Global MBA program. After proficiency testing, there would be placement into one of three levels of language class, and there would then be two terms of progressive language coursework.

#### **Chinese Partner Schools:**

Sun Yat-Sen University

Shanghai University of Finance & Economics College of Business

China Europe International Business School (CEIBS) MBA Program

Shanghai Jiao Tong University

Shanghai Advanced Institute of Finance

Shanghai Jiao Tong University

Antai College of Economics & Management

Japanese Partner Schools:

International University of Japan

Nagoya University of Commerce and Business

**Part-Time MBA**—The Part-Time MBA program provides working professionals a way to leverage their education while maintaining full-time employment. The global business environment is constantly undergoing changes, therefore the Part-Time MBA program stresses the development of analytical skills and their application to decision-making rather than simply reviewing current practices. Students gain a solid academic foundation for professional careers in management.

Students in the part-time program generally take two courses per semester with classes held once a week per subject area. Classes meet during the weekday evenings and are offered each semester and during both summer sessions. Students in the part-time program enjoy the flexibility of being able to complete their degree at their own pace. Depending on the number of courses taken each semester, part-time students can usually complete their degree in three years.

**Joint Programs**—The Shidler College of Business also offers four joint MBA programs. The JD/MBA and the MS in Nursing Administration/MBA. Applicants must meet the admission requirements and apply to both programs to be eligible for joint programs.

#### **Executive MBA**

The Executive MBA (EMBA) program is a 22-month degree program designed for highly motivated managers who want to increase their knowledge and acquire the skills needed to assume broader corporate responsibility. A total of 48 credit hours is completed during this accelerated degree program. Classes are uniquely scheduled to allow working individuals to participate with maximum convenience to themselves and their sponsoring organizations. The program consists of a short residence session at the start of the first academic year, with classes meeting every Tuesday evening and alternate Saturdays. An undergraduate degree, GMAT exam, at least five years of progressively successful work experience, and a current management position are required for admission. A new EMBA class begins in August of alternate years.

#### **Executive Distance Learning MBA**

The Executive Distance Learning MBA is a 22-month program designed to meet our neighbor islands' business demands by providing advanced business training to their residents. The 48-credit hour program is geared toward individuals who have shown leadership or management potential. It enables students from the neighbor islands to pursue a graduate degree without having to travel and with limited interruption to their professional obligations or family life. The executive distance learning MBA classes are highly interactive and are broadcast in real time so that all students on the receiving sites will receive instruction simultaneously. Students will have 16 visits to UH Mānoa for their intensives throughout the program. The instructors, curriculum, and academic standards are the same as our regular evening UH MBA program. As such, it requires the completion of 48 semester credit hours of graduate level courses divided into two parts: the required core and elective courses. Electives will be determined by the students as a group based on collective needs.

#### **Executive MBA–Vietnam (Ho Chi Minh City and Hanoi)**

The Executive MBA-Vietnam (EMBA) is a 22-month degree program in business administration, conducted in cooperation with the International University in Ho Chi Minh City and the Hanoi School of Business in Hanoi. Both institutions are part of the Vietnam National University. The 48-credit-hour program is modeled after the Executive MBA conducted in Honolulu, with the same faculty and curriculum. Faculty members teach courses in Ho Chi Minh City and Hanoi in one-month modules, partly as distance learning. Participants in the program are established Vietnamese executives, some Americans, East Asians, and other expatriates. EMBA has Asian business as its focus but constant consideration is given to the impact of globalization on business and economics in the region.

#### **MBA Requirements**

All MBA students are expected to enter the program with computer competency and English language proficiency. Up to six courses of English as a second language may be required of international students depending upon placement exam results.

The MBA program consists of 21 credit hours of core courses: BUS 621, 622, 623, 624, 626, 627, 628, 629, 630, and 631; 21 credits hours of electives; the capstone experience, which consists of BUS 632 Business Policy and Strategy (3 credit hours) and BUS 696 MBA Consulting Practicum (3 credit hours).

#### **Required Core Courses**

- BUS 621 Business Statistics (1.5)
- BUS 622 Economic Foundations of Strategy (1.5)
- BUS 623 Marketing Management (3)
- BUS 624 Accounting for Decision-making (3)
- BUS 626 Leadership and Organizational Behavior (3)
- BUS 627 Business, Government, and External Environment (1.5)
- BUS 628 Ethics (1.5)
- BUS 629 Managerial Finance (3)
- BUS 630 Managing Information Technology for Strategic Advantage (1.5)
- BUS 631 Operations and Supply Chain Management (1.5)

**Electives (21 credit hours)**

Of the required 21 credit hours, six may be at the 400-level. Students may also take graduate electives from outside the college as long as at least nine elective credits are completed within Shidler College.

**Professional Development (0 credit hours)**

- BUS 601 Professional Development (two semesters)  
Required for full-time MBA programs

**Integrative Capstone (6 credit hours)**

- BUS 632 Business Policy and Strategy (3)
- BUS 696 MBA Consulting Practicum (3)

**Thesis Option**

In consultation with their advisor, a student may opt to do a research thesis in place of BUS 696 and three elective credits. Thesis students enroll in BUS 700 Thesis Research.

**MBA Admission Requirements**

For admission into the MBA graduate programs, Shidler College of Business applicants must take the GMAT within five years prior to applying, have a recommended GPA of 3.0 and at least two years of full-time post-baccalaureate work experience (five years for Executive MBA and Executive MBA-Vietnam applicants). Applicants must also submit essays, a Statement of Objective, resume, two letters of recommendation, and as part of the admission decision, candidates may be invited for an interview. Admission is competitive. Thus, the college is not always able to admit all qualified applicants.

All applicants who received a bachelor's and/or master's degree in a country where English is not the primary language of instruction are required to take the TOEFL or IELTS. Test scores may not be more than two years old. International applicants who earned a bachelor's degree (or an equivalent) within the last five years at a regionally accredited or recognized institution in the U.S., Australia, Canada (excluding Quebec), New Zealand, Singapore or the United Kingdom are exempt from the TOEFL. The minimum TOEFL score is 550 for the Executive MBA, 500 for the Executive MBA-Vietnam, and 600 for all other MBA programs, or internet based test (IBR) score of 100, or IELTS score of 7.

Information about the TOEFL may be obtained from the Educational Testing Service at [www.toefl.org](http://www.toefl.org). Information about the IELTS may be found at [www.ielts.org](http://www.ielts.org). Information regarding the GMAT may be found at [www.mba.com](http://www.mba.com).

Admission requirements for the Master of Accounting programs are found in the "Accounting" section within the Shidler College of Business. Admission requirements for the PhD program in International Management are found in the "PhD in International Management" section of this *Catalog*.

For detailed information regarding the MBA programs, contact the Shidler College of Business Office of Student Academic Services, 2404 Maile Way #G202, Honolulu, HI 96822; (808) 956-8266; email: [mba@hawaii.edu](mailto:mba@hawaii.edu); or web: [www.shidler.hawaii.edu](http://www.shidler.hawaii.edu).

For detailed information regarding the Executive MBA programs, contact the Shidler College of Business Executive Education Center, 2404 Maile Way #A303, Honolulu, HI 96822; (808) 956-8135; email: [emba@hawaii.edu](mailto:emba@hawaii.edu); web: [www.shidler.hawaii.edu](http://www.shidler.hawaii.edu).

**Master of Accounting**

The Master of Accounting (MAcc) degree provides an advanced education in taxation, financial accounting, and auditing necessary for students to pursue leading positions in public practice, business, government, and related fields.

The program offers students the opportunity to adequately prepare for today's multifaceted accounting practice by strengthening their understanding of the body of accounting knowledge, as well as preparing them for the complexities and new technology facing the accounting profession. The objectives of the program include: a) providing the educational opportunity necessary for students to become qualified professional accountants for leading positions in public practice, business, not-for-profit organizations, government, and related fields; b) enhancing students' intellectual and analytical skills with research skills necessary to further educate themselves after graduation, including exposure to leading high technology; and c) enhancing students' professional communication skills necessary for success in a contemporary accounting environment. Completion of this program will fulfill the State of Hawai'i's 150 credit hour requirement for Certified Public Accountant Licensure. In addition, there are opportunities available to study abroad (Asian Field Study), as well as internships (up to 3 graduate level credits), and career development services to further enrich and support your undergraduate and graduate accounting studies.

MAcc students may choose one of two suggested concentrations: (tax or financial reporting) or create their own.

**Admissions Guidelines**

- GPA 3.0
- GMAT taken within the last 5 years
- International Students: TOEFL 600 or IELTS 7.0 scores\*
- No work experience required

\*Applicants who do not meet these requirements may still be granted admission but may be required to take a placement exam at the time of matriculation and/or to take English language classes in addition to their MAcc coursework.

**3/2 Master of Accounting**

The 3/2 Master of Accounting (MAcc) program is an integrated, five-year 150-credit hour program designed for students who want to earn both undergraduate and graduate degrees in accounting. Students in this program gain the skills necessary to build a successful career in the multifaceted, dynamic practice of accounting. Current undergraduate students may apply to the program during their junior year. This program is for students who wish to enter professional careers in public practice, business, non-profit organizations, and government sectors. Completion of this program will fulfill the State of Hawai'i's 150 credit hour requirement for Certified Public Accountant Licensure. In addition, there are opportunities available to study abroad (Asian Field Study), as well as internships (up to 3 graduate level credits), and career development services to further enrich and support your undergraduate and graduate accounting studies.

MAcc students may choose one of two suggested concentrations: tax or financial reporting.

Email: [macc@hawaii.edu](mailto:macc@hawaii.edu)

## Master of Human Resource Management

The Master of Human Resource Management (MHRM) degree is for individuals who are in human resource management functions and want to upgrade their skills, or individuals who want to move into the profession. The program is also offered to the neighbor islands via video conferencing.

Over the last several decades, HRM has become a much more demanding profession, requiring specialized training and appropriate work experience. Job specialties in HRM include training, staffing, compensation and health benefits, health and safety, organizational development, and career development. Each of the specialties is overseen by demanding legislation and the push to optimize the competitiveness of the organization. The human resource management curriculum is interdisciplinary in its approach, integrating other disciplines—especially organizational behavior, management systems, and labor and employment legislation.

Admission criteria are as follows:

- A bachelor's degree from an accredited college/university or equivalent.
- A grade point average of 3.0 in the last 60 hours of undergraduate work, if within the last five years.
- A satisfactory interview with the director of the MHRM program.
- A biographical sketch describing pertinent activities/accomplishments.
- Two years' professional/managerial post-baccalaureate employment preferred.
- TOEFL score of 500 for graduates of foreign universities.

The program consists of 30 academic credit hours, or 10 courses. The curriculum will include the foundation courses (compensation, staffing, training, industrial relations, and health and safety) leadership, organizational development, negotiations, an integrative capstone experience, and an elective. The MHRM is a cohort program where students will go through the entire program as a group. The classes will be offered on every other Saturday and one evening per week. The program should take approximately 16 months.

## PhD in International Management

The PhD Program in International Management offers an academically challenging and rigorous program designed to prepare highly motivated and intellectually gifted students for a career in research, teaching, and service with a particular focus on Asia and the Pacific. This full-time program emphasizes a strong foundation in both methodological and theoretical training. A teaching opportunity supported by ongoing seminars in pedagogy will give students valuable experience in the classroom. Collaborative work with faculty will enhance research and learning opportunities. Students will also gain valuable computing, quantitative, and methodological skills vital to effective research.

Doctoral candidates work closely with Shidler College faculty in areas of specialization that often parallel the strengths of faculty members. These areas include International Accounting, Asian Finance, Global Information Technology Management, International Marketing, and International Organization and Strategy.

The program is small and individualized, which enables students to pursue their own areas of interest. Admission, for the fall semester only, is highly competitive, and only full-time

study is allowed. The expected completion time for the doctoral degree is four to five years.

For admission to the PhD in International Management, the candidate applicant should meet the following criteria. The deadline for application is **March 1**. (Note that admission to the doctoral program is not automatic, and will be determined on a case-by-case basis by a faculty committee.)

### Minimum Qualifications

- Master's degree or bachelor's degree. Subject matter of the foundation courses in business or accounting obtained at an accredited school.
- GMAT or GRE in the top 25<sup>th</sup> percentile
- GPA of 3.2 or above on a 4.0 scale
- TOEFL (computer-based) of 250 or the equivalent score on the IELTS
- 3 letters of reference
- Exceptions to the above requirements may be made by the PhD Admissions Committee on a case-by-case basis.
- Meeting the above minimum requirements is necessary for consideration, but does not automatically assure admission. Admission is granted on a case-by-case basis by the PhD Admissions Committee.

### Recommended Qualification

- Personal interview or telephone interview
- Teaching potential as demonstrated by previous teaching performance, if available.
- Research interests compatible with Shidler College faculty research
- Example of previous research paper or essay written by candidate, if available.

### Desirable Qualifications

- International experience
- Foreign language ability in area of desired specialization
- International area academic studies, such as Japan or China area studies

For further detailed information, please contact the PhD Program in International Management at (808) 956-6723; email: [imphd@hawaii.edu](mailto:imphd@hawaii.edu); web: [shidler.hawaii.edu/phd](http://shidler.hawaii.edu/phd).

## Special Professional Programs

See [www.shidler.hawaii.edu](http://www.shidler.hawaii.edu)

### Asia-Pacific Economic Cooperation (APEC) Studies Center

The APEC Studies Center was formed in July 1994 as a joint venture of UH Mānoa and East-West Center and is one of the founding members of the U.S. APEC Study Center Consortium. APEC has become the primary vehicle for developing a sense of economic community in the Asia-Pacific region. The 21 member economies that currently comprise APEC constitute about half of the world's total annual output in terms of GNP and represent almost 50 percent of the world's total merchandise trade.

### Asia-Pacific Financial Markets (FIMA) Research Center

FIMA Research Center conducts academic and policy research on financial markets in the Asia-Pacific region. It serves the securities and banking industries, academia, and government sector through four major programs:

The Asian Shadow Financial Regulatory Committee (ASFRC) is a group of independent experts on economic policy issues relevant to financial markets and the financial industry of the Asia-Pacific region. ASFRC members are independent of any of the members' affiliated institutions. The policy recommendations of ASFRC are its own. Typically, ASFRC tries to translate concepts drawn from academic literature into concrete policy recommendations.

The *Pacific-Basin Finance Journal* publishes the highest quality theoretical and empirical research on financial markets of the region.

The FIMA Financial Executive Program is intended for market regulators and financial executives to develop a better understanding of the financial markets in the region as well as in the developed economies in light of state-of-the-art finance theories.

The PACAP Databases Program creates, maintains, and distributes capital market databases of Asia, including China, Hong Kong (SAR), Indonesia, Japan, Korea, Malaysia, Philippines, Singapore, Taiwan, and Thailand. The program is jointly undertaken by FIMA and the University of Rhode Island PACAP Research Center. The FIMA Research Center assumes a leadership role as the front office by acting as a liaison with participating financial institutions from the region. The PACAP Research Center, in turn, provides the back office function of maintaining, updating, and distributing the databases.

### **The Center for International Business Education and Research (CIBER)**

The UH CIBER goal is to promote international business research and development activities within the UH System and the community. As one of 33 such centers at major universities across the U.S., the UH CIBER serves as a national resource for improved international business techniques and strategies as well as a regional resource providing training and research designed to meet the needs of companies doing business with the Asia-Pacific.

Working with faculty and researchers from various disciplines across UH Mānoa and from the UH System, CIBER has promoted the creation of interdisciplinary courses, research and programs. Other activities supported include the innovative Field Study in Asia course, the annual PAMI Summer Program, faculty research projects on international business topics, studies abroad and overseas internships by students and travel support for faculty and doctoral students to present papers at national and international conferences. Outreach initiatives include working with various community organizations to sponsor workshops and other training activities.

### **Executive Education Center**

The Executive Education Center is responsible for the Shidler College's executive masters programs as well as custom and open-enrollment programs. Our programs develop the critical skills and leadership capacities of individuals, teams, and organizations to sustain a competitive advantage in a global economy.

We design and deliver custom programs to support organizations in achieving their strategic goals. Our open-enrollment programs are offered to flexibly serve individuals and organizations seeking breakthrough learning opportunities. For more information, or to speak with an executive education staff member, please email [execed@hawaii.edu](mailto:execed@hawaii.edu) or call (808) 956-8135.

### **Family Business Center of Hawai'i**

The Family Business Center of Hawai'i is a partnership between Hawai'i's family business community and the UH's Shidler College of Business. The mission of the Family Business Center is "equipping, educating, and celebrating families in business." The center provides opportunities for the families to address many of the challenges they face by providing educational seminars and a forum for the exchange of information between families so that they can survive and thrive into and through the 21<sup>st</sup> century.

### **Pacific Asian Center for Entrepreneurship and E-Business (PACE)**

The goal of PACE is to foster the entrepreneurial spirit among students, faculty, and the community. The center supports the inclusion of entrepreneurship-related courses in the UH Mānoa curriculum and offers a summer certificate in international entrepreneurship. In addition, PACE also supports the student Entrepreneurship Club and numerous outreach programs, including statewide business plan competitions at the high school and college levels, the Kauffman Entrepreneurial Internship Program, a distinguished lecture series, the Hawai'i Entrepreneurs Bootcamp, and programs for Native Hawaiian entrepreneurs.

### **Pacific Asian Management Institute (PAMI)**

PAMI was established in 1977 as an institute of international management education and research bridging the East and the West. Students, faculty, managers, and government officials from more than 170 companies and 200 institutions in 22 countries have attended cross-cultural, international management courses, and training programs developed by PAMI.

For a modest fee in addition to the summer course tuition, two certificate programs—in International Management and International Entrepreneurship—are offered by PAMI during the Summer Sessions. The curriculum features traditional (classroom-based) and online international business courses in management, marketing, finance, business economics, entrepreneurship, and human resource management. These are taught by faculty from UH Mānoa and from some of the best business schools in the U.S. and around the world. The certificate programs are open to undergraduate and graduate students from any discipline, to Americans and foreigners, who are admitted by the Summer Session Office.

The Pacific Asian Lecture Series (PALS), open to the public, is part of the PAMI summer program, as are occasional field trips and site visits. The highlight of PAMI's summer is the annual N.H. Paul Chung Luncheon and Lecture, held in honor of PAMI's founder and features a renowned international business speaker.

PAMI is the secretariat for the Pacific Asian Consortium on International Business Education and Research (PACIBER), with 36 member universities in the U.S., Canada, Asia, and Oceania.

### **Pacific-Basin Finance Journal**

The *Pacific-Basin Finance Journal* is an academic journal published five times a year by Elsevier Science publishers B.V. (North-Holland) in collaboration with the Shidler College of Business. The journal provides a specialized forum for the publication of the highest quality theoretical and empirical research on capital markets of the Asia-Pacific region and represents a

significant milestone in the FIMA Research Center's program and objectives as it effectively reaches a broader audience in terms of current developments in Asian and Pacific capital markets. Its primary emphasis will be placed on the following areas:

- investment and portfolio management
- theories of market equilibrium
- valuation of market equilibrium
- behavior of asset prices in financial sectors
- normative theory of financial management
- capital markets development
- market mechanism

### **Pacific Research Institute for Information Systems and Management (PRIISM)**

PRIISM is a center for research and educational activities. Drawing on a variety of academic disciplines, PRIISM focuses on information systems and technologies and management of organizations. Its primary objective is to promote research on the development, implementation, and use of information and communication technologies in organizations.

## **Career Development & Internships**

### **Undergraduate Students**

The Office of Internships and Career Development at Shidler College of Business provides career-related internships to gain real world experience while earning academic credits. Through the internship program, students strengthen their employment opportunities in the marketplace after graduation and gain greater insight into the selection of a career path, and network with professionals in their chosen field.

The Career Development Office provides extensive on-campus interview programs, career fairs, and workshops. The office is dedicated to assisting students in their career growth and development, and to helping employers identify and select highly qualified candidates. A broad range of services are offered to enhance our students' employment marketability. From career search and information sources to skills development workshops, we seek to educate, train, and advise our students to ensure successful preparation for entry in the business job market, and assist students in making the right career decisions.

The office maintains a business and alumni network that provides a link between recruiters and students, to maximize the potential for successful internship and permanent job placement.

For more information on the various programs, contact the Career Services Office at (808) 956-6972 or (808) 956-9330. Questions regarding graduate-level internships and career development should be directed to (808) 956-3122. Visit the internship and career development website at [shidler-hawaii-csm.symplicity.com](http://shidler-hawaii-csm.symplicity.com) for an active list of internships and jobs, along with valuable career links.

### **Graduate students**

The Office of Graduate Career Services and Professional Development provides career planning and professional development services for Shidler graduate students and alumni. The office offers career strategy and planning workshops, individual coaching and career management services, mentorship programs, and guest speaker events. Graduate students, who participate in the Professional Development Series, are exposed to a variety of industries and occupations by the Shidler College

of Business' employer partners and Graduate Career Services. Students are also equipped with basic professional development tools to support their career planning.

Shidler graduate students and alumni will have lifetime access to the Career Services Platform, Shidler Career Links. Students will be able to post their resumes, and search for internship and job opportunities posted by Shidler's employer partners. Students will be able to access career related announcements. Access Shidler Career Links at: [shidler-hawaii-csm.symplicity.com](http://shidler-hawaii-csm.symplicity.com).

The Office of Graduate Career Services and Professional Development offers lifetime services to support the Shidler student and alumni career efforts and ambitions. For more information, contact the Office of Graduate Career Services and Professional Development at (808) 956-3122 or (808) 956-2811.

## **International Study**

In addition to the study abroad programs offered through the UH Mānoa Study Abroad Center and the UH Mānoa's International Exchange (MIX) Office, the following Shidler College sponsored programs are available.

### **Asian Field Study**

Shidler College offers two Asian Field Study courses, a summer 10-week, 6 credit course (BUS 477/677) which includes three weeks in Asia, and a variable credit course (BUS 476/676), which includes a required preparatory course (BUS 475/675) followed by one to three weeks in Asia. Students visit companies, factories, economic agencies, and government offices to learn more about organizational structure, government policies, and international competition and their effect on these units. Classes are held on campus before and after the field study. BUS 475/476/477 are approved IB electives. IB major, entrepreneurship major, and management major electives, and BUS 675/676/677 qualify for the entrepreneurship certificate. Consult with your academic advisor to determine applicability. Some Shidler College scholarships are available on a competitive basis to help defray the costs.

### **Shidler College International Exchange Agreements**

Shidler College students can apply to study abroad in connection with several official exchange agreements between Shidler College of Business and overseas universities. These international universities include:

- Chulalongkorn University in Thailand;
- City University of Hong Kong;
- Copenhagen Business School in Denmark;
- Hong Kong University of Science and Technology;
- Keio University in Japan;
- Keio Business School (MBA) in Japan;
- Korea University;
- National Sun Yat-Sen University in Taiwan;
- National University of Singapore;
- NEOMA Business School-Reims in France;
- Seoul National University in Korea;
- Thammasat University in Thailand;
- Waseda University in Japan;
- WHU-Otto Beisheim School of Management in Germany;
- Yonsei University in Korea.

Other UH Mānoa partner universities that are AACSB-accredited include:

- Chinese University of Hong Kong;
- Ewha Womans University in Korea;

Fudan University in China;  
 Kyungpook National University in Korea;  
 Monash University in Australia;  
 National Taiwan University;  
 Sogang University in Korea;  
 University of Auckland in New Zealand;  
 University of Otago in New Zealand;  
 University of Technology, Sydney in Australia;  
 University of Waikato in New Zealand;  
 Victoria University of Wellington in New Zealand.

In most cases, business courses are offered in English, language training is available, and the host schools often plan excursions for exchange students. Undergraduate students enroll in IS 099 at UH Mānoa and Graduate students enroll in BUS 667 as full-time students at UH Mānoa, therefore, the host school tuition is waived. Travel awards and Shidler Scholarship programs (e.g., Freeman Asia Abroad, Johnson International Scholarship) are available on a competitive basis to help defray costs. To be nominated to a Shidler partner university, students must apply through the UH MIX program. Upon nomination, the student will make their own travel arrangements and coordinate their housing requests directly with the partner university. For more information, visit [www.shidler.hawaii.edu/international](http://www.shidler.hawaii.edu/international) or contact the Office of Student Academic Services in BusAd B-101 or call (808) 956-8215.

UH Mānoa and host school tuition is waived. Some scholarship assistance is available on a competitive basis to help defray travel costs. The student makes their own travel arrangements and coordinates their housing requests directly with the partner university. For more information, visit [www.shidler.hawaii.edu/international](http://www.shidler.hawaii.edu/international) or contact the Office of Student Academic Services in BusAd B-101 or call (808) 956-8215.

## Student Organizations

Active student organizations within Shidler College provide students with opportunities to interact socially, academically, and professionally. These organizations include Accounting Club, American Marketing Association, Beta Alpha Psi, Business Executive Society of Tomorrow, Delta Sigma Pi Business Fraternity, Entrepreneurs Club, Financial Management Association, Information Technology Management Association, Inter-Business Council, Pi Sigma Epsilon, International Business Organization, and Society of Human Resource Management. Students with superior academic records are invited for membership in Beta Gamma Sigma, the national honor society for business majors, and Beta Alpha Psi for accounting majors.

The Graduate Business Student Association is a focal point of graduate student life at Shidler College. All graduate business students are members. Net Impact is an organization for both undergraduate and graduate students. Its purpose is to foster student leadership ability and promote socially responsible business practices.

Guest speakers, tours of local businesses, workshops, seminars, and internships are supported by the various student organizations—many of which have earned national recognition and awards for their contributions to the professional development of Shidler College students.

## Honors and Awards

Shidler College of Business and its departments provide scholarships and awards to exceptional students. For a list of these scholarships, see the “Tuition, Fees, and Financial Aid” section of this *Catalog*. Detailed information on scholarships can be obtained at [www.star.hawaii.edu](http://www.star.hawaii.edu).

## Accounting

School of Accountancy

 \*D. C. Yang, PhD—accounting  
 \*J. Zhou, PhD—accounting

**Degrees Offered:** BBA in accounting, MAcc, PhD, International Management, International Accounting concentration

## The Academic Program

The School of Accountancy within the Shidler College of Business offers the Bachelor of Business Administration (BBA) with a major in accounting (ACC) and the Master of Accounting (MAcc) degrees. The undergraduate accounting program provides students with an educational foundation for entry into a wide range of accounting careers and enables students to pursue graduate or advanced professional education. The MAcc program provides advanced education in taxation, financial accounting, and auditing necessary for students to pursue leading positions in public practice, business, not-for-profit organizations, government, and related fields.

An accounting background will provide a competitive edge for those aspiring to become chief executive officers. Students often study accounting even though their major interests may be in other areas of business. This enables these students to have a salable skill for easy entry into a business firm.

### Mission

The mission of the School of Accountancy is to provide students with an accounting and business education relevant to a technologically advanced global economy with emphasis on the Asia-Pacific region; to advance accounting and business knowledge through research; and to instill students with skills and a sense of moral, ethical, and professional obligations to society.

## Accounting Careers

The accounting profession may be divided into the following two major segments.

### Public Accounting

Specialties in this area include auditing, tax, and management advisory services. Some of the larger firms have reorganized these activities along industry lines. Students entering public accounting should prepare to become a Certified Public Accountant (CPA). Many students who graduate with an accounting degree are employed by national or international CPA firms, or by local CPA accounting firms. Some open their own independent practices after they become certified.

### Other Accounting Jobs

Accounting positions in industry are available in firms engaged in manufacturing, wholesaling, retailing, banking, transportation, insurance, and real estate, as well as in hotels, entertainment enterprises, and restaurants. Positions in these organizations can be found in the areas of financial accounting, managerial accounting, internal auditing, tax accounting, and accounting information systems. Graduates also find employment as accountants in various branches of federal, state, or local governments or in not-for-profit organizations.

## Undergraduate Study

### BBA in Accounting

#### Major Requirements

- ACC 321, 323, 401, 409, 418, and 460

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Graduate Study

### MAcc Degree

#### Admission Requirements

In addition to the Shidler College of Business graduate admission requirements, students without an undergraduate degree in accounting are required to complete the following undergraduate deficiencies in accounting: ACC 201 and 202 prior to admission to the MAcc program, and ACC 321, 323, 401, 409, and 418 prior to graduation.

Admission to the MAcc program is competitive. The school seeks individuals who have the potential for outstanding achievement in accounting, auditing, or taxation. The admissions committee primarily considers the candidate's academic record and GMAT score and places emphasis on strong communication skills.

#### Degree Requirements

The MAcc degree requires 30 credits (10 courses)

### Required Accounting courses (15 credits)

- ACC 413 Law for the Accountant
- ACC 415 Advanced Financial Accounting
- ACC 616 Accounting Theory and Development
- ACC 625 Accounting and Tax Research
- ACC 660 Analysis and Decision-making

### Elective Accounting courses, three of the following (9 credits)

Students can take any 400-600 level accounting course except ACC 460 and those courses used to fulfill deficiency or core requirements. No more than two elective courses may be from the 400-level. The following tracks are recommended:

#### Tax concentration (any three of the following)

- ACC 407 Taxation of Business Entities
- ACC 638 Estate and Gift Taxation and Planning
- ACC 639 Multijurisdictional Taxation

#### Financial Reporting concentration (any three of the following)

- ACC 619 Advanced Auditing
- ACC 620 Global Accounting
- ACC 635 Advanced Public Sector Accounting

#### Additional Elective courses (6 credit hours)

- Students may take any two of the following:
- Courses from the Tax or Financial Reporting tracks provided that they are not fulfilling ACC Elective requirements
  - ACC 690 Current Topics in Accounting
  - ACC 695 Accounting Internship (only three credit hours of an internship course can be taken for credit)
  - 400- to 600-level courses from the Shidler College of Business (BLAW, FIN, HRM, ITM, MGT, MKT, RE), the Field Study in Asia (BUS 677), or selected courses in PACE, LAW, COM, or COMG (business courses may not include MBA core classes BUS 621-632, BUS 696)

Students must complete a minimum of 30 credits to earn the Master of Accounting degree. If a course is waived, another course in the same area of study and of the same or higher level must be substituted.

#### Thesis Option

In consultation with their advisor, a student may opt to do a research thesis in place of ACC 660 and three elective credits. Thesis students enroll in ACC 700 Thesis Research.

# Financial Economics and Institutions

Department of Financial Economics and Institutions  
 BusAd C-305

 \*J. P. Snyderhoud, PhD—business economics  
 J. Wong—finance

**Degrees Offered:** BBA in finance

## The Academic Program

The department offers courses in finance, business law, real estate, and insurance.

## Undergraduate Study

### BBA in Finance

The major in finance (FIN) develops analytical skills in the planning, management, and control of financial resources to achieve the financial goals of the organization. Central to that task is the evaluation of the risk and return consequences of financial decisions. The major financial decisions studied are the selection of assets (equipment, buildings, inventories, securities, etc.) and the choice among financing alternatives (selling stock, borrowing from a bank, issuing bonds, etc.). Students may select course sequences that concentrate on business financial management, investment management, personal financial planning, Asian finance, and real estate finance.

The major prepares students for positions and career advancement in financial institutions, retail, wholesale, and manufacturing firms; securities institutions; and personal financial planning.

### Requirements

- FIN 311
- Four elective courses from:
  - FIN 301, 305, 307, 321, 331, 341, 412, 415, 444, 450, 490;

- RE 300, 310, 320, 330, 351, 390;
- INS 300, 411, 431

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

 \*B. Xiao, —information systems

**Degrees Offered:** BBA in management information systems

## The Academic Program

The focus of the Department of Information Technology Management includes management of information technologies within organizations, application, development and use of information systems for management and business.

## Undergraduate Study

### BBA in Management Information Systems

The Management Information Systems (MIS) major learns how to analyze opportunities for business change and growth using information technologies (IT), to design and develop business solutions that utilize IT, and to manage projects to implement IT-related change. Designing and managing information flows within and between firms and their customers is critical in today's business enterprise. All firms in every type of industry—large or small, for-profit or not-for-profit—rely on information systems and technologies for ongoing operations and future growth. The internet and other information technologies also create entrepreneurial opportunities for new or existing firms. (Many of today's leading firms grew rapidly from IT innovation.)

The MIS major offers students the flexibility to focus course work on business analysis, project management, or technical design. MIS majors are prepared for careers in project management, business analysis, networking, system architecture and design, and technical support. MIS majors are prepared to work as in-house information systems staff, as consultants for information systems and accounting firms, as independent contractors, and as business entrepreneurs. The Bureau of Labor Statistics forecasts increasing job grow for MIS-related careers.

## Requirements

- ITM 352, 353, 354, 431
- One elective from the following: ITM 321, 322, 385, 387 (various), 433, ICS 300- or 400-level course (excluding ICS 399 or 499)
- Double majors may use the following as their elective: ACC 409, MKT 362, 363 or 410
- Students who take both ICS 111 and 211 and achieve a grade of “B” or better may petition to waive the elective requirement.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BBA in Human Resources Management

#### Requirements

- HRM 351
- HRM 468
- Four elective courses from
  - HRM 353, 354, 361, 453, 455
  - HRM 463, 465, 467, 469
  - MGT 341, 344

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BBA in International Business (Double major only)

#### Requirements

- FIN 321
- MKT 381
- MGT 342 or MGT 343
- Two elective courses from
  - ACC 460
  - ANTH 416
  - ASAN 312, 320
  - BUS 367 (with international focus), 475/476 (3 credits only), 477
  - BLAW 360
  - ECON 405, 410, 415, 460, 461
  - FIN 331, 444, 470, 490C
  - HRM 469
  - MGT 320, 342, 343, 344 (with international focus), 460
  - MKT 361 (with international focus)
  - POLS 306, 315, 316
  - TIM 324, 425, 442
    - Third-year foreign language (301, 302 or both)
- Integrative, international experience

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BBA in Management

#### Requirements

- HRM 351
- MGT 320(1B)
- MGT 341

- Two electives from
  - HRM 353, 354, 361, 453, 455, 463, 465, 467, 469(1B);
  - ITM 321;
  - MGT 342(1B), 343(1B), 344, 345, 348, 399, 450, 461;
  - MKT 321 if double majoring with Marketing

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Marketing

Department of Marketing

 Web: [mkt.shidler.hawaii.edu/](http://mkt.shidler.hawaii.edu/)

### Faculty

- \*D. L. Alden, PhD—marketing communications, healthcare marketing, cross-cultural consumer behavior
- \*Q. Chen, PhD—e-commerce, online consumer behavior, consumer well-being
- R. Garrity, MS—principles of marketing, global sales management, cross-cultural consumer behavior
- N. Hartmann, PhD—principles of marketing, sales management
- \*E. M. Okada, PhD—marketing strategy, consumer decision making, new ventures marketing
- \*A. P. Palia, DBA—international business
- \*N. E. Synodinos, PhD—consumer behavior, marketing research
- \*S. L. Vargo, PhD—marketing theory, service-encounter evaluation, buyer-seller relationships, brand evaluation and extension
- \*J. R. Wills Jr., DBA—international marketing, technology marketing, marketing strategy

**Degrees Offered:** BBA in marketing

### The Academic Program

Marketing (MKT) involves studying the ways that organizations create and maintain mutually satisfying exchanges between themselves and their customers. Marketing course work helps students learn how to effectively and efficiently manage components of the marketing mix: product, distribution, communications, and price.

Marketing offers courses in marketing research, marketing strategies, consumer behavior, personal selling, internet marketing, advertising and promotion, entrepreneurial marketing, retailing, and multinational operations. After completing the marketing major, the student should possess knowledge that is applicable to a wide range of professional careers. These careers include advertising account executive, marketing manager, sales manager, and marketing research manager.

## Undergraduate Study

### BBA in Marketing

#### Requirements

- MKT 311, 321, and 391
- Two elective courses from MKT 331, 332, 341, 351, 352, 361, 362, 363, 372, 381, 410, 411

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

# College of Education

## Administration

Everly Hall 128  
 1776 University Avenue  
 Honolulu, HI 96822  
 Tel: (808) 956-7703  
 Fax: (808) 956-3106  
 Web: [coe.hawaii.edu](http://coe.hawaii.edu)

Dean: Donald B. Young, Jr.

## General Information

The College of Education (COE) prepares teachers, administrators, and other education personnel; provides professional development for teachers and other education professionals; disseminates information for understanding educational issues to school and community groups; and conducts basic and applied research related to issues in education. The college is nationally accredited by the National Council for the Accreditation of Teacher Education.

The college is committed to preparing all educators to work with diverse populations of students, including those with special needs; ensuring that Hawai'i's educators are prepared to use technology to enhance instruction and learning; and fostering the skills and abilities of graduates to assume leadership roles in education throughout the state and region.

The College of Education offers three baccalaureate degrees, two post-baccalaureate certificates, nine master's degrees, four

graduate certificates, and three doctoral degrees. State approved teacher education programs (SATEP), leading to initial teacher licensure, are offered at the baccalaureate, post-baccalaureate, and master's levels. Many COE programs are offered through distance education, including interactive video, web-based, and hybrid formats. For more information, contact individual departments or visit the COE website at [www.coe.hawaii.edu](http://www.coe.hawaii.edu).

## Vision and Mission

### Vision

The College of Education envisions a community of educators who provide innovative research, teaching, and leadership in an effort to further the field of education and prepare professionals to contribute to a just, diverse, and democratic society, and enhance the well-being of the Native Hawaiian people and others across the Pacific Basin through education. Our vision guides the direction and work of the college in and beyond Hawai'i and is informed by a sense of purpose and a sense of place.

### Mission

Our mission is to collaborate as a professional community in three primary areas of responsibility or kuleana:

- Teaching—prepare new educational professionals and provide on-going professional development in education.
- Research—increase the knowledge base in education and related fields through the production and application of educational research.
- Service—serve as partners and leaders for excellence in education.

### Philosophy

The College of Education's philosophy of responsibility is reflected in our purposes, which are to promote excellence in teaching, scholarship, and service; encourage life-long learning; and develop educational leadership at all levels.

### Accreditation

The College of Education holds the following national accreditations:

- National Council for the Accreditation of Teacher Education (NCATE)—Initial and advanced educator preparation programs
- Council on Rehabilitation Education (CORE)—Rehabilitation Counselor Education program

- Commission on Accreditation of Athletic Training Education (CAATE)—Entry-Level Athletic Training Program and Post-Professional Athletic Training Program

### **Degrees and Certificates/Licenses**

**Bachelor's Degrees:** BEd in elementary education (with early childhood, Hawaiian education, and special education dual preparation available), BEd in secondary education by academic major, and BS in kinesiology and rehabilitation science.

**Master's Degrees:** MEd in curriculum studies, MEd in early childhood education, MEd in educational administration, MEd in educational foundations, MEd in educational psychology, MEd in educational technology, MEd in special education, MEdT in teaching, and MS in kinesiology and rehabilitation science with options in athletic training (entry-level or post-certification), physical activity/adapted physical activity, and rehabilitation counselor education.

**Doctoral Degrees:** PhD in education (with specializations in curriculum and instruction, educational administration, educational foundations, educational policy studies, educational technology, exceptionalities, and kinesiology), PhD in educational psychology, and EdD in Professional Educational Practice.

**Certificates:** PBCSE (post-baccalaureate certificate in secondary education), PBSPED (post-baccalaureate certificate in special education), and graduate certificates in Disability and Diversity Studies, Online Learning and Teaching, PK-3 Education, and Reading K-12.

### **Advising**

#### **BEd Elementary Education, Dual Teacher Preparation Programs in Elementary/Special Education, Elementary/Early Childhood Education, Early Childhood/Special Education, and Elementary/Hawaiian Education; Secondary Education; BS in Health and Physical Education and Kinesiology and Rehabilitation Science; Post-baccalaureate Certificate in Secondary Education; Post-Baccalaureate Certificate in Special Education; and Master of**

#### **Education in Teaching**

Office of Student Academic Services (OSAS)  
Director, Melvin E. Spencer, III

### **Graduate Degrees**

Contact the departmental offices of the graduate field of study in the College of Education.

### **Undergraduate Programs**

The college offers the bachelor of education (BEd) degree in elementary education (with early childhood, Hawaiian education, and special education dual preparation available), in secondary education by academic major, and the bachelor of science (BS) degree in health and physical education, and in kinesiology and rehabilitation science (KRS). Specific degree requirements for these undergraduate programs and General Education Requirements are available in the Office of Student Academic Services (OSAS), Everly Hall 126 or on the web. For program requirements for the BEd, see the Institute for Teacher Education section of the *Catalog*. For program requirements for the BS in KRS, see the Kinesiology and Rehabilitation Science section of the *Catalog*. The BEd in Elementary Education is offered on campus at UH Mānoa and statewide through distance education.

### **Admissions Requirements for Undergraduate Majors**

Students applying for admission to the bachelor of education (BEd) and the bachelor of science (BS) programs must meet all UH Mānoa admission requirements and complete the COE online Major Declaration Form. Majors should follow specific General Education Requirements listed on their program sheets. Please consult an advisor. During the admission process, applicants may be referred to, or interviewed by, appropriate faculty members regarding their qualifications and potential as educators. The behavior of applicants should reflect high ethical and professional standards at all times. Behavior may be evaluated on the basis of past experience and current interaction with college personnel.

To declare a major, see [makalei.coe.hawaii.edu/student](http://makalei.coe.hawaii.edu/student). Admission requirements are subject to change. Call OSAS for updated information.

### **Additional Requirements for Licensure Track/State Approved Teacher Education Programs (SATEPs)**

The college offers licensure track/state approved teacher education programs (SATEPs) that qualify program completers to apply for licensure with the Hawai'i Teacher Standards Board (HTSB). The college also offers a prelicensure track for students who wish to declare an education major. However, participation in the prelicensure track does not guarantee admission to a SATEP. Students pursuing a teaching license also must meet the following criteria or those in effect due to HTSB actions at the time of application:

1. Achieved upper division status by completing a minimum of 55 credit hours from an accredited college.
2. Cumulative GPA of 2.75 for all postsecondary institutions attended.
3. For secondary education majors, GPA of 2.75 in the content major. Students pursuing a secondary major in mathematics, physical education, or science may be considered for admission to the baccalaureate level SATEP with a minimum cumulative GPA of 2.50 and a major cumulative GPA of at least 2.50.
4. PRAXIS I—Pre-Professional Skills Test (PPST/C-PPST) with minimal HTSB passing scores in reading, writing, and mathematics subtests, or other approved options to demonstrate basic skills in reading, writing, and mathematics. Contact an OSAS advisor.
5. Demonstrate oral and non-verbal communication competencies through the successful completion of a Personal Admis-

sions Interview(s). The purpose of the interview is to assess fluency of oral communication, interest in teaching, student motivation and suitability to the teaching profession, including appropriate professional dispositions. Qualified students who are off-island during the semester of SATEP application may be granted a telephone or web-based interview.

6. Completion of General Education requirements specified for education majors pursuing teacher licensure. Applicants who have completed an articulated AA degree from a UH community college (including AAT from Leeward CC, AS in Human Services with Early Childhood Specialization from Maui CC, AA in Elementary Education and Special Education from Kapiolani CC, and AS in Early Childhood Education-Preschool Option, per memoranda of agreement) are considered to have met the UH Mānoa General Education requirements with possible exceptions (see an academic advisor).
7. A minimum of 40 hours of documented group leadership experience, paid or volunteer, with a group of school-age children at the grade level(s) of most interest in future teaching.

Admission requirements are subject to change. Call OSAS for updated information.

Applicants should be aware that admission to a SATEP does not guarantee admission to clinical placements, including practicum, student teaching, internship, or teaching residency. Students' progress in state approved teacher education programs will be evaluated at transition points throughout the program.

Also required for clinical placement:

1. Original TB certificate clearance as required by Hawai'i Department of Education school regulations. Contact the Department of Health for more information.
2. Liability insurance.
3. Hawai'i Department of Education fingerprinting and background check.
4. Transportation to and from the school sites is the student's responsibility.

The HTSB also requires passage of the appropriate content test (e.g., Praxis II, ACTFL) prior to student teaching, internship, or teaching residency. Please see a COE academic advisor for more details.

## Requests for Reconsideration of Negative Admissions Decisions

Students who are denied admission to a College of Education degree program or SATEP may request reconsideration of their application from the Director of OSAS. However, only students who have achieved a minimum overall cumulative GPA of 2.5 and who attain the minimum qualifying passing score on the Praxis I may request reconsideration for admission to a SATEP.

In addition, students must show strong evidence of future potential in the field and a strong record of recent scholarship.

## Application Procedures and Deadlines

1. Applicants for the BEd and BS degrees should follow all appropriate UH Mānoa procedures.
2. All SATEP applicants must submit a current College of Education application form to OSAS and submit additional application materials outlined at this website: [coe.hawaii.edu/undergraduate/forms](http://coe.hawaii.edu/undergraduate/forms).
3. SATEP applicants are responsible for making arrangements for the interviews and the Praxis I tests, and for submitting documentation of field experience hours.

Application for degree programs follows UH Mānoa deadlines. For SATEP application, priority deadline is **February 1**, and final deadline is **March 1** for fall admission; priority deadline is **August 1**, and final deadline is **September 1** for spring admission. Be aware that not every program admits every semester. Deadlines are subject to change. Call OSAS for updated information.

All students in the BEd and BS programs should make an appointment for a graduation check with an academic advisor in June or July for the September 15 graduation deadline and in November or December for the February 15 deadline. No late applications will be accepted.

SATEP participants should check with an advisor to ensure compliance with all completion requirements. OSAS will not recommend candidates to the HTSB for licensure until all requirements are satisfied.

## Field and Clinical Experiences

The College of Education plans, arranges, and supervises all required field and clinical experiences, including student teaching, at the elementary and secondary levels in public and private schools. Since student teaching is a full-time experience, students may not register concurrently for other courses and are strongly advised not to undertake employment during any required student teaching. Check with the advisors for additional prerequisites related to classified status, course completion, grade requirements, GPA requirements, Praxis II content knowledge tests, and required forms before registering for student teaching. Please be aware of deadlines, particularly those after which no late applications will be accepted.

Those undertaking field and clinical experiences, including student teaching or teaching residency as part of a SATEP, must have met the following prerequisites:

- Enrollment in the College of Education as a classified student and completion of all coursework necessary;
- A cumulative GPA of not less than that required for admission to the SATEP;
- Completion of the Student Teaching Application from the Office of Student Academic Services;
- Liability insurance;

- Hawai'i Department of Education fingerprinting and background check.

There is typically no student teaching or teaching residency during the summer session.

The HTSB requires passage of the Praxis II content examination or other approved options or demonstrating content knowledge prior to student teaching. Students should check with their academic advisor concerning specific requirements.

## Graduate Programs

### Master's Degrees

The College of Education offers MEd degrees in curriculum studies, early childhood education, educational administration, educational foundations, educational psychology, educational technology, and special education. The MEd programs in curriculum studies and early childhood education are in the Department of Curriculum Studies. Other MEd programs are in departments of the same name.

The College of Education also offers a master of science (MS) degree in Kinesiology and Rehabilitation Science (KRS). The MS degree is designed as a two- to three-year program of study for students with advanced knowledge, skills, research, and clinical/field experiences in one of the following program areas: Physical Activity, Adapted Physical Activity; Entry-Level Graduate Athletic Training Education Program (EL-GATEP), Post-Professional Advanced Athletic Training Education Program (PP-AATEP), and Rehabilitation Counselor Education.

The MEdT, a two-year, field-based program, is designed for students who have earned baccalaureate degrees in fields other than education. Graduates are eligible for state teacher licensure in either elementary or secondary education. See the "Institute for Teacher Education" for more information.

### Doctoral Degrees

Doctor of Philosophy in Education (PhD)

Wist 113

1776 University Avenue

Honolulu, HI 96822

Tel: (808) 956-7913

### Graduate Faculty

- S. B. Roberts, EdD (Chair)—curriculum administration, policy, professional socialization, school administration
- A. Bartlett, PhD—literacy, teacher education
- M. Benham, EdD—Hawai'i inuiākea School of Hawaiian Knowledge, educational administration, educational policy, indigenous education (K-post secondary), qualitative inquiry, leadership/community based
- K. F. Berg, PhD—collaborative learning, educational psychology
- R. Black, EdD—mental retardation transition, students at risk, research design
- B. Cheng, EdD—comparative and international education, education policy
- P. Chinn, EdD—elementary and secondary science education
- C. S. Collins, PhD—qualitative research, higher education, globalization, and social rates of return
- M. Conway, PhD—disability studies, transition, postsecondary supports, sensory impairment, assistive technology
- B. G. Cook, PhD—mild/moderate disabilities, inclusion, evidence-based practices, higher education and students with disabilities
- L. H. Cook, PhD—mild/moderate disabilities, inclusion, evidence-based practices, and students with disabilities
- J. A. Daniels, EdD—school, development, adolescent, group, homeless children, loss and transition counseling
- P. Deering, PhD—curriculum and instruction, middle level education, social studies education, qualitative research
- X. Di, EdD—teacher education, multicultural and international education
- E. Enomoto, EdD—organization technology, politics of education
- D. P. Ericson, PhD—philosophy of education, educational policy
- C. Frambaugh-Kritzer, PhD—language and literacy
- C. P. Fulford, PhD—educational technology, instructional and visual design
- L. A. Fulton, PhD—elementary science education, teacher education, qualitative research
- L. H. L. Furuto, PhD—mathematics education, ethnomathematics, quantitative research
- D. Grace, EdD—language arts, media studies, early childhood
- P. E. Halagao, PhD—social studies, multicultural education and Filipina/o curriculum and pedagogy
- R. H. Heck, PhD—leadership and governance, organizational theory, policy
- R. Hertzler, PhD—exercise physiology with interest in body composition and metabolism
- C. Hitchcock, PhD—disability studies
- C. Ho, PhD—educational technology
- E. S. Hoffman, EdD—educational technology, e-learning, qualitative research methods
- A. A. Jenkins, PhD—mild/moderate disabilities, content strategies/inclusive education, collaboration
- J. L. Johnson, DrPH—exceptionalities, early childhood
- R. Johnson, EdD—early childhood and elementary education
- L. K. Johnsrud, PhD—academic governance and leadership, organizational theory, policy and planning
- J. Kaomea, PhD—Native Hawaiian and indigenous issues in education; postcolonial theory
- C. L. Kessler, EdD—K-6 social studies-history education; anti-bullying; health advocacy
- I. F. Kimura, PhD—kinesiology, athletic training and biomechanics
- D. Leake, PhD—transition, self-determination, child and adolescent mental health
- P. Leong, PhD—educational technology, distance education, virtual worlds
- M. G. Lin, PhD—educational technology, participatory learning, open access resources
- B. J. Lum, PhD—philosophy of education, human development, peace education, social and cultural studies
- M. Maaka, PhD—indigenous education, language and literacy in education, multicultural education
- J. K. Maeda, PhD—physical education, elementary and adapted physical education pedagogy, and professional development, applied behavior analysis
- D. McDougall, EdD—behavioral self-control (self-management, self-monitoring), behavioral disorders/learning disabilities, inclusion/integration, applied behavior analysis, special education law
- H. McEwan, PhD—curriculum theory, philosophy of teaching
- P. McKimmy, EdD—policy and information technology solutions
- M. P. Menchaca, EdD—educational technology integration, online teaching and learning, distance education, multiculturalism and social justice, and communities of practice
- J. A. S. Moniz, PhD—multicultural education, social studies, research methods
- C. Morgan, PhD—promoting youth physical activity; benefits, assessment, levels, and related factors of youth physical activity
- L. S. Muccio, PhD—early childhood, inclusive education, teacher action research
- N. Murata, PhD—general physical education pedagogy, adapted physical education, special education/transition, and professional development

K. L. Murphy, DPE—physical education  
 W. D. Narkon, PhD—mild/moderate disabilities, learning disabilities, reading strategies  
 T. T. T. Nguyen, EdD—educational leadership, educational technology, internet safety  
 M. J. Noonan, PhD—moderate and severe disabilities, early intervention  
 L. Novosel, PhD—mild/moderate disabilities, design-based research, adolescent literacy, social and emotional learning, culturally responsive teaching pedagogy  
 K. Oliveira, PhD—Hawaiian language, culture and geography  
 T. O’Neill, PhD—science education with a focus on multicultural science education and the teaching and learning of science for social justice  
 C. Ornelles, PhD—mild/moderate disabilities, students at risk, teacher education  
 L. Oshita, PhD—special education teacher education, multicultural education in special education, and distance advising  
 S. Paek, EdD—educational technology, statistical analysis and evaluation  
 M. E. Pateman, HSD, MPH—school and college health education  
 E. Ponte, PhD—second language studies, teacher education, assessment and evaluation  
 F. Pottenger, PhD—science education  
 J. H. Prins, PhD—kinesiology  
 K. Rao, PhD—assistive technology, distance education, universal design for learning, English language learners and literacy  
 G. G. Reed, PhD—social and cultural foundations, values and education, comparative education  
 R. Reed, PhD—teacher training, cultural diversity, language arts, recruitment and retention of special education teachers  
 K. D. Roberts, PhD—assistive technology, culturally responsive education, learning disabilities, and educational research  
 S. Robinson, PhD—secondary teacher preparation, science education  
 C. Schmidt, PhD, BCBA-D—autism spectrum disorders, applied behavior analysis  
 M. Schmidt, PhD—educational technology, design-based research, assistive technology, autism  
 A. K. Serna, PhD—health education, school health programs, elementary education  
 P. Sheehy, PhD—mild/moderate and severe disabilities, families, multicultural issues  
 J. Simpson Steele, PhD—elementary teacher preparation, performing arts education, performance ethnography  
 H. Slovin, EdD—mathematics education  
 C. K. Sorensen, PhD—higher education, educational technology  
 E. Spitzer, PhD—English/language arts methods; secondary education, adolescent literacy, disciplinary literacy, teacher literacy identity and transformation, teacher beliefs, sociocultural, psycholinguistic, reader response and multicultural studies, multiple/21st century literacies  
 C. D. Stickley, PhD, ATC—athletic training and biomechanics, exercise physiology  
 N. J. Stodden, PhD—disability and diversity, school-based supports  
 R. A. Stodden, PhD—mental retardation, career/vocational special education  
 E. H. Tamura, PhD—history of education, ethnic and minority issues, Asian-American history  
 K. Tamura, PhD, ATC—athletic training and biomechanics  
 C. Tanabe, PhD—educational law and policy, philosophy of education  
 H. Tavares, PhD—politics of education, critical theories of education  
 J. A. Torralba, PhD—science education  
 S. Twomey, PhD—literacy, gender  
 J. Wells, PhD—autism, severe disabilities  
 B. L. Williams, PhD—art education  
 K. Wong, PhD—Hawaiian language and culture

K. K. Yamamoto, PhD—rehabilitation counseling, transition, and disability-related issues  
 J. Yoshioka, PhD—science education, teacher education  
 D. B. Young, EdD—science education  
 J. Zilliox, EdD—mathematics education  
 D. K. Zuercher, PhD—teacher education, middle level, health, qualitative research methodology, language arts, fine arts

### Cooperating Graduate Faculty

W. S. Nishimoto, PhD—oral history, life history, interviewing in qualitative research

### Affiliate Graduate Faculty

P. G. LeMahieu, PhD—educational research methodology, statistical analysis, evaluations and measurement

The doctor of philosophy in education (PhD) is a college-wide degree awarded for distinguished academic preparation for professional practice and research in the field of education. The program is designed to enhance and facilitate educational, social, and economic growth locally, nationally, and internationally with a pool of highly qualified educational scholars and leaders.

The quality of a candidate’s work is judged by a variety of experiences, which include the College of Education general and specialization area courses, culminating in a field project or internship, a set of comprehensive and final examinations, and a dissertation. The dissertation is based on a selected research problem and is a significant part of the candidate’s experience. Seven areas of specialization are currently available: curriculum and instruction, educational administration, educational foundations, educational policy studies, educational technology, exceptionalities, and kinesiology.

Application for admission to the PhD program will be considered for the fall semester only and is made to the Graduate Division and to the College of Education. Students must meet the requirements of both the Graduate Division and the College of Education, including acceptable scores on the Graduate Record Examination (GRE) verbal, quantitative, and analytic writing assessment. Applicants from foreign countries where English is not the dominant language are required to have a TOEFL score of 600 (regardless of degree completion from other U.S. institutions). A master’s degree from an accredited university or college is required with evidence of a minimum of three years of experience in the field of education. The applicant must demonstrate competence in writing and present a written statement of career goals and academic objectives. At least three letters of recommendation are required. An oral interview may be conducted.

For further information, applicants may contact the PhD in Education Program at (808) 956-7913.

### Specialization in Curriculum and Instruction

The specialization in Curriculum and Instruction develops educational leaders in curriculum development, teaching, curriculum evaluation, and/or teacher education and professional development. The program varies in the number of credit hours required, depending upon the candidate’s qualifications, and includes courses required for all doctoral students enrolled in the College of Education; courses in an area of specialization, such as issues and trends in curriculum, teaching and learning, curriculum and program evaluation, and research on teacher education and professional development; breadth courses; a field project or an internship in college teaching; and the dissertation.

### **Specialization in Educational Administration**

The primary purpose of this area of specialization is to develop educational leaders in elementary, secondary, and higher education settings. Areas of emphasis within the program include management and leadership, organizational theory, policy and governance, organizational socialization, and research methods.

The program includes courses required of all doctoral students in the college, courses in an area of specialization (K–12 or higher education), courses taken outside the department, a field project/internship or an apprenticeship in college teaching, and the dissertation.

### **Specialization in Educational Foundations**

This area of specialization prepares educational professionals with an understanding of the historical, philosophical, cultural, social, and political contexts of education so that they can make informed and wise decisions about educational problems and policy issues. Graduates with the PhD are expected to exert leadership in the field of education and deal with those aspects and problems in society that need to be taken into account in advancing educational thought, policy development, and practice, especially where these concern the social role of the school and other educational agencies. The program of study varies in the number of credits required, depending upon the candidate's qualifications; college and departmental course requirements; course work focused on an area of emphasis in history, philosophy, or comparative or social foundations of education; courses outside the department; a field project/internship or an apprenticeship in college teaching; qualifying and comprehensive examinations; and the dissertation.

### **Specialization in Educational Policy Studies**

Educational policy studies consists of a multidisciplinary program of study and research concerned with identifying and ameliorating significant educational problems. It draws upon concepts and research methods from a variety of fields (including the social sciences, history, law, and philosophy) in defining problems and formulating solutions. The purpose of this specialization is to prepare professionals from diverse backgrounds for effective informed engagement in this process. At the same times, it prepares such persons to pursue research and service agendas geared toward lifting policy analysis, discourse, and action to new levels. The program varies in the number of credit hours required, depending upon the candidate's qualifications, and includes courses required of all doctoral students in the college, courses in the specialization, breadth courses taken outside the specialization, a field project/internship, or an apprenticeship in college teaching, and the dissertation.

### **Specialization in Educational Technology**

This specialization is designed to prepare influential professionals to make original scholarly and technical contributions in the field of educational technology (ETEC). Scholars in the field explore the uses of innovative media and technologies for education, studying aspects from student learning, communication, and cognition to impacts of technology use and change on individuals and institutions. ETEC integrates the theory and practice of design, development, utilization, management, and evaluation of processes and resources for learning and teaching. The specialty has been designed to encourage intellectual excel-

lence and participation in a scholarly community. The program includes courses required of all doctoral students in the college, courses in educational technology, breadth courses taken outside the specialization, a field project/internship or an apprenticeship in college teaching, and the dissertation. Graduates of the program are prepared to assume intellectual and technology leadership roles in many areas, including education, business, health care, military, and government.

### **Specialization in Exceptionalities**

This area of specialization prepares professionals to work as leaders in the education and support of individuals who have unique needs, often due to disabilities. The field is broad, addressing life-span concerns and involving such services as advocacy, family support, community services, vocational training and support, and special education. Graduates of the program are expected to assume leadership roles addressing local, regional, national, and international issues related to research and higher education and/or program development and evaluation. The program varies in the number of credit hours required, depending on the candidate's qualifications, and includes courses required by the college, courses in the specialization, courses that provide an emphasis/breadth, a field project/internship or an apprenticeship in college teaching, and the dissertation.

### **Specialization in Kinesiology**

This area of specialization prepares professionals to work as leaders in adapted physical activity or athletic training (BOC), and applied biomechanics. This discipline is based in the biological and physical sciences as well as in education. This foundation will be reinforced via course work, research, clinical/practical experiences in teaching, supervision, and mentorship experiences in the two areas specified above.

### **Doctor of Philosophy in Educational Psychology (PhD)**

See "Educational Psychology."

### **Doctor in Professional Educational Practice (EdD)**

The EdD professional practice doctorate in education is in line with the recent call by the American Educational Research Association (AERA) to offer advanced degrees of professional practice that are distinct from doctoral research degrees in education. Professional practice doctorates in education are advanced degree programs aimed at preparing professionals for leadership roles at all levels of education, as well as in other positions where the main interest is the application of research in education settings.

### **Completing the EdD Degree**

The EdD at the College of Education will be accessible to qualified candidates across the state, and require approximately 64 semester hours of credit spread over three years of study. Students will be organized in cohorts to encourage collaboration on projects. Instruction will be conducted in a combination of face-to-face course work during the summer, fall, and spring semesters (40%), online instruction (20%), participation in field-based projects during fall and spring semesters (40%).

### **Admission Requirements**

The COE invites applications from prospective students with outstanding academic records and demonstrated potential to succeed in a professional practice doctoral program. The follow-

ing is a summary of admissions requirements and course work. Detailed information is available on the COE website: [coe.hawaii.edu/academics/educational-foundations/edd](http://coe.hawaii.edu/academics/educational-foundations/edd).

- Master's degree
- GPA of >3.0
- At least five years of experience in an education-related field
- Evidence of competence as a writer

## Hawai'i Teacher Licensure Programs

See the "Institute for Teacher Education," "Kinesiology and Rehabilitation Science," and "Special Education" sections within the College of Education for more details on BEd, post-baccalaureate, and MEDT options for teacher licensure.

## Research Units

### Center on Disability Studies

1410 Lower Campus Road, Bldg 171F  
Honolulu, HI 96822  
Tel: (808) 956-5462  
Fax: (808) 956-7878  
Email: [cds@hawaii.edu](mailto:cds@hawaii.edu)  
Web: [www.cds.hawaii.edu](http://www.cds.hawaii.edu)

The Center on Disability Studies (CDS) is a UH Board of Regents recognized organized research unit (ORU) focused on interdisciplinary education, community service and technical assistance, research and evaluation, and information dissemination. The CDS was established in 1988 as the Hawai'i University Affiliated Program, and is a charter member of the Association of University Centers on Disability (AUCD). This national network of university centers focuses on education, research, and service activities, which impact upon the quality of life of persons with disabilities across the nation. Beginning in 1988 with core funding of only \$250,000 and a staff of four, the CDS has leveraged resources to its current level of funding of almost twenty million dollars and 50 projects, with more than 100 faculty and staff.

The CDS conducts a wide range of education, research, and service activities in collaboration with other disciplines. These activities are centered around several initiative areas: school and community inclusion; special health needs; transition, postsecondary education, and employment; mental health; and Pacific outreach. These initiative areas reflect a commitment to evidence-based practice and interdisciplinary cooperation within an academic, community, and family context. Activities strive to be culturally sensitive and demonstrate honor and respect for individual differences in behavior, attitudes, beliefs, and interpersonal styles. CDS activities reflect an organizational commitment to excellence and evidence-based practices. Faculty and staff are mentored, supported, and encouraged to excel.

The CDS offers an interdisciplinary Certificate in Disability and Diversity Studies, a 15-credit course work grounded in the interdisciplinary process to promote effective, efficient, and culturally sensitive services for persons with disabilities of all ages. This program enables graduate students to acquire the skills needed to collaborate through joint planning, decision-making, and goal setting, gaining the perspective of mutual understanding and respect for persons with disabilities and the contributions of other disciplines. The CDS also offers undergraduate students courses in disability studies, disability culture, and creating universally designed environments.

Each year, the CDS sponsors the Pacific Rim Conference on Disabilities (Pac Rim), to promote collaboration and to impact future choices for persons with disabilities. Pac Rim focuses on disseminating information on promising practices, evidence-based research, and emerging issues with the communities it serves. This conference has been held annually for the past 30 years, with an attendance of approximately 1,000 from the state, region, nation, and international communities. Special efforts are made to provide support to enable persons with disabilities, self-advocates, parents, and family members of persons with disabilities to attend.

CDS publishes an international scholarly publication in the field of disability studies, *The Review of Disability Studies: An International Journal (RDS)*. RDS is an internationally-focused academic journal in the field of Disability Studies, containing research articles, essays, bibliographies, and reviews of materials relating to the culture of disability and people with disabilities. It also publishes forums on disability topics brought together by forum editors of international stature. Poetry, short stories, creative essays, photographs, and art works related to disability are also published. RDS is published four times a year, in both print and electronic format.

### Curriculum Research & Development Group

Castle Memorial 132  
1776 University Avenue  
Honolulu, HI 96822  
Tel: (808) 956-7961  
Fax: (808) 956-9486  
Email: [crdg@hawaii.edu](mailto:crdg@hawaii.edu)  
Web: [manoa.hawaii.edu/crdg/](http://manoa.hawaii.edu/crdg/)

The Curriculum Research & Development Group (CRDG), with its partner laboratory school, is an organized research unit in the College of Education at UH Mānoa that contributes to the body of professional knowledge and practice in teaching and learning, curriculum development, program dissemination and implementation, evaluation and assessment, and school improvement. CRDG conducts research and creates, evaluates, disseminates, and supports educational programs that serve students, teachers, parents, and other educators in grades pre-K–20.

CRDG has ongoing research, curriculum development, and teacher professional development efforts in five focus areas: science, technology, engineering, and mathematics (STEM) education; Hawai'i, Asia, and the Pacific; serving diverse learners; educational technology development; and designing educational systems.

CRDG work influences change in curriculum, instruction, assessment, and school systems by creating programs and practices that result in improved student learning. CRDG concerns itself with the P–20 continuum of education, including those who receive and those who deliver educational programs and services. CRDG assembles teams of academic scholars, teachers, design specialists, evaluators, and others to create instructional programs and professional development services that improve learning, teaching, and assessment. While CRDG faculty are concerned with and address current needs, their primary focus is on creating innovations that by their very nature are intended to go beyond current practice to investigating and creating quality programs and materials for the future. Support for CRDG work comes from a mix of funding sources including the UH, other state of Hawai'i agencies, federal governmental

granting agencies, private foundations, and pro bono services from the academic community, locally, nationally, and internationally.

CRDG conducts its work in partnership with the University Laboratory School (ULS). ULS, with its culturally diverse student body, provides an essential experimental ground for developing and testing educational ideas and programs aimed at improving teaching, learning, and assessment. The school enrolls approximately 450 students in grades K–12 and serves as a demonstration site for exemplary school practices.

## Student Organizations

The College of Education Student Association (CESA) is open to all persons interested in teacher education. CESA members participate in college committees and projects and sponsor various activities for education students. CESA is an affiliate of the Student National Education Association. For more information, call (808) 956-7849 or email [cesa@hawaii.edu](mailto:cesa@hawaii.edu).

All doctoral students are eligible to participate in the College of Education Doctoral Student Association (COEDSA). COEDSA sponsors activities and workshops on matters of concern to doctoral students. For more information, visit COEDSA's website at: [www.hawaii.edu/coedsa/](http://www.hawaii.edu/coedsa/).

## Honors and Scholarships

Each semester, the College of Education recognizes the scholastic performance of students who achieve a GPA of 3.5 or better by placing them on the Dean's List. To be eligible for the Dean's List, students must successfully complete at least 15 credits during the semester. Additionally, the college awards the distinction of being student marshals at commencement exercises to those students who demonstrate high scholastic achievement, outstanding character, and extraordinary potential for teaching. Exemplary students also are invited to join the College of Education's chapter of Pi Lambda Theta, a national education honorary society.

The College of Education makes scholarship support available to classified undergraduate and graduate students. In 2012-2013, students received scholarships totaling over \$200,000. For information, contact the Office of Student Academic Services at (808) 956-7849.

# Curriculum Studies

Everly Hall 224  
1776 University Avenue

## Faculty

- \*A. Bartlett, PhD (Chair)—literacy education, children's literature
- K. Cashman, PhD—Indigenous teacher education, art education, storytelling
- \*P. Chinn, EdD—elementary and secondary science education, culture and science studies
- R. Chun, MEd—early childhood education
- \*P. Deering, PhD—social studies, middle school curriculum
- K. K. Faria, MEd—Hawaiian language immersion, teacher education
- \*L. H. L. Furuto, PhD—mathematics education, ethnomathematics, quantitative research
- \*P. Halagao, PhD—social studies, multicultural education, Filipino curriculum and pedagogy
- \*R. Johnson, PhD—elementary and early childhood education
- \*J. Kaomea, PhD (C & I Coordinator)—Indigenous education, qualitative research, elementary mathematics
- G. (Kalehua) Krug, MEd—Hawaiian language immersion education, teacher education
- E. K. Kukahiko, MEd—Hawaiian language immersion education, teacher education
- M. K. Lenchanko, MEdT—Indigenous education and curriculum development
- \*M. Maaka, PhD—Indigenous education, language and cognition, research methodologies
- \*T. O'Neill, PhD—science education
- \*J. A. Torralba, PhD—mathematics, science and technology education
- \*S. Twomey, PhD—critical literacy, teacher education, poststructuralism, feminist theory, drama education
- \*B. L. Williams, PhD—art education

## Cooperating Graduate Faculty

- K. F. Berg, PhD—educational psychology, cooperative learning
- R. S. Black, EdD—mental retardation transition, students at risk, research design
- A. J. Dawson, PhD—mathematics education
- B. D. DeBaryshe, PhD—educational measurement, early childhood
- D. P. Ericson, PhD—philosophy of education, educational policy
- D. Grace, EdD—language, literacy, media studies, early childhood
- A. Henward, PhD—early childhood education, media, culture
- R. K. Hetzler, PhD—exercise physiology with interest in body composition and metabolism
- C. Kessler, EdD—K-6 social studies-history education; anti-bullying; health advocacy
- I. F. Kimura, PhD—kinesiology, athletic training and biomechanics
- M. I. Martini, PhD—parenting and family relationships across cultures
- H. McEwan, PhD—curriculum theory, philosophy of teaching
- J. Moniz, PhD—multicultural education
- N. Murata, PhD—general physical education, pedagogy, adapted physical education, special education/transition, and professional development
- M. E. Pateman, HSD, MPH—health education
- J. H. Prins, PhD—kinesiology
- S. B. Roberts, EdD—curriculum administration, policy, professional socialization, school administration
- J. Skouge, EdD—exceptionalities
- R. A. Stodden, PhD—mental retardation, career/vocational special education

L. Venenciano, PhD—educational psychology, mathematics education, teacher education  
 F. C. Walton, PhD—career, technology and technical education  
 D. B. Young, EdD—science education  
 J. Zilliox, EdD—elementary mathematics

**Degrees Offered:** Graduate Certificate in Preschool-3rd Grade, Graduate Certificate in Reading K-12, MEd in curriculum studies, MEd in early childhood education, PhD in education with specialization in curriculum and instruction

## The Academic Program

The Department of Curriculum Studies (EDCS) offers advanced degrees at the master's level in curriculum studies and early childhood education (MEd-CS and MEd-ECE), and, as part of a college-wide doctoral degree, in curriculum and instruction (PhD). Students may also study for 15-credit graduate certificates in Preschool-3rd Grade or Reading K-12. All programs focus on the educational needs of children and adolescents, teaching, learning, and curriculum.

The students at UH Mānoa are ethnically diverse as are the students in Hawai'i's school system. Students in EDCS programs, therefore, learn and teach in a unique multicultural environment.

## Graduate Study

General information, policies, requirements, and procedures of the Graduate Division are in the "Graduate Education" section of this *Catalog*.

### Master of Education in Curriculum Studies

The Department of Curriculum Studies offers a 30 credit program leading to the degree of master of education in curriculum studies. It is designed to serve licensed teachers who wish to learn about and inquire into the areas of PK-3 early childhood, elementary, middle level, secondary education, or K-4 education.

Students in elementary and secondary education specialize in art, language arts/literacy, mathematics, science, or interdisciplinary subjects. Other specializations may be possible if advisors are available. K-12 specializations include disabilities studies, multicultural education, language, reading, and social studies education. MEd-CS, Reading K-12 concentration may be used to add the field, Reading K-12, to a Hawai'i Standard or Advanced License. Fifteen credit graduate certificates are available in Preschool-Grade 3 and Reading, K-12, as part of the MEd-CS degree or separately.

The MEd program in curriculum studies equips teachers to fill a variety of teaching and resource roles at an advanced level. The program helps teachers become better informed about the developmental and educational needs of children and adolescents from various types of communities; skillful in diagnostic and evaluation procedures and in developing educational programs to meet individual and group needs; versatile in their teaching strategies; capable of providing leadership in a classroom, school, or school system; knowledgeable about issues, trends, and research in their fields; systematic in their reflective assessment of trends and innovations, and well-informed about new technology and its applications.

## Admission Requirements

In addition to the requirements of the Graduate Division, applicants for the MEd in the curriculum studies program must provide the following:

1. Evidence of adequate successful coursework and/or experience related to the concentration area selected.
2. Evidence of student teaching, teaching, or experience designing and/or implementing curriculum in educational settings.
3. Three (3) professional references from people who are able to comment on the quality of the applicant's experience, ability to pursue graduate study, and character.

## Program Requirements

MEd-CS courses are scheduled to meet the needs of educators and may be completed at least partially online.

Additional details about the program are available at [coe.hawaii.edu/academics/curriculum-studies](http://coe.hawaii.edu/academics/curriculum-studies). Please download Handbook 1: Prospective and New Students.

### Plan A (Thesis) Requirements

The Plan A program is designed primarily for students interested in research and in writing a thesis. It requires a minimum of 30 credit hours with at least 12 credit hours in curriculum studies, not counting 699V or 799V. Of the 30 credit hours, 24 credit hours must be approved course work. Required courses are EDCS 622, 667, and two research methods courses. A minimum of 12 credit hours is to be taken in a related field, which may be in a concentration area within the Department of Curriculum Studies, in other departments in the College of Education, or in a discipline in one or more of the other colleges/schools at UH Mānoa. Of the approved courses, 18 credit hours must be at the 600 to 700 level (excluding 699 and 799). Six credit hours (EDCS 700) are required for the thesis.

### Plan B (Non-thesis) Requirements

The Plan B program is designed primarily for students who wish to strengthen their teaching in selected areas of teacher education and curriculum studies. It requires a minimum of 30 credit hours of approved course work, with a minimum of 12 credit hours in curriculum studies (excluding EDCS 699). Required courses are EDCS 622, 667, and two research methods courses. A minimum of 18 credit hours is to be taken in a related field. The related field may be in a concentration area within the Department of Curriculum Studies, in other departments in the College of Education, or in a discipline in one or more of the other colleges/schools at UH Mānoa. Of the approved courses, 18 credit hours must be at the 600 to 700 level, excluding 699. A maximum of 6 credit hours of 699 may be applied to the degree program.

The Plan B program also requires a culminating project.

For further information and application forms, go to [coe.hawaii.edu/academics/curriculum-studies](http://coe.hawaii.edu/academics/curriculum-studies) or contact the secretary of the Department of Curriculum Studies, Everly Hall 224, (808) 956-4401.

### Graduate Certificate (GCERT) in Preschool-3rd Grade (PK-3)

The PK-3 Graduate Certificate program is a 15-credit post-baccalaureate program focusing on preschool through 3rd grade education. The certificate may be earned as a certificate-only program, or as part of the MEd-CS with 15 additional credits and a Plan A—Thesis or Plan B—Project, Paper, or Portfolio.

The certificate provides a foundation for educators to develop expertise and become informed about the developmental and educational needs of children 3-8 years old and to work in partnership with their families and communities. Oriented to the National Association for the Education of Young Children (NAEYC) professional standards and National Board Professional Teaching Standards (NBPTS) standards for early childhood (PK-3) generalists, the Certificate provides opportunities to develop knowledge and skill in supporting the needs of preschool and primary aged children. Hawai'i's K-3 teachers are the most likely audience, but other interested practitioners can be considered.

The PK-3 Graduate Certificate enables candidates to increase knowledge in the areas of PK-3 ideologies, curriculum models and theories; learn about and develop skill in designing and implementing developmentally appropriate programs that meet individual and group needs in a variety of PK-3 settings; support early literacy and language development of young children; begin to engage in action research in their own settings; and reflect on their own teaching practices.

The cohort model encourages peer support and active engagement in learning. Courses are hybridized (a combination of campus and on-line) to meet statewide needs. A laptop computer and internet access is required. Since many assignments are field-based, access to a PK-3 classroom is also essential.

### Admission Requirements

Admission to the PK-3 Graduate Certificate program is available for fall semesters in even numbered years. Applications are accepted through the previous **March 1**. After this date, they will be reviewed on a space available basis. Students must meet the requirements set by the Graduate Division and the MEd-CS for admission. If the MEd-CS is pursued concurrently, students must apply for the Graduate Certificate as a separate program through Graduate Division to receive the certificate.

In addition to the application materials required by the Graduate Division, prospective students must also submit the Curriculum Studies application packet and select the Graduate (PK-3) Certificate (see Curriculum Studies, PK-3 Graduate Certificate, How to Apply web page to download the packet). Because the number of students who can be admitted is limited, meeting the minimum established criteria does not guarantee admission.

### Program Requirements

The PK-3 Graduate Certificate is comprised of five 3-credit required courses and is completed in 2 years. The first course explores the historical, philosophical and socio-cultural foundations of the field of early childhood education. This is followed by a course on curriculum improvement in early childhood programs. In the second year of the program, students enroll in a course on early language and literacy development and another that explores issues and trends in the field. They also participate in a year round coaching course in developmentally appropriate pedagogy for early childhood programs serving indigenous populations. In addition, the culminating project for the certificate is a professional portfolio aligned with NAEYC and NBPTS Early Childhood Generalist (PK-3) professional standards.

Courses follow the UH Mānoa semester schedule, and are offered in fall and spring semesters. The coaching course includes a two-day orientation held in the summer between years 1 and

2, and workshops on 4-6 weekends during the academic year. All other courses are offered in a combination of evening face-to-face and online formats.

### Graduate Certificate (GCERT) in Reading K-12

The Graduate Certificate program in Reading K-12 is a 15-credit post-baccalaureate program. The certificate may be earned as a certificate-only program, or as part of the MEd-CS with 15 additional credits and a Plan B Professional Teaching Portfolio.

The purpose of the certificate is to prepare teachers and other educators to be school literacy leaders, literacy coaches, and reading specialists. Based on International Reading Association standards, it provides knowledge and hands-on experiences so educators improve their own literacy instruction and support school and/or district change.

Hawai'i's teachers and educational officers are the most likely audience, but other interested educators will be considered. Participants learn about and apply advanced topics in literacy, such as adapting instruction for diverse students, using formative assessments to guide instruction, coaching teachers, and creating and delivering effective professional development. Since many assignments are field-based, access to a K-12 classroom is required.

The Reading K-12 Graduate Certificate is theory, standards, and research-based. A cohort model encourages peer support and active engagement in learning. Most courses are hybrid (combination of campus and on-line), depending on each cohort's preference.

### Admission Requirements

Admission to the Reading K-12 Graduate Certificate program is available for spring semesters in odd numbered years, with applications due the previous **October 1** (International students, **February 1**). Students must meet the requirements set by the Graduate Division and the MEd-CS for admission. If the MEd CS is pursued concurrently, students must apply for the Graduate Certificate as a separate program through Graduate Division to receive the certificate.

In addition to the application materials required by the Graduate Division, prospective students must also submit the Curriculum Studies application packet and select the Reading K-12 Certificate (see Curriculum Studies, Reading K-12 Graduate Certificate, How to Apply web page to download the packet). Because the number of students who can be admitted is limited, meeting the minimum established criteria does not guarantee admission.

### Program Requirements

The Reading K-12 Graduate Certificate is comprised of five 3-credit required courses and is completed in 2 years. The first course explores advanced topics in reading, followed by two literacy assessment courses (classroom and larger-scale assessment) and two leadership courses (literacy coaching and professional development implementation). One assessment course and one leadership course are designated as practicums, although other courses also involve applied projects. The culminating project is to create and implement a Professional Development Plan in your own work environment.

Courses follow the UH Mānoa semester schedule, and are offered in fall, spring, and sometimes summer semesters. Courses are scheduled to meet the needs of educators, and are

either entirely online or a combination of online and face-to-face classes.

### **Master of Education in Early Childhood Education**

The Departments of Curriculum Studies and Special Education in the College of Education and the Department of Family Resources in the College of Tropical Agriculture and Human Resources (CTAHR) offer a 30 credit interdisciplinary program leading to the degree of Master of Education in Early Childhood Education (MEd-ECE). The program is designed to support professional development and promote leadership in personnel who work in programs with children between infancy and five years of age.

Course of study includes understanding the developmental and educational needs of young children ages birth to five; knowledge of family systems, needs and resources; development of the ability to design and implement learning environments and programs to meet the needs of all young learners ages birth to five including those with disabilities; current issues and trends in early education policy, assessment, and research; and development of reflective practice and ethical leadership skills.

### **Admission Requirements**

In addition to the requirements of the Graduate Division, applicants for the MEd in Early Childhood Education must provide the following:

1. Evidence of successful academic performance in child development and early childhood education. This includes a minimum of one course each in:
  - a. child development, age birth to five;
  - b. early childhood education;
  - c. developmentally appropriate practice;
  - d. family studies/working with families and communities;
2. Documented experience of work with young children and their families or in early childhood program administration or public policy;
3. Three (3) professional references from people who are able to comment on the quality of the applicant's experience, ability to pursue graduate study, and character.

### **Program Requirements**

30 credit hours in early childhood regular education, early childhood special education, and child development are required. Students take a common core of 18 required credits and select 12 credits of specialization courses in an area of interest within their major.

The required core of 18 credits is taken over the course of three Summer Institute sessions on the UH Mānoa campus. Core courses are offered through the Departments of Curriculum Studies and Special Education in the College of Education, and the Department of Family Resources in the College of Tropical Agriculture and Human Resources. The balance of 12 elective credits is taken either online or on ground, based on student interest and need, in consultation with a program advisor.

### **Plan A (Thesis) Requirements**

The Plan A program is designed for those who are interested in research and writing a thesis and who may be interested in pursuing a later doctoral degree. Students completing a Plan A will take a minimum of 30 credit hours including 18 credits at the 600 level or higher, a core consisting of 18 credits, 6 credits of electives, and 6 credits of thesis research (EDCS 700). The culminating experience for Plan A students will be a thesis based on original research.

### **Plan B (Non-Thesis) Requirements**

The Plan B program is for those who wish to focus on strengthening professional knowledge and skills. Students completing a Plan B will take a minimum of 30 credit hours including 18 credits at the 600 level or higher, a core consisting of 18 credits, 9-11 credits of electives and 1-3 credits of Plan B preparation. The culminating experience for Plan B students will be the submission of a portfolio that documents their competency in demonstrating program standards. The program advisor will guide and direct the development of the portfolio.

For further information and application forms, go to [coe.hawaii.edu/academics/curriculum-studies/med-ece](http://coe.hawaii.edu/academics/curriculum-studies/med-ece) or contact the Department of Curriculum Studies, Graduate ECE Program at (808) 956-0337.

### **Doctoral Degree**

The doctor of philosophy degree in education (PhD) is a college-wide degree awarded for distinguished academic preparation for the field of education.

The PhD in Education, specialization in Curriculum and Instruction, develops educational leaders in curriculum development, teaching, curriculum evaluation, and/or teacher education and professional development. The program varies in the number of credit hours required, depending upon the candidate's qualifications, and includes courses required for all doctoral students enrolled in the College of Education; courses in an area of specialization, such as issues and trends in curriculum, teaching and learning, curriculum and program evaluation, and research on teacher education and professional development; breadth courses; a field project or an internship in college teaching; and the dissertation.

For additional information, see the "Doctoral Degrees" section within the College of Education section of this *Catalog* or visit [coe.hawaii.edu/academics/curriculum-studies/phd-ci](http://coe.hawaii.edu/academics/curriculum-studies/phd-ci).

## Faculty

\*R. Heck, PhD (Chair)—leadership and governance, organizational theory, policy

\*C. Collins, PhD—higher education social benefits, policy, globalization, poverty reduction

\*E. K. Enomoto, EdD—organization, technology, politics of education

\*L. K. Johnsrud, PhD—higher education, academic governance and leadership, organizational theory, ethics

\*S. B. Roberts, EdD—curriculum administration, policy, professional socialization, school administration

## Cooperating Faculty

M. K. P. A Benham, EdD—educational leadership and community-based leadership, policy, indigenous critical studies, Mo'olelo and narrative as pedagogy and methodology, indigenous post-secondary education, community engagement

**Degrees Offered:** MEd in educational administration, PhD in education with specialization in educational administration

## The Academic Program

The department offers graduate programs leading to the MEd in educational administration (EDEA) for both lower (K-12) and higher education and the PhD with a specialization in educational administration. The educational administration program includes both introductory courses and advanced seminars in the following areas of study:

1. Theories, policies, principles, and practices of educational administration;
2. Organizational theory and change;
3. Legal/financial issues;
4. Educational leadership (problems, strategies, and solutions); and
5. Research and data utilization

The educational administration program prepares educational administrators and supervisors for a broad range of education-related administrative positions. These positions include elementary and secondary school administrators, higher education staff positions, and department and grade-level chair at lower and higher education institutions.

Participants in the educational administration program will have the opportunity to study in a multicultural setting that includes students from the Pacific and Asia, as well as from private and public schools. The department's focus on both higher and lower education provides students the opportunity to explore a wide range of national and international issues of importance to education and to specialize in an area of interest.

## Graduate Study

### Master of Education in Educational Administration

#### Admission Requirements

To be admitted, students must meet Graduate Division admissions requirements. There are two program emphases: K-12 administration and higher education administration.

Students who seek the MEd degree in K-12 educational administration must have appropriate job-related experience to evidence familiarity with teaching or other student support roles (i.e., 2 years of classroom teaching or school counseling experience). The basic program is designed to prepare educational administrators and supervisors for a broad range of education-related elementary and secondary administrative positions. For applicants working in the Department of Education currently as teachers or vice principals, there are seven courses that are required for principal certification (EDEA 601, 610, 620, 630, 645, 670, 780F). Applicants should check with the Hawai'i Department of Education for additional requirements to become an administrator in the public schools.

For students who seek the MEd degree in higher education, the program is designed for those with interest in mid-level administrative and staff positions in higher education administration (e.g., admissions, housing, student activities, financial aid, placement, counseling, and health services). Experience in working in higher education is desirable.

Students are encouraged to plan an individual program of electives to prepare them for specific educational positions.

There are two basic degree options, Plan A and Plan B, both of which require a minimum of 36 credits.

#### Plan A (Thesis)

For the K-12 emphasis, program requirements include: (1) EDEA 601, (2) 602, (3) one 700 level seminar course, (4) one course in organizations and school contexts (e.g., 610, 650, 652, 670), (5) one course in leadership and policy (e.g., 642, 645, 675, 676), (6) one course in legal/financial processes (e.g., 620, 630), (7) 6 credits of thesis research, (8) two elective courses in educational administration, and (9) two courses from any related graduate field of study (with approval of advisor) including educational administration.

For the higher education emphasis, program requirements include: (1) 657, (2) 602, (3) one 700 level seminar course, (4) one course in higher education organizations (e.g., 646, 650, 662), (5) two courses in leadership (e.g., 642, 660, 661, 663), (6) one course in legal/financial processes (e.g., 620HE, 630HE), (7) one additional course in research methods (e.g., 604, 629), (8) six credits of thesis research, and 2 related courses from any related graduate field of study with approval of advisor.

#### Plan B (Non-thesis)

For K-12, same as Plan A thesis (36 credits minimum): Three (3) credits of directed research instead of six (6) credits of thesis and an additional course in educational administration.

For higher education, same as Plan A thesis (36 credits minimum): Three (3) credits of directed research instead of six (6) credits of thesis research and an additional related course or educational administration course.

Selection of specific courses in the above areas will be by the candidate with the advice and approval of the student's faculty advisor.

The department will accept a maximum of 9 transfer credits after enrolling at UH Mānoa as a graduate student with advanced approval by the graduate program. Students should refer to the Graduate Division website for the requirements for the transfer of credits.

### Doctoral Degree

The doctor of education (PhD) is a college-wide degree awarded for distinguished academic preparation for professional practice in the field of education.

The primary purpose of a PhD with a specialization in educational administration is to provide advanced graduate study to highly qualified educational leaders in administration. The program includes course work developing knowledge and skills related to educational policy and governance, leadership in organizations, administrative theory and practice, and research.

The program includes courses required for all doctoral students enrolled in the College of Education; courses in educational administration leading to a specialization in either general education (K-12) or higher education; course work taken outside the field of educational administration; an internship within a school, school district, or post secondary or other educational institution; and the dissertation.

For further information, see “Doctoral Degrees,” or write to the Department of Educational Administration Chair, College of Education, University of Hawai‘i at Mānoa, 1776 University Avenue, Honolulu, HI 96822; (808) 956-7843.

## Educational Foundations

Wist 113  
1776 University Avenue  
Honolulu, HI 96822  
Tel: (808) 956-7913  
Fax: (808) 956-9100  
Email: [edef@hawaii.edu](mailto:edef@hawaii.edu)  
Web: [coe.hawaii.edu/academics/educational-foundations](http://coe.hawaii.edu/academics/educational-foundations)

### Faculty

- \*E. H. Tamura, PhD (Chair)—history of education, minority issues, Asian-American history
- \*B. Cheng, EdD—comparative and international education, education policy
- \*X. Di, EdD—philosophy of education, history of education, sociology of education
- \*D. P. Ericson, PhD—philosophy of education, educational policy, international education
- \*B. J. Lum, PhD—philosophy of education, human development, peace education
- \*H. McEwan, PhD—curriculum theory, teacher education research, philosophy of education
- \*G. G. Reed, PhD—social and cultural foundations, values and education, comparative education
- \*C. S. Tanabe, PhD, JD—educational law and policy, philosophy of education
- \*H. Tavares, PhD—politics of education, educational policy studies, critical theories of education

### Cooperating Graduate Faculty

W. S. Nishimoto, PhD—oral history, life history, interviewing in qualitative research

### Affiliate Graduate Faculty

- D. L. Grossman, PhD—civic/citizenship education, comparative/international/cross-cultural education, teacher education
- L. K. Menton, PhD—social studies education
- Y. Takei, PhD—sociology, comparative/international education

**Degrees Offered:** MEd in educational foundations, PhD in education with specialization in educational foundations

### The Academic Program

The Department of Educational Foundations takes an interdisciplinary approach to the critical examination of educational issues by focusing on explaining and interpreting education—asking and responding to the “why” questions. The department is committed to the professional and personal intellectual growth of educators and laypersons who wish to broaden and deepen their understanding of educational problems, questions, issues and controversies. The department adopts a multidisciplinary approach to educational inquiry by drawing on the disciplines of the humanities and social sciences. We value and affirm multiple perspectives, multiple voices, and collaboration in a program that is committed to engaging and deepening the prospect of democratic education. We seek to move our students toward greater appreciation of complexity, clarity, and compassion through our curriculum.

Related to the traditional disciplines are the department’s four areas of emphasis: history of education, philosophy of education, socio-cultural foundations, and international/comparative education. Related areas of study include educational policy studies, the politics of education, legal issues in education, and multicultural education.

Graduates with the MEd degree are expected to be able to analyze alternatives in educational thought, policy and practice related to the social and ethical problems faced by schools and other educational agencies at the state, national and international levels. Graduates with the PhD are expected to exert professional expertise in the field of education and deal with those aspects and problems in society that need to be taken into account in advancing educational thought, policy development and practice, especially where these concern the social role of the school and other educational agencies.

### Graduate Study

#### Master of Education in Educational Foundations

The department offers programs of graduate study leading to a MEd in educational foundations, informed by history of education, philosophy of education, social/cultural foundations of education, and/or comparative/international education.

#### MEd Program Options

##### Option I: Plan A Thesis (30 credits)

- Department core (12 credits)
- One research course (3 credits)
- Three electives (including a seminar) in area of emphasis and/or cognate (9 credits)
- Thesis 700 (6 credits)
- Committee: chair (full graduate faculty), member (graduate faculty), outside member (full graduate faculty)
- Culminating experience: oral defense of thesis

**Option II: Plan B Non-thesis (30 credits)**

- For field based educators and others who choose to do a project based study
- Department core (12 credits)
- One research course (3 credits)
- Three electives, including a seminar (9 credits)
- Directed reading for developing and carrying out a project and writing related paper (6 credits)
- Committee: chair, plus one reader (who must have at least a master's degree) who guide the student through the conceptualization and implementation of the project and the writing of the Plan B paper
- Culminating experience: A final paper that describes and evaluates the final project, and an oral presentation

**Option III: Summers Only Master in Education (30 credits)**

- Focus on leadership in the Asia/Pacific Region (EdLeads)\*
- Fixed sequence of courses (30 credits)
- Committee: chair (member of graduate faculty) and reader (who must have at least a master's degree) who guide the student through the conceptualization and implementation of the project and the writing of the Plan B paper
- Culminating experience: A final paper that describes and evaluates the final project, and an oral presentation

**Option IV: Summers Only Master in Education (30 credits)**

Focus on private school leadership in the Pacific Basin (PSL)\*

- Fixed sequence of courses (30 credits)
- Committee: chair (member of graduate faculty) and reader (who must have at least a master's degree) who guide the student through the conceptualization and implementation of the project and the writing of the Plan B paper
- Culminating experience: a final paper that describes and evaluates the final project, and an oral presentation.

For further information, contact the graduate chair, Department of Educational Foundations.

**Doctoral Degree**

The Doctor of Philosophy in Education (PhD) is a college-wide degree awarded for distinguished academic preparation for scholarly professional practice in the field of education.

Educational foundations is a specialization under the PhD program of the College of Education. The program prepares educational professionals with an understanding of the historical, philosophical, cultural, social, and political contexts of education so that they can make informed and wise decisions about educational problems and policy issues. Graduates with the PhD are expected to exert leadership in the field of education and deal with those aspects and problems in society that need to be taken into account in advancing educational thought, policy development, and practice, especially where these concern the social role of the school and other educational agencies. The program of study varies in the number of credits, depending upon the candidate's qualifications and will include the following: college courses required of all students enrolled in the PhD program of the College of Education; department courses required of all students with a specialization in educational foundations; area of emphasis course work focused in history, philosophy, comparative, or social/cultural foundations of education; cognate-field course work usually taken outside of the College of Education; a field project or an internship; qualifying and comprehensive examinations; and

the dissertation. The department also contributes to the policy studies concentration in the PhD program.

For further information concerning the College of Education PhD program, see "Doctoral Degrees," or write to the graduate chair, Department of Educational Foundations, 1776 University Avenue, Honolulu, HI 96822.

**Educational Psychology**

Wist Hall 214

1776 University Avenue

Honolulu, HI 96822

Tel: (808) 956-7775

Fax: (808) 956-6615

Web: [coe.hawaii.edu/academics/educational-psychology](http://coe.hawaii.edu/academics/educational-psychology)

**Faculty**

- \*M. Salzman, PhD (Chair)—cross-cultural psychology, cultural psychology, indigenous psychology
- \*P. R. Brandon, PhD—program evaluation, study of program implementation and research on professional development
- \*M. K. Iding, PhD—cognition, learning from multimedia and computer-based resources, science learning, university teaching
- \*S. Im, PhD—multivariate analysis, psychometric models for cognitive diagnosis, setting cut off scores in large scale assessment
- \*M. K. Lai, PhD—program evaluation, research methods
- \*N. Lewis, PhD—underrepresented students' interest in and persistence to doctoral education in science, technology, engineering, and mathematics (STEM) and program evaluation
- \*M. Liu, PhD—statistical and psychometric models and their application in education or other disciplines within social and behavioral science
- \*K. Ratliffe, PhD—learning and development in exceptional students, culturally diverse educational environments, family influences on learning and development
- \*L. Yamauchi, PhD—cognitive development, cultural influences on learning, minority students and schooling

**Cooperating Graduate Faculty**

- B. D. DeBaryshe, PhD—social development, parent-child relations, stress and resilience
- R. Heck, PhD—organizational theory, leadership, policy and quantitative methods
- A. Maynard, PhD—children's teaching abilities, sibling interactions, cultural change and socialization, and literacy

**Affiliate Graduate Faculty**

- M. E. Brandt, PhD—cognitive development, culture and cognition, alternative assessment
- P. G. LeMahieu, PhD—student assessment, program evaluation

**Degrees Offered:** MEd in educational psychology, PhD in educational psychology

**The Academic Program**

The Department of Educational Psychology promotes inquiry in human learning and development within the context of a diverse society. Specifically, the major areas of study include human learning, human development, research methodology, statistics, measurement, and assessment and evaluation.

The department's MEd and PhD programs prepare individuals to perform career activities—basic and applied research,

teaching, and mentoring—in universities, school systems, and other human service institutions and agencies, both public and private.

## Graduate Study

Graduate study is primarily oriented toward students with specific professional educational objectives, but it is also applicable to students who find a major in educational psychology congruent with their personal objectives, and who wish to engage in elective study to the greatest extent possible while fulfilling degree requirements.

### Initial Faculty Advising

Upon entrance to the graduate program, each student is assigned a temporary advisor to facilitate the student's progress through the program. Initial assignment or choice of a temporary advisor in no way obligates the student to select the temporary advisor as his or her program advisor or to include the temporary advisor as his or her committee member. Likewise, the temporary advisor has no obligation to serve on the student's committee. The system of temporary advisors is merely a way of identifying a specific faculty member the student can call upon for advice. The temporary advisor can be changed at any time.

In order to maintain a close working relationship between the students and the faculty, students are required to undertake self-assessment activities every semester. After completing a written self-assessment, students meet with the EDEP faculty at the end of each semester to review and direct progress toward their degrees. Students who have successfully defended their proposal and are making good progress are not required to attend these meetings.

### Master of Education in Educational Psychology

The MEd program in Educational Psychology is directed toward increasing students' competence in educational inquiry. The MEd in Educational Psychology has two broad strands: (1) General Educational Psychology; (2) Measurement, Statistics, and Evaluation (MSE). The General Educational Psychology strand focuses on the study and application of psychological principles to understand cognitive, developmental, and socio-cultural factors affecting behavior, learning, and achievement and to further develop educational interventions and programs. The MSE strand addresses quantitative approaches to educational inquiry and the development of quantitative methods that underpin the development of evidence-based research in education. Courses are offered in the areas of human learning, cognition, and development; statistics, measurement, evaluation, and research methodology. The program prepares students for professional careers as practitioners and researchers in education, evaluators, and testing and measurement specialists.

### Admission Requirements

In addition to the application form required by the Graduate Division, prospective students must also submit

- 1) Department of Educational Psychology application form to the department.
- 2) Three recommendation forms attesting to academic and professional strengths to the department. Academic recommendations are preferred.
- 3) Transcript(s) of all prior undergraduate and graduate course work to the Graduate Division.

- 4) For non-native speakers of English, a minimum TOEFL score of 600/100 unless waived in accordance with Graduate Division guidelines.

**Note:** Applications for admission to the MEd program must be received by **February 1** for the fall semester and by **September 1** for the spring semester. Application materials are available on the EDEP website, [coe.hawaii.edu/academics/educational-psychology/med/how-to-apply](http://coe.hawaii.edu/academics/educational-psychology/med/how-to-apply).

### Degree Requirements

After admission, the student and his or her temporary advisor detail a program of study, which includes a minimum of 30 credits for Plan A (Thesis) and Plan B (Non-thesis) candidates. Courses at or above the 400 level may be applied to an individual's program of study though a minimum of 18 credits must be earned in courses numbered 600-798. Up to 12 credits completed prior to admission to the program may be transferred for credit toward the degree. Students in the general Educational Psychology strand are required to take EDEP 416, 601, 608, 611, 661 and a graduate seminar (EDEP 768) as part of their 30 credits. Students in the MSE strand are required to take EDEP 601, 604, 608, 611, 616, 661 and two elective courses from the following: EDEP 605, 606, 612, 626, 768D, 768E or 768G (including at least one seminar).

A minimum residency of two semesters of full-time study or the equivalent in credits at UH Mānoa is required. Relatively soon after entering the program, students are expected to choose between Plan A and Plan B options.

### Plan A (Thesis)

Students whose objective is doctoral study are recommended to define a Plan A program of study at the master's level. Plan A candidates must take at least 6 credits of thesis research (EDEP 700). At the discretion of the thesis chair, up to five credits of EDEP 699, previously completed, may be substituted for five of the six EDEP 700 credits. The Graduate Division requires that a minimum of 12 credits must be earned in courses numbered 600-798, in addition to six credits of directed reading (EDEP 699) and thesis research (EDEP 700).

The development of a thesis proposal is concurrent with the selection of a thesis chair and committee. The proposal includes a literature review that contextualizes the research question(s) within existing research and theory. The proposal also includes a description of the proposed research methods, including how the data will be analyzed. Students work with their thesis chair to develop their proposal. After the thesis proposal is defended and approved, Master's Form II is submitted to the Graduate Division, and the student may enroll in thesis research (EDEP 700) at the beginning of the next academic semester. Students must register for at least one EDEP 700 credit during the semester in which they graduate and apply for graduation by the appropriate deadline.

It is the responsibility of the student to keep all members of the thesis committee informed of the scope, plan, and progress of the thesis research. Copies of the completed thesis must be submitted to committee members at least two weeks prior to the date of the final oral examination by the committee. Upon successful defense of the thesis and subsequent completion of revisions, Master's Form III is submitted to the Graduate Division. When the final edited document is submitted to the Graduate Division, Form IV should be submitted at the same time.

### Plan B (Nonthesis)

The culminating requirement is a Plan B project/paper, an original educational inquiry resulting in a product that informs educational practice. The development of a Plan B project is concurrent with the selection of a Plan B advisor. Students develop a 8-10 page proposal outlining their projects that are then approved by their advisors. Not more than 9 credits in directed reading/research (EDEP 699) may be applied to meet degree requirements. A presentation of the Plan B project/paper is required during their final semester.

If candidates are not enrolled in other courses, they must be enrolled in at least one credit of EDEP 699, Directed Reading and Research. Students should enroll in EDEP 500 if all other requirements are complete. EDEP 500 is a one-credit course evaluated on a Satisfactory/Unsatisfactory basis and does not count toward credit-hour requirements. Students must apply for graduation when registering for their final semester of study.

### Doctoral Degree

The PhD program in educational psychology is directed toward increasing the candidate's competence in educational inquiry. In general, the domain of inquiry encompasses human learning and development in the context of education. Courses are offered in the areas of statistics, measurement, evaluation, and research methodology; and human learning, cognition, and development. The program prepares individuals to conduct basic and applied research and evaluation in public and private educational settings and provide instruction and consultation appropriate for all educational levels.

### Admission Requirements

In addition to the application form required by the Graduate Division, prospective students must also submit:

- 1) Department of Educational Psychology application form to the department.
- 2) Three recommendation forms attesting to academic and professional strengths to the department. Academic recommendations are preferred.
- 3) Transcript(s) of all prior undergraduate and graduate course work to the Graduate Division.
- 4) Official scores on the Graduate Record Exam Aptitude Test to the Graduate Division.
- 5) For non-native speakers of English, a minimum TOEFL score of 600/100 unless waived in accordance with Graduate Division guidelines.
- 6) Evidence of research competence (e.g., master's research thesis, a published or publishable article, or a research proposal), to the department.

[**Note:** Applications for admission to the PhD program are considered for the fall semester only and must be received by **February 1** (applications from international students are due January 15).] Application materials are available on the EDEP website.

### Procedure for Completing the PhD Degree

Each student works closely with members of the graduate faculty to define an individual program of study. A typical program spans three to five years of concentrated study within the broadly defined discipline of educational psychology.

Program requirements include (a) completion of required core courses; (b) completion of required interdisciplinary specialization; (c) college teaching experience in conjunction with

one or more faculty members; (d) documentation of directed research experiences; and (e) a minimum residency of three semesters of full-time work or the equivalent in credits at UH Mānoa.

### Completion of Core Courses

Students must receive a grade of at least B in all core courses. The purposes of the core courses are (a) to determine whether to encourage students to proceed in the PhD program; and (b) to develop an appropriate plan of study; and (c) to advance to candidacy. See EDEP website for a list of core courses, [coe.hawaii.edu/academics/educational-psychology/phd-ep](http://coe.hawaii.edu/academics/educational-psychology/phd-ep).

### Dissertation Prospectus

The development of a dissertation prospectus is done in conjunction with the identification of the dissertation committee chair. The prospectus is a 10-15 page description (exclusive of references) of the proposed dissertation that is developed in consultation with a prospective chair and submitted to the faculty. The prospectus includes the statement of the problem; its relevance to educational psychology; the design of the investigation; and analysis. If there are no major objections to this prospectus from the graduate faculty as a whole, the student forms a doctoral committee based on mutual interest.

### Comprehensive Examination

The comprehensive examination is taken after the prospectus is approved and before the proposal defense. Committee members typically formulate two or three questions that may be related to the student's proposal but may be broader in scope. Typically, students take between two to four weeks to complete the written comprehensive exam; however, each committee determines the exact timeline. An oral defense will be scheduled after the written answers are turned in. The committee will have at least two weeks to read the written answers before the oral defense. A student who fails any portion of the comprehensive examination twice will be dismissed from both the graduate program and the Graduate Division, unless recommended otherwise by the graduate chair.

### Dissertation Proposal

Upon passing the comprehensive examination, the student develops a dissertation proposal in consultation with the dissertation committee. The dissertation proposal includes a literature review that contextualizes the question(s) within existing research and theory. The proposal also includes a description of the proposed research methods, including how the data will be analyzed. A formal oral defense of the proposal is made by the student to the doctoral committee in order to confirm approval of the proposed research. When students pass the comprehensive exam and proposal defense, Doctorate Form II will be submitted to the Graduate Division.

### Completion of the Program

It is the responsibility of the student to keep all members of the dissertation committee informed of the scope, plan, and progress of the dissertation research. Copies of the completed dissertation must be submitted to the committee members at least two weeks prior to the date of the final oral examination by the committee. Upon successful defense of the dissertation and subsequent completion of revisions, Doctorate Form III is submitted to the Graduate Division. When the final edited

document is submitted to the Graduate Division, Form IV should be submitted at the same time.

## Educational Technology

Wist 232  
1776 University Avenue  
Honolulu, HI 96822  
Tel: (808) 956-7671  
Fax: (808) 956-3905  
Email: edtech-dept@lists.hawaii.edu  
Web: coe.hawaii.edu/academics/educational-technology

### Faculty

- \*C. Ho, PhD (Chair)—educational technology and distance learning
- A. Eichelberger, MEd—educational technology
- \*C. Fulford, PhD—instructional design and development
- \*E. Hoffman, EdD—educational leadership
- \*P. Leong, PhD—communication and information sciences
- \*G. Lin, EdD—instructional technology
- \*P. McKimmy, EdD—educational leadership
- \*M. Menchaca, EdD—learning sciences
- \*S. Paek, EdD—instructional technology and media
- \*M. Schmidt, EdD—information science & learning technologies
- \*C. Sorensen Irvine, EdD—professional studies in education

### Cooperating Graduate Faculty

D. Lassner, PhD—communication & information sciences  
T. T. T. Nguyen, EdD—educational leadership, internet safety

**Degrees Offered:** MEd in educational technology, PhD in education specialization in educational technology, GCERT Online Learning and Teaching, Dual Master's Degree program with Library and Information Science (LIS)

### The Academic Program

For nearly half a century, the Department of Educational Technology (ETEC) has provided dynamic and high quality programs for educators seeking innovative ways to create effective teaching and learning environments that integrate emerging technologies. To meet the needs of lifelong learners, ETEC offers diverse programs and courses for graduate students as well as courses to meet the needs of undergraduate students. Students in the ETEC program may be upgrading current capacity as educators or seeking new career paths, often moving into leadership positions as a result of their educational experiences.

The department's main target group is post-baccalaureate students committed to the improvement of instruction and learning across the educational spectrum, including PreK-12, post-secondary and informal educational settings. The field of educational technology is delineated by the definition developed by its professional association, the Association for Educational Communications and Technology (AECT): "Educational technology is the study and ethical practice of facilitating learning and improving performance by creating, using, and managing appropriate technological processes and resources." AECT standards for professional programs guide the curriculum and core assessments.

A major strength of the department is its role in developing the educational and research expertise needed for the digital age, contributing to workforce development and technology innovation at the local, national, and global levels. Educational

technology, with its multi-disciplinary focus on such areas as distance education, interactive multimedia and educational gaming, design of engaging learning environments, participatory and social learning communities, cognition and computing, and research into effective learning and teaching strategies through emerging technologies, puts the ETEC department at the forefront of developments in 21st century education.

ETEC graduates are found in many learning environments including PreK-12 and higher education, government, business, industry, military, health occupations, museums, and other non-profits. Types of careers include: technology training, support and management, instructional design, eLearning development, website development, distance learning management, educational video production, multimedia authoring, performance improvement, project management, adult education and training, and teaching and research.

### Graduate Study

ETEC graduate programs are offered at master's, PhD, and graduate certificate levels. Online options are available at the master's and certificate level, while campus-based programs include the master's and PhD.

ETEC has a commitment to provide theory and research-based, yet practical educational programs. The graduate programs place emphasis on applications and evaluation of technology in educational settings rather than simple technical skills. All ETEC programs have been designed to encourage intellectual excellence and participation in a scholarly community. Emerging technologies are actively deployed to support scholarly networking as well as learning and teaching. A set of strong objectives has been established, and appropriate activities devised to ensure high levels of competencies of program graduates.

ETEC graduate programs adhere to the general information, policies, requirements, and procedures of the Graduate Division. Students interested in graduate study should refer to the "Graduate Education" section in this *Catalog*.

### Master of Education in Educational Technology

The MEd in Educational Technology is offered in both campus-based and online versions. Both involve face-to-face and online experiences (known as hybrid). These programs are designed to accommodate busy professionals with evening hours for live sessions, whether online or face-to-face.

- Campus-based (EDTC): students take required courses in the evenings at the UH Mānoa campus. Electives may be online or face-to-face.
- Online program (OTEC): all courses are offered online, although students attend two weekend sessions together on the UH Mānoa campus in their first semester. Preference for this program is given to students not residing on Oahu. The online program does not accept waivers for tuition.

Students should indicate their preference of campus-based or online when applying. There is no automatic transfer between these programs after admission.

### Admission Requirements

Admission to the educational technology program is only for the fall semester. Applications may be filed with the Graduate Division beginning October 1 until the deadline of **February 1** for the following fall semester. Students must meet the requirements set by the Graduate Division. Because the number of

students who can be admitted is limited, the admission process is highly competitive and meeting the minimum established criteria does not guarantee automatic admission.

In addition to the application materials required by the Graduate Division, prospective students must also submit the following directly to the ETEC Department (see ETEC web page for additional details):

- 3 letters of recommendation
- Intent to apply (online form at the ETEC web site)
- Statement of objectives (brief narrative)

Students are not required to have an undergraduate degree in education or educational technology to enter the master's program. However, students without a previous background in education or with limited skills in technology are advised to consider taking a course in educational technology prior to entering the program to determine match for skill sets and interests.

### Major Requirements

The master's program requires a minimum of 33 semester credit hours, with six required and five elective ETEC courses. The ETEC MEd is cohort based, with students only admitted in fall term each year as part of a group that takes initial classes together. In a cohort model, students enroll in a series of core courses, beginning and ending the series together. Such an approach helps build community and support structures within the program. Students work with like-minded professionals to achieve a common goal. Students are required to take two core courses each in their initial fall and spring semesters; these typically meet on Tuesday and Thursday evenings. Elective courses are offered in every semester and may be taken online or on campus. All students are required to have access to a laptop computer with internet access to meet program requirements.

The set of required ETEC courses provides each educational technology major with a solid foundation in technology, instructional design, learning theory, and research and evaluation. After the four core courses in the initial year have been completed, each student will be evaluated to determine whether he or she is making satisfactory academic progress and is prepared academically and in other ways for the continuation in the program. Poise, personal dispositions, attitude, and communication skills as well as substantive progress in coursework are significant components in the overall evaluation. If advancement to candidacy is recommended, students will be allowed to begin work on their master's project. The program culminates with student presentations of a final ETEC master's project at a professional conference and submission of an electronic portfolio, both completed in a fall-spring course sequence in their final year.

### Dual Master's Degree Program

Students may pursue a Master's in Educational Technology and a second master's concurrently in Library and Information Science. Students enrolled in either program may apply for admission in the other degree program. The dual master's option allows sharing of many elective courses. For more information, contact an advisor in ETEC or LIS.

### Doctorate of Philosophy (PhD) in Education Specialization in Educational Technology

The PhD in Education specialization in Educational Technology (ETEC) is designed to prepare influential professionals

in the field of educational technology and the learning sciences. The program is research focused, designed to prepare future faculty and education leaders. Scholars in the field explore the uses of innovative media and technologies for education, studying aspects from student learning and cognition to impacts on individuals and institutions. The field provides the research base for effective utilization of new media in education and by default is interdisciplinary in its approaches and theories. From the beginning, students are expected to actively engage and contribute to the field through publication, conference presentations, and applied instructional projects. The PhD program is designed to enhance and facilitate educational, social, and economic growth locally, nationally, and internationally with a pool of highly qualified educational scholars and leaders.

### Admission Requirements

Admission to the educational technology PhD program is only for the fall semester. Applications may be filed with the Graduate Division beginning October 1 until the deadline of **February 1** for the following fall semester; international students must file by **January 15**. Students must meet the requirements set by the Graduate Division as well as submit scores for the Graduate Record Examination (GRE). Note that students must select "Education" as the major on the graduate application form, **not** ETEC.

In addition to the application materials required by the Graduate Division, prospective students must also submit the following directly to the College of Education doctoral program office (see ETEC web page for additional details):

- 3 letters of recommendation
- Statement of purpose for pursuing a doctoral degree (narrative)
- Curriculum vitae
- Evidence of competency in formal writing (i.e. masters thesis, research paper, other formal writing)

Because the number of students who can be admitted is limited, the admission process is highly competitive and meeting the minimum established criteria does not guarantee automatic admission. A degree in educational technology is not required to enter the PhD specialization in ETEC. Students without such a degree or equivalent experience may be required to complete additional coursework.

### Major Requirements

The PhD in Education in Educational Technology follows the design of other COE PhD specializations with a program totaling a minimum 46 credit hours, including:

- College research core (4 courses),
- Educational technology doctoral core (minimum 3 seminar courses),
- Emphasis area (5 courses in educational technology),
- Breadth courses to be selected by the student with approval of an advisor (2 courses),
- Field study or internship (1 course), and
- Minimum of one course of dissertation credit (1 credit minimum)

The ETEC PhD specialization is campus-based and cannot be completed online. ETEC doctoral students are part of a cohort experience which requires a minimum of two courses each semester during the first year. This includes a doctoral seminar and a research course in the fall and spring term. Students not

able to commit to attending courses on campus two evenings per week will not be accepted into the program. These courses are typically held on Monday and Wednesday evenings, usually from 4:30 to 7 p.m. Some elective courses are available online, but may require live online sessions from 6-8 p.m. HST. All students are required to have access to a laptop computer with Internet access to meet program requirements.

### **Graduate Certificate (GCERT) in Online Learning and Teaching (COLT)**

The Graduate Certificate program is a 15-credit, fully online post-baccalaureate program. The purpose of COLT is to develop competent online instructors and instructional designers. COLT provides those who desire to deliver learning at a distance with the foundational knowledge and skills required to design, develop and implement effective materials for online learning. Although targeted for Hawai'i's educators, this program will also appeal to online educators throughout the Asia-Pacific. Participants learn the skills necessary to be successful online teachers and online learners. Within the certificate program, students learn to create, use and manage appropriate technological processes and resources to understand and deploy effective, efficient, and engaging online learning environments.

The Certificate prepares participants to apply the theories, principles, models, tools, and techniques associated with online teaching in diverse educational settings. Throughout this completely online certificate program, participants have numerous opportunities to integrate their professional experiences into their learning, apply course assignments to their current professional activities, and actively engage with other professionals in the development of these proficiencies.

The COLT program has been endorsed by the Association for Educational Communications and Technology (AECT). Course objectives and assessments are framed by standards developed by AECT to ensure relevance and quality.

#### **Admission Requirements**

Admission to the COLT program is available for any semester with applications due **March 1** for the following summer or fall, and **November 1** for spring admission. Students must meet the requirements set by the Graduate Division for admission. Students should select "Online Learning and Teaching" as the major on the graduate application form.

In addition to the application materials required by the Graduate Division, prospective students must also submit the following online (see ETEC web page for additional details):

- COLT Intent to Apply form

Because the number of students who can be admitted is limited, the admission process is competitive and meeting the minimum established criteria does not guarantee automatic admission. A previous degree in educational technology is not required to enter the COLT program. Students without previous online learning experience should consider applying for admission to begin in the summer to take Introduction to E-Learning (ETEC 612) as their first course in the program. The certificate program does not accept waivers for tuition.

#### **Program Requirements**

The COLT Graduate Certificate is comprised of three 3-credit required courses, plus two additional 3-credit elective courses. The five courses are designed to cover a range of competencies to educate candidates in understanding, designing,

and delivering online learning. All courses for the COLT program are offered fully online. Courses follow the UH Mānoa semester schedule, and are offered in fall, spring, and summer semesters. Some courses may require attendance at live online sessions in the evenings from 6-8 p.m. HST. Students may opt for campus courses for electives but this is not required.

Required courses include: ETEC 612 (offered summer); ETEC 673 (offered fall); and ETEC 632: (final course-spring). Students select two electives with approval of the COLT advisor. The electives may be chosen from among the rich array within the department's graduate courses. Courses must relate to the overall goals of the certificate but are designed to meet the specific needs and objectives of the individual student. Students complete a culminating project in ETEC 632 after all other course requirements have been met. COLT students are required to have access to a laptop computer with internet access to meet program requirements.

## **Institute for Teacher Education**

Everly Hall 223 (Elementary), 226 (Secondary), and 221 (MEdT)  
1776 University Avenue

#### **Faculty**

\*D. Grace, EdD (Elementary Director)—language, literacy, media studies, early childhood

\*J. Moniz, PhD (Secondary Director)—multicultural education

\*J. Zilliox, EdD (MEdT Director)—mathematics education

L. Baron, EdD—mathematics education

S. Buelow, PhD—literacy and reading education

C. Frambaugh-Kritzer, PhD—literacy

L. Fulton, PhD—elementary science education (shared with CRDG)

S. H. Furuta, MAT—teacher education, elementary education

A. Henward, PhD—early childhood education

\*J. Herring, EdD—art education

\*C. Kessler, EdD—social studies education

L. Muccio, PhD—early childhood education

\*E. Ponte, PhD—language, literacy

\*S. Robinson, PhD—science education

\*K. Serna, PhD—school health education

J. Simpson Steele, PhD—performing arts

M. Soetoro-Ng, PhD—social studies

E. Spitzer, PhD—language arts

L. Venenciano, PhD—secondary math education (shared with CRDG)

\*F. C. Walton, PhD—career, technology and technical education

\*J. Yoshioka, PhD—science education, teacher education

\*D. Zuercher, PhD—elementary and middle level, literary health

#### **Cooperating Faculty**

from CRDG, EDCS, EDEP, ETEC, KRS, SPED

#### **Degrees, Certificates, and Licensure Program Offered:**

BEd in elementary education, BEd in secondary education, Master of Education in Teaching (MEdT), Post-Baccalaureate Certificate in Secondary Education (PBCSE); State Approved

Teacher Education Programs (SATEPs) in elementary education, secondary education, dual elementary and special education, dual elementary and early childhood education, dual elementary and Hawaiian Education, and Hawaiian language, Hawaiian immersion, and Hawaiian studies

## The Academic Program

The Institute for Teacher Education (ITE) offers undergraduate degrees in elementary and secondary education (BEEd), a post-baccalaureate certificate in secondary education (PBCSE), an advanced degree in teaching (MEdT), and state-approved teacher education programs (SATEPs) in elementary and secondary education.

Elementary and secondary BEEd students may be able to enroll in programs that can lead to recommendation to the state for dual licensure, such as elementary or secondary and special education licensure, elementary and early childhood (PK-3) licensure, or elementary or secondary and Hawaiian language or Hawaiian Immersion licensure. All ITE programs focus on the educational needs of children and adolescents, teaching, learning, and curriculum. The students at UH Mānoa are ethnically diverse as are the students in Hawai'i's school system. Students in ITE programs, therefore, learn and teach in a unique multicultural environment.

All students are required to own laptops for their courses. The heavy emphasis on the integration of technology into course work and clinical work reflects innovations in education. To learn more about this requirement, financial aid options for covering the cost, and whether the laptop the student may now own meets requirements for the program, please refer to [coe.hawaii.edu/node/479](http://coe.hawaii.edu/node/479).

## Undergraduate Study (BEEd)

### Basic Requirements

The undergraduate major programs include a strong liberal arts foundation, professional education courses, academic subject preparation, content pedagogy preparation, and clinical experiences.

Classified status in the College of Education is necessary for registration in most teacher education courses. Some require SATEP admissions as well. Program sheets listing the specific requirements for the elementary and secondary BEEd programs and for the State Approved Teacher Education Programs (SATEPs) are available in the College of Education's Office of Student Academic Services (OSAS). Students must fulfill all degree program requirements in effect for the semester in which they are admitted into the college. Those pursuing licensure must meet all SATEP requirements in effect at the time they are admitted to the SATEP. Please be aware that SATEP requirements may be changed by the licensing agency, the Hawai'i Teacher Standards Board (HTSB). Candidates pursuing licensure also must meet all licensure requirements in place at the time of program completion.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Major Requirements

#### Elementary Program

The elementary SATEP major focuses on the learner and the learning environment in elementary school (K-6). Require-

ments include completion of the General Education courses specified for education majors, elementary emphasis and methods courses in elementary education, and clinical experience for a minimum of 120 credit hours. Students are typically assigned to cohorts and enroll in a sequence of courses. The traditional day program requires full-time enrollment. The Elementary BEEd also offers a statewide distance education program. The Dual Elementary/Special Education program adds a focus on special education settings. The Dual Elementary/Early Education program adds a focus on PK-3 settings. The Dual Elementary/Hawaiian Education program adds a focus on teaching in Hawaiian immersion schools or schools with high populations of Native Hawaiian students.

#### Secondary Program

The secondary education program focuses on the learner and the learning environment in grades 7-12. Requirements include completion of the General Education courses specified for education majors, a major in a teaching field or academic content and content pedagogy courses equivalent to a major in a teaching field, foundations and methods courses in secondary education, and clinical experiences for a minimum of 120 credit hours.

The College of Education offers secondary education majors in the following fields: English, languages (Chinese, French, German, Hawaiian, Ilokano/Filipino, Latin, Japanese, Russian, Spanish), mathematics, music, physical education, science (biology, chemistry, physics, earth science, general science, and physical science), social studies (with concentrations in American studies, anthropology, economics, geography, Hawaiian studies, history, political science, psychology, or sociology).

Secondary education courses are typically offered in sequence. All secondary majors pursuing teacher licensure through a SATEP must take ITE 401 Introduction to Teaching the first semester in the program, and ITE 440 Curriculum Implications of Multicultural Education prior to taking methods or clinical courses.

Music education majors complete a coordinated program offered in conjunction with the Department of Music to prepare teachers for grades K-12. Prospective music education majors should see the chair of the music education committee in the Department of Music during their first semester. Physical education majors must complete the General Education courses specified for education majors, the professional education required courses, and the academic major or equivalent, and related courses. In addition, the student must show skill and knowledge proficiency in lifelong physical activities appropriate to grades K-12. Interested students should see an advisor in the KRS department prior to their first year of registration.

### Post-Baccalaureate Certificate in Secondary Education (PBCSE)

The PBCSE is a post-baccalaureate certificate program for the preparation of secondary school teachers (grades 7-12). It is designed for students who possess a baccalaureate degree and wish to obtain initial teacher licensure. Students admitted to the PBCSE will have completed an academic major or its equivalent appropriate to their proposed teaching subject. The PBCSE offers a cohesive, field-based experience that encourages students to integrate educational theory and practice in cooperating secondary schools. The program consists of interrelated courses totaling 30-36 hours depending on the area of licensure sought.

Students who complete this initial teacher licensure program are encouraged to continue their professional growth. They may be able to apply up to 12 course credits from the PBCSE to a master's degree program. Students must negotiate course transfer at the time of application to a graduate program. The PBCSE program is offered statewide via distance education, as well as at UH Mānoa.

### Admissions Requirements

All applicants to the PBCSE program will be evaluated competitively and considered for admission on the basis of an overall profile. Admission to the PBCSE is considered admission to a SATEP.

1. Applicants must have a baccalaureate degree from an accredited and UH Mānoa recognized four-year institution of higher education. Additional undergraduate courses may be required. Thus, early advising is strongly recommended.
2. Applicants must achieve minimal passing scores as set by the Hawai'i Teachers Standards Board (HTSB) in the reading, writing, and mathematics subtests on the Praxis I Pre-Professional Skills test (PPST or C-PPST).
3. Applicants must demonstrate knowledge in the teaching field by passing an appropriate Praxis II Subject Assessment Content Knowledge test. Some areas such as art, music, and ESL, may allow program entry prior to passing the PRAXIS II Subject Assessment Test. However, passage of the test is required prior to being placed in a school for student teaching/internship per HTSB rules.
4. Applicants must meet admissions requirements designated by the UH Mānoa Admissions Office.
5. Applicants must demonstrate oral and nonverbal communication competencies through the successful completion of an interview.
6. Applicants must demonstrate attitudes toward education, learners, and themselves as prospective teachers that are compatible with the standards and curriculum of the program.
7. Applicants must document current (within the past five years) group leadership experience, paid or volunteer, with groups of youth between grades 7-12. A minimum of 40 hours of experience is required.

Admission requirements are subject to change. Call the Office of Student Academic Services for updated information.

### Graduate Study

The Master of Education in Teaching (MEdT) Program is a two-year initial licensure program whose applicants seek to earn a teaching license at the elementary (K-6) or secondary levels (6-12) and engage in a program of research and inquiry consistent with a graduate degree. Successful completion of the program results in both a recommendation to the Hawai'i Teacher Standards Board for licensure and a master's degree from the College of Education.

MEdT candidates are admitted in groups of approximately 25 students who work and learn together as a cohort. Across the four semesters students complete university course work and engage in research, teaching, and learning while fully immersed in K-12 school-based field settings under the guidance of university faculty and public school mentors. Candidates are assigned a field placement each semester by their cohort coordinators. The field work becomes progressively more involved each semester. At this time the program is offered full-time, in a face-to-face format (not online), and is available only on O'ahu.

Admission requirements include: approval of the Graduate Division at UH Mānoa; minimum undergraduate GPA of 3.0; and submission of passing test scores. Specific exams must be passed prior to the application deadline in order to meet Hawai'i Teacher Standards Board license requirements and our national accreditation requirements. The GRE is not required and cannot be used as a substitute. Applicants should visit the MEdT website for application instructions and current testing requirements at [coe.hawaii.edu/academics/institute-teacher-education/med-teaching](http://coe.hawaii.edu/academics/institute-teacher-education/med-teaching).

### Requirements for State Approved Teacher Education Programs (SATEPs)

Requirements for the college's state approved teacher education programs in elementary and secondary education comply with best practices and standards adopted by the national professional associations and the national accrediting body for teacher education, and with the state's requirements for teacher licensure. These requirements are subject to modification as changes are adopted by these entities. Please consult with the Office of Student Academic Services (OSAS) for current information.

## Kinesiology and Rehabilitation Science

Physical Education/Athletic Complex 231  
1337 Lower Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-7606  
Fax: (808) 956-7976  
Web: [coe.hawaii.edu/academics/kinesiology-rehabilitation-science](http://coe.hawaii.edu/academics/kinesiology-rehabilitation-science)

### Faculty

- \*N. M. Murata, PhD (Chair)—physical education and adapted physical education
- \*J. A. Daniels, EdD—school counseling, development counseling, adolescent counseling, loss and transition counseling, group counseling, and counseling homeless children
- \*R. K. Hetzler, PhD—physical education and exercise science
- \*I. F. Kimura, PhD, ATC, PT—athletic training and biomechanics
- \*J. K. Maeda, PhD—physical education and adapted physical education
- \*C. F. Morgan, PhD—youth physical activity and overweight
- \*K. L. Murphy, DPE—physical education
- \*J. Prins, PhD—biomechanics and exercise science
- \*C. D. Sticklely, PhD, ATC—athletic training, biomechanics and exercise physiology
- \*K. Tamura, PhD, ATC—athletic training and biomechanics
- \*K. K. Yamamoto, PhD—rehabilitation counseling, transition, and disability-related issues

**Degrees Offered:** BS in kinesiology and rehabilitation science, MS in kinesiology and rehabilitation science, and PhD in education with a specialization in kinesiology

### Undergraduate Study

#### BS Degree in Health and Physical Education

The BS degree program provides professional curricula for students enrolled in the College of Education whose goal is to teach P-12 physical education.

The Health and Physical Education Teacher Education (HPETE) program is accredited by the National Council for Accreditation of Teacher Education (NCATE) and National Association for Sport and Physical Education (NASPE). A professional preparation curriculum is provided for students who wish to teach physical education in grades P/K-6, 7-12, or P/K-12 and health education in grades 6-12. Requirements for this program include successful completion of the PRAXIS I and PRAXIS II components required for licensure in Hawai'i. PRAXIS II must be passed prior to the teaching residencies (elementary and/or secondary). Candidates who major in this program must demonstrate competence in motor skills and comprehensive knowledge relative to content in health and physical education, as well as effective accountability. General education core is 31 credits, physical education is 47 credits, health education is 12 credits, and professional education core is 30 credits for a total number of credits of 120.

### Graduation Requirements

1. Fulfill all UH Mānoa requirements and meet all admissions requirements of the College of Education;
2. Complete the HPETE curriculum in content and field experiences for letter grades;
3. Successfully complete student teaching with a grade of B (not B-) or higher;
4. Complete a minimum of 120 credit hours;
5. Have a cumulative GPA not less than that required for admission to the college; and
6. File for graduation and pay the required fee at least one full semester prior to the intended graduation date.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### BS Degree in Health and Exercise Science

The BS degree in kinesiology and rehabilitation science focuses on health and exercise science-related professions. The areas covered under this program of study provide opportunities for students to learn how individuals can influence their own state of wellness, the response and adaptation of the human body to physical activity and sports participation, and how to help others achieve a higher state of wellness. Career paths within this area of study include, but are not limited to: physical therapy, athletic training, health and fitness promotion, exercise physiology, rehabilitation counseling, sports nutrition, and personal training. The general emphasis in all of these careers is the link between science, sports, fitness, and allied health sciences. This program area has been structured to enable the students to design an academic curriculum that best reflects his or her individual interests as well as general prerequisites for graduate or professional programs. This degree program has been designed to allow students to fulfill the requirements for entry into graduate programs in several health care professions (e.g., athletic training, physical therapy, physicians assistant, occupational therapy, rehabilitation counseling, etc.).

### Graduation Requirements

1. Fulfill all UH Mānoa requirements;
2. Complete the College of Education undergraduate curriculum in health and exercise science;
3. Complete a minimum of 120 credit hours;
4. Have a cumulative GPA not less than that required for admission to the college; and

5. File for graduation and pay the required fee at least one semester prior to the intended graduation date.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Graduate Study

### MS Degree

The MS degree program provides opportunities for students who wish to pursue advanced knowledge and research in one of the following areas of specialization: athletic training (entry-level or post professional), physical activity/adapted physical activity, and rehabilitation counselor education.

The Rehabilitation Counseling program is offered through distance education modalities and is the only such program in the Pacific Basin and the nation accredited by the Council on Rehabilitation Education (CORE) that serves predominantly Asians and Pacific Islanders. Graduates are eligible to take the Certified Rehabilitation Counselor examination, and may also apply for State of Hawai'i licensure as a mental health counselor, provided they complete the required post-graduate requirements.

### Admission Requirements

In addition to the requirements of the Graduate Division, applicants for the MS degree will be further evaluated on their disciplinary background in their area of specialization. The Department of Kinesiology and Rehabilitation Science (KRS) also requires submission of Graduate Record Examination (GRE) scores.

Each applicant admitted will be classified in one of two categories: (1) Regular status—student who has a baccalaureate degree in the area which he or she will pursue and a minimum overall grade point average of 3.0 during the final two years of undergraduate work, or (2) Conditional status—student of promise who may have a deficiency in grade point average and/or subject matter preparation.

Physical Activity and Adapted Physical Activity program applicants should have a related undergraduate degree from an accredited college or university.

Entry-level Graduate Athletic Training Education Program (EL-GATEP) applicants must submit a signed copy of the Technical Standards and proof of a completed physical examination prior to admission. Post-Professional Advanced Athletic Training Program (AATP) applicants must be Board of Certification (BOC) certified or certification eligible for consideration for admission. Applicants of either program must also submit proof of: TB clearance, Hepatitis B vaccine or waiver and professional liability insurance prior to program entrance. Downloadable forms may be retrieved at [coe.hawaii.edu/academics/kinesiology-rehabilitation-science/ms-athletic-training](http://coe.hawaii.edu/academics/kinesiology-rehabilitation-science/ms-athletic-training). Admission to the program will depend on the availability of faculty in the particular area of scholarship.

Rehabilitation Counseling Program admission is based on previous preparation and background, intellectual and affective potential for graduate study, and personal qualifications that contribute to success as a counselor. Application to the program presumes satisfactory completion of a bachelor's degree with an acceptable undergraduate grade point average.

Three letters of recommendation relating to the candidate's personal qualifications and/or professional background, one of

ficial transcript for each institution attended, and statement of objectives must be submitted. These should show evidence that an applicant's personal qualifications, motivation, and academic preparation indicate competence and potential success in rehabilitation and counseling. A writing sample and interview are also required. Applications are considered for the fall semester.

### Program Requirements (For programs other than Rehabilitation Counseling)

A minimum of 30 credits is required for the MS degree, depending on program specialization. Of these, 6 credits are required for the Plan A Thesis or Plan B Project, and 6 credits are required for one research method course and one seminar course. The remaining 18 or more credits are to be used for coursework focusing on the student's area of specialization. The student and the thesis/project committee chair in the KRS department must approve the student's coursework.

Students interested in the MS specialization in Physical Activity or Adapted Physical Activity must meet the admission requirements of the Graduate Division and KRS. These two specializations are designed to further expand knowledge and skills related to physical activity across the lifespan. Content addresses research related to health, administration, and fitness for individuals with and without disabilities. The program is comprised of 30 credits and typically takes two years to complete. A thesis or project option is provided for the research component.

Entry-level Graduate Athletic Training Education Program (EL-GATEP) students (graduate students seeking BOC certification) are required to complete a minimum of 50 credits, that includes Plan B non-thesis (final comprehensive examination). Additionally, pre-requisite course and clinical work experiences may be required. Specific requirements and recommended course sequencing can be viewed at [tinyurl.com/KRS-Grad](http://tinyurl.com/KRS-Grad).

Post-Professional Advanced Athletic Training Program (AATP) students must complete a minimum of 48 credits that includes Plan A thesis requirements. Specific requirements and recommended course sequencing can be viewed at [coe.hawaii.edu/academics/kinesiology-rehabilitation-science/ms-programs/programs/athletic-training-entry-level](http://coe.hawaii.edu/academics/kinesiology-rehabilitation-science/ms-programs/programs/athletic-training-entry-level).

Rehabilitation Counseling Program is a distance education program leading to a Master of Science degree with a specialization in Rehabilitation Counseling. The mission of the program is to offer graduate level training that is designed to provide students with the essential knowledge, skills, and attitudes necessary to assist individuals with disabilities to secure gainful employment, achieve an increased sense of empowerment, responsibility, and independence. The Rehabilitation Counseling Program consists of 48 semester credit hours and requires 3 years of enrollment. In practice, this means attendance in 6 regular semesters plus 2 intervening summer sessions in a hybrid online environment. The Rehabilitation Counseling Program is accredited by the Council on Rehabilitation Education (CORE) and graduates are eligible to sit for the Certified Rehabilitation Counselor (CRC) Examination.

### Doctoral Degree

The PhD in Education with a specialization in kinesiology prepares professionals to work as leaders in adapted physical activity, athletic training (BOC), applied biomechanics, and sports medicine fields as educators, administrators, directors, researchers, and clinicians. These fields have great depth and breadth that require specific yet broad backgrounds in research,

pedagogy, athletic training research and education, mathematics/physics, physiology, and allied health/medical practices. Graduates are expected to assume leadership roles that influence local, national, and international lifestyles, physical and allied health/sports medicine issues related to research, higher education and/or program development (i.e., program accreditation acquisition), and to contribute to the body of knowledge.

This wide-ranged discipline is based in the biological sciences; consequently, this foundation will be reinforced so that student experiences (i.e., course work, research, clinical/practical/teaching) will provide refinement, expertise, and an increased depth of understanding.

The program varies in the number of credit hours required, depending on the candidate's qualifications and experiences, and includes course work required by the College of Education, the specialization area, and a cognate field if applicable. Additionally, students may be required to complete course work in an emphasis area based on the specific needs in order to develop a specialized and focused research and education agenda. At least one field and/or teaching internship and dissertation are also required. See the previous section on graduate programs in the College of Education.

## Special Education

Wist 120

1776 University Avenue

Honolulu, HI 96822

Tel: (808) 956-7956

Fax: (808) 956-4345

Web: [coe.hawaii.edu/academics/special-education](http://coe.hawaii.edu/academics/special-education)

### Faculty

- \*A. A. Jenkins, PhD (Chair)—mild/moderate disabilities, content strategies, inclusive education, collaboration
- C. Aiona, MEd—mentoring special education teachers, general special education, curriculum and instruction
- J. Bill, MSEd—students with mild/moderate/severe/autism disabilities, emotional disabilities, literacy, inclusion
- \*R. S. Black, EdD—mental retardation, transition, students at-risk, research design
- J. Chamberlin, MEd—mild/moderate disabilities, autism, professional learning communities, mentoring
- \*B. G. Cook, PhD—mild/moderate disabilities, inclusion, evidence-based practices, higher education and students with disabilities
- \*L. H. Cook, PhD—mild/moderate disabilities, inclusive education, collaboration
- S. Cook, MEd—general special education, inclusion, co-teaching
- C. Farley, MEd—mentoring special education teachers, general special education
- R. Heine, MEd—secondary mild/moderate disabilities, special education mentoring
- S. Klein, MEd—mentoring special education teachers, general special education
- S. M. Koegel, MEd—general special education
- J. Mahiko, MEd—transition, vocational education and workforce development, and higher education
- \*D. McDougall, PhD—general special education, mild/moderate disabilities, behavior disorders
- \*W. D. Narkon, PhD—mild/moderate disabilities, learning disabilities, reading strategies

- \*M. J. Noonan, PhD—moderate and severe disabilities, autism, early intervention
- \*L. C. Novosel, PhD—mild/moderate disabilities, adolescent literacy, youth offenders with disabilities, culture and linguistic diversity, response to intervention
- \*C. M. Ornelles, PhD—mild/moderate disabilities, students at risk, teacher education
- L. M. Oshita, MEd—learning disabilities, reading instruction, social skills
- D. Paresa, PhD—mild/moderate disabilities, learning disabilities, general special education
- \*K. Rao, PhD—media, distance learning, assistive technology, culturally and linguistically diverse students
- \*R. J. Reed, PhD—teacher training, cultural diversity, language arts, recruitment and retention of special education teachers
- A. E. Ruhaak, MA—mentoring special education teachers, general special education
- \*C. Schmidt, PhD—autism spectrum disorders, applied behavior analysis
- \*M. Schmidt, PhD—education technology, technology for students with autism
- M. D. Sheehey, MEd—mentoring special education teachers, general special education; severe/autism special education
- P. E. Sheehey, MEd—mild/moderate disabilities, teacher preparation, multicultural education, autism
- \*P. H. Sheehey, PhD—families, moderate and severe disabilities, early intervention, autism
- J. Siegel, MEd—general special education
- A. Soma, MEd, MSW—mentoring special education teachers, general special education
- \*R. A. Stodden, PhD—mental retardation, career/vocational special needs, adolescent/adult services
- \*J. C. Wells, PhD—autism spectrum disorders, communication disorders, early childhood special education, mild/moderate disabilities
- M. Wilson, MPA—program management and student advising

**Degrees and Certificates Offered:** Initial teacher licensure in special education: BEd in elementary/special education, post-baccalaureate in special education. Non-licensure: MEd in special education, PhD in education, specialization in exceptionalities.

## The Academic Program

Special education (SPED) is a component of general education. Its basic purpose is to assist individuals who do not benefit from traditional educational programs. Special educators teach and help others teach persons who have special learning needs. They individualize and adapt instruction to help individuals with special needs become independent and contributing members of society.

Faculty in the Department of Special Education prepare students at the undergraduate and graduate levels to work in both school and non-school settings. Professional roles include teacher, resource manager, consultant, infant specialist, and transition specialist. The program is field-based. On campus and statewide programs are offered.

## Accreditations

The special education program is accredited by the National Council for Accreditation of Teacher Education (NCATE) and nationally recognized by the Council for Exceptional Children (CEC).

## Advising

Advising of students in the BEd and PBSPED programs is the responsibility of the Office of Student Academic Services (OSAS), College of Education. Students should meet regularly with their OSAS academic advisor.

Upon acceptance into a special education program, students are assigned to a special education faculty advisor or cohort coordinator. Advisors/coordinators review program requirements and progress, plan program course work, complete departmental preregistration forms for the next semester, and sign course registration materials. Advisors/coordinators may waive course work (based on courses taken previously) on an individual basis. Advisors/coordinators have the responsibility of reviewing and individualizing students' programs to complement their needs. Advisors/coordinators ensure that students have appropriate knowledge and applied skills to perform as competent special educators. Given this responsibility, advisors may require additional course work and/or practicum experience for certain students. Changes made in students' programs must be approved by their advisors.

## Student Organizations

### Student Council for Exceptional Children (SCEC)

The Student Council for Exceptional Children (SCEC) is an active organization open to anyone interested in special education. Chapter 78 at UH Mānoa has received recognition by the International SCEC. SCEC members participate in professional development activities and sponsor special community projects. SCEC is an affiliate of the Council for Exceptional Children. For more information, call (808) 956-7956.

## Undergraduate Study

### BEd

The College of Education offers a BEd elementary/special education program that culminates in teacher licensure in both elementary and special education. The BEd dual program, revised in 2013, consists of fully integrated coursework in elementary and special education, co-taught by teams of faculty from both departments. Candidates complete supervised field experiences in classroom settings with students with and without disabilities. One semester of fulltime student teaching is required.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Post-Baccalaureate Programs

The College of Education offers a post-baccalaureate certificate in special education for individuals who hold a bachelor's degree in any field and desire licensure to teach special education. The program consists of 31 semester credit hours including 10 credit hours of supervised field experience. Candidates must take, or test out of, an educational technology 1-credit course prior to beginning program coursework. The PB-SPED program offers two special education teacher training options: (1) specialization in mild/moderate disabilities (mental retardation, learning disabilities, emotional/behavior disorders); or (2) severe/multiple disabilities and autism. Program sheets listing the specific course requirements for the post-baccalaureate

programs are available in the College of Education's Office of Student Academic Services.

### **Admission Requirements**

Admission is through the Office of Student Academic Services. Classified status in the College of Education is necessary for registration in the post-baccalaureate program. Program sheets listing the specific requirements are available in the Office of Student Academic Services. Students must fulfill all program requirements in effect for the semester in which they are admitted into the college.

All applicants to the post-baccalaureate certificate in special education program will be evaluated competitively and considered for admission on the basis of a profile composed of the following criteria:

1. Applicants must have a baccalaureate degree from an accredited and UH Mānoa recognized four-year institution of higher education.
2. Applicants must achieve minimal State passing scores in the reading, writing, and mathematics subtests on the PRAXIS.
3. A minimum post secondary cumulative GPA of 2.75.
4. Applicants must demonstrate oral and nonverbal communicative competence through the successful completion of an interview. Applicants must also demonstrate attitudes toward education, learners and themselves as prospective teachers that are compatible with the standards and curriculum of the program.
5. Prerequisite coursework may be required prior to beginning program coursework.

Admission requirements are subject to change. Call the Office of Student Academic Services for updated information.

## **Graduate Study**

### **Master's Degree**

The MEd in special education program is available statewide and offers interdisciplinary studies for candidates who wish to engage in a graduate course of study in the field of special education. The MEd interdisciplinary non-licensure program consists of 30 semester credit hours in special education and related fields. In addition, candidates must take, or test out of, an educational technology 1-credit course prior to beginning program coursework.

### **Admission Requirements**

Applicants must submit to Graduate Division the completed Graduate Application, GRE scores, and official transcripts. Additional materials also must be sent to the Department of Special Education. These include: (a) three letters of recommendation attesting to academic and professional strengths, (b) unofficial transcripts of all undergraduate and graduate course work, and (c) the statement of objectives. An interview by the department's selection committee is required.

### **Requirements**

The MEd in interdisciplinary studies/special education consists of a minimum of 30 credits, including 12 credits of required professional courses, and 12-15 credits in selected specialty areas. The specialty credits may be within special education or related areas (e.g., general education, psychology, social work, public health).

Both Plan A thesis and Plan B project are offered. Six credit hours of SPED 700 are required for Plan A, and additional work in statistical analysis and research design may be necessary. Plan B requires a master's paper/project and a minimum of 3 credits of SPED 695.

Graduates of the interdisciplinary studies program do not qualify for teacher licensure but may seek positions in related fields and services.

### **Doctoral Degree**

The PhD program with a specialization in exceptionalities prepares professionals to work as leaders in the education and support of individuals who have unique needs, often due to disabilities. The field is broad, addressing life-span concerns and involving such services as advocacy, family support, community services, vocational training and support, and special education. Graduates of the program are expected to assume leadership roles addressing local, regional, national, and international issues related to research and higher education and/or program development and evaluation. The program varies in the number of credit hours required, depending on the candidate's qualifications, and includes courses required by the college, courses in the specialization, courses that provide an emphasis/breadth, a field project/internship or an apprenticeship in college teaching, and the dissertation. See the section on graduate programs in the College of Education.

Interim Associate Dean for Academic Affairs: Bruce E. Liebert  
Assistant Dean: Song K. Choi

## General Information

An engineering degree provides an excellent background for seeking solutions to many of the problems in the development and management of technology related to urban demands, the enhancement of our living environment, and the effective utilization of our nonrenewable resources. Engineering curricula include both general and theoretical course work designed to enable graduates to meet the challenges of a technology-oriented society. In addition to classic disciplines of engineering, students may also delve into the fundamentals of sustainability, nanotechnology, microscopic simulation, and other state-of-the-art subjects. College curricula encourage the independent study of novel engineering processes. Particular emphasis is placed on problems related to energy and the preservation and enhancement of the environment.

Engineering has been a major program of study at this institution since its founding in 1907. UH Mānoa has granted more than 6,500 engineering degrees, and many of the professional engineers practicing in industry, consulting firms, and governmental agencies throughout the state are graduates of UH Mānoa.

## Accreditation

The undergraduate curricula in civil, electrical, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET, Inc.

## Degrees and Certificates

**Bachelor's Degrees:** BS in civil engineering, BS in computer engineering, BS in electrical engineering, BS in mechanical engineering

**Master's Degrees:** MS in civil engineering, MS in electrical engineering, MS in mechanical engineering

**Doctoral Degrees:** PhD in civil engineering, PhD in electrical engineering, PhD in mechanical engineering

For information on programs in biological engineering, refer to the "College of Tropical Agriculture and Human Resources" section of the *Catalog*. For information on programs in ocean and resources engineering, refer to the "School of Ocean and Earth Science and Technology" section of the *Catalog*.

## Advising

Student Services  
Holmes 250  
2540 Dole Street  
Honolulu, HI 96822  
Tel: (808) 956-8404

All students in the College of Engineering must receive approval of their program of courses from their advisors prior to registration each semester.

Updated curriculum check sheets summarizing all of the requirements for each undergraduate curriculum are available online at: [www.eng.hawaii.edu/current-students/undergraduate-students/curricula-check-sheets/check-sheets](http://www.eng.hawaii.edu/current-students/undergraduate-students/curricula-check-sheets/check-sheets).

Undergraduate engineering students who are well-qualified academically are encouraged to participate in the UH Mānoa Honors Programs (see the "Special Programs" section within the Colleges of Arts and Sciences).

## New Students

An orientation session for new students is held each semester before classes begin. Incoming students receive approval of their program of courses at that time. In addition, incoming students with waived course work (e.g., advanced placement examination) must still fulfill credit hour requirements and should contact the College's Student Academic Services Office in Holmes 250 for more information.

## Undergraduate Programs

Each of the curricula offered by the College of Engineering provides a fundamental science-oriented university education with coverage of communications, the humanities, and social sciences, as well as the basic physical sciences of mathematics, physics, and chemistry. The curricula also encompass engineering sciences common to all engineering disciplines and project courses that introduce the engineering method of design.

### Admission Requirements

Requirements for admission to UH Mānoa are described in the “Undergraduate Education” section of the *Catalog*. High school students applying to the College of Engineering should have completed trigonometry, physics, and chemistry. The college also uses aptitude tests and high school records in its screening procedure.

Transfer students must have completed ENG 100, MATH 241 and 242, PHYS 170/170L, and CHEM 161/161L and 162 or their equivalents, and have an overall cumulative GPA of 3.0 or higher.

Students who do not meet entry requirements may enroll in Pre-engineering in Arts and Sciences and transfer into an engineering major at a later time. Pre-engineering students are advised by the College of Engineering and may enroll in lower division engineering courses with no additional approvals needed.

### College Requirements

Course work in each curriculum consists of a set of required courses common to all engineering majors and additional courses to satisfy departmental requirements. The courses required of all engineering students, which also satisfies the General Education Core Requirements of UH Mānoa, consist of the following 51 credits:

#### Written Communication

- ENG 100 Composition I (3) (FW) or approved FW course

#### Arts, Humanities and Literature

- COMG 251 Principles of Effective Public Speaking (3) (DA)
- One elective (3) (DH or DL)

#### Social Sciences

- ECON 120 Introduction to Economics (3), ECON 130 Principles of Microeconomics (3), or ECON 131 Principles of Macroeconomics (3) (DS)
- One elective (3) (DS)

#### Global and Multicultural Perspectives

- Two approved FG electives (6)

#### Symbolic

- MATH 241 Calculus I (4) (FS)
- MATH 242 Calculus II (4)
- MATH 243 Calculus III (3)
- MATH 244 Calculus IV (3)

#### Natural Sciences

- CHEM 161/161L, and 162 General Chemistry/Lab (3/1/3) (DP/DY)
- PHYS 170/170L General Physics I/Lab (4/1) (DP/DY)
- PHYS 272/272L General Physics II/Lab (3/1) (DP/DY)

In addition, a student must complete the Focus Graduation Requirements, 1H, 1E, 1O, and 5W courses. The Hawaiian or Second Language is not required for the engineering degree.

### BS Degree Requirements

The undergraduate curricula are designed to be completed in eight semesters.

To receive a bachelor of science degree in engineering, a student must adhere to the following:

1. Complete the course work for one of the engineering curricula, which also satisfies all UH Mānoa requirements;
2. Maintain a minimum GPA of 2.0 for all registered credit hours; and
3. Maintain a minimum GPA of 2.0 for all upper division courses (numbered 300-499) in mathematics, science, and engineering.

### Major Requirements

See appropriate departments for specific major requirements leading to a bachelor's degree.

### Other Requirements

Undergraduate engineering students are subject to the policies of academic probation, suspension, and dismissal of UH Mānoa as specified in the *Catalog*. In addition, engineering students with either a cumulative GPA of less than 2.0 or an upper division GPA of less than 2.0 may be placed on academic probation. The student must maintain a semester GPA of 2.0 or higher for each probationary semester. Failure to meet any of the above conditions may result in suspension or dismissal. Engineering undergraduates may also be suspended when they fail to achieve a cumulative GPA of at least 1.7 after attempting 24 credit hours.

Students who are suspended must reapply for admission to the Office of Admissions within specified deadlines. Students who do not take courses after being suspended for the required one semester are eligible to be readmitted to the College of the Engineering. Suspended students who attend another institution (including other UH system campuses) will be considered “transfer” students when reapplying to UH Mānoa and must meet the transfer requirements of the College of Engineering.

### Graduate Programs

See appropriate department for specific description and requirements.

## Student Organizations

Student chapters of professional engineering societies are active at the college, and all students are encouraged to participate. Honorary societies are represented in all three departments.

## Honors and Awards

The College of Engineering and its departments provide scholarships and awards to exceptional students. For a list of these scholarships, see the "Tuition, Fees, and Financial Aid" section of this *Catalog* or at [www.eng.hawaii.edu/prospective-students/financial-aid-and-scholarships/](http://www.eng.hawaii.edu/prospective-students/financial-aid-and-scholarships/).

## Programs

### Hawai'i Center for Advanced Communications

The Hawai'i Center for Advanced Communications (HCAC) is a multidisciplinary research center established by the legislature and approved by the Board of Regents in 2000. Currently, with federal, state, and private funding, HCAC continues on its mission to be the leading center for innovative research in the broader areas of wireless communication and radar technologies with joint research and educational activities that promote national and international collaboration and partnership with industry. The center has tenured faculty, several full-time collaboration and partnership with industry. The center has tenured faculty, several full-time researchers, and graduate students working towards their MS and/or PhD degrees in Electrical Engineering.

Research activities in the center are funded by federal agencies including the National Science Foundation (NSF), Army Research Office, Office of Naval Research, Army CERDEC, as well as by large numbers of corporate sponsors including Agilent Technologies, BAE, L-3, Motorola, and Raytheon.

Faculty in the center have been recognized with several national and international awards including the 2012 IEEE AP-S Distinguished Educator Award, 2013 IEEE MTT-S Distinguished Educator Award, and both the UH Regents Medal for Excellence in Research and the UH Regents Medal for Excellence in Teaching.

**National and International Collaboration:** The center is a member of the NSF Industry/University Cooperative Research Center (I/U CRC), and has international partnership agreements with The State Key Lab on Microwave & Digital Communications, Tsinghua University, China; The Centre National De La Recherche Scientifique, University of Nice-Sophia Antipolis, France; Communication Research Center, Yuan Ze University, Taiwan; and Department of Signal Theory and Communications, Universitat Politècnica de Catalunya, Barcelona, Spain.

**Research Areas:** Research areas include advanced multifunction and ultra wideband antenna designs, propagation modeling and characterization of wireless communication channels, digital signal processing (DSP) for smart antennas, Ground

Penetrating Radar technologies for UXO and IED detection and classification, microwave methods for biomedical applications (in collaboration with JABSOM), and the development of Radio Frequency tunable devices for reconfigurable antennas cognitive radio, and solar energy harvesting applications. Recent research projects include microwave stethoscope for vital signs monitoring and measuring changes in lung water content, the development of antennas for directional networks, use of Genetic Programming for the design of ultra wideband metamaterials, and the development of textile antennas for medical and military applications.

**STEM Outreach:** HCAC has received significant grants from the State of Hawai'i, National Science Foundation, and corporate sponsors to launch its STEM outreach program for middle schools in Hawai'i (Research Experience for Teachers, RET).

**Laboratory Facilities:** HCAC has developed four state-of-the-art laboratories to support the ongoing research activities. This includes an indoor antenna range, a wireless communications testbed, microwave measurements lab, and the RF devices fabrication and characterization lab.

For graduate studies, all students/applicants need to fulfill the requirements of the Graduate Division, [manoa.hawaii.edu/graduate/](http://manoa.hawaii.edu/graduate/), as well as those of the Electrical Engineering Department. For availability of research opportunities, visiting scholar and graduate fellowships at HCAC, contact Teri Imanaka at [imanaka@hawaii.edu](mailto:imanaka@hawaii.edu).

### Hawai'i Space Flight Laboratory

The Hawai'i Space Flight Laboratory (HSFL) was established in 2007 as a multidisciplinary research and education activity bringing together individuals from diverse areas to explore, study, and advance the understanding of the space environment. Among HSFL's goals are to provide the infrastructure for collaborative space and science research, encourage entrepreneurship and industrial relations, and provide students with a rich and exciting education for careers in space science and engineering.

Hawai'i is located in a unique location to become a low-cost gateway to space and positions UH Mānoa as the only university in the world to have both satellite fabrication capabilities and unique, direct access to orbital space. This will enable many experiments that study the earth's oceans and continents, as well as test numerous engineering experiments in the hostile environment of space. The HSFL expands the Small-Satellite Program established at UH Mānoa, College of Engineering in 2001 by merging research interests in both the College of Engineering and the School of Ocean and Earth Sciences and Technology.

- \*I. N. Robertson, PhD—structures, earthquake engineering
- \*L. Shen, PhD—structural engineering
- \*A. Singh, PhD—construction and cost engineering, project management, quality control, construction safety, housing, coastal protection, energy analysis
- \*M. H. Teng, PhD—hydrodynamics, coastal and hydraulic engineering
- \*T. Yan, PhD—environmental engineering, environmental microbiology

## Adjunct Faculty

- A. A. Yee, MS—structural engineering
- G. Fischer, PhD—structural engineering

## Cooperating Graduate Faculty

- A. I. El-Kadi, PhD—groundwater hydrology
- R. C. Ertekin, PhD—naval architecture, offshore engineering, hydrodynamics, computational methods
- A. Fares, PhD—tropical soil, watershed hydrology
- W.-W. W. Su, PhD—biochemical engineering, plant cell culture, molecular biotechnology

**Degrees Offered:** BS in civil engineering, MS in civil engineering, PhD in civil engineering

## The Academic Program

Civil engineering is concerned with the activities of people and the environment. The civil engineer conceives, plans, designs, constructs, operates, and maintains the physical works necessary for the environmental needs of people. Students who enter the program today can look forward to one of the most rewarding careers open to men and women—rewarding in personal fulfillment, enduring service to humankind, and financial reward. The curriculum is uniquely designed to meet the demands of business, industry, and government.

The mission of the Department of Civil and Environmental Engineering is to 1) educate civil engineers that meet the

requirements of the profession, committed to life-long learning, and have the potential to be the future leaders of the profession; 2) create, develop, and disseminate new knowledge through high quality, innovative research; 3) provide service to various agencies of the state and counties of Hawai'i and the engineering community; and 4) provide leadership to the civil engineering profession in the Asia/Pacific Region.

## Undergraduate Study

### Bachelor's Degree

The department's educational objective is to produce graduates who in the first few years following graduation will:

1. Possess technical and non-technical knowledge/skills that will contribute to personal and employer success and benefit the communities they serve;
2. Adhere to accepted professional ethical standards;
3. Practice civil engineering in one or more of the following areas: construction, environmental, geotechnical, hydraulics/hydrology, structural, transportation;
4. Accept responsibility as engineers in the private and public sectors in Hawai'i, the Asia-Pacific region, and elsewhere.

The BS degree requires completion of at least 125 credit hours of course work, the equivalent of four years of full-time work. These requirements include 65 credit hours of civil and environmental engineering courses from the following areas: applied mechanics, structural analysis and design, hydraulics, transportation, construction, soil mechanics, hydrology, water resources, and environmental engineering. There are additional required courses in mathematics, physics, and chemistry, as well as courses required by UH Mānoa in humanities and social sciences. The curriculum provides a broad-based background of fundamentals with coverage of the humanities and social sciences, basic sciences, mathematics, and the engineering design method. Course enrollment for all CEE majors is subject to the approval of an advisor. The requirements are described below and reflected on the check sheet and the list of course prerequisites.

All electives are subject to the approval of the instructor.

The student learning outcomes (SLOs), also known as program outcomes, describe a skill set that students are expected to have at the time of graduation. The SLOs are:

- a. An ability to apply knowledge of mathematics, science, and engineering;
- b. An ability to design and conduct experiments, as well as to analyze and interpret data;
- c. An ability to design a system, component, or process to meet desired needs;
- d. An ability to function on multi-disciplinary teams;
- e. An ability to identify, formulate, and solve engineering problems;
- f. An understanding of professional and ethical responsibility;
- g. An ability to communicate effectively;
- h. A broad education necessary to understand the impact of engineering solutions in a global, societal, and environmental context;
- i. A recognition of the need for, and an ability to engage in, life-long learning;
- j. A knowledge of contemporary issues; and
- k. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice, particularly recognizing the integral role of computers in engineering and the rapid expansion of resources on the internet.

## College Requirements

Students must complete the College Requirement courses for engineering (see “Undergraduate Programs” in this section).

### Departmental Requirements

Students must complete the following courses as well as one course in engineering math and two technical electives, (specific options are provided on the curriculum check sheet):

- EE 160 or ICS 111
- CEE 270 Applied Mechanics I (3)
- CEE 271 Applied Mechanics II (3)
- CEE 305 Applied Probability and Statistics (3)
- CEE 320 Fluid Mechanics Fundamentals (4)
- CEE 330 Environmental Engineering (4)
- CEE 355 Geotechnical Engineering I (4)
- CEE 361 Fundamentals of Transportation (3)
- CEE 370/370L Mechanics of Materials and Lab (3/1)
- CEE 375 Construction Materials (3)
- CEE 381 Structural Analysis (3)
- CEE 421 Engineering Hydraulics (3) and 431 Water & Wastewater Engineering (3)
- CEE 455 Geotechnical Engineering II (3)
- CEE 461 Pavement Engineering (3) or 462 Traffic Engineering (3) or 464 Urban and Regional Transportation Planning (3)
- CEE 471 Construction Methods (3) or 472 Construction Management (3) and 485 Reinforced Concrete Design (4) or 486 Structural Steel Design (3)
- CEE 489B Surveying and AutoCAD (2)
- CEE 489C Professional Ethics (1)
- CEE 490 Senior Design Project (3)
- ME 403, GG 312 or MATH 302 or 307

Other important requirement:

1. C grade or better (C-minus is not acceptable) is required for CEE 270.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Specialty Tracks

Students who want to pursue a structures track should refer to the curriculum checksheet for alternative senior year course work.

## Graduate Study

### Master's Degree

The department offers a graduate program leading to the MS degree in civil engineering with several areas of concentration under Plan A (thesis) or Plan B (non-thesis). Close cooperation is maintained with other departments and the Water Resources Research Center. Details and requirements of each plan may be obtained from the department office or on the web.

Applicants must present a BS in civil engineering or the equivalent as determined by the application review committee (and/or may be required to fulfill deficiencies) and must submit a Statement of Objectives form and evidence of passing the FE (Fundamentals of Engineering) exam or the results of the GRE General Test. If so required by the Graduate Division, applicants must supply the TOEFL score.

### Requirements

Both Plan A and Plan B require a minimum of 30 credit hours, exclusive of seminars. Plan A includes 9 credit hours of thesis research and a minimum of 12 credit hours in graduate civil and environmental engineering courses, exclusive of thesis, seminar, and directed reading. Plan B includes a minimum of 18 credit hours of graduate civil and environmental engineering courses, exclusive of seminar and directed reading, as well as a technical report. Both plans require a minimum of 1 credit of seminar.

### Doctoral Degree

Applicants to the PhD program must have fulfilled the requirements for the MS in civil engineering at UH Mānoa or its equivalent as determined by the application review committee. Those who have earned the MS at universities other than UH Mānoa must furnish the results of the GRE General Test or submit evidence of passing either the FE (Fundamentals of Engineering) or the EIT (Engineer-in-Training) or PE (Professional Engineer) exam. All applicants must furnish official transcripts of all previous undergraduate and graduate studies and three letters of reference clearly indicating that they are capable of completing a rigorous PhD program. Applicants must also supply a letter explaining in detail their career goals, specific area of concentration, work experience, and reasons for applying to the program. If so required by the Graduate Division, applicants must supply the TOEFL score.

### Requirements

Candidates for a PhD are required to pass a qualifying examination consisting of oral and written components. The examination will be confined to basic topics in civil engineering. One purpose of the qualifying examination is to identify possible deficiencies in the student's background with a view toward remedial measures. In addition, the examination serves as a means of assessing the student's potential for doctoral studies.

Students attain the status of doctoral candidate only after passing the qualifying examination and submitting a dissertation proposal that receives the unanimous approval of the dissertation committee.

To earn a PhD in civil engineering, a student must satisfactorily complete a minimum of 50 credit hours in course work beyond the BS and a minimum of 1 credit hour in civil and environmental engineering graduate seminar as a PhD student. Students must also complete and successfully defend a satisfactory doctoral dissertation. Based on a written recommendation of the student's dissertation committee and with the approval of the chair of graduate studies in civil engineering, students entering the PhD program may be granted an equivalence of up to 30 credit hours earned as part of the student's master's program. The 30 credit hour equivalents may include up to 9 credit hours for the previous MS thesis work but exclude graduate seminar credit hours taken as part of the MS program.

The courses that a student undertakes to fulfill the PhD credit hour requirements must be approved by the student's dissertation committee. At least 27 credit hours must be from graduate-level civil engineering courses. The remaining courses may include graduate and 400-level courses offered by the civil and environmental engineering department or other appropriate departments of UH Mānoa.

## Comprehensive Examination

Every PhD student must pass a comprehensive examination. The purpose of this examination is to ascertain the student's advanced knowledge in the chosen specialty. Examinations are given when, in the judgment of the dissertation committee, the student has had sufficient preparation, but not sooner than six calendar months after the student has passed the qualifying examination.

Students pass the examination if no more than one committee member opposes such an action. Students who fail may, at the discretion of the graduate faculty, repeat the test once at least six months later. Students who fail the examination a second time are dropped from the program.

## Dissertation Defense

PhD candidates are required to take a final oral examination in defense of their dissertation. The examination is conducted by the candidate's dissertation committee. Students pass upon the favorable recommendation of the majority of the committee.

- \*W. A. Shiroma, PhD (Chair)—electromagnetic theory, microwaves
- \*G. Arslan, PhD—distributed systems, Markov decision problems, nonlinear and robust control, game theory, learning and adaptive control
- \*O. Boric-Lubecke, PhD—RFICs for wireless communications, millimeter-wave and microwave devices, circuits and systems and biomedical applications
- \*P. E. Crouch, PhD (Dean)—nonlinear systems and control
- \*T. P. Dobry, PhD—digital systems, computers
- \*Y. Dong, PhD—computer networks and network security, distributed systems, computer architecture
- \*M. Fripp, PhD—power systems, smart grids, renewable energy
- \*N. T. Gaarder, PhD—communication theory, information theory
- \*D. Garmire, PhD—M/NEMS, CAD for M/NEMS, computer vision, computational biology
- \*A. Host-Madsen, PhD—communications signal processing, CDMA communications, multi-user communications, equalization
- \*M. Iskander, PhD (Director of HCAC)—computational electromagnetics, antennas, radar, and wireless communications
- \*A. Kavcic, PhD—communications, signal processing, information theory, magnetic recording
- \*A. Kuh, PhD—signal processing, machine learning, energy
- \*V. M. Lubecke, PhD—MEMS, microwave/terahertz radio, remote sensing technology and biomedical applications
- \*V. Malhotra, PhD—physical electronics, solid-state devices
- \*A. Ohta, PhD—devices, MEMS, biomedical microdevices, microfluidics
- \*T. R. Reed, PhD—signal and image processing, computer vision
- \*N. Santhanam, PhD—communications, signal processing, information theory, source coding

- \*G. H. Sasaki, PhD—computer communication networks, performance evaluation, optimization algorithms
- \*V. L. Syrmos, PhD—linear system theory, control theory
- \*J. R. Yee, PhD—computer communications networks, network optimization, stochastic models
- \*Z. Yun, PhD (HCAC)—wireless channel modeling, antennas and propagation
- \*R. Zhang, PhD—network and distributed system security and privacy
- \*X. Zhou, PhD—embedded systems computer architecture, hardware/software co-design and reconfigurable computing

## Emeritus Faculty

- N. Abramson, PhD—wireless data networks
- J. W. Holm-Kennedy, PhD—applied physics, sensors, biomedical sensors, innovation, innovation training
- B. Kinariwala, PhD—computer engineering
- F. Koide, PhD—biomedical engineering, operational amplifiers, electronic circuits
- S. Lin, PhD—coding theory, coded modulation, multi-user communications and error coding techniques
- K. Najita, PhD—solid-state devices
- E. J. Weldon, PhD—computer networks
- D. Y. Y. Yun, PhD—computational intelligence, biomedical informatics, parallel and networked computing

## Adjunct Faculty

- D. Nakafuji, PhD—renewable energy, distribution systems, smart grid

## Cooperating Graduate Faculty

- W. L. Ditto, PhD—applied chaos theory
- T. Ernst, PhD—neuroscience, MRI research
- R. Rocheleau, PhD—photovoltaics, sensors, thin films
- L. R. Roose, JD—integration and analysis of energy technologies and power systems
- S. K. Sharma, PhD—thin films, amorphous materials and ceramics, instrumentation development
- V. A. Stenger, PhD—neuroscience, MRI research
- G. Varner, PhD—experimental particle physics, instrumentation electronics

**Degrees Offered:** BS in electrical engineering, BS in computer engineering, MS in electrical engineering, PhD in electrical engineering

## The Academic Program

Electrical engineering and computer engineering are concerned with the exciting fields of electronics, computers, information technology, and the basic forms of energy that run our world. Electronics continue to bring forth new breakthroughs in solid-state technology (transistors, integrated circuits, VLSI chips, microprocessors, lasers, optical fibers), which in turn fuel the unprecedented revolution in telecommunications (World Wide Web, wireless, and digital signal processing), computers (neural network, distributed, and intelligent), instrumentation (biomedical, intelligent), and many other areas.

The undergraduate and graduate programs focus on three major areas: computers (architecture, algorithms, networking, hardware and software), electro-physics (solid-state devices and sensors, analog, circuit design, and microwaves and photonics), and systems (telecommunications, automatic controls, and signal processing).

The culmination of the undergraduate program is the capstone design project; this is a significant project that integrates the design content of previous courses while satisfying realistic constraints.

## Mission Statement

The mission of the Department of Electrical Engineering is to provide quality education, research, and service to our constituents. Major goals of the department are to:

1. Educate a new generation of electrical and computer engineers to meet the challenges of the future;
2. Create, develop, and disseminate new knowledge;
3. Promote a sense of scholarship, leadership, and service among our graduates; and
4. Contribute to the development of diversity within the profession through the education of women, indigenous, and other minority students.

## Undergraduate Study

### Design Experience Statement

A key aspect of electrical engineering and computer engineering education is a significant and meaningful design experience that is integrated throughout the curriculum. The design experience is necessary to prepare students in becoming professionals.

At UH Mānoa, the electrical engineering and computer engineering curricula assign design credits to each course. A student graduating in electrical engineering or computer engineering is required to have a minimum of 14 design credits with 3 design credits coming from EE 496, the Capstone Design Project. Students can check their progress in obtaining design credits by checking with their advisor and looking at design credits and the Curriculum Flow Chart. EE 496 places significant design responsibility on the students as they must plan and execute a major design problem. To prepare students for EE 496, students must take at least 1 credit of EE 296 Sophomore Project, and 2 credits of EE 396 Junior Project. The project courses help students in getting design experience outside the classroom as they learn engineering concepts in the classroom. The project courses and capstone project give students opportunities to work in teams, develop leadership skills, and work on open-ended design projects similar to industrial experience.

### Bachelor of Science Degrees

The bachelor of science degree program in electrical engineering and computer engineering requires a minimum of 122 credit hours. The departmental requirements consist of 48 credit hours of basic courses. The electrical engineering program requires 24 credit hours of technical electives. The computer engineering program requires an additional 17 credit hours of basic courses, and 6 credit hours of technical electives.

All electives are subject to the approval of an advisor. Enrollment in EE courses requires a grade of C- or better in all prerequisite courses.

### College Requirements

Students must complete the college requirement courses for engineering (see “Undergraduate Programs” within this section).

### Departmental Requirements

Electrical engineering and computer engineering students must complete the following 48 credit hours of courses:

- EE 160, 211, 213, 260, 315, 323/323L, 324, 342, 371, 495, Projects (296, 396, 496), PHYS 274, MATH 307, EB\*
- EE 160 may be substituted with EE 110 for the electrical (but not computer) engineering program, in which case there are 47 credit hours.

\*Engineering Breadth (EB) is satisfied by CEE 270, ME 311, or a CEE, ME, OE, or BE course that is at the 300 level or higher. It may also be satisfied by a physical, biological, or computer science course that is at the 300 level or higher and approved by the department’s undergraduate curriculum committee.

### Projects

There is a requirement of EE 296, 396, and 496, which is the capstone design experience. A minimum of, respectively, 1, 2, and 3 credits are required of each.

## Bachelor of Science in Electrical Engineering

### Objectives

Program educational objectives for the electrical engineering program:

1. Electrical engineering graduates should be engaged in the practice of electrical engineering in industry, education, and public service.
2. Graduates should contribute to the technological and economic development of Hawai‘i, the U.S., and beyond.
3. Graduates should be prepared for admission to top graduate programs.
4. Graduates should be motivated toward and engaged in continuous professional development, through individual effort and advanced professional education.
5. Graduates should provide technical leadership, with an understanding of the broader ethical and societal impact of technological developments, and the importance of diversity in the workforce.

### Outcomes

All graduates of the electrical engineering program are expected to have demonstrated:

1. An ability to apply knowledge of mathematics, science, and engineering. This includes probability and statistics, including applications appropriate to electrical engineering; mathematics through differential and integral calculus, and advanced mathematics, such as differential equations, linear algebra, complex variables, and discrete mathematics; sciences (defined as biological, chemical, or physical science); and engineering topics (including computing science) necessary to analyze and design complex electrical and electronic devices, software, and systems containing hardware and software components.
2. An ability to design and conduct experiments, as well as to analyze and interpret data.
3. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
4. An ability to function on multidisciplinary teams.
5. An ability to identify, formulate, and solve engineering problems.
6. An understanding of professional and ethical responsibility.
7. An ability to communicate effectively.
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
9. A recognition of the need for, and an ability to engage in life-long learning.

10. A knowledge of contemporary issues.
11. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Electrical engineering students must complete a minimum of 24 credit hours of technical electives.

### Technical Electives

A minimum of 17 credits is in one of the major tracks (electro-physics and systems), which includes all courses in Group I and the remaining courses from Group II.

A minimum of 7 additional credits is required from the following list, of which 3 credits must be from outside the major track, and 1 credit must be a laboratory.

#### Electro-Physics Track:

- Group I: EE 326/326L, 327, 372/372L
- Group II: EE 328/328L, 422/422L, 423, 425, 426, 427, 435, 438, 470, 471, 473, 474, 475, 477, 480

#### Systems Track:

- Group I: EE 343/343L, 351/351L, 415
- Group II: EE 344, 416, 417, 435, 442, 446, 449, 452, 453

The following Computer Engineering courses may also be used as technical electives: EE 205, 361/361L, 366, 367/367L, 406, 461, 467, 468, 469. EE 491 can also be used as a technical elective, but the track designation is determined on a case-by-case basis.

A student, along with a faculty member, may propose an alternate track. This alternate track must be (1) equivalent in rigor and breadth to the existing tracks, (2) endorsed by another faculty member, and (3) approved by the department's undergraduate curriculum committee.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Bachelor of Science in Computer Engineering

### Objectives

Program educational objectives for the computer engineering program:

1. Computer engineering graduates should be engaged in the practice of computer engineering in industry, education, and public service.
2. Graduates should contribute to the technological and economic development of Hawai'i, the U.S., and beyond.
3. Graduates should be prepared for admission to top graduate programs.
4. Graduates should be motivated toward and engaged in continuous professional development, through individual effort and advanced professional education.
5. Graduates should provide technical leadership, with an understanding of the broader ethical and societal impact of technological developments, and the importance of diversity in the workforce.

### Outcomes

All graduates of the computer engineering program are expected to have demonstrated:

1. An ability to apply knowledge of mathematics, science, and engineering. This includes probability and statistics, including applications appropriate to computer engineering; mathematics through differential and integral calculus, and advanced mathematics, such as differential equations,

linear algebra, complex variables, and discrete mathematics; sciences (defined as biological, chemical, or physical science); and engineering topics (including computing science) necessary to analyze and design complex electrical and electronic devices, software, and systems containing hardware and software components.

2. An ability to design and conduct experiments, as well as to analyze and interpret data.
3. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
4. An ability to function on multidisciplinary teams.
5. An ability to identify, formulate, and solve engineering problems.
6. An understanding of professional and ethical responsibility.
7. An ability to communicate effectively.
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
9. A recognition of the need for, and an ability to engage in life-long learning.
10. A knowledge of contemporary issues.
11. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
12. A knowledge of discrete mathematics.

Computer engineering students must complete the following 23 credit hours of courses:

- ICS 141, EE 205, 361/361L, 367/367L, 468, 6 credits of technical electives

The set of courses EE 160, 205, 367, and 367L may be substituted with the set of courses ICS 111, 211, and 212.

### Technical Electives

A minimum of 6 credit hours of technical electives is required, from the following list of EE and ICS courses. One TE may be any other EE course at the 300 level or higher.

- EE 344 (or ICS 451), 366, 406, 449 (or ICS 451), EE 461 or (ICS 431), EE 467, 469, 491 (E, F, G), ICS 311, 313, 314, 321, 414, 415, 421, 424, 425, 432, 441, 442, 461, 464, 465, 466, 469, 481

Note that ICS courses from the list may have prerequisite courses that are not part of the computer engineering curriculum. These courses used as technical electives will lead to more credit hours to complete the program.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Graduate Study

### Outcomes

The Department of Electrical Engineering adheres to the student learning outcomes of the Graduate Division:

"In general, a student who has successfully completed the graduate degree requirements should be able to

1. Demonstrate mastery of the methodology and techniques specific to the field of study.
2. Communicate both orally and in writing at a high level of proficiency in the field of study.

3. Conduct research or produce some other form of creative work.
4. Function as a professional in the discipline.”

### Master's Degree

Intended candidates for the MS degree in electrical engineering must present the BS degree in electrical engineering or the equivalent. Plan A (thesis) and Plan B (non-thesis) options are offered. However Plan B is only for Intern Plus Program students.

#### Requirements

**Plan A (thesis):** This program requires 30 credit hours in approved technical courses including one graduate seminar in electrical engineering or a related field. This plan requires 9 credit hours in EE 700 Thesis Research and a minimum of 12 credit hours in 600-level courses in a major track (computers, electro-physics, or systems), 6 credit hours in 400- or higher-level courses outside of the major track (engineering, mathematics, science), and 3 credit hours of electives in 400- and higher-level courses. A maximum of 6 credit hours in 400 level courses is allowed.

**Plan B (non-thesis):** A minimum of 30 credit hours is required with a grade of B or better (not B-minus). Students will be required to take at least 12 credits (600 level and above) in their major track, at least 6 credits (400 level and above) outside the major track, and 6 credits (600 level and above) as university-wide electives that are related to the student's major track of study. A maximum of 6 credits will be counted towards EE 699. As part of the curriculum, attendance at 12 departmental or college seminars, or the equivalent is required. The final exam includes a written report and a seminar presentation (based on independent reading or research).

### Doctoral Degree

Intended candidates for the PhD degree in electrical engineering must present the BS degree in electrical engineering or its equivalent. Applicants are encouraged to submit the GRE General Test scores. PhD students are required to achieve a good, broad understanding of electrical engineering fundamentals and a thorough knowledge, up to its present state, in a chosen specialty. Students must perform research in their special field under the guidance of a faculty advisor and present a dissertation that is an original contribution to electrical engineering. The dissertation must be a scholarly presentation suitable for publication.

#### Requirements

PhD students are required to specialize in a major track (computers, electro-physics, or systems) and show competence in a minor track. In addition to the MS course credit requirements, 9 credit hours of 600-level course work in the major track and 3 credit hours of 600-level course work in a minor track are required. All PhD students must also participate in a substantial teaching project and demonstrate competence in teaching.

### Qualifying Examination

Intended candidates for the PhD degree register for three credits of a directed reading course under their advisor's direction during their first semester in the PhD program. By the end of the following semester, the candidate takes an oral qualifying examination that tests the candidate's research potential and knowledge of pertinent fundamentals. Three graduate faculty members form the examining committee: one member of the committee is the candidate's advisor; the graduate committee selects the final two committee members. At least one of the committee members selected by the graduate committee must be from the student's major track of specialization. At least two committee members must pass the intended candidate; else, the candidate repeats the exam by the end of his/her third semester in the program. A candidate who does not pass the qualifying exam by the end of the third semester is dropped from the PhD program.

The candidates starting in the fall semester can petition to take the qualifying exam by the end of their first summer semester. In unusual circumstances (including an advisor change), the candidates can petition to postpone their qualifying exams up to a semester.

The candidates are requested to complete and submit the EE PhD Qual form, which can be picked up from the EE office. Candidates who enter the PhD program in the fall semester are requested to submit the form by the following **March 1**; while candidates who enter the PhD program in the spring semester are requested to submit the form by the following **October 1**.

After passing the qualifying examination, students are advanced to candidacy and must have a doctoral committee appointed within two semesters. The committee should consist of at least five members, one of whom must be in a department other than electrical engineering. After appointment of the committee, students should work out a tentative program of courses that meets with the committee's approval.

### Comprehensive Examination

When students have completed most of their course work, they must pass a comprehensive examination before research is undertaken. This consists of an oral examination given by the entire committee; it may be preceded, at the discretion of individual committee members, by an additional oral or written examination. Students who fail may repeat the examination only once, no sooner than three months after the first examination. Once students pass the comprehensive examination, they may proceed with dissertation research.

### Final Examination

At the conclusion of the research, students write a dissertation that must be approved by a majority of the doctoral committee. Finally, students must pass another oral examination covering primarily the dissertation.

## Faculty

- \*M. N. M. Ghasemi Nejhada, PhD (Chair)—nanotechnology, composites, renewable energy, smart structures
- \*J. S. Allen, PhD—acoustics, multiphase fluid dynamics, micro-biomechanics
- \*D. M. Azimov, PhD, DSc—guidance and control, autonomous space systems, space flight dynamics, optimal control
- \*P. J. Berkelman, PhD—haptic interfaces, surgical robotics, magnetic levitation
- \*B. S. Bingham, PhD—controls, dynamics, robotics, autonomous systems
- \*B. H. Chao, PhD—combustion, perturbation methods
- \*R. Ghorbani, PhD—renewable energy, dynamics, controls, design
- \*L. H. Hihara, PhD—corrosion materials, mechanical behavior of materials
- \*M. Kobayashi, PhD—computational fluid dynamics, aeroacoustics, dynamical systems, topology optimization
- \*J. Li, PhD—light weight materials, material, processing, manufacturing
- \*B. Liebert, PhD—materials science, corrosion, failure analysis
- \*S. F. Miller, PhD—manufacturing, design of medical devices, tribology
- \*W. Qu, PhD—boiling and two-phase flow, microscale thermofluid transport phenomena
- \*A. Z. Trimble, PhD—renewable energy, industrial automation, precision engineering
- \*Y. Zuo, PhD—colloids and surfaces, lung surfactants, AFM, biomedical applications

## Adjunct Faculty

J. Yuh, PhD—control, robotics, design

## Cooperating Graduate Faculty

- M. J. Antal Jr., PhD—alternate energy, combustion
- C. M. Kinoshita, PhD—combustion, energy systems, thermochemical systems
- B. Y. Liaw, PhD—materials, energy conversion, solid-state ionics
- S. M. Masutani, PhD—combustion, turbulent transport phenomena, energy systems
- R. Rocheleau, PhD—thin film ceramic materials
- S. Q. Turn, PhD—thermo chemical energy conversion, fuels processing, energy systems

**Degrees Offered:** BS in mechanical engineering, MS in mechanical engineering, PhD in mechanical engineering

## Mission Statement

To prepare graduates for successful engineering and professional careers and leadership roles with lifelong learning and ethical conduct that will lead them to be engaged good citizens, engineers, and professionals in their community and the world.

## Objectives

- Our graduates will be accomplished professionals by being able to formulate, communicate, and solve problems using engineering principles, methodologies, and modern tools;
- Our graduates will be professionals and leaders in industry, national laboratories, academia, and society by employing engineering fundamentals, design skills, thinking creatively, communicating effectively, working collaboratively, and implementing emerging and innovative technologies;
- Our graduates will be professionals and leaders who accept and practice their professional and ethical responsibilities, respect diversity of opinion and culture, and have a proper understanding and consideration for a healthy and aesthetic environment.

## The Academic Program

Mechanical engineering (ME) is concerned with the design of all types of machines, conversion of energy from one form to another, instrumentation and control of all types of physical and chemical processes, the manufacturing and utilization of engineering materials, and control of human and machine environments. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of a wide variety of devices, machines, instruments, materials, and systems used for energy conversion, heat and mass transfer, biomedical applications, environmental control, control of human and machine environment, physical and chemical process control, materials processing, transportation, manufacture of consumer products, materials handling, and measurements. Mechanical engineers also employ Computer Aided Design (CAD), Computer Aided Manufacturing (CAM), Computer Aided Testing (CAT), Computational Fluid Dynamics (CFD), computer modeling and simulations, novel materials, robotics, and mechatronics (integration of computers with electromechanical systems) in their day-to-day activities. Mechanical engineers find opportunities for employment in every branch of industry and in a variety of government agencies. Work may involve research, development, design, analysis, manufacture, testing, marketing, or management.

## Undergraduate Study

### Outcomes

- An ability to apply knowledge of mathematics, science, and engineering
- An ability to design and conduct experiments, as well as to analyze and interpret data
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- An ability to function on multi-disciplinary teams
- An ability to identify, formulate, and solve engineering problems
- An understanding of professional and ethical responsibility
- An ability to communicate effectively
- The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- A recognition of the need for and an ability to engage in lifelong learning

- A knowledge of contemporary issues
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

### Professional Components

- A culminating design experience that integrates knowledge and skills acquired throughout the curriculum
- The application of engineering standards and realistic constraints, including consideration of economics, environmental sustainability, manufacturability, ethics, health, safety, society, and politics

### Bachelor's Degree

The BS degree requires completion of at least 124 credit hours of course work. The curriculum consists of a group of required courses chosen to provide students with the basic tools for the professional practice of mechanical engineering and to assist students in developing a sense of responsibility as professionals. The objectives of the lower division curriculum are to build a foundation in the basic sciences and mathematics, provide an introduction to engineering design and professional ethics, develop communications and computer programming skills, and acquire an appreciation for the humanities and social sciences. The objectives of the upper division program are to provide a sound foundation in the engineering sciences; build on that foundation for applications in the areas of energy conversion, mechanical systems and control, experimentation, and manufacturing; and encourage creativity culminating in a capstone design experience. To provide sufficient flexibility, technical elective courses enable students to acquire additional competence in areas compatible with their career objectives.

All electives are subject to the approval of an advisor.

### College Requirements

Students must complete the college requirement courses for engineering (see "Undergraduate Programs" within the College of Engineering).

### Departmental Requirements

Students must complete the following coursework:

- ME 213 Introduction to Engineering Design (3)
- CEE 270 Applied Mechanics I (3)
- CEE 271 or ME 271 Applied Mechanics II (3)
- MATH 190 Introduction to Programming (1) or EE 160 Programming for Engineers (4)
- MATH 302 Introduction to Differential Equations I (3) or MATH 307 Linear Algebra and Differential Equations (3)
- EE 211 Basic Circuit Analysis I (4)
- ME 311 Thermodynamics (4)
- ME 312 Applied Thermodynamics (3)
- ME 322 Mechanics of Fluids (3)
- ME 331 Materials Science and Engineering (3)
- ME 341/342 Manufacturing Processes/Lab (3/2)
- ME 360 Computer Methods in Engineering (3) or MATH 407 Numerical Analysis (3) or PHYS 305 Computational Physics (3)
- ME 371 Mechanics of Solids (3) or CEE 370 Mechanics of Materials (3)
- ME 372 Component Design (3)
- ME 374 Kinematics/Dynamics Machinery (3)
- ME 375 Dynamics of Machines and Systems (3)

- ME 402 Dynamics Systems Laboratory (2)
- ME 422 Heat Transfer (3)
- ME 480 Thermofluid Measurements and Design (3)
- ME 481 Design Project I (3)
- ME 482 Design Project II (3)
- Technical electives (9): Three courses that can be selected from ME 400-level technical electives (3), one that can be replaced with a non-ME course (3) (with approval from chair), or PHYS 274 or BIOL 171 without approval; and a second that can be replaced with an ME 600-level course (3) (3.0 GPA minimum and approval from chair) or ME 499 (3)

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Graduate Study

#### Outcomes

- Demonstrate mastery of the methodology and techniques specific to the field of study.
- Communicate both orally and in writing at a high level of proficiency in the field of study.
- Conduct research or produce some other form of creative work.
- Perform in their field of study at a professional level.

The department offers graduate programs leading to MS and PhD degrees in mechanical engineering, with areas of concentration in thermal and fluid sciences conversion (heat and mass transfer, thermodynamics, combustion, thermal environmental engineering, biotechnology), in materials/manufacturing (nano, composite and smart materials, mechanical properties, failure analysis, electrochemistry and corrosion, processing, marine materials), and in mechanics design, systems, and controls (robotics, structures, dynamics, control, continuum mechanics, renewable energy, autonomous systems, biomedical). For qualified graduate students, teaching assistantships, research assistantships, and scholarships are available.

#### Master's Degree

Applicants for admission to the MS program must have completed a BS degree in engineering or its equivalent from a reputable institution.

#### Requirements

Students are required to follow the Plan A (thesis) program. However, under special circumstances, a petition to follow Plan B (non-thesis) may be granted by the graduate faculty. A minimum of 30 credit hours is required for graduation, including 1 credit hour for seminar. Plan A students must take 8 credit hours for thesis, 12 credit hours in the ME 600 course series, and 9 credit hours in technical electives. Technical elective courses must be at the 400 level or above, selected from engineering, mathematics, or physical sciences approved by the student's thesis committee.

For graduation, each candidate must present an acceptable thesis (research report for Plan B) and must pass a final oral examination based on the thesis for Plan A or on the course work and the research report for Plan B.

## **Doctoral Degree**

Applicants for admission to the PhD program must have completed the requirements for the MS in mechanical engineering at UH Mānoa or an equivalent degree from a reputable institution.

### **Requirements**

Intended candidates for the PhD are required to pass an oral qualifying examination within the prescribed period of time, by taking 4 credits of ME 699. The purpose of the qualifying examination is to judge students' ability to pursue research. After passing the qualifying examination, the student will be admitted to the status of candidate in the PhD program. At the discretion of the qualifying examination committee, students who fail the qualifying examination will be dropped from the program.

Students must satisfactorily complete a minimum of 50 credit hours in course work beyond the BS level. They are required to select a major within the following three areas of concentration: materials/manufacturing, mechanics/design/systems/controls, or thermal/fluid sciences.

Students who enter the program may, with the approval of the graduate chair, be credited with up to 30 credits for equivalent work to be counted toward their PhD-credit-hour requirement. Up to 8 of these 30 credit hours may be assigned for prior MS thesis work. Students who possess a second MS degree may be credited with up to 9 additional credit hours for equivalent work. Up to 9 credit hours may be assigned for course work taken as an unclassified graduate student. All courses shall be selected by students but must be approved in writing by their committees. These courses must form an integrated education plan. A minimum of 2 credit hours in ME 691 or its equivalent must be included in every PhD program.

Students who desire teaching experience may, with the approval of the PhD committee chair, request that the department chair assign them teaching responsibility for a particular undergraduate course. The department chair will determine whether students are qualified to teach the course in question, and, if they are deemed qualified, they may be given the teaching assignment. Students who teach a course or courses will be assigned a maximum of 3 credit hours toward their PhD course work requirements.

### **Comprehensive Examination**

PhD candidates must pass an oral comprehensive examination to demonstrate their comprehension of the chosen areas of study relevant to their dissertation proposals and basic knowledge of courses taken at graduate level. Students who fail the comprehensive examination may, at the discretion of the graduate faculty concerned, repeat it once after at least six months. Students who fail the examination a second time will be dropped from the program.

### **Final Examination**

Students are required to complete a satisfactory doctoral dissertation and to pass an oral final examination based primarily upon the dissertation. The final examination will be administered by the respective PhD committee. A student passes the final examination upon the favorable recommendation of a majority of the PhD committee.

# Hawaiʻinuiākea School of Hawaiian Knowledge

## Administration

Spalding Hall 454  
2540 Maile Way

## Centers and Programs

- Kawaihuelani Center for Hawaiian Language
- Kamakakūokalani Center for Hawaiian Studies
- Ka Papa Loʻi o Kānewai Hawaiian Cultural Garden

**Degrees and Certificates Offered:** Undergraduate Certificate in Hawaiian; minor in Hawaiian language immersion education; BA in Hawaiian; BA in Hawaiian studies; MA in Hawaiian; MA in Hawaiian studies

## General Information

Hawaiʻinuiākea School of Hawaiian Knowledge is comprised of three units that offer an integrated curriculum leading to baccalaureate and graduate degrees, certificates, and minors in their respective units.

The mission of the Hawaiʻinuiākea School of Hawaiian Knowledge is to pursue, perpetuate, research, and revitalize all areas and forms of Hawaiian knowledge, including its language, origins, history, arts, sciences, literature, religion, and education; its law and society; its political, medicinal, and cultural practices; as well as all other forms of knowledge. We recognize the unique status of the Native Hawaiian people and recognize their unique connection to these forms of knowledge by encouraging, supporting, facilitating, and ensuring the incorporation of Native Hawaiians at all levels of the university. We seek to accomplish this mission with a Native Hawaiian perspective that recognizes the holistic aspects of this knowledge, its diversities, and the importance of practical applications. Our mission

is to apply this knowledge to provide service and support to the Hawaiian community, as well as extending this knowledge outward from the academy and the community, into the Pacific and other international domains.

## Faculty

- \*K. R. K. Oliveira, PhD (Director)—innovative instruction of Hawaiian language through various cultural activities, Hawaiian place names and land tenure
- \*M. R. Nogelmeier, PhD (Graduate Chair)—innovative instruction of Hawaiian language and literature, translation, poetry, composition, creative writing
- C. Baker, MA—Hawaiian grammar, construction of Hawaiian identity through language, Hawaiian language theatre, linguistic anthropology
- K. de Silva, MA—Hawaiian language and literature, revitalization of language and identity through mass media
- R. Koga, MA—Hawaiian and English language and literature, language teaching and learning
- \*R. Lopes Jr., PhD—innovative instruction of Hawaiian language through cultural means such as hula and music
- K. K. Lucas, MEd—Hawaiian language learning and instruction
- \*K. Makekai-Whittaker, PhD—Kanaka Maoli education during the Hawaiian Kingdom period, Hawaiian language immersion education, Hawaiian culture and ceremony in language learning
- R. K. NeSmith, MA—language teaching and learning, communicative language teaching, incorporation of Hawaiian culture in language teaching
- F. P. Nicholas—Hawaiian language and culture, native Hawaiian language speaker from Ni‘ihau
- M. L. K. Saffery, MEdT—place-based Hawaiian curriculum; development of culturally appropriate interdisciplinary Hawaiian language undergraduate and graduate curriculum
- \*R. Solis, PhD—Hawaiian language learning and instruction, Hawaiian religion, newspaper translating and broadcasting
- \*S. L. Warner, PhD—Hawaiian language, Hawaiian language immersion education, evaluation, curriculum development and second-language acquisition, educational psychology
- \*A. K. Wong, PhD—Hawaiian language and culture, immersion education, curriculum development, native Hawaiian language speaker
- \*K. L. Wong, PhD—revitalization of Hawaiian language and people
- M. K. Wong, MA—Hawaiian language and culture, Paniolo practices and lifestyle.

**Degrees and Certificates Offered:** Undergraduate Certificate in Hawaiian, minor in Hawaiian, minor in Hawaiian Immersion Education, BA in Hawaiian, MA in Hawaiian

## The Academic Program

Kawaihuelani Center for Hawaiian Language (HAW) offers an undergraduate certificate, a minor in Hawaiian, a minor in Hawaiian Immersion Education, and bachelor and master’s degrees in Hawaiian. The center conducts research in relevant fields of study and offers four years of language study as well as courses on immersion education, curriculum development, and topics of relevant Hawaiian cultural content. In partnership with Ho‘okūlaiwi: ‘Aha Ho‘ona‘auao ‘Ōiwi (Center for Native Hawaiian and Indigenous Education), Kawaihuelani trains teachers for Hawaiian immersion schools, public schools

with Hawaiian language courses, Hawaiian charter schools, and the UH Mānoa program. The faculty and staff of Kawaihuelani create and implement projects and programs that promote Hawaiian language, culture, history, and traditions such as: Ka Hālau Hanakeeka, Ho‘okūlaiwi: ‘Aha Ho‘ona‘auao ‘Ōiwi (Center for Native Hawaiian and Indigenous Education), Ho‘olaupa‘i: Hawaiian Newspapers Resources, Kauakūkalahale, Kaulakahi Aloha, Ke Aolama, Mary Kawena Pukui Hale, Ka Waihona a ke Aloha, and Mauiakama.

## Undergraduate Study

### BA Degree in Hawaiian

#### Requirements

- Completion of 120 non-repeated credit hours, including the General Education Requirements (see the “Undergraduate General Education Requirements” section for more information) and the following program requirements:
- GPA of 2.0 in all UH Mānoa registered credit hours
- 30 credit hours above HAW 202 with a GPA of 3.0 or better, including:
- Required courses (15 credits): HAW 301, 302, 401, 402, and 452
- 15 electives credits: HAW 321, 331, 332, 345, 373, 383, 384, 425, 426, 427, 428, 429, 430, 433, 435B, 435C, 445, 454, 462B, 462C, 462D, 463, 466, 470, 483, 484, 485, 486, 488, 490, and 499
- A maximum of 3 credit hours from HAW 284, MAO 102, SAM 102, TAHT 103, 104, ES 360, MUS 312, MUS 412, MUS 413, SLS 430, LING 445 can be counted towards the electives
- Students must earn a grade of C or better for all Hawaiian Language courses that serve as prerequisites for other Hawaiian Language courses. Students who do not meet this requirement will not be permitted to register for the next level of Hawaiian Language.
- For Hawaiian Language majors, a grade of B- or better is required for 300-400 level Hawaiian courses counted towards the Hawaiian Language major.

Students admitted to the BA program prior to 2007 should consult an advisor to review changes that may affect their programs.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Minor

Kawaihuelani offers two undergraduate minors. One in Hawaiian and one in Hawaiian Immersion Education.

### Minor in Hawaiian

The overall purpose of the minor in Hawaiian is to provide an undergraduate learning opportunity tailored to classified students who are interested in Hawaiian Language as a second discipline of specialization that will complement their major studies, support their future work in and for the Hawaiian community, and/or empower their growth and development as Native Hawaiians. Acceptance into the minor follows:

- Completion of 25 credits of university work with a 2.0 cumulative and major GPA
- Admission to an appropriate academic major
- Successful completion of HAW 101, 102, 201, and 202.

## Requirements

- 18 credit hours of non-introductory Hawaiian Language courses (beyond 202) including:
  - 12 credit hours in continuing Hawaiian language study (HAW 301, 302, 401, and 402)
  - 6 credit hours from HAW elective courses at the 300-400 level in various content areas
- A 3.0 GPA in courses leading to the minor
- A grade of B- or better is required for all Hawaiian Language courses counted towards the Hawaiian Language minor.

## Minor in Hawaiian Immersion Education

In collaboration with Ho'okulāiwi: 'Aha Ho'ona'auao 'Ōiwi (Center for Native Hawaiian and Indigenous Education) housed within the College of Education, Kawaihuelani administers a minor in Hawaiian Immersion Education to prepare secondary subject area teachers for the Hawaiian Language Immersion Program in the Department of Education. Acceptance into the minor follows:

- Completion of 55 credits of university work with a 2.75 cumulative and major GPA
- Admission to an appropriate academic major
- Successful completion of the College of Education entrance exam and personal admissions interview
- Successful completion of HAW 302 or higher
- Attainment of a B- average for all advanced level Hawaiian language courses.

## Requirements

- A total of 27-36 credits will be required with a minimum GPA requirement of 2.75 in the minor courses: 15-18 from the College of Education and 12-18 from Hawaiian Language.
- College of Education: ITE 312, EDEP 311, EDEF 310, one complementary course (ETEC 414; SPED 445; ITE 360; EDCS 431), ITE methods course (33X-34X) in subject area
  - Hawaiian: HAW 331, 332, 401, 402, 463, and 470

## Certificates

On recommendation of the Center for Hawaiian Language, UH Mānoa confers certification of achievement in Hawaiian language.

## Requirements

- 15 credit hours beyond the intermediate level in Hawaiian, including:
  - 6 credit hours in continuing language study
  - 9 credit hours in language, literature, or structure courses selected to complement the major field of study
- A 3.0 GPA in courses leading to the certificate is required
- A grade of B- or better is required for all Hawaiian language courses counted towards the Hawaiian language certificate.

## Graduate Study

### Master's Degree

The graduate program in Hawaiian is designed to provide broad, in-depth education in the Hawaiian language, culture, and literature and is an integral part of the efforts to revitalize Hawaiian as a living language. The program is designed to create scholarship in Hawaiian in new domains, including advanced study of literature; to strengthen and expand the understanding and use of various styles of Hawaiian; to develop curriculum and resources and teacher training for the Kula

Kaiapuni (Hawaiian medium schools); and to provide support to graduate students in related fields. The MA in Hawaiian is intended for students who have a broad background in Hawaiian language and culture, but want more depth in their knowledge. The three areas of the curriculum that are available are:

- **Mo'olelo.** The Mo'olelo curricula focuses on Hawaiian history and literature through the analysis, critique, creation and presentation of Hawaiian language resources.
- **Kumu Kula Kaiapuni.** The Kumu Kula Kaiapuni curricula focuses on the educational, linguistic, and cultural tools that teachers need to perform better in Hawaiian medium schools. Students producing curriculum and developing their own teaching skills will also be able to work closely with the newly established Mary Kawena Pukui Hale: Center for the Survival and Promotion of Hawaiian.
- **Kālai'ōlelo.** The Kālai'ōlelo curricula focuses on the linguistic analysis of Hawaiian.

## Admission Requirements

All potential graduate students must submit an application to the Graduate Division. Applicants to the MA in Hawaiian must have completed a bachelor's degree and submitted the following to the graduate chair prior to admission: official transcripts from each school attended; 18 upper-division credit hours in Hawaiian and HAW 402 (or equivalent); a statement of objectives written in Hawaiian; and three letters of recommendation.

In addition, a written and oral examination in Hawaiian will be administered by the graduate chair, and an interview will be conducted by an admissions committee of Hawaiian language faculty.

## Degree Requirements

- Students must complete 33 credits with a GPA of 3.0 or better and must include at least 24 credits at the 600 level or higher.
- With pre-approval from the graduate advisor, a student may include a limit of 9 credits that are not taught in Hawaiian but are related to their research.
- Students must receive a B- or better in ALL courses counted towards their degree.
- Core requirements:
  - HAW 601 Kākau Mo'olelo (Narrative Writing)
  - HAW 602 Kākā'ōlelo Oratory (Hawaiian Speech Styles)
  - Choose two of the three courses below:
    - HAW 604 Haku Palapala Noi Laeo'o/Writing a Hawaiian Master's Proposal
    - HAW 605 Ka Hana Noi'i (Research Methods)
    - HAW 612 Nā Mana'o Politika Hawai'i (Hawaiian Political Thought)
  - HAW 615 Kuana'ike (World View)
  - HAW 652 Pilina 'Ōlelo (Grammar)
- Thesis (Plan A) and Project/Non-thesis (Plan B) options are offered.
  - Students completing a Plan A thesis are required to take 6 credits of HAW 700. A student must write a thesis in Hawaiian on a topic approved by the student's advisor and committee. The total number of 699 and 700 credits applied toward degree requirements shall not exceed 12 credits.
  - Students completing a Plan B project/non-thesis will enroll in 6 credits of HAW 695. This capstone course is

the culminating experience where the student will display the knowledge he or she has researched into a form of his or her choice with the approval of the advisor and committee. Students may also choose the internship/haumāna relationship with a mānaleo (native speaker), kupuna (elder), or other cultural practitioner where the student will observe, learn, participate, and document the experience. A maximum of 9 credits of 699 may be applied toward degree requirements.

For more information on the MA in Hawaiian, contact the graduate chair through the departmental office.

## **Credits for Previous Hawaiian Language Experience**

### **Back Credits Policy & Procedures**

Please refer to the Hawaiian and Second Language Policy on Back Credits available in the “General Education” section of the *Catalog*.

**Definition:** Back credits are credits received for previous language experience that do not qualify as transfer credits.

**Eligibility:** All students (including native speakers of a language and non-UH system students) with experience in Hawaiian language may be eligible to earn 3 to 16 back credits.

**One Language:** Back credits may be earned for ONLY ONE language and will be based on the first instance of taking a course for a letter grade in that language at UH Mānoa. A repeated or backtrack course is NOT eligible for back credits.

Students who wish to earn back credits for Hawaiian language shall:

1. Make arrangements with Kawaihuelani’s academic advisor to take the Hawaiian language placement exam.
2. Complete the Hawaiian language placement exam in order to determine the appropriate level HAW course for the student.
3. Enroll (for letter grade) in the Hawaiian language course that the student was placed into after completing the Hawaiian language placement exam.
4. Earn a grade of C or better (not C-) in the Hawaiian language course that the student was placed. Back credits will not be awarded if a student does not receive a grade of C or better for the class the student was placed. The grade of C or better must be earned on the first time the course was taken. A grade of C/NC is not eligible for back credits.
5. Make arrangements to complete forms with Kawaihuelani’s academic advisor to receive back credits. Back credits are not automatically awarded. To receive back credits, students must complete a petition form with Kawaihuelani’s academic advisor. Submit the petition form the semester after the student’s satisfactory completion of the language course, but no later than one semester before graduation.
6. Kawaihuelani’s academic advisor shall award from 3 to 16 back credits based on the course the student successfully completed with a grade of C or better. Back credits are earned with no grade assigned.

### **Transfer Credits Policy and Procedures**

Please refer to the UH Mānoa Policy for Transfer Credits. Access: [manoa.hawaii.edu/admissions/undergrad/policies.html#credits](http://manoa.hawaii.edu/admissions/undergrad/policies.html#credits).

**Definition:** Transfer credits are credits received for previous language courses completed at another institute of higher education that articulate with UH Mānoa language courses.

Transfer credits accepted for language courses completed at another institution of higher education are not eligible for back credits.

**Eligibility:** Majors and non-majors may request an evaluation of their Hawaiian language transfer credits, however, the request cannot be formally processed and approved until a student has been admitted to a program leading to a degree and has confirmed their intention to enroll.

1. Students shall submit to Kawaihuelani’s academic advisor:
  - (a) a completed “Request for Evaluation of Transfer Credits” form available at the Office of Admissions; as well as (b) supporting documents for each course requesting to be evaluated (include syllabus, course description, final product/assignment, and textbook(s)/reading(s) used). If supporting documents are not available, the Kawaihuelani Curriculum Committee may request a short interview with students to assess their Hawaiian language proficiency and to ask them about the courses in question (what was learned, what did you do, etc.).
2. The advisor will review the transfer credit petition to assure all required forms and supporting documents (listed above) are included and will check and printout the student’s transcript on STAR.
3. The advisor will then send the entire transfer credit petition (forms, documents, and transcript) to Kawaihuelani’s Curriculum Committee for review and decision-making on a case-by-case basis. The Curriculum Committee is encouraged to include faculty with specific expertise when needed. The committee will review requests twice a semester, or as needed.
4. Possible outcomes of the committee review may include:
  - a. the outside course has already been articulated with UH Mānoa, so the credits will transfer and count as the articulated HAW course;
  - b. the outside course is deemed equivalent to a HAW course even though it has not been officially articulated, so the credits will transfer and count as the equivalent HAW course;
  - c. UH Mānoa does not have an equivalent course, but committee finds the outside course valuable and in line with the scope/mission of the program/degree, so the credits will transfer and count for an HAW upper-division elective; or
  - d. the outside course is not equivalent to an existing HAW course and does not align with the scope/mission of the program/degree so credits will not be counted towards any HAW course.
5. Final decisions of the Curriculum Committee will be communicated to the director and academic advisor, who will notify the student of the decision and guide them with finalizing the transfer credits process.

## **Honors and Awards**

### **Lokomaika’iokalani Snakenberg Hawaiian Language Graduate Scholarship**

Offered to encourage graduate-level research and study for students specializing in Hawaiian language and related fields, this scholarship provides an award of up to \$5,000 per semester to students registered in graduate programs at UH Mānoa.

### **Dorothy M. Kahananui Scholarship in Hawaiian Language**

This scholarship is offered to students who have successfully completed at least the intermediate level of Hawaiian language, with preference given to doctoral or master's degree candidates who plan to teach the language. The minimum amount of the award is resident tuition at UH Mānoa.

### **Red Mandarin and Lady Yi-suen Shen Scholarship in Hawaiian Studies**

Offered to undergraduate students in Hawaiian studies at UH Mānoa, this scholarship covers tuition for the academic year. It is awarded to a degree candidate who demonstrates exceptional promise and achievement. Applicants must be pursuing a program of study that shows a central commitment to Hawaiian studies, including Hawaiian language.

## **Kamakakūokalani Center for Hawaiian Studies**

2645 Dole Street  
Kamakakūokalani 209A  
Honolulu, HI 96822  
Tel: (808) 956-0555  
Fax: (808) 973-0988  
Email: chsuhm@hawaii.edu  
Web: manoa.hawaii.edu/hshk/index.php/site/acad\_studies/en/

### **Faculty**

- \*I. H. Andrade, MFA (Director)—Native Hawaiian visual culture, customary practices and contemporary arts, museum studies
- \*R. P. H. Ka'aloa, MEd (Graduate Chair)—educational technology, distance education, Indigenous education
- \*C. L. Andrade, PhD—traditional navigation, Mālama 'Āina: traditional resource management, indigenous geography, Hawaiian music
- \*J. Armitage, PhD—Hawaiian mythology, literature, nation building
- \*K. Beamer—Indigenous agency, Native Hawaiian land tenure, sustainability, land and resource law of the Hawaiian Kingdom
- \*A. A. H. Drexel, MFA—Native Hawaiian visual culture, customary practices and contemporary arts, politics of "imaging," history, mythology, land tenure, cultural studies

\*A. Freitas, MURP—Innovative educational initiatives and support in areas of student services, program development and strategic planning, grant writing, faculty/staff development, assessment and evaluation

\*L. Kame'eiehiwa, PhD—Hawaiian mythology, history, land tenure, literature, genealogies, traditional navigation

\*L. O. M. A. Keawe, PhD—comparative politics, indigenous studies; political "myths," rhetorical tropes-and "imaging," body politics of Kanaka Maoli identity and culture; educational administration, leadership, and mentoring

\*S. K. Kikiloi—Hawaiian resource management, traditional society genealogies, cultural revitalization and empowerment

\*J. Osorio, PhD—politics of identity in the Hawaiian kingdom, colonization in the Pacific, Hawaiian music

\*W. K. Perry, JD—comparative politics, Hawaiian law

\*E. K. Wright, PhD—Indigenous higher education, identity politics, and student affairs

### **Emeritus Faculty**

H. Trask, PhD—native political movements in Hawai'i and the Pacific, literature and politics of Pacific island women, Hawaiian history and politics, third world and indigenous history and politics

**Degree Offered:** BA in Hawaiian studies, MA in Hawaiian studies

### **The Academic Program**

Kamakakūokalani Center for Hawaiian Studies (HWST) recognizes its kuleana to nurture and educate the next generation of community leaders, teachers, and scholars who will lead Hawai'i into the future. Kamakakūokalani offers bachelor's and master's degrees that reflect the breadth and interdisciplinary nature of Hawaiian knowledge. Our BA graduates have moved forward to earn advanced degrees in anthropology, art, botany, business, communications, counseling, education, engineering, English, geography, law, linguistics, medicine, ocean science, Pacific Island studies, political science, psychology, social work, theater, and urban and regional planning.

In Fall 2005, we inaugurated our MA program to offer students an opportunity to pursue their interests while deepening their scholarly abilities. The master's of art degree builds on the BA program's areas of concentration. It addresses crucial issues such as the sustainability and resource management of the environment that is consistent with the geography and history of Hawai'i, indigenous pedagogy and epistemology, and a political and governmental infrastructure for a Hawaiian nation. The MA also provides professionals in government, law, criminal justice, education, social work, and various health fields, the specialized knowledge in Hawaiian history and culture needed to adequately serve an array of communities.

Our BA and MA programs consist of five areas of concentration:

1. Hālau o Laka: Native Hawaiian Creative Expression
2. Kūkulu Aupuni: Envisioning the Nation
3. Kumu Kahiki: Comparative Hawai'inuiākea and Indigenous Studies
4. Mālama 'Āina: Hawaiian Perspectives on Resource Management
5. Mo'olelo 'Ōiwi: Native History and Literature

## Undergraduate Study

### Bachelor's Degree

Students design their program around a selected area of concentration. Third-year fluency in Hawaiian language and a Senior capstone project are required, as well as familiarity with Hawaiian history and literature, culture and creative expression, politics and integral components of governance, resource management and sustainability, and comparative indigenous studies. A Native Hawaiian perspective is emphasized in the major.

### Major Requirements

Completion of 120 credit hours, including the General Education Requirements (see the "Undergraduate General Education Requirements" section for more information) and the following program requirements:

- GPA of 2.0 in all UH Mānoa registered credit hours
- A GPA of 3.0 in all courses for the major
- Total of 35 credit hours
- 23 credit hours in the following required courses:
  - HAW 301 and 302
  - HWST 207 or 281 or 285 or 351
  - HWST 222 or 224 or 225 or 372 or 478
  - HWST 341
  - HWST 342
  - HWST 343 or 390 or 490
  - Senior Capstone Project
- 12 credit hours of approved courses in ONE of these areas of concentrations:
  - Hālaū o Laka: Native Hawaiian Creative Expression
  - Kūkulu Aupuni: Envisioning the Nation
  - Kumu Kahiki: Comparative Hawaiʻinuiākea and Indigenous Studies
  - Mālama ʻĀina: Hawaiian Perspectives on Resource Management
  - Moʻolelo ʻŌiwi: Native History and Literature

Before beginning work on the major, students should have completed HAW 101, 102, 201, and 202; HWST 107 or 107A; HWST 270. Specific programs should be determined through consultation with the academic advisor. Majors should be interviewed by the academic advisor by the end of the sophomore year.

Students admitted to the BA program prior to Fall 2010 should consult the academic advisor to review changes that may affect their programs.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Graduate Study

### Master's Degree

The MA in Hawaiian Studies features an interdisciplinary curriculum that draws from faculty strengths in indigenous knowledge as well as other academic fields. Some examples of faculty expertise in Native practices include oli, music, fiber arts, voyaging, and navigation. Our faculty members' expertise also covers a wide spectrum of other academic fields that include poetry, political science, history, geography, education, and natural sciences.

The graduate chair offers continuous administrative assistance and academic advising as needed. Academic benchmarks

include but are not limited to: development of critical thinking and analytical skills; theoretical foundations for interdisciplinary studies; grounding in and application of Native practices particular to individual interests.

### Prerequisites

The following are prerequisite courses for applicants who are not BA degree recipients of Kamakākūokalani Center for Hawaiian Studies. Students taking these prerequisites may enroll concurrently in graduate level Hawaiian studies courses with consent of instructor. Significant contexts for analysis and critical thinking are based in the measurable teaching objectives and learning outcomes of these courses. They represent the educational foundations of our field:

- HWST 107/107A Hawaiʻi: Center of the Pacific
- HWST 270 Hawaiian Mythology
- HWST 341 Hawaiian Genealogies
- HWST 342 Chiefs of Post-Contact Hawaiʻi

And one of the following to complete the 15 credits of course prerequisites:

- HWST 343 Myths of Hawaiian History
- HWST 390 Issues in Modern Hawaiʻi
- HWST 490 Senior Seminar in Hawaiian Studies

Applicants to the MA program must have satisfactorily completed HAW 302 or the equivalent at the time of entry. All MA students will complete the fourth level (HAW 402) of Hawaiian language by graduation.

### Degree Requirements

There are four core classes that all MA students are required to complete. They form the foundation of the MA program:

- HWST 601 Indigenous Research Methodologies
- HWST 602 Hawaiian Archival Research
- HWST 603 Review of Hawaiian Literature
- HWST 604 Writing a Hawaiian Thesis

### Areas of Concentration

Hawaiian Studies MA candidates will choose two of the five areas of concentration to focus their research. Candidates will be required to integrate the two areas of concentration in a single thesis (Plan A) or non-thesis project (Plan B). The areas of concentration are:

- Hālaū o Laka: Native Hawaiian Creative Expression
- Kūkulu Aupuni: Envisioning the Nation
- Kumu Kahiki: Comparative Hawaiʻinuiākea and Indigenous Studies
- Mālama ʻĀina: Hawaiian Perspectives on Resource Management
- Moʻolelo ʻŌiwi: Native History and Literature

### Admission Requirements

1. Students seeking admission must have completed a BA degree.
2. Satisfactory completion of HAW 302 or the equivalent.
3. Complete and send an online ([manoa.hawaii.edu/graduate](http://manoa.hawaii.edu/graduate)) application to UH Mānoa Graduate Division.
4. Complete a Hawaiian Studies Graduate Education Application Information Form available at the Kamakākūokalani Center for Hawaiian Studies office in Room 209A.
5. Three current letters of recommendation. Two from the applicant's former professors and one from a Hawaiian Stud-

- ies (KCHS) faculty member with whom the applicant has consulted during preadmission advising.
6. Writing sample: a five to ten page (clean and type-written) research paper for an undergraduate level course (any class, any topic) which you have received a grade and credit. In lieu of such a document, applicants may submit an original essay (five to ten pages in length and type-written) as an overview that conveys the nature of the applicant's major field of study.
  7. Personal statement: a two page (typed) statement of intent describing the applicant's proposed thesis topic and its basic relationship to the interdisciplinary field of Hawaiian Studies.
  8. Submit a cover letter with the above mentioned documents (items #4-7) as enclosures to the graduate chair at Kamakakūokalani Center for Hawaiian Studies, 2645 Dole Street, Honolulu, HI 96822.

## Ka Papa Lo'i o Kānewai

2645 Dole Street  
 Kamakakūokalani 211B  
 Honolulu, HI 96822  
 Tel: (808) 956-0546  
 Fax: (808) 973-0988  
 Email: [kanewai@hawaii.edu](mailto:kanewai@hawaii.edu)  
 Web: [manoa.hawaii.edu/hshk/ka-papa-loi-o-kanewai/](http://manoa.hawaii.edu/hshk/ka-papa-loi-o-kanewai/)  
 Director: Makahiapo Cashman

Ka Papa Lo'i o Kānewai (Kānewai) is a Hawaiian cultural research and outreach program organizationally housed in Hawai'inuiākea School of Hawaiian Knowledge at UH Mānoa. In the *ahupua'a* (traditional land division) of Waikiki, Kānewai is the only centrally located venue in Honolulu that provides a culturally place-based experiential learning center and a *pu'uhonua* (sanctuary). Kānewai provides a venue for Hawaiian and Pacific cultural activities with hands-on experiences via experiential learning curricula and lessons.

In 1980, several students from UH Mānoa re-discovered the abandoned *'auwai* (irrigation ditch) at Kānewai and restored its flow of water, after which they planted the *kalo* (taro) and

other native plants in the areas surrounding the *lo'i* (taro patch). With the "Hawaiian Renaissance" movement taking shape, they started the "Ho'okahawai Ho'oulu 'Āina" project based on the philosophy "make the water flow, and the land will be productive," which was initiated by the Hui Aloha 'Āina Tuahine Hawaiian language club. Along with the guidance of *kūpuna* (elders) such as Uncle Harry Kūnihi Mitchell and 'Anakala Eddie Kaanana, the traditional practices have been perpetuated for future generations to experience.

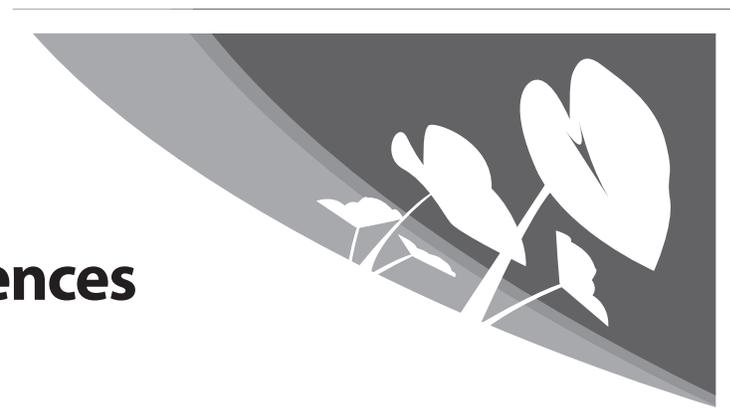

By serving as a cultural resource center, Kānewai focuses its work on perpetuating and preserving Native Hawaiian customary and traditional practices of natural resource management. As such, Kānewai engages a number of different constituencies with varying interests ranging from research and inquiry to experiential learning opportunities for students. Among these diverse partners are: Native Hawaiian communities and organizations; Hawai'i's diverse local communities; Asian and Pacific Island organizations; classes, faculty, staff, and students from the various UH campuses; Hawai'i-wide taro growers; ethnobotanical experts; and private and public educational institutions.

Every "First Saturday" of the month (except for January), Kānewai hosts participants from the UH System, other educational institutions, community groups, and the general public to engage in *mālama 'āina* at the *lo'i* and the surrounding *māla* (gardens). These "hands-on" activities help to grow an individual's understanding of the *ha'awina* (lessons) that is offered at Kānewai, along with conversing with Hawaiian language speakers, while contributing to the health and well-being of Kānewai.

As part of its research and dedication to perpetuating Hawaiian *'ike*, Kānewai maintains a number of traditional Hawaiian varieties of *kalo*, teaches *kalo* farming and traditional resource management courses in conjunction with Kamakakūokalani Center for Hawaiian Studies, and also hosts Mālama Hāloa, an annual symposium on *kalo* every Spring semester.

Because Kānewai receives approximately 15,000 visitors a year, it has formed a partnership with the Kamehameha Schools' 'Āina 'Ulu program. Through this partnership, Kānewai opened a sister site in Punalu'u, within the Ko'olauloa district of O'ahu, which provides an alternative site for participants to experience *lo'i* and thereby maintaining a sustainable level of use at Ka Papa Lo'i o Kānewai.

# Colleges of Health Sciences and Social Welfare

## General Information

The College of Health Sciences and Social Welfare is made up of three professional schools—medicine, nursing and dental hygiene, and social work. It was established to provide a coordinated interdisciplinary approach to the solution of problems common to the three fields. Interdisciplinary courses, colloquia, institutes, and practicum experiences permit students to become acquainted with one another and with trends and developments in the professions represented. The college is governed by an executive committee composed of the deans.

The degree programs of each school are summarized in this *Catalog* and in separate bulletins published by the schools. These bulletins are available through the student services office of each school.

## Mission

The mission of the college is to serve society by increasing, refining, disseminating, applying, and sharing knowledge, wisdom, and values relating to the health and social welfare concerns of the public. It carries out this mission through research, instruction, and service in medicine, nursing, public health, social work, and related health and biomedical sciences.

## Degrees and Certificates

For information on degree and certificate offerings, refer to the *Catalog* sections on the John A. Burns School of Medicine, School of Nursing and Dental Hygiene, and Myron B. Thompson School of Social Work.

# Interdisciplinary Programs

## Aging and Gerontology

**Degrees and Certificates Offered:** Undergraduate Certificate in Aging, BA in interdisciplinary studies (emphasis on aging), Advanced Certificate in Gerontology. See the “John A. Burns School of Medicine” section of the *Catalog* for more information.

## Cell and Molecular Biology Graduate Program

John A Burns School of Medicine

### Graduate Faculty

M. J. Berry, PhD (Co-chair)—selenoprotein synthesis  
M. Gerschenson, PhD (Co-chair)—infectious diseases, HIV mitochondrial medicine

### Biochemistry

A. Bachmann, PhD—pharmacology  
A. Collier, PhD—pharmacology  
D. M. Jameson, PhD—energetics and dynamics of protein interactions; fluorescence spectroscopy  
H. L. Ng, PhD—structure based drug design and membrane protein crystallography

S. E. Seifried, PhD—molecular recognition and transcriptional control  
A. Yanagihara, PhD—biochemistry of neurotoxins, neuroactive compounds in cnidarians

### Cancer Biology

T. Donlon, PhD—molecular diagnostics of cancer  
P. Fei, PhD—tumor suppressors function and cancer susceptibility syndromes  
A. F. Lau, PhD—oncogenes, cellular transformation and signal transduction  
L. Le Marchand, MD, PhD—cancer epidemiology, breast cancer risk  
P. S. Lorenzo, PhD—diacylglycerols and their participation in carcinogenesis and malignant transformation  
J. Ramos, PhD—MAP kinase pathway  
J. Turkson, PhD—developing anticancer drugs  
C-W. Vogel, MD, PhD—biochemistry of cellular toxins, neuroblastoma  
R. K. Wada, MD—molecular oncology, oncogene regulation, tumor differentiation  
D. C. Ward, PhD—cancer, cancer research administration

### Cardiovascular

W. Boisvert, PhD—immunologic and inflammatory aspects of cardiovascular medicine  
R. Matsui, PhD—cardiovascular disease  
M. Matter, PhD—cardiovascular research  
R. Shohet, MD—cardiovascular research  
M. Tallquist, PhD—formation and function of vasculature

### Cell Signaling

A. Fleig, PhD—excitation-contraction coupling in muscle  
R. Penner, MD, PhD—calcium signaling in neurons and immune cells  
H. Turner, PhD—molecular biology of ion channels in the immune and nervous system

### Developmental Biology

R. Allsopp, PhD—cell biology  
H. G. de Couet, PhD—neurogenetics, cytoskeleton, cell motility  
V. Fogelgren, PhD—renal physiology, development and disease  
T. D. Humphreys, PhD—immune system of sponges, evolutionary foundations of animal immunity, molecular biology of hemichordates  
S. Lozanoff, PhD—developmental biology and craniofacial development

### Genetics and Molecular Biology

F. Bellingier, PhD—neurobiology of selenoproteins  
M. J. Berry, PhD—selenoprotein synthesis  
B. Bowen, PhD—conservation genetics  
R. L. Cann, PhD—molecular and evolutionary genetics of animal populations  
M. Gerschenson, PhD—infectious diseases, HIV mitochondrial medicine

- S. M. Callahan, PhD—bacterial genetics  
 S. P. Chang, PhD—immunology, molecular approaches to vaccine development  
 Y. Lu, PhD—retrovirology, herpes virus, infections in marine organisms  
 V. R. Nerukar, PhD—viral pathogens, marine virology, molecular epidemiology  
 P. Patek, PhD—cellular immunity  
 E. Tam, MD—mast cell proteases, asthma, and immunology  
 M. Tuthill, PhD—monoclonal antibodies and immunology  
 R. Yanagihara, MD—viral pathogens, molecular phylogeny, emerging infections

### Matrix Pathobiology

- K. Csiszar, PhD—lysyl oxidase tumor suppressor family

### Neurobiology/Neurophysiology

- D. C. Blanchard, PhD—psychopharmacology and neurobiology of behavior  
 R. J. Blanchard, PhD—experimental ethology and ethnopharmacology  
 D. K. Hartline, PhD—small network neurophysiology  
 R. Nichols, PhD—neurobiology  
 M. D. Rayner, PhD—sodium channel control mechanisms  
 L. K. Takahashi, PhD—behavioral neuroscience  
 C. Todorovic, PhD—neurobiology of learning and memory

### Plant Molecular Physiology

- D. Borthakur, PhD—regulation of genes in the rhizosphere bacteria by root exudates  
 J. Hu, PhD—molecular biology of plant viruses

### Reproduction Function

- Y. Marikawa, PhD—molecular control of the body plan of vertebrate embryos  
 S. Moisyadi, PhD—mammalian transgenesis  
 M. Ward, PhD—biology of reproduction  
 W. S. Ward, PhD—tertiary structure of DNA, nuclear structure, and genetic instability

**Degrees Offered:** MS in cell and molecular biology, MS in cell and molecular biology (neuroscience), PhD in cell and molecular biology, PhD in cell and molecular biology (neuroscience)

## The Academic Program

The Cell and Molecular Biology Graduate Program (CMB) in biomedical sciences represents an interdisciplinary approach to graduate education with faculty in many sub-disciplines of biology dedicated to helping qualified students pursue original research using modern approaches to cell and molecular biology. The CMB graduate program brings together faculty from three colleges and various research institutes. Planning for collaborative research is emphasized in this program, as well as solid training in a variety of laboratory techniques.

The CMB graduate program provides fellowships for PhD students in their first year, and additional support in the way of research or teaching assistantships are available for qualified applicants in subsequent years. The program is intended to prepare students for careers in academia, research institutes, and in expanding areas of biotechnology in the private sector.

Master's students fall into two categories, depending on whether they opt for a Plan A (thesis) or Plan B (non-thesis). The MS Plan B is usually a terminal degree, appropriate for professionals in medical technology, government, and related fields who wish to obtain broad training in modern cell biology to advance their credentials in their chosen fields. The completion of the MS Plan A serves as a qualifying examination for students who intend to continue toward the PhD in cell and molecular biology. It may also serve as a terminal degree for those who wish to pursue careers as research technicians, either in the public or private sector.

### Advising

For complete details regarding the program, contact Lyn Hamamura at [msbiosci@hawaii.edu](mailto:msbiosci@hawaii.edu) or visit the website at [www.hawaii.edu/cmb/CMB/Home.html](http://www.hawaii.edu/cmb/CMB/Home.html).

## Graduate Study

Applicants are expected to have at least a bachelor's degree emphasizing biological or physical sciences with courses in calculus, organic chemistry, biochemistry, and cellular and molecular biology. Applicants with MD degrees are welcome. Results of the Graduate Record Examination (GRE) general test should be submitted with the application, and students whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL). Three letters of recommendation from former instructors or research supervisors, a CMB program graduate express form, and transcripts from previous universities or colleges attended must also be submitted.

### Master's Degree

The curriculum core of the CMB program is a specialized lecture class, spanning two semesters (CMB 621-622). Additional required courses are CMB 611 Seminar in Biomedical Science and CMB 626 Ethics in Biomedical Research. The remaining credit requirements can be fulfilled by specialized courses, seminars, and research units as recommended by the particular committee and research advisor each student picks to guide their academic program. Following the completion of the two semester core course, the student is expected to pass a qualifying exam, form a committee, and then propose, complete, and defend an original research project (MS Plan A) or study plan and research paper (MS Plan B).

### Doctoral Degree

PhD candidates do not need to have completed a master's degree. If an MS was not earned through the CMB program, the core lecture class is required (CMB 621-622). Formal course requirements beyond the core include additional courses specified by the dissertation committee, including CMB 611 Seminar in Biomedical Science, CMB 626 Ethics in Biomedical Research, and three laboratory rotations. The student is expected to form a committee, propose, complete, and defend an original research project and publish at least one paper in a peer-reviewed journal during their graduate career.

### Neuroscience Specialization

The Cell and Molecular Biology Graduate Program participates in the interdisciplinary “Area of Concentration in Neuroscience.” This is a graduate “specialization” rather than a free-standing graduate program. CMB students interested in this specialization will take normal requirements for CMB plus additional coursework as determined by the Neuroscience Specialization. They will be eligible for graduate degrees in Cell and Molecular Biology (Neuroscience), presuming that their dissertation research includes an emphasis on application of Cell and Molecular Biological techniques to a Neuroscience research issue (or vice versa).

### Selected Specialized Courses

#### Cell Biology

- MBBE 620 Plant Biochemistry
- TPSS 614 Molecular Genetics of Crops
- TRMD 604 Concepts in Immunology and Immunopathogenesis
- TRMD 671 Advanced Medical Parasitology
- TRMD 690 Seminar in Tropical Medicine and Public Health
- ZOOL 610 Topics in Development and Reproductive Biology

#### Molecular Biology

- CMB 625 Advanced Topics in Genetics
- CMB 654 Genetics Seminars
- MICR 625 Advanced Immunology
- MICR 671 Bacterial Genetics
- MBBE 680 Methods in Plant Molecular Biology
- MBBE 691 Advanced Special Topics in MBBE

#### Neurobiology

- CMB 606 Introduction to Neurosciences
- CMB 705 Special Topics in Neuroscience
- PHYL 606 Human Neurophysiology
- ZOOL 712 Topics in Nerve/Muscle Physiology

## Communication and Information Sciences

2550 McCarthy Mall  
 Honolulu, HI 96822  
 Tel: (808) 956-5813  
 Fax: (808) 956-5835  
 Email: cis-chair@lists.hawaii.edu  
 Web: www.hawaii.edu/cis

### Graduate Faculty

- R. S. Gazan, PhD (Chair)—social aspects of information technology  
 N. Asato, PhD—Japanese/Japanese American print cultures; Asian librarianship; censorship  
 K. Baek, PhD—computer vision, neural computation, machine learning  
 E. S. Biagioni, PhD—networking protocol design  
 K. A. Binsted, PhD—artificial intelligence, software design for mobile devices, human-computer interaction  
 W. Buentel, PhD—information and communication technologies  
 T. X. Bui, PhD—electronic commerce, information policy  
 H. Casanova, PhD—high performance computing, distributed systems  
 H. M. Chen, PhD—e-business, service engineering, business-IT alignment, electronic customer relationship management, multimedia database systems, software engineering, enterprise architecture, MIS  
 D. Chin, PhD—artificial intelligence, natural language processing, user modeling, intelligent agents, intelligent user interfaces, intelligent software maintenance, empirical evaluation, geographic information systems  
 F. Dalisay—communication effects, social capital, civic engagement  
 W. G. Chismar, PhD—information technology, telecommunications, medical informatics  
 M. E. Crosby, PhD—human-computer interaction, cognitive science, interface design for searching  
 E. J. Davidson, PhD—social cognitive aspects of information systems development methods  
 V. H. Harada, PhD—library management, information literacy  
 P. Jacso, PhD—digital libraries, webometrics, database content evaluation  
 P. M. Johnson, PhD—software engineering, high-tech entrepreneurship  
 R. Kazman, PhD—software engineering, human-computer interaction  
 T. Kelleher, PhD—public relations, online media, communication campaigns, mass communication, organizational communication  
 R. Knuth, PhD—information policy, children’s materials, international librarianship, history of the book and libraries  
 H. K. Kramer, PhD—intercultural communications  
 L. Lim, PhD—database systems  
 D. M. Nahl, PhD—human-computer interaction, affective computing, information literacy, driving informatics  
 R. R. Panko, PhD—risks in information systems, organizational communication and technology  
 J. Patriarche, PhD—image and signal processing algorithms applied to clinical medical image analysis  
 G. Poisson, PhD—cognitive informatics, bioinformatics, machine learning  
 D. Port, PhD—software economics, management information systems, software engineering  
 L. Quiroga, PhD—information filtering systems, virtual collaboration, information retrieval, databases, library systems  
 N. Reed, PhD—artificial intelligence, autonomous agents  
 S. Robertson, PhD—human-computer interaction, digital government and digital democracy  
 J. Stelovsky, DrTechSc—computer hypermedia, human-computer interaction, cognitive science

- S. Still, PhD—bioinformatics/theoretical biology, information theory, machine learning
- D. Streveler, PhD—medical informatics, international public health, issues in the electronic medical record and in telemedicine
- K. Sugihara, DrEng—algorithms, distributed computing and database systems, visual languages
- D. Suthers, PhD—human-computer interaction; social informatics; technology-enhanced learning
- A. Wertheimer, PhD—information science, library history, Japanese-American print culture
- J. S. Winter, PhD—communication policy and planning (Asia-Pacific)
- R. G. Worthley, PhD—statistics, information technology management

### Cooperating Graduate Faculty

- J. C. Ady, PhD—organizational communication, sojourner adjustment, international negotiation, conflict management
- D. L. Alden, PhD—marketing communications
- A. R. Arno, PhD—ethnography of communication, communication and law, social theory, news media
- D. Ashworth, PhD—learning technology
- T. J. Brislin, PhD—mass communications, ethics
- R. Doktor, PhD—international business, organizational behavior, strategy
- C. P. Ho, PhD—instructional technology
- M. K. Lai, PhD—research methods
- M. P. McGranaghan, PhD—computer cartography, geographical information systems
- N. Ordway, PhD—real estate
- J. R. Wills, DBA—technology marketing
- S. Zhang, PhD—quantitative research methodology, statistics

**Degree Offered:** PhD in communication and information sciences

### The Academic Program

The Interdisciplinary Doctoral Program in Communication and Information Sciences (CIS) offers a PhD degree integrating and drawing faculty from the fields of communication, computer science, library and information science, and management information systems. Because of the broad knowledge base required to support this interdisciplinary approach, the program also draws on such fields as political science, economics, engineering, operations research, and behavioral sciences.

Recipients of the PhD will undertake careers in colleges and universities, industry, government, and private organizations.

Complete details on this program are outlined on the website, [www.hawaii.edu/cis/](http://www.hawaii.edu/cis/).

### Admission Requirements

Requirements in addition to those set by the Graduate Division are:

- Master's degree in business administration, communication, library and information science, information and computer sciences, or a closely related field
- GRE or GMAT scores
- Knowledge of computing
- Demonstrated potential for conducting independent research
- Proficiency in English. Minimum TOEFL scores of at least 6600/250/100 (paper/computer/Internet based TOEFL) are required for admission.

### Application Requirements

In addition to the information required by the Graduate Division, the following must be sent directly to the CIS program, see [www.hawaii.edu/cis/?page=application](http://www.hawaii.edu/cis/?page=application):

- CIS Preliminary Express Application
- CIS Supplementary Application, including a statement of purpose, samples of relevant published or unpublished work, and skills applicable to teaching or research assistantships
- Three letters of recommendation

### Program Requirements

The student will select one primary and two secondary areas of emphasis from those currently supported: see [www.hawaii.edu/cis/?page=focus](http://www.hawaii.edu/cis/?page=focus). At this printing, the areas are: biomedical informatics, communication and information theories, communication policy and planning, human-computer interaction, information systems and services, management information systems, and social informatics.

Students must pass comprehensive exams in the chosen three areas of emphasis, publish a research paper, and complete and defend an original dissertation.

### Course Requirements

All students are required to complete the following three core courses with a grade of at least a B:

- CIS 701 Communication/Information Theories (3)
- CIS 702 Communication/Information Technologies (3)
- CIS 703 Communication/Information Research Methods (3)

In addition, all students must:

- pass at least one approved research methods or data analysis course (in addition to CIS 703) with a grade of B or better
- enroll in CIS 699 while working with a faculty research mentor to publish a research paper
- enroll in CIS 720 Interdisciplinary Seminar in CIS (1) every semester until graduation
- enroll in CIS 800 the final semester before graduation.

Courses to be taken in preparation for the comprehensive exams are to be selected from graduate offerings in related disciplines as directed by the focus area examination committees. Recommended courses as of this printing are listed below. See the program website for other directed readings required by some committees.

### Biomedical Informatics

- ICS 614 Medical Informatics I (3)
- ICS 675 Bioinformatics: Sequences Analysis (3)

### Communication/Information Theories

- CIS 701 Communication/Information Theories (3)

### Communication Policy and Planning

- COM 633 Information and Communication Technologies (3)

### Human Computer Interaction

- ICS 464 Human Computer Interaction I (3)
- ICS 664 Human-Computer Interaction II (3)
- ICS 667 HCI Design Methods (3)
- ICS 668 Social Informatics (3)
- LIS 677 Human Dimension in Information Systems (3)

### Information Systems and Services

- LIS 663 Database Searching (3)
- LIS 671 Digital Librarianship (3)

LIS 678 Personalized Information Delivery (3)  
ICS 624 Advanced Data Management (3)

### Management Information Systems

BUS 603 Managing Information Technology for Strategic Advantage (3)  
ITM 660 Current Topics in Information Systems (3)  
ITM 685 Electronic Commerce (3)  
ITM 704 Doctoral Seminar in Information Systems (3)

### Social Informatics

ICS 668 Social Informatics (3)  
ICS 669 Social Computing (3)  
COM 634 Social Media (3)

## Environmental Studies

**Degrees and Certificates Offered:** Undergraduate Certificate in Environmental Studies, BA in interdisciplinary studies (emphasis on environmental studies). See the “Colleges of Arts and Sciences” section of the *Catalog* for more information.

## Global Health Protection and Security

Office of Public Health Studies  
Biomedical Sciences T103  
1960 East West Road  
Honolulu, HI 96822  
Tel: (808) 956-6263  
Email: globhlth@hawaii.edu  
Web: manoa.hawaii.edu/publichealth/certificates

### Graduate Faculty

D. V. Canyon, PhD, DBA, MPH, FACTM (Chair)—global health protection  
E. Hurwitz, PhD—epidemiology  
A. Katz, MD—infectious disease  
Y. Lu, PhD—environmental health  
J. Maddock, PhD—social and behavioral sciences  
W. Zhang, PhD—sociology

### Affiliate Graduate Faculty

J. Campbell, PhD, MPH—global health security

### Adjunct Faculty

S. Canyon, PhD, MBBS—infectious disease  
J. Hii, PhD—global health and vector-borne disease

**Certificate Offered:** Graduate Certificate in Global Health Protection and Securities

### Program Purpose and Goals

**Purpose:** To promote awareness, knowledge, skills and attitudes conducive to population health, safety, and well-being at local and global levels by enhancing the global health competence of students in the program.

**Goals:** Within a global context, health protection is broadly linked to global security since emerging, re-emerging and pandemic infectious diseases, major chronic diseases, natural disasters and various forms of resource scarcity including food, water and energy pose innumerable threats to human health.

These public health challenges slow developmental progress, disrupt or even reverse national economic development, abrogate cooperation on treaties and agreements, exacerbate civil unrest, de-stabilize regional security and lead to the collapse of governments. The GHPS coursework critically assesses the effects of major global health protection challenges on demographic trends, bilateral cooperation including movement across international borders, flow of trade and foreign capital and fomenting terrorism. Course discussions and case studies on transnational public health are a critical learning strategy and are essential in analyzing how health threats can disrupt regional stability and impact strategic global security policy.

### Background

UH Mānoa offers this interdisciplinary program leading to the graduate certificate in global health protection and securities (GHPS). First established in 1969 as a graduate certificate program in population studies, the program has subsequently undergone modifications in 2009 to incorporate the component of global health in its name and curriculum. In 2012, the program adopted a more public health orientation and in 2014, the focus was shifted towards health protection and security.

The GHPS will appeal to students interested in how major public health challenges can impact national, regional, and global security. They will find the unique perspective and flexible educational approach of the GHPS a fascinating departure from more traditional disciplines of public health. Graduates will find exciting and meaningful career opportunities in state or domestic federal service, U.S. Foreign Service, national or international non-governmental organizations and private philanthropic institutions.

Health protection consultants commonly complete generic training in public health, with some pursuing epidemiological, medical microbiology and/or clinical infectious diseases training. This has enabled them to apply for communicable disease control positions and other specialized positions that require the generic skills and knowledge of their base specialty, but not the specific knowledge for expert practice in health protection. The specialist health protection knowledge provided in this program is not often included in general public health training and will fill some specialty knowledge gaps.

The GHPS graduate certificate qualification will be used by public health and health protection professionals who seek to pursue a career in health protection or who choose to remain in their field, to further develop knowledge and skills in health protection and security. Practitioners in health protection commonly come from varied backgrounds including doctors who practice international medicine, nurses in local health protection units, epidemiologists at regional and national units and environmental health officers at local, regional and national levels. Furthermore, the health protection workforce is aligned with other professional groups whose roles include an element of health protection, but who are not health protection specialists. For instance, nurses who specialize in hospital infection control, occupational health and health visiting, health emergency planers, environmental health scientists, microbiologists, etc. The GHPS graduate certificate will be popular and useful for professionals working in hospital or community infection control. Alternatively, individuals already working within a health protection setting or intending to move into the field may seek to develop their knowledge and skills in health protection.

## Requirements

A total of 15 credits

- Required Courses (6-9 credits):
  - GHPS/PH 690 Global Health Challenges (3 credits)
  - GHPS/PH 6xx Global Health and Human Security (3 credits)
  - Capstone project may be completed as a standalone entity with no credit or students may enroll in GHPS 699 Directed Reading/Research for up to 3 credits
- Elective Courses (6-9 credits)
- Electives (3-6 credits)
  - PH 663 Principles of Epidemiology I (3 credits)\*
  - PH 666 Seminar in Infectious Disease Control (3 credits)
  - PH 680 Health Emergencies in Large Populations (3 credits)
  - PH 681 Environmental Determinants of Health (3 credits)
  - PH 765 Program Evaluation (3 credits)
  - PLAN courses from the Disaster Management & Humanitarian Assistance Certificate

\*Students with no epidemiology are required to take PH 663.

Provided that they closely relate to the theme of the program, the GHPS Chair will accept courses from public health or other departments numbered 600 or above and up to 3 credits of 400-level courses.

Double counting of credits is permissible even for core courses in the MPH and MPH specializations.

## Graduate Interdisciplinary Specializations

Graduate specializations offer graduate students the opportunity to complete a course of study utilizing courses and faculty from several different fields. Participants must apply for admission and be admitted to a 'regular' graduate program.

## Ecology, Evolution, and Conservation Biology

St. John 101  
3190 Maile Way  
Honolulu, HI 96822  
Tel: (808) 956-9636  
Fax: (808) 956-3923  
Email: eecb@hawaii.edu  
Web: www.hawaii.edu/eecb/

### Graduate Faculty

- C. W. Morden, PhD (Chair)—molecular systematics and evolution of Hawaiian plants
- L. Arita-Tsutsumi, PhD—behavioral ecology of insects
- K. E. Barton, PhD—evolutionary ecology
- B. Bowen, PhD—phylogeography, evolution and conservation, genetics of marine vertebrates
- R. L. Cann, PhD—conservation genetics and molecular evolution
- K. S. Cole, PhD—evolution of sexual patterns, behavioral ecology
- R. H. Cowie, PhD—evolutionary biology and conservation of land and freshwater snails
- C. C. Daehler, PhD—invasive plants, plant-insect interactions
- M. J. deMaintenon, PhD—evolution of gastropod organogenetic patterns
- D. Drake, PhD—plant ecology, conservation biology, plant-animal interactions
- D. C. Duffy, PhD—conservation biology (basic and applied)
- L. A. Freed, PhD—evolutionary ecology, behavioral ecology and conservation biology
- M. Hixon, PhD—marine ecology and conservation biology
- B. S. Holland, PhD—molecular ecology, systematics and conservation genetics
- T. Idol, PhD—forest soils and nutrient cycling
- K. Y. Kaneshiro, PhD—sexual selection and biology of small populations
- S. C. Keeley, PhD—plant molecular systematics and evolution
- C. A. Lepczyk, PhD—wildlife ecology, landscape ecology, human dimensions of natural resources
- C. M. Litton, PhD—ecosystem ecology and biogeochemistry of forested systems
- W. J. Mautz, PhD—environmental physiology, environmental toxicology, ecological energetics, respiration physiology, and herpetology
- M. D. Merlin, PhD—biogeography, ethnobotany, Pacific natural history
- R. Ostertag, PhD—community structure and nutrient dynamics of tropical forests
- D. K. Price, PhD—evolutionary genetics of behaviors
- D. Rubinoff, PhD—insect systematics, conservation biology, and the evolution of ecological traits
- A. R. Sherwood, PhD—evolution, systematics and population genetics of Hawaiian algae
- C. M. Smith, PhD—physiological ecology of marine macrophytes, marine ecology
- A. D. Taylor, PhD—population and community ecology and environmental statistics
- A. Teramura, PhD—environmental stress physiology, global climate change, ecosystem analysis and biodiversity
- R. Thomson, PhD—evolutionary biology, phylogenetics, and conservation
- T. Ticktin, PhD—ethnoecology and conservation biology
- R. Toonen, PhD—population biology and larval ecology of marine invertebrates
- T. Tricas, PhD—behavior and sensory biology of sharks, rays and reef fishes

### Affiliate Graduate Faculty

- A. Allison, PhD—systematics and population biology  
 L. V. Basch, PhD—ecology, evolution and conservation of marine life histories and benthic communities  
 C. Birkeland, PhD—coral reef ecology and management, marine community ecology  
 E. Campbell, PhD—invasive species  
 J. E. Canfield, PhD—conservation biology, plant ecology  
 D. Carlon, PhD—population regulation, life-history evolution and speciation  
 S. Conant, PhD—conservation biology, life history and ecology of Hawaiian birds  
 N. L. Evenhuis, PhD—systematics and evolution of Diptera  
 D. Foote, PhD—ecosystem ecology  
 A. M. Friedlander, PhD—nearshore fisheries  
 F. G. Howarth, PhD—evolutionary biology of cave ecosystems and insect conservation  
 R. A. Kinzie, PhD—aquatic ecology, coral reefs and tropical streams  
 L. L. Loope, PhD—conservation biology, plant ecology  
 J. E. Maragos, PhD—human impact on marine ecosystems and coral reefs  
 D. Ragone, PhD—Pacific Island ethnobotany, especially conservation and use of traditional crops, focusing on breadfruit

### The Academic Program

The objectives of the interdisciplinary graduate specialization in ecology, evolution, and conservation biology (EECB) are to:

- Use the unique opportunities that Hawai'i offers to integrate tropical population biology and natural history studies with modern laboratory techniques;
- Provide the interdisciplinary, conceptual, and technical training that will allow our graduates to participate in academic and research programs in ecology, evolution, and conservation biology; and
- Foster scholarly training in research programs involving expertise in ecology, evolution, and conservation biology.

Modern theories of ecology, evolution, and conservation biology share a core of concepts and techniques that span classical academic disciplines. This common core, coupled with the emergence of powerful new technologies, invites cross-disciplinary approaches that generate many of today's most exciting scientific advances.

The EECB program provides opportunities for students at UH Mānoa to expand their knowledge and gain experience in this integrative discipline. Our interdisciplinary graduate program brings together faculty members from graduate programs in the departments of Anthropology, Botany, Cell and Molecular Biology, Geography, Microbiology, Natural Resources and Environmental Management, Oceanography, Plant and Environmental Protection Sciences, Tropical Plant and Soil Sciences, and Zoology—with all their skills and technologies—to provide the training students need to contribute effectively to this research area.

EECB is implemented as a “specialization” within existing graduate programs of the departments whose faculty participate in this program. This means that the primary duties and responsibilities of each EECB student are to satisfy the requirements of their own home academic department. The EECB specialization serves to allow students to expand beyond the traditional departmental boundaries in terms of formulating research questions, choosing thesis/dissertation committee members and taking academic courses. EECB graduate students

can be enrolled in either the doctor of philosophy or master of science degree in their home department.

Students accepted to the EECB graduate specialization must already have been accepted into the graduate program of the various departments participating in the EECB program. Course work in statistics, organic chemistry, biochemistry, genetics, evolution, and ecology are considered most important for preparing students for graduate studies.

Details on the EECB program and application forms can be found at the EECB website [www.hawaii.edu/eeceb/](http://www.hawaii.edu/eeceb/).

### Admission Procedures and Policy

Only students that have been accepted and are currently enrolled in a graduate program in one of the cooperating academic departments at UH Mānoa can be admitted. New students applying to UH Mānoa will be considered

All applicants must submit (by email directly to the EECB Chair):

- Letter expressing your interest in EECB (up to 3 pages), including, at a minimum
  - information on past academic experience
  - goals for graduate study in general and graduate study in EECB in particular
  - what you feel you can contribute to EECB
  - what you expect to gain by participation in EECB
- Letter of support from your EECB faculty sponsor

Students enrolled at UH Mānoa may be admitted to EECB in either the fall or spring semester. Application deadlines are **February 1** and **October 15**. Successful applicants are admitted the following semester.

Your original UH Mānoa application may be obtained directly by the EECB office from the Graduate Division and does not need to be submitted with your application to EECB.

### Admission Criteria

Details can be found on the EECB website: [www.hawaii.edu/eeceb/](http://www.hawaii.edu/eeceb/).

### Course Requirements for Specialization in Ecology, Evolution and Conservation Biology

Course requirements for ALL EECB graduate students:

- Complete all degree requirements of the home academic department
- Participate in EECB activities, particularly the Evoluncheon seminar series
- One course in ecology at the 600 or 700 level (at least 2 credits with an A or B grade)
- One course in evolution at the 600 or 700 level (at least 2 credits with an A or B grade)
- One course in conservation biology at the 600 or 700 level (at least 2 credits with an A or B grade)

Acceptable graduate (600-700 level) courses currently being offered are listed below. Because some offerings change from semester to semester, consult the EECB webpage for an updated list.

In addition to course requirements for the specialization in EECB, each academic department has its own course requirements. Courses from the EECB course list that are taken to fulfill departmental requirements can also be used to fulfill EECB requirements, however, a single course can only satisfy one of the three EECB requirements.

## Course Offerings

(Updated October 2013)

New courses or one-time offerings not listed here but approved by the EECB curriculum committee may also count towards the ecology, evolution, or conservation biology requirement. Please check the EECB website for updates and consult with the graduate education committee for acceptations.

### Ecology

- ANTH 606 Anthropology of Infectious Disease (3)
- BOT 644 Ethnoecological Methods (3)
- BOT 651 Invasion Biology (3)
- BOT/ZOOL 652 Population Biology (3)

 B. Shiramizu, MD—medicine/pediatrics  
 A. Stenger, PhD—medicine  
 L. Takahashi, PhD—psychology  
 L. White, MD., PhD—pediatrics

### Neuroscience

The purpose of this specialization is to allow graduate students pursuing masters and doctoral degrees in various disciplines (e.g., medicine, psychology, engineering, computer science, molecular bioscience, etc.) to formally specialize in neuroscience. This is accomplished by taking a minimum of 4 courses plus participate in a “journal club” focusing on neuroscience as approved by the Graduate Chair.

### Courses

- CMB 606 Introduction to Neurosciences (4)
- CMB 621 Cell Molecular Biology I (4)
- CMB 622 Cell Molecular Biology II (4)
- CMB 626 Ethics in Biomedical Research (2)
- CMB 705 Special Topics in Neurosciences (V)
- PHRM 640 Neuropharmacology (2)
- PSY 622 Animal Learning (3)
- PSY 626 Cognitive Psychology (3)
- PSY 631 Comparative Psychology (3)
- PSY 642 Cognitive Development (3)
- PSY 719 Research in Psychometrics (3)
- TRMD 607 Neurovirology (1)
- ZOOL 642 Cellular Neurophysiology (3)
- ZOOL 712 Topics in Nerve/Muscle Physiology (V)

## Interdisciplinary Studies

**Degree Offered:** BA in interdisciplinary studies. See the “Undergraduate Education” section for more information.

**Certificate Offered:** Graduate Certificate in International Cultural Studies

### The Academic Program

The Graduate Certificate in International Cultural Studies offers an interdisciplinary course of study that enhances existing degrees in Arts and Sciences, area studies, and the professional schools.

Given that the language of culture is increasingly heard in debates about issues as diverse as nationalism, human rights, immigration, trade, the environment, education, media, and the arts, the certificate program develops tools for a more informed and critical understanding of the role of culture in public debates and policy.

Hawai‘i’s location at the intersection of local, U.S. and Asian spheres of influence provides an important vantage point from which to take up the social and cultural transformations taking place in today’s era of economic globalization and restructuring. Issues of cultural identity and politics are sharply drawn in the distinctive mix of indigenous, local and international communities in Hawai‘i today. Program courses and activities support a variety of approaches to analyzing and understanding the significance of culture, and of cultural difference, as global flows of people, culture, and capital increase the heterogeneity and flux of everyday life throughout the world.

The certificate program brings together faculty whose research and teaching focus on the politics and production of culture in the context of local, national, and international relations. Faculty research methods and styles emphasize the interpretive approaches of the humanities and social sciences.

### Certificate Requirements

The certificate program combines course work with directed research and, where possible, community involvement.

- A core of three courses (7 credits), including:
  - CUL 609 Faculty Seminar Series
  - CUL 610 International Cultural Studies: History and Theory
  - CUL 750 International Cultural Studies: Research Project The Capstone Experience is an individual research project supervised by a participating faculty member.
- Three electives (9 credits), including two taken outside the student’s department and no more than one undergraduate course.

**Degrees Offered:** MS in marine biology, PhD in marine biology

### The Academic Program

Marine biological studies at UH Mānoa have a long history of excellent research and graduate training in the internation-

ally recognized graduate programs in oceanography, zoology, botany, and microbiology. The School of Ocean and Earth Science and Technology and the College of Natural Sciences together sponsor a new graduate program that offers PhD and MS degrees in marine biology. This program takes advantage of the 44 regular faculty at the university whose research interests span the study of marine organisms, ecosystems, biogeochemical processes, reefs, oceanic fisheries, and human/marine interactions. It also offers research and internship opportunities with partners at state and federal agencies such as NOAA's Pacific Islands Fisheries Science Center, the Hawai'i Department of Land and Natural Resources, and the Department of Business, Economic Development, and Tourism.

The faculty and students in this program have access to one of the largest coral reef habitats in the U.S. including the Papahānaumokuākea Marine National Monument, the main Hawaiian Islands, and the U.S.-Affiliated Pacific Islands. The unique location of the Hawaiian Archipelago in the central North Pacific Ocean makes it one of the most remote locations in the world allowing the processes that govern the marine environment to be studied with minimal anthropogenic influence. The program emphasizes scientific training in marine biology as a high demand occupation for the future.

The goal of the program is to produce scientists who are experts in their research areas with a broad-based understanding of the biology, ecology, evolution, and life processes of marine organisms. This program also addresses the growing need, locally and globally, for technically trained scientists, managers, and policy makers who are needed to understand the many processes that govern tropical marine ecosystems. Sound management of marine resources is becoming critical as these resources come under mounting pressure for exploitation from human populations and increasing stress from global climate change.

### Admissions Requirements

Requirements in addition to those set by the Graduate Division are:

- A strong undergraduate or MS training in biological oceanography, environmental science, marine science, marine biology, zoology microbiology, botany, biology, or other life sciences
- A minimum cumulative GPA of 3.2
- A GRE General Test

- A strong undergraduate background in math, chemistry and physics is highly recommended

### Application Requirements

Please see [www.hawaii.edu/marine\\_biology/graduate/admissions.php](http://www.hawaii.edu/marine_biology/graduate/admissions.php) for additional program application requirements.

### Program Requirements

The student will either be admitted to the MS or PhD program, then advance to a track upon completion of the first year of core courses. Students who fail to pass the core courses will be dismissed from the program.

### Master's Degree

Only a thesis (Plan A) program is available. In addition to the thesis, a minimum of 30 credits is required, including at least 18 credits of coursework and between 6 to 12 credits of Research (699) or Thesis (700) work and completion of the core courses with a grade of B or above.

### Doctoral Degree

Applicants can be admitted with or without having completed a master's degree. In addition to the Graduate Division's requirements for doctoral candidates, students in the PhD track will need to complete the core courses with a grade of B or above, and complete additional relevant coursework as indicated by the dissertation committee. Students entering without a MS degree will be required to take a minimum of 30 graduate course credits, including at least 18 credits of formal coursework and between 6 to 12 credits of Research (699) or Dissertation (800). All PhD candidates will be required to demonstrate teaching experience (e.g. Teaching Assistantship) during at least one semester of graduate study.

### Course Requirements

- MBIO 601\* Marine Biology-Environments and Organisms (4)
  - BIOL 602\* Marine Biology-Processes and Impacts (4)
  - One statistics or Biometry course
- \*Students must pass with a B or better.

Please check the program's website for the most up to date requirements, course offerings, and admission information at [www.hawaii.edu/mbiograd](http://www.hawaii.edu/mbiograd).

## Peace Studies

**Degrees and Certificates Offered:** Undergraduate Certificate in Peace Studies, BA in interdisciplinary studies (emphasis on peace studies). See the "Colleges of Arts and Sciences" section for more information.

## Resource Management

Saunders Hall 107  
2424 Maile Way  
Honolulu, HI 96822  
Tel: (808) 956-7381

**Certificate Offered:** Graduate Resource Management Certificate

### The Academic Program

The Graduate Resource Management Certificate is a cooperative program primarily involving the College of Social Sciences, Department of Urban and Regional Planning (anthropology, economics, geography), College of Tropical Agriculture and Human Resources (natural resources and environmental management), and East-West Center (Program on Environment, Program on Resources: Energy and Minerals). Because of its diverse topical components, multidisciplinary faculty, and practical application throughout Asia and the Pacific, the program is ideal for students who are pursuing graduate studies in traditional disciplines and also seeking expertise in environmental resource management.

This program provides students with specialized training in an area that augments their primary field and develops their pragmatic problem-solving and decision-making skills through analysis of real-world problems. Any student who has previously been admitted as a classified graduate student at UH Mānoa is eligible to apply for admission to this certificate program. Interested applicants should contact their advisor or any representative of the program in the collaborating departments and institutions.

To earn this certificate, students are expected to complete 15 credit hours, at least 9 of which are at the graduate level. For more information, contact the Department of Urban and Regional Planning.

# William S. Richardson School of Law

## Administration

2555 Dole Street  
Honolulu, HI 96822  
Tel: (808) 956-7966  
(808) 956-3000 (Application Request Line)  
Fax: (808) 956-3813  
Web: www.law.hawaii.edu

Dean: Aviam Soifer  
Associate Dean for Student Services: Ronette M. Kawakami  
Associate Dean for Academic Affairs: Denise Antolini

## General Information

Since admitting its first class of students in 1973, the William S. Richardson School of Law has graduated more than 2,000 attorneys, most of whom continue to serve in the state of Hawai'i. Richardson graduates have risen to prominent positions, including governor of Hawai'i; lieutenant governor; president of a Hawai'i university; a federal magistrate; Hawai'i Supreme Court, intermediate court of appeals, circuit, district, family, and per diem court judges; partners in major law firms; and members of the state Legislature and Honolulu City Council. In addition, graduates of the school are found in significant numbers at the attorney general, public defender, and prosecuting attorney offices.

The law school offers a three-year, post-baccalaureate program culminating in the juris doctor (JD) degree, also known as the first professional degree in law. A JD degree prepares

students for the bar examination, admission to the bar, and a satisfying career in legal and related fields. The school also offers an LL.M. for international students.

## Student Body

Many of the over 300 students in the law school either were born in Hawai'i or have other ties to the state or region. We also welcome students from the continental U.S., Asia, and the Pacific. Many students from out-of-state express an interest in the school's exceptional Pacific-Asian or environmental areas of emphasis. Each entering class (approximately 90 in number) typically reflects the ethnic diversity of Hawai'i and includes individuals of African American, Caucasian, Chinese, Filipino, Hawaiian, Japanese, Korean, and Pacific Island ancestry. Currently enrolled students from the Asia Pacific region represent China, Guam, Japan, the Northern Mariana Islands, and American Samoa.

Approximately half of the students are female, and about 20 percent have completed other graduate degrees before enrolling in the law school.

## Mission

The mission of the William S. Richardson School of Law is to provide formal legal education, encourage and support scholarly legal research, and promote justice in our society and professional responsibility and public service within our profession. We share the goals of the State of Hawai'i and UH Mānoa to provide educational opportunities for the people of this state and to be leaders in environmental law, Pacific and Asian legal studies, and the law of the sea.

In carrying out this mission, the school's graduates fill a demand for qualified attorneys who are sensitive to Hawai'i's special needs and who will serve government and the public interest as well as private entities.

Students are encouraged to study law and legal institutions as integral parts of larger social, political, economic, and ecological systems. A number of law students concurrently seek graduate degrees at UH Mānoa while undertaking the JD program.

## Accreditations

The accreditation process of the American Bar Association (ABA) is designed to ensure that approved law schools have adequate facilities and adhere to sound educational policies. The School of Law has been fully approved by the ABA; this enables its graduates to present a JD degree acceptable to the bar examiners in every state.

**Degrees Offered:** juris doctor (JD), LL.M.

## Advising

Students have access to academic, personal, and career counseling at any time during the program. Academic counseling is intended to assist the student in defining a program that will satisfy both personal interests and professional development.

Career counseling and information on job opportunities are provided to students for part-time, clerkship, and entry-level positions. About 40 Honolulu legal employers representing the private, public, and public-interest sectors participate in the on-campus interview program for law students. The law school also presents informational programs on career choices and alternatives and preparation for the job search.

## Admission Requirements

Admission to the law school is a highly competitive process, which is based on an applicant's academic achievement, aptitude for the study of law, and professional promise. Included among the specific factors evaluated are undergraduate grade point average, results of the Law School Admission Test (LSAT), academic work beyond the bachelor's degree, academic rigor, writing ability, work experience, and volunteer and civic activities. The admission committee also takes into consideration the diversity of the class and unusual accomplishments or achievements. Residency in Hawai'i or special experience relevant to Hawai'i, the Asia Pacific region, or the law school's programs is also a significant admission criterion.

All applicants must have earned, by the entrance date, a baccalaureate degree from an accredited institution of higher learning in the U.S. or a foreign degree that is fully equivalent. Other requirements include the LSAT results, submission of transcripts to the Law School Data Assembly Service (LSDAS), two letters of recommendation, and a completed law school application.

## Application Deadlines

Applications for admission must be filed with the School of Law and must be submitted on the current year's forms. Contact the law school for up-to-date deadlines and applications. Late or incomplete applications are not considered. Applicants are notified of the admission decision in late March/early April for August entry.

## Ulu Lehua Scholars Program

The initiative, now known as the Ulu Lehua Scholars Program, was established in 1974, the year after the school's founding. The program selects students from legally underserved communities who have overcome adversity and demonstrated academic potential, leadership ability, and commitment to social justice and provides an opportunity for them to obtain a legal education. Ulu Lehua Scholars are fully matriculated into the JD Program, but they also benefit from participation in a small, supportive learning community within the law school, and from course load flexibility during their first year. In their first semester, Ulu Lehua Scholars, like all first year (1L) law students, take Contracts, Civil Procedure, and Legal Practice. In place of Criminal Justice, which they take in their second

year, however, Ulu Lehua 1Ls take American Legal Systems. In addition to providing participants with structured and individualized instruction in legal reasoning, legal writing, law school study techniques, and other foundational legal skills, this course introduces Lehua students to critical legal theory and to other interdisciplinary perspectives on the relationship between law and social change. Ulu Lehua 1Ls and first semester 2Ls also benefit from a structured program of tutoring in civil procedure, contracts, torts, real property, and constitutional law, led by upper division Lehua students who excelled in those courses. Ulu Lehua Scholars participate fully in the life of the law school, assuming leadership roles in such organizations as the *Hawai'i Law Review*, the 'Alahui o Hawai'i, the *Asian-Pacific Law and Policy Journal*, and the school's award-winning moot court teams. Upon graduation, they become part of a large and influential Lehua alumni community, which includes many current judges, government leaders, social justice advocates, business administrators, and prominent attorneys. The Ulu Lehua Program extends the mission of its predecessor, the Pre-Admissions Program, founded to address the underrepresentation of disadvantaged communities.

It seeks candidates who will contribute to fulfilling the goals of the program, including: (1) addressing the legal and related needs of communities under-served by the legal profession in Hawai'i and the South Pacific; (2) representing communities that are presently underrepresented in the law school and the Hawai'i Bar; (3) serving as role models for and mentors to others who are striving to overcome adversity and to reach their full potential as community leaders in Hawai'i and the South Pacific; and (4) bringing distinctive viewpoints and life experiences to the law school community, enriching the understanding of all who work and study here.

## Program Requirements

### Full-Time Program

The JD program is a three-year, full-time course of study that begins in August with a 3-day orientation for new students. The JD degree is awarded upon completion of the satisfactory completion of 89 credit hours, including a selection of required courses. Completion of the program must be attained within seven years of the date of first registration. Full-time study is defined as registration for a minimum of 12 credit hours per semester plus regular and punctual attendance at scheduled class meetings. In addition, all law students must complete 60 hours of pro bono legal service in order to graduate. Contact the law school for a detailed description of the degree requirements.

The first-year curriculum is entirely prescribed and offers a conventional format of substantive courses and intensive small group seminars in legal writing, research, and advocacy. The program for the second and third years is primarily elective and includes writing and research seminars, clinical workshops (some of which involve students in actual litigation under the Supreme Court's Student Practice Rule), and a variety of courses in both traditional and new areas of law.

### Part-Time Program

In the fall of 2008, the law school launched a part-time evening program, leading to a JD degree. Part-time students share the same competitive qualities of the full-time student body and graduation requirements are the same for both programs.

A student in the part-time program typically takes between 8-11 course credits over 3-4 evenings per week. The first two years of the part-time program are structured to allow students to complete most of the required courses. Making steady part-time progress, including summers, a student should be able to graduate in four to five years. There is no separate application for admission; applicants may indicate on their application a desire to be considered for the part-time program. Students admitted to the part-time program may continue to hold a full-time job.

### **Additional Information**

For complete information on school policies and programs, request a *School of Law Catalog* from the Office of Admissions at 2555 Dole Street, Honolulu, HI 96822 or online at [www.law.hawaii.edu](http://www.law.hawaii.edu).

## **Special Programs**

### **The Center for Excellence in Native Hawaiian Law**

The Center for Excellence in Native Hawaiian Law was established in 2005 at the law school through a grant under the Native Hawaiian Education Act. The center focuses on education, research, community outreach, and the preservation of invaluable Hawaiian historical and legal materials. It also offers new courses and supports law students as they pursue legal careers and leadership roles in the Native Hawaiian community. Center faculty have expertise in many aspects of Native Hawaiian rights, water law, Federal Indian law, and traditional and customary rights issues. With assistance from the Office of Hawaiian Affairs (OHA) and other generous community supporters, the center recently began a Post-JD Research Fellowship program; awarded Summer Fellowships allowing law students to work for Native Hawaiian organizations over the summer in 2006; awarded four student scholarships; and produced a guide to Native Hawaiian legal resources. Through a recent initiative, students are now able to receive a Pacific-Asian Legal Studies Certificate with a specialty in Native Hawaiian Law.

### **Dual Degree and Graduate Certificate Programs**

Law students may integrate their law school work with graduate work in other schools and colleges at UH Mānoa and receive both the JD degree and a graduate degree. The most popular dual degree programs have been the JD–MBA, the

JD–master of urban and regional planning, and the JD–MA in Asian studies, although other dual degrees may be approved in consultation with the law school. Students may also pursue graduate certificate programs including ocean policy, resource management, or gerontology.

Students interested in dual degree or certificate programs must apply separately and be admitted to both the School of Law and the graduate or certificate program. Admission to one program does not guarantee admission to the other.

### **Elder Law Program**

The UH Elder Law Program (UHELP) consists of two components: the Elder Law course and the Elder Law legal services project. The course is part of the law school's educational program for training law students in the rapidly expanding field of elder law. The Elder Law legal services project provides direct delivery of limited civil legal services to older persons who are socially and economically needy. It also provides education, training and advice to older persons, their families and caregivers regarding the oftentimes complex legal aspects of caregiving. This direct legal services project is an important source of cases assigned to law students in the Elder Law Clinic. UHELP also houses the Pro Bono Program.

### **Pro Bono Program**

The Pro Bono Program at the William S. Richardson School of Law was one of the first law school pro bono programs and is thought to be the first student-initiated mandatory program in the nation. Students are required to locate and to provide law-related pro bono work under the supervision of an attorney, law school faculty or dean, or other supervisor, as approved by the law school Pro Bono Program director. The definition of law-related pro bono work is construed liberally and includes law related work in the public interest with private practice and non-profit attorneys as well as any international, federal, state, or local government agency, court, or legislature. Law students are encouraged to provide a portion of their pro bono service for indigent clients. The pro bono requirement began with the entering class of August 1992 and successful completion of the pro bono service requirement is a condition for graduation.

### **Environmental Law Program**

Recognizing the challenges that Hawai'i faces in developing an environmentally sustainable economy, the law school has developed a vibrant, diverse Environmental Law Program (ELP). The ELP offers a significant number of exciting and varied courses in environment law and related fields. The centerpiece of the ELP is the Certificate in Environmental Law. The certificate program recognizes the increased student interest in this area, the expertise of a substantial number of our faculty, and opportunities in the field. Students interested in the certificate might also want to consider pursuing a Graduate Ocean Policy Certificate, which is offered at UH Mānoa and is part of our dual degree program. The certificate is available only to UH law students. For more information on the law school's ELP, visit our website at [www.law.hawaii.edu/elp](http://www.law.hawaii.edu/elp).

### **LL.M. Program for International Students**

The LL.M. program is a one-year course of study open to foreign legal professionals and law graduates who wish to gain a broader understanding of U.S. and international legal issues.

The program begins in August; no students will be admitted mid-year. To graduate, students must complete at least twenty-four credit hours. Students are free to design their own course of study in consultation with the LL.M. director and may select a range of courses and seminars in areas such as business and commercial law, environmental law, and international and comparative law. Their program may (but need not) include first-year courses, which serve as an introduction to U.S. law and methods of study. With the consent of the instructor and the LL.M. director, LL.M. students also may enroll in courses offered by schools or departments outside the School of Law or participate in legal externships.

The Introduction to American Law course is required and restricted to LL.M. students, but LL.M. students will take all other classes with American J.D. students and will have ample opportunity to interact with them. The small size of the LL.M. program and of most School of Law classes promotes close interaction, and LL.M. students are encouraged to participate in all aspects of law school life.

For more information on the LL.M. program, visit our website at [www.law.hawaii.edu](http://www.law.hawaii.edu) or contact the LL.M. director at [lawlm@hawaii.edu](mailto:lawlm@hawaii.edu).

### **Pacific-Asian Legal Studies**

In keeping with Hawai'i's location, culture, and history, the Law School has long emphasized Pacific-Asian Legal Studies Program (PALS). We now offer an exceptional range of courses on Pacific and Asian law: students may take general Asian and comparative law courses or choose from specialized courses on China, Japan, Korea, and the Pacific. Our PALS faculty members are actively engaged in current Asian-Pacific issues and bring an unusual depth of expertise to their courses. They are recognized nationally and internationally for their scholarship, which they combine with extensive real-world experience. Each year we also invite distinguished visitors from Asia and the Pacific to visit the law school and teach short-term specialized courses to supplement the regular curriculum. To recognize students who concentrate in Pacific-Asian law, we award certificates of achievement. We actively support student participation in externships in Asia and the Pacific as part of their law school program, which will also count toward certificate credit. Students may also benefit from some of the many exchange relationships the law school maintains with law schools throughout the Asia-Pacific. For more information, visit our website at [www.law.hawaii.edu/pals](http://www.law.hawaii.edu/pals).

### **Advanced JD Program for Foreign Law Graduates**

The advanced JD allows graduates of foreign law schools to complete their U.S. law studies and earn a JD degree in as little as two years. Under this program, qualified foreign law graduates may be admitted with advanced standing and awarded up to 29 credits for their previous law study. The decision on the number of credits to be granted will be made when your application is considered, and successful applicants will be notified at the time of admission how many credits they will receive for their foreign study.

Most students admitted to this program will complete the first-year required JD curriculum in their first year of study, then take their choice of elective courses in the second year of study. We work with all students to design an individual program suited to their background and interests, including participation in our programs in environmental, international, and business law.

Our two-year JD program provides foreign law graduates with the best preparation for bar admission and for the successful practice of law. Advanced JD students are full members of our law school community. Students admitted to the accelerated JD program receive the same degree as other JD students and are eligible to take the bar examination in all U.S. jurisdictions, if they meet the other requirements for admission. For more information, email [kimurasp@hawaii.edu](mailto:kimurasp@hawaii.edu).

### **Hawai'i Innocence Project**

The Hawai'i Innocence Project (HIP) fills a deep need in seeking justice for the wrongly convicted, which is essential for any system of justice. The HIP examines the process for investigating a claim of actual innocence, common errors or problems that produce wrongful conviction, state and federal post conviction procedures, and the nature and uses of DNA and other scientific evidence in connection with actual post-conviction cases.

### **Student Organizations**

The current list of student organizations are:

- 'Ahahui o Hawai'i
- Advocates for Public Interest Law
- American Bar Association-Law Student Division
- American Constitution Society
- Asia Pacific Law & Policy Journal
- Black Law Students Association
- Business Executive Legal Society
- Christian Legal Society
- Delta Theta Phi
- Dive Club
- Environmental Law Society
- Ete Bowl
- Federalist Society
- Filipino Law Student Association
- Film and Entertainment Law Organization
- Hawai'i Women Lawyers
- La Alianza
- LAMBDA Law Student Organization
- Law Review
- National Lawyers Guild-Richardson Chapter
- Pacific Asian Law Student Organization
- Phi Delta Phi
- Public Health Law Organization
- Student Animal Legal Defense Fund
- Student Bar Association
- Surf Club

# John A. Burns School of Medicine

## Administration

John A. Burns School of Medicine  
 651 Ilalo Street  
 Honolulu, HI 96813  
 Tel: (808) 692-0899/0881  
 Fax: (808) 692-1247  
 Web: [www.jabsom.hawaii.edu/jabsom](http://www.jabsom.hawaii.edu/jabsom)

Dean: Jerris R. Hedges, MD, MS, MMM  
 Director of Admissions: Ivy Nip Asano, MD, MAT/Ed  
 Associate Dean of Clinical Affairs: Roy Magnusson, MD, MS  
 Associate Dean of Medical Education: Richard Kasuya, MD, MEd

## General Information

The John A. Burns School of Medicine (JABSOM) strives to improve the quality, effectiveness, and equity of health care delivery in Hawai'i and the Pacific region. The school provides opportunity for qualified residents of Hawai'i and the Pacific Islands, including students from various underrepresented so-

cioeconomic and minority groups to qualify for an MD degree; provides MD graduates with competency to enter postgraduate programs; and provides residency training programs with emphasis on primary-care specialties.

The school also administers graduate research and professional programs that lead to MS and PhD degrees in the basics medical sciences and health-related fields; MS, MPH, and DrPH degrees in Public Health; MS degree in Communications Sciences and Disorders; and, BS and a post-baccalaureate certificate in medical technology. Medical school faculty participate in undergraduate courses for majors in nursing, dental hygiene, biology, nutrition, and related fields. In addition, the medical school, in partnership with the Hawai'i Medical Association and the Hawai'i Consortium for Continuing Medical Education, sponsors continuing medical education for physicians in the state of Hawai'i.

The school provides instruction for five major categories of students:

1. Candidates for the MD degree who are admitted directly by the school's own admissions committee;
2. Candidates for MS degrees in biomedical sciences (with concentrations in cell and molecular biology, clinical research, physiology, and tropical medicine), public health, or in communication sciences and disorders apply through the Graduate Division of UH Mānoa;
3. Candidates for the MPH or DrPH degree who apply through the Graduate Division of UH Mānoa;
4. Candidates for PhD degrees in biomedical sciences with concentrations in clinical research, cell and molecular biology, epidemiology, physiology, and tropical medicine who apply through the Graduate Division of UH Mānoa; and
5. Candidates for an undergraduate degree in medical technology, who apply through the Admissions Office.

In addition, a post-baccalaureate certificate for medical technology clinical training is offered.

## The Kaka'ako Waterfront Complex

In 2005, the John A. Burns School of Medicine relocated to a new 9.898 acre site in Kaka'ako, on the water's edge, between Waikiki and downtown Honolulu. The school's previous location, the 42-year-old Biomedical Sciences building on the Mānoa campus, continues to be occupied by the Office of Public Health Sciences, Department of Medical Technology, and by various research units. The school complex functions as an economic engine for the state that will create quality employ-

ment opportunities, increase biomedical research activity, and be a stimulus for the biotechnical industry in Hawai'i.

Target areas of research, which include innovations in problem-based learning medical education, are retrovirology/infectious diseases/AIDS, molecular biology/genetics/neuroscience, genomic medicine, proteomics, and bioinformatics/computational biology.

Plans also include building an incubator center (leasable research space) to provide biotechnology and bioscience companies a campus-like environment enabling collaboration with academic researchers. A major medical research center, with surrounding space for such companies, as well as Honolulu's technology infrastructure and ties to Asia and the Pacific, will make the city of Honolulu a prime environment for the growing technology and biomedical research industries.

The school is accredited by the Liaison Committee for Medical Education (LCME) of the Association of American Medical Colleges and the Residency and Fellowship Programs are accredited by the Accreditation Council on Graduate Medical Education (ACGME).

Additionally, all civilian postgraduate medical education programs in Hawai'i hospitals are accredited as UH John A. Burns School of Medicine-sponsored residency programs by the ACGME. Approximately 250 physicians (employees of Hawai'i Residency Programs, Inc.) within 10 training programs serve as house staff members in these hospitals under the direction of medical school faculty from eight clinical departments. Oversight is provided by the Designated Institutional Official (DIO). Continuing Medical Education (CME) programs are accredited by the Hawai'i Consortium for Continuing Medical Education (HCCME), a liaison committee between the Hawai'i Medical Association and JABSOM, while the public health degrees are accredited by the Council on Education in Public Health (CEPH), Medical Technology (MEDT), and Communication Sciences and Disorders (CSD).

### Affiliations

The school maintains affiliations with facilities for medical student and resident clinical training that include the following: Castle Medical Center, Hawai'i State Hospital, Hilo Medical Center, Kalihi-Palama Health Center, Kaiser Permanente Moanalua Medical Center & Clinic, Kapiolani Medical Center for Women and Children, Kapiolani Medical Center at Pali Momi, Kokua Kalihi Valley Health Center, Kuakini Health Systems, Leahi Hospital, Maui Memorial Medical Center, The Queen's Medical Center, Queen Emma Clinics, Rehabilitation Hospital of the Pacific, Shriners Hospital for Children, Spark Matsunaga VA Medical Center, Straub Clinic and Hospital, Tripler Army Medical Center, Wahiawa General Hospital, and The Physician Center.

### Degrees

**Bachelor's Degrees:** BS in medical technology, BA in public health

**Master's Degrees:** MS in biomedical sciences (cell and molecular biology, clinical research, physiology, and tropical medicine); MPH and MS in public health; MS in communication sciences and disorders

**Professional Degree:** MD

**Doctoral Degrees:** PhD in biomedical sciences (cell and molecular biology, clinical research, epidemiology, and tropical medicine); PhD in developmental and reproductive biology; DrPH in public health

### Advising

Premedical advising is available through the Pre-Health/Pre-Law Advising Center, Queen Lili'uokalani Center for Student Services.

### Academic Policies

Undergraduate and graduate students in the School of Medicine must adhere to the academic policies of UH Mānoa. Medical students are exempted from certain UH Mānoa policies and instead must follow academic policies germane to the MD program. Copies of relevant policies are available in JABSOM's Office of Student Affairs.

### MD Program

The MD program follows a problem-based curriculum, the "MD Program," which was implemented in fall 1989 and includes the following key features: knowledge is acquired in problem-based modules; self-directed learning is fostered in small group tutorials; students are involved actively in the learning process, not simply passive recipients of information; the small group leaders function as facilitators of learning; content experts function as resources to the learning process; laboratory exercises, demonstrations, the library and audiovisual-computer centers supplement faculty input; basic sciences are learned primarily in the context of solving clinical problems; students are trained to think critically and to evaluate new information and research data; and evaluation of students is based on competence in a variety of problem-solving exercises.

The learning activities in the first two years of the curriculum take place in the school's state-of-the-art Medical Education Building and in community health sites. The advanced clinical instruction that constitutes the bulk of the second two years of instruction takes place in affiliated community hospitals and clinics.

### Admission Requirements/Application Process

Candidates for MD training must complete a minimum of 90 college-level semester credit hours of which the following specific science coursework is required for entry into the MD curriculum.

- 8 semester credit hours of biology with lab
- 8 semester credit hours of general physics with lab
- 8 semester credit hours of general chemistry with lab
- 8 semester credit hours of organic chemistry with lab
- 3 semester credit hours of biochemistry (no lab required)
- 3 semester credit hours of cell and molecular biology (no lab required)

Each course should be acceptable for students majoring in the above science disciplines. Additional enrichment in the biological and social sciences is encouraged. Applicants must also be fully competent in reading, speaking, and writing the English language.

Applicants are required to apply through the American Medical Colleges Application Service (AMCAS). The service permits an applicant to file a single web-based application, which is forwarded to participating medical schools as desig-

nated on the AMCAS application. AMCAS will implement a criminal background check on applicants applying to medical schools. The AMCAS application is available from **June 1** at the AMCAS website: [www.aamc.org](http://www.aamc.org). The deadline to transmit the application to AMCAS is **November 1** for regular admission (EST) or **August 1** (EST) for Early Decision.

Applicants must also take the nationally administered Medical College Admissions Test (MCAT), which deals with knowledge of the physical and biological sciences and skills in verbal reasoning and writing. The Medical College Admissions Test (MCAT) must be taken within three years of an applicant's anticipated matriculation to medical school. The latest MCATs screened or re-screened in the admissions process is September of the year of application (May for Early Decision).

Applicants who achieve the required screening cut-off points will be requested to submit additional materials and invited for interviews. Sixty-six MD candidates are accepted to the entering first-year class.

Inquiries regarding admissions should be directed to the Office of Student Affairs, Admissions, John A. Burns School of Medicine, 651 Ilalo Street, MEB 3rd floor, Honolulu, HI 96813 or via email [medadmin@hawaii.edu](mailto:medadmin@hawaii.edu). Further information may be obtained on the web at [www.jabsom.hawaii.edu](http://www.jabsom.hawaii.edu).

## Honors and Awards

Alpha Omega Alpha is the honorary society for medical students. Delta Omega is the honorary society for public health students.

## Graduate Medical Education Programs

Graduate medical education programs in Hawai'i hospitals are in family medicine, sports medicine, internal medicine, geriatric medicine, obstetrics and gynecology, orthopaedic surgery, pathology, pediatrics, neonatal-perinatal medicine, developmental-behavioral pediatrics, psychiatry (adult, child and adolescent, geriatric, addiction), general surgery, surgical critical care, cardiology, and transitional year. Also offered are a fellowship in maternal-fetal medicine accredited by the American Board of Obstetrics and Gynecology, and a fellowship in addiction medicine leading to certification by the American Board of Addiction Medicine. The UH John A. Burns School of Medicine acts as the institutional sponsor for these residency training programs. Approximately 250 physicians are involved in training, which lasts one to seven years. These physicians serve as members of the house staff in the affiliated hospitals while studying their chosen specialty.

The medical school also conducts a graduate medical education program at Chubu Hospital in Okinawa for graduates of Japanese medical schools.

## Graduate Programs

Refer to the department/program sections of the *Catalog* for more information on each graduate program. **Note:** Information on the clinical research program is listed under the Department of Complementary and Alternative Medicine and information on the cell and molecular biology graduate program is located in the "Interdisciplinary Programs" section of the *Catalog*.

Graduate program inquiries should be directed to the appropriate program chair. General information is available

on the web at [jabsom.hawaii.edu/JABSOM/admissions/gradDegrees/index.php?l1=gradD](http://jabsom.hawaii.edu/JABSOM/admissions/gradDegrees/index.php?l1=gradD).

## Undergraduate Programs

For information on medical technology, refer to the respective section of the *Catalog*.

## Special Programs

### Hawai'i/Pacific Basin Area Health Education Center (AHEC)

The Hawai'i/Pacific Basin Area Health Education Center (AHEC) supports health professions training experiences in rural and under-served areas of Hawai'i and the U.S.-Affiliated Pacific Islands (Guam, American Samoa, Commonwealth of the Northern Mariana Islands, Republic of the Marshall Islands, Republic of Palau, and Federated States of Microne-

sia). Training experiences can be preceptorships, clerkships, electives, cultural immersion experiences, or interprofessional training experiences such as the AHEC Community Based Interdisciplinary Training Program (previously known as Ke Ola). AHEC supports continuity of rural training for students wishing to perform training experiences in a particular rural or under-served area during multiple years of training. AHEC staff perform and support health careers recruitment programs across the state, coordinate science teacher training that incorporates career awareness, support use of video teleconferencing for health education purposes, and provide CME/CE to health care providers in rural and under-served areas. Finally, AHEC is conducting a statewide physician workforce assessment and students can participate in studying aspects of the workforce, such as migration patterns and use of telehealth.

AHEC is funded by the U.S. Department of Health and Human Services, Health Resources and Services Administration. The federal mandate is to improve the diversity, distribution, and quality of the health professions workforce. The mission of Hawai'i/Pacific Basin AHEC is: To improve the health of the under-served through education. Activities focus on five primary areas: 1) Health education and recruitment to health professions for students across the state from kindergarten through college; 2) Educating health professions students in rural and under-served areas, often in interdisciplinary teams; 3) Recruitment, retention, and continuing education of practicing health professionals in medically under-served areas; 4) Providing community health based and community driven health education in over a dozen community learning centers across the state; and, 5) Providing video connectivity for health education, communication, and other health care services to rural and under-served areas across the state. Contact Dr. Kelley Withy for more information at [withy@hawaii.rr.com](mailto:withy@hawaii.rr.com), (808) 692-1060.

### Overseas Programs

The school plays an extensive training role at locations outside Hawai'i and expects that its involvement in the Pacific and Asia regions will continue. In the scattered islands of Micronesia, the school has trained medical officers (MOs) and physician assistants to bring primary care to a widely dispersed population. The curricula were relevant to the clinical and community health needs of the Pacific Basin. Graduates of the MO program received a Diploma in Community Health, Medicine, and Surgery. Training of other health professionals in the Pacific Basin area continues. On Okinawa, the school

conducts a residency training program for graduates of Japanese medical schools. This program is financed by the Okinawa prefectural government. The school conducts a medical student exchange program with affiliated medical schools and hospitals in Korea, Thailand, the Philippines, Japan, Indonesia, Taiwan, Australia, and New Zealand.

## Anatomy, Biochemistry, and Physiology

John A. Burns School of Medicine

### Faculty

- \*S. Lozanoff, PhD (Chair)—renal and craniofacial morphogenesis
- \*V. B. Alarcon, PhD—mammalian developmental biology
- \*R. Allsopp, PhD—telomerase biology
- K. Cummins, MS—physiology
- \*B. Fogelgren, PhD—cell and molecular biology of kidney diseases
- \*K. S. K. Fong, PhD—neural tube and craniofacial genetics and development
- \*T. Humphreys, PhD—ptychoderaflava and stem cells
- S. Labrash, CFSP—plastination, willed body program, continuing education
- \*Y. Marikawa, PhD—mammalian embryogenesis, cell differentiation, and body pattern formation
- \*T. Matsui, MD, PhD—cardiovascular research
- \*D. Merritt, PhD—aging and exercise physiology
- \*S. Moisyadi, PhD—mammalian transgenesis
- Z. Stoytcheva, PhD—transcriptional regulation of renal development
- J. Urschitz, PhD—gene therapy, obesity, pregnancy
- \*M. Ward, PhD—sperm physiology and genetics, assisted reproduction technology
- \*W. S. Ward, PhD—DNA structure, embryogenesis, and sperm biology
- \*Y. Yamazaki, PhD—mouse cloning, primordial germ cell biology

### Cooperating Graduate Faculty

- R. V. Cooney, PhD—role of nitrogen oxides in carcinogenesis

### Adjunct/Clinical Faculty

- J. Chen, PhD
- H. Davis, PhD
- R. Dunn, PhD
- C. E. Ha, PhD
- T. Nomura, MD, PhD
- K. Nonaka, DDS, PhD
- M. Ohishi, MD, DDS, PhD
- C. Stickley, PhD
- S. Tunalı, PhD, MD
- C. F. T. Uyehara, PhD
- J. Wu, PhD
- S. Yang, MD

**Degree Offered:** MS in developmental and reproductive biology, PhD in developmental and reproductive biology

## The Academic Program

The Department of Anatomy, Biochemistry, and Physiology supports the interdisciplinary nature of modern biomedical research and exposes both medical and graduate students to the type of research environment they will encounter in their professional career. The department was formed in acknowledgment of the MD program's ongoing need for discipline-based expertise in the areas of anatomy, physiology, and reproductive biology, which provides a broad base of knowledge in biological structure and function from the molecular level to the body as a whole, as well as biochemistry, which involves the study of the chemistry and physics of living systems and is fundamental to the understanding of many of the disciplines of medical, biological, and agricultural sciences.

The department offers upper- and lower-level courses in biochemistry and physiology as preparatory coursework for prospective medical students as well as 500-level electives in human anatomy and physiology for medical students that supplement knowledge gained in the tutorials. The training of medical students and post-graduate training of physicians would not be possible without the department's Willd Body Program.

Students seeking health-related careers in areas such as dentistry, medicine, nursing, nutrition, physical therapy, public health, and the social sciences need many of the department's physiology courses. Formal programs of study leading to MS and PhD degrees in developmental and reproductive biology are also offered. These students may elect to conduct research at the molecular or cellular level, on organs such as the lungs, or on the whole animal or person. Through the interdisciplinary Cell and Molecular Biology Graduate Program, qualified graduate students have the opportunity to work with faculty from other JABSOM departments and programs within the university system as well.

The MS (Plan A) program in developmental and reproductive biology requires a combination of course work and original research, the latter forming the basis of the student's thesis. The MS (Plan B) degree serves as training for teaching positions at the high school, community college, or four-year college level. It may also be a prelude to a medical or dental education. Candidates for the MS Plan B degree are required to prepare a written paper and give an oral presentation as well as fulfilling course requirements (total of 30 credits). The MS concentration in exercise physiology provides adequate preparation for a career in sports medicine and training and in health and fitness programs in hospitals and private businesses.

The PhD degree in developmental and reproductive biology prepares students for teaching careers in universities, community colleges, and high schools, as well as for research careers at universities, hospitals, government laboratories, and large pharmaceutical companies. Candidates must take a written qualifying examination, an oral comprehensive examination, and submit an acceptable outline of their proposed dissertation research. They must also submit and defend their dissertation. PhD graduates usually obtain postdoctoral positions elsewhere as further preparation for a career in teaching and research at the university level.

Applicants must submit three letters of recommendation together with either GRE or MCAT scores. All applicants are expected to have adequate backgrounds in biology, chemistry, mathematics, molecular biology, and physics. The course requirements for admitted students vary with their degree and

specialization, but all candidates for the MS and PhD degrees must take a written qualifying examination.

The department's anatomy and reproductive biology faculty are world-renowned for their research in the areas of fertilization, reproductive endocrinology, and neurobiology of sexual behavior. Department faculty established the Institute for Biogenesis Research and pioneered the successful "Honolulu Technique" cloning technology, which provides scientists with a new and valuable tool for researching the molecular processes involved in embryo formation, cell differentiation, aging, and disease. The biochemistry faculty offer laboratory and research experience either through formal courses or through participation in funded research programs in areas such as clinical biochemistry, bioenergetics, biochemistry of reproduction, and chemical carcinogenesis. Department faculty also have appointments in the Pacific Biosciences Research Center and the University of Hawai'i Cancer Center.

## Cell and Molecular Biology

### Faculty

- \*M. J. Berry, PhD (Chair)—selenoproteins, antioxidants and human diseases
- \*F. P. Bellinger, PhD—selenoproteins in brain function
- \*R. L. Cann, PhD—molecular and evolutionary genetics
- \*M. Gerschenson, PhD—infectious diseases, HIV mitochondrial medicine
- \*D. S. Haymer, PhD—molecular evolution and developmental genetics
- \*P. Hoffmann, PhD—selenoproteins in asthma and inflammation
- \*D. M. Jameson, PhD—fluorescence spectroscopy; biomolecular dynamics and interactions; ribosomal proteins
- \*O. LeSaux, PhD—genetic disorders; dystrophic calcification
- \*R. A. Nichols, PhD—neuropharmacology, neuroscience and physiology
- \*J. Panee, PhD—selenoproteins and natural products as antioxidants
- \*M. D. Rayner, PhD—structure-function relationships in voltagegated ion channels
- \*S. E. Seifried, PhD—macromolecular interactions, transcription factor recognition of specific DNA sequences, protein subunit assembly
- \*A. Stokes, PhD—biochemistry and physiology of ion channel proteins
- \*C. Todorovic, PhD—neurobiology

### Adjunct Faculty

- A. Bachmann, PhD—cancer, pharmacology
- T. A. Donlon, PhD—human genetics
- A. Fleig, PhD—electrophysiology (patch-clamp); calcium signaling in muscle cells; regulation of calcium signaling; cellular neuroimmunology
- K. Pellegrin, PhD—pharmacy, psychology, research training
- R. Penner, PhD—electrophysiology (patch-clamp); intra- and intercellular signal transduction; regulation of calcium signaling; cellular neuroimmunology
- J. Pezzuto, PhD—pharmacy, drug discovery, natural products
- H. Turner, PhD—immunogenetics, cannabinoid receptors, cell signaling

## The Academic Program

Faculty in the Department of Cell and Molecular Biology have ongoing research programs in areas such as genetics, cell biology, biochemistry, and neurophysiology. The department also provides instruction in the basic principles and concepts of genetics, biochemistry, and molecular biology to medical students, graduate students from various disciplines, and undergraduates.

The faculty also participate in the training of PhD and MS graduate students in the interdisciplinary Cell and Molecular Biology Program. This program brings together faculty with expertise in biochemistry, cell biology, cell signaling, developmental biology, genetics, immunology/retrovirology, neurobiology/neurophysiology, plant molecular physiology, and reproduction function for collaborative teaching and research activities. Information on the Cell and Molecular Biology (CMB) Graduate Program can be found in the "Interdisciplinary Programs" section of this *Catalog*, on the CMB website, or interested applicants can contact:

### Affiliate Faculty

\*S. Ching, AuD—audiology

### Adjunct Faculty

\*C. Bell, MD, PhD—geriatric medicine  
\*V. Chinen, MS—speech-language pathology  
\*J. Hiu, MS—speech-language pathology  
\*R. Ito, AuD—audiology  
\*H. Kuniho, MS—speech-language pathology  
\*P. Mashima, PhD—speech-language pathology  
\*K. Mays, MS—speech-language pathology

**Degrees Offered:** MS in communication sciences and disorders

## The Academic Program

The study of communication sciences and disorders focuses on the basic understanding in speech, language, swallowing, cognitive-communication, and hearing processes, as well as disorders in these areas. The Department of Communication Sciences and Disorders (CSD) prepares students to become a speech-language pathologist, a health-allied professional who evaluates and treats individuals with speech, language, cognitive-communication, and swallowing disorders across lifespan, from infants to the elderly. The practice of speech-language pathology (SLP) requires a minimum of a master's degree in specialized area such as CSD and obtaining clinical certification and licensure. Currently, the CSD department is the only program in the State of Hawai'i who offers a Master of Science (MS) degree in CSD and one of the few programs in the U.S. featuring preparation in a multilingual/multicultural environment. The time required for completion of the CSD program by an individual is two years (six semesters including summer sessions).

The CSD department defines our mission using the C.A.R.E.S. Model to establish a center of excellence for:

1. Clinical Service to rehabilitate people challenged with speech language and/or hearing disorders.
2. Administrative infrastructure for internal and external networking.
3. Research to support evidence based practice.
4. Educational training to prepare highly qualified speech and language professionals.
5. Service to develop public awareness at the university, state, national, and international levels.

The MS degree education program in SLP at UH Mānoa is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association (ASHA), 2200 Research Boulevard #310, Rockville, Maryland 20850, 800-498-2071 or 301-296-5700. Students who obtained the UH Mānoa MS degree and judged by the program as having acquired all of the knowledge and skills mandated by the current ASHA standards are eligible to apply for an ASHA Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP) after successful completion of post-graduate clinical fellowship.

### Advising

Students considering the major in CSD may contact the CSD department by email or phone listed above. The CSD website offers useful information for the program and admission requirements. Academic counseling from the Pre-Health Pre-Law Advising Center is also available (manoa.hawaii.edu/pac/spa.html), especially for UH undergraduate students.

## Graduate Study

### Master's Degree

- Maintenance of a minimum grade of B- for all required courses and clinical practicum
- Completion of required graduate course work
- Completion of a minimum of 375 direct-contact clock hours in clinical practicum at internship and externship and additional 25 clock hours in observation.

- Completion of a thesis (Plan A) or a research project and submission of a manuscript (Plan B)
- Passing scores on Praxis examination in Speech-Language Pathology

### Clinical Practicum

All CSD graduate students are required to complete clinical practicum at on-campus clinic and externship sites. The University of Hawai'i Speech and Hearing Clinic (UHSHC) is an on-campus internship site and serves as a core clinical teaching facility. Graduate students work directly with patients under the close supervision of a clinical supervisor (a certified speech-language pathologist and/or audiologist). The UHSHC provides speech, language, cognitive-communication, and hearing services to all individuals across the lifespan. The UHSHC is affiliated with University Clinical, Education and Research Associates (UCERA), which is the faculty practice organization created to support the clinical, academic, and research activities of the faculty of the JABSOM. After successful completion of the internship at the UHSHC, students will be placed at externship at a variety of settings, including hospitals, rehabilitation facility, nursing homes, private practice, early intervention, and schools.

### Research Project (Plan B) and Thesis (Plan A)

Under the supervision of a research or thesis advisor, the CSD students must complete either a research project (Plan B) or thesis (Plan A) as part of the graduation requirements. The project or thesis aids the student in developing and learning evidence based practice (EBP), which is an integral component of clinical practice in SLP. The ASHA advocates the EBP and defines the goal of EBP as “the integration of: (a) clinical expertise/expert opinion, (b) external scientific evidence, and (c) client, patient, caregiver values to provide high-quality services reflecting the interests, values, needs and choices of the individuals we serve ([www.asha.org/Members/ebp/intro/](http://www.asha.org/Members/ebp/intro/))”.

### Praxis Examination

The Praxis examination in SLP is offered by Educational Testing Service (ETS) and assesses knowledge and current practices in SLP for beginning practitioners. Importantly, the Praxis examination is an essential component in obtaining the ASHA CCC-SLP and state licensures. The CSD students are required to pass the Praxis examination to graduate from the program.

### Online Undergraduate CSD Courses

The CSD program offers seven online undergraduate courses (CSD 431-437) through the Outreach College. By completing these courses, undergraduate students can fulfill CSD-specific prerequisites for entering the CSD MS program.

## Complementary and Alternative Medicine

John A. Burns School of Medicine  
651 Ilalo Street  
Honolulu, HI 96813  
Tel: (808) 692-0909

### Faculty

R. Harrigan, EdD (Chair)—women's health, health disparities  
N. Apau, MD, MS—asthma  
A. Brown, PhD—nutrition  
M. Carbone, MD  
E. C. Christenson, MD  
K. Csiszar, PhD—ethnobotanics, molecular biology  
J. Davis, PhD  
P. Deleon, PhD  
T. Hoffman, MD  
T. Huynh, MD  
H. Liu, MD  
M. Long, MD  
K. Lye, MD  
J. Panee, PhD  
B. Rodriguez, MD  
T. Shintani, JD, MD, MPH—nutrition  
K. Withy, MD—health services research, workforce development  
S. Wu, PhD  
S. Yamada, MD—medical education  
I. Zunin, MD

### The Academic Program

The State of Hawai'i is an environment with the unique, rich blend of cultures and ethnicities and many healing traditions, some of ancient origins. Complementary and Alternative Medicine (CAAM) takes on increased significance in Hawai'i because the diverse population of the state uses these treatment modalities frequently.

The department is committed to conducting both basic and applied research related to complementary and alternative therapies in Hawai'i and the Pacific region, especially dietary supplements; educating the next generation of physicians and other healthcare personnel about the potential risks and benefits of complementary and alternative therapies; providing culturally competent care for people within the state of Hawai'i by understanding the use of patterns of complementary care used by the Hawaiian population; facilitating the study of medicinal plants, including varieties unique to Hawai'i and/or the Pacific Rim; and promoting health service research to assess the clinical and financial benefits—or lack thereof—of CAAM therapies for the Hawaiian population.

Models of integrative care teams strategically placed in Hawai'i's major hospitals, large medical groups and/or health maintenance organizations together with the development of relevant educational materials for clinicians, researchers, educators and consumers of health care is another major goal. Collaborations with other UH Mānoa programs such as Chinese studies and the School of Hawaiian Knowledge faculties will energize progress towards this goal to reduce and eliminate health disparities in Hawai'i and improve the health of Hawai'i's people.

## Graduate Study

A graduate program leading to the MS in clinical and translational science is offered, with an emphasis on development, of multidisciplinary research teams composed of clinicians, researchers, educators, and community members. Clinical and translational science is the study of methods used to investigate clinical problems in medicine. Available in Plan A (thesis), the program requires a combination of course work and original research, the latter forming the basis of the master's thesis.

Students enrolled in the program acquire skills in biostatistics and epidemiology, and master the scientific principles that underlie clinical research methods. They develop the ability to identify and resolve ethical issues in clinical research, to ensure the safeguarding of human subjects, and to understand the workings of Institutional Review Boards and other relevant requirements. In addition, students increase their capacity in obtaining research funding from agencies such as the National Institute of Health.

In addition to offering knowledge and skills needed for careers in clinical research, the program functions as a supportive mechanism for newly trained investigators, actively facilitating career development and encouraging research collaborations, particularly those related to research on health disparities. By providing high quality training to doctoral and post-doctoral candidates, the program aims to increase the mass of clinical researchers at UH Mānoa, including minority investigators. Targeting junior faculty, fellows, residents, and doctoral candidates from biomedical sciences, nursing, social work, psychology and public health, the interdisciplinary nature of the program broadens students' perspectives and increases opportunities for innovative, cross-disciplinary collaborations in clinical research.

Graduates of the program pursue teaching careers in academia; as well as research careers in academia, government laboratories, and pharmaceutical companies. In addition, some graduates find employment in hospitals or private businesses.

The department also has a doctoral program leading to a PhD in biomedical sciences with a concentration in clinical research.

## Family Medicine and Community Health

The Physician Center at Mililani  
95-390 Kuahelani Avenue  
Mililani, HI 96789  
Tel: (808) 627-3235  
Fax: (808) 623-7872  
Web: [www2.jabsom.hawaii.edu/FamilyMedicine/](http://www2.jabsom.hawaii.edu/FamilyMedicine/)

### Faculty

A. L. Hixon, MD (Chair)—family medicine and community health  
L. Aggarwal, MD—family medicine and community health  
L. E. Buenconsejo-Lum, MD—family medicine and community health  
S. Hankins, MD—family medicine and community health  
W. M. Izumigawa, MBA—Director of business affairs  
G. Maskarinec, PhD—medical anthropology  
A. W. Nichols, MD—family medicine, sports medicine  
J. S. Omori, MD—family medicine and community health  
N. A. Palafox, MD, MPH—family medicine and community health  
S. Riklon, MD—family medicine and community health  
M. Tubianosa, MD, MPH—family medicine and community health  
C. W. Tseng, MD, MPH—family medicine and community health  
S. Yamada, MD, MPH—family medicine and community health

**Degree Offered:** MD

### The Academic Program

The Department of Family Medicine and Community Health (DFMCH) is focused on community-based collaborations to improve patient outcomes across the lifecycle through direct clinical care, primary care workforce development, and research. The department has a particular focus on caring for cross-cultural, rural, and under-served communities in Hawai'i and throughout the Pacific. The department, in conjunction with our partner hospitals, sponsors a three-year ACGME accredited Family Medicine Residency Program and a one-year ACGME accredited Sports Medicine Fellowship.

Teaching goals for students, residents, and fellows are based on a philosophy of contextualized care that understands health and illness in relation to the individual, family, and community, and responds not only to episodes of illness, but also attempts to understand and address the broader social determinants of health. Medical student instruction focuses on basic conceptual tools and clinical strategies in real world settings through community based preceptorships.

The Sports Medicine Fellowship Program is affiliated with the DFMCH Residency Program and provides clinical, research, and educational exposure to athletes, patterns of athletic injuries, and rehabilitation. The program serves as a resource for the dissemination of sports medicine and exercise science-related information for UH Mānoa and the state of Hawai'i.

## Geriatric Medicine

John A. Burns School of Medicine  
347 N. Kuakini Street HPM-9  
Honolulu, HI 96817  
Tel: (808) 523-8461  
Fax: (808) 528-1897

### Faculty

K. H. Masaki, MD (Chair)—geriatric medicine  
S. Ahsan, MD—geriatric medicine  
C. Bell, MD, PhD—geriatric medicine  
R. Fernandes, MD, MPH—geriatric medicine  
D. Fischberg, MD—pain and palliative medicine  
M. Inaba, MD, PhD—geriatric medicine  
K. Lubimir, MD—geriatric medicine  
L. Okamoto, MD—geriatric medicine  
O. Pishchalenko, MD—geriatric medicine  
B. Rodriguez, MD, PhD—epidemiology  
C. Takenaka, MD—geriatric medicine  
B. Tamura, MD—geriatric medicine  
A. Wen, MD—geriatric medicine  
B. Willcox, MD—geriatric medicine

**Degree Offered:** MD

### The Academic Program

Geriatric medicine is dedicated to the care of older people and to healthy aging throughout life, so that the frailties and disabilities common in older years can be prevented. To provide comprehensive care, geriatrics is often interdisciplinary, and clinical instruction takes place in a wide variety of settings, including outpatient, acute hospital, nursing home, retirement community, home care, rehabilitation, and palliative care settings. As an age-based specialty like pediatric medicine, geriatric medicine includes aspects of internal medicine, pharmacology, psychiatry, adult development, family medicine, neurology, urology, gynecology, rehabilitation, and palliative medicine.

The Department of Geriatric Medicine provides education for: medical students; residents in internal medicine, family medicine, ob-gyn, and other specialties; fellows in Geriatric Medicine and Geriatric Psychiatry; practicing physicians; and allied health professionals and students in the field of aging. The fully accredited Geriatric Medicine Fellowship Program is for physicians who are graduates of either internal medicine or family medicine residency programs. The first year of fellowship training is designed to lead to eligibility for board certification in geriatric medicine. Additional years of fellowship are devoted to research, consultative medicine, medical education, and medical administration.

The Division of Palliative Medicine is located in the department, and many faculties have double board certifications in Geriatric Medicine and Palliative Medicine.

The Department of Geriatric Medicine is involved in an extensive array of funded research programs, thus providing training and experience in research for students at all levels.

## Medical Technology

Biomedical Sciences C-206  
1960 East-West Road  
Honolulu, HI 96822  
Tel: (808) 956-8557  
Fax: (808) 956-5457  
Web: [www.hawaii.edu/medtech/Medtech.html](http://www.hawaii.edu/medtech/Medtech.html)

### Faculty

D. Y. Teshima, MPH (Chair)—medical technology  
N. N. Ebisu, BS—medical technology  
S. M. Gon, MPH—medical technology  
J. S. Ha, PhD—clinical biochemistry  
K. K. Morton, BS—medical technology  
L. Onaka, MBA, MT—medical technology  
R. Yamaguchi, MPH—medical technology

**Degree and Certificate Offered:** BS in medical technology

### The Academic Program

Medical technology (MEDT) is a health-care profession in which medical technologists (medical laboratory scientists) perform laboratory procedures used for the promotion of health and the diagnosis, monitoring, and treatment of diseases. Technical skills needed to carry out the tasks include microscopy, venipuncture, manipulation of various labware and operation of automated instruments. Results of these procedures are essential to the delivery of quality health care. The field is broad and involves several disciplines: chemistry, hematology, immunohematology (blood banking), immunology, and microbiology.

Medical technology is a constantly evolving profession. Advances in healthcare and new career opportunities have fueled the demand for medical laboratory scientists. Employment opportunities are in hospitals, physician's offices, reference labs, DNA labs, research, veterinary clinics, and other labs. Education and training in medical technology also enables graduates to pursue careers as physicians, forensic scientists, researchers, educators, health administrators, consultants, and many more.

### Admission Requirements

The curriculum is a career-pathway structure that begins with medical lab technician (MLT) associate degree at a community college and culminates in a BS degree in medical technology. Students master the basic skills and knowledge in medical laboratory as MLT, then clinical applications and problem solving skills that are required of the baccalaureate level practitioners are learned at UH Mānoa. Kapiolani Community College (KCC) offers an associate degree in MLT; 4303 Diamond Head Road, Honolulu, HI 96816; URL: [www.kapiolani.hawaii.edu/academics/programs-of-study/medical-laboratory-technician-program/](http://www.kapiolani.hawaii.edu/academics/programs-of-study/medical-laboratory-technician-program/); 808-734-9270.

Among eligible candidates, 10 to 15 students will be selected by the Admissions Committee to be admitted. Eligibility criteria are:

- Associate degree in Medical Laboratory Technician (MLT).
- National certification as an MLT.
- Cumulative GPA of at least 2.5 in the MLT program.

While at KCC, students are encouraged to select courses applicable to UH Mānoa General Education, major requirements

and prerequisites. Students considering matriculating to UH Mānoa should seek academic advising from advisors on either campus.

Medical technologists perform various procedures that directly impact patient care, so it is important that all applicants be able to perform certain essential functions. With appropriate accommodations, if needed, everyone must be able to perform the activities listed below. These skills are assessed in the MLT program. Additional professional skills are taught in classes after admission.

- Manipulate labware to transfer or prepare reagents and samples (e.g., charge hemocytometer, prepare blood smear).
- Operate simple instruments according to instructions (e.g., cell counter, centrifuge, spectrophotometer).
- Perform microscopic examinations on various specimens and report the results (e.g., leukocyte differential count, cell morphology, urinary sediments).
- Follow written and verbal directions to perform laboratory tests and report results.

### Other Requirements

Medical technology majors are required to have professional liability insurance, which costs about \$40 per year. Immunization for Hepatitis B virus is highly recommended. Clinical affiliates, for those who opt to participate in the post-graduate clinical training, may have additional requirements (e.g., vaccinations, CPR/AED training, criminal background check).

### Advising

Students are encouraged to see a medical technology advisor as soon as possible and prior to each registration period. Appointments can be made through the department office.

### Clinical Training

Clinical training at affiliated clinical labs in Hawai'i follows graduation. Alternatively, as certified MLT, students may qualify for medical lab scientist (MLS) certification through work experience.

### Accreditation

The program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Rd. Rosemont, IL 60018, phone (773) 714-8880, [www.naacls.org](http://www.naacls.org).

### Certification and Licensure

After clinical training, students are eligible to take a national certification exam. In Hawai'i, state licensure is also required for employment.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

- Complete the degree requirements that satisfy UH Mānoa's General Education Core requirements and program requirements. Second language is not required.
- Earn a minimum cumulative GPA of 2.0
- Submit by the specified deadline an application for graduation to the Cashier's Office during the semester preceding the awarding of the degree.

### Curriculum for Medical Technology

MEDT 151(2) is offered at UH Mānoa for those who start at UH Mānoa. MLT curriculum is offered at KCC.

#### Junior Year

- Semester 1: †MEDT 301 (3); †MEDT 331 (3); CHEM 272/L (3/2); PHYL 301 (4)
- Semester 2: †MEDT 431 (3); †MEDT 471 (4); CHEM 273 (3), BIOL 172 (3); PHYL 302 (4); TRMD 431 (2)

#### Senior Year

- Semester 1: †MEDT 451/L (1/2), †MEDT 472 (4), †MEDT 477 (2); †MICR 461 (3)
- Semester 2: †MEDT 464 (3); †MEDT 478 (2); †MEDT 481 (1); †MICR 463 (3), BIOL 275 (3)

### Post-baccalaureate Study

#### Certificate for Clinical Training

- †MEDT 591 (28)

†Note: Grade of C or equivalent is required for courses highlighted with a dagger (†).

 M. Yee, MD—neurology

**Degree Offered:** MD

## The Academic Program

Internal Medicine is the medical discipline that specializes in the prevention, diagnosis, and management of illnesses in adults. The Department of Medicine contributes to the general education of medical students, and provides post-doctoral and continuing education in the discipline of Internal Medicine and its sub-specialties. Faculty also maintain active, funded research programs in HIV/acquired immunodeficiency syndrome (AIDS), cardiology, diabetes, neurology, and respiratory diseases, in addition to patient-oriented, community-based, or medical education research. Faculty also provide direct patient care and medical services in hospital and outpatient settings, particularly to the under-served or under-insured. In delivering medical education, conducting research, and providing patient care, the department helps Hawai‘i meet its health care needs, develop an important work force, and advance our understanding of health disparities in the context of Hawai‘i’s unique ethnic and environmental diversity.

## Education

The department provides education for medical students, interns and residents (post-MD students), faculty, and practitioners. In the first two years of medical student education, departmental faculty hold key leadership and teaching roles in Problem-Based Learning, Colloquia, Basic Science Correlations, Clinical Skills Preceptorship, and many BIOM courses. In these early years, the curriculum integrates humanities, social sciences, and the physical and biological sciences. The curriculum also promotes skills in hypothesis formulation, data acquisition

and evaluation, clinical problem-solving, and effective communication with patients, their families, and other members of the health team.

For third year students, the department coordinates required clerkships that provide students supervised, formative experiences in the evaluation and management of patients in hospital and outpatient settings. For fourth year medical students, faculty in general medicine and internal medicine sub-specialties also offer required and elective learning opportunities that focus on particular aspects of internal medicine. In brief, the department helps the learner achieve graduation objectives and helps assure accreditation of the school by the Liaison Committee on Medical Education.

The department also provides the faculty and the educational oversight for interns and residents in the UH Mānoa Internal Medicine Residency Program, which is accredited by the American Council of Graduate Medical Education. Each year, nearly 20 post-MD students complete the 3-year Categorical program. Faculty develop and deliver curricula that address fundamental concepts in general medicine and in each of the Internal Medicine sub-specialties: Allergy and Immunology, Cardiology, Critical Care Medicine, Dermatology, Endocrinology, Gastroenterology, Geriatric Medicine, Hematology, Infectious Diseases, Nephrology, Neurology, Oncology, Pulmonary Diseases, and Rheumatology. The curricula are delivered in inpatient and outpatient sites that provide opportunities for supervised direct patient care and that embody the practical experiences for which the internist must be prepared. They prepare the resident for certification by the American Board of Internal Medicine. Increasing emphasis on medical education and scholarship help assure that residents will learn and teach well beyond their graduation from the Residency. Indeed, post-doctoral residents are integral to the education of our medical students.

As part of the departmental commitment to post-graduate training, the department also educates up to 6 preliminary residents who complete a year of Internal Medicine before focusing in Neurology, Dermatology, and other specialties. It shares in the education of as many as 9 transitional residents who complete a year of medical and surgical training before focusing in programs such as Anesthesiology, Ophthalmology, or Radiology. Finally, our faculty supervises rotations for residents in other disciplines, as required by their respective accrediting Boards. These include Family Practice and Community Medicine, Obstetrics and Gynecology, and Psychiatry.

The department is also accredited by the American Consortium in Continuing Medical Education to provide weekly seminars and special learning activities in topics pertinent to the practicing internist. Through its regular evaluation and discourse with practicing physicians as well as academic researchers, the department shares scientific advances with the community and gains practical insights that help shape the education of our future physicians.

## Research

Faculty are principal investigators of and contributors to several federally funded research programs, including the Hawai‘i Center for AIDS, the Center for Cardiovascular Research, Neuroscience and MR Research Program, and Asthma and Immunogenetics Research. Many ongoing translational and clinical research projects help address racial disparities in prevalence, detection, and management of illnesses. Reflecting

the collaboration with basic scientists, several faculty also have adjunct appointments in basic science departments and programs. Research in bioethics, medical education, public health, community outreach, and community-based participatory research promote teaching and learning approaches, and advance the health literacy of the medical and public communities. The diverse scientific and scholarly activities provide rich learning opportunities for UH Mānoa undergraduates, JABSOM medical students, UHIMRP residents, and practitioners.

### Service

In addition to supporting department, school, and university needs, faculty also provide clinical services in settings that benefit under-served communities and that enhance medical student and post-doctoral learning. The faculty practice provides a continuum in the prevention, diagnosis, evaluation, and management of illness. Complex cases that result from interactions between genetics, environment, and culture benefit from multi-disciplinary inquiry and collegial discussion fostered by the medical school and its faculty.

## Native Hawaiian Health

John A. Burns School of Medicine  
677 Ala Moana Blvd., Suite 1016B

K. Sakamoto, MS—post baccalaureate education, student development  
M. Taualii, PhD, MPH—Queen’s Health Care System Scholar  
P. M. Tim Sing, MD—post baccalaureate education, internal medicine/pediatrics  
S. Tshahko, MD—anatomy and reproductive biology, post baccalaureate education  
K. Voloch, MD—pediatrics, post baccalaureate education  
V. Wong, MD—family medicine, faculty and student development

### The Academic Program

The mission of the Department of Native Hawaiian Health is to be a center of excellence in education, research, and quality

health care practices committed to the optimal health and wellness of Hawai‘i Maoli, their families, and communities that embraces traditional Hawaiian values and practices. To accomplish this mission, the program will actively seek “grass-roots” partnerships with others in the community who share their vision of Ku Pono: Hawai‘i Maoli achieving optimal health and wellness.

Research efforts will be focused on reducing and eliminating health disparities in Native Hawaiians and other Pacific-based populations. This includes activities such as conducting hypothesis driven research, developing pilot studies, training new researchers and networking with Native Hawaiian communities to disseminate research information via the Center for Native and Pacific Health Disparities Research, the Heart Failure Disparities in Native Hawaiians Study, the PILI ‘Ohana Obesity study, and other NIH funded grants.

Two programs are dedicated to increasing and improving the health workforce serving Hawai‘i, especially in Native Hawaiian communities: the ‘Imi Ho‘ōla Post-Baccalaureate Program and the Native Hawaiian Center of Excellence.

### ‘Imi Ho‘ōla Post-Baccalaureate Program

‘Imi Ho‘ōla (Hawaiian for “those who seek to heal”) is a post-baccalaureate program designed to provide educational opportunities to students from disadvantaged backgrounds capable of succeeding in medical school. Although ‘Imi Ho‘ōla is not limited to persons of Hawaiian, Filipino, Samoan, Chamorro, and Micronesian descent, a large number of these students have been able to demonstrate that they are from a disadvantaged socioeconomic and/or educational background and have demonstrated a commitment to serve areas of need in Hawai‘i and the Pacific. ‘Imi Ho‘ōla has expanded its outreach efforts and developed partnerships with local high schools, colleges, and community-based health organizations.

### Native Hawaiian Center of Excellence (NHCOE)

NHCOE is funded through state, federal, and private funds and focuses on: (1) Enhancing the performance of Native Hawaiian medical students by offering support for USMLE board preparation and collaboration with JABSOM retention efforts; (2) Developing the research and teaching skills of Native Hawaiian faculty by offering one- to two-year fellowships; (3) Addressing information resources by developing Native Hawaiian health resources, cultural competency, and curricula through conferences and workshops; (4) Focusing research by offering an elective for first year medical students on introducing research and topics of Native Hawaiian health issues; (5) Promoting student training in rural areas by serving as a resource for students choosing to do electives in rural Native Hawaiian communities; and (6) Developing a competitive applicant pool through active involvement in the establishment of collaborative efforts with colleges and high schools to develop programs aimed at increasing the numbers of Native Hawaiian medical students.

## Obstetrics, Gynecology, and Women's Health

I. A. Oyama, MD, MBA—gynecology, urogynecology and pelvic pain  
J. L. Salcedo, MD, MPH, MPP—obstetrics and gynecology, family planning  
M. C. Savala, MD—obstetrics and gynecology  
R. A. Soon, MD, MPH—obstetrics and gynecology, family planning  
S. Y. Tasaka, MA—chief of administration, operations, and finance  
S. K. Taylor, MD—obstetrics and gynecology, maternal fetal medicine  
K. Y. Terada, MD—gynecology oncology  
D. R. Towner, MD—obstetrics and gynecology, maternal fetal medicine  
T. E. Wright, MD, MS—obstetrics and gynecology  
G. C. Yokochi, MD—obstetrics and gynecology

**Degree Offered:** MD

### The Academic Program

Instruction in obstetrics and gynecology (OBN) is divided into five general areas: basic clerkship, student electives, residency training, fellowship training, and continuing medical education. The main objectives of the clerkship during the third year is to give students an overall perspective of the field, an in-depth knowledge of women's health care and the ability to perform those technical skills necessary for the care of women. The elective experiences are developed to allow interested

students the opportunity to acquire detailed knowledge and experience in women's health care or within specific areas of care.

The department directs a residency training program for medical graduates who desire specialty training in the field. The MD education program is closely integrated with residency training to maintain communication and learning experience throughout training. The department has fellowships in Maternal Fetal Medicine and Family Planning Fellowship. Research is focused in public health, health disparities, human reproduction, family planning, and human reproduction. The department is divided into the following divisions: endocrinology-infertility, maternal-fetal medicine, obstetrics and gynecology-ambulatory and hospitalist, gynecologic oncology, urogynecology, and family planning.

## Pathology

John A. Burns School of Medicine  
651 Ilalo Street  
Honolulu, HI 96813  
Tel: (808) 692-1130

### Faculty

A. L. Schiller, MD (Chair)—orthopaedic pathology, autopsy pathology  
P. K. Bryant-Greenwood, MD, MBA (Vice Chair)—molecular pathology, anatomic pathology  
D. Shimizu, MD (Program Director)—GYN pathology, anatomic pathology  
A. Powers, MD (Residency Program Associate Director)—transfusion medicine, clinical pathology  
M. Bankowski, PhD—microbiology  
D. Horio, MD—anatomic and clinical pathology  
B. J. Kaya, MD—neuropathology, anatomic pathology  
W. Kim, MD—clinical pathology  
C. Lum, MD—dermatopathology, molecular pathology  
K. S. Thompson, MD, MS—pediatric pathology, anatomic pathology, genetics  
J. H. Uyehara-Lock, MD—neuropathology, anatomic pathology

**Degree Offered:** MD

### The Academic Program

Pathology (PATH) is the study of aberrations or deviations of organs or systems that result in disease. Instruction in pathology is open to undergraduate, graduate, medical students, and residents. All medical students may elect to take PATH 515 as a part of the problem-based learning curriculum. The required PATH 541 provides essential autopsy experience for all third- and fourth-year medical students. Third and fourth-year students may choose electives PATH 545 and 699 that include instruction in laboratory medicine for the practicing physician, clinical pathology, anatomic pathology, clinical immunology, and molecular diagnostics and directed research projects.

The department directs an integrated residency program in pathology. Residents are based at Kaiser Hospital, Queen's Medical Center, Kapiolani Medical Center for Women and Children, the Honolulu Medical Examiner Office, and the Blood Bank of Hawai'i. Clinical faculty come from all the community hospitals and provide gross and microscopic specimens for demonstration, clinico-pathologic correlations, seminars, and lectures.

## Pediatrics

K. S. Yamamoto, MD—pediatric rheumatology  
L. G. Yamamoto, MD—emergency medicine  
R. T. Yanagihara, MD—infectious disease  
M. K. Yunghans, MD—pediatrics

**Degree Offered:** MD

### The Academic Program

Pediatrics (PED) is the specialty of medical science concerned with the physical, emotional, and social health of children from birth to young adulthood. The discipline deals with biological, social, and environmental influences on the developing child and with the impact of disease and dysfunction on development.

The Department of Pediatrics offers specialty training for the medical student, as well as post-MD residency training and subspecialty experience. The medical student curriculum consists of the core curriculum for pediatrics completed during the third year of the MD program. A wide variety of electives in different sub-specialties are offered during the fourth year of the MD program in addition to sub-internship opportunities in various clinical disciplines. The Post-MD residency program accommodates eight MDs (yearly) in a three year ACGME-accredited curriculum preparing them for a career in pediatrics or furthering their training in a subspecialty within pediatrics. There is also ACGME-accredited training in Neonatal Perinatal Medicine (Neonatology), which is a three year program following the Pediatric Residency Training and is jointly sponsored by Kapi'olani Medical Center for Women and Children and Tripler Army Medical Center as the clinical training sites.

The Department of Pediatrics is very active in clinical and quality improvement research with majority of the activities being done at Kapi'olani Medical Center for Women and Children.

J. Sugimoto-Matsuda, DrPH—policy  
J. Takeshita, MD—general geriatric and consultation-liaison psychiatry  
S. Williams, MD—general and child and adolescent psychiatry  
M.D. Zuniga, MD—general psychiatry and child and adolescent psychiatry

**Degree Offered:** MD

### The Academic Program

Psychiatry (PSTY) is a branch of medicine that derives its theoretical foundations from the neurosciences, as well as the psychological and social sciences. The investigation of the biological basis of mental illness is one of the most exciting areas of medical research today and is revolutionizing our understanding of mind-body relationships.

The Department of Psychiatry contributes to the overall mission of the School of Medicine by providing leadership in psychiatric training, teaching, research, and services in Hawai'i, Asia, and the Pacific Basin. The department is committed to expanding knowledge within a cross-cultural and bio-psycho-social framework.

Traditional courses have been replaced with the problem-based learning curriculum. Psychiatric issues are addressed throughout the curriculum but are particularly emphasized in the second year during the brain and behavior sub-unit of Unit MD6 and in the third year Psychiatry Clerkship.

**Degrees and Certificate Offered:** BA in public health, MPH, MS in public health, DrPH, PhD in epidemiology, Graduate Certificate in Global Health Protection and Security (GHPS). See the “Interdisciplinary Programs” section for more information on the GHPS program.

## The Academic Program

The mission of the Department of Public Health Sciences is to advance the health of the people of Hawai‘i, the nation, and the Asia-Pacific region through the education and training of public health professionals, innovative research in public health sciences, and service to the community.

The department offers the bachelor of arts (BA) degree in public health; the master of public health (MPH) with specializations in epidemiology, social and behavioral health sciences, Native Hawaiian and Indigenous health, and health policy and management; the master of science (MS) degree with specializations in epidemiology and social and behavioral health sciences; the doctor of public health (DrPH) degree with specialization in community-based and translational research; and the doctor of philosophy (PhD) degree in epidemiology. The department also administers the interdisciplinary graduate certificate program in global health protection and security.

### Advising

Information, applications, and initial advising about degree programs in public health are available from the Office of Graduate Student Academic Services, Biomedical Science D-204, 1960 East-West Road, Honolulu, HI 96822; phone (808) 956-8267; fax (808) 956-9174; email: ogsas@hawaii.edu; website: manoa.hawaii.edu/publichealth/.

## Undergraduate Study

The bachelor of arts (BA) degree in public health is designed to educate undergraduates interested in public health and/or health profession training in the broad basic concepts in public health education, practice, and research. The primary focus of public health education is to improve health and quality of life through the population-based prevention and treatment of disease and other physical and mental health conditions, through surveillance of cases and the promotion of healthy behaviors.

### Admission Requirements

Students applying to UH Mānoa may declare public health as their major upon entry. Requirements for admission are

described in the “Undergraduate Education” section of the *Catalog*.

For current UH Mānoa undergraduate students seeking a concurrent degree in public health, the requirements for admission include the completion of PH 201 Introduction to Public Health with a B- or better, a minimum cumulative GPA of 3.25, meeting with a public health academic advisor, and an approved Concurrent Undergraduate Degree Application.

Current UH Mānoa undergraduate students who wish to change their major to public health must first complete PH 201 Introduction to Public Health with a B- or better and meet with a public health academic advisor before filing a Major Declaration Form.

### Graduation Requirements

1. Meet all UH Mānoa and departmental requirements;
2. Complete the public health curriculum, applied learning experience, and capstone seminar for letter grades;
3. Complete a minimum of 120 semester credit hours;
4. Have a minimum cumulative GPA of 2.0 or higher in order to graduate; and
5. Complete an application for graduation in the semester preceding the award of the degree.

### Course Requirements

A total of 36 major credits (45 credits with public health related courses) are required to graduate with a bachelor’s degree in public health. All students are encouraged to work closely with the undergraduate advising staff in the Office of Public Health Studies in planning their coursework.

#### Public Health Related Courses (9 credits)

- PSY 100 Survey of Psychology (3) (DS)
- MATH 140 Precalculus or higher (3) (FS)
- Statistics, select one: PH 350, ECON 321, EDEP 429, NREM 310 or SOCS 225/PSY 225 (3)

#### Public Health Required Core Courses (24 credits)

- PH 201 Introduction to Public Health (3)
- PH 202 Public Health Issues in Hawai‘i (3)
- PH 203 Seminar in Global Public Health (3)
- PH 310 Introduction to Epidemiology (3)
- PH 341 Public Health Biology and Pathophysiology (3) (DB)
- PH 480 Application of Public Health Principles in Research and Practice (3)
- PH 485 Public Health Applied Learning Experience (3)
- PH 489 Public Health Undergraduate Capstone Seminar (3)

#### Public Health Elective Courses (12 credits)

Visit our website at [manoa.hawaii.edu/publichealth/courses](http://manoa.hawaii.edu/publichealth/courses) for a current list of public health courses. Since public health is by nature interdisciplinary, students will be encouraged to take electives in areas outside of the department. The list of recommended electives offered in other departments to complete the 12 credits of advisor-approved upper division public health electives is available on our website at [manoa.hawaii.edu/publichealth/degrees/undergraduate/non-public-health-electives](http://manoa.hawaii.edu/publichealth/degrees/undergraduate/non-public-health-electives).

Students seeking additional information and advising on our bachelor’s degree program should contact a public health academic advisor at [phadvise@hawaii.edu](mailto:phadvise@hawaii.edu).

## Graduate Study

### Master's Degree

MPH students follow a Plan B (non-thesis) program. MS students follow a Plan A (thesis) degree program.

### MPH Requirements

- minimum of 42 credit hours, 18 or more in courses numbered 600-798
- one graduate seminar
- required and core courses
- other courses as designated by the student's program committee
- field training experience (PH 791)
- final competency assessment

### MS Requirements

- minimum of 31\* credit hours for epidemiology or 36-42 credit hours for social and behavioral health sciences, 18 or more in courses numbered 600-798
- one graduate seminar
- required courses
- 6 credit hours of thesis research (PH 700)
- other courses as designated by the student's thesis committee
- final oral examination conducted by the thesis committee

\*Most students will exceed the 31-credit hour minimum to meet their educational objectives.

## Areas of Specializations

### Epidemiology

Epidemiology is the study of the distributions and determinants of health-related events in human populations. A basic tenet of epidemiology is that diseases are not randomly distributed in the population. Determining the prevalence and risk factors associated with these events, as well as measuring the magnitude of such occurrences, is the basis of public health action. An essential part of this determination involves the utilization of epidemiologic and biostatistical methods to evaluate the effectiveness of disease control measures.

The master's program generally requires two years of combined study and field work but may vary depending on academic background, experience, and academic goals of the student. The curriculum provides both breadth and depth. It instills knowledge and skills in epidemiologic methods, biostatistics, the collection and analysis of epidemiologic data, and the epidemiology of chronic and infectious diseases. Each student will have an academic advisor and committee with whom the student will work closely in scheduling and completing the academic requirements of the program.

Students are required to take advanced level training in chronic and infectious disease epidemiology, advanced biostatistics, and research design. There is opportunity for students to choose from epidemiology electives in the following areas: infectious diseases, nutrition, genetics, environment, aging, HIV/AIDS, cancer, and cardiovascular diseases. Course work in specialized statistical applications is also available. Students participate in on-going epidemiological research programs throughout the UH Mānoa system or community during their fieldwork assignment or thesis research.

The curriculum includes a core of required basic and public health offerings that cover such topics as environmental health, health care delivery and organization, health education, and health behavior. The courses provide background and breadth

in public health. A capstone paper and presentation during the final term integrates the MPH experience. The MS degree follows a similar but more research-oriented curriculum and requires the completion of a thesis.

### Health Policy and Management

Health policy and management (HPM) is a multidisciplinary field of inquiry and practice concerned with the delivery, quality and costs of health care for populations. HPM professionals concern themselves with managerial and policy aspects of the structure, process and outcomes of health services including improving the safety and efficiency of health care, expanding health insurance coverage, eliminating disparities, reducing out-of-pocket costs, financing, organization, accessibility of care, maintaining high quality of services and improving the performance of health systems.

The HPM specialization prepares students for a professional career in health services, policy and management through the provision of knowledge, skills, attitudes and practical experience. Students are taught to contribute to advancing the health of populations by improving the effectiveness and efficiency of personal and health services in public and private health organizations. The development of critical thinking and applied problem-solving skills with a focus on public health challenges and under-served populations is encouraged.

Within the HPM specialization, students may select their electives and practicum with a view to focusing more on policy or management. The practical experiences beyond the coursework are a key component of public health education and HPM's strong ties to leading public health policymakers and practitioners provide students with ample opportunities to apply themselves to actual health policy and management challenges in the US and abroad.

The two-year curriculum includes core public health coursework and the following advanced courses: 1) PH 641 Introduction to Health Policy; 2) PH 660 Current Topics in Community Health; 3) PH 672 Leading and Managing Health Programs; 4) PH 673 Health Ethics, Law and Politics; and 5) PH 677 Global Health Management. MPH students are also required to complete a fieldwork practicum as well as a capstone presentation on a topic relating to health policy and management.

### Native Hawaiian and Indigenous Health

The Native Hawaiian and Indigenous health (NHIH) specialization is designed to provide students with skills and training necessary to serve Indigenous people and assist in addressing their health and wellness needs. Indigenous people throughout the world experience grave health and socioeconomic disparities. Many of the current inequities are the result of historical national and local policies designed to eliminate and/or assimilate Indigenous people. Knowledge of history, policy, health determinants and ethics is essential to address and eliminate the inequities faced by Indigenous people.

The NHIH specialization will prepare students for leadership roles in Indigenous health policy and culturally safe health services. Graduates will better meet the social and cultural needs of Indigenous people, thereby enhancing the quality and effectiveness of those health services and policies. The improved quality and effectiveness of Indigenous health services contributes to the reduction of Indigenous health disparities and the improvement of Indigenous peoples' health.

Students enrolled in this specialization are required to take advanced level training in Indigenous health policy, ethics and research design. There is opportunity for students to choose from Native Hawaiian and Indigenous health electives in many areas across the campus. Students will participate in on-going research programs with Indigenous communities through a practicum assignment.

For MPH students specializing in NHIH, the following coursework is required: 1) Indigenous Seminar; 2) Health Ethics, Law, and Politics; 3) Advanced Native Hawaiian Health Determinants; 4) Indigenous Applied Research Methods; 5) Community Engaged Research and Practice; 6) Indigenous Peoples' Food Systems, Environment & Health; and 7) Integrative Seminar. MPH students are also required to complete a fieldwork practicum and during their final semester, students will prepare a report on their practicum experience, complete a research-intensive final paper, and deliver a public presentation as a demonstration of mastery of program competencies and present their finding in a capstone presentation.

### **Social and Behavioral Health Sciences**

Over the last century, chronic diseases have replaced infectious diseases as the leading causes of death and, despite advances in medicine and technology, health disparities are increasing in almost every country. Unhealthy lifestyle behaviors such as tobacco use, lack of physical activity, poor nutrition, unsafe sexual practices, substance abuse, and overexposure to the sun are major contributors to disability and death. Social factors, such as discrimination, poverty, dangerous living and work environments, and unequal distribution of resources (including health care resources), also affect health status. In the social and behavioral health sciences specialization, students will examine: a) behavioral and social theories in health promotion; b) behavioral, social, environmental, and political interventions that can promote health; and c) skills required for assessing health problems and for planning and evaluating health programs. Course assignments provide students the opportunity to apply knowledge, to practice skills, to enhance computer literacy, and to improve oral and written communications. Opportunities to participate in university-based and community-based research and service programs are provided.

MPH students specializing in social and behavioral health sciences gain knowledge and skills in public health research methods, biostatistics, theories of health behavior change, needs assessment, planning, and evaluation. The first semester focuses on public health core requirements. In subsequent semesters, students take required and elective course work to meet the social and behavioral health sciences competencies, as well as the student's professional goals. A required 240-hour field practicum allows students to apply knowledge and skills in a community public health setting. During the final semester, students complete an integrative seminar, prepare a capstone paper, and deliver a public presentation as a demonstration of mastery of program competencies and integration of classroom knowledge and field experience. A student-selected faculty advisor and program committee guides the student's course of study, practicum experience, and capstone. The MS degree follows a similar but more research-oriented curriculum and requires the completion of a thesis.

### **MPH and MS Requirements**

Applicants will be expected to have the academic background, experience, interests, and commitment for professional training in public health. Applicants must also have computer skills in word processing, spreadsheet construction, and internet applications. Academic preparation for the epidemiology specialization should include one year of coursework in a biological science, chemistry, and at least one semester of calculus. For the HPM specialization, preference may be given to students with training in social science, health, economics, business, or human services. Prior paid or voluntary work experience in the health care or human services fields is preferred, but not required. Academic preparation for the NHIH specialization includes course work in mathematics or statistics, public policy or political sciences, and psychology or sociology. Work or research experience in an applied health/social sciences field which serves an Indigenous population is preferred. Academic preparation for the SBHS specialization includes prior course work in mathematics or statistics, biology, or human development, and sociology or psychology. Experience in an applied health/social sciences field or in health/social sciences research is preferred.

### **Doctoral Degrees**

#### **Doctor of Public Health (DrPH)**

The DrPH program with a specialization in community-based and translational research will prepare students to lead programs and conduct independent investigations addressing public health topics relevant to culturally diverse groups, with a special focus on those in the state of Hawai'i and the Asia-Pacific region. Translational research is the investigation of how to successfully transform scientific discoveries arising from laboratory, clinical, or population studies into community applications to reduce incidence, morbidity, and mortality. Community-based participatory research in health is a collaborative approach to research that equitably involves investigators and members of the community in the research process and recognizes the unique strengths that each brings. This approach increases the likelihood that interventions will be embraced by the community and that the community members will gain knowledge, skills, and other benefits from the research.

#### **DrPH Requirements**

All DrPH students will complete required and elective coursework in health disparities, evidence-based public health, advance policy, leadership, cultural competence, community-based participatory research, and qualitative and quantitative methods. They also complete a qualifying exam, mentor teaching and research practica, a comprehensive exam, and a three-paper dissertation. DrPH students are expected to publish their work in peer-reviewed journals and present at national and international forums.

A few teaching and research assistantships are available for degree candidates. Qualified students may also apply for East-West Center fellowships. Contact Dr. Kathryn Braun (Chair) for additional details at [kbraun@hawaii.edu](mailto:kbraun@hawaii.edu)

#### **Doctor of Philosophy (PhD)**

The PhD in epidemiology is comprised of graduate faculty from the Department of Public Health Sciences; University of Hawai'i Cancer Center; Department of Tropical Medicine, Medical Microbiology, and Pharmacology; Department of

Microbiology; and the Pacific Biosciences Research Center. Candidates who successfully complete this program will be able to teach in academic and other settings, conduct independent and collaborative epidemiologic research, and provide consultative services to academic, not-for-profit, governmental, and private organizations.

Although applicants to this program are not required to have a master's degree in epidemiology or a closely related field, all applicants are expected to have a strong background in the natural and/or social sciences. Because we look for applicants who are committed to epidemiologic research and practice, past research and related work experience are important factors in selecting candidates. We encourage applications from candidates who have well-focused research interests and career goals. The Graduate Record Examination (General Test) and three letters of recommendation are required for application. Applicants must also include a written statement with the application indicating why they want to pursue a doctoral degree in epidemiology and why they want to pursue this degree here at UH Mānoa.

### PhD Requirements

A prospective applicant is expected to communicate with one of our graduate faculty members in his or her area of interest or with the program's chair and to be accepted as an applicant by a faculty member prior to admission. The faculty member involved will serve as an interim advisor upon the individual's admission into the PhD program. A listing of the PhD in epidemiology faculty is available at [manoa.hawaii.edu/publichealth/faculty-and-staff](http://manoa.hawaii.edu/publichealth/faculty-and-staff). All candidates take a qualifying examination upon completion of all required courses in epidemiology and biostatistics and core courses in infectious diseases and chronic disease epidemiology (usually after their first year of enrollment). This is followed by elective courses in the candidate's area(s) of interest, a teaching practicum, an oral comprehensive examination, and dissertation research. Candidates should refer to the *Catalog* for procedural and substantive details.

A few teaching and research assistantships are available for degree candidates. Qualified students may also apply for East-West Center fellowships. Contact Dr. Eric Hurwitz (Chair), at [ehurwitz@hawaii.edu](mailto:ehurwitz@hawaii.edu) for additional details.

### Honors and Awards

Joseph E. Alicata Award in Public Health  
 Elmer J. Anderson Professional Travel Award  
 Chin Sik Chung Memorial Award  
 Abraham Kagan, MD Endowed Fellowship  
 Koseki Award for Excellence in Community Service  
 Frances Ayako Matsuda Sano Fellowship in Public Health  
 Pauline Stitt Outstanding Student Award  
 Robert M. Worth Epidemiology Scholarship

 S. G. Smith, MD—orthopedic surgery, sports medicine  
 G. A. Soares, MD—emergency medicine  
 D. M. Takanishi, Jr., MD—general surgery, surgical oncology, surgical critical care  
 L. L. Wong, MD—transplant surgery, general surgery  
 W. J. Yarbrough, MD—urology  
 M. Yu, MD—general surgery, surgical critical care, trauma surgery

**Degree Offered:** MD

### The Academic Program

Surgery emphasizes the use of interventional techniques to treat injury and disease. The educational program encompasses the pathology, pathophysiology, diagnosis, treatment, and perioperative management of surgical disease and trauma.

The department provides instruction to medical students in all surgical disciplines, as well as the related fields of anesthesiology, radiology, and emergency medicine. It directs general surgical and orthopedic residency programs, as well as a surgical critical care fellowship. Research and continuing medical education programs are provided.

## Faculty

- \*V. R. Nerurkar, PhD (Chair)—pathogenesis of infectious diseases, delineating cellular and molecular mechanisms underlying microbe-host interaction
- \*J. Barbour, PhD—HIV immunology
- \*S. P. Chang, PhD—immunology, molecular biology, molecular approaches to vaccine development
- \*J. J. Chen, PhD—biostatistics
- \*W. L. Gosnell, PhD—host parasite interactions, malaria, immunology
- S. H. Gu, PhD—hantavirus phylogenetics
- \*V. Hinshaw, PhD—influenza virus ecology
- \*G. S. N. Hui, PhD—parasitology, immunology, cell biology
- \*P. H. Kaufusi, PhD—pathogenesis of West Nile virus
- J. F. Kelley, PhD—dengue virus pathogenesis
- \*K. J. Kramer, PhD—parasitology, epidemiology, leptospirosis, HIV serodiagnosis
- M. Kumar, PhD—virus host interaction
- \*F. Mercier, PhD—mechanisms controlling neural stem cell proliferation and differentiation in the adult brain
- \*F. D. Miller, PhD—epidemiology of infectious diseases
- \*L. Ndhlovu, MD, PhD—HIV immunology
- B. Shiramizu, MD—pathology of HIV-associated disorders
- \*D. W. Taylor, PhD—immunology of malaria in pregnant women and newborns
- A. Tuanyok, PhD—bacteriology, microbial genetics and genomics
- \*S. Verma, PhD—molecular, biochemical aspects of viral diseases
- P. Walpita, PhD—paramyxoviruses, virus-like particles, vaccines
- \*W.-K. Wang, DSc—pathogenesis of arboviral and zoonotic viruses
- \*A. Yanagihara, PhD—biochemistry of cubozoan venom

## Cooperating Graduate Faculty

- J. M. Berestecky, PhD—enteric bacteria
- L. Chang, MD—application of advanced neuroimaging techniques to study brain changes associated with HIV, substance abuse, brain development and aging
- G. Erdem, MD—molecular epidemiology of group A streptococcal and staphylococcal infections; complications of strep infections like acute rheumatic fever
- Y. Lu, PhD—gene therapy for HIV-1 infection, gene transfer approaches for neuroAIDS, immunodiagnosis of herpesvirus infection of green turtles, aquaculture virology
- M. E. Melish, MD—staphylococcal infection and toxins, clinical infectious disease, Kawasaki syndrome
- E. K. Tam, MD—inflammation, immunologic mechanisms of pulmonary diseases, genetic and environmental determinants of asthma
- R. Yanagihara, MD—transdisciplinary investigations of emerging and re-emerging infectious diseases, use of infectious agents as biological markers to trace ancient and recent movements of human populations

## Adjunct Faculty

- V. E. Ansdell, MD—tropical and infectious diseases and clinical microbiology
- M. J. Bankowski, PhD—clinical and molecular microbiology and infectious disease
- S. N. Bennett, PhD—molecular evolution and epidemiology of emerging infectious diseases
- A. Imrie, PhD—dengue immunology and epidemiology
- A. T. Lehrer, PhD—filovirus, immunology and vaccinology
- M. M. Lieberman, PhD—arbovirus and vaccinology

## Affiliate Graduate Faculty

- A. C. Collier, PhD—drug metabolism and pharmacokinetics using in vivo, in vitro and in silico approaches, reproductive pharmacology
- K. L. Palmer, PhD—global public health and tropical diseases

**Degrees Offered:** MS in biomedical sciences (tropical medicine), PhD in biomedical sciences (tropical medicine)

## The Academic Program

Tropical medicine is the study of diseases that occur more commonly in the tropical regions of the world. However, in today's era of globalization and modern transportation, diseases that were once confined to the tropics have spread geographically and played a significant role in the 20<sup>th</sup> century global resurgence of infectious diseases. As such, research in the area of tropical medicine and medical microbiology has greatly increased in importance in the past 20 years. Tropical medicine faculty conduct studies on infectious organisms and the diseases they cause, including dengue, West Nile, AIDS, hepatitis, viral and bacterial encephalitis, malaria, tuberculosis, and Kawasaki disease. The faculty employs a multidisciplinary approach, including immunology, pathogenesis, ecology, epidemiology, diagnosis, prevention, control, treatment, socio-ecological systems, human ecology, microbial and vector ecology, environmental change, and participatory action research to answer fundamental questions associated with the pathogenesis of these diseases. These studies can be laboratory-based, field-based, clinical-based, or include a combination of all three. The field of tropical medicine requires knowledge of virology, bacteriology, parasitology, entomology, immunology, cell and molecular biology, epidemiology, ecology, behavioral science, and clinical medicine.

Pharmacology is a medical science concerned with the effects of drugs and chemicals on living organisms. The subject embraces knowledge of the chemistry, actions, absorption, fate, excretion, and uses of drugs. Traditionally, the greatest interests in drugs have been with the health professions. Today, however, knowledge of pharmacology and the allied field of toxicology are relevant to all segments of society.

## Graduate Study

The department offers courses for undergraduate, medical, and graduate students. Faculty participate in the MD program by providing tutorial and elective courses in medical microbiology, clinical immunology, molecular biology, pharmacology, and clinical aspects of tropical medicine and pharmacology. Electives for medical students are team taught and coordinated with unit objectives throughout the problem-based learning curriculum. In addition, the department plays an important role in the Basic Science Foundation course, and participates in the Pathology Residency Program by offering

rotations in selected aspects of medical virology, parasitology, and bacteriology.

### **Master's Degree**

Graduates with a master's degree in tropical medicine have gone on to careers in science education at the secondary and college level, technical and research positions in universities, government agencies, and biotechnology companies, or have continued on in PhD and MD training programs at other universities.

### **Requirements**

The MS degree requires 21 credits of course work, nine credits of thesis research, completion of a thesis, and a final oral examination. A general examination, oral or written, is required before a student is advanced to candidacy for the MS (Plan A) degree. Although not encouraged, in very unusual circumstances, a non-thesis MS (Plan B) may be allowed. This program requires 30 credits of course work, a written examination, and participation in a research project.

### **Doctoral Degree**

Graduates with a PhD degree have pursued professional research, teaching, and administrative careers at various academic institutions, state and federal government agencies, international health agencies, and biotechnology companies.

### **Requirements**

The tropical medicine PhD program requires course work as determined necessary by the student's advisory committee, a qualifying examination, comprehensive examination, drafting a written research proposal, dissertation, and final oral examination/defense of dissertation. Students are encouraged to take course work covering a broad array of the disciplines involved in the field of tropical medicine, including coursework offered by other academic departments as relevant to their area of concentration.

## **Faculty**

Department faculty conduct active research in the following areas:

- virology and epidemiology of dengue, West Nile, and other flaviviruses
- diagnostic assays for flaviviruses
- hantavirus virology and epidemiology
- lentiviruses and polyomaviruses
- epidemiology and pathogenesis of hepatitis-associated viruses
- pathobiology and immunology of HIV and other retroviruses
- molecular epidemiology and evolution of viruses
- vaccines against paramyxoviruses using virus-like particles
- evaluation of hepatitis B infection and vaccination programs
- molecular and clinical epidemiology of streptococcal and staphylococcal infections
- malaria immunology and vaccine development
- malaria in pregnancy, maternal, and childhood immunity to malaria
- reproductive and developmental pharmacology
- emerging and re-emerging infectious diseases

Collaboration with infectious disease clinicians and international research institutes further expand research opportunities in the areas of HIV, Kawasaki disease, malaria, asthma, dengue, arboviruses, and zoonotic viruses. Research projects take place within the research laboratories in the department and at field sites in Africa, Asia, and the Pacific.

Pharmacology research within the department focuses on drug metabolism and pharmacokinetics. Research into developmental pharmacology in pregnancy and pediatric medicine is also a strong theme. The newly established human organ bank, in partnership with Organ Donor Center of Hawai'i, is a central part of our translational research effort and provides tissues to researchers throughout the UH Mānoa and JABSOM campuses.

A major goal of the department is to provide Asian and Pacific countries the expertise needed to expand laboratory and epidemiologic capacity in tropical infectious diseases research. The department also has active research programs with several community hospitals and collaborates closely with the State of Hawai'i Department of Health, providing instruction and expertise in bioterrorism preparedness and diagnosis of infectious diseases using the latest technology

# School of Nursing and Dental Hygiene

## Administration

Webster 402  
2528 McCarthy Mall  
Honolulu, HI 96822  
Tel: (808) 956-8522  
Fax: (808) 956-3257  
Web: [www.nursing.hawaii.edu](http://www.nursing.hawaii.edu)

Dean: Mary G. Boland  
Associate Dean for Academic Affairs: Scott R. Ziehm

## General Information

The School of Nursing and Dental Hygiene (SONDH) offers programs to prepare students for careers in nursing and dental hygiene primarily for the state of Hawai'i and the Pacific Basin. The program admits students both directly from high school and after completion of nursing pre-requisites and UH Mānoa General Education Core requirements.

The Department of Nursing offers programs leading to the bachelor of science, master of science, DNP, PhD nursing degrees, and a Post-Master's Certificate in Nursing.

The Department of Dental Hygiene offers the bachelor of science degree. The program admits students following completion of dental hygiene prerequisite courses and UH Mānoa General Education Core requirements.

## Vision

The leader in nursing and dental hygiene education and research in Hawai'i with outreach to Asia and the Pacific Basin.

## Mission

The School of Nursing and Dental Hygiene mission is to provide an innovative, caring, and multicultural environment in which faculty, students, and staff work together to generate and transmit knowledge, wisdom, and values to promote quality of life and health for present and future generations. To better reflect Hawai'i's unique cultural diversity and heritage, the SONDH is committed to increasing Native Hawaiian and other under-served people in all nursing and dental hygiene programs.

W. A. Wakai, RDH, DMD—head and neck anatomy  
L. Yamada, DDS, MEd—periodontology

**Degree Offered:** BS in dental hygiene

## The Academic Program

The Department of Dental Hygiene admits students to the bachelor of science in dental hygiene program following completion of a minimum of 29 semester credit hours of prerequisite and the majority of general education courses.

The program at UH Mānoa offers the only baccalaureate dental hygiene educational program in the state. It offers the preparation required by dental hygienists to provide oral health care and education to the people of Hawai'i, the continental U.S., and the Pacific-Asia region.

Students completing the bachelor of science in dental hygiene qualify for admission to the national and regional dental hygiene examinations for licensure to practice dental hygiene in private, public health, and other dental hygiene settings.

The bachelor of science in dental hygiene provides opportunities for students to continue their education. It offers profes-

sional training to broaden and deepen knowledge and skills, as well as provides a foundation for personal and professional development and opportunities for admission to graduate work.

The school is in discussion with the UH West Oahu campus to transfer the program in Dental Hygiene at a future date. Please check our website regularly to stay updated on the planning process and timeline for the transfer.

### **Accreditation**

The dental hygiene program is accredited by the Commission on Dental Accreditation, American Dental Association.

Each program accredited by the Commission on Dental Accreditation must post the Notice of Opportunity and Procedure to File Complaints with the Commission on Dental Accreditation. A copy of the appropriate accreditation standards and/or the Commission's policy and procedures for submission of complaints may be obtained by contacting the Commission at:

211 East Chicago Avenue  
Chicago, Illinois 60611  
Tel: 1 (800) 621-8099, ext. 4653

### **Advising**

Department of Dental Hygiene  
Hemenway Hall 200-B  
Honolulu, HI 96822  
Tel: (808) 956-8821

Academic advising is provided by faculty of the Department of Dental Hygiene. Potential applicants as well as students in need of advising should call for appointments.

### **Graduation**

All enrolled dental hygiene students are advised to meet with a faculty advisor regarding their progress toward their degree to ensure that all requirements are met at least two semesters before the scheduled graduation date.

An application for graduation must be submitted with a degree fee to the Cashier's Office, QLCSS Room 001. This should be processed during the first three weeks of the semester the student intends to graduate.

## **Honors and Awards**

### **Dental Hygiene Faculty Award**

An outstanding dental hygiene student who has maintained high scholarship and made contributions to the department is recognized by the faculty of the Department of Dental Hygiene at graduation.

### **Sigma Phi Alpha**

Alpha Kappa Chapter of Sigma Phi Alpha is the national dental hygiene honor society at UH Mānoa. Senior dental hygiene students who rank high in scholarship and character and exhibit potential qualities for future growth are recommended by faculty members for election to membership.

## **Undergraduate Study**

### **Admission Requirements**

To qualify for admission to the Dental Hygiene Program, applicants must complete the following requirements:

1. Admission to UH Mānoa
2. Minimum cumulative GPA of 2.5; inclusion of prerequisite science courses GPA

3. Prerequisite courses or equivalents: PHYL 103/103L; BIOC 241; MICR 130/140L; FSHN 185; COMG 151; ENG 100; SOC 100; PSY 100
4. Near completion of general education courses required for UH Mānoa graduation
5. Recommend completion of PHRM 203; PSY 225 (or equivalent)
6. Interview

There is a path for those students interested in completing a baccalaureate degree, who have graduated from an associate degree or certificate program. To qualify, the applicant must complete the following requirements:

1. Admission to UH Mānoa
2. Minimum cumulative GPA of 2.5; inclusion of pre-requisite science courses GPA
3. Minimum DH GPA of 3.0
4. Passed the National Board Dental Hygiene Examination
5. Completion of courses equivalent to: DH 361, DH 370, DH 389, DH 390/391
6. Near completion of UH Mānoa general education courses
7. Interview
8. Certified in the administration of intra-oral anesthesia (including regional blocks)

### **Application Period**

December 1 through **February 1** for the upcoming fall semester. Students are admitted only during the fall semester.

Transfer applicants from other universities and colleges/schools must complete the UH System Application form and submit the form to UH Mānoa Office of Admissions. Students enrolled as classified day students at UH Mānoa during the semester immediately preceding the semester of desired entry must complete the Curriculum Transfer Request and the Department of Dental Hygiene application forms.

Applicants must submit transcripts, if applicable, and photocopy of grades if enrolled in courses at any community college or other university during the semester immediately preceding the semester of entry to the program.

### **Health Certification and Other Requirements**

Prior to enrollment, accepted students must provide evidence of sound health and meet other requirements as follows:

1. CPR Certification (BLS for Healthcare Providers Course);
2. TB Clearance (Department approved);
3. Immunizations for Polio, Tetanus/Diphtheria/Pertussis (Tdap) and annual Flu vaccine;
4. Laboratory evidence (positive titer) of immunity to Hepatitis B, Mumps, Rubeola (Measles), Rubella (German Measles) and Varicella (Chicken Pox);
5. Health insurance; and
6. Malpractice insurance of \$1 million per incident/\$3 million aggregate

All requirements must be cleared before registration by presenting photocopies of CPR certification, health insurance policy (card), titer results, Health Clearance Form (vaccination record), and TB clearance to the Department of Dental Hygiene. Students with prerequisite deficiencies may not register for or attend laboratory or clinical classes.

Students must take a tuberculosis screen test or chest x-ray as required. Dental hygiene students who have not taken a TB

skin test within the last year must take the two-step TB test. CPR certification must be current.

Students are required to have health insurance. Student medical insurance plan information may be obtained through the University Health Services at (808) 956-8965.

Students enrolled in dental hygiene clinical courses have the potential for exposure to communicable diseases and may sustain injuries in the clinical setting. Limited emergency care will be rendered onsite. Students are financially liable for all care received, including emergency room charges.

**Note:** All certifications and requirements must be kept current for the duration of program enrollment.

### Financial Consideration

Significant costs (e.g., professional education fee; purchase of instruments, supplies, uniforms, and books; examination fees, etc.) not related to tuition and housing are associated with dental hygiene education. The additional cost over a period of three years in the dental hygiene program is approximately \$14,000. Dental Hygiene students must also enroll in one to two courses at UH-West Oahu. Students are encouraged to make appropriate financial arrangements.

**Note:** School of Nursing and Dental Hygiene students pay a higher fee at registration.

### Varied Schedules

Dental hygiene students are expected to participate in clinical experiences at various scheduled times. Therefore, students must make time and arrangements to accommodate a modified daily schedule.

### Continued Registration

The minimum academic requirements of UH Mānoa apply to all dental hygiene students. In addition, students must maintain a minimum GPA of 2.0 for all registered credit hours in dental hygiene courses to continue registration in the dental hygiene program.

### BS in Dental Hygiene

Students must complete the following:

- General Education Core requirements (see the “Undergraduate General Education Requirements” section in the *Catalog*)
- Pre-major requirements
- Dental Hygiene major requirements
- Other major requirements and electives

### General Education Core Requirements

- See the *Catalog*

### Pre-Major Requirements

- BIOC 241 Fundamentals of Biochemistry (3)
- COMG 151 Personal and Public Speech (3)
- ENG 100 Composition I (3)
- FSHN 185 The Science of Human Nutrition (3)
- MICR 130 General Microbiology (3) and MICR 140L Microbiology Laboratory (2)
- PHYL 103/103L Human Physiology and Anatomy/Physiology and Anatomy Lab (5/1)
- PSY 100 Survey of Psychology (3)
- SOC 100 Introduction to Sociology (3)

### Major Requirements

- DH 231 Oral Anatomy and Tooth Morphology (2)
- DH 231L Oral Anatomy and Tooth Morphology Lab (2)
- DH 238 Basic Dental Hygiene I (2)
- DH 238L Basic Dental Hygiene I Lab (1)
- DH 239L Basic Dental Hygiene I Lab (1)
- DH 240 Basic Dental Hygiene II (2)

## Faculty

\*M. Boland, DrPH (Dean)—nursing workforce, health policy  
S. Ziehm, DNP (Associate Dean for Academic Affairs)—psychiatric mental health, academic program evaluation  
\*C. Ceria-Ulep, PhD (Department Chair)—adult health, administration  
\*M. Shannon, PhD (Graduate Chair)—family nurse practitioner, certified nurse midwife, women's health, HIV/AIDS, vulnerable populations, stress and aging  
C. Albright, PhD—cancer prevention and control, obesity control  
S. Alzamora, MSN—medical/surgical nursing, critical care  
E. Ben-Sefer, PhD—maternal child  
L. Blue, MSN—maternal child health, mental health  
L. Boehm, PhD(c), MSN—medical/surgical, mental health, critical care  
N. Braginsky, PhD—family nurse practitioner  
M. Bray, MSN—APHN, public health, critical care  
P. Brooks, MS—international health, family health  
\*J. Casken, PhD—administration, public health  
P. Clements, MS—medical/surgical nursing  
\*E. Codier, PhD—adult health, emotional intelligence in nursing  
C. Constantin, PhD—maternal child health, genetics  
C. Delnat, MSN—nursing education, critical care  
M. Deutsch, MS—maternal-child health, quality management  
L. Dubbs, MSN—nursing administration  
B. Friedman, RN, MBA—FNP, APHN, public health  
P. Gandall-Yamamoto, MS—family nurse practitioner  
C. Gazmen, MS—adult health, clinical nurse specialist  
P. Gendreau, MS—medical/surgical nursing  
G. Glauberman, MSN—APHN, disaster preparedness  
K. Green, MS—maternal-child health  
C. Greywolf, DNP, MSN—geriatrics, mental health, critical care  
M. Guerriero, MSN—mental health  
F. Hale, MS—maternal-child health, nursing education, psychiatric mental health  
M. Hall-Moriyasu, MSN—oncology, critical care  
V. Hanashiro, PhD—medical/surgical, geriatrics  
\*A. Hanberg, PhD—simulation learning  
M. Hayashi, MS—medical/surgical nursing, maternal-child health  
T. Higa, MS—adult health  
L. Hildebrandt, MSN—medical/surgical nursing  
H. Ho, MSN—maternal child health, medical/surgical nursing  
D. Ing, MSN—pediatric nurse practitioner  
\*J. Itano, PhD—oncology/nursing education  
R. Jarman, PhD—higher education administration and student services  
S. Jensen, MSN—medical/surgical nursing, critical care  
S. Kam, MSN—medical/surgical nursing  
\*M. Kataoka-Yahiro, DrPH—parent-child, family caregiving  
C. Kawamura, MSN—medical/surgical nursing, critical care  
M. Koury, PhD—educational planning and management  
\*S. LeVasseur, PhD—PhD Director  
\*C. Linhares, PhD—maternal child health, certified midwife  
\*D. Mark, PhD—evidenced-base practice, critical care  
S. Marshall, MS—oncology, administration

K. Matsuyama, MS—adult health  
J. McDonald, MS—medical/surgical nursing  
N. McGuckin, MPH—community health, administration  
G. Mikkalson, MSN—nurse midwife, women's health  
\*J. Miller, EdD—maternal child health  
S. Miller, MS—pediatrics  
N. Minton, MA—cultural enrichment, clinical psychology  
J. Misola, PhD—adult health, nursing administration  
\*J. Mobley, PhD—statistics, psychology  
P. Morrison, MS, RN—adult health, nursing education  
S. Murray, MS—clinical nurse specialist  
M. Napihaa, MS—pediatrics  
A. Neves, MS—psychiatric mental health  
J. Niemczura, MSN—adult health  
J. Nishikawa, DNP—family nurse practitioner  
T. Parsons, MS—nursing administration  
\*K. Qureshi DNSc—emergency nursing, disaster preparedness, community health  
J. Range, MSN—adult health  
N. Reeves, MSN—medical/surgical nursing, critical care  
\*K. Richardson, PhD—maternal-child  
V. Saunders, MSN—gerontological nurse practitioner  
\*J. Shoultz, DrPH—community health, adult health  
S. Sinclair, PhD—pediatrics  
\*K. Sullivan, PhD—psychiatric mental health  
\*A. Sy, DrPH—public health  
\*K. Tessier, PhD—pediatrics  
C. E. Thompson, MS—adult health  
\*A. Tse, PhD—pediatrics  
K. Unrau, MSN—medical/surgical nursing, pediatrics, critical care  
\*J. Uyehara, MSN—maternal health  
R. Wada, MD—pediatric hematology, oncology  
\*C. Wang, PhD—adult health  
\*L. Wong, PhD—adult health

## Emeritus Faculty

J. Inouye, PhD—psychiatric mental health, psychology  
B. Kooker, DrPH—nursing administration  
J. Lum, PhD—pediatrics  
L. Magnussen, EdD—maternal child  
R. Ryburn, DrPH—pediatrics, complementary care

## Clinical Faculty

The SONDH includes more than 175 clinical adjunct nursing faculty appointees with a wide range of expertise from a variety of fields. To see a complete list, please visit the school's website at: [www.nursing.hawaii.edu/adjunct-clinical-faculty.html](http://www.nursing.hawaii.edu/adjunct-clinical-faculty.html).

**Degrees and Certificate Offered:** BS in nursing, MS in nursing, DNP, PhD in nursing and Post-Master's Certificate in nursing

## The Academic Program

The Department of Nursing's undergraduate program provides five bachelor of science degree pathways;

- High School Direct Entry into Nursing (HS-DEN) Program. Application Deadline: **January 2** (Fall admission only)
- Executive RN to Bachelor of Science (BS) in Nursing. Application Deadline: **January 5** (Fall Admission only)
- RN to Bachelor of Science (BS) in Nursing. Application Deadline: Fall **January 5**, Spring **July 1**

- Hawaii Statewide Nursing Consortium (HSNC) Bachelor of Science (BS) in Nursing. Application Deadline: Fall **January 5**, Spring **September 1**
- Hawaii Statewide Nursing Consortium (HSNC) Bachelor of Science (BS) in Nursing, ADN Graduates from Consortium (Kapiolani, Kaua'i, and Maui). Application Deadline: Fall **January 5** (Kapiolani, Kaua'i, and Maui), Spring **July 1** (Kapiolani only)

The master of science (MS) in nursing degree program prepares the student for advanced practice as a nurse practitioner in family and adult-gerontology; clinical nurse specialist in adult health; nursing executive leadership; and advanced public health. A Masters Entry Program in Nursing (MEPN) admits students with bachelors degrees in non-nursing areas. The master's program provides the foundation for doctoral study.

The Department of Nursing offers the Post-Master's Certificate for nurses who already have a master's degree in nursing but wish to acquire expertise in another specialty.

The Doctor of Nursing Practice (DNP) program is designed as a professional (practice) doctorate integrating evidence-based practice, quality improvement, and systems leadership to prepare experts in specialized advanced nursing practice.

The PhD in nursing prepares nursing scholars with particular strength in culturally appropriate clinical research aimed at improving the health of people in diverse societies and to teach in nursing education programs, especially those with minority student populations.

### **Distance Education**

A variety of technologies are used in distance education including videoconferencing, HITS, web-based methods, or a combination of technologies. The DNP and PhD degree programs are offered online (web-based) with face-to-face intensive sessions once a year.

For further information, contact the school's Office of Student Services at (808) 956-8939 or nursing@hawaii.edu. All policies and procedures that apply to UH Mānoa students apply to students enrolled in distance learning opportunities.

### **Student and Faculty Awards**

Each graduating class recognizes an outstanding faculty educator and graduating students who have made significant contributions in service, research, leadership, and professionalism. Academic excellence is also recognized by an award to the student with the highest grade point average.

### **Accreditation**

The nursing programs are accredited by the Hawai'i State Board of Nursing, and the Commission on Collegiate Nursing Education<sup>1</sup>.

<sup>1</sup> Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC, 20036-1120, phone: (202) 887-6791

### **Criminal Background Checks And Drug Testing**

Hospitals and other clinical agencies require a criminal background check and drug testing of students in order to meet their hospital accreditation (JCAHO) requirements. The Department of Nursing will not be collecting this information. It is the student's responsibility to provide this information to the clinical facilities, if requested.

The following statement has been issued by the UH Legal Council:

"It is the responsibility of the student to satisfactorily complete affiliated hospital background checks and drug testing requirements in accordance with procedures and timelines as prescribed by the affiliated hospital. Nursing students are required to complete UH prescribed academic requirements that involve clinical practice in a UH-affiliated hospital setting with no substitution allowable. Failure of a student to complete the prescribed UH nursing clinical practice in a UH-affiliated hospital shall be deemed as not satisfying nursing academic program requirements."

If the requirements set forth by the hospital are not met by the individual student, the university is not responsible to provide a substitute clinical facility or clinical experience. Therefore, refusal of a hospital or clinical facility to allow a student in their clinical facility due to negative information will result in the student not being allowed to continue in the nursing program.

## **Undergraduate Study**

### **Advising**

Office of Student Services  
Webster 201  
Honolulu, HI 96822  
Tel: (808) 956-8939  
Email: nursing@hawaii.edu

Potential applicants are highly encouraged to review the program documents posted on our website. Pre-advising is available at both the graduate and undergraduate level for information on application procedures, program description, and degree requirement completion.

### **Preparation for Graduation**

Students are advised to check with the academic advisor to make sure that all requirements are met at least two semesters before the scheduled graduation date.

An application for graduation form is completed and signed by the student and the advisor. The advisor submits the signed Application for Degree form to the UH Mānoa Office of the Registrar by the third week of the graduation semester. Then the student goes on-line to their MyUH portal account to pay the graduation fee.

### **Diplomas**

Diplomas for graduate and undergraduate students can be obtained from the Office of the Registrar, Queen Lili'uokalani Center for Student Services, Room 010, 10 weeks after graduation. A request to mail the diploma may be filed at the Office of the Registrar.

### **National Council Licensure Examination (NCLEX-RN)**

Upon graduation from the bachelor of science program, the school certifies and submits the names of graduating students to the Hawai'i Board of Nursing, which qualifies them to take the NCLEX-RN exam. The school's Office of Student Services is available to assist with the application process. Application forms are available at [www.state.hi.us/dcca/pvl](http://www.state.hi.us/dcca/pvl). There are no specific filing deadlines.

Students who wish to take nursing licensing boards in another state must contact that state's board of nursing directly. Addresses of state boards of nursing are available from the Na-

tional Council of State Boards of Nursing via the web at [www.ncsbn.org/contactbon.htm](http://www.ncsbn.org/contactbon.htm).

### **Student Organizations**

For career and leadership development, it is important for students to become active in student and professional organizations. There are several student organizations at UH Mānoa.

#### **Student Nurses Organization**

All undergraduate nursing students can participate in the Student Nurses Organization (SNO). The organization provides an opportunity for students to develop professional identity and leadership skills. Students express their interests and opinions in an open forum. This student organization makes recommendations regarding policies to the various committees within the School of Nursing and Dental Hygiene. The Student Nurses Organization is responsible for the coordination of various activities for nursing students. It also offers an opportunity for students to socialize with each other and create mentoring relationships.

#### **National Student Nurses' Association**

The National Student Nurses' Association (NSNA) acts as the voice of nursing students on the national level. NSNA contributes to nursing education in order to provide the highest-quality health care. It helps nursing students keep in touch with fundamental and current professional interests and become active, responsible, and professional nurses. NSNA is part of the American Nurses' Association; the Hawai'i Student Nurses' Association is the local chapter of the NSNA.

#### **Sigma Theta Tau**

Sigma Theta Tau is the international honor society in nursing that promotes excellence in academic scholarship, research, and clinical nursing. Students must be nominated to become a member. The Gamma Psi Chapter is the UH Mānoa chapter of the honor society.

### **High School Direct Entry into Nursing Program (HS-DEN)**

This Baccalaureate Nursing program pathway is designed for high achieving Hawai'i high school graduates and provides an opportunity for admission into the nursing program directly after graduation. The program includes 1 year of pre-nursing coursework followed by 3 years of nursing specific and gradu-

ation requirements. Students who complete the degree are eligible to take the RN licensure examination (NCLEX-RN).

During their first year, students will join an intensive learning community designed for the HS-DEN program. This will ensure proper registration and will provide the opportunity to network with current nursing students and department and the nursing community.

Upon successful completion of the first year course work, students will begin taking the required nursing courses (as detailed under Hawai'i Statewide Nursing Consortium (HSNC) BS in Nursing Curriculum) along with remaining general education graduation requirements.

### **Admission Requirements**

The program admits Hawai'i high school students who are eligible for admission to UH Mānoa in addition to meeting the UH Mānoa Nursing requirements noted below.

1. SAT: Critical Reading 550 and Math 550 or ACT: Reading 24 and Math 24
2. High School Grade Point Average (GPA): 3.0 cumulative GPA at the end of the junior year in high school.

### **Application Procedures**

Submit a completed UH System application for UH Mānoa campus and declare NURSING as your major. Submit a Department of Nursing application (available on the SONDH website). For more information, please visit the SONDH website at [www.nursing.hawaii.edu](http://www.nursing.hawaii.edu).

### **Application Deadlines**

Application deadline for the High School Direct Entry into Nursing program is **January 2** for fall semester. The UH System application must be complete and received by the Office of Student Services no later than the deadline. It is highly recommended that the UH System Application be submitted 4-6 weeks prior to the SONDH deadline in order to allow ample processing time in the Office of Admission. Applications received after the deadline will not be accepted.

### **Bachelor's Degree**

The bachelor of science in nursing degree prepares beginning-level generalist professional nurses to deliver care to individuals in a variety of health-care settings, meet the state requirements for eligibility to take the National Council Licensure Examination-Registered Nurse (NCLEX-RN), and obtain a sound basis for graduate study in nursing.

Pre-nursing students enroll in prerequisite and General Education requirements. Completion of these requirements provides the foundation for professional nursing requirements. After satisfactory completion of the pre-nursing requirements, students are eligible for admission to the Department of Nursing. Upon admission to the School of Nursing and Dental Hygiene, students register for the professional nursing courses, which focus on both the theoretical and practical dimensions of professional nursing.

To qualify for a BS in nursing, all undergraduate students must complete curriculum requirements with a grade of C (not C-) or higher and a minimum cumulative GPA of 2.0. All students must also complete the UH Mānoa General Education requirements as noted in the *Catalog*.

Applicants are strongly advised to attend an informational session at the School of Nursing and Dental Hygiene before

submitting an application to the program. For more information, please visit the SONDH website at [www.nursing.hawaii.edu](http://www.nursing.hawaii.edu).

## Admission Requirements

To qualify for admission to the Department of Nursing, applicants must complete the following pre-nursing requirements by the established deadlines:

1. Classified status at UH Mānoa for the application term (unclassified, graduating, new, returning, and transfer students must complete the UH System Application);
2. Department of Nursing application (available on the SONDH website);
3. Minimum cumulative GPA of 2.5 or better;
4. Minimum grade of C (not C-) in the following prerequisite courses<sup>\*\*</sup>:  
1 FW course,\* 1 FS course,\* 1 FG course,\* 2 DS courses\* from different departments, 1 DP course,\* PHYL 141/141L, PHYL 142/142L, MICR 130.
5. For Pre-Admission Exam requirements, see the website at [www.nursing.hawaii.edu](http://www.nursing.hawaii.edu).

<sup>\*</sup>Designated by UH Mānoa as General Education courses. These may be found in the "Undergraduate General Education Requirements" section of this *Catalog*. Students already holding degrees or certificates are not exempt from these requirements.

<sup>\*\*</sup>16 credits of prerequisites credits must be satisfactorily completed at the time of application, of which MUST include 1 PHYL lecture/lab and 1 other science lecture course (i.e., \*DP course or MICR 130). Applicants must have completed or are currently enrolled in all remaining prerequisites at the time of application to be considered.

## Application Procedures

Submit a completed UH System application for UH Mānoa or be a continuing classified student at UH Mānoa. Submit a Department of Nursing application (available on the SONDH website), copy of your exam scores, and transcripts or unofficial student schedule (non-UH applicants only) demonstrating current registration in any outstanding prerequisite courses. For more information, please visit the SONDH website at [www.nursing.hawaii.edu](http://www.nursing.hawaii.edu).

## Application Deadlines

Fall admission deadline: **January 5**. Spring admission deadline: **September 1**. All documents, including the UH System application, must be received by the Office of Student Services no later than the deadline. It is highly recommended that the UH System Application be submitted 4-6 weeks prior to the SONDH deadline in order to allow ample processing time in the Office of Admissions.

Applications received after the deadline will not be accepted. For more information regarding program specific deadlines, please visit our website at [www.nursing.hawaii.edu](http://www.nursing.hawaii.edu).

## Special Requirements

Upon entrance into the program, students must have the following:

1. Health Clearance,
2. Current BLS/Healthcare Provider CPR Certification\*, and
3. Health insurance.

<sup>\*</sup>The BLS/Healthcare Provider CPR curriculum includes training for Adult, Child, and Infant CPR; Adult, Child, and Infant Bag-Mask Technique; 2 Rescuer CPR, Rescue Breathing; Adult and Child AED protocols; and foreign object blockage removal for Adults, Children, and Infants.

Students with prerequisite deficiencies may not register for or attend clinical courses.

Students must satisfy the requirements set forth by the clinical agencies; students with deficiencies may not attend clinical

courses. Every year, students will need to renew their health clearance for TB. Students will also need to recertify for BLS CPR and renew their tetanus/diphtheria/pertussis clearance as required.

## Varied Schedules

Nursing students are expected to participate in clinical experiences in many community agencies at variously scheduled times. Therefore, students must make time and transportation arrangements to accommodate an irregular academic schedule.

## Continued Registration

All undergraduate students accepted as majors in the nursing program may register for nursing courses. Students must attain a grade of at least C (not C-) in all courses in the program to continue registration for the following semester.

Students may be dismissed from the program for failing to maintain academic and clinical experience standards of the School of Nursing and Dental Hygiene. Students wishing to return to the program must file a petition to continue with the Undergraduate Student Affairs Committee (see the Student Handbook).

## BS in Nursing (Traditional Curriculum)

This curriculum applies to students admitted prior to Fall 2010.

## Required Nursing Courses

- NURS 300 Introduction to the Nursing Profession (1)
- NURS 310 Psychosocial Concepts in Health Care (3)
- NURS 311 Pathophysiologic Nursing Concepts (3)
- NURS 330/330L Professional Nursing I/Lab (2/2)
- NURS 331/331L Professional Nursing II/Lab (2/3)
- NURS 370/370L Adult Health Nursing I/Lab (2/3)
- NURS 371/371L Psychiatric-Mental Health Nursing/Lab (3/2)
- NURS 372/372L Maternal Newborn Nursing/Lab (2/3)
- NURS 373/373L Child Health Nursing (2/3)
- NURS 439 Management for Health Professionals (3)
- NURS 441 Introduction to Nursing Research (3)
- NURS 470/470L Adult Health Nursing II/Lab (2/3)
- NURS 471/471L Community Health Nursing/Lab (2/3)
- NURS 475/475L Complex Nursing Practice/Lab (2/5)
- NURS 486 Professional Issues and Trends (2)

## Nursing Electives (at least one is offered each semester)

- NURS 340 Contemporary Ethical Issues in Health Care (3)
- NURS 343 Gerontology: Its Nursing Implications (3)
- NURS 344 Nursing in the Multicultural Milieu (3)
- NURS 361 Health Education and Promotion (2)
- NURS 399 Directed Reading/Research (faculty approval) (V)
- NURS 420 Cooperative Education in Nursing (V)
- NURS 431 Complementary and Alternative Therapies (3)

## Hawai'i Statewide Nursing Consortium Curriculum (HSNC) BS in Nursing Curriculum

The Department of Nursing implemented the Hawai'i Statewide Nursing Consortium curriculum in Fall 2010. Students preparing to enter this nursing program must complete the Admission Requirements listed above. For further information, contact the Office of Student Services at (808) 956-8939 or visit our website at [www.nursing.hawaii.edu](http://www.nursing.hawaii.edu). The deadline for completed application is **January 5** for the fall semester and **September 1** for the spring semester.

### Required Nursing Courses

- NURS 210/210L Health Promotion Across the Lifespan/Lab (3/6)
- NURS 211 Professionalism in Nursing (2)
- NURS 212 Pathophysiology (3)
- NURS 220/220L Health and Illness I /Lab (4/6)
- NURS 320/320L Health and Illness II: Family Health/Lab (4/6)
- NURS 360/360L Health and Illness III/Lab (3/6)
- NURS 363 Introduction to Nursing Research (3)
- NURS 450/450L Community, Public, and Global Health/Lab (5/4)
- NURS 452 Cultural Aspects of Health Management in Populations Indigenous to Hawai'i, the Pacific, and Asia (3)
- NURS 453 Introduction to Genetics in Nursing Practice (3)
- NURS 460/460L Complex Nursing and Leadership/Lab (4/6)
- NURS 461 Advanced Pathophysiology and Neurobiology (3)

### Required Nursing Electives (at least one is offered each semester)

- NURS 340 Contemporary Ethical Issues in Health Care (3)
- NURS 343 Gerontology: Its Nursing Implications (3)
- NURS 344 Nursing in the Multicultural Milieu (3)
- NURS 361 Health Education and Promotion (2)
- NURS 399 Directed Reading/Research (need faculty approval) (V)
- NURS 420 Cooperative Education in Nursing (V)
- NURS 421 Summer Internship (V)
- NURS 431 Complementary and Alternative Therapies (3)

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Hawaii Statewide Nursing Consortium (HSNC) BS in Nursing Curriculum for ADN Graduates from Consortium

The Hawai'i's Statewide Nursing Consortium (HSNC) Bachelor of Science (BS) in Nursing program for associate degree nursing (ADN) graduates is a statewide continuing consortium nursing curriculum available to UH students from Maui College, Kaua'i Community College, and beginning in fall 2014, Kapi'olani Community College. The HSNC program is designed to provide an efficient pathway to the baccalaureate for the RN with an associate degree. The program builds upon initial nursing preparation with coursework to enhance professional development, prepare for a broader scope of practice, and provide an increased understanding of the cultural, economic, and social issues that affect the delivery of safe, quality patient care (American Association of Colleges of Nursing. (2011) Fact Sheet: Degree completion programs for registered nurses: RN to masters and RN to baccalaureate programs).

Students enter the program in the fall (January 5th deadline); (Students from Kapi'olani Community College may also enter in the Spring July deadline) taking courses via the Hawai'i Interactive Television Service (HITS) while balancing work and family responsibilities. With the BS degree, the student is prepared for graduate education and continued career development.

For further information, contact the Office of Student Services at (808) 956-8939 or visit our website at [www.nursing.hawaii.edu](http://www.nursing.hawaii.edu).

### Required Nursing Courses completed at the participating community college in Year 2 and 3

- NURS 210 Health Promotion Across the Lifespan (9)
- NURS 211 Professionalism in Nursing (1)
- NURS 212 Pathophysiology (3)
- NURS 220 Health and Illness I (10)
- NURS 320 Health and Illness II: Family Health (10)
- NURS 360 Health and Illness III (9)
- NURS 362 Professionalism in Nursing II (1)
- NURS 363 Introduction to Nursing Research (3)

### Year 4 Courses completed at UHM

- NURS 450/450L Community, Public, and Global Health/Lab (5/4)
- NURS 452 Cultural Aspects of Health Management in Populations Indigenous to Hawai'i, the Pacific, and Asia (3)
- NURS 453 Introduction of Genetics in Nursing Practice (3)
- NURS 460/460L Integrated Clinical Practicum and Leadership Development/Lab (4/6)
- NURS 461 Advanced Pathophysiology and Neurobiology (3)
- Nursing Elective (2)

### Required Nursing Electives (at least one is offered each semester)

- NURS 340 Contemporary Ethical Issues in Health Care (3)
- NURS 343 Gerontology: Its Nursing Implications (3)
- NURS 344 Nursing in the Multicultural Milieu (3)
- NURS 361 Health Education and Promotion (2)
- NURS 366 Advanced Cardiopulmonary (3)
- NURS 399 Directed Reading/Research (need faculty approval) (V)
- NURS 420 Cooperative Education in Nursing (V)
- NURS 421 Summer Internship (V)
- NURS 431 Complementary and Alternative Therapies (3)

For information on the BS in Nursing for ADN graduates Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/#nursing](http://www.manoa.hawaii.edu/ovcaa/programsheets/#nursing).

### RN to BS in Nursing Curriculum for ADN Graduates

The RN to Bachelor of Science (BS) in Nursing program for associate degree nursing (ADN) graduates is a complement to the statewide continuing consortium nursing curriculum offered to UH students. The RN to Bachelor of Science (BS) in Nursing program is designed to provide an efficient pathway to the baccalaureate for the nurse with less than 2 years experience with an associate degree. The program builds upon initial nursing preparation with coursework to enhance professional development, prepare for a broader scope of practice, and provide an increased understanding of the cultural, economic, and social issues that affect the delivery of safe, quality patient care (American Association of Colleges of Nursing. (2011) Fact Sheet: Degree completion programs for registered nurses: RN to masters and RN to baccalaureate programs).

Students may enter the program in the fall or spring taking courses online and via the Hawai'i Interactive Television Service (HITS) while balancing work and family responsibilities. The

program provides access to students living on Maui and Kaua'i. With the BS degree, the student is prepared for graduate education and continued career development.

Admission to the program requires completion of 44 credits of lower division prerequisite course work. Upon admission, each student will receive a personalized review of completed coursework to create an individualized progression plan for completion. Up to 42 credits is provided for course work completed in the associate degree (35 credits) and other general elective course work (7 credits). A total of 120 credits are required for the baccalaureate degree.

Thirty-four (34) credits of upper division nursing course work with a grade of C (not C-) is required for the program. The upper division nursing course work includes two courses that must be completed before advancing to clinical course work.

### Admission Requirements

To be admitted, applicants must complete the following requirements by the established deadlines:

1. Documentation of graduation from an accredited associate degree or diploma nursing program;
2. A GPA of 2.0 or better if transferring from a UH System campus; a GPA of 2.5 or better if transferring from a non-UH System campus;
3. Submit official transcripts from all university, colleges, or post-secondary schools;
4. Acceptance to UH Manoa (unclassified, graduated, new, returning, and transfer students must complete the UH System Application);
5. Department of Nursing application (available on the SONDH website);

The deadline for completed application is **January 5** for the fall semester and **July 1** for the spring semester.

For further information, contact the Office of Student Services at (808) 956-8939 or visit our website at [www.nursing.hawaii.edu](http://www.nursing.hawaii.edu).

### Required Upper Division Nursing Courses

#### Nursing Courses Required Prior to Clinical Coursework

- NURS 301 Introduction to Evidence Based Practice and Health Promotion (3)
- NURS 363 Introduction to Nursing Research (3)

#### 400-Level Nursing Courses

- NURS 450/450L Community, Public, and Global Health/Lab (5/4)
- NURS 452 Cultural Aspects of Health Management In Populations Indigenous to Hawai'i, the Pacific, and Asia (3)
- NURS 453 Introduction of Genetics in Nursing Practice (3)
- NURS 460/460L Complex Nursing and Leadership/Lab (4/6)
- NURS 461 Advanced Pathophysiology/Neurobiology (3)

### Executive RN to BS in Nursing (for registered nurses with an associate degree in nursing)

The Executive RN to BS program is designed to provide an efficient pathway to the baccalaureate for the RN with an associate degree and a minimum of 2 years work experience as an RN. The program builds upon initial nursing preparation with course work to enhance professional development, prepare for a broader scope of practice, and provide an increased understand-

ing of the cultural, economic, and social issues that affect the delivery of safe, quality patient care.

The program is designed for learners who thrive in a setting with guided independent study, professional application, and a collegial relationship with faculty and peer students. Students enter the program in the fall, taking online courses while balancing work and family responsibilities. With the BS degree, the student is prepared for graduate education and continued career development.

Admission to the program requires completion of 45 credits of lower division prerequisite course work. Upon admission, each student will receive a personalized review of completed coursework to create an individualized progression plan for completion. Up to 35 credits is provided for course work completed in the associate degree and other general elective course work. A total of 120 credits are required for the baccalaureate degree.

Forty (40) credits of prerequisites and upper division nursing course work with a grade of C (not C-) is required for the program. The upper division nursing course work includes two "prerequisite courses" that must be completed before advancing to clinical course work.

### Admission Requirements

To be admitted, applicants must complete the following requirements by the established deadlines:

1. Documentation of graduation from an accredited associate degree or diploma nursing program;
2. A GPA of 2.0 or better if transferring from a UH System campus; a GPA of 2.5 or better if transferring from a non-UH System campus;
3. Submit official transcripts from all university, colleges, or post-secondary schools;
4. Acceptance to UH Mānoa (unclassified, graduated, new, returning, and transfer students must complete the UH System Application);
5. Department of Nursing application (available on the SONDH website);
6. Current unrestricted U.S. RN license in Hawai'i or the state of residence. Your application will be reviewed prior to taking the NCLEX-RN exam but you must have an active license to begin the upper division nursing courses (NURS 400 level courses).
7. A minimum of 2 years work experience as an RN at the time of application.

### Required Upper Division Nursing Courses

#### Nursing Prerequisite Courses\* (required prior to all other courses)

- NURS 301 Introduction to Evidence Based Practice and Health Promotion (3)\*
- NURS 399 Statistics in Nursing\*
- NURS 363 Introduction to Nursing Research (3)

#### 400-Level Nursing Courses

- NURS 450/450L Community, Public, and Global Health/Lab (5/4)\*\*
- NURS 452 Cultural Aspects of Health Management In Populations Indigenous to Hawai'i, the Pacific, and Asia (3)
- NURS 453 Introduction of Genetics in Nursing Practice (3)
- NURS 460/460L IComplex Nursing and Leadership/Lab (4/6)\*\*
- NURS 461 Advanced Pathophysiology/Neurobiology (3)

\*\*An experiential portfolio option is available to students who believe they meet the outcomes of one of these two specific courses through prior learning and/or professional nursing experience. Through the portfolio process, you may be able to meet course requirements by documenting evidence of your nursing skills and experience. (Note: only one course may be used to receive a credit waiver)

For information on the Executive RN to BS in Nursing sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/#nursing](http://www.manoa.hawaii.edu/ovcaa/programsheets/#nursing).

## Graduate Study

### Master's Entry Program in Nursing (MEPN)

The Master's Entry Program in Nursing is designed for adult learners with no prior nursing experience or education and who have a baccalaureate degree or higher in a field other than nursing. The purpose of this alternative entry program is to equip students with entry-level professional nurse competencies as a foundation for advanced practice roles.

The program consists of an intensive pre-licensure year structured as three continuous semesters transitioning into one of the specialty nursing pathways. The length of time necessary to graduate at the Master's level is dependent upon the specialty area selected by the learner.

The first year curriculum is based on a competency model appropriate for graduate level adult learners. Active learning strategies are emphasized including clinical experience, simulation based learning, and evidence-based practice to inform the actions of the nurse. A substantial amount of the curriculum is clinical practicum in community and hospital/health care settings where students are actively engaged in nursing care under the supervision and guidance of faculty.

### Admission Requirements

To be admitted, applicants must meet the following Requirements for Entry:

1. A complete baccalaureate degree in any non-nursing field from an accredited institution by **July 15** of the year admitted to the program.
2. A minimum cumulative GPA of 3.0
3. Completed the prerequisite courses by July 15 prior to fall admission. If you are taking courses after your application has been submitted, please send in a copy of the course registration as soon as you have registered.  
The pre-requisite courses that must be completed prior to entry are:
  - One year of Human Anatomy & Physiology with lab;
  - One semester of General Microbiology lecture (lab not required);
  - One semester of undergraduate Introduction to Research course.
4. Be admitted to both the Graduate Division AND the Department of Nursing MEPN program.

### Admission Procedures

Two separate application forms must be completed: the Graduate Division application form and the Department of Nursing Master's Entry Program in Nursing NCAS, Nursing Centralized Application Services application, including a copy

of the applicant's transcript. The Graduate Division application form, and official transcripts, must be sent directly to:

Graduate Student Services Office  
University of Hawaii at Manoa  
2540 Maile Way, Spalding Hall 354  
Honolulu, HI 96822

## Documentation Requirements

### Graduate Division

1. Graduate Division application form
2. Official transcripts

Please see SONDH website for DON admission and documentation requirements.

## Master's Degree

### Nurse Practitioner

The primary care option in advanced practice nursing prepares students to be family or adult/gerontology nurse practitioners. Special emphasis is placed on the delivery of care to vulnerable populations in a changing health care system.

Specialty advisors from the graduate faculty assist students in developing an individualized program of study and in monitoring progress toward program completion. Part-time study and post-master's certificates are available for these specialties.

The total number of required credits varies depending on the clinical specialty. The program consists of graduate core courses, advance practice nursing courses, and specialty nurse practitioner courses with supervised clinical experiences. All specialty tracks require a minimum of a four semester clinical experience sequence. The number of clinical hours required ranges from 540 to 720 hours depending on the specialty. A thesis option (for a minimum of 6 credits) is available. Graduates of the nurse practitioner specialties are eligible to take national certification examinations in the area of their specialty.

### Adult Gerontology Clinical Nurse Specialist

The Adult Gerontology Clinical Nurse Specialist Program prepares registered nurses for advanced practice in a wide variety of clinical practice areas. Generally, the practice is focused in a clinical area that may be identified in terms of a setting, diseases, or medical subspecialty (e.g. diabetes, oncology, critical care).

Charge Nurse Specialists (CNSs) are expert clinicians that work in a wide variety of health care settings. In addition to providing advanced patient care, the CNS improves patient outcomes through research, education, consultation, and program management. Students who enroll in this 42-credit program progress either part-time or full-time, and will meet the standards set forth by the American Nurses Credentialing Center (ANCC). Students will be required to complete 540 hours of clinical practicum in order to meet the Adult-Gerontology Clinical Nurse Specialist Competencies and take national certification examinations.

### Advanced Public Health Nursing

The Advanced Public Health Nursing (APHN) Program is a distance based masters in nursing degree, which targets registered nurses who wish to practice in Hawai'i, the U.S. Affiliated Pacific Islands or among communities with under-served populations (in the U.S. as well as abroad). Course work is

completed via online learning and fieldwork that is conducted in the student's own local community. The APHN program focuses on population-level health, wellness, health promotion, and disease prevention. The students learn critical population health skills such as community and population assessment; complex project/program management; health services research and health policy analysis. The aim of the program is to educate the future leaders for community and public health nursing in Hawai'i and the Pacific Region. The course work pathway is 36 credits, and designed to be completed in six semesters of part-time study over two years, (fall, spring, summer, fall, spring, and summer). At the conclusion of the program, the graduates are awarded a master's of science (MS) in nursing and will be prepared for certification in advanced public health nursing (APHN-BC).

### **Nursing Executive Leadership**

The Nursing Executive Leadership program provides registered nurses with the knowledge and skill to lead complex integrated healthcare delivery systems. This executive format hybrid program combines face-to-face learning with established on-line learning technology. The 18 month program is delivered in a cohort model designed for adult learners. Community based healthcare leaders, from a variety of settings, partner with academic faculty and complement diverse learning strategies. The program emphasizes leadership skills, healthcare economics, and finance. Courses build towards development of a professional portfolio and graduates are eligible to take American Association of Nurse Executives (AONE) or ANCC certification examinations.

### **Nursing Executive Leadership/MBA**

The Master of Science in Nursing Executive Leadership/ Master of Business Administration (MS/MBA) is a dual degree program jointly sponsored by the School of Nursing and Shidler College of Business. It provides extensive professional preparation in nursing executive leadership and business. It is offered as an integrated curriculum spanning three years of full-time study. Part-time study is available. The dual degree program consists of 57 credits offered in either a full-time (with completion in 3 years) or part-time schedule. The MBA program is taught in a combination of face-to-face classes offered in the evenings and on-line. Class schedules are tailored for working students. The Nursing Executive Leadership component is offered in the executive format combining face-to-face classes with distance learning technologies.

### **RN to MS Program (with non-nursing baccalaureate)**

The RN to MS Program (with non-nursing baccalaureate) targets registered nurses (RNs) who are graduates of an NLN accredited associate degree or diploma program and have a baccalaureate degree in an area other than nursing. The following baccalaureate nursing courses or equivalent are required in the master's program: Research (NUR 363); Community Health (NUR 450); and Management/Leadership (NUR 460). The admission progression and graduation requirements are the same as for options within the master's program.

Applicants to the RN to MS with a non-nursing baccalaureate should have evidence of baccalaureate level knowledge in each of the three areas noted above (research, community health, management/leadership) that may have been obtained

through formal course work, professional training programs, and/or professional or life experience. An experiential portfolio will demonstrate either course work or experience in the required areas and may include, but may not be limited to: transcripts for previous college course work; resume; course syllabi which outline course descriptions and learning objectives; professional training programs' course work that includes learning objectives; a one to two page essay which explains professional or life experience endeavors that demonstrate competence in the area(s) to be evaluated.

### **Admission Requirements**

To be admitted, applicants must meet the requirements of both the Graduate Division and the Graduate Student Affairs Committee of the School of Nursing and Dental Hygiene and other degree programs as appropriate (e.g., MS/MBA). Requirements for the School of Nursing and Dental Hygiene include the following:

1. A baccalaureate degree with a major in nursing from an NLNAC or CCNE-accredited program, except for RN to MS applicants who have a non-nursing baccalaureate degree;
2. A minimum cumulative GPA of 3.0 in the last 60-90 credits of course work;
3. A basic research course or equivalent completed within the past seven years;
4. A current unrestricted RN license/certification in state or jurisdiction of practice;

In addition, the following may be required depending on the MS specialty or program:

1. Interview with a specialty advisor after all application documents are reviewed is optional;
2. Experiential portfolio as indicated by MS specialty or program (see website for details);
3. For international students, TOEFL scores must be 580/92 or above.

### **Documentation Requirements (for RN-MS, MS, and PMC program applicants)**

Submit the following items to NCAS, Nursing Centralized Application Services:

1. NCAS (see website for details);
2. A curriculum vitae or résumé;
3. Two completed reference forms (one from a former faculty member and one from an agency supervisor);
4. A sample of professional writing (see website for details);
5. A copy of a current unrestricted RN license/certification in state or jurisdiction of practice, and
6. YouTube video (see website for details).

Submit the following items to:

Office of Graduate Education  
University of Hawai'i at Mānoa  
2540 Maile Way, Spalding Hall 354  
Honolulu, HI 96822

1. Graduate School Application (available at [manoa.hawaii.edu/graduate](http://manoa.hawaii.edu/graduate))
2. Transcripts from all college or universities previously attended

For more information regarding the Graduate Division admission requirements call (808) 956-8544.

### Admission Procedures (for RN-MS, MS, and PMC program applicants)

Two separate application forms must be completed: the Graduate Division application form and NCAS, Nursing Centralized Application Services online application form (see website for details). The Graduate Division application form and, official transcripts, must be sent directly to:

Office of Graduate Admissions  
University of Hawai'i at Mānoa  
2540 Maile Way, Spalding 353B  
Honolulu, HI 96822

or the online application at [manoa.hawaii.edu/graduate](http://manoa.hawaii.edu/graduate).

Applications to dual degree programs (for example, MS/MBA) also require completed application to the additional college/program (ex., Shidler College of Business/MBA). Completed applications are reviewed and evaluated by the Graduate Student Services Office; completed applications are forwarded to the School of Nursing and Dental Hygiene for comprehensive review by the school's graduate faculty. The school then makes a recommendation to the Graduate Division to either admit the student or deny admission.

Applications are accepted for the fall semester only. The application forms and supporting documents must be received at the designated offices by **December 1**. It is strongly recommended that all documents be submitted by **November 1** to allow time for processing by the Graduate Division. Rolling admissions will be utilized by various program directors.

#### Application Deadlines

- Application period: September 1–December 1
- **December 1**—final deadline for Graduate Division application and materials (any different deadlines listed on the grad division site are not honored)
- **December 1**—final deadline for School of Nursing MEPN application and materials

Materials must be **received**, not postmarked, by the date above. Applications and/or supporting documents (e.g. recommendation letters, etc) received after the application period will NOT be accepted.

#### Post-Master's Certificate (PMC)

After completing a master's degree in nursing, or other health-related field, nurses may select to apply for the post-master's certificate option. This program permits applicants with a current unrestricted RN license in a state or jurisdiction of practice, and a master's degree in nursing or other health-related field, to pursue course work in a second nursing specialty.

The program director for the APRN specialty in which the nurse is planning to enroll provides individual counseling, and develops a program of study based on the nurse's previous academic work. A minimum of 15 credits must be completed to obtain a Post-Master's Certificate, with at least 9 of these credits taken in graduate nursing courses offered at UH Mānoa SONDH. After completion of the Post-Master's Certificate program, the student can sit for the national certification examination in her/his specialty area.

#### Special Requirements

Upon entrance into the program, the student must have the following:

1. Health Clearance;

2. Current BLS/Healthcare Provider CPR Certification\*; and
3. Health insurance.

\*The BLS/Healthcare Provider curriculum includes training for Adult, Child, and Infant CPR; Adult, Child, and Infant Bag-Mask Technique; 2 Rescuer CPR, Rescue Breathing; Adult and Child AED protocols; and foreign object blockage removal for Adults, Children, and Infants.

Students must satisfy the requirements set forth by the clinical agencies; students with deficiencies may not attend clinical courses. Students will need to renew their health clearance for TB. Students will also need to renew their BLS CPR and tetanus/diphtheria/pertussis clearance as needed. The admissions procedures and application are the same as those listed for "Masters Degree."

#### Doctor of Nursing Practice (DNP) Degree

Building on the master's program curriculum, the DNP is designed as a professional practice doctorate integrating evidence based practice, quality improvement, and systems leadership to prepare experts in specialized advanced nursing practice. The DNP is targeted to nurses seeking a terminal degree in nursing practice. Intended for working professionals, the curriculum is designed as a part-time, two-year program, including summer coursework and intensives.

Each DNP student will have two advisors: (1) an academic advisor from the School of Nursing and Dental Hygiene; and (2) an external advisor from the site of the student's Scholarly Inquiry Project (SIP). The program requires 36 credits of post-master's course work (30 didactic credits and a minimum of six DNP Scholarly Inquiry Project credits) to meet the minimum 1000 post-baccalaureate hours of academically-supervised practicum. The online delivered core courses with face-to-face summer intensives are designed to develop leaders in clinical and executive positions who are capable of translating emerging science and develop policy to improve patient and population-based care. The Scholarly Inquiry Project has a strong applied focus, with the expectation that students will conduct projects relevant to their practice. Electives comprise six credits and will be selected by the student to complement their Scholarly Inquiry Project.

DNP graduates will be prepared for a variety of nursing practice roles. Foundational competencies that are core to all advanced nursing practice roles will be integral to the curriculum and are required by the American Association of College's of Nursing: (1) Scientific Underpinnings for Practice; (2) Organizational and Systems Leadership for Quality Improvement and Systems Thinking; (3) Clinical Scholarship and Analytical Methods for Evidence-Based Practice; (4) Information Systems/Technology and Patient Care Technology for the Improvement and Transformation of Health Care; (5) Health Care Policy for Advocacy in Health Care; (6) Interprofessional Collaboration for Improving Patient and Population Health Outcomes; (7) Clinical Prevention and Population Health for Improving the Nation's Health; and (8) Advanced Nursing Practice (The Essentials of Doctoral Education for Advanced Nursing Practice, 2006; [www.aacn.nche.edu/publications/position/DNPEssentials.pdf](http://www.aacn.nche.edu/publications/position/DNPEssentials.pdf)).

#### Admission Requirements

Applicants must meet the requirements of both the Graduate Division and graduate admissions committee of the School of Nursing and Dental Hygiene. To meet the minimum qualifications for consideration, applicants must have the following:

- Nursing License: A current RN license/certification in state or jurisdiction of practice.
- Education: A master's degree in nursing or related area with a grade point average (GPA) of 3.0 on a 4.0 scale.
- English Language Proficiency: If an applicant's native language is not English or has not obtained a bachelor's or master's degree from an English speaking college, then the applicant must submit official TOEFL scores with a minimum score of 600.
- Statistics Course Completion: Evidence of successful completion of a graduate-level statistics course in the past seven years or within first year of the program.

### Documentation Requirements

- A current unrestricted RN license/certification in state or jurisdiction of practice
- Official transcript from each post-secondary school attended
- ESL Applicants: Official TOEFL or IELTS exam scores for international applicants
- Evidence of graduate statistics course completion
- A statement of objectives for the Scholarly Inquiry Project
- Identification of an external advisor as mentor for the capstone project
- NCAS, Nursing Centralized Application Services online application (see website for details)
- Curriculum Vitae
- Two letters of recommendation

### Requirements for Clinical Scholarship

- A current unrestricted RN license/certification in state or jurisdiction of practice
- Liability and malpractice insurance
- Practice requirements of the Scholarly Inquiry Project Clinical Site i.e., immunizations, clinical privileges

### Application Procedures

Two separate application forms and procedures must be completed: (1) the Graduate Division application; and (2) the NCAS, Nursing Centralized Application Services online application form (see website for details).

The online Graduate Division application form is available at [apply.hawaii.edu](http://apply.hawaii.edu). The additional required Statement of Objectives form is available at [manoa.hawaii.edu/graduate/sites/manoa.hawaii.edu/graduate/files/documents/forms/sobj.pdf](http://manoa.hawaii.edu/graduate/sites/manoa.hawaii.edu/graduate/files/documents/forms/sobj.pdf). Hard-copies of Graduate Division-required documents and official transcripts must be sent directly:

Graduate Student Services Office  
University of Hawai'i at Mānoa  
2540 Maile Way, Spalding 353B  
Honolulu, HI 96822

Completed applications are first screened by the Graduate Student Services Office. Only applications of students who meet UH Mānoa's minimum requirements are forwarded to the School of Nursing and Dental Hygiene for comprehensive review by the school's graduate faculty. The school then makes a recommendation to the Graduate Division to either admit the student or deny admission.

Applications are accepted for the fall semester only. The application forms and supporting documents must be received by the Graduate Division Admissions Office by **December 1**.

### PhD Degree

The PhD online nursing program prepares independent nursing scholars capable of conducting research that generates new knowledge focusing on the health and well being of diverse populations primarily from Hawai'i and the Asia/Pacific region. Courses are offered online and communication is facilitated through e-mail and student listserves and other software programs. The PhD program requires a minimum of three years of part-time study plus completion of the dissertation. Academic advisors are selected from the graduate faculty based on students' area of research interest and fit with faculty.

The program requires 48 credits of post-master's course work plus a dissertation. Two core areas make up the program of study: (1) Knowledge Development and Scholarship (39 credits), and (2) Cognates (Interdisciplinary or Nursing Education) (9 credits).

The knowledge development and scholarship component of the program prepares students to conduct culturally appropriate research in nursing. Substantive nursing content is acquired through the disciplinary knowledge sequence of courses. In the research scholarship sequence, students develop skills in methods, design, and measurement in both quantitative and qualitative approaches. The knowledge development and scholarship courses (39 credits) are NURS 702 Philosophical Thoughts, NURS 739 Advanced Nursing Science, NURS 741 Quantitative Methods and Measure, NURS 742 Qualitative Methods I, NURS 743 Qualitative Methods II, NURS 751 Concept Development and Analysis, NURS 767 Culturally Competent Research Methods, NURS 721 Instruments Development and Evaluation in Research, NURS 777 Nursing Research Practicum, NURS 752 and NURS 753, two advanced statistics courses to meet the specific research focus of the student, Ethics, and NURS 699 Research Proposal Development.

Cognate courses are chosen with the assistance of the student's advisor and may be taken after completion of the first year of doctoral courses when the student has a clearly defined research focus. Cognate courses may be taken from any department or school (within or outside of SONDH). The nursing education cognate courses prepare students to teach in nursing programs with a diverse student body. The nursing education courses (9 credits) are NURS 745 Creative Learning Strategies for Adults, NURS 747 Curriculum Development, and NURS 748 Supervised Practicum in Teaching. Doctoral students are encouraged to take graduate level courses (e.g., Masters, PhD, DNP, etc.) in fields of study that will enhance their doctoral education and research focus. These courses may be offered in other UH colleges/schools or departments (e.g., Psychology, Sociology, Medicine, etc.) and/ or courses offered by other universities and colleges including those available via NEXUS. The PhD faculty advisor should provide guidance about the selection of cognates based on the individual student's needs.

### Admission Requirements

Applicants must meet the requirements of both the Graduate Division and graduate admissions committee of the School of Nursing and Dental Hygiene. Requirements for the School of Nursing and Dental Hygiene include the following:

1. PhD Applicants are expected to have:
  - Preferred Educational Qualifications: RN License and Master of Science in Nursing from an NLNAC or CCNE accredited program (not applicable for international students).

- Minimum Education Qualifications: RN License, Bachelor of Science in Nursing from an NLNAC or CCNE accredited program (not applicable for international students), and a Master's Degree in a related health field;
- 2. GPA of 3.0 or above;
- 3. Interview with the PhD faculty (after application is complete); and
- 4. A current unrestricted RN license/certification in state or jurisdiction of practice;
- 5. Positive recommendation from the PhD committee; and
- 6. For international students, TOEFL scores must be 580 or above.

### Documentation Requirements

1. Department of Nursing PhD application;
2. Curriculum vitae or résumé;
3. A scholarly paper (pdf format is required);
4. Statement of research objectives; and
5. Current nursing license in state or jurisdiction of residence or practice.
6. Two professional references (names, title, and contact information).

### Requirements for Clinical Scholarship

1. Current RN license in state or country of residence;
2. Current CPR certificate from an approved American Heart Association Basic Cardiac Life Support;
3. Liability and malpractice insurance provided by the school;
4. Immunizations and other procedures;
5. Health insurance.

### Application Procedures

Two separate application forms must be completed: the Graduate Division application and the School of Nursing and Dental Hygiene PhD program application form. The Graduate Division application form and official transcripts must be sent directly to:

Graduate Student Services Office  
University of Hawai'i at Mānoa  
2540 Maile Way, Spalding 353B  
Honolulu, HI 96822

An on-line application is available through [www.manoa.hawaii.edu/graduate](http://www.manoa.hawaii.edu/graduate).

The School of Nursing and Dental Hygiene PhD program application form is available in the Office of Student Services, Webster 201. In addition, applications can be downloaded from the web at [www.nursing.hawaii.edu](http://www.nursing.hawaii.edu) and mailed to the school. The completed form and all other admission materials must be sent directly to:

School of Nursing and Dental Hygiene  
Office of Student Services  
2528 McCarthy Mall, Webster 201  
Honolulu, HI 96822

Completed applications are first screened by the Graduate Division Admissions Office. Only applications of students who meet UH Mānoa's minimum requirements are forwarded to the School of Nursing and Dental Hygiene for comprehensive review by the school's graduate faculty. The school then makes a recommendation to the Graduate Division to either admit the student or deny admission.

Applications are accepted for the fall semester only. The application forms and supporting documents must be received at the designated office by **February 1**. All documents be submitted by **December 1** to allow time for processing by the Graduate Division.

## General Information

The School of Ocean and Earth Science and Technology (SOEST) was established in 1988. It combines and integrates the Departments of Geology and Geophysics, Meteorology, Ocean and Resources Engineering, and Oceanography, as well as the Hawai'i Institute of Geophysics and Planetology, Hawai'i Institute of Marine Biology, and the Hawai'i Natural Energy Institute. The Sea Grant and Space Grant College Programs, Hawai'i Undersea Research Laboratory, and Joint Institute for Marine and Atmospheric Research, all jointly supported by state and federal funds, are also part of SOEST. In 1997, the International Pacific Research Center was established in SOEST

under the U.S.-Japan Common Agenda. The center is jointly supported by the state, Japanese, and federal funds.

Although the Department of Ocean and Resources Engineering offers several undergraduate courses, baccalaureate degrees are not offered in this area. The Department of Oceanography offers the BS in global environmental science. Baccalaureate degree programs are offered in the Department of Geology and Geophysics and the Department of Meteorology. Those with long-range plans for graduate work in oceanography or ocean and resources engineering should prepare themselves with an undergraduate course of study that will satisfy the entry requirements for admission to these graduate programs. Information on entrance and degree requirements for all SOEST graduate programs (MS and PhD) in geology and geophysics, meteorology, ocean and resources engineering, and oceanography is in this *Catalog*. Candidates for advanced degrees and the graduate certificate program apply through the Graduate Division of UH Mānoa. The school has developed a number of interdisciplinary courses at both the undergraduate and the graduate levels, which are listed under OEST within the "Courses" section of the *Catalog*.

## Mission

The mission of SOEST is to make UH Mānoa a leading center in ocean and earth science and technology. Scientists and engineers of SOEST intend to understand the subtle and complex interrelations of the seas, the atmosphere, and the Earth in order to learn how to preserve the quality of our lives and to bring to Hawai'i an enrichment of intellect and culture along with technological advances well suited to the needs of these islands. To that end, the objectives of SOEST are as follows:

1. Enhance educational opportunities in ocean and earth science and technology for the people of Hawai'i, the nation, and the Pacific Basin;
2. Accelerate the growth of UH Mānoa to preeminence in research and development in ocean and earth science and technology;
3. Build the strength of UH Mānoa for public service and outreach in the Pacific Basin; and
4. Provide a foundation for economic interaction and development of marine-related industries within the State of Hawai'i.

## Degrees

**Bachelor's Degrees:** BA in geology, BS in geology and geophysics, BS in meteorology, BS in global environmental science

## Advising

Director: Leona M. Anthony  
SOEST Student Academic Services  
2525 Correa Road, HIG 135  
Honolulu HI 96822  
Phone: (808) 956-8763  
Fax: (808) 956-9987  
Email: leonaa@hawaii.edu  
Web: www.soest.hawaii.edu/soest\_web/soest.academics.htm

All undergraduate majors in SOEST are assigned to an advisor in their major upon admission into the school. Mandatory advising for all majors takes place every semester prior to the next semester's registration. All students are encouraged to regularly meet with their advisors throughout each semester to discuss their educational and personal goals and to formulate an academic plan to attain those goals.

**Program goals:** To create and develop a teaching-learning relationship between the advisor/advisee to implement the advisee's educational plan toward his or her intended degree.

**Advising mission:** SOEST values and promotes collaborative relations between academic advisors, faculty advisors, and students to implement a personal education plan that is consistent with the student's goal.

## Undergraduate Programs

Application to the following programs are accepted by the Admissions Office: the BA in geology, the BS in geology and geophysics, the BS in global environmental science, and the BS in meteorology.

### School Requirements

1. Completion of basic course work as specified by their degree programs;
2. Completion of requirements for the major;
3. Completion of 45 upper division credit hours (courses numbered 300 and above);
4. GPA of 2.0 (C average) for all UH Mānoa registered credits;
5. GPA of 2.0 (C average) for all courses applied to the major requirements;
6. Completion of a degree audit (Graduation Worksheet) to the Student Academic Services Office at least two semesters preceding the award of the degree;
7. Completion of an application for graduation to the Student Academic Services Office in the semester preceding the award of the degree; and
8. Completion of an exit interview by the Student Academic Services Office.

### Bachelor of Arts and Bachelor of Science Degrees Requirements

1. Courses required by UH Mānoa Undergraduate General Education Requirements;
2. One year of a second language (101 and 102); and
3. Support science requirements from mathematics, chemistry, and physics vary with degree programs and all courses may

have prerequisites. The following are the minimum required courses (consult program advisor for details).

### Mathematics

- MATH 241 (BA)
- MATH 242 (BS, geology and geophysics)
- MATH 244 (BS, meteorology)
- MATH 243 and MATH 244 or OCN 312 and ECON 321 (BS, global environmental science)

### Chemistry

- CHEM 161/161L, 162/162L

### Physics

- PHYS 151/151L and 152/152L (BA)
- PHYS 170/170L and 272/272L (BS)

Note that introductory chemistry and mathematics courses have placement exams.

Students who have not completed a high school course equivalent to pre-calculus should take MATH 140 during the summer session prior to their first semester. All BA and BS degree candidates should consult with the departmental advisor before registering.

### Major Requirements

See appropriate departments for specific major requirements leading to a bachelor of arts or a bachelor of science degree.

## Graduate Programs

See appropriate departments for specific major requirements leading to MS and PhD degrees.

## Instructional and Research Facilities

### Hawai'i Institute of Geophysics and Planetology

The Hawai'i Institute of Geophysics and Planetology (HIGP) conducts geological, geochemical, geophysical, oceanographic, acoustic, and atmospheric research, as well as remote sensing research, in Earth, space, and marine sciences. Programs embrace research and advanced training in marine geology and geophysics, small satellite development and launch, infrasound, materials science and high-pressure mineral geophysics, evolution of the Solar System, seismology and solid Earth geophysics, planetary geology, meteoritics, volcanology, rock magnetism, geodetics, and petrology. The institute maintains various specialized facilities in support of its research endeavors and has a number of instrument development programs, including the Hawai'i Mapping Research Group who build and operate advanced sonars for seafloor mapping. Other instrument development programs include hyperspectral imagers, Raman spectrometers, and small satellites. HIGP includes the Hawai'i Space Grant Consortium, which runs a wide variety of education and fellowship programs at the K-12, undergraduate, and professional levels in the form of workforce development and also provides outreach to the Hawai'i community. HIGP is also the home of the Pacific Regional Planetary Data Center, and maintains several websites for the community, including "Planetary Science Research Discoveries" and the "Hawai'i MODVOLC Near Real-time Thermal Monitoring of Global Hot-spots."

### Hawai'i Institute of Marine Biology

The Hawai'i Institute of Marine Biology (HIMB) was established on the island of Moku O Lo'e in 1965 when its name was changed from the Hawai'i Marine Laboratory. The

institute is responsible for providing leadership and support for studies in the marine environment, particularly coral reefs. It provides facilities and services for faculty members, graduate and undergraduate students, and visiting scholars for research and education in marine biology and related topics. The core faculty, plus many from other UH departments, study the life processes of marine organisms including plants, animals, and microbes. Research at HIMB covers a broad range of topics including coral reef biology and ecology, the behavior, physiology and sensory systems of marine mammals, tropical aquaculture, the behavior of reef fish, shark ecology and sensory systems, fish endocrinology, pollution and management of marine ecosystems, coastal biogeochemical processes, fisheries, and bioengineering and genetics.

HIMB is unique in that it has modern molecular biology laboratories and immediate access to the reef, Kāneʻohe Bay, and deep ocean waters. It is located on Moku O Loʻe (Coconut Island) in Kāneʻohe Bay (on the east coast of Oʻahu), providing a unique setting for graduate-level topics courses and field-trip demonstration opportunities. Kāneʻohe Bay has many healthy coral reefs. The 28 acre island, located within a 30 minute drive distance from UH Mānoa campus, is surrounded by a 64 acre coral reef dedicated to scientific research. Facilities at the marine laboratory include research vessels and skiffs, protected harbors, a pelagic fish laboratory; Hawaiian fish ponds, aquaria and tanks; a flow-through seawater system; remote environmental monitoring capabilities; reef microcosm systems; a wide array of computerized analytical and acoustic equipment; a floating marine mammal research complex; a functional genomics facility; and the Barbara Pauley Pagen Library and classrooms.

### **Hawaiʻi Natural Energy Institute**

The Hawaiʻi Natural Energy Institute (HNEI) was established by the Legislature in 1974 to develop renewable energy resources and technologies to reduce the state's dependence on fossil fuels, was given a broader mandate by the Hawaiʻi Legislature (ACT 253 in 2006) to also demonstrate and deploy efficient energy end-use technologies and to coordinate closely with the state's energy resource coordinator. Today, with funding from state and federal agencies as well as industry, HNEI conducts basic and applied research on a wide range of topics to address society's critical energy and environmental problems. Current research includes hydrogen fuel cells, ocean energy and resources, fuels and high value products derived from biomass, photovoltaics, and batteries and electric vehicles. The institute conducts studies and assessments to support policy development and conducts testing and evaluation of emerging energy generation, grid enabling, and energy efficiency technologies. Many of these activities are conducted under public/private partnerships managed by the institute, with the goal of supporting increased penetration of renewable technologies onto the electrical grid systems.

### **Hawaiʻi Space Grant Consortium**

The Hawaiʻi Space Grant Consortium (HSGC) is a wide-ranging community educational program supported by the National Aeronautics and Space Administration (NASA) that promotes studies in scientific fields related to space. These fields include astronomy, geology, meteorology, oceanography, mathematics, physics, engineering, computer science, and life sciences. Affiliate campuses are UH-Hilo, all seven community

colleges within the UH System, and the University of Guam. Some of the programs supported by Space Grant include undergraduate fellowship and traineeship programs (approximately 10-20 students per semester are supported); the Future Flight Program for teachers, school students, and their parents; teacher workshops; undergraduate remote-sensing classes; an undergraduate telescope classes facility; a CanSat project geared for community college students to create a satellite similar to UH Mānoa's own CubeSat project; an undergraduate internship program awarded for students to participate in Science, Technology, Engineering, and Mathematics (STEM) related research at local businesses; and outreach to state and federal agencies related to the use of satellite and aircraft remote-sensing data. A significant goal of the program is to encourage interdisciplinary studies and research, and to train future generations of space scientists and engineers. Students, teachers, and researchers in Hawaiʻi are encouraged to contact the UH Mānoa HSGC office at (808) 956-3138 to learn more about the opportunities.

### **Hawaiʻi Undersea Research Laboratory**

The Hawaiʻi Undersea Research Laboratory (HURL) was established in 1980 by a cooperative agreement between the National Oceanic and Atmospheric Administration (NOAA) and the UH. HURL was one of six National Undersea Research Centers sponsored by NOAA's National Undersea Research Program (NURP). HURL operates the *Pisces IV* and *Pisces V* research submersibles to conduct marine research to oceanic depths of 2,000 meters. These underwater vehicles are operated from HURL's dedicated support ship, the 222-foot R/V *Kaʻimikai-o-Kanaloa*. Extensive data archives are available to the scientific and academic community for biology, geology and marine chemistry research from submersible dives dating back to 1980. Principal research projects conducted are those aligned with the mission of NOAA.

### **International Pacific Research Center**

The International Pacific Research Center was established in 1997 under the U.S.-Japan Common Agenda for Cooperation in Global Perspective. Its mission is to provide an international, state-of-the-art research environment to improve understanding of the nature and predictability of climate variability in the Asia-Pacific sector, including regional aspects of global environmental change.

## Joint Institute for Marine and Atmospheric Research

The Joint Institute for Marine and Atmospheric Research (JIMAR) was created in 1977 through a Memorandum of Understanding between the National Oceanic and Atmospheric Administration (NOAA) and UH Mānoa to conduct research of mutual interest. The principal research interests of JIMAR are ecosystem forecasting, ecosystem monitoring, ecosystem-based management, protection and restoration of resources, equatorial oceanography, climate research and impacts, tropical meteorology, and tsunamis and other long-period ocean waves.

## Sea Grant College Program

The University of Hawai'i Sea Grant College Program (UH Sea Grant) supports an innovative program of research, education, and outreach services directed to the improved understanding and stewardship of marine and coastal resources of the state, region, and nation. UH Sea Grant is a partnership of UH Mānoa, the National Oceanic and Atmospheric Administration, and the State of Hawai'i that is facilitated by strong linkages with 32 Sea Grant programs across the nation and affiliations throughout the Pacific.

UH Sea Grant research currently focuses on promoting coastal community sustainability, sustainable aquaculture, marine biotechnology, ecosystem-based use of nearshore resources and habitats, sustainable tourism, coastal water quality, and resilience to natural hazards. Knowledge is disseminated to policy makers, marine agencies, the marine industry, and the general public through UH Sea Grant's extension faculty, outreach activities, and communications program. UH Sea Grant supports educational activities that include K-12 through graduate and postgraduate and professional training. Human resources are built in part through internships, traineeships, and fellowships. The overall goal is to develop knowledge and the will to build Hawai'i's economy and protect its habitats and resources through UH Mānoa's excellence and our cultural heritage.

### Faculty

- \*G. T. Apuzen-Ito, PhD—marine geophysics and geodynamics
- \*J. M. Becker, PhD—geophysical fluid dynamics
- \*C. P. Conrad, PhD—geodynamics, marine geophysics
- \*H. Dulaiova, PhD—coastal hydrology and geochemistry
- \*R. A. Dunn, PhD—marine geophysics
- \*A. I. El-Kadi, PhD—groundwater and watershed hydrology
- \*C. H. Fletcher, PhD—coastal geology
- \*L. N. Frazer, PhD—geophysics
- \*E. J. Gaidos, PhD—geobiology, planetary science
- \*M. O. Garcia, PhD—igneous petrology, volcanology
- \*C. R. Glenn, PhD—coastal groundwater, environmental geochemistry, marine sediments
- \*J. E. Hammer, PhD—physical volcanology
- \*E. W. Hellebrand, PhD—igneous petrology

- \*B. F. Houghton, PhD—physical volcanology
- \*A. H. Jahren, PhD—geobiology, environmental science
- \*K. T. M. Johnson, PhD—geochemistry, petrology, marine geology
- \*J. G. Konter, PhD—solid earth geochemistry, volcano petrology
- \*S. J. Martel, PhD—engineering geology, structural geology, geomechanics
- C. Miller, Ph.D.—isotope geochemistry
- \*G. F. Moore, PhD—exploration seismology, tectonics
- \*B. N. Popp, PhD—isotopic biogeochemistry
- \*G. E. Ravizza, PhD—paleoceanography
- \*S. K. Rowland, PhD—volcanology, Hawaiian geology
- \*K. H. Rubin, PhD—geochemistry, environmental chemistry, volcanology
- K. Ruttenger, PhD—biogeochemistry, geochemistry
- \*T. Shea, PhD—physical volcanology
- \*B. R. Smith-Konter, PhD—geophysics
- \*S. M. Stanley, PhD—paleobiology, geobiology
- \*B. Taylor, PhD—plate tectonics, geology of ocean margin basins
- \*P. Wessel, PhD—plate tectonics, marine geophysics

### Cooperating Graduate Faculty

- R. Butler, PhD—seismology
- E. H. DeCarlo, PhD—marine geochemistry, marine resources
- P. Dera, PhD—mineral physics, mineralogy, petrology, crystallography
- M. H. Edwards, PhD—marine geology and geophysics
- S. A. Fagents, PhD—planetary volcanology
- L. Flynn, PhD—remote sensing of fires and volcanoes
- P. B. Fryer, PhD—marine geology, petrology, tectonics
- M. A. Garcés, PhD—infrasound, wave propagation, volcanology
- J. Gillis-Davis, PhD—planetary geosciences, remote sensing
- B. R. Hawke, PhD—planetary geosciences
- E. Herrero-Bervera, PhD—paleomagnetism, geomagnetism
- R. N. Hey, PhD—marine geophysics and tectonics
- G. R. Huss, PhD—cosmochemistry, early solar system chronology
- K. Keil, DrRerNat.—meteorites, planetary geosciences
- A. N. Krot, PhD—meteorites, planetary geosciences
- B. R. Lienert, PhD—geophysics
- P. G. Lucey, PhD—planetary geosciences
- M. H. Manghnani, PhD—high-pressure geophysics, mineral physics
- F. Martinez, PhD—marine geophysics
- F. W. McCoy, PhD—marine geology, sedimentology
- A. Misra, PhD—LIBS and fluorescence, material science
- P. J. Mouginiis-Mark, PhD—planetary science, remote sensing
- K. Ruttenger, PhD—biogeochemistry
- J. E. Schoonmaker, PhD—marine geology and geochemistry
- N. Schörghofer, PhD—permafrost, planetary surfaces
- E. R. D. Scott, PhD—planetary geosciences
- S. K. Sharma, PhD—Raman and IR spectroscopy in geochemistry
- G. J. Taylor, PhD—planetary geosciences
- R. Wright, PhD—volcanology
- P. Zinin, PhD—geophysics, planetology

### Affiliate Graduate Faculty

- C. Blay, PhD—sedimentology, Hawaiian geology
- B. A. Brooks, PhD—geodetic, GPS
- R.J. Carey, PhD—physical volcanology
- A. Greene, PhD—geochemistry
- C. Gregg, PhD—volcanology
- V. Keener, PhD—climate, hydrological systems
- F. Mackenzie, PhD—sedimentary geochemistry, sedimentology
- D. Oki, PhD—hydrology
- M. Patrick, PhD—volcanology
- A. Pietruszka, PhD—geochemistry
- M. Reid, PhD—hydrogeology
- D. Pyle, PhD—geochemistry, petrology
- K. Rotzoll, PhD—groundwater, hydrogeology
- T. Sale, PhD—hydrology
- B. Schmitz, PhD—geobiosphere, astronomy

D. A. Swanson, PhD—volcanology  
 T. Thordarson, PhD—volcanology  
 F. A. Trusdell, PhD—volcanology, Hawaiian geology  
 D. Weis, PhD—geochemistry, volcanology  
 C. J. Wolfe, PhD—seismology, marine geophysics

**Degrees Offered:** BA in geology, BS in geology and geophysics, Professional Masters in geoscience (MGeo), MS in geology and geophysics, PhD in geology and geophysics

## The Academic Program

The Department of Geology and Geophysics (GG) is centered around the scientific study of the exterior and interior of the Earth and other planetary bodies. Sub-disciplines within GG are many, and offer rich opportunities for multidisciplinary study of problems of great intellectual and practical importance. *Coastal geologists* study processes such as sedimentation and beach erosion, reef growth and degradation, and sea level change. *Hydrologists* and *Hydrogeochemists* study the cycling of fresh water between the atmosphere, land, and ocean. Of particular emphasis is how climate change impacts this cycle; how fresh water supplies are impacted by human activities, including land-use practices and the introduction of contaminants into surface and groundwater; how climate, hydrologic, and terrestrial processes impact the ocean and its ecosystems by way of surface water and submarine groundwater discharge. *Structural geologists* study the physical features in rock units with respect to stress and deformation related to processes such as mountain building, rifting, and earthquakes. *Engineering geologists* provide geotechnical recommendations affecting the design, construction, and operation of engineering activities, based on geologic factors such as material properties, landslides and slope stability, erosion, and flooding. *Mineralogists* and *petrologists* examine the temperature, pressure, and environmental conditions that influence the formation of minerals and rocks. *Geochemists* specialize in the chemistry of earth materials for gaining knowledge about a huge range of aspects including the make-up of the deep earth, the formation of the seafloor, the origin of volcanoes, as well as past and present changes in Earth's climate, ocean environment, and life. *Volcanologists* study how gas, fluid, and magma interact to create different types of volcanic eruptions, and address hazard remediation. *Geophysicists* use seismology, potential fields, sonar, radar, and GPS for studying earthquakes, Earth's surface and internal structure, land deformation, and plate tectonics. They also use mathematics, continuum mechanics, and high performance computing for studying Earth and planetary processes. *Planetary scientists* examine how the Earth and Solar System formed, study active processes on planetary bodies, search for extrasolar planets, and explore planetary conditions needed for life.

Undergraduate and graduate students in GG are instructed and advised by world-class researchers in a variety of the above sub-disciplines. Students participate in a diverse course curriculum involving in-class instruction, laboratory activities, and field trips. They have access to state-of-the-art facilities including a number of different types of mass spectrometers, an electron microprobe, an X-ray fluorescence laboratory, and high-performance computing facilities. Field trips take students to volcanoes on Hawai'i and other islands, as well as geologic settings on the U.S. mainland and around the world. Students also participate on research cruises onboard one of several research vessels that are operated by SOEST. GG students who

are involved in research projects regularly present their findings in scientific conferences and journal publications. These varied activities allow students to take full advantage of Hawai'i's unique geographic location and its rich geologic and environmental setting.

Students graduate from the Department of Geology and Geophysics (GG) with an in-depth understanding of the relevance of the geosciences to society, especially Hawai'i and Pacific islands, as well as the ways human civilization impacts the Earth and environment. Students are able to use basic skills in math, physics, chemistry, and biology as well as technical knowledge in computer applications, laboratory methods, and field techniques for solving real-work problems in the geosciences. Graduates know how to ethically apply the scientific method, and can use basic principles in geoscience for explaining natural phenomenon. GG graduates develop proficiency in communicating their knowledge in oral presentations and in writing professional documents. As a result, GG majors are widely successful in obtaining jobs in fields within or closely related to the geosciences. These fields include environmental assessment and remediation; engineering; geotechnical consulting; oil, natural gas and mineral resources; water resource management; science education; as well as applied and basic research.

## Advising

Students contemplating a major or minor in geology and geophysics should contact the Director of Student Services for SOEST in HIG 135 (tel. 956-8763). There are two undergraduate advisors who may be contacted through the department office (956-7640, ggdept@soest.hawaii.edu). Graduate students are appointed a faculty advisor upon admittance into the program.

## Undergraduate Study

### BA in Geology

#### Requirements

The BA degree in geology is appropriate for students interested in Earth science but not necessarily intending to pursue graduate work or employment in traditional geological sciences. It is more flexible than the BS program and is suitable for students who are considering a double major or teaching.

The BA degree requires completion of 120 credit hours of coursework, the equivalent of four years of full-time study. The BA program requires 35 credits in the geology and geophysics curriculum. This includes one introductory level GG course with a lab, seven non-introductory GG courses, a two-credit research seminar, and at least five credits of approved upper division electives. With the advice and consent of an undergraduate advisor, courses in other natural sciences, mathematics, or engineering may be substituted as electives. A mainland summer field course is an elective that students are strongly encouraged to take. Required support classes include physics, chemistry, biological sciences, and one semester of college calculus; these total 23-24 credits and should be taken as early as possible. A minimum grade of C (not C-) must be achieved in all major and support classes.

#### Geology and Geophysics Courses

- Required Courses (30 credits)
  - GG 101 Dynamic Earth (3), or 103 Geology of the Hawaiian Islands (3), or GG 170 Physical Geology (4)

- GG 101L Dynamic Earth Laboratory (1) (unless GG 170 is taken)
- GG 200 Geological Inquiry (4)
- GG 250 Scientific Programming (3)
- GG 301 Mineralogy (4)
- GG 302 Igneous and Metamorphic Petrology (3)
- GG 303 Structural Geology (3)
- GG 305 Geological Field Methods (3)
- GG 309 Sedimentology and Stratigraphy (4)
- GG 410 Undergraduate Seminar (2)
- Upper Division Science Electives (5 credits)
  - GG 300 Volcanology (3)
  - GG 304 Physics of Earth and Planets (4)
  - GG 312 Geomathematics (3)
  - GG 325 Geochemistry (3)
  - GG 399 Directed Reading (V)
  - GG 402 Hawaiian Geology (3)
  - GG 407 Energy and Mineral Resources (3)
  - GG 413 Geological Data Analysis I (3)
  - GG 420 Coastal Geology (3)
  - GG 421 Geologic Record of Climate Change (3)
  - GG 423 Marine Geology (3)
  - GG 425 Environmental Geochemistry (3)
  - GG 444 Plate Tectonics (3)
  - GG 450 Geophysical Methods (4)
  - GG 451 Earthquakes (3)
  - GG 455 Hydrogeology (4)
  - GG 460 Geological Remote Sensing (3)
  - GG 466 Planetary Geology (3)
  - GG 499 Undergraduate Thesis (3)
- Required Support Courses (23-24 credits)
  - General Chemistry (CHEM 161, 161L, 162, 162L)
  - Calculus I (MATH 241)
  - College Physics (PHYS 151, 151L, 152, 152L)
  - Biological Sciences (BIOL 171, or BOT 101, or ZOOL 101, or MICR 130)

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## **BS in Geology and Geophysics**

### **Requirements**

This BS degree is designed for students interested in pursuing graduate work or employment in the geosciences. It provides essential grounding in computational, analytical, and observational skills needed in earth science. The program is interdisciplinary and emphasizes the integration of biology, chemistry, physics, and mathematics in the study of the Earth.

The BS in geology and geophysics (GG) requires completion of 120 credit hours of coursework, the equivalent of four years of full-time study. Of this, 48 credits are required in the GG curriculum, including one introductory level geology course with a lab, ten non-introductory level GG courses, a two-credit research seminar, and eleven credits of GG electives. With advice and consent of an undergraduate advisor, courses in other natural sciences, mathematics, or engineering can also be taken as electives. Students are strongly encouraged to take a summer field course as an elective. An undergraduate thesis is also encouraged but not required. The required supporting science classes (28-29 credits) include physics, chemistry, biological science, and college calculus, and should be taken as early as

possible. A minimum grade of C (not C-) must be achieved in each major and support classes.

### **Geology and Geophysics Courses**

- Required GG Courses (37 credits)
  - GG 101 Dynamic Earth (3), or 103 Geology of the Hawaiian Islands (3), or GG 170 Physical Geology (4)
  - GG 101L Dynamic Earth Laboratory (1) (unless GG 170 is taken)
  - GG 200 Geological Inquiry (4)
  - GG 250 Scientific Programming (3)
  - GG 301 Mineralogy (4)
  - GG 302 Igneous and Metamorphic Petrology (3)
  - GG 303 Structural Geology (3)
  - GG 304 Physics of Earth and Planets (4) OR 450 Geophysical Methods (4)
  - GG 305 Geological Field Methods (3)
  - GG 309 Sedimentology and Stratigraphy (4)
  - GG 325 Geochemistry (3)
  - GG 410 Undergraduate Seminar (2)
- Upper Division GG Electives (11 credits)

See the Upper Division Science Electives listing under the BA program. With advice and consent of an undergraduate advisor, courses in other natural sciences, mathematics, or engineering may be substituted as electives.

- Required Support Courses (28-29 credits)
  - Chemistry (CHEM 161, 161L, 162, 162L)
  - Calculus I and II (MATH 241 and 242)
  - Physics (PHYS 170, 170L, 272, 272L)
  - Biological Sciences (BIOL 171, or ZOOL 101, or MICR 130)

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### **BS Track Emphasizing Basic Science and Research**

This alternate BS track allows for a more flexible course work program that is tailored to the student's individual goals. It requires the student to work with an advisor on a research thesis.

To apply for this track, the student must have a minimum combined GPA of 3.0 in 24 credits of the required support courses (see below) as well as in GG 170 (or 101 or 103 and 101L), 200, and 250. The application will consist of a one-page statement of the student's objectives and research interests, presented to a GG departmental undergraduate advisor.

The thesis must be carefully planned and meet departmental requirements. A thesis supervisor and topic should be identified in the student's second-to-last year in the program. The thesis work requires at least 6 (but not more than 9) credit hours of GG 499 Undergraduate Thesis. The thesis research is presented in writing, following the style of a scientific article, and orally in a public seminar. The thesis is evaluated by both the research supervisor and a departmental undergraduate advisor.

### **Course Requirements**

- Required GG Courses (22 credits)
  - GG 170 Physical Geology (4) (or 101 Dynamic Earth (3), or 103 Geology of the Hawaiian Islands (3) and 101L Dynamic Earth Laboratory)
  - GG 200 Geological Inquiry (4)
  - GG 250 Scientific Programming (3)
  - GG 410 Undergraduate Seminar (2)

- GG 413 Geological Data Analysis I (3)
- GG 499 Undergraduate Thesis (6)
- Upper Division GG Electives (25 credits, see above)
- Required Support Courses (32 credits)
  - Chemistry: CHEM 161 (3), 161L (1), 162 (3), 162L (1)
  - Calculus I and II: MATH 241 (4) and 242 (4)
  - Physics: PHYS 170 (4), 170L (1), 272 (3), 272L (1)
  - Biology: BIOL 171 (3), 171L (1), 172 (3), 172L(1)

### **Minor in Geology and Geophysics**

The minor requires GG 101 or 103 or 170, 101L (unless 170 is taken), 200, and 11 credits of non-introductory courses at the 300 level or higher. A 2.0 GPA is required in these courses. The minor is flexible and can provide either an introductory survey of geology or emphasize areas of particular interest to the student. A student interested in a minor in geology and geophysics should consult with an advisor from the department to tailor a plan best suited to the student's interest.

## **Graduate Study**

### **Admission Requirements**

All applicants must take the GRE General Test. All students are urged to have completed a course in a computer programming language before entrance. U.S. applications are due by **January 15** for admission in the fall semester or by **September 1** for the spring semester. International applications are due **January 1** and **August 15**, respectively.

Undergraduate deficiencies will be determined from the student's transcripts and intended field of study. Undergraduate course work deficiencies will be assessed at the preliminary conference. GG 611 is intended for students entering from a non-geoscience field to prepare them for graduate studies in the geosciences.

### **Masters in Geoscience for Professionals (MGeo)**

The MGeo is a professional degree for individuals seeking advanced training for careers in geoscience-related industries or federal, state, and local agencies. Key courses are appropriately scheduled or administered for working professionals to obtain an MGeo in as little as two years of half-time study. Applicants must have a bachelor's degree in the natural sciences, mathematics, or engineering, and are normally expected to have completed at least one year each of college mathematics, geology, physics, and chemistry.

### **Requirements**

The MGeo degree requires a minimum of 30 credit hours, including a total of 6 credits of MGeo Professional Project. At least 12 credits will be in GG graduate courses (GG 600-740), excluding GG 699; and 12 credits may be taken from a list of upper-division undergraduate courses that emphasize applied geoscience.

MGeo Seminar is a 1-credit course that must be taken each year, up to three times. Students will participate in a professional work project as an employee, intern, or volunteer with a company or agency (gaining the credits in MGeo Professional Project), and present the outcome of the project in final oral presentation as well as a written report.

### **Master's Degree**

Intended candidates will be accepted from undergraduate majors in the natural sciences, mathematics, and engineering,

and they normally would be expected to have completed at least one year each of college mathematics, geology, physics, and chemistry. Adequacy of each applicant's additional preparation will depend on the particular branch of geology and geophysics being pursued. At the time of application the student should state the field in which he or she intends to study.

### **Requirements**

For MS students, the graduate studies committee of the department will determine suitability of Plan A (thesis) or Plan B (non-thesis) at the preliminary conference. Virtually all students are required to follow Plan A. Plan A requires a minimum of 30 credits, including 6 credits of GG 700 Thesis Research and at least 24 credits of course work (up to 6 course work credits may be in GG 699). Plan B requires a minimum of 30 credit hours of course work and a final exam.

### **Doctoral Degree**

#### **Requirements**

PhD candidates are accepted with either a BS or MS degree. Students without an MS must pass a qualifying examination given at the beginning of their second semester in residence. All PhD candidates must pass a comprehensive examination no later than at the end of the fourth semester of residence for students without an MS degree or at the end of the second semester of residence for students with an MS degree. The comprehensive exam includes oral and written parts that cover in-depth subjects in the student's field of interest and also relevant general information from this and other departments. A final examination in defense of the dissertation is required. Space and financial aid for the program are limited, so each student's progress will be reviewed annually.

#### **Areas of Interest**

The areas of interest listed below are active fields of research in the department. For each, a brief description and the required undergraduate preparation are listed. Students with backgrounds other than these may be accepted in a field if their records and recommendations are strong, but advancement to candidacy may be delayed. A complete statement of the courses and other work in each field necessary for the MS or to prepare for the PhD comprehensive examination will be given to the entering student.

The department can provide further information on research opportunities and financial aid in each of the areas of interest.

**Geophysics and Tectonics.** Studies in geophysics and tectonics at UH Mānoa are interdisciplinary and include experimental and theoretical developments, field-based observations, and computer simulations. Together, they provide students with a background that combines both geology and geophysics for technical and professional work at industrial, governmental, and academic institutions. Subtopics include: (a) Plate Tectonics—rift propagation and plate break-up; initiation and evolution of continental margins and back-arc basins; relative and absolute motion of plates; thermo-mechanical properties of oceanic lithosphere; mantle convection and the driving forces of plate tectonics; and hot spot and intraplate volcanism; (b) Seismology—theory and analysis of seismic waves from active and passive sources; ocean-bottom geophysical instrumentation; multichannel seismic imaging of subduction zones, accretionary prisms, and submarine volcano flanks; (c) Geophysical Fluid Dynamics—mantle flow and plume-plate interaction;

plate generation and rheology from mantle flow; ocean/shore dynamics and nonlinear waves; (d) Rock Fracture Mechanics—field, theoretical, and laboratory analyses of the mechanics of fault growth, rock fracture, dike propagation, landslides, and crustal deformation; these topics are relevant to plate tectonics, structural geology, and engineering geology.

Entrance may be through majors in geophysics, geology, mathematics, physics, or engineering. Students need a background in geology (which can be obtained in graduate school) together with supporting mathematics and physics.

**Marine and Environmental Geology (MEG).** The Marine and Environmental Geology (MEG). The Marine and Environmental Geology program is focused on the dynamic physical, biological, and chemical interactions that characterize Earth surface terrestrial and marine environments and also the history of these interactions over the course of geologic time. Researchers work on problems ranging from those of pure scientific curiosity of global phenomena to pragmatic problem-solving of environmental problems, and including everything in-between. Faculty and students of the MEG group travel to field sites all over the world to study processes and interactions between water, atmosphere, sediments, and living tissues, and their travel also includes several large-scale projects located within the Hawaiian Islands. Research also extends backward through deep time, integrating the biological and physical aspects of earth history through the study of rocks and fossils. Instruction is designed to provide students with hands-on exposure to the most exciting, contemporary issues in environmental science, particularly on topics where the fields of geology and oceanography overlap with other environmental sciences. Laboratories use the newest biogeochemical technologies and instrumentation in order to assess the health and integrity of coastal systems, to reconstruct past climates and life forms, to characterize the movement of precious water resources, and to understand the chemical cycling of both organic and inorganic components of the ocean. MEG research topics carry important implications and benefits for the sustainability of fresh water resources and reserves, agriculture, coastal and marine ecosystems, fisheries, Hawai'i's beaches and economy, and other topics of immediate societal concern.

Many research efforts in this program involve participation in oceanographic expeditions. Graduate students are encouraged to participate in these voyages as a part of their career training. The program is multidisciplinary with cooperating faculty and courses from several other departments including civil engineering, geography, oceanography, and soil sciences. The diverse research and teaching interests of the faculty make it possible to tailor graduate degree work to fit the needs and desires of the student. Requirements for admission typically include an undergraduate major in geology or one of the other natural sciences, along with basic courses in physics, chemistry, and mathematics. Students often study a combination of geology, geophysics, oceanography, biology, civil engineering, and/or geochemistry, as appropriate for his or her optimum intellectual development.

**Volcanology, Geochemistry, and Petrology (VGP).** UH Mānoa is uniquely situated to study all major aspects of volcanic systems. Active Hawaiian volcanoes are natural laboratories of intraplate volcanism and hydrothermal activity; eroded fossil volcanic systems on other islands provide windows into deeper volcanic structures; and Hawai'i is at the center of the Pacific "Ring of Fire." Collectively, the VGP group has active field

programs that are global in scope. The group studies submarine volcanoes with UH Mānoa and other research vessels, and on terrestrial volcanoes around the world, and participates in remote monitoring of volcanoes on Earth and other planets using ground-based and space-borne observatories. Faculty of the VGP group operate a wide range of modern, well-equipped, state-of-the-art analytical laboratories that provide data on the chemical composition and physical properties of rocks and minerals. In addition, VGP covers basic courses in Hawaiian geology, geologic hazards, geochemistry, optical mineralogy, petrology, structural geology, volcanology, geological field methods, remote sensing and GIS techniques.

Specialized topics that members of the group study include (a) geometry and dynamics of mantle flow, melt generation and magma chamber processes at submarine volcanoes from petrologic, geochemical, and isotopic variations at mid-ocean ridges and back-arc basin spreading centers; active volcanism at submarine volcanoes; geochronology of submarine volcanism, and volcano interactions with the submarine environment; (b) physical processes at volcanoes giving rise to degassing, and fragmentation of magma in conduits; transport and deposition from volcanic plumes and pyroclastic density currents; flood basalts and the eruption and emplacement of lavas; caldera volcanoes and ignimbrites; volatile degassing and retention in magma chambers; environmental impact and social consequences of eruptions; and volcanic processes on extraterrestrial bodies. (c) geochemical and isotopic tracing of mantle composition and evolution; geochemical cycling; geosphere-hydrosphere exchanges; (d) petrologic, geochemical, isotopic, and geologic evolution of Hawaiian and other oceanic islands and seamounts; petrologic, seismic, and geodetic monitoring of magmatic systems at active Hawaiian volcanoes; satellite monitoring of volcanic hazards and eruption clouds; remote-sensing observation of extraterrestrial volcanoes.

Entrance through majors in geology or chemistry is most typical. Students need a background in geology (which can be obtained in graduate school) together with supporting mathematics and physics.

**Planetary Geoscience and Remote Sensing.** This program, centered in the Hawaiian Institute of Geophysics and Planetology (HIGP), studies the geology and composition of objects (planets, asteroids, moons, and meteorites) in the Solar System to understand their origin and evolution. It involves research in planetary and terrestrial geology, cosmochemistry, volcanology, planetary astronomy, and scientific instrumentation. Current research areas include: (a) research on extraterrestrial materials from asteroids, the Moon, and Mars as records of processes in the solar nebula; alteration processes; the effects of shock; igneous processes; and planetary crustal compositions and evolution; (b) remote sensing and petrology of the moon, Mars, and Mercury to understand planetary formation, differentiation, and weathering of planetary crusts, volcanic processes, and the mode of formation of impact craters. Faculty are science team members on multiple planetary missions (MESSENGER, Lunar Reconnaissance Orbiter, Mars Odyssey, and Mars Reconnaissance Orbiter); (c) terrestrial remote sensing using spacecraft (Landsat 7, EO-1, Terra, Aqua, GOES), aircraft, and ground observations to study the flux of magma through volcanic systems, eruption precursors, forest fires worldwide and the like. Data from the GOES geostationary satellite are made available on the HIGP website ([goes.higp.hawaii.edu](http://goes.higp.hawaii.edu)) and MODIS thermal alerts for the entire world are made available at [modis.higp](http://modis.higp).

hawaii.edu. Imaging radar remote sensing is also conducted within HIGP. This includes interferometric studies of volcano deformation using ENVISAT and ALOS data for understanding magma emplacement and volcano tectonics. HIGP is a major partner (with the College of Engineering) in the Hawai'i Space Flight Laboratory, which includes preparation for future UH-led space missions involving small satellites; (d) developing instruments for use in studying global and regional problems in Earth and planetary science, such as hyperspectral thermal infrared imagers for use in lithologic mapping, the analysis of temperature anomalies, the flux of sulfur dioxide from volcanoes, an infrasonics array for a global monitoring system for the detection of atmospheric disturbances, and lidar systems for the measurement of atmospheric aerosols and rock compositions.

Typically, an undergraduate major in geology, astronomy, physics, or engineering, along with basic courses in chemistry, physics, and mathematics, would be sufficient for entrance. The student should be prepared to commence or continue course work in whatever combination of geology, geophysics, geochemistry, planetary science, spectroscopy, radar science, or remote sensing is appropriate for optimum development in the field and to satisfy minimum requirements in the Geology and Geophysics department.

### Faculty

- J. E. Schoonmaker, PhD (Undergraduate Chair)—sedimentary geochemistry and diagenesis; interpretation of paleoenvironment and paleoclimate sedimentary records
- J. M. Becker, PhD—geophysical fluid dynamics, nonlinear waves and stability, coastal processes, general ocean circulation
- D. Beilman, PhD—long-term terrestrial ecology, paleoscience approaches to global change science, carbon cycling
- R. R. Bidigare, PhD—bio-optical oceanography, pigment biochemistry, plankton metabolism
- S. Businger, PhD—mesoscale and synoptic meteorology
- B. C. Bruno, PhD—planetary geosciences, geoscience education
- G. S. Carter, PhD—physical oceanography, ocean mixing, tides, internal waves
- M. J. Church, PhD—microbial oceanography, aquatic nitrogen cycling, and microbial physiology
- A. D. Clarke, PhD—physical and chemical properties of aerosol in remote troposphere, aircraft studies of aerosol in free troposphere
- M. J. Cooney, PhD—anaerobic digestion of high strength wastewaters, development of next generation biofilm carriers for use in packed bed anaerobic digesters, solvent based bio-oil extraction from biomass
- E. H. DeCarlo, PhD—aquatic chemistry; metals and their anthropogenic inputs, transformations, fate and transport
- J. L. Deenik, PhD—soil fertility and soil quality, nitrogen and carbon cycling in agroecosystems, traditional agroecosystems, biochar and sustainable agriculture
- S. Dollar, PhD—biogeochemistry, nearshore processes and effects of human activity on the coastal zone
- J. C. Drazen, PhD—deep-sea ecology and fisheries, energetics and trophodynamics, physiological ecology of marine fishes
- A. El-Kadi, PhD—hydrogeology, modeling groundwater systems
- R. C. Ertekin, PhD—hydrodynamics, computational methods, offshore and coastal engineering, oil-spill spreading, fishpond circulation, ocean renewable energy
- E. Firing, PhD—ocean circulation and currents on all scales, with emphasis on observations and dynamics
- P. J. Flament, PhD—dynamics of surface ocean layer, mesoscale structures, remote sensing, water-types formation subduction and thermocline ventilation, mixing process
- C. H. Fletcher, PhD—quaternary and coastal marine geology, sea-level history, coastal sedimentary processes
- P. Fryer, PhD—marine geology, petrology, tectonics
- E. Gaidos, PhD—molecular evolution; microbiology of extreme environments; biosphere-climate feedbacks; critical intervals in Earth history; exobiology; biological networks
- M. O. Garcia, PhD—volcanology, igneous petrology, geochemistry
- T. W. Giambelluca, PhD—interactions between the atmosphere and the land surface, including influences of land use and land cover change on climate and surface hydrology and effects of global climate change on hydrologic processes and terrestrial ecology
- B. T. Glazer, PhD—biogeochemical processes in marine environments; use of molecular methods to characterize and understand synergy of geomicrobiology
- C. R. Glenn, PhD—paleoceanography, marine geology, sedimentology, sediment diagenesis
- E. Goetze, PhD—marine zooplankton ecology; dispersal and gene flow in marine plankton populations; evolution, behavioral ecology and systematics of marine calanoid copepods
- E. G. Grau, PhD—environmental physiology and comparative endocrinology of fish
- M. P. Hamnet, PhD—coastal zone management; fisheries economics; disaster preparedness and mitigation
- D. T. Ho, PhD—air-water gas exchange, tracer oceanography, carbon cycle, and environmental geochemistry
- P. Kemp, PhD—growth, activity and diversity of marine microbes; biosensor applications in microbial oceanography; molecular ecology of marine bacteria
- D. E. Konan, PhD—international trade, microeconomics, computational economics
- K. Lowry, PhD—design, planning and evaluation of ocean and coastal management programs; experience in Hawai'i, Indonesia, Sri Lanka, Philippines and Thailand
- R. Lukas, PhD—physical oceanography, interannual and decadal climate variability
- F. T. Mackenzie, PhD—geochemistry, biogeochemical cycling, global environmental change, Program Coordinator for GES
- S. J. Martel, PhD—engineering and structural geology
- M. A. McManus, PhD—coast circulation, mesoscale processes, physical-biological interactions in the ocean
- G. M. McMurtry, PhD—geochemistry, geology and geophysics
- C. Measures, PhD—trace element geochemistry, shipboard analytical methods, atmospheric deposition to the oceans, elemental mass balances
- M. Merlin, PhD—biogeography, natural history of the Pacific
- M. A. Merrifield, PhD—physical oceanography; coastal circulation; sea level variability; current flows and mixing in the vicinity of coral reefs, islands and seamounts
- T. Miura, PhD—remote sensing of terrestrial vegetation, GIS
- G. F. Moore, PhD—marine geophysics, structural geology
- M. J. Mottl, PhD—hydrothermal processes, geochemical cycles

- P. Mougini-Mark, PhD—volcanology from space, remote sensing of natural hazards
- P. K. Muller, PhD—ocean circulation, waves and turbulence
- A. B. Neuheimer, PhD—quantitative ecology of fish and aquatic invertebrate populations, with applications to evolutionary biology, physiology, ecosystem dynamics, resource management, and climate issues
- B. N. Popp, PhD—isotope biogeochemistry, organic geochemistry
- J. N. Porter, PhD—atmospheric science, use of satellites to study aerosol and cloud forcing, ship measurements of aerosol and cloud optical properties
- B. S. Powell, PhD—numerical modeling, variational data assimilation, ocean predictability, ocean dynamical modes, and ocean ecosystem dynamics
- M. S. Rappe, PhD—ecology of marine microorganisms; genomics; coral-associated microorganisms; ecology of microorganisms in the deep subsurface
- G. Ravizza, PhD—paleoceanography and environmental chemistry; geologic history of chemical weathering; geochemistry of recent and ancient metalliferous sediments; anthropogenic influences on the geochemical cycles of the platinum group elements; chemical signatures of extraterrestrial matter in marine sediments; biogeochemistry of molybdenum in the marine environment
- K. J. Richards, PhD—observations and modeling of ocean processes, ocean dynamics, ocean atmosphere interaction, ecosystem dynamics
- M. A. Ridgley, PhD—resource management and human-environment system analysis
- J. Roumasset, PhD—environmental economics and sustainable growth
- K. Rubin, PhD—isotope geochemistry, chronology
- K. Ruttenger, PhD—biogeochemistry of phosphorus and phosphorus cycling in the ocean, rivers, and lakes; nutrient limitation of aquatic primary productivity; effects of redox chemistry on nutrient cycling; early diagenesis in marine sediments with focus on authigenic mineral formation and organic matter mineralization
- F. J. Sansone, PhD—biogeochemistry of permeable (sandy) sediments, coastal processes, trace-gas biogeochemistry, hydrothermal geochemistry
- N. Schneider, PhD—decadal climate variability, tropical air-sea interaction, coupled modeling
- S. K. Sharma, PhD—atmospheric instrumentation and remote sensing; Lidar, Raman, and infrared spectrometry and fiber-optic environmental sensors
- C. R. Smith, PhD—benthic and ecology, deep-sea biology, sediment geochemistry, climate-change effects on Antarctic ecosystems, marine conservation
- G. F. Steward, PhD—aquatic microbial ecology, molecular ecology and diversity of viruses and bacteria
- A. Timmermann, PhD—tropical climate variability, large-scale ocean circulation, Paleoclimatology, Earth-system modeling
- B. Wang, PhD—atmospheric and climate dynamics
- J. C. Wiltshire, PhD—marine minerals, mine tailings and disposal, remediation and submersible engineering and operations
- R. E. Zeebe, PhD—global biogeochemical cycles, carbon dioxide system in seawater and interrelations with marine plankton, paleoceanography, stable isotope geochemistry

**Degree Offered:** BS in global environmental science

## The Academic Program

Global environmental science is a holistic, scientific approach to the study of the Earth system and its physical, chemical, biological, and human processes. This academic program is designed to educate leaders and citizenry to become wise stewards of our planet. Global environmental science focuses on the global reservoirs of hydrosphere (water, primarily oceans), biosphere (life and organic matter), atmosphere (air), lithosphere (land, sediments, and rocks), and cryosphere (ice);

their interfaces; and the processes acting upon and within this interactive system, including human activities. In the course of their scientific studies, global environmental science students are able to investigate natural as well as economic, policy, and social systems and their response and interaction with the Earth system. Global environmental science has important ties to the more classical sciences of geology and geophysics, meteorology and climatology, oceanography, and ecology as well as to the social sciences. Thus, the scope of global environmental science is extremely broad. This breadth is reflected in the interdisciplinary nature of the faculty, which is primarily drawn from numerous departments and research institutions within the School of Ocean and Earth Science and Technology.

Global environmental science has much to offer the student who is interested in the environment and the effect of humans on the environment. The skills developed in global environmental science can be brought to bear on local, regional, and global environmental issues. Many of the critical environmental problems confronting humankind involve large-scale processes and interactions among the atmosphere, oceans, biosphere, cryosphere, shallow lithosphere, and people. Some of the problems derive from natural causes; others are a result of human activities. Some of the issues that global environmental science students deal with are: climatic changes from anthropogenic inputs to the atmosphere of CO<sub>2</sub> and other greenhouse gases; human interventions and disruptions in the biogeochemical cycles of carbon, nitrogen, phosphorus, sulfur, trace metals, and other substances; emissions of nitrogen and sulfur oxide gases and volatile organic compounds to the atmosphere and the issues of acid deposition and photochemical smog; depletion of the stratospheric ozone layer and associated increase in the flux of ultraviolet radiation to Earth's surface; increasing rates of tropical deforestation and other large-scale destruction of habitat, with potential effects on climate and the hydrologic cycle; disappearance of biotic diversity through explosive rates of species extinction; global consequences of the distribution and application of potentially toxic chemicals in the environment and biotechnology; interannual and interdecadal climate variability, e.g., El Niño/Southern Oscillation; eutrophication; water and air quality; exploitation of natural resources with consequent problems of waste disposal; earthquakes, tsunamis, and other natural hazards and prediction; and waste disposal: municipal, toxic chemical, and radioactive. In all cases, the student is encouraged to understand and appreciate the social, economic, and ultimately the policy decisions associated with these and other environmental issues.

Specifically with respect to learning objectives, the students develop competency in understanding how the physical, biological, and chemical worlds are interconnected in the Earth system. They obtain skills in basic mathematics, chemistry, physics, and biology that enable them to deal with courses in the derivative geological, oceanographic, and atmospheric sciences at a level higher than that of qualitative description. In turn, these skills enable the students to learn the subject matter of global environmental science within a rigorous context. The students develop an awareness of the complexity of the Earth system and how it has changed during geologic time and how human activities have modified the system and led to a number of local, regional, and global environmental issues. They become competent in using computers and dealing with environmental databases and with more standard sources of information in the field. They are exposed to experimental,

observational, and theoretical methodologies of research and complete a senior research thesis in environmental studies using one or more of these methodologies. Field work is encouraged for the senior thesis and, depending on the topic chosen by the student, can be carried out at the Hawai'i Institute of Marine Biology's Coconut Island facility, E. W. Pauley Laboratory, associated He'eia ahupua'a, or elsewhere.

The ultimate objective of the global environmental science program is to produce a student informed in the environmental sciences at a rigorous level who is able to go on to graduate or professional school; enter the work force in environmental science positions in industry, business, or government; enter or return to teaching with knowledge of how the Earth system works; or enter the work force in another field as an educated person with the knowledge required to become a wise environmental steward of the planet.

### Advising

Students contemplating a major in global environmental science should visit the program coordinator at the earliest opportunity. Inquire at the global environmental science office, Marine Science Building 205; tel. (808) 956-2910, fax (808) 956-9225; email: ges@soest.hawaii.edu.

## BS in Global Environmental Science

### University Core and Graduation Requirements

Of the 31 credits of General Education Core Requirements, 10 are in math and science and are fulfilled through the GES degree. Graduation Requirements include 8 Focus courses, 7 of which can currently be taken through the GES program [Contemporary Ethical Issues (OCN 310), Oral Communications (OCN 490), and 4 Writing Intensive courses (BIOL 171L, 172L, OCN 320, 401, and 499)]. GES majors are required to complete one year of Hawaiian/Second Language.

### Global Environmental Science Requirements

Aside from General Education Core and Graduation requirements, the global environmental science program has core requirements of two basic types: basic sciences and derivative sciences. The former provides the foundation to understand and appreciate the latter in the context of basic skills and mathematics, biology, chemistry, and physics. Both global environmental science core requirements provide the necessary cognitive skills to deal with the higher academic level courses within the global environmental science curriculum. These include 7 required foundation courses in global environmental science and a minimum of 4 coupled systems courses. It is within this latter category of course work that the formal course program will be tailored to the individual student's needs. For example, we anticipate that most students will follow closely a natural science track of study, perhaps concentrating on the terrestrial, marine, or atmospheric environment. However, because of the human dimensions issues involved in the subject matter of environmental change, some students may wish to expand their academic program into the social sciences that bear on the issues of global change.

A minimum grade of C must be obtained in all GES required courses.

### Core Basic Sciences Requirement (38 hours)

- BIOL 171/171L, 172/172L
- CHEM 161/161L, 162/162L

- MATH 241, 242
- MATH 243, 244 or OCN/GG 312, ECON 321
- PHYS 170/170L, 272/272L

### Core Derivative Sciences Requirement (11 hours)

- GG 101/101L or GG 170
- MET 200
- OCN 201/201L

### Foundation Course Requirements (18 hours)

- GEOG 411 Past Global Change and the Human Era or GEOG 410 Human Role in Environmental Change
- OCN 100 Global Environmental Science Seminar
- OCN 310/310L Global Environmental Change/Lab
- OCN 320 Aquatic Pollution
- OCN 363 Earth System Science Databases
- OCN 401 Biogeochemical Systems

### Coupled Systems Courses (4 minimum—Examples)

- ASTR 240 Foundations of Astronomy
- BIOC 241 Fundamentals of Biochemistry
- BIOL 265 Ecology and Evolutionary Biology
- BIOL 301 Marine Ecology and Evolution
- BIOL 404 Advanced Topics in Marine Biology
- BOT 350 Resource Management & Conservation in Hawai'i
- BOT 480 Algal Diversity and Evolution
- ECON 358 Environmental Economics
- ECON 458 Project Evaluation and Resource Management
- ECON 496 Contemporary Economic Issues
- ECON 638 Environmental Resource Economics
- GEOG 300 Introduction to Climatology
- GEOG 388 Introduction to GIS
- GEOG 401 Climate Change
- GEOG 402 Agricultural Climatology
- GEOG 404 Atmospheric Pollution
- GEOG 405 Water in the Environment
- GG 301 Mineralogy
- GG 309 Sedimentology and Stratigraphy
- GG 420 Coastal Geology
- GG 421 Geologic Record of Climate Change
- GG 425 Environmental Geochemistry
- GG 444/OCN 444 Plate Tectonics
- GG 455 Hydrogeology
- GG 466 Planetary Geology
- MET 302 Atmospheric Physics
- MET 303 Introduction to Atmospheric Dynamics
- MICR 401 Marine Microbiology
- NREM 301/301L Natural Resources Management/Lab
- NREM 302 Natural Resource and Environmental Policy
- NREM 304 Fundamentals of Soil Science
- NREM 461 Soil and Water Conservation
- OCN 330 Mineral and Energy Resources of the Sea
- OCN 331 Living Resources of the Sea
- OCN 403 Marine Functional Ecology and Biotechnology
- OCN 435 Climate Change and Urbanization
- OCN 480 Dynamics of Marine Ecosystems: Biological-Physical Interactions in the Oceans
- OCN 620 Physical Oceanography
- OCN 621 Biological Oceanography

- OCN 622 Geological Oceanography
- OCN 623 Chemical Oceanography
- OCN 630 Deep-Sea Biology
- OCN 633 Biogeochemical Methods in Oceanography
- OCN 638 Earth System Science and Global Change
- PHIL 315/OCN 315 The Role of Models in Global Environmental Science
- PHIL 316 Science, Technology, and Society
- PLAN 310 Introduction to Planning
- POLS 316 International Relations
- SOC 412 Analysis in Population and Society
- ZOOL 410 Corals and Coral Reefs
- ZOOL 466 Fisheries Science

The student may also wish to take additional courses in fundamental physics, chemistry, biology, or mathematics. Global environmental science currently has three optional tracks (or combination of electives):

1. **Marine science and environment:** In this track, the student concentrates his or her studies in marine/ocean science and the application of their work to environmental problems related to the ocean. The student is encouraged to take as many oceanography courses as practical and to have a senior thesis problem that is related to ocean studies. It is within this track that a student's program can be designed so that the student is able to apply to graduate school in oceanography.
2. **Policy/economics and environment:** this track enables the student, after satisfying the GES science core, to concentrate further course work and the senior thesis in environmental economics, policy, and law. This is probably the best route for a student to take who is going directly into the work place or is simply interested in becoming a wise environmental steward of the planet.
3. **Climate and environment:** this track enables the student to concentrate academic studies and the senior thesis topic on the interactions between climate and the environment, on human impacts on climate, and the causes of climatic change. The student is encouraged to take coupled systems courses in meteorology and climatology.

Majors should consult with their advisor as early as possible to devise a curriculum suited to their particular goals.

#### Directed Reading

- OCN 399 Directed Reading

Course offering with an individual faculty member to do a one-on-one study on a topic of particular interest to you.

This could be used to explore a topic before deciding on a senior thesis, or because you are interested in an area in which there isn't a formal course offering. It can be taken for CR/NC or for a grade and you can register for 1-3 credits. This is not considered a CS class.

#### Senior Research Thesis (5-8 hours)

- OCN 490 Communication of Research Results
- OCN 499 Undergraduate Thesis

Each student is required to complete a senior thesis based on research conducted with one or more chosen advisors, and to make a public presentation of their research results.

## Marine Biology

See the "Interdisciplinary Programs" section of the *Catalog* for more information on the Marine Biology Graduate Program.

## Meteorology

HIG 350  
2525 Correa Road  
Honolulu, HI 96822  
Tel: (808) 956-8775  
Fax: (808) 956-2877  
Email: metdept@hawaii.edu  
Web: www.soest.hawaii.edu/MET

#### Faculty

- \*G. M. Barnes, PhD (Chair)—mesometeorology, hurricanes, and boundary layer meteorology
- \*M. M. Bell, PhD—radar meteorology, tropical cyclones, and mesoscale meteorology
- \*S. Businger, PhD—mesoscale and synoptic meteorology, satellite meteorology, storm structure and dynamics
- \*Y. L. Chen, PhD—mesoscale meteorology, heavy rainfall
- \*P. S. Chu, PhD—climate variability and natural hazards, tropical cyclones, climate prediction
- \*J. D. Griswold, PhD—satellite remote sensing of clouds and aerosol, cloud microphysics, aerosols and climate meteorology
- \*K. P. Hamilton, PhD—dynamical meteorology and climate dynamics
- \*F. F. Jin, PhD—atmospheric dynamics, climate dynamics
- \*T. Li, PhD—climate dynamics and coupled atmosphere-ocean modeling
- \*D. E. Stevens, PhD—atmospheric dynamics
- \*B. Wang, PhD—climate dynamics, geophysical fluid dynamics, and tropical meteorology
- \*Y. Wang, PhD—atmospheric dynamics and physics, climate modeling, tropical meteorology
- \*S. P. Xie, PhD—large scale ocean-atmosphere interaction, climate dynamics
- \*J. Zhao, PhD—atmospheric chemistry and aerosols

#### Cooperating Graduate Faculty

- A. D. Clarke, PhD—marine aerosols, biogeochemical cycles, optical properties
- J. Porter, PhD—satellite and ground-based optical sensing of atmospheric aerosols

**Degrees Offered:** BS (including minor) in meteorology, MS in meteorology, PhD in meteorology

#### The Academic Program

Meteorology (MET) is the study of phenomena in the Earth's atmosphere. These phenomena include the daily weather and climate. Students pursuing the BS in meteorology receive preparation for professional employment in meteorology and are qualified for employment in the federal meteorological agencies. The meteorology major must be well-grounded in the fundamentals of mathematics and physics. Thus BS graduates are qualified to pursue graduate studies both in meteorology and other applied sciences, such as oceanography or computer sciences. Graduate degrees prepare students to pursue research careers both with government and in academia.

The meteorology program at UH Mānoa is unique in its focus on tropical meteorology. The tropics exert critical controls on the global atmosphere. BS students receive comprehensive training in tropical weather analysis and forecasting. Graduate students often pursue thesis research in tropical meteorology; some study topics that take advantage of Hawai'i's unique natural laboratory. Some students pursue graduate thesis research with funding from the National Weather Service, whose Honolulu Weather Forecast Office is housed in the same building as the meteorology department. Meteorology faculty cooperate actively with physical oceanography faculty through the Joint Institute for Marine and Atmospheric Research and the International Pacific Research Center in the study of air-sea interaction and climate variability. Students also have access to both research databases and cooperative employment opportunities at the Joint Typhoon Warning Center, Pearl Harbor.

### Affiliations

UH Mānoa is an active member of the University Corporation for Atmospheric Research.

### Advising

Inquire about the major by contacting the department office (808) 956-8775. Graduate students are assigned individual faculty advisors by the graduate chair after their preliminary conference.

## Undergraduate Study

### Bachelor's Degree

#### Requirements

Students must complete 120 credit hours, including:

- General Education Core (see the "Undergraduate General Education Requirements" section of this *Catalog*).
- MET 101L and 200
- MATH 241, 242, 243, and 244 (Students planning careers with federal meteorological agencies should take MATH 405.)
- PHYS 170/170L and 272/272L
- 21 credit hours in meteorology courses numbered 300 and above, including MET 302, 303, 305, and 402; and MET 412 or 416 (Students planning careers with federal meteorological agencies should take at least two courses from 405, 412 and 416.)
- 15 additional credit hours from physical and mathematical sciences (e.g., engineering, geography, geology and geophysics, information and computer sciences, mathematics, oceanography, physics, and soil science) including (but not limited to) MET 310, 405, 406, and 600; MET 412 or 416; CEE 424 and 626; GEOG 300, 303, 402, and 412; GG 455; ICS 211, 311, and 442; MATH 311, 371, 373, 402, 403, and 405; OCN 620; PHYS 274/274L and 400
- CHEM 161/161L and 162
- ICS 111 or MET 320

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Student Learning Outcomes (BS Meteorology)

1. Apply physical principles to explain the thermal structure of the atmosphere.

2. Describe atmospheric circulation systems.
3. Develop and explain a forecast in the short-to-medium time range.
4. Know the design and use of instrumentation, computer software, and data interpretation methods in atmospheric studies.
5. Be able to explain ideas and results through written, numerical, graphical, oral, and computer-based forms of communication.
6. Be adaptable to new avenues of scientific inquiry, which offer interdisciplinary and practical applications to commercial and public needs for atmospheric studies.

### Minor

#### Requirements

Students must complete 15 credit hours of non-introductory courses, including:

- MET 200, 302, and 303
- 6 credits of electives from MET 305, 310, 405, 406, 412 and 416

### Graduate Study

The department offers MS and PhD degrees. Through courses in dynamic, synoptic, and physical meteorology, students develop a strong foundation in tropical meteorology, the department's special field, and are prepared to do research in the atmospheric sciences.

Candidates should have a thorough preparation in physics (with calculus), chemistry, and mathematics through differential equations. Undergraduate courses in physical, dynamic, and synoptic meteorology are expected, but they can be taken in the first year. The application deadline for fall semester is **January 15** for both U.S. and international applicants. The application deadline for spring semester is **August 15** for international applicants, and **September 1** for U.S. applicants.

### Master's Degree

#### Requirements

Graduation with a master's degree requires completion of an acceptable thesis and a successful defense of the thesis in an oral examination.

A total of 30 official course credit hours must also be earned. This will be made up of:

1. At least 18 credits of regular course work (i.e., excluding MET 699, 700 and 765), with a minimum of 12 credits in courses numbered 600 and above.
2. 1 credit of MET 765
3. 6 credits of MET 700 Thesis Research and
4. 5 more credits either from regular courses or MET 699

#### Directed Research

Our core requirements include MET 600, 610, 620 and one term of synoptic meteorology (MET 412 or 416), unless a student has completed an equivalent synoptic meteorology course elsewhere with at least a B-.

Students must obtain a minimum GPA of 3.0 for the courses counted as our core (MET 600, 610, and 620, plus one of MET 412 or 416, if that is taken by the student).

As well, students must maintain a GPA of at least 3.0 for the courses they take in the MS program.

## Doctoral Degree

The PhD student exhibits a higher level of independence and originality of thought than that required of the MS student.

### Requirements

Students must satisfy several requirements in order to graduate with a PhD degree. Each student is required to pass at least 8 graduate level courses numbered 600 and above with a grade of B- or higher. These courses will be in dynamic, synoptic, physical, tropical meteorology, oceanography, or other closely related fields. At least five of these courses must be completed at the UH Mānoa campus. At the discretion of the graduate chair, a student must be awarded credit for up to three relevant graduate courses taken elsewhere. The courses taken either here or elsewhere need to cover the core requirements MET 600, 610, 620 and one of 412 or 416. A student must pass each of these core courses with a grade of at least B-. A student must obtain a minimum 3.0 GPA in the core courses taken at UH Mānoa. A student must also maintain a GPA of at least 3.0 for all the courses taken in the PhD program at UH Mānoa.

After these 8 courses are successfully completed, but no later than the 24th month in the PhD program, each student must pass a two-part comprehensive examination. The purpose of this exam is to ascertain the student's comprehension of the broad field of meteorology and so to insure that the student is well prepared for PhD research. The first part of the comprehensive examination is a set of written exercises completed on a single day. Within 3 to 7 days after the written exam, the student sits for the oral portion with his or her committee. No later than 12 months after successful completion of the comprehensive examination, each student is required to submit a written research prospectus for approval to his or her dissertation committee.

A PhD student must also successfully complete two semesters of MET 765 during his or her PhD studies (MET 765 taken before the student was admitted to the PhD program cannot be counted towards satisfying this requirement).

Finally, the student must complete an acceptable PhD thesis and successfully defend it in a public final oral defense.

### Faculty

- \*B. M. Howe, PhD (Chair)—acoustical and physical oceanography, tomography, sensors and network infrastructure
- \*J. C. Wiltshire, PhD (Associate Chair)—submersibles, ROV, marine minerals, marine mining technology
- \*K. F. Cheung, PhD (Graduate Chair)—coastal and offshore engineering, marine hydrodynamics, computational methods, water wave mechanics, coastal flood hazards
- \*R. C. Ertekin, PhD—hydrodynamics, ocean renewable energy, offshore engineering, nonlinear waves, computational mechanics
- \*B. D. Greeson, PhD—offshore engineering, hydrodynamics, ROV/submersible operations
- \*Z. Huang, PhD—coastal and ocean engineering, wave-structure interactions, wave energy conversion, natural hazards-tsunamis, coastal sediment transport, coral reef hydrodynamics
- \*G. C. Nihous, PhD—ocean thermal energy conversion, marine renewable energy
- \*E. Nosal, PhD—passive acoustic monitoring methods, ocean ambient noise, sediment acoustics, bioacoustics

### Cooperating Graduate Faculty

- J. M. Becker, PhD—general ocean circulation
- B. S. Bingham, PhD—robotics, autonomous navigation, dynamics and controls
- M. Chyba, PhD—control theory
- R. Ghorbani, PhD—dynamics, controls, design, alternative energy
- B. Glazer, PhD—instrumentation
- S. M. Masutani, PhD—ocean resources engineering
- G. McMurtry, PhD—oceanographic engineering
- M. A. Merrifield, PhD—coastal and near-shore processes
- H. R. Riggs, PhD—structural engineering
- J. R. Smith, PhD—marine survey

### Affiliate Faculty

- E. Pawlak, PhD—coastal mixing processes, fluid dynamics, sediment transport
- D. Rezachek, PhD—ocean energy and engineering design
- J. Van Ryzin, PhD—mechanical and ocean engineering
- D. Vithanage, PhD—coastal engineering, nearshore circulation

**Degrees Offered:** MS in ocean and resources engineering, PhD in ocean and resources engineering

### The Academic Program

Ocean and Resources Engineering is the application of ocean science and engineering design to the challenging conditions found in the ocean environment and to the synthesis of novel products from marine systems. Waves and currents, turbulence, dynamic loads, mobile sediment, high pressure and temperature variations, ocean acoustics, marine instrumentation, as well as chemical and biological processes, are among the considerations that set ocean and resources engineering apart from conventional land-based engineering.

Educational and research emphasis is placed on coastal engineering, offshore engineering, and ocean resources engineering. Coastal engineering deals with coastal and harbor problems, sediment transport, nearshore environmental engineering, and coastal flood hazards due to storm surge and tsunamis. Offshore engineering is concerned with structures and systems used in the deeper parts of the ocean, including the continental shelf. It also includes hydrodynamics of fluid-body interaction, seakeeping and dynamic responses of marine vehicles and platforms, and hydroelasticity of very large floating structures. Ocean resources engineering is concerned with the engineering systems to develop the energy, minerals and living resources of the oceans, the use of the ocean for waste disposal, and the environmental and economic aspects of these activities. The MS program in ocean and resources engineering is accredited by the Accreditation Board for Engineering and Technology (ABET), which provides accreditation services to the first degree offered by engineering programs.

The educational and research programs in the department have a good balance between numerical and laboratory modeling as well as field observation. Computing facilities include 5 Linux systems and a network of Pentium-based PCs. The cluster Kiwi comprises a 44 TB RAID and 22 processing nodes each containing 2 Intel Quad Core X5460 processes with 24 GB RAM. The department also maintains a number of software packages that are available to the students for course work and research.

The department's Environmental Fluid Dynamics Laboratory (EFDL) focuses on the study of coastal marine processes including turbulent dispersal of pollutants and nutrients, wave dynamics, and sediment transport as well as fundamental fluid processes such as vortex breakdown and boundary layer turbulence. In addition, the laboratory is home to the Environmental Fluid Dynamics Education Laboratory, which serves as a center for teaching of fluids phenomena. Laboratory instrumentation includes acoustic Doppler velocimeters (ADVs) which obtain high frequency, single point, 3-component velocity measurements, and a laser-based digital particle imaging velocimetry (DPIV) system that obtains two-dimensional fluid velocity via laser imaging techniques. A pulsed Nd:YAG laser and UV light system with digital still and video cameras are used for flow visualization and measurement. The EFDL houses multiple experiment tanks, which are used for both research and teaching demonstrations. These include a 10-meter long, 30 x 10 cm wave channel, and a small rotating table. The tanks allow demonstration of a range of fluid flow phenomena including wave breaking, downslope currents, internal waves in stratified fluids along with rotational effects such as spin-up, Ekman flow and geostrophy.

The department maintains facilities at Kewalo Basin and Snug Harbor in Honolulu for fieldwork and in-ocean experiments. The department operates the Kilo Nalu Observatory offshore of Kakaako, which provides cabled power and Ethernet for in-ocean experimentation at 10 and 20m depths. Kilo Nalu provides comprehensive, real-time observations of ocean currents, waves and water properties, and hosts multiple ongoing research projects focused on coastal ocean processes and instrument development. Field observational equipment includes a REMUS autonomous underwater vehicle (AUV), an LBV 150 remotely operated vehicle (ROV), an array of wave gauges, acoustic current profilers, and current meters. In addition, the department has access to a 25-ft twin-outboard motorboat, two

ocean-going vessels operated by SOEST, two 2000m depth submersibles operated by the Hawai'i Undersea Research Lab and a new 6000m ROV which services the ALOHA Cable Observatory (ACO). ACO is the deepest operating node (power and internet) on the planet. ACO provides real time acoustic monitoring and communication.

In ocean acoustics, gliders are being used as gateways communicating between underwater mobile and fixed nodes and pilots on shore. Hydrophones on gliders monitor for ambient sound including marine mammals, wind and rain, and shipping. Research on detection, classification, and tracking of marine mammals and divers is underway. Tomographic remote sensing work is being developed for use on small scales in local waters as well as on regional and basin scales.

The graduate program in ocean and resources engineering channels the students' previous engineering or scientific experience to ocean-related careers. Approximately 38% of the students graduating between Fall 2007–Fall 2013 found immediate employment in private industry including oil companies, engineering firms, environmental service firms and construction companies in the U.S. About 13% joined or continued their employment with federal or state agencies. 28% continued studies either by pursuing a higher degree or a post-doctoral position. 6% were employed by UH in engineering research positions. 4% returned to their countries of origin pursuing engineering. 2% received a tenure-track faculty position. 9% decided to pursue non-engineering positions. 62% of the graduates stayed in Hawai'i.

## Graduate Study

### Educational Objectives

The Department of Ocean and Resources Engineering offers a graduate program leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees. The goal of the program is to prepare students for the engineering profession and to conduct research in the support of the educational program. The objectives of the program at the MS level are to produce graduates who, during the first few years following graduation:

1. Are effective and creative engineers applying knowledge of mathematics and science to the solution of practical engineering problems;
2. Have general understanding of and ability to work in the ocean and resources engineering disciplines;
3. Are proficient in one or more of the ocean and resources engineering disciplines;
4. Are aware of professional, managerial, legal, ethical, and other non-technical issues commonly encountered in engineering practice;
5. Can communicate and work effectively with peers, clients, and the general public in promoting new ideas, products, or designs; and
6. Can adapt to the changing needs and technology of the ocean and resources industry.

The program at the PhD level shares these objectives with the additional emphasis to produce graduates who:

7. Are productive researchers conducting original research and developing new technology in ocean and resources engineering; and
8. Have the experience to publish in refereed journals.

This additional emphasis prepares the PhD graduate to pursue research careers in the industry or academia.

### Admission Requirements

Students are admitted for graduate study on the basis of their scholastic records. Degree candidates for the MS program usually have a bachelor's degree in an engineering discipline that provides an adequate background in mathematics, physics, chemistry, and mechanics. Students seeking admission to the PhD program should have an MS in engineering or equivalent qualification. However, exceptionally well qualified students with a BS in engineering, who do not have a master's degree, may petition to be admitted to the PhD program directly. Students with mathematics, physics, or other science backgrounds may be admitted to the program, but are required to take specific undergraduate engineering courses to satisfy the pre-program requirements.

Deadlines to submit applications for admission to the graduate programs are **January 15** for fall semester admission and **August 15** for spring semester admission. The ORE application checklist (available on the ORE website) lists all the forms and supporting documents that need to be submitted; some forms and documents are submitted to the Graduate Division while others are submitted directly to the ORE department.

Detailed Graduate Division requirements and forms are available at [manoa.hawaii.edu/graduate/content/prospective-students](http://manoa.hawaii.edu/graduate/content/prospective-students). Official scores in the GRE General Test are required from all applicants. Official TOEFL scores are required from all non-native English speaking students.

Forms required by the department can be downloaded from the ORE admissions webpage at [www.ore.hawaii.edu/OE/ore\\_admission.htm](http://www.ore.hawaii.edu/OE/ore_admission.htm):

- supplemental information form
- statement of objectives
- letter of recommendation form
- graduate assistantship application

Once an application is complete, the Graduate Division performs an initial screening to assure that admission requirements are satisfied. The Admission Committee and department chair then evaluate the application and determine the admissibility of the applicant to the ORE department.

### Master's Degree

The MS degree in ocean and resources engineering may be earned under either Plan A (thesis) or Plan B (non-thesis). The program requires a minimum of 30 credit hours. At least 24 credit hours must be earned in advanced courses numbered 600 or above. Up to 2 credit hours of directed reading and 6 transferred credits can be counted toward the MS requirements. Students are required to take the general examination during the first semester of their full-time enrollment to test their knowledge in mathematics, science, and basic engineering. Passing the examination advances the student to master's candidacy.

Students generally devote their first semester to the basic disciplines in ocean and resources engineering and then specialize in coastal, ocean resources, or offshore engineering by taking the required courses in the area. The core courses ORE 411, 601, 603, 607, and 609 cover the basic disciplines that include hydrostatics, hydrodynamics, oceanography, water waves, underwater acoustics, and field and laboratory work. One credit of seminars, ORE 792, is also included in the core

requirements. The required courses are ORE 661, 664, and 783B in coastal engineering; ORE 612, 630, and 783C in offshore engineering; and ORE 677, 678, and 783D in ocean resources engineering. The ORE 783 Capstone Design Project is team-taught by faculty members and practicing professional engineers to prepare students for the engineering profession. The core and required courses amount to 25 credit hours and the remaining credits are to be chosen to form a coherent plan of study.

Students complete their study with a Plan A thesis or a Plan B independent project. The thesis option is research oriented and students receive 6 academic credits for the work. The project option focuses on engineering application or design and carries 3 academic credits. Both require a proposal outlining the subject area, objectives, proposed methodology, sources of data, and anticipated results that must be approved by a committee of at least three graduate faculty members. The work results in a thesis or a report that demonstrates both mastery of the subject matter and a high level of communication skills. Students must present and defend the work at a final examination, which provides the faculty an opportunity to test the students' understanding and ability to integrate their work at the MS level.

The general and final examination may be repeated once. The general examination must be taken earlier than the semester in which the final examination is taken.

### PhD Degree

Students pursuing the PhD degree are required to achieve a broad understanding of the principal areas of ocean and resources engineering, as well as a thorough understanding of a specific area. Students must, at a minimum, possess the knowledge covered by the core courses of the MS degree in ocean and resources engineering.

All intended candidates for the PhD degree will take a written qualifying examination before or during the third semester of full-time enrollment. In addition to covering the basic undergraduate fundamentals, the examination tests the students' understanding of the course work at the MS level. After passing the examination and being advanced to candidacy, students must take a comprehensive examination, which tests their ability to carry out original research and preparation for the selected dissertation topic.

The dissertation topic must be approved by a committee consisting of a minimum of five graduate faculty members with at least one outside member. Students are encouraged to publish the research work in refereed journals in order to obtain feedback from the research community and to develop a publication track record prior to graduation. They must present and defend the novelty of the dissertation at a final examination.

The qualifying and comprehensive examinations may each be repeated only once. The final examination may not be repeated, except with approval of the graduate faculty involved and the dean of the Graduate Division.

### Advising

Upon admission, the department chair meets with each incoming student at a preliminary conference to discuss the program requirements and determine any pre-program deficiencies.

The graduate chair serves as the advisor to students without an undergraduate engineering degree until they satisfy the

pre-program requirements. Once pre-program requirements are met, the department chair appoints an academic advisor from the pool of ORE departmental faculty. The academic advisor is tasked with helping students navigate through the requirements of the program and ensuring that the guidelines are met. At the start of the research phase, students select a research advisor to guide their research and serve as their committee chair.

### Faculty

- \*M. J. Mottl, PhD (Chair)—submarine hydrothermal processes, geochemical cycles, sea-water-sea-floor chemical interaction
- \*R. Alegado, PhD—marine microbial ecology and evolution, symbioses, microbial predator-prey interactions, choanoflagellate-bacterial interactions
- \*P. Bienfang, PhD—phytoplankton ecology, ciguatera, aquatic pollution, aquaculture
- \*B. C. Bruno, PhD—planetary geosciences, geoscience education
- \*G. S. Carter, PhD—physical oceanography, ocean mixing, tides, internal waves
- \*M. J. Church, PhD—microbial oceanography, biogeochemistry, plankton biomass and production, ocean ecosystem dynamics
- \*A. D. Clarke, PhD—sea-salt and marine aerosols, global pollution, atmospheric optics, aerosol-cloud studies, biogeochemical cycles
- \*J. P. Cowen, PhD—marine microbial geochemistry, biogeochemistry, deep seafloor biosphere, deep-sea hydrothermal processes, water quality issues particle dynamics
- \*E. H. DeCarlo, PhD—aquatic geochemistry, environmental geochemistry, ocean observation systems, land/ocean/atmosphere interactions, CO<sub>2</sub>/carbonate mineral geochemistry in the coastal ocean and tropical coral reefs, trace element geochemistry
- \*J. Drazen, PhD—deep-sea ecology and fisheries, energetics and trophodynamics, physiological ecology of marine fishes
- K. F. Edwards, PhD—ecology of phytoplankton and other marine organisms; population and community ecology; theoretical ecology
- \*E. Firing, PhD—equatorial circulation, general circulation, physical oceanographic technology
- \*P. J. Flament, PhD—dynamics of the surface layer, mesoscale structures, remote sensing, water-types formation, subduction and thermocline ventilation, mixing processes
- \*B. T. Glazer, PhD—biogeochemical cycling, redox transition zone geomicrobiology, in situ electrochemical techniques
- \*E. Goetze, PhD—marine zooplankton ecology; dispersal and gene flow in marine plankton populations; evolution, behavioral ecology and systematics of marine calanoid copepods
- \*D. T. Ho, PhD—air-water gas exchange, tracer oceanography, carbon cycle, and environmental geochemistry
- \*D. M. Karl, PhD—microbiological oceanography, oceanic productivity, biogeochemical fluxes
- \*C. Kelley, PhD—deepwater habitats, ecology and fisheries, seafloor mapping and GIS
- \*P. Kemp, PhD—growth, activity and diversity of marine microbes; biosensor applications in microbial oceanography; molecular ecology of marine bacteria
- R. C. Kloosterziel, PhD—geophysical fluid dynamics, hydrodynamic, hydromagnetic stability
- \*D. S. Luther, PhD—oceanic waves from infragravity to Rossby, mesoscale variability, eddy-mean flow interaction, topography-catalyzed mixing, instrumentation, ocean observatories initiative
- \*J. P. McCreary, Jr., PhD—equatorial ocean dynamics, coupled ocean-atmospheric modeling, general ocean circulation, coastal ocean dynamics, ecosystem modeling
- \*M. McManus PhD—coastal circulation, mesoscale processes, physical-biological interactions in the ocean
- \*G. McMurtry, PhD—geochemistry of marine deposits, seafloor venting processes, chemical volcanology, stable and radioisotope geochemistry, geochronology, in situ instrumentation development
- \*C. Measures, PhD—trace element geochemistry, shipboard analytical methods, atmospheric deposition to the oceans, elemental mass balances
- \*M. A. Merrifield, PhD—physical oceanography, waves, currents, sea level variability
- \*P. Muller, Dr. rer. nat.—theoretical physical oceanography, foundations of complex system theories
- \*C. E. Nelson, PhD—microbial ecology and ecosystem science in oceans, coral reefs, and freshwater habitats
- \*A. Neuheimer, PhD—quantitative marine ecology of fish and invertebrates
- \*B. S. Powell, PhD—numerical modeling, variational data assimilation, ocean predictability, ocean dynamical modes, and ocean ecosystem dynamics
- \*B. Qiu, PhD—large-scale ocean circulation, ocean atmosphere interaction, satellite observations, and numerical modeling of ocean circulation
- \*K. Richards, PhD—ocean mixing processes, circulation and dynamics, ocean-atmosphere interaction, ecosystem modeling
- \*K. Ruttenger, PhD—biogeochemistry of phosphorus and associated bioactive elements in freshwater and marine aqueous and sedimentary systems, sediment diagenesis, organic matter reactivity and mineral authigenesis, effect of redox chemistry on element cycling, global biogeochemical cycles
- \*F. J. Sansone, PhD—biogeochemistry of permeable (sandy) sediments, coastal processes, trace-gas biogeochemistry, hydrothermal geochemistry
- \*N. Schneider, PhD—decadal climate variability, tropical air-sea interaction, coupled modeling
- \*J. E. Schoonmaker, PhD—sedimentary geochemistry and diagenesis, interpretation of paleoenvironment and paleoclimate sedimentary records
- \*K. Selph, PhD—biological oceanography, microbial ecology, protistan grazer feeding dynamics, phytoplankton distributions, use of flow cytometry in ecological research
- \*C. R. Smith, PhD—benthic ecology, deep-sea biology, sediment biogeochemistry, climate-change effects on Antarctic ecosystems, marine conservation
- \*G. F. Steward, PhD—marine bacteria and viruses, microbial genomics, molecular ecology and biogeochemical cycles
- \*A. Timmermann, PhD—tropical climate variability, large-scale ocean circulation, Paleoceanography, Earth-system modeling
- \*K. Weng, PhD—behavior, migration and habitat use of sharks and fishes, oceanography of key habitats of pelagic nekton, fishery management and conservation
- \*R. E. Zeebe, PhD—global biogeochemical cycles, carbon dioxide system in seawater and interrelations with marine plankton, paleoceanography, stable isotope geochemistry

### Cooperating Graduate Faculty

- W. L. Au, PhD—bioacoustics and ecological acoustics of the marine environment
- J. M. Becker, PhD—geophysical fluid dynamics, coastal processes, general ocean circulation

- R. Bidigare, PhD—bio-optical oceanography, nutrient cycling, phytoplankton pigment biochemistry, intermediary metabolism of marine plankton
- M. Cooney, PhD—isolation of antifouling compounds from marine algae, bioreactor design, and continuous cultivation of marine bacteria and copepods
- E. Gaidos, PhD—evolutionary genomics, geomicrobiology, astrobiology, paleobiology, and Earth history
- R. D. Gates, PhD—regulation and de-stabilization of coral/dinoflagellate symbioses, evolution and development of animal sensory systems
- P. H. Lenz, PhD—neuroecology of zooplankton sensory systems
- B. Popp, PhD—stable isotope biogeochemistry, marine organic geochemistry, isotopic biogeochemistry of individual biomarkers and gases
- M. Rappe, PhD—phylogenetic, genomic, and metabolic diversity of microorganisms including marine plankton, coral reef, and deep subsurface ecosystems
- F. Thomas, PhD—coral reef and coastal ecology, reproductive biology, hydrodynamics and biomechanics
- R. Toonen, PhD—larval ecology, coral reef biology, evolution, phylogeography and conservation genetics of marine invertebrates
- J. C. Wiltshire, PhD—geology and geochemistry of marine mineral deposits, marine mining and processing, minerals policy issues, research-submersible technology

#### Affiliate Graduate Faculty

- J. Aucan, PhD—surface waves and extreme wave events that can cause serious coastal flooding, ocean mixing and turbulence induced by internal waves
- R. Brainard, PhD—tropical reef-ecosystem integration, with a particular emphasis on the role of ocean variability on ecosystem health
- P. Falkowski, PhD—phytoplankton evolution and ecology, photosynthesis, coral biology, and biogeochemical cycles
- J. L. Falter, PhD—coral reef biogeochemistry, near-shore hydrodynamics
- C. M. Holl, PhD—stable isotopes, microbial N and C Cycling
- E. Laws, PhD—phytoplankton ecology, aquatic pollution, aquaculture
- D. W. Moore, PhD—geophysical fluid dynamics, equatorial oceanography
- G. Pawlak, PhD—coastal and estuarine mixing processes, stratified flows, sediment transport and laboratory experimental methods
- J. Polovina, PhD—research in biological oceanography in the Central and Western Pacific with focus on population dynamics of high trophic animals
- J. R. Sibert, PhD—ecology, biology of pelagic fisheries

#### Emeriti Graduate Faculty

- B. J. Huebert, PhD—air pollution, climate change, atmospheric aerosols, global elemental cycles, air-sea gas exchange
- Y. H. Li, PhD—marine geochemistry, marine pollution studies
- F. Mackenzie, PhD—geochemistry, sedimentology, greenhouse effect, biogeochemical cycles and global environmental change
- L. Magaard, Dr. rer. nat.—ocean waves, oceanic turbulence, oceanography of Hawaiian waters, climate and society

**Degrees Offered:** MS in oceanography, PhD in oceanography

### The Academic Program

Oceanography (OCN) is the study of the physics, chemistry, and geology of the ocean and the ecology of organisms that live within the sea. Physical oceanography is concerned with ocean circulation, waves, tides, upwelling, air-sea interactions, and the effect of the oceans on climate. Chemical oceanographers study the distribution of dissolved substances in the ocean and the mechanisms, both natural and anthropogenic, that control their form and abundance. Geological oceanography includes the study of sea-floor spreading, submarine volcanism, beach

formation, deep-seabed mineral resources, sediments, and paleoceanography. Biological oceanographers study the interactions of marine organisms with one another and the environment; topics include coral reef ecology, marine fisheries, hydrothermal-vent communities, plankton ecology, and near-shore and deep-sea benthic communities.

Because Hawai'i is located near the middle of the largest ocean on Earth, oceanography has a special significance for the state and UH Mānoa. At UH Mānoa, the oceanography facilities are among the best in the U.S. and include three ocean-going research vessels and two research submarines. Biological studies are facilitated by the presence of the Hawai'i Institute of Marine Biology on Coconut Island in Kāne'ohe Bay. Computing facilities are based on a growing network of nearly 300 Sun workstations, Macintosh, and personal computers. Precision instruments include mass spectrometers, gas and liquid chromatographs, liquid scintillation counters, a CHN analyzer, a flow cytometer, and a series of atomic spectroscopy-based instruments. The world-class faculty is actively involved in both teaching and research. UH Mānoa ranks fifth among universities in the nation in terms of National Science Foundation research funding for oceanographic research. The location, the facilities, and the faculty all make UH Mānoa an ideal place to study oceanography.

About 40 percent of marine scientists are employed by the U.S. government, especially by the defense, commerce, and interior departments. Another 40 percent teach and do research at academic institutions. About 20 percent are employed by industry.

The MS and PhD in oceanography are recognized WICHE regional graduate programs. Residents of Alaska, Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, Utah, Washington, and Wyoming are eligible, upon admission, to enroll at Hawai'i-resident tuition rates.

#### Advising

Each student admitted to the oceanography department is assigned an advisory committee by the department chair. The committee initially consists of three graduate faculty members from at least two of the subdisciplines of oceanography. When formed, the student's MS or PhD committee becomes the student's advisory committee. A student must meet with his or her advisory committee at least twice per year. A written report summarizing each meeting must be signed by the student and his or her committee and a copy placed in the student's file.

#### Graduate Study

The department offers master's and doctoral programs with areas of specializations in biological and physical oceanography, marine geology, and geochemistry.

Oceanography courses listed in this *Catalog* may be taken for credit in the degree program. Additional courses may be selected from such fields as botany, chemistry, engineering, geology, mathematics, meteorology, physics, and zoology.

#### Admission Requirements

Applicants must have intensive, rigorous training in one of the basic sciences or engineering. Regardless of major, an applicant must have completed mathematical training, including calculus through first-order ordinary differential equations (equivalent to Calculus IV at UH Mānoa). An applicant must also have a year each of physics and chemistry. The well-pre-

pared student will also have covered classical thermodynamics and applied differential equations and will have had a semester each of biology and geology. GRE test scores (General Test only) are required. Interested students should contact the department chair for further information. For U.S. applicants, the deadline for application for admission is **January 15** for the fall semester and **September 1** for the spring semester. For foreign applicants, the corresponding deadlines are **January 15** and **August 1**.

### **Major Requirements**

All students pursuing a degree program must take OCN 620, 622, and 623. For non-biological students, the sequence is completed by taking OCN 621. Biological students complete the sequence by taking OCN 626, 627, and 628. Marine geology and geochemistry students must take CHEM 351 (if they have not already successfully completed a college-level course in physical chemistry). Students may be admitted to the MS program upon successful completion of the appropriate sequence. To be admitted to the PhD program, a student must receive a positive recommendation from a PhD-qualifying committee.

### **Degree Requirements**

Both the MS and PhD programs require a minimum of 36 credit hours, including 24 credit hours of course work. The 24 semester hours of course work must be in courses numbered 600 or above (excluding OCN 699 and 700 and seminar courses). At least 12 of those semester hours must consist of courses taken from three of the following groups: biological oceanography, geological oceanography, chemical oceanography, physical oceanography, mathematical methods and statistics, and meteorology. MS students are required to take six credits of OCN 699 (Directed Research) and six credits of OCN 700 (Thesis Research).

Prior to completion of their graduate degree, biological oceanography students must have satisfactorily completed either an undergraduate or graduate course in statistics. Students specializing in marine geology and geochemistry must take at least one, and preferably more, advanced biogeochemistry course. All students must complete a seminar requirement, demonstrate computer competency, and accumulate at least 30 days of field experience. PhD candidates must also pass a comprehensive examination. All students must pass a final oral examination in defense of their thesis/dissertation.

## General Information

Outreach College partners with academic and support units at UH Mānoa to provide for the educational needs of the community through flexible scheduling and innovative methods of program/course delivery. Key program and service activities of the college include:

- Academic Advising and Student Support Services
- Community Service/Public Events Programs
- Credit Programs
- International Programs
- Noncredit Programs
- Summer Sessions

## Mission

Outreach College initiates and provides innovative, diverse, and flexible quality educational opportunities for life-long learners, extending the resources of UH Mānoa to serve the state, nation, and world.

Utilizing a scope of classroom, arts, cultural, and advanced technological modes of delivering learning experiences, the

Outreach College staff is committed to assessing and responding to the educational needs of targeted and under-served learners.

- In addition, Outreach College:
- Provides supportive guidance and services to its participants;
  - Presents programs and collaborations that reflect/enhance the community's educational and cultural diversity; and
  - Serves as a leader in the UH Mānoa development of distance learning.

Through all of its programs, Outreach College inspires and engages learners to recognize education as a valuable lifetime investment.

## Affiliations

Outreach College is affiliated with the University Professional and Continuing Education Association, the Association of University Summer Sessions, the North American Association of Summer Sessions, the Western Association of Summer Session Administrators, Western Arts Alliance, and Association for Continuing Higher Education.

## Degrees and Certificates

Outreach College is a non-degree granting academic support unit, which delivers, in collaboration with departments and colleges, credit courses applicable towards UH Mānoa degrees and certificates. Outreach College offers courses during the day and evening, primarily to serve degree students of UH Mānoa. However, these courses are open to UH System students, qualified residents and non-residents, and in the summer to select high school students. Non-credit certificates are offered in various areas of professional development.

## Advising

## Credit Programs

828 Fort Street Mall, Suite 400  
Honolulu, HI 96813  
Mailing Address: Box 447  
2440 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-6780  
Fax: (808) 956-3364  
Email: [jon.matsuda@hawaii.edu](mailto:jon.matsuda@hawaii.edu)  
Web: [www.outreach.hawaii.edu/credit](http://www.outreach.hawaii.edu/credit)

Outreach College credit courses and programs are offered during the days and evenings throughout the year. Offerings are regularly approved UH Mānoa courses as well as any new or experimental courses approved by UH Mānoa. Instructors are UH Mānoa faculty or lecturers approved by the respective academic departments. In addition, the credit programs unit coordinates distance learning credit activity for the UH Mānoa campus, thus extending the resources of the UH Mānoa campus to the neighbor islands, Pacific Basin, and beyond.

The majority of UH Mānoa distance delivered courses are coordinated by Outreach College. Courses and degree programs are delivered via interactive television, the web, and faculty traveling to off-campus sites. Outreach College is represented on the Distance Learning Advisory Council and the Master Scheduling Group, both UH System committees, and the UH Mānoa Distance Learning Committee.

International students studying in the U.S. on the F-1 or J-1 student visa should note that there are credit limits for enrolling in on-line courses or on-line programs. For more information, please click on the Distance Education link on the International Student Services website at [www.hawaii.edu/issmanoa](http://www.hawaii.edu/issmanoa).

## Major Credit Programs

- Baccalaureates and advanced degrees from UH Mānoa colleges of Architecture, Education, Myron B. Thompson School of Social Work, Shidler College of Business, and Nursing are offered.
- Neighbor Island Outreach. The UH Mānoa Outreach on Maui office as well as the University Centers on Kauaʻi, Maui, and in West Hawaiʻi provide on-site support to neighbor island students enrolled in Mānoa Programs. The UH Mānoa Outreach on Maui office also assists students to complete a bachelor of arts degree in Interdisciplinary Studies with a major emphasis in “Human Relations in Organizations.”
- Overseas Program. On-site education courses are offered in American Samoa.
- Credit Specials. These courses are tailored to meet the needs of a target group; they may condense academic work into shorter time periods and adapt it to special locations and more convenient times.
- Dual Listed Courses. Unfilled seats in selected day school courses are made available to qualified community members.

## Summer Sessions

828 Fort Street Mall, Suite 400  
Honolulu, HI 96813  
Mailing Address: Box 447  
2440 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-9246  
Fax: (808) 956-3364  
Email: [summer.programs@hawaii.edu](mailto:summer.programs@hawaii.edu)  
Web: [www.outreach.hawaii.edu/summer](http://www.outreach.hawaii.edu/summer)

The summer period of the UH Mānoa campus offers opportunity for variety and flexibility in instructional programming, while creating a culturally enriching and intellectually stimulating campus environment through special lectures, conferences, and artistic performances that are open to both students as well as the larger public.

Students from almost every state in the nation and more than 50 countries attend classes in the summer, joining resident students to enhance the diversity of the campus. The summer campus also provides a stimulating array of noncredit classes, public programs, and special events.

Summer Sessions has received numerous awards from the Western Association of Summer Session Administrators and the North American Association of Summer Sessions for its exemplary and innovative programs.

## Early Start Program

Web: [www.outreach.hawaii.edu/EarlyStart](http://www.outreach.hawaii.edu/EarlyStart)

The UH Mānoa Early Start Program (ESP) offers newly admitted fall freshmen a smooth transition from high school to college and an early start on their college experience. Students attend classes during the less hectic summer months when there's easier access to faculty and staff, time to explore the campus, and an array of social and cultural activities.

## Summer Scholar Program for High School Students

Web: [www.outreach.hawaii.edu/summerscholar](http://www.outreach.hawaii.edu/summerscholar)

High school sophomores and juniors with at least a 3.5 GPA may enroll in a 100–200 level course in summer sessions at UH Mānoa. Summer scholars are mainstreamed with other summer students. Over 1,500 high school students have successfully participated in this program over the past 21 years. The program enables high school students to earn college credit and learn what college life is like before graduating from high school.

## International Programs (non-credit)

Sinclair Library, Room 301  
2425 Campus Road  
Honolulu, HI 96822  
Web: [www.nice.hawaii.edu](http://www.nice.hawaii.edu)

## University Preparation Program

Tel: (808) 956-3412  
Fax: (808) 956-3421  
Email: [upinfo@hawaii.edu](mailto:upinfo@hawaii.edu)  
Web: [www.outreach.hawaii.edu/up](http://www.outreach.hawaii.edu/up)

The University Preparation Program is a two-semester program designed to prepare college-bound international students for admissions to and success in American undergraduate degree programs. Coursework includes non-credit classes in intensive English, TOEFL and SAT preparation, academic study skills, and intercultural communication, as well as some introductory

credit coursework in the second semester. Program features include mentoring, tutoring, personalized advising and assistance with the university application process. Students may begin the program in either the fall or spring semester.

### **New Intensive Courses in English (NICE)**

Tel: (808) 956-7753  
 Fax: (808) 956-3421  
 Email: ipinfo@hawaii.edu  
 Web: www.nice.hawaii.edu

The NICE Program is a non-credit English language program open to non-native speakers of English interested in improving their English communication and cross-cultural understanding. Study options include English courses for academic, business, and general purposes. Classes are offered to suit the study schedules of a variety of individuals: four 10-week sessions per year (full-time or part-time study), and 3-week sessions in winter and summer. Admission to NICE is open to international students and scholars, and to resident non-native speakers living in Hawai'i.

### **Special English Programs (SEP)**

Tel: (808) 956-3416  
 Fax: (808) 956-3421  
 Email: michikos@hawaii.edu

SEP provides noncredit English language and American culture programs for groups of students from international educational institutions or companies. SEP is uniquely designed to suit the needs, schedules, requirements, and interests of the sponsoring school or organization.

### **International Seminars**

Tel: (808) 956-3416  
 Fax: (808) 956-3421  
 Email: michikos@hawaii.edu

The International Seminars Program provides groups of international students and professionals exposure to current American perspectives and practices in their area of study or profession. Highly qualified professors and community professionals speak on topics requested by the sponsoring organization with translation, or in the participants' native language.

### **Professional and Special Programs (non credit)**

828 Fort Street Mall  
 Suite 400  
 Honolulu, HI 96813  
 Mailing Address:  
 Box 447  
 2440 Campus Road  
 Honolulu, HI 96822  
 Tel: (808) 956-8244

Fax: (808) 956-3364  
 Email: noncred@hawaii.edu  
 Web: www.outreach.hawaii.edu/noncredit

The Professional and Special Programs Office establishes and administers noncredit courses to provide individuals and groups with the opportunity to maintain professional skills, advance in or change careers, or pursue personal development and enrichment. Although noncredit courses do not apply toward the requirements for a college degree, many do qualify for professional continuing education units. Students who complete attendance requirements may receive certificates upon completion of their courses of study.

Courses are held on- and off-campus locations, as well as online. They are often relatively short and are presented in a variety of formats, such as workshops, short courses, studios, lectures, and institutes. In general, noncredit courses are open to anyone who is at least 18 years of age or a high school graduate.

Although most courses are offered during three regularly scheduled terms per year, specialized programs for particular groups (e.g., librarians, teachers, engineers, etc.) or contract training for both public and private organizations, can be arranged. Class length, number of meeting times, and locations vary, depending on program objectives and specific needs of students.

### **Institute for Business and Professional Development**

Tel: (808) 956-8244  
 Email: noncred@hawaii.edu  
 Web: www.outreach.hawaii.edu/ibpd

The Institute for Business and Professional Development offers continuing education programs for business people, entrepreneurs, professionals, and those seeking to meet professional certification requirements, or to improve career opportunities.

### **Pacific New Media**

Tel: (808) 956-3422  
 Email: pnm@hawaii.edu  
 Web: www.outreach.hawaii.edu/pnm

Pacific New Media offers short intensive workshops in film, video, photography, and digital media presented by outstanding professionals from Hawai'i and the continental U.S. Certificates in web design and digital imaging are also offered through the program.

### **Community Services Programs**

Sinclair Library, Room 301  
 2425 Campus Road  
 Honolulu, HI 96822  
 Tel: (808) 956-8246  
 Fax: (808) 956-3752  
 Email: csinfo@hawaii.edu  
 Web: www.outreach.hawaii.edu/community

The Community Services Division coordinates the arts and culture outreach efforts of UH Mānoa. Major projects include the Statewide Cultural Extension Program (SCEP) and University of Hawai'i Presents. Through SCEP, Outreach College presents over 170 performances each year in schools, libraries, nursing homes, prisons, senior centers, and other venues throughout the state. University of Hawai'i Presents produces 15 performances of national and international touring companies for the UH Mānoa campus and the general public.

# School of Pacific and Asian Studies

## Administration

Moore Hall 310

 Dean: R. Anderson Sutton

## General Information

Strategically located with a multicultural heritage, the state of Hawai'i has always been uniquely international in outlook. Reflecting this perspective, the School of Pacific and Asian Studies (SPAS) represents the ongoing commitment of UH Mānoa to enhance international awareness and intercultural understanding throughout the educational experience. In fulfilling this commitment, SPAS has become one of the largest resource facilities for Asian and Pacific studies in the world.

Established in 1987, SPAS offers academic programs in Asian studies and Pacific Islands studies. SPAS also houses the Centers for Chinese Studies, Japanese Studies, Korean Studies, Okinawan Studies, Pacific Islands Studies, Philippine Studies, South Asian Studies, and Southeast Asian Studies, as well as the initiative on Muslim Societies in Asia and the Pacific (MSAP). Through these centers and programs, SPAS helps to coordinate the efforts across UH Mānoa of some 300 faculty specialists who offer more than 600 courses related to Asia and the Pacific.

Research supported by SPAS appears in a wide range of journals, monographs, and occasional papers published by its

centers and programs. Complementing these publications are monographs, translations, and journals published by SPAS or one of its centers in association with UH Press.

Research and publications, specialized training and instructional programs, conferences, symposia, resources development, and a full schedule of co-curricular activities and cultural programs are all a part of the School of Pacific and Asian Studies. Students electing to focus their studies on Asia or the Pacific at UH Mānoa will discover a unique learning environment especially appropriate to the understanding and appreciation of the peoples and cultures of the region.

## Degrees and Certificates

**Bachelor's Degree:** BA in Asian studies, BA in Pacific Islands studies

**Master's Degrees:** MA in Asian studies, MA in Pacific Islands studies

**Certificate Programs:** Graduate Certificates in Pacific Islands, Chinese, Japanese, Korean, Philippine, South Asian, and Southeast Asian studies

## Undergraduate Programs

### Requirements

- Acquire a minimum total of 120 credit hours.
- Earn at least 60 credit hours in courses numbered 300 or above for the Asian Studies Program; earn at least 45 credit hours in courses numbered 300 or above for the Pacific Islands Studies Program.
- Fulfill the UH Mānoa General Education Core requirements and additional basic course work specified by the degree program.
- Complete writing intensive courses as specified by UH Mānoa.
- Fulfill requirements for the major.
- Earn at least a 2.0 GPA for all UH Mānoa registered credits.

Prospective students interested in the BA in Asian studies or the BA in Pacific Islands studies should contact the respective department or refer to the program listing in the *Catalog*.

### Graduate Programs

Prospective students interested in the MA in Asian studies or the MA in Pacific Islands studies should contact the respective program or refer to the program listing in the *Catalog*.

## Instructional/Research Facilities and Programs

### Center for Chinese Studies

The Center for Chinese Studies (CCS) aims broadly at an increased understanding of contemporary China in light of its history and its hopes for the future. It pursues this goal through instruction from 56 faculty members in 30 departments who teach more than 200 China-related courses; research by faculty, who publish an average of six books and a score of articles on China each year; service publications, such as its quarterly journal *China Review International*, which provides an overview of current world wide scholarship on China; a website ([www.ccs-uhm.org](http://www.ccs-uhm.org)); and community outreach, conferences, and national and international linkages with institutions such as Peking University, Beijing Foreign Studies University, the National Taiwan University, and the Chinese University of Hong Kong. CCS has housed a Confucius Institute, funded by the PRC Ministry of Education to promote Chinese language and cultural studies in Hawai'i and the U.S., since 2006.

By creating a stimulating environment for the faculty and the approximately 150 mainly graduate students specializing in Chinese studies, CCS supplements basic scholarly offerings, and focuses attention on the university's significant resources for the study of China. These include the Asia Collection in Hamilton Library, the Wong Audiovisual Center in Sinclair Library, and the multimedia collection of the Language Telecommunication Resource and Learning Center.

The center is part of the National Resource Center for East Asian Studies, which, together with Japan and Korea, are supported by major funding from the U.S. Department of Education. CCS is also home to one of about 80 Confucius Institutes (CI) in the nation, with funding from the PRC Ministry of Education.

### Center for Japanese Studies

The Center for Japanese Studies (CJS) promotes the study of Japan within a global context, across academic disciplines at UH Mānoa. Japanese studies faculty include 39 professors, 16 Japanese language instructors, 3 library specialists, and a chanoyu (tea ceremony) instructor who offer over 120 courses in 20 instructional or department units to approximately 3,500 students annually. An integral part of CJS is the Dr. Sen Soshitsu International Way of Tea Center, which serves to perpetuate tea culture by offering tea practicum courses and coordinating tea-related outreach projects. CJS coordinates the Title VI National Resource Center East Asia grant, which includes curriculum development, outreach, and library development projects in East Asia. The center's role is to act as a coordinating body for Japanese studies at UH Mānoa and as a clearinghouse for inquiries related to the field; in this role, CJS offers student scholarships and faculty professional development funding, provides student advising, sponsors seminars and conferences on Japan, sponsors visiting scholars, coordinates a summer student internship program in Ehime (along with the Japan-America Society of Hawai'i), and administers partnerships with overseas research institutes.

### Center for Korean Studies

The Center for Korean Studies coordinates and develops UH Mānoa's resources for the study of Korea. The 39 faculty members affiliated represent the disciplines of anthropology, architecture, art, music, business, communicology, economics, English, ethnomusicology, history, language, linguistics and literature, law, political science, social work, sociology, and urban planning. The center promotes interdisciplinary and intercultural approaches to Korean studies, conducts scholarly conferences, sponsors research projects, presents specialists and visiting scholars in colloquia, publishes scholarly works and an interdisciplinary journal *Korean Studies*, and coordinates UH Mānoa resources on Korea and researches the activities of Hawai'i's Korean community. The center maintains a special collection of personal libraries and private papers of distinguished scholars on Korea. It also has a small collection of books, journals, audiovisual materials, and other documents as an adjunct to the UH Mānoa library's Korean collection.

### Center for Okinawan Studies

The Center for Okinawan Studies (COS) was established in 2008, and has the distinction of being the first center of its kind outside of Japan. COS is a coordinating unit with a mission to promote Okinawan Studies. It strives to enhance the study and understanding of the history, culture, environment, and societies of the Okinawan/Ryukyuan peoples, including diaspora. COS is committed to supporting the research and teaching of Okinawa/Ryukyu-related subjects by its faculty, staff, and students, as well as providing outreach to the general community in the form of workshops, lectures, seminars, and conferences. It also supports the student-exchange program with the University of the Ryukyus. Collaborative works with the University of the Ryukyus are also being planned for future projects.

### Center for Pacific Islands Studies

The Center for Pacific Islands Studies brings together people and resources to promote an understanding of the Pacific Islands and issues of concern to Pacific Islanders. Its innovative instructional program is regional, comparative, and interdisciplinary in nature. After 60 years of offering the nation's first

and only MA program for the study of the Pacific Islands, the center launched a BA program in 2011. The center sponsors an annual conference and a seminar series that features a variety of visitors en route to and from other Pacific Islands. The program publishes a blog, a series of occasional papers, and, in collaboration with the UH Press, the Pacific Islands Monograph Series, and *The Contemporary Pacific: A Journal of Island Affairs*.

### **Center for Philippine Studies**

The Center for Philippine Studies at UH Mānoa is the only university center offering a comprehensive academic program for Philippine studies in North America. With an interdisciplinary faculty based in various departments, it promotes a broad understanding of Philippine society and culture, including Filipinos in the diaspora, through course offerings, library resources, lectures and seminars, scholarly conferences, research and publications, visiting faculty, international academic exchanges, cultural presentations, outreach with the Filipino community in Hawai'i, institutional linkages, and other professional activities. UH Mānoa has the largest concentration of internationally known Philippine specialists and experts in various disciplines. The center serves as the Secretariat for the International Committee on Philippine Studies. For more details, visit [www.hawaii.edu/cps](http://www.hawaii.edu/cps).

### **Center for South Asian Studies**

The Center for South Asian Studies at UH Mānoa serves as an intellectual hub in the Pacific for research on and learning about a highly diverse region that encompasses Bangladesh, India, Pakistan, Nepal, Tibet, Sri Lanka, Lakshadweep, and the Maldivian Islands. The objective of the center, since its creation in 1985, is to promote interdisciplinary research on South Asia and the diaspora, and assist undergraduates and graduate students in the humanities, social sciences, and applied sciences to focus on societies and cultures of South Asia and the South Asian diaspora. The center's activities include colloquia, invited lectures and workshops, an annual spring symposium, cultural programs, and outreach. The library's South Asia collection is ranked among the top ten in the U.S. The center draws on the expertise of more than 40 distinguished faculty members who research interests spread over India, Sri Lanka, Bangladesh, Pakistan, and Nepal. For more information, visit [www.hawaii.edu/csas/](http://www.hawaii.edu/csas/).

### **Center for Southeast Asian Studies**

The center is one of only eight National Resource Centers (NRC) for the study of Southeast Asia in the U.S. as awarded by the U.S. Department of Education. It acts as a coordinating body for Southeast Asian studies throughout the university. With more than 55 affiliated faculty members distributed through 21 departments, the center interacts with the largest concentration of Southeast Asia specialists in the U.S.

CSEAS is responsible for administering and awarding the Foreign Language and Area Study (FLAS) fellowships. In support of academic research, the center supports a Southeast Asian language reading test initiative and provides substantial yearly funding to maintain and grow the Southeast Asia Collection at Hamilton Library.

The center works to promote Southeast Asian studies nationally through its support of teacher training by providing in-country learning experiences. CSEAS, with Fulbright Group Program Abroad (FGPA) support, took K-12 teachers to the Philippines and Viet Nam in the summer of 2013. CSEAS also

teams with UH System community colleges by assisting with pre-departure workshops, such as the Summer 2013 Association of Regional Centers for Asian Studies (ARCAS) program on the Chinese diaspora in Southeast Asia helped by Kapiolani Community College.

Locally, CSEAS acts as a clearinghouse initiating and publicizing events on the campus with a Southeast Asia focus including a twice-monthly Speaker Series. Central to this PR effort is its popular website and well-developed social media profile. The center has a strong commitment to outreach programs with its support of Indonesian theatre/dance performance, and continues to broaden public interest in Southeast Asia through a weekly film series now in its 9th season. More information on the UH Mānoa Center for Southeast Asian Studies can be found at [www.cseashawaii.org](http://www.cseashawaii.org).

### **Muslim Societies in Asia and the Pacific**

The Muslim Societies in Asia and the Pacific (MSAP) program is as an educational resource center that serves to broaden and deepen understanding of the diverse Muslim cultures that call Asia home. Established in 2009, at present the bulk of the program's attention is devoted to developing a website and utilizing social media to identify, archive and disseminate quality resources on the Muslim humanities of Asia. The MSAP website is an internationally utilized portal for hosting regularly updated educational and professional opportunities, for highlighting recent developments in the arts and culture, and for featuring select publications and journalism on issues that affect the Muslims of Asia. With Asia home to 60% of the world's Muslims and relations between Muslim and non-Muslim societies often troubled, MSAP focuses on Islam in regions of Asia that receive less public attention and follows topics that contribute useful context to issues that affect Muslim and non-Muslim relations. At UH Mānoa, MSAP hosts a regular series of guest speakers while promoting most Hawai'i-based events on Islam and Muslim societies. MSAP leverages the exceptional pool of scholars at UH Mānoa on Asia, the Pacific and Islam to fulfill its educational mission. Visit [www.msaphawaii.org](http://www.msaphawaii.org).

## Campus Events and Community Programs

SPAS and its centers sponsor lectures, colloquia, teacher workshops, conferences, film festivals, concerts, and special events, such as the Grand Kabuki performance, Chinese martial arts performances, and the Southeast Asian *Randai* theatrical training and performance. The centers' outreach programs take UH Mānoa expertise into the community and secondary schools.

- \*M. McDonald, PhD—geography, East Asia (Japan)
- \*K. Pauka, PhD—theatre and dance, Southeast Asia (Indonesia)

### Cooperating Faculty

The academic program of the Asian Studies Program (ASP) is facilitated and enhanced by the participation and support of the affiliate faculty of seven centers focused on Asia in the school: Chinese, Japan, Korean, Okinawan, Philippine, South Asian, and Southeast Asian studies.

These resources are enhanced by the close cooperation and academic relationship between the ASP and the East-West Center.

**Degrees and Certificates Offered:** BA and MA in Asian studies, MA in Asian studies, Graduate Certificates in Chinese, Japanese, Korean, Philippine, South Asian, and Southeast Asian studies are offered. Students may major or minor in Asian Studies.

## The Academic Program

Asian studies is the study of Asia. At UH Mānoa, it covers a broad arc that begins in the west with South Asia, moves southeastward to Southeast Asia, then eastward to East Asia. The approach to this study is interdisciplinary, taught by faculty trained in the geography, history, anthropology, political

science, sociology, language and literature, ethnomusicology, performing arts, and urban and regional planning of Asia.

In addition to the faculty in SPAS, there are approximately 286 faculty and staff who are Asia specialists in different departments and programs throughout the campus. 600 courses on Asia (or with substantive Asia content) are taught at UH Mānoa, a unique strength the Asian Studies Program utilizes in crafting its BA and MA degrees.

ASP offers an unprecedented opportunity for students to study a wide range of topics, disciplines, and methodologies to design their individual programs to suit their particular interests. This interdisciplinary approach to the study of Asia, focused on the social sciences and humanities, is the heart of the program's mission. Finally, competency in an Asian language commensurate with the student's focus and level is considered fundamental, and is a required part of the program.

### Advising

Graduate students are advised by the appropriate area director or designated faculty. Undergraduates majoring in Asian studies are advised by an undergraduate studies advisor.

## Undergraduate Study

### Bachelor's Degree

The undergraduate program in Asian studies is designed for students desiring a liberal arts education and a broad background in traditional and contemporary Asian cultures.

Students seeking a BA in Asian studies must meet all the requirements for admission established by SPAS.

Asian studies is normally declared as a major at the end of the sophomore year or beginning of the junior year though students may apply for admission to the program at any time. The formal declaration is made through the school's Student Academic Services Office.

### Program Requirements

- Earn at least a 2.0 GPA (C average) for all UH Mānoa registered courses
- Register for all required courses (core, major, minor, and certificates) for a letter grade
- Earn a grade of C (not C-) or better in each course applied to the major, minor, and certificate requirements
- 60 upper division credits of 300+ courses

### Major Requirements

- Total of at least 36 credit hours of Asia-related course work
- ASAN 201 and 202, 310 or 312, and 6 additional credit hours of ASAN courses at the 300 or 400 level
- Two years of an Asian language (excluding conversation or aural comprehension courses), or demonstration of the equivalent level

Majors must also complete one of the following study plans:

#### Plan 1:

- 12 credit hours of Asia-related course work from one of the following disciplines or areas: anthropology, art, economics, geography, history, linguistics, literature, music, philosophy, political science, religion, sociology, communication, or theater and dance
- 9 credit hours of Asia-related courses outside the primary field of concentration, as approved by the advisor

**Plan 2:**

- 12 credit hours of course work on one Asian country or region (e.g., Japan, Southeast Asia)
- 9 credit hours focused on one or more additional Asian countries or regions

ASAN courses used to satisfy General Education Core requirements may not be used to satisfy major requirements or vice versa.

Language study beyond the required level may count toward the major and is encouraged for Asian studies majors.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

**Minor Requirements**

There are no required courses for acceptance into the Asian Studies minor program. Attendance in ASAN 201-202 (Introduction to Asian Studies) is recommended.

Students must complete 15 credit hours including:

- ASAN 310 Asian Humanities or 312 Contemporary Asian Civilization (3 credits)
- ASAN courses numbered 300 and above (minimum 6 credits)
- Asia-related courses in disciplines other than the major field numbered 300 and above (maximum 6 credits)

It is possible to focus on one particular country or region, such as China, Japan, Korea, Philippines, Southeast Asia, or South Asia.

The Asian studies undergraduate advisor will identify Asia-related courses in various disciplines and assist in planning schedules and preparing minor forms.

**Graduate Study****Master's Degree**

The master's program in Asian studies is designed primarily for students who wish to focus their studies on a particular geographical and cultural region of Asia. Such an approach entails interdisciplinary study.

The MA in Asian studies is offered as Plan A (thesis) or Plan B (non-thesis). Although UH Mānoa does not offer a PhD in Asian studies, Asia-focused PhD programs are available in anthropology, East Asian languages and literatures, economics, geography, history, linguistics, music, philosophy, political science, public health, sociology, theater, and tropical agriculture.

Students who wish to pursue a doctoral degree in any of these fields should contact the appropriate department.

A student's academic program should concentrate on one of the regions of Asia as represented by the area centers in SPAS: China, Japan, Korea, Okinawa, the Philippines, South Asia, or Southeast Asia. Regarding the latter two, a student may concentrate on a particular country within those regions if sufficient courses are available. The director of each area center or a designated faculty member serves as the graduate student advisor for his or her respective area.

Students without sufficient academic background in Asia-related course work may be required to take certain preparatory courses to make up this deficiency without credit toward the degree. Prospective students should note that the program requires successful completion of course work or demonstrable proficiency in an Asian language beyond the fourth-year level for students concentrating on Japan, at the fourth-year level for

students concentrating on China or Korea, or the third-year level for students concentrating on the Philippines, South Asia, or Southeast Asia. Students enrolling from an Asian country may have the foreign language requirement waived if they plan to concentrate on their native country or region. If they elect to concentrate on a country other than their own, they must fulfill the language requirement as previously stated.

**Plan A (Thesis) Requirements**

The MA Plan A degree in Asian studies requires the following:

1. A minimum of 36 credit hours. Of these, at least 18 must be earned in courses numbered 600 or higher (including 6 credit hours in ASAN 700 Thesis Research)
2. Full-time study for a minimum of two academic semesters
3. A minimum of 6 credit hours in an Asian language equivalent to the following: Japanese—6 credit hours beyond the 401 and 402 level; Chinese—8 credit hours at the 401 and 402 level; Korean—6 credit hours at the 401 and 402 level; Philippine, South and Southeast Asian languages—6 credit hours at the 301 and 302 level. An entering student who has achieved this level and can demonstrate proficiency through examination may select alternate courses equaling 6 credit hours with the consent of the area advisor.
4. An introductory graduate seminar in the particular area of concentration (ASAN 600), taken at the beginning of the student's program
5. A graduate research seminar in the particular area of concentration (ASAN 750)
6. A minimum of 3 additional credit hours in Asian studies
7. A minimum of 15 credit hours of interdisciplinary study related to the candidate's country or region, with at least 3 credit hours each in the fields of humanities, social sciences, and arts. No more than 9 credit hours in one discipline will be counted. A maximum of 6 credits may be taken outside the country/region of focus, after consultation with academic advisor.
8. Satisfactory completion of a master's thesis and an oral examination on the thesis given by the student's three-member faculty committee

**Plan B (Non-thesis) Requirements**

The MA Plan B degree in Asian studies requires:

1. A minimum of 36 credit hours. Of these, at least 18 credits must be earned in courses numbered 600 or higher
2. Full-time study for a minimum of two academic semesters
3. A minimum of 6 credit hours in an Asian language equivalent to the following: Japanese—6 credit hours beyond the 401 and 402 level; Chinese—8 credit hours at the 401 and 402 level; Korean—6 credit hours at the 401 and 402 level; Philippine, South and Southeast Asian languages—6 credit hours at the 301 and 302 level (an entering student who has achieved this level and can demonstrate proficiency through examination may select alternate courses equaling 6 credit hours with the consent of the area advisor)
4. An introductory graduate seminar in the particular area of concentration (ASAN 600), taken at the beginning of the student's program
5. A graduate research seminar in the particular area of concentration (ASAN 750)
6. A minimum of 3 additional credit hours in Asian studies
7. A minimum of 21 credit hours of interdisciplinary study related to the candidate's country or region, with at least 3

credit hours each in the fields of humanities, social sciences, and arts. No more than 9 credit hours in one discipline will be counted. A maximum of 6 credits may be taken outside the country/region of focus, after consultation with academic advisor.

8. Presentation of a portfolio consisting of two seminar papers, and satisfactory completion of an oral examination based on the papers given by the student's three-member faculty committee

### Certificate Programs

#### Graduate Certificates

SPAS, through its Asia focused centers, offers graduate certificates in the following areas: Chinese studies, Korean studies, Japanese studies, Philippine studies, South Asian studies, and Southeast Asian studies. Regularly enrolled graduate students in non-Asian studies disciplines receive a certificate for completing a program of study that focuses on a particular Asian country or region. MA students in Asian studies also receive a certificate for completing studies in their area of concentration.

#### Certificate Requirements

- 18 credits of course work, in a defined program of study, at UH Mānoa within the chosen certificate area
- Of these, 15 credits must be at 300-level or higher from at least two major divisions (social sciences, humanities, or arts), with no more than 9 credits in a single division, and at least 9 credits in graduate level courses (600 level or higher)
- ASAN 600 Asian Studies Seminar: Scope and Methods or 750 Research Seminar in the chosen certificate area
- A research paper in the chosen certificate area and an oral examination based on the paper; or a thesis or dissertation related to the chosen certificate area in the student's major discipline
- Language requirements:
  - For the Japanese certificate, 4th year competency JPN 407
  - For the Chinese and Korean certificate, 3rd year competency (CHN 301/302 or KOR 301/302); and
  - For the remaining regional certificates, 2nd year competency (201/202 language courses of the chosen certificate area)
- Complete all coursework for certificate within a seven year period

All language competency requirements can be met either through course work or equivalency examinations in the chosen certificate area. Language courses do not count towards certificate credit requirements.

Academic advising is provided by the center of the student's chosen certificate area.

**Degrees and Certificate Offered:** BA in Pacific Islands studies, MA in Pacific Islands studies, Certificate in Pacific Islands studies

### The Academic Program

Pacific Islands Studies at UH Mānoa is an innovative, interdisciplinary program committed to the production and dissemination of a wide range of knowledge about Oceania. The program focuses on the island societies of this vast region, and the dynamic cultural, social, and political interactions that link them to each other as well as to the rest of the world. It seeks to understand the many worlds of Oceania through multiple conceptual lenses, drawn selectively from a range of academic disciplines and from the knowledge systems of the region itself. Pacific Islands studies promotes active, student-centered ap-

proaches to learning and encourages creativity in research and representation of island issues.

With a core and affiliate faculty of about 40 members, and access to one of the finest collections of Pacific materials in the world, the Pacific Islands studies program offers interdisciplinary programs of study leading to the BA and MA in Pacific Islands studies and the Certificate in Pacific Islands studies.

### Advising

Graduate students may see Terence Wesley-Smith or other designated faculty. Undergraduates majoring in Pacific Islands studies are advised by Julie Walsh.

## Undergraduate Study

### Bachelor's Degree

The undergraduate program in Pacific Islands studies is designed for students desiring an interdisciplinary education and an informed understanding of Oceania and issues of concern to Pacific Islanders.

Students seeking a BA in Pacific Islands studies must first complete PACS 108 with a minimum grade of C. Students must also meet all the requirements for admission established by the School of Pacific and Asian Studies.

Pacific Islands studies is normally declared as a major at the end of the sophomore year or beginning of the junior year though students may apply for admission to the program at any time. The formal declaration is made through the School's Student Academic Services Office.

### Program Requirements

- Register for all required courses for a letter grade
- Earn a grade of C (not C-) or better in the 36 credit hours of Pacific Islands-related coursework applied to the major requirements
- 45 upper division credits of 300+ courses

### Major Requirements

- Total of at least 36 credit hours of Pacific Islands-related course work
- PACS 108, 201, 202, 301, 302, 303: 18 credits of PACS core courses
- 9 elective credits selected from a list of courses, including 3 credits in Pacific Islands-related history, anthropology, and other department offerings
- Choose a concentration from 3 choices: 1) Public Policy and Community Development, 2) Contemporary Regional Issues, and 3) Arts, Performance, and Culture
- 6 additional credits selected from a list of concentration-related courses including 3 credits of the required PACS concentration anchor course (PACS 301)
- 4 semesters of an indigenous Pacific Islands language; native speakers may test out upon demonstration of equivalent level
- PACS 401: 3 credits Senior Capstone experience

PACS courses used to satisfy General Education Core requirements may not normally be used to satisfy major requirements or vice versa. For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Graduate Study

### Master's Degree

The MA in Pacific Islands studies is intended for students of the region wishing to transcend established disciplinary boundaries and explore innovative approaches to learning, research, and representation. It is the only program of its kind in the U.S. The MA program includes two options, thesis and MA portfolio. Students selecting the first option complete a scholarly research-based thesis on a Pacific-related topic. Normally this is the preferred option for those planning to enter a doctoral program in the humanities, social sciences, or interdisciplinary studies. Those opting for the MA portfolio demonstrate mastery of a specialty area within the field of Pacific Islands studies through an integrated program of activities including course work, research, and writing. Both options can include performance, multimedia, or creative writing components. Some recent graduates are pursuing doctoral or professional degrees in Australia, New Zealand, Europe, Hawai'i, and the U.S. mainland; others are employed in a wide variety of fields, including education, social work, publishing, as well as library and museum work.

### Language Requirement

On entry, or before graduation, students are required to have a second-year level of competence in an indigenous language of the Pacific, or a pidgin/creole language such as Tok Pisin, Solomons Pijin, or Bislama. The language should be related to the student's research interests. Competence in an administrative language of the Pacific such as Spanish, French, German, or Japanese may be used to satisfy the requirement, provided this is not the student's first language, and there is a demonstrated connection with research activities. Language competence is demonstrated by successful completion of appropriate course work, or through an examination conducted by a suitably qualified individual.

### Degree Requirements

All MA students are required to complete a minimum of 30 credits of course work, which must include three core seminars, PACS 601, 602, and 603. The core seminars introduce students to key issues of learning and research in the field of Pacific Studies. The seminars are taught in sequence, with PACS 601 and 602 offered in the fall, and 603 in the spring. In addition, students take at least two focus courses (6 credits) directly related to their research or specialty interests. A list of preferred Pacific-related courses offered across the campus serves as a guide in the selection of other courses that will count toward the degree. Courses are selected in consultation with a faculty advisor to form an integrated program of study that strengthens a student's general knowledge of the region, as well as providing a particular concentration of interests. Students in both the thesis and MA portfolio plans choose a three-person faculty committee to supervise their work, and to evaluate the final product or products. The MA committee must review and approve a comprehensive thesis or portfolio proposal (usually produced as part of the requirements for PACS 603) before the student embarks on the MA thesis or on major components of the portfolio.

All students must pass the MA written examination, which provides an opportunity to demonstrate understanding of significant issues in the field of Pacific studies, as well as general knowledge of the region as a whole. Students normally sit the

examination at the end of the third semester in the MA program. Successful performance on the examination advances the student to candidacy. A student failing the examination may take it one more time. A second failure results in the student being dropped from the program.

### Thesis Requirements

Students selecting the thesis option complete 6 credits of focus course work directly relevant to their research interests, and produce a scholarly, research based thesis on a Pacific-related topic. The thesis should demonstrate an ability to conduct independent research and represent a significant contribution to this interdisciplinary field of study. It should address a significant question, issue, or theme, and include a thorough review of relevant written and other resources. Students are expected to cross established disciplinary boundaries and explore topics using multiple conceptual lenses. The thesis must include a substantial written component that is normally at least one hundred pages (or 30,000 words) in length. It can include performance, creative writing, or multimedia components in dialogue with the text to better communicate the scholarly work.

Students pursuing the thesis option satisfy credit requirements as follows:

■ Core seminars (PACS 601, 602, 603)	09 credits
■ Focus courses	06 credits
■ Elective courses	09 credits
■ Thesis credits (PACS 700)	06 credits
■ Total	30 credits

At least 15 credit hours of this course work must be in courses numbered 600 and above (excluding 700). Normally, only 3 credits of 699 Directed Reading and Research can be used to satisfy the focus requirement.

### MA Portfolio Requirements

Students selecting this option identify and explore a Pacific-related specialty area. Mastery of the specialized subject matter is demonstrated through an integrated program of study that includes: 1) 6 credits of focus course work directly relevant to the specialty area; 2) an essay or research report of at least 25 pages in length (approximately 8,000 words) that explores a central aspect of the specialty area; and 3) a substantial performance, multimedia, artistic, or written product directly related to the specialty area. This component of the portfolio will normally complement the essay or research report described above, and can be combined with it to form a single product of at least 50 pages in length (approximately 16,000 words).

Students pursuing the portfolio option satisfy credits requirements as follows:

■ Core seminars (PACS 601, 602, 603)	09 credits
■ Focus courses	06 credits
■ Elective courses	09 credits
■ MA projects (PACS 695)	06 credits
■ Total	30 credits

At least 18 credit hours of course work must be in courses numbered 600 and above (excluding PACS 695). Normally, only 3 credits of 699 Directed Reading and Research can be used to satisfy the focus requirement. Students earn 3 credits of 695 Master's Portfolio Project for their work on the essay or research report, and a further 3 credits for the third component of the portfolio.

### Performance, Creative Writing, Artwork, and Multimedia Options

Innovative approaches to knowledge production are encouraged. MA projects (thesis or MA portfolio) must include a substantial analytical, text-based component, but can incorporate elements of performance (e.g. dance, theater), creative writing (e.g. fiction or poetry), artwork (eg painting, photography), or multimedia (e.g. video, audio, digital media). Students intending to include performance, creative writing, artwork, or multimedia components must satisfy the MA committee that they have or will acquire the appropriate proficiencies. The issue of proficiency should be addressed in the project proposal with reference to relevant course work, academic background, or prior experience. Performances must be supervised by members of the MA committee, fully rehearsed, and videotaped for submission, along with the written component, to the center and/ or Graduate Division.

### MA Committees

All MA students form a three person committee to supervise their work and evaluate the thesis or MA portfolio products. Graduate Division requires that committee members be on the Graduate Faculty at UH Mānoa, although students can petition for exceptions to this rule. The chair and at least one other member should be members of the core or affiliate faculty of the Center for Pacific Islands Studies. Students normally form the committee towards the end of their first year in residence, or after they have prepared a comprehensive thesis or MA portfolio proposal.

### Certificate Program

#### Certificate in Pacific Islands Studies

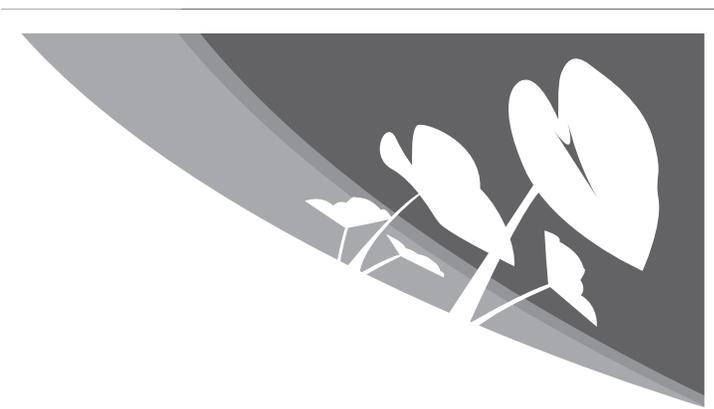

The Certificate in Pacific Islands Studies is designed for students who are pursuing advanced degrees in other areas and whose course of study includes a substantial component of Pacific-related courses and research. The objective of the certificate is to provide recognition of this expertise and to encourage further study of the Pacific region.

Students applying for the certificate must have previously been admitted to the Graduate Division in a field of study. Applications take the form of a letter to the Pacific Islands studies graduate chair that outlines academic objectives, Pacific-related interests, and the proposed course of study in the primary field. Following a diagnostic interview, the certificate student is assigned a two-person advisory committee consisting of one member of the Pacific Islands studies faculty (as appointed by the graduate chair) and the student's departmental advisor.

#### Requirements

A certificate student is required to have 18 credit hours in Pacific-related courses or 12 credit hours in Pacific-related courses and a Pacific-related thesis or dissertation. The courses must constitute a logically related program of study and are normally chosen from the list of preferred courses prepared by the Pacific Islands studies faculty. Certificate students must take at least one of the MA core courses (PACS 601, 602, 603), and sit the MA written examination. The certificate is awarded upon completion of the advanced degree in the primary field of study.

# ROTC Programs

## Aerospace Studies (Air Force ROTC)

### Administration

AFROTC Building  
1460 Lower Campus Road  
Honolulu, HI 96822

Capt. A. Schilling  
MSgt L. James  
SSgt. S. Schroader

### General Information

Aerospace Studies is part of the Air Force ROTC program. Through this program, full-time students pursue a commission in the U.S. Air Force. Once commissioned as a Second Lieutenant, graduates of the Air Force ROTC program serve on active duty for a specified period of time.

### The Academic Program

The Aerospace Studies department offers 3- and 4-year programs to students. Course content includes: Foundations of the U.S. Air Force, Evolution of Airpower, Leadership Studies, and National Security Affairs. All lower division courses are approximately one or two credit hour. Upper division courses are three credit hours.

An integral part of the Air Force ROTC commissioning program is Leadership Laboratory and Physical Training. Students are required to attend both functions and must meet all attendance and academic requirements in order to remain in good standing within the program.

In addition to the academic program, Air Force ROTC offers a wide array of optional activities to enhance students' leadership skills.

### Scholarships

Highly qualified freshmen and sophomores can compete nationally for the In-College Scholarship Program. Express Scholarships may be available to students pursuing degrees the Air Force deems "critical" (Computer/Electrical/Environmental Engineering, Foreign Languages, and Nursing). Scholarships cover tuition and most fees, \$900 annually for textbooks, and include a monthly stipend (\$300-\$500). Four-year scholarships are available for eligible High School Seniors. These applications are due via [www.afrotc.com](http://www.afrotc.com) by **December 1**.

### Advising

MSG D. Timmerman  
SFC Campos-Flores  
SFC J. Solano  
Mr. E. Leo  
Mrs. F. Lafitaga  
Mr. E. Davis  
Mr. A. Afuola

## General Information

The Army Reserve Officer Training Corps (ROTC) program provides full-time college students the opportunity to pursue a commission in the U.S. Army, U.S. Army Reserve, or the Hawai'i Army National Guard. Officers may be commissioned on active duty, in a reserve component while pursuing a civilian career, or receive an education delay to earn a graduate or professional degree. There are 4-year, 3-year, and 2-year programs available.

## The Academic Program

The 4-year program is divided into a 2-year basic and 2-year advanced course. The basic course is for students who enter ROTC in their freshman year. With approval, students may enter ROTC in their sophomore year and compress the basic course requirements. This traditional program offers a moderately paced course of military and academic training resulting in completion of ROTC and eligibility for a commission on graduation day. All basic courses are electives, and no obligations are incurred. The advanced course includes a 5-week summer camp between the junior and senior years held at Fort Lewis, Washington. Pay for the advanced course is \$450-500 per month during the school year and approximately \$900 plus free room and board for the 5 weeks at camp. To be eligible for the advanced course, a student must (a) be a U.S. citizen or U.S. national, (b) successfully complete the basic course or its equivalent, and (c) meet other statutory and regulatory requirements.

The 2-year advanced program can be taken without the basic course by students who attend and complete a 4-week summer camp at Fort Knox, Kentucky, for which the student receives approximately \$600. Likewise, veterans of all services, 3-year JROTC graduates, and national guardsmen and reservists may be exempt from the basic course. Should an individual qualify, select, and complete this option, he or she is eligible to receive a commission upon graduation. Students must have 4 semesters of college work remaining after finishing the basic summer

camp (or qualifying for the exemptions). Advanced course students must have completed 60 credits and be full-time students.

In addition to the courses summarized in the course descriptions, cadets will be required to meet professional military education requirements prior to graduation and commissioning. This requirement consists of one course in military history.

## Optional Programs

### Army Reserve/Army National Guard Membership

The Simultaneous Membership Program (SMP) allows cadets to participate in and receive drill pay from an Army Reserve or Hawai'i National Guard unit as an officer trainee while they complete the Army ROTC advanced course. The pay the cadets receive is in addition to the monthly ROTC spending allowance and any GI Bill educational benefits to which they are entitled.

### Scholarships

There are 4-, 3-, and 2-year scholarships available. All Army ROTC scholarships are merit based and cover the full tuition and fees for any university on O'ahu. In addition, scholarships provide \$1,200 per year for books and an additional \$300-\$500 per month spending allowance. 4-year applications are due by **January 10** of the high school senior year. 3- and 2-year scholarships are competed for on campus by current ROTC students.

### Advising

For general information about the Army ROTC program or specifics on eligibility requirements, contact the Enrollment Officer in the Military Science Building at 1311 Lower Campus Road or call Mr. William Johnson, Scholarship Program Advisor at (808) 956-7766/7744.

*Myron “Pinky” Thompson earned his MSW from UH in 1953. A noted leader in the struggle for the preservation of the Hawaiian culture, he was at the vanguard of the Hawaiian Renaissance movement in the 1970s. While at the Queen Lili’uokalani Children’s Center, he helped revitalize traditional healing practices such as ho’oponopono and dream work. Along with Kumu Mary Kawena Puku’i and others, he helped create Nana I Ke Kumu, a two-volume reference manual on indigenous healing practices. He helped start Alu Like and Papa Ola Lokahi, was a Bishop Estate Trustee, and served as president of the Polynesian Voyaging Society. The UH Board of Regents approved the naming of the School after him in 2008.*

- \*B.J. Kim, MSW, PhD—gerontology, mental health and quality of life among older Asian immigrants
- J.K. Kim, MSW—indigenous evaluation and research, Native Hawaiian culturally based intervention and practice methods, Native Hawaiian holistic health and well-being
- J. Kishida, MEd—PhD and MSW program specialist
- T. Kreif, MSW—community development, social and economic development, international social work
- C. Langworthy, MSW—Practicum Coordinator, gerontology, mental health
- \*P. Mataira, MSW, PhD—strategies for economic and community development, multicultural indigenous issues, working with men, qualitative research
- R. Matayoshi, MSW—Practicum Coordinator, volunteerism, volunteer management, peace, leadership, interdisciplinary education
- \*P. Morelli, MSW, PhD—Chair of Doctoral Program, Chair of Mental Health concentration, social work practice, cross-cultural/minority mental health, social development, qualitative research
- S. Nishimura, MSW, PhD—adolescent substance abuse, behavioral health, youth violence prevention, program evaluation

- H. Jambor, MA, DSW
- L. Lister, MSW, DSW

## General Information

Social work, one of the fastest growing occupations in the nation, is a profession concerned with the prevention and resolution of problems for individuals, families, groups, and communities. Those who are committed to social justice and improving the quality of life for society's most vulnerable citizens would find this curriculum stimulating. Students graduate with the knowledge, skills, and values that facilitate the prevention or resolution of such problems as mental illness, substance abuse, homelessness, crime and delinquency, and poverty.

The school has been providing quality social work education in Hawai'i for over 74 years. It has a bachelor's, master's, and doctoral program. The BSW and MSW programs are accredited by the Council on Social Work Education (CSWE) and our PhD program is approved by UH Mānoa Graduate Division. Our school is recognized nationally and internationally for its award-winning faculty, research and publications, and specialty areas that focus on the expressed needs of the community (health, mental health, child and family, and gerontology).

### Mission

The mission of the Myron B. Thompson School of Social Work (MBT SSW) is to provide educational excellence that advances social work with its focus on social justice. The principal responsibility is the generation, transmission, and application of knowledge for the global enterprise with special attention to Native Hawaiian, other Pacific Islander, and Asian populations in our state and region.

## Advising

Freshmen and sophomores who are interested in learning more about the social work profession and/or our BSW program have several ways to do this: (1) The Pre-Health/Pre-Law Advising Center is a walk-in resource center staffed with advisors trained to help students clarify career goals, select a major, plan coursework, research professional programs, gain relevant experience, and apply to schools. See: [\[dergrad/pac/\]\(http://dergrad/pac/\). \(2\) Social Work faculty advisors are available by appointment to assist with pre-admissions academic advising. Contact the School of Social Work Admissions Office for more information: \[sswadmit@hawaii.edu\]\(mailto:sswadmit@hawaii.edu\) or \(808\) 956-7182. \(3\) Online resources for BSW, MSW, and PhD programs, admissions, and degree requirements: Myron B. Thompson School of Social Work website \(\[www.hawaii.edu/sswork/programs.html\]\(http://www.hawaii.edu/sswork/programs.html\)\); MBT SSW Bulletin \(\[www.hawaii.edu/sswork/bulletin.html\]\(http://www.hawaii.edu/sswork/bulletin.html\)\). Hard copies of admissions information and materials may be requested from the SSW Admissions Office: \[sswadmit@hawaii.edu\]\(mailto:sswadmit@hawaii.edu\) or \(808\) 956-7182.](http://manoa.hawaii.edu/un-</a></p>
</div>
<div data-bbox=)

## Financial Aid

It is important that students seek out information on financial aid, including scholarships, stipends, student employment, etc., as early as possible. Deadline dates can vary and may require additional documentation and/or interviews.

The UH Mānoa Financial Aid Services is dedicated to making it possible for degree-seeking admitted students to attend UH Mānoa regardless of their economic circumstances. See [www.hawaii.edu/fas/](http://www.hawaii.edu/fas/). Please review this website thoroughly as it contains many links to additional and outside sources for financial aid.

The MBT School of Social Work also has a limited number of scholarships available to social work students. This information can be located: (1) under each program's "Financial Aid" and "Forms" sections on the SSW website: [www.hawaii.edu/sswork/](http://www.hawaii.edu/sswork/) (2) in the MBT SSW Bulletin: [www.hawaii.edu/sswork/bulletin.html](http://www.hawaii.edu/sswork/bulletin.html). Hardcopy versions of the bulletin can also be requested through the SSW Admissions Office.

## Undergraduate Program

### Bachelor of Social Work

The primary goal of the BSW program is to prepare students to be competent, beginning level professionals and generalist practitioners capable of integrating the knowledge, skills, and values of social work, based on a liberal arts foundation. The program's secondary goal is to prepare students for advanced social work education. The program combines both academic course work and field practicum in a two-year course of study beginning in the junior year. The curriculum is predicated on and extends the liberal arts perspective.

### Admission Requirements

The applicant must: (a) have been admitted to UH Mānoa; (b) have completed UH's General Education Core requirements (special consideration is given to second semester sophomores for early admission); (c) have completed the knowledge-base courses identified by the school; (d) have a minimum cumulative GPA of 2.5; and (e) provide evidence of motivation for and commitment to social work education (e.g., personal, volunteer, and/or social-work-related experience).

### Application Deadlines

Students are admitted to the BSW program in the fall and spring semesters.

**February 1** for the fall semester; **October 1** for spring.

### Degree Requirements

The student must (a) fulfill all UH Core requirements; (b) complete the required undergraduate social work curriculum listed below; (c) earn an aggregate of no less than 120 credit hours; and (d) have a minimum cumulative GPA of 2.5.

### BSW Curriculum

Candidates must complete the following curriculum requirements:

1. The following social work knowledge-based courses must be included in the General Education Core or as lower division electives: any introductory political science course, PHIL 110 or 111, any psychology course, SW 200, and a biology course that emphasizes human biology.
2. Social work major courses (38 credit hours) including SW 302, 303, 325, 326, 360, 361, 391, 402, 403, 440, 490, and 491.
3. Electives required in upper division liberal arts courses (21 credit hours) including one course in each of the following areas: (a) small group, community, or organizational theory; (b) analysis of a social institution, problem, or issue; (c) ethnic or cultural factors; (d) American values; (e) women's issues; (f) research design and methodology; and (g) other related topics.
4. Other electives (2-4 credit hours).

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Graduate Programs

### Master of Social Work

The MSW curriculum prepares students for professional advanced practice and requires 57 credit hours. The course work must be completed within a 4-year period, of which 4 semesters of practicum and completion of the research requirement are mandatory. Students may waive some foundation level courses by examination and thereby, reduce the number of credits necessary to receive their degree.

The foundation curriculum includes courses in social welfare policy, human behavior in the social environment, research, social work practice with individuals, families, groups, and communities, and practicum. The advanced curriculum is organized around four concentrations: behavioral mental health, child and family, gerontology, and health. Elective courses

augment the foundation and concentration curricula; electives may include courses in marriage and family therapy, substance abuse, criminal justice, Native Hawaiian cultural practices, and other offerings relevant to the student's chosen concentration.

Admission requirements are: a bachelor's degree from an accredited U.S. college or university or its equivalent from a recognized foreign institution of higher learning, a 3.0 GPA, a liberal arts background, the motivation for a career in social work, and evidence of ability to manage the rigors of graduate school.

### Application Deadline

**February 1** (MSW admission occurs in the fall only).

For further information, write to the school at Henke Hall #230, 1800 East West Road, Honolulu, HI 96822, call (808) 956-7182, email [sswadmit@hawaii.edu](mailto:sswadmit@hawaii.edu), or check the website at [www.hawaii.edu/sswork](http://www.hawaii.edu/sswork).

### Neighbor Island Distance Education MSW Delivery Option

#### Application Deadline

**December 15** for fall admission.

The MSW degree is now available to neighbor island residents via distance education technology. Classes include instruction via interactive television, computer-based delivery, face-to-face onsite, and hybrid or blended approaches. It is a 3-year program.

For more information, call (808) 956-9470 or visit the website at [www.hawaii.edu/sswork/de/](http://www.hawaii.edu/sswork/de/).

### PhD in Social Welfare

The PhD program prepares students for leadership in the advancement of social welfare education, practice, policy development, and research. The program promotes social justice and global understanding through scholarly inquiry using indigenous and mixed method approaches. Emphasis is placed on knowledge development that enhances the well-being of Native Hawaiians and the diverse people and communities of Hawai'i and the Asian-Pacific Region. The curriculum and program of study place highest priority on independent inquiry and the enhancement of intellectual, creative, and analytical abilities. Each student will develop the ability to conduct independent research on a critical social problem.

The program is designed to provide sufficient structure to guide students as well as the flexibility and rigor that are the hallmarks of doctoral education. The curriculum is divided into required courses ensuring that all students are equipped with comparable basic knowledge; specialization work, in which students largely design their own curriculum; teaching and research practica; electives; a dissertation design and proposal requirement; and the dissertation. The PhD in social welfare requires 46 hours of course credit excluding dissertation credits.

#### Application Deadline

**January 15** (PhD admission occurs in the fall only).

For more information, call (808) 956-3831, email [sswadmit@hawaii.edu](mailto:sswadmit@hawaii.edu), or check the website at [www.hawaii.edu/sswork/phd.html](http://www.hawaii.edu/sswork/phd.html).

- \*D. Spencer, PhD—tourism policy, planning and management
- \*H. Wen, PhD—information technology systems, e-commerce, e-consumer behavior, e-marketing, hotel operation management, supply chain management

## General Information

The School of Travel Industry Management (TIM) is recognized as a leading educational institution in hospitality, tourism, and transportation management. TIM pioneered the concept of integrating all aspects of the travel industry under a single discipline. Built on a foundation of management science, TIM also draws on a broad range of disciplines to provide high-quality education at the undergraduate and graduate levels to current and future professionals.

The visitor industry in Hawai‘i provides TIM students many opportunities to gain experience in the field and to study applications of theory to practical business situations. TIM works closely with local, national, and international business organizations, as well as with various government and private professional organizations.

In addition to Hawai‘i’s travel industry environment, students benefit from a curriculum that has an international perspective with special emphasis in the Asia-Pacific region. The global importance of tourism and the increasingly interdependent nature of economic and political systems require a fundamental and multidisciplinary understanding of international issues. TIM’s distinctive curriculum and outstanding faculty, the success and importance of tourism as the leading industry in Hawai‘i, and the international focus of the programs provide students a unique educational environment and experience.

## Mission

As a professional program within a land-grant institution, the School of Travel Industry Management has linked its mission with the state’s economic interest in tourism, Hawai‘i’s largest economic sector. The mission of TIM, as a leading regional professional institution, is to develop and disseminate travel and tourism concepts, knowledge, and skills through excellence and leadership in research, training, outreach, and service that contributes to economic, social, and environmental sustainability as well as supports and enriches the host culture. With this mission, the school’s objectives are threefold: (a) to prepare individuals for leadership and professional positions in the travel industry through education and training, (b) to generate new knowledge in the travel industry through research and graduate education, and (c) to provide service to the community, nation, Asia-Pacific region, and beyond.

## Goals

Within its mission and objectives, TIM strives for the following goals:

1. Instruction—to provide high-quality education at the undergraduate and graduate levels on a statewide basis;
2. Research—to conduct basic and applied research relevant to the travel industry; and
3. Service—to be the leading travel-industry center for information resources and continuing professional education and training serving the state and the Asia-Pacific region.

## Accreditation

TIM is fully accredited by the Accreditation Commission for Programs in Hospitality Administration (ACPHA).

TIM also has earned the TedQual designation for total education quality from the United Nations World Tourism Organization (UNWTO).

## Degrees

**Undergraduate Certificates:** travel industry management and sustainable tourism

**Bachelor's Degree:** BS in travel industry management

**Master's Degree:** MS in travel industry management

## Advising

TIM Student Services Office

George Hall 346

2560 Campus Road

Honolulu, HI 96822

Tel: (808) 956-8946

Fax: (808) 956-5378

All students are assigned to the student services advisors upon admission to the school. Advisors assist students with the selection of courses appropriate to their career goals, identifying career goals that are appropriate to their interests, understanding UH Mānoa policies and procedures, and identifying co-curricular activities and/or work experiences to help them develop skills and abilities outside the classroom.

Mandatory academic advising is required for all freshmen, sophomores, and new transfer students. All students are encouraged to see an advisor at regular intervals to plan for graduation in a timely manner. The Bachelor Degree Program Sheet and additional advising information can be found on the school's website.

## Seniors

Seniors must complete a degree check and file a diploma application prior to their final semester. Individual advising sessions for graduating seniors are held each semester.

## Academic Policies

### Good Academic Standing

Undergraduate TIM students must meet the following requirements to maintain good academic standing:

1. Cumulative GPA of at least 2.0 for all courses attempted at UH Mānoa for a grade. Transfer credits and courses completed under the CR/NC option are not included.
2. A GPA of at least 2.0 in the upper division TIM core and 2.0 in the TIM emphasis.

3. Satisfactory progress toward completion of degree requirements. This means students must enroll in courses required for the degree and complete these courses with acceptable grades.

### Probation

A student who fails to meet any one of the academic standing requirements at the end of any semester is placed on probation. Probationary students must achieve a current (semester) GPA of at least 2.0 to be allowed continued registration. Failure to correct academic deficiencies may lead to suspension and eventual dismissal from UH Mānoa.

### Withdrawal from Courses

As the semester progresses, it becomes increasingly difficult to withdraw from a course. Withdrawal deadlines are specified by UH Mānoa each semester, and students should take note of the relevant deadlines at the start of the semester.

## Undergraduate Program

### Areas of Emphasis

TIM offers two areas of emphasis within the BS program: hospitality management and tourism/transportation management. These emphases are a selection of courses, which constitute a more focused study in one area of travel industry management of interest to the student. The undergraduate instructional program is committed to the development of competent management personnel for the travel industry through a curriculum that enables students to develop leadership abilities to solve problems of a dynamic industry.

The global nature of the curriculum provides insight into the role and responsibilities of the industry within state, regional, national, and world perspectives, as well as the nature of service-based enterprises, business ethics, and societal constraints. In addition, practical knowledge regarding operational aspects of the industry enables students to develop "reality skills" within the field.

### Hospitality Management

The hospitality management emphasis is intended to provide students with the ability to apply problem-solving, decision-making techniques, and critical-thinking skills to meet current and future industry challenges. Students will study the relationship of the various constituencies (customer, owner, staff) in the management and operation of hospitality businesses, including lodging and food service establishments, as well as event management enterprises.

Courses in this area cover the following areas: management of hotel and food & beverage establishments; food quality management; hospitality financial control; events management; principles of sales and marketing hotels and resorts with a focus on public relations; advertising, pricing, and yield management; operating a commercial food-service facility either as a free-standing operation or as a part of a hotel, club, entertainment/recreation complex, or institution; resort development and management of hotel facilities and design; resort development and management and quantity/quality of food productions.

Graduating seniors take a capstone course in strategic management in the travel industry.

### Tourism/Transportation Management

This emphasis focuses on strategic issues related to the tourism and transportation industries. Students can take a combination of tourism and transportation related courses or choose courses that focus on one of these two areas. Tourism management courses cover destination management; travel distribution systems; marketing and management principles within specific types of businesses, geography, and socio-cultural aspects of tourism; and sustainable tourism, cultural heritage, and destination management by cultural values. In transportation management courses, students will gain an understanding of the characteristics and importance of transportation systems (both domestic and international); major transportation modes; government, promotional, and regulatory activities in U.S. transportation; the role of transportation in tourism; the transportation systems that impact the economics of both Hawai'i and the U.S.; supply chain management; and the management of firms in various transportation modes. Course topics include government regulation and promotion, distribution and industry trends; tourist-related transportation systems, surface passenger transportation systems, and air transportation and the cruise business.

Graduating seniors take a capstone course in strategic management in the travel industry.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Student Learning Objectives for the BS Degree

TIM Student Learning Objectives for the Bachelor of Science degree are: 1) Effective Communication—students can employ communication skills effectively to accomplish organizational and professional objectives; 2) Leadership and Teamwork—students can demonstrate leadership, students can work effectively, respectfully, professionally as a team member; 3) Critical and Creative Thinking—students can analyze situations and develop alternative options to resolve identified issue, students can select appropriate information to develop reliable, valid, and logical arguments; 4) Knowledge and Global Perspective—from a global perspective, students can explain and apply the principles of travel industry management and of hospitality, tourism, and/or transportation management; 5) Ethics and Stewardship—students can demonstrate integrity and ethical behavior, students can comprehend the importance of host cultures to the global travel industry and apply sustainable practices.

## Admission Requirements

### Classified UH Mānoa Students

Applications are available at the TIM office in George Hall 346. Students must meet the following criteria:

1. A minimum cumulative GPA of at least 2.0 for all work attempted at UH Mānoa; and
2. Evidence of potential for success in the travel industry, including, but not limited to, (a) participation in co-curricular activities in school or in the community, (b) personal recommendations, and (c) part-time or summer work experience.

### Transfer Applicants

Students attending other academic institutions must meet the following criteria:

1. Admissible to UH Mānoa with a 2.0 cumulative transfer GPA for Hawai'i residents and a 2.5 cumulative transfer GPA for non-Hawai'i residents, and 24 transferable college-level credits.
2. Evidence of potential for success in the travel industry, including, but not limited to, (a) participation in co-curricular activities in school or in the community, (b) personal recommendations, and (c) part-time or summer work experience.

### Transfer Credits Policy

Please refer to the UH Mānoa Policy for Transfer Credits. Access: [manoa.hawaii.edu/admissions/undergrad/policies.html#credits](http://manoa.hawaii.edu/admissions/undergrad/policies.html#credits).

Definition: Transfer credits are credits received for previous courses completed at another institution of higher education that articulate with UH Mānoa courses.

Eligibility: Declared majors may request an evaluation of credits taken at other institutions of higher education through the Office of Admissions and Office of the Registrar.

All students are reminded that:

- A minimum of 30 credits must be taken at UH Mānoa.
- All courses at the TIM school that are designated at the “upper division” (300/400 level) cannot be satisfied with a course transferred from a two-year school.
- A minimum of 36 upper division TIM credits must be taken at the TIM school.

### Application Procedures

Application forms are available in the TIM Student Services Office for classified degree students at UH Mānoa in other schools and colleges who wish to change majors. Applications must be received by **May 1** for fall admission and **November 1** for spring admission. Applicants who are not currently classified degree students at UH Mānoa must submit the UH System Application Form to the UH Mānoa Office of Admissions by the published fall and spring application deadlines.

### School Requirements

To earn the bachelor of science degree, students must complete the following General Education Requirements:

1. Fulfill the UH Mānoa General Education Foundation Requirements: (12 credits)
  - a. One course in Written Communication FW (3): ENG 100, 100A, 190 or ELI 100.
  - b. One course in Symbolic Reasoning FS (3): BUS 250, NREM 203, MATH 203, 215, or 241.

- c. Two courses in Global and Multi-Cultural Perspectives (FG): TIM 102 for FGB (3) and one course designated FGA or FGC (3)
2. Fulfill the UH Mānoa General Education Diversification Requirements: (16-19 credits)
  - a. Two Arts/Humanities/Literature courses:
    1. TIM requires COMG 151 or 251 for DA (3).
    2. Any course designated Literature DL (3) rec. ENG 270-3.
  - b. Three Natural Sciences courses:
    1. Any course designated Biological DB (3) rec. FSHN 185.
    2. Any course designated Physical DP (3) rec. CHEM 151/151L for hospitality track.
    3. Any course designated Lab DY (1) rec. FSHN 181/181L for hospitality track.
  - c. Two Social Sciences courses
    1. TIM requires ECON 130 for DS (3).
    2. Any course designated DS other than ECON (3). rec. TIM 321, 324, BUS 310 or SOCS 225 (0).
3. Fulfill the UH Mānoa General Education Language (HSL) Requirements. (12-16 credits) TIM requires that students achieve second-year proficiency. See the TIM advisor for information on waivers or earning up to 16 back credits.
4. Fulfill the UH Mānoa General Education Focus Requirements. Most of the eight focus requirements may be met through TIM required courses, e.g., ETH-TIM 301 or 321; OC-TIM 306; and five WI-recommended DL course, TIM 321, 425, 431, and summer session TIM 200 or 300. Non-system transfers should refer to page 28 of the *Catalog* for pro-rated focus requirements.
5. Complete the TIM lower division special requirements (13 credits): TIM 101, ACC 201, ACC 202, and ICS 101B or 101.
6. Complete the internship program, (TIM 100, 200, and 300 or 400B or 400C), including 800 hours with at least one internship in the student's area of emphasis and one in the U.S.;
7. Complete the TIM upper division core courses (21 credits):
  - a. Statistics (BUS 310, ECON 321, NREM 310 or SOCS 225).
  - b. With grades of C- or higher: TIM 301, 302, 303, 304, 305, 306. Statistics and TIM 302 must be completed during the first semester the student is eligible.
8. Complete one of the TIM areas of emphasis with grades of C- or higher for each course:
  - a. Hospitality Emphasis (21 credits): TIM 313, 314, 333, 431, 401 or 403, one hospitality elective, and, one Tourism/Transportation course.
  - b. Tourism/Transportation Emphasis (21 credits): TIM 350; one of (TIM 321, 324, 325 or 420); 431; three Tourism/Transportation electives; and one hospitality course.
9. Earn a minimum of 120 credit hours with a minimum cumulative GPA of 2.0
10. Complete at least 45 credits of upper division coursework numbered 300 or higher.
11. Complete at least 36 upper division credits in TIM.

For more information, please refer to the TIM Degree Requirements Sheet and the UH Mānoa *Catalog* course descriptions.

### **Concurrent Degrees**

TIM students may pursue a concurrent degree with another UH Mānoa college/school. Applicants for concurrent degrees must have a minimum 3.25 UH Mānoa cumulative GPA and submit a statement of purpose and academic plan. Applicants must apply separately and be accepted to both colleges and/or schools. For more information, contact the TIM advisor.

### **Certificate in Sustainable Tourism**

The Certificate in Sustainable Tourism is designed to provide non-TIM undergraduate students with an opportunity to develop knowledge and understanding of sustainable and responsible tourism principles and practices.

Students must apply to the TIM school to be accepted to the certificate program prior to enrolling in upper-division TIM courses. Admission requirements include completion of TIM 101 with a B grade or better, completion of 54 non-TIM credits and a minimum cumulative GPA of 2.5.

Certificate students are required to take 15 credits offered by the TIM school and complete the requirements for a bachelor degree in their area of study. The required courses are TIM 101 and 420. Students will select nine credits from the following courses: TIM 321, 324, 325, 369E, 369J, 415, and 469B.

### **Certificate in Travel Industry Management**

The certificate consists of 5 core courses that provide basic fundamentals in travel industry management for non majors.

Students must apply to the TIM school to be accepted to the certificate program prior to enrolling in upper division TIM courses. Admission requirements include the completion of 24 college-level credits and may include other admissions requirements. The required courses are TIM 101 and four of the following five 300-level courses: TIM 302, 303, 304, 305, 306. Please contact the TIM advisor for more information.

### **Graduate Program**

The master of science (MS) degree program in travel industry management is designed to provide a specialized education through coursework and research to master a broad set of interdisciplinary skills and knowledge. Students develop analytical abilities and the critical thinking skills necessary for careers in the travel industry. Students are also expected to engage in understanding and execution of research activities.

The program prepares students for careers and leadership roles in the travel industry including tourism, hospitality, and transportation management as well as areas covering the entire industry including information technology, international hospitality management, strategic marketing, and global tourism analysis. Students can also explore specific topics of interest including sustainable tourism, electronic commerce, services marketing, and management among others. In addition, the program and faculty have a strong emphasis and expertise in travel and tourism in the Asia-Pacific region. Students come from diverse academic backgrounds, which contribute to a rich and stimulating classroom environment. There are, however, certain subjects that entering students must be familiar with in order to work from a common knowledge base in our courses. These subjects are: 1) introductory economics, 2) introductory financial and managerial accounting, and 3) introductory statistics. If you have not yet taken these courses, they are not required for admission and options are available for meeting this requirement.

## Admission Requirements

The MS in travel industry management is designed for individuals who hold a baccalaureate degree and a demonstrated interest in the travel industry. It is preferred that individuals have an undergraduate degree in the travel-hospitality field, or prerequisites may be required.

Minimum admission standards include a GPA of at least 3.0 in the baccalaureate work and in the last two years of undergraduate work. Applicants must attain a satisfactory score on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). The GMAT is preferred. Students should take the GMAT unless it is not available. Where applicable, the Test of English as a Foreign Language (TOEFL) also is required. The minimum acceptable TOEFL score is 560.

Three letters of reference are required addressing the ability of the applicant to succeed in graduate study and to make future contributions to the travel industry. In addition, two years work experience or equivalent is preferred.

## Degree Requirements

The MS is a 36-credit program. Both Plan A (thesis) and Plan B (non-thesis) options are available. Plan A and Plan B students must earn 21 credits in the following required core courses: TIM 601, 602, 603, 605, 606, 607, and 695.

### Plan A (Thesis)

In addition to the 21 credits in required core courses, Plan A candidates must complete: three elective courses (9 credits) approved by the graduate chair; and TIM 700 Thesis Research (6 credits).

### Plan B (Non-thesis)

In addition to the 21 credits in required core courses, Plan B candidates must complete: four elective courses (12 credits) approved by the graduate chair; and TIM 694 Professional Paper (3 credits).

## Instructional and Research Facilities and Programs

### Center for Tourism Policy Studies

The Center for Tourism Policy Studies (CTPS) was established in coordination with the World Tourism Organization as one of fourteen such centers throughout the world. CTPS conducts research for academic, government, and industry use, offers professional development programs, and provides technical assistance and other community services in tourism-related areas. Through its programs the CTPS has the following five objectives: 1) conducts research of interest to the travel industry and disseminates the findings and results to the academic, governmental, and private sector communities through publications, conferences, and lectures; 2) provides relevant career-oriented courses for Hawai'i residents through continuing education, outreach, and extension services; 3) provides professional development seminars at the regional and international levels; 4) maintains the Sunset Reference Center, a comprehensive tourism resource center; 5) maintains linkages with other research and training units within the university, other educational institutions, and tourism-related organizations in Hawai'i, the Asia-Pacific region, and worldwide.

## Professional Development Programs

The TIM school's professional development programs are designed to improve managerial skills, exchange professional experiences, develop interrelationships among sectors of the travel industry, and increase awareness of the social, cultural, and economic implications of policy decisions. Two summer institutes are held each year:

1. Executive Development Institute for Tourism (EDIT): a two week program for executives and professionals in international tourism; and
2. Hawai'i International Hotel Institute (HIHI): a series of one-week courses for those with one or more years of experience in the hospitality field.

In addition, TIM conducts both short- and long-term education and training programs for tourism professionals in Hawai'i and the Asia Pacific region.

### Gee Technology Learning Center

The TIM school's state-of-the-art information technology center houses an executive video conference suite, a multi-media IT training lab, and the Leong Hop and Bernice C. Loui computer lab.

### The Sunset Reference Center

With more than 10,000 items, including books, reports, statistical publications, article reprints, and subscriptions to more than 200 periodicals, the *Sunset* Reference Center has a comprehensive collection of specialized resource material on tourism in Hawai'i. The *Sunset* Reference Center provides research material for students, supports the research activities of faculty, and serves as a major resource center for the Asia-Pacific region.

### ECO-Hawai'i Educational & Community Outreach

ECO-TIM is designed to extend TIM's expertise in and commitment to responsible tourism to the broader community in Hawai'i through community outreach, service, and continuing education. This program works with community associations, individuals, small- and medium-sized enterprises, and government organizations to provide outreach services and continuing education activities. Activities include outreach projects, lectures, courses, exhibits, forums, conferences, briefing notes, and internet-based information exchange.

## Student Organizations

The TIM school has six student clubs that provide opportunities for students to interact with their peers, meet industry leaders, and practice management skills through a wide variety of activities. These clubs are Travel Industry Management Student Association, Club Managers' Association of America (UH Chapter), Pacific Asia Travel Association (TIM Satellite Chapter), Young SKAL, American Hotel & Lodging Association Student Chapter, and Eta Sigma Delta.

## **Honors and Awards**

The TIM school provides scholarships and awards to qualified students. For a list of these scholarships, see the “Tuition, Fees, and Financial Aid” section of the *Catalog*.

### **Eta Sigma Delta**

Membership in this international honor society for hospitality management is available to undergraduate and graduate students who have achieved outstanding academic records.

### **Outstanding Student Awards**

These awards are given annually to students who have achieved outstanding academic and service performance in the following categories: (a) senior in travel industry management; (b) graduate student in travel industry management; (c) senior in hotel management; (d) senior in tourism/transportation management; (e) junior in travel industry management; (f) TIM International Award of Excellence (awarded by the TIM Alumni Association); (g) Dean’s Scholar award; and (h) Dean’s Spirit of TIM Award.

## **Honors**

For Honors Program information, see the “Honors” section of this *Catalog*. Students may apply for UH Mānoa undergraduate research awards.

### **Dean's List**

For Dean’s List information, see the Academic Honors in the “Undergraduate Education” section of this *Catalog*.

# College of Tropical Agriculture and Human Resources

## Administration

Gilmore Hall 202  
3050 Maile Way  
Honolulu, HI 96822  
Tel: (808) 956-8234  
Fax: (808) 956-9105  
Web: www.ctahr.hawaii.edu

Dean and Director: Maria Gallo  
Associate Dean: Charles M. Kinoshita  
Interim Associate Dean: Kenneth Grace  
Interim Associate Dean: Carl I. Evensen

## General Information

The College of Tropical Agriculture and Human Resources (CTAHR) was established with the founding of UH in 1907. CTAHR is a leading academic institution in tropical agriculture, biological engineering, food science and human nutrition, fashion design and merchandising, biotechnology, natural resources and environmental management, and family resources. Hawai'i's unique geographic location, ecological diversity, and multicultural population provide students with a living laboratory. The college is the locus of educational opportunities for students preparing to become tomorrow's scientists, technologists, business leaders, family development specialists, fashion designers and merchandisers, nutritionists, and policy makers.

The land-grant mission of CTAHR provides students with an opportunity to study in an environment that blends teaching, research, and extension programs dedicated to discover-

ing the secrets of basic science while addressing contemporary issues. Faculty members bring to the classroom the unique perspective of emerging research issues, coupled with an abiding commitment to education.

Through its extension activities, the college provides off-campus, noncredit educational programs focused on the advancement of agriculture in Hawai'i, protection of the environment, and the strengthening of families and communities.

Through its research activities, the college promotes the advancement of life sciences and applications for productive sustainable agriculture. Investigations cover plant and animal physiology; plant, insect, microbial, aquacultural, bioreactor and environmental biotechnology; diseases, insects, and parasites; agronomy; soils; food science; food processing; environmental management; biological engineering; bioremediation; biochemistry; human and animal nutrition; breeding and genetics; and culture, production, economics, marketing, and quality of life for individuals and families.

### CTAHR Program Goals:

To prepare its students for success, CTAHR's programs focus on four goals that incorporate characteristics desired by prospective employers. Each CTAHR graduate should be able to:

- Communicate appropriately and clearly in a variety of oral and written forms to both professional and non-technical audiences.
- Apply analytical, problem-solving, business management, and technological skills to everyday and discipline-related challenges.
- Develop positive and ethical personal characteristics and appropriate interpersonal and leadership skills.
- Gain a broad understanding of real-world experiences and global issues through the exploration of and involvement in career-related opportunities.

### Degrees and Certificates Offered

**Certificates:** Graduate Resource Management Certificate, Agribusiness Management Certificate

**Bachelor's Degrees:** BS in animal sciences, BS in fashion design and merchandising, BS in biological engineering, BS in family resources, BS in food science and human nutrition, BS in molecular biosciences and biotechnology, BS in natural resources and environmental management, BS in plant and environmental protection sciences, BS in tropical plant and soil sciences

**Doctoral Degrees:** PhD in entomology, PhD in molecular biosciences and bioengineering, PhD in natural resources and environmental management, PhD in nutrition, PhD in tropical plant pathology, PhD in tropical plant and soil sciences

## Advising

CTAHR Office of Academic and Student Affairs

Gilmore 210

3050 Maile Way

Honolulu, HI 96822

Tel: (808) 956-8183 or (808) 956-6733

Fax: (808) 956-3706

Email: acadaff@ctahr.hawaii.edu

Web: www.ctahr.hawaii.edu

## Undergraduate Programs

Undergraduate programs in CTAHR provide students with an opportunity to acquire those scientific, professional, and personal competencies emphasized by Hawai'i's business, governmental, community, and scientific leaders. The college provides a balance of educational experiences that include classroom instruction, laboratory sessions, co-curricular activities, supervised internships, and international study. Student exchange programs are also available for those desiring short term exposure to other institutions.

### Admission Requirements

Students may enter CTAHR as freshmen or as transfer students from other departments or academic institutions. Requirements for admission are the same as those for the UH Mānoa campus in general, except for the food science and human nutrition, family resources, fashion design and merchandising, and natural resources and environmental management majors. Transfer students are required to have a minimum GPA of 2.5 for fashion design and merchandising, and natural resources and environmental management majors, 2.6 for family resources majors, and 3.0 for food science and human nutrition majors. Pre-requisite coursework is also required for food science and human nutrition majors. Information on CTAHR undergraduate programs can be obtained from the CTAHR Office of Academic and Student Affairs.

### College Requirements

To be eligible for a BS degree from CTAHR, students must complete the General Education Core requirements, CTAHR requirements, course requirements of the CTAHR major, and 45 credit hours of upper division courses (300+ level courses), earn a minimum cumulative 2.0 GPA in major courses, and maintain a minimum cumulative GPA of 2.0 in a minimum of 120-124 credit hours as prescribed by the major. Some majors may require more credit hours. All CTAHR undergraduates are required to complete a set of interrelated courses: FAMR 380/380L Research Methodology/Lab or NREM 310 Statistics in Agriculture and Human Resources; and an internship or capstone course within their major field. Foreign language require-

ments are specific to each academic program. Check with the departmental advisor for more information.

### Double Major or Second Degree

Students seeking a double major must have a minimum cumulative GPA of 3.25, demonstrate that the proposed majors are substantially different, and obtain approval from undergraduate advisors in both of the relevant programs.

Students seeking a second degree must have a minimum cumulative GPA of 3.0 and demonstrate that the proposed second degree is substantially different from the first degree. At least 30 credit hours are required for the second degree in addition to those associated with the first degree.

### Concurrent Degree

It is the policy of CTAHR to allow CTAHR students and non-CTAHR students to earn undergraduate concurrent degrees in two separate programs. Students applying for an undergraduate concurrent degree in CTAHR must have earned at least 24 credits and have a UH Mānoa minimum cumulative GPA of 3.25. Students also need to meet other requirements for the concurrent degree.

## Graduate Programs

Graduate studies leading to a master of science degree are available in nine fields: animal sciences; biological engineering; entomology; food science; molecular biosciences and bioengineering; natural resources and environmental management; nutritional science; tropical plant pathology; and tropical plant and soil sciences. Doctor of philosophy programs are available in six fields: tropical plant pathology, molecular biosciences and bioengineering, entomology, natural resources and environmental management, nutrition, and tropical plant and soil sciences.

Three of CTAHR's graduate programs in tropical agriculture (entomology, natural resources and environmental management, and tropical plant and soil sciences), have been recognized as distinctive programs by the Western Interstate Commission for Higher Education (WICHE). Qualified students from participating states may enroll in these graduate programs at Hawai'i-resident tuition rates.

CTAHR utilizes general UH Mānoa facilities, including the libraries, which offer extensive collections and information services, and the computing center, which provides access to individual computers as well as large mainframes. Along with the Pacific Biomedical Research Center, CTAHR sponsors the Biotechnology-Molecular Biology Instrumentation Facility for the benefit of researchers throughout UH Mānoa. The college's facilities include a microcomputer laboratory, several research stations, and specialized laboratories with state-of-the-art equipment, all of which support research and instruction in the food and life sciences. On-campus affiliations with the Hawai'i Institute of Marine Biology, Water Resources Research Center, East-West Center, Harold L. Lyon Arboretum, Sea Grant College Program, and Hawai'i Natural Energy Institute extend CTAHR's resources. The college is also affiliated closely with off-campus institutions, such as the Bernice P. Bishop Museum, USDA/ARS Tropical Fruit and Vegetable Research Laboratory, Hawai'i Agriculture Research Center, U.S. Geological Survey, National Marine Fisheries Service, and Hawai'i Department of Agriculture.

Students may contact individual departments, the Graduate Division, 2540 Maile Way, Spalding Hall, Honolulu,

HI 96822, or Financial Aid Services, 2600 Campus Road, Honolulu, HI 96822 for information on grants, fellowships, assistantships, scholarships, tuition waivers, loans, work-study programs, and job opportunities.

Information on CTAHR graduate programs can be obtained from the Office of Academic and Student Affairs, Gilmore 210, (808) 956-8183, or from departmental offices.

### **Admission Requirements**

Students must hold a bachelor's degree from an accredited U.S. college or university or its equivalent from a recognized foreign institution of higher learning. Admission requirements for various graduate programs are specified under each department's description. Admission decisions are made by the Graduate Division in consultation with faculty in the field of study.

### **College Requirements**

The requirements associated with the master of science degree vary with each program of study. The master of science Plan A (thesis) and Plan B (non-thesis) options are available in all programs; entomology, tropical plant pathology, and tropical plant and soil sciences programs also offer a Plan C (examinations) option.

The PhD degree culminates in a set of comprehensive and final examinations and a dissertation of original work. Special requirements exist in some fields of study. Contact the Graduate Division or the departments for additional information.

### **Instructional and Research Facilities**

Modern laboratories as well as statewide field laboratories are an important part of undergraduate and graduate instruction. Students are able to learn the latest research methods. Classrooms are well-equipped for learning computer applications.

### **Student Organizations**

CTAHR students are encouraged to join and actively participate in student organizations. CTAHR student organizations provide opportunities for students to gain experience in their professional field through diverse activities. Students can acquire transferable skills and competencies outside of the classroom while gaining invaluable knowledge they can utilize in the work force. Developing lasting friendships with peers

and faculty are also benefits of active participation in student organizations. Current CTAHR student organizations include:

- Innovators of Fashion
- Pre-Veterinary Club
- Food Science and Human Nutrition Council
- Tropical Plant and Soil Sciences Horticulture Society
- Friends of the Family
- CTAHR Student Ambassadors
- Natural Resources and Environmental Management Graduate Student Organization
- Ka Mea Kolo (Entomology Club)
- SOFT: Student Organic Farm Training
- Tropical Plant Pathology Graduate Student Organization
- Biological Engineering Student Association
- CTAHR Club

Exceptional students may also be recommended for membership to honorary societies such as: Gamma Sigma Delta and Phi Upsilon Omicron.

### **Honors and Awards**

The College of Tropical Agriculture and Human Resources and its departments provide scholarships and awards to its students. For a list of these scholarships, see the "Tuition, Fees, and Financial Aid" section of this *Catalog*. More information on scholarships and awards can be obtained from the CTAHR Academic and Student Affairs Office, Gilmore 210, (808) 956-8183.

## **Family and Consumer Sciences**

Fashion Design and Merchandising  
Miller 201  
Tel: (808) 956-8133

Family Resources  
Krauss Annex 7  
Tel: (808) 956-6519

2515 Campus Road  
Honolulu, HI 96822

Web: www.ctahr.hawaii.edu/FCS

### **Faculty**

- B. W. K. Yee, PhD (Chair)—Asia and Pacific Islander adult development and aging, women's health, Southeast Asians, minority career paths
- Y. Bahng, PhD—retailing, international merchandising, and entrepreneurship
- R. A. Caulfield, PhD—infancy, childhood, life span development
- M. Cheang, DrPH—family resource management, children's savings, family caregivers
- D. R. Ching, PhD—agricultural leadership
- J. L. Chong, MEd—adult and youth volunteer and leadership development, 4-H youth development (Hawai'i Cooperative Extension Service)
- P. Chow, MS—family resource management (O'ahu Cooperative Extension Service)
- M. A. Cristi, MS—merchandising management; consumer behavior and sociology

- B. De Baryshe, PhD—child development, early childhood education, family resilience
- K. D. Everett, MPA—youth development and volunteer management (Maui Cooperative Extension Service)
- G. F. Fong, EdD—family resource management
- H. Greenwood, MS—intergenerational and aging programs (Maui Cooperative Extension Service)
- J. Kang, PhD—2D/3D computer-aided design; consumer behavior in digital commerce
- L. J. Kawamura, MPH—4-H youth development, foods and nutrition (Kaua'i Cooperative Extension Service)
- T. N. Le, PhD, MPH—risk and resilience of Asian and Indigenous youth; mindfulness-based interventions
- S. Lewin-Bizan, PhD—parenting and father-child relationships; child and youth development within the contexts of family, school, and economic resources
- S. Lin, PhD—textile/costume conservation, production lifecycle management
- M. I. Martini, PhD—parenting and family relationships across cultures
- D. M. Masuo, PhD—consumer and family economics
- C. M. Nakatsuka, MEd—4-H youth division-military 4-H partnerships (O'ahu Cooperative Extension Service)
- A. H. Reilly, PhD—social psychology of appearance including body image
- R. W. Saito, MA—4-H youth development (O'ahu Cooperative Extension Service)
- R. L. Settlege, MS—4-H youth development livestock (Hawai'i Cooperative Extension Service)
- L. A. Yancura, PhD—stress and aging, research methodology, grandparents raising grandchildren, family caregivers

**Degrees Offered:** BS in fashion design and merchandising, minor in merchandising, BS in family resources, MEd in early childhood education in conjunction with the College of Education

## The Academic Program

The Department of Family and Consumer Sciences has been an integral part of the land-grant system and of UH since 1907. The department offers two bachelor of science degree programs: Fashion Design and Merchandising (FDM) and Family Resources (FAMR).

The FDM program integrates theoretical and applied knowledge regarding apparel design, consumer textiles, historic costume, apparel production, and apparel marketing and merchandising theory and practice, both domestic and international. The program fosters the development of professionals prepared for management-level positions in business and industry, such as apparel designer, buyer, merchandise manager, sales representative, costume designer, manufacturer, and store owner. An internship providing work experience related to a student's career interests is required. Majors complete a core of courses in subjects integral to apparel product development careers.

FAMR is a Bachelor of Science degree program that provides students with a comprehensive, ecological systems-based program of study in life span development and family resource management. The FAMR curriculum emphasizes the study of child, adolescent, adult development; family development (such as marriage and parenting); family resource management (such as consumer and family economics and family management); community needs; and leadership in human services occupations.

The program requires an internship providing work experience related to a student's career interests. Students are prepared

for bachelor-level careers in human and family services, and for graduate training in child and family studies, early childhood education, life span development, family life education, family and consumer sciences, and marriage and family therapy.

With supplementary course work, students may pursue graduate training in other social science disciplines such as social work, educational counseling, public health, urban and regional planning (e.g., community development), sociology, psychology, and law.

In addition to courses offered in the department, there are professional and honor society organizations. *Phi Upsilon Omicron* is a national honor society in family and consumer sciences with membership by invitation. *Friends of the Family (FOF)* provides service and professional experiences for FAMR majors while *Innovators of Fashion (IF)* does the same for FDM majors. Majors from any discipline are welcome to join FOF and IF.

## Undergraduate Study

### Advising

Fashion Design and Merchandising  
Miller 201  
2515 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-8133  
Email: fcs@ctahr.hawaii.edu

Family Resources  
Krauss Annex 7  
2515 Campus Road  
Honolulu, HI 96822  
Tel: (808) 956-6519  
Email: fcs@ctahr.hawaii.edu

Students are encouraged to come for initial advising before registering for the first year at UH Mānoa or prior to their application for admission as a transfer student.

As part of the college program requirements, all FDM and FAMR degree candidates must fulfill one of the following Symbolic Reasoning courses: BUS 250, ICS 141, ICS 241, MATH 100, 112, 140\*, 161, 203\*, 215\*, 241\*, 251A\*, NREM 203, PHIL 110, 110A, 111, or SOCS 150. (Please note that MATH 103, 104, and 135 do not fulfill the symbolic reasoning requirement for FDM and FAMR.)

\* Math Department's Precalculus Assessment required.

### Fashion Design and Merchandising Program

Fashion Design and Merchandising (FDM) is a comprehensive undergraduate program whose mission is to prepare students with appropriate knowledge and skills for career positions in apparel and fashion-related industries. Classroom work is enhanced by one of the largest costume collections at a university in the U.S., giving students and faculty a rich source of items to draw upon for their classes and projects. In addition, students have the opportunity to use web-based technologies to supplement classroom activities. Access to modern computer labs within the college make learning to do fashion illustration fun and challenging. Opportunities to study at other universities and to participate in study tours to fashion centers of the world are another plus. A strong foundation for graduate study in apparel and related areas is provided.

All FDM majors take a core set of courses that provides them with:

- An understanding of and appreciation for the impact of global production and distribution of apparel;
- The ability to plan, develop, and merchandise apparel product lines and to evaluate apparel quality;
- An understanding of the role of dress and fashion in their lives and the lives of others;
- An understanding of the design, manufacture, marketing, retailing, and consumption of textile and apparel products;
- The ability to demonstrate personal attitudes and skills appropriate to career positions in apparel.

### The Curriculum

A strong FDM core includes required courses in the fashion industry, aesthetics, textiles, fashion illustration, historic costume, the social psychology of dress, and apparel construction. The core prepares students for career positions in both creative and business management areas of local and global fashion industries. Upon completing the core requirements, students take classes in 3 of 4 tracks: Design, Merchandising, Cultural, and Production Management.

### Entrance Requirements

New students may be admitted directly into the program when they apply to UH Mānoa. Students transferring from other colleges within the UH System or from other universities must have a minimum GPA of 2.5 to be considered for admission to FDM.

### Minor

The merchandising minor gives students who are not FDM majors the opportunity to gain the required theory and applied skills to understand the merchandising/retailing function and skillfully employ techniques that encourage consumers to interface with products and services locally or internationally. Merchandising/retailing is the largest private employer segment of Hawai'i's business community. Minimum GPA of 2.5 needed to be considered.

### Degree Requirements

A summary of degree requirements is available in Miller 201, (808) 956-8133 or Miller 110, (808) 956-8105.

### Goals

From the core courses required of all FDM majors will develop:

1. The ability to evaluate textile and apparel product quality in terms of fiber and fabric performance, product standards and specifications, and consumer needs and preferences;
2. The ability to conduct comprehensive analyses of aesthetic elements in textile and apparel products and to estimate the effect of design decisions on target consumer markets;
3. The ability to apply theories, concepts, and principles to predict the direction of fashion change, to plan seasonal apparel product lines for discrete consumer groups, and to generate creative solutions to design and/or apparel merchandising and marketing problems;
4. The ability to describe current issues in textile and apparel design, production, and distribution systems; to assess the impact of global textile and apparel production and distribution practices on workers, consumers, and the environment; and to relate theories regarding markets, trade, and economic development to issues in the production, consumption, and disposal of textile products;

5. An understanding of concepts, theories and principles regarding the impact of dress on human behavior and its role in sustaining culture and in reflecting and fostering social change, and the ability to analyze and identify aspects of dress in historic and socio-cultural context;
6. The ability to identify, locate, analyze, and synthesize relevant information and to effectively communicate ideas in written, oral, and visual forms using appropriate technologies;
7. The ability to demonstrate personal attitudes and skills appropriate to career positions in fashion-related business and industry, and in related education and service organizations.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Family Resources Program

The Family Resources (FAMR) Program provides students with a comprehensive education in family development and resource management, including course work and study in the areas of family relations, parenting, family economics and resource management, consumer economics, human development, and community leadership and resource development. The curriculum prepares students to work proactively in multicultural settings to enhance the quality of family life, providing students with an understanding of:

- The changing needs and dynamics of families over time;
- The management of personal, family, and community resources to meet these needs;
- The growth and development of individuals over the human life cycle;
- The interrelationship of individuals, families, and communities in the context of diverse socio-economic and cultural systems.

Students gain a social systems perspective of how families operate by studying the theoretical and applied literature that addresses the biological, social, cultural, psychological, and economic well-being of individuals and families and the environments in which they live. Students also study the changing functions of the family, the roles of its members, and the community programs and policies that affect the decisions and well-being of families and consumers. FAMR courses provide students with knowledge that they can apply to their personal development and family life. An internship in the student's area of interest is an integral part of the curriculum.

### Entrance Requirements

New students may be admitted directly into the program when they apply to UH Mānoa. Students transferring from other colleges/schools within the UH System or from other universities must have a minimum GPA of 2.6 to be considered for admission to FAMR.

### Degree Requirements

A summary of degree requirements is available in Krauss Annex 7, (808) 956-6519 or Miller 110, (808) 956-8105.

### Goals and Objectives

Students completing the FAMR degree are expected to achieve the following goals and objectives:

Goal 1: Acquire a knowledge base in human development.

- Objective 1. Demonstrate criterion level knowledge of stages, processes, and ranges of typical human development
- Goal 2: Acquire a knowledge base in family science and resource management.
- Objective 1. Demonstrate criterion level knowledge of family diversity in the global community.
- Objective 2. Demonstrate criterion level knowledge of family resource management processes.
- Goal 3: Acquire a knowledge base of the community context in which family functioning and development take place.
- Objective 1. Demonstrate criterion level knowledge of the effects of context (social, economic, political, historical, and cultural environment) on family functioning and development.
- Goal 4: Acquire professional skills
- Objective 1. Demonstrate criterion level skills in written communication.
- Objective 2. Demonstrate criterion level skills in oral communication.
- Objective 3. Demonstrate a basic level of computer literacy.
- Objective 4. Demonstrate basic competence in “helping” skills.
- Objective 5. Demonstrate basic research skills.
- Goal 5: Apply knowledge and professional skills to address issues encountered in professional settings.
- Objective 1. Demonstrate critical thinking skills and problem solving abilities.
- Objective 2. Demonstrate commitment to professional values and ethical behavior.
- Objective 3. Demonstrate a satisfactory level of preparation for the world of work and responsibility for continued professional growth.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Additional Opportunities

### Provisional Certified Family Life Educator

The National Council on Family Relations (NCFR) has approved the family resources undergraduate program as meeting the standards and criteria required for the Provisional Certified Family Life Educator (CFLE) designation. Fully certified Family Life Educators work in the areas of program development, implementation, evaluation, teaching, training, and research related to individual and family well-being. Among other activities, they conduct workshops in parenting, marital relationships, and resource management, in hospitals, HMOs, clinics, and schools. FAMR graduates who complete the specified courses in ten family life substance areas can apply to NCFR for Provisional Certification. Once a graduate has completed two years of work experience in preventive, educational activities related to family well-being, the graduate can apply for full CFLE certification. FAMR internships, which include documented FLE activities may be used as part of the required work experience.

### Master of Education in Early Childhood Education

The Department of Family and Consumer Sciences in the College of Tropical Agriculture and Human Resources and the College of Education Departments of Curriculum Studies and Special Education offer an interdisciplinary program leading to the degree of master of education in early childhood education.

MEd in early childhood education requirements are located in the College of Education Departments of Curriculum Studies and Special Education section of this *Catalog*.

- \*J. Dobbs, PhD—food composition, nutrition, domestic animals, avian and wildlife nutrition
- M. W. DuPont, MS—livestock extension education (Hawai'i Cooperative Extension Service)
- \*M. Fialkowski, PhD, RD—obesity in indigenous populations
- G. K. Fukumoto, MS—livestock extension education (Hawai'i Cooperative Extension Service)
- C. Y. Hu, PhD—animal growth, adipose differentiation, lipid metabolism
- \*A. S. Huang, PhD—food chemistry, taro processing
- \*R. Jha, PhD—feed evaluation and animal nutrition
- \*S. Jun, PhD—food engineering, biosensors and processing control
- N. A. Kanehiro, MS, RD—human nutrition extension education (O'ahu Cooperative Extension Service)
- \*Y. S. Kim, PhD—meat science, muscle biology, animal growth, biotechnology
- \*C. N. Lee, PhD—dairy production management and reproductive physiology
- \*J. Leslie, PhD, RD—native Hawaiian health
- \*S. R. Malecha, PhD—aquaculture production and breeding
- \*S. T. Nakamoto, MBA, PhD—marketing of perishable products, agricultural economics
- L. C. Nakamura-Tengan, MS—consumer food safety, extension education and resource management (Maui Cooperative Extension Service)

- \*T. B. Ron, PhD—aquaculture extension and training
- M. A. Segobiano, MS, CEC, CCE, CHE—chef instructor
- \*A. C. Shovic, PhD, RD—dietetics
- M. H. Stevenson, MS—livestock extension education (Kaua'i Cooperative Extension Services)
- \*M. L. Stewart, PhD—nutrition, dietary fiber, gut health
- \*A. M. Stokes, DVM, PhD—veterinary medicine, cardiovascular physiology
- \*M. S. Thorne, PhD—range production and ecology (Hawai'i Cooperative Extension Service)
- \*C. A. Titchenal, PhD—nutrition and human performance, dietary supplements, nutrition journalism
- \*H. M. Zaleski, PhD—swine production and management, reproductive physiology
- J. M. Zee, MPH, RD—human nutrition extension education (Hawai'i Cooperative Extension Service)

### Cooperating Graduate Faculty in Animal Sciences

- E. G. Grau, PhD—fish endocrinology
- B. W. Mathews, PhD—aquaculture and nutrition

### Affiliate Faculty in Animal Sciences

- \*S. Atkinson, PhD—marine mammals
- J. Carpenter, PhD—livestock and marine mammal nutrition
- C. Laidley, PhD—aquaculture reproductive endocrinology
- K. R. Longnecker, PhD—invertebrate taxonomy and dietary analysis of Hawaiian monk seals
- S. Moss, PhD—shrimp aquaculture
- \*B. Okimoto, DVM—exotic animal husbandry and diseases
- L. Polasek, PhD—marine mammal biology, wildlife and fisheries sciences
- L. C. Rawson, DVM—animal diseases, health and welfare
- M. Snover, PhD—reptile, wildlife management and conservation biology
- K. L. West, PhD—marine mammal science and biology
- L. A. Woodward, PhD—fish, wildlife management and conservation biology
- T. M. Work, DVM—fish and wildlife, health and conservation biology

### Cooperating Graduate Faculty in Food Sciences

- \*H. Ako, PhD—nutritional biochemistry, aquaculture, lipid metabolism
- \*D. Borthakur, PhD—microbiology, biotechnology
- \*L. Gautz, PhD—instrumental quality evaluation
- \*Q. Li, PhD—analytical methodology to identify environmental toxins
- \*P. Q. Patek, PhD—microbiology
- \*R. Paull, PhD—fresh fruit and vegetable physiology and handling
- \*A. S. Saulo, PhD—food technology extension, food safety and quality
- \*W. W. Su, PhD—bioprocess engineering
- \*C. S. Tamaru, PhD—live feed, aquaculture

### Cooperating Graduate Faculty in Nutritional Sciences

- \*M. J. Berry, PhD—selenoproteins, antioxidants and human diseases
- C. J. Boushey, PhD—nutritional epidemiology, obesity and cancer
- \*A. Franke, PhD—analytical chemistry, phytochemicals
- \*R. Hetzler, PhD—exercise physiology, sports nutrition
- \*D. Jenkins, PhD—bioengineering
- \*L. Le Marchand, MD, MPH, PhD—nutritional epidemiology, genetic markers
- \*G. Maskarinec, MD, MPH, PhD—nutritional epidemiology, soy, hormones and cancer
- \*P. V. Nerurkar, PhD—medical biochemistry
- \*C. R. Nigg, PhD—exercise behavior

### Affiliate Graduate Faculty in Nutritional Sciences

- R. Leon-Guerrero, PhD—obesity and chronic disease prevention, diet assessment

### Cooperating Graduate Faculty in Nutrition PhD Program

- C. L. Albright, PhD—intervention research on energy balance; weight control; physical activity; dietary fat, fiber, and fruits/vegetables
- M. J. Berry, PhD—selenoproteins; antioxidants and human disease
- C. J. Boushey, PhD—nutritional epidemiology, obesity and cancer
- R. Cooney, PhD—tocopherols, carotenoids and coenzyme Q-10 mechanisms of action in health and disease
- T. Delormier, PhD, RD—public health nutrition, indigenous health
- A. Franke, PhD—analytical chemistry, lab assessments, phytochemicals
- R. Hetzler, PhD—exercise physiology, sports nutrition
- J. D. Latner, PhD—clinical psychology, eating behaviors and disorders, obesity
- L. LeMarchand, MD, MPH, PhD—nutritional epidemiology, genetic markers
- Q. X. Li, PhD—environmental biochemistry, proteomics
- G. Maskarinec, MD, MPH, PhD—nutritional epidemiology, soy, hormones and cancer
- P. Nerurkar, PhD—metabolic disorders and alternative medicine
- C. R. Nigg, PhD—theory of health behavior change, intervention, physical activity/exercise and nutrition behavior, research design

### Affiliate Graduate Faculty in Nutrition PhD Program

- H. Turner, PhD—cell biology and immunology

**Degrees Offered:** BS in animal sciences, BS in food science and human nutrition, MS in animal sciences, MS in food science, MS in nutritional sciences, PhD in nutrition

### The Academic Program

The Department of Human Nutrition, Food and Animal Sciences (HNFAS) offers both undergraduate and graduate programs leading to BS, MS, and PhD degrees. Two BS degrees are available: animal sciences (ANSC) and food science and human nutrition (FSHN). The pre-veterinary medicine program is located in the department to provide advising for students seeking to attend veterinary professional training after college. Three MS degrees are offered: animal sciences, nutritional sciences, and food science. The department is also the home locus for the inter-college PhD program in nutrition. The MS and PhD programs are described under graduate study.

Animal science is the application of experimental investigation, cutting edge technology, and other scientific principles for the advancement of efficient and environmentally friendly animal agriculture and improved food quality and safety. Students receive training in both basic and applied agricultural systems, as well as in animal sciences. One focus of the animal science program is on pre-veterinary training but the program also emphasizes preparation for work in production and management systems for the major farm animals such as swine, sheep and goats, beef and dairy cattle, and aquatic/aquaculture animals. Students are also exposed to the challenges of proper care/welfare and management of pets and companion animals (including horses), marine mammals, exotic wildlife and/or zoo animals, and aquaculture animals. Unlike most continental U.S. institutions, the emphasis of the present program is on tropical production systems with particular reference to the Pacific Basin or other subtropical regions. Animal scientists have careers in management and production, veterinary medicine, food processing and marketing, animal biotechnology, zoo and wildlife management, the pharmaceutical and feed and aquaculture industries, teaching, extension education, and research. Those positions require skills in disciplines such as nutrition, genetics, physiology, environmental and waste management, meat science and growth biology, animal health, feed and forage/browse

utilization, engineering, business management/marketing, and salesmanship. Other skills of critical importance are computer proficiency, written and oral communication, problem solving, and ability to build effective interpersonal relationships.

The undergraduate curricula in food science and human nutrition (FSHN) have a strong science base that is applied to food and human nutrition. Options in the curricula include dietetics, human nutrition, and science education. Interest in nutrition, food, and the relationship of food to human health and fitness has never been greater than today. Students majoring in any of the curriculum options are prepared for diverse careers in the food industry, health-care and fitness facilities, hospitals, nutrition education and communication enterprises, government or private-sector food and nutrition agencies, science related research laboratories, and science education. Students learn problem-solving skills, approaches to critical thinking and basic principles in two related disciplines. The dietetic option has been approved by the American Dietetic Association. The human nutrition option can be directed toward nutrition education, sports nutrition, or other interests. The human nutrition option can serve as a pre-professional program in medicine, dentistry, nutrition, or other scientific graduate programs. The science education option provides students with a curriculum that fulfills the academic requirements for a chemistry, biology, or general science certification as a secondary school science teacher. To complete certification requirements, a student can apply for the College of Education Post-Baccalaureate Certificate in the Secondary Education Program.

Students are strongly encouraged to take required chemistry and biological sciences courses prior to entering the program. Students who want to transfer into the food science and human nutrition (FSHN) program are required to have a minimum GPA of 3.0 and to have completed FSHN 185 with a grade of B (not B-) or better and to have completed the following courses with a grade of C (not C-) or better: MATH 140, PHYL 141/141L, PHYL 142/142L, CHEM 161/161L, and CHEM 162/162L.

Upon entering either program, animal sciences (ANSC) or food science and human nutrition (FSHN), students will be assisted by academic advisors to identify their career objectives and select an appropriate option for study.

### Advising

All FSHN and ANSC majors are required to report for advising prior to registration each semester.

## Undergraduate Study

### BS in Animal Sciences/Pre-Veterinary Medicine

#### Degree Requirements

- Course work in the basic sciences, mathematics, economics, and animal sciences including the following:
  - MATH 140 or above
  - PHYS 151/151L
  - CHEM 161/161L, 162/162L, and 272/272L
  - NREM 220 or ECON 131
  - MBBE 402/402L
  - BIOL 171/171L
- Animal sciences required courses:
  - ANSC 200, 201, 244, 301, 321, and 445

- Four of the following: ANSC 446, 451, 453, 454/454L, 462, and 472
- One of the following production courses: ANSC 431, 432, 433, and 450
- Additional electives to make a total of 120 credit hours

In order to enroll in animal science courses, all prerequisite courses must be passed with a grade of C (not C-) or higher.

Because of the diversity among fields of specialization within animal sciences, specific course requirements will vary considerably among students. On the recommendation of the student's major advisor, courses will be selected from those offered in animal sciences, as well as in natural resources and environmental management, bioengineering, anatomy and reproductive biology, biochemistry and biophysics, chemistry, environmental biochemistry, food science and human nutrition, genetics, tropical plant and soil sciences, information and computer sciences, microbiology, oceanography, physiology, and zoology.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Veterinary Medicine

Students interested in becoming veterinarians generally major in animal sciences within the Department of Human Nutrition, Food and Animal Sciences, and participate in CTAHR's Pre-Veterinary Medicine Program. A BS degree in a science-related field is desirable but not required for veterinary schools. The CTAHR Pre-Veterinary Program advisor assists students in meeting the admission requirements of veterinary schools, including academic requirements and veterinary/animal experience requirements. The Pre-Veterinary Medicine Program offers opportunities to gain experience through mentorship with local veterinarians and those in the various animal industries of Hawai'i. The department also sponsors the Pre-Veterinary Medicine Club of Hawai'i, which offers students opportunities to interact with other students interested in veterinary medicine as well as participate in hands-on activities and other club events. Hawai'i residents are eligible to apply for participation in the Western Interstate Commission for Higher Education (WICHE) program that includes agreements with Colorado State University, Washington State University, and Oregon State University to preferentially accept students from the Western Region as a subset of each entering veterinary class. Hawai'i students are also encouraged to make applications to other continental U.S. veterinary schools that accept nonresident students. Students should contact the website of the Association of American Veterinary Medical Colleges for information about the Veterinary Medical College Application Service at [www.aavmc.org/](http://www.aavmc.org/) and for more information about specific requirements for admission to veterinary schools. Students seeking additional information and advising should contact the Pre-Veterinary Medicine Program [prevetprogram@ctahr.hawaii.edu](mailto:prevetprogram@ctahr.hawaii.edu) or the Department of Human Nutrition, Food, and Animal Sciences, Agricultural Sciences Building, 1955 East-West Road, Room 216, Honolulu, HI 96822 (808) 956-7095.

### BS in Food Science and Human Nutrition

#### Admissions

Incoming freshmen are admitted directly to the major. Transfer student from other majors and transfer students from other institutions with interest in the Food Science and Human Nutrition (FSHN) major must meet admission criteria

prior to being accepted into the FSHN major. A student will be accepted into Human Nutrition Options within the FSHN major when the following criteria are met: minimum 3.0 GPA; CHEM 161/161L and 162/162L, PHYL 141/141L and 142/142L, and pre-calculus or higher calculus completed with a C grade or better, and FSHN 185 completed with a B grade or better. A student will be accepted into Food Science Options within the FSHN major when the following criteria are met: minimum 2.5 GPA; FSHN 185 with B grade or better and CHEM 161/161L, 162/162L, and MATH 140 (or higher math) with C grade or better. Students interested in the Food Science option may be admitted directly into FSHN; please contact the undergraduate advising coordinator (Maria Stewart, PhD; mstew@hawaii.edu, (808) 956-9114 for more information.

### Degree Requirements—All Human Nutrition Options

Course work in the basic sciences and mathematics for all human nutrition options include the following: MATH 140 or above, CHEM 161/161L, 162/162L, 272, PHYL 141/141L, 142/142L, MBBE 375 or 402, BIOL 171/171L, NREM 310. COMG 151 or 251 is also required.

Course work within the major include the following: FSHN 181/181L, 185, 370, 389, 485, 486, 492. To fulfill degree requirements, students must also complete the coursework designated in one of the options listed below.

Contact the Human Nutrition, Food, and Animal Science Department for current degree requirements, Ag Sci 216, 1955 East-West Road, (808) 956-7095.

### Human Nutrition Dietetics Option

Students choosing a professional career as a registered dietitian (RD) and who desire to do nutrition counseling should select the academic course work outlined in this option. The Didactic Program in Dietetics at UH Mānoa is currently granted accreditation by the Accreditation Council for Education in Nutrition and Dietetics (ACEND), 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995, (800) 877-1600 ext. 5400. Upon receiving a bachelor of science degree, students must be accepted into an accredited internship or an approved pre-professional practice program. Upon successful completion of a 6 to 11 month internship, or Preprofessional Practice Program, the student is eligible to take the national dietetic registration examination administered by the Commission on Dietetic Registration. Students generally need to have a GPA of 3.2 or above to be competitive for internship programs. Students may contact Dr. Anne Shovic ((808) 956-3847, email: shovic@hawaii.edu), the Dietetics Program Director, and are encouraged to refer to the Dietetics Option Student Handbook for more information about this option ([www.ctahr.hawaii.edu/hnfas/degrees/undergrad/DSH2012.pdf](http://www.ctahr.hawaii.edu/hnfas/degrees/undergrad/DSH2012.pdf)). Work and/or volunteer experience in the field of interest is highly recommended. Courses required for the Dietetics Option include BIOL 340 or CMB 411, PHRM 203, SOC 100, PSY 100, FSHN 311, 312, 322, 381, 440, 451, 452, 467, 468, 469, 480, and 488.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Human Nutrition Pre-professional Option

This course of study allows students to prepare for post-baccalaureate study in nutrition and nutrition-related disci-

plines. With guidance from their advisor, students can design a course of study to prepare them for post-baccalaureate studies in health professional programs (medicine, dental, pharmacy, etc.), or a graduate degree program in nutrition or other biomedical science. This course of study does not meet all of the undergraduate academic requirements of the Academy of Nutrition and Dietetics to apply for a dietetic internship. Students in the Pre-professional option must take the following: a minimum of 9 credits selected from the following FSHN courses: 244, 381, 451, 452, 467, 468, 469, 480, 488; and MICR 130/140L or FSHN 440; and MBBE 402L; and a course in genetics or molecular biology; and 17 credits of approved electives selected with an advisor.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Human Nutrition Sports and Wellness Option

Students who are interested in pursuing a career in sports and wellness, are encouraged to complete course work in Applied Musculo-skeletal Anatomy, Exercise Physiology (KRS 353, 354, and 354L), and Nutrition in Exercise and Sport (FSHN 480). These recommended courses can be added to the dietetics program option if the student desires to do professional nutritional counseling or be taken as electives in the human nutrition option if the student intends to pursue graduate studies. Students in the Sports and Wellness option must take the following: a minimum of 9 credits selected from the following FSHN courses: 244, 381, 451, 452, 467, 468, 469, 488; and MICR 130/140L or FSHN 440; and KRS 353, 354/354L, FSHN 480, and 8 credits of approved electives selected with an advisor.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Degree Requirements—Food Science Option

This study track educates and develops skills in students who desire to work in food processing, regulation, and food business arena, both in the public and private sector. This track also prepares students for managerial positions since there is a high demand for people with skills in food science and knowledge of business, accounting, and interpersonal skills. Students learn about food chemistry, microbiology, structure, engineering, safety, regulation, sanitation, quality control, and business-oriented courses.

Course work in the basic sciences and mathematics for all food science options include the following: MATH 140 or above, CHEM 161/161L, 162/162L, 272, PHYL 151, MICR 130, 140L, MBBE 375 or 402, BIOL 171/171L, NREM 310. COMG 151, or 251 is also required.

Students in the Food Science option must take the following FSHN courses: FSHN 181/181L, 185, 381, 403, 411, 430/430L, 440, 445, 460, 477/477L, 494. All FSHN majors selecting the Food Science Option must select one of the following specialties to complete degree requirements:

- Business: ACC 201, BUS 312, 315, ECON 130, IS 250
- Pre-professional: CHEM 272L/273, MATH 215, 216, PHYS 152.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Requirements

A total of at least 120 credits are required for graduation. Students seeking additional information and advising should contact the Department of Human Nutrition, Food and Animal Sciences, Agricultural Sciences Building, 1955 East-West Road, Room 216, Honolulu, HI 96822; (808) 956-7095, email: hnfas@ctahr.hawaii.edu.

## Graduate Study

The department offers graduate programs leading to MS and PhD degrees. Students can choose from three MS degree options: animal sciences, nutritional sciences, or food science. The department is also the home locus for the inter-college PhD program in nutrition. Admission and degree requirements for each program are listed below, but are subject to change. For current information, contact the Department of Human Nutrition, Food and Animal Sciences, Agricultural Sciences Building, 1955 East-West Road, Room 216, Honolulu, HI 96822; (808) 956-7095, email: hnfas@ctahr.hawaii.edu.

### MS in Animal Sciences

The MS in animal sciences is offered in both the basic and applied areas of genetics, nutrition, physiology, reproduction, animal health, molecular biology of growth and metabolism, and animal muscle biology.

Specialty areas consist of beef-cattle nutrition, grazing management, and genetics; dairy-cattle nutrition and physiology (especially the management of cattle in a hot climate); swine management; reproductive physiology and endocrinology of sheep, cattle, fish and swine; molecular biology of animal growth and metabolism; muscle biology and meat science; reproduction, animal health; nutrient/waste management; and freshwater and saltwater shrimp breeding and production, nutrition, and pond management systems. Emphasis is placed on the application of scientific methods for both the development and improvement of animal industries in subtropical and tropical environments. There is also the opportunity for cooperative studies in the areas of care/welfare and management of pets and companion animals (including horses), marine mammals, exotic wildlife, and/or zoo animals. Candidates wishing to specialize in animal breeding and genetics should be particularly strong in mathematics, including statistics, with a good biological background.

### Admission Requirements

To be considered for admission to the animal sciences program, an applicant must: (1) hold a bachelor's degree with a major in animal science (or the equivalent thereof) from an accredited institution of higher learning with a GPA of 3.0 or higher, (2) provide evidence of superior scholarship in previous academic work, (3) arrange for three letters of recommendation, (4) submit GRE general test scores, (5) submit an application including a statement of objectives, (6) submit a resume, and (7) submit a TOEFL score of 580 minimum, 600 recommended (250 computer) if a foreign student. Interviews by phone or in person in Hawai'i may be requested by the admissions committee. An applicant with a bachelor's degree in a major other than animal or veterinary sciences who otherwise qualifies for admission will be required to take ANSC 200 or 201, one production course, and such other undergraduate courses deemed necessary by the department as essential background to the applicant's studies. The ANSC 200 or 201 requirements may be satisfied through meeting the teaching experience requirement.

The deadlines for receipt of all application materials are **February 1** for fall applicants, and **September 1** for spring semester applicants.

## Degree Requirements

### Plan A (Thesis)

Students must complete a minimum of 30 credit hours, including:

- At least 18 credits of course work at the graduate level, 12 of which must be at the 600 level or above (excluding 699 and 700) including two credits of ANSC 641 (Seminar in Animal Sciences) and FSHN 601;
- a maximum of 2 credits of Directed Research (ANSC 699); and
- 10 credits of Thesis Research (ANSC 700).

### Plan B (Non-thesis)

Students must complete a minimum of 30 credit hours, including:

- At least 18 credits in course work numbered 600 and above (excluding 699), including two credits of ANSC 641 and FSHN 601.
- 6-9 credits of Directed Research (ANSC 699).
- Remaining credits must be at the graduate level.

### Both Plan A and B

A general exam on basic knowledge in the animal sciences is required of all students to advance to candidacy for the MS degree. A final exam based on the student's Plan A Thesis Research or Plan B Directed Research is also required. Students are required to attend weekly seminars each semester and present a minimum of three formal seminars during their graduate training (including their thesis defense). A maximum of 2 credits is allowed for graduate seminar (ANSC 641). The following courses are recommended as a core for most graduate students in animal sciences: ANSC 642, 643, 644, 650, 652, 657, 687, and a graduate-level statistics course.

Each student will be required to serve as a teaching assistant (TA), in either a paid or non-paid status, for a minimum of one course for one semester. This experience must include leading laboratory or discussion sections, and evaluation by the instructor.

In both plans (on the recommendation of the student's graduate committee), the graduate credit hours will be selected from the graduate courses offered in animal sciences or other related disciplines such as anatomy and reproductive biology, biochemistry, chemistry, genetics, microbiology, physiology, public health, and zoology. Because of the diversity of specializations within animal sciences, specific course requirements will vary considerably among students. Further information is available at [www.ctahr.hawaii.edu/hnfas/degrees/grad/ANSC.html](http://www.ctahr.hawaii.edu/hnfas/degrees/grad/ANSC.html).

### MS in Nutritional Sciences

The MS in nutritional sciences prepares students to understand the scientific basis of nutrition, its application to health and fitness, and the skills needed to conduct basic and applied nutrition research. Subject areas of concentration include clinical nutrition, obesity, dietary fiber, functional fiber and bioactive food components, diet and cancer, mineral nutrition and toxicology, sports nutrition, nutrition education, nutritional product development, community and international nutrition, nutritional biochemistry, and nutritional epidemiology.

The program does not include an RD internship. Cooperating programs include public health, kinesiology and rehabilitation science, food science, animal sciences, physiology, John A. Burns School of Medicine, and the University of Hawai'i Cancer Center.

Depending on the area of focus, students are prepared for diverse careers in nutrition and food-related industries, government agencies, and academic institutions. Graduates have found employment as college instructors; nutrition educators or consultants in the private sector; nutritionists in the food industry, fitness facilities, or health-related government agencies; and as research scientists in the health-care industry, private sector, government, or academic research institutions. Many have pursued PhD or other professional degrees at major universities around the country.

### Admission Requirements

Academic prerequisites include a bachelor's degree in nutrition or a closely related field, a minimum grade point average of 3.0, and undergraduate course work in nutrition, physiology, biochemistry, and statistics. Motivated students without a nutrition related degree may apply, but will be expected to make up undergraduate course deficiencies if admitted into the program. Students are strongly encouraged to take introductory science courses prior to applying to the program including at least two of the above mentioned prerequisites (one preferably being introductory nutrition). Additional requirements include submission of GRE General Test scores (no minimum score required), two confidential recommendations (using our program's recommendation forms), a TOEFL score of 580 minimum, 600 recommended (250 computer, 100 internet) if a foreign student; a personal resume; and a completed Graduate Admissions Application including statement of objectives. Interviews by phone (or in person if in Hawai'i) may be requested by the admissions committee. The deadlines for receipt of all application materials are **February 1** for fall semester applicants, and **September 1** for spring semester applicants.

Further information is available at [www.ctahr.hawaii.edu/hnfas/degrees/grad/NUTRms.html](http://www.ctahr.hawaii.edu/hnfas/degrees/grad/NUTRms.html).

### Degree Requirements

Two MS degree options are available: Plan A (thesis) and Plan B (non-thesis). Generally, students are expected to follow Plan A unless the Plan B option is approved by the graduate chairperson and the student's advisor.

#### Plan A (Thesis)

Students must complete a minimum of 30 credit hours, including:

- 18 credit hours of course work at the graduate level, 12 of which must be at the 600 level (excluding 699 and 700);
- 2 credits of 699; and
- 10 credits of 700.

#### Plan B (Non-thesis)

Students must complete a minimum of 30 credit hours, including:

- At least 18 credit hours of course work at the 600 level or above (excluding 699) and
- 6-9 credits of Directed Research (699); and
- Remaining credits are fulfilled by graduate level electives that are selected in consultation with the graduate advisor.

### Both Plan A and B

All students are required to pass an oral exam of basic nutrition knowledge to advance to candidacy for the MS degree, and pass a final exam/oral defense of their Thesis Research (Plan A) or Directed Reading and Research (Plan B). The following courses are required as a core for most graduate students in nutritional sciences: FSHN 601, 681, 685, 689, a graduate-level statistics course, and at least one of the following: FSHN 668, 682, 784, or 785. FSHN 681 Seminar in Food and Nutritional Sciences, must be taken at least four times, including at least twice for a letter grade (A-F). Each student will be required to serve as a teaching assistant (TA), in either a paid or non-paid status, for a minimum of one semester. This experience must include a significant instructional component and evaluation by the instructor.

In both plans (in consultation with the student's graduate committee), the graduate credit hours will be selected from the graduate courses offered in nutritional sciences as well as other related disciplines such as food science, cell and molecular biology, epidemiology, genetics, physiology, public health, kinesiology, and statistics. Because of the diversity of specializations within nutritional sciences, specific course requirements will vary among students. Please see our website at [www.ctahr.hawaii.edu/hnfas/degrees/grad/NUTRms.html](http://www.ctahr.hawaii.edu/hnfas/degrees/grad/NUTRms.html).

### MS in Food Science

The MS in food science offers areas of concentration in food safety and quality, food processing and engineering, food chemistry and biochemistry, food microbiology, product development, and food science education. Graduates have found employment as college instructors, technical personnel in the food industry, regulatory or other governmental agencies, and researchers. Others have pursued further postgraduate studies.

### Admission Requirements

Academic prerequisites include a bachelor's degree in food science or a closely related field, a minimum grade point average of 3.0, and undergraduate course work in introductory foods, biochemistry, introductory nutrition, and statistics. Motivated students without a food science-related degree may apply, but will be expected to make up undergraduate deficiencies if admitted. Students are strongly encouraged to take chemistry and introductory food courses prior to applying to the program.

Additional requirements include: submission of GRE General Test scores (no minimum score required); two confidential recommendations (using our program's recommendation forms); a TOEFL score of 580 minimum, 600 recommended (250 computer) if a foreign student; a personal resume; and a completed Graduate Admissions Application including statement of objectives. Interviews by phone or in person if in Hawai'i may be requested by the admissions committee. The deadlines for receipt of all application materials are **February 1** for fall semester applicants, and **September 1** for spring semester applicants.

### Degree Requirements

#### Plan A (Thesis)

Students must complete a minimum of 30 credit hours, including:

- At least 18 credit hours of course work, 12 of which must be at the 600 level or above (excluding 699 and 700)

- 2 credits of Directed Research (699); and
- 10 credits of Thesis Research (700)

### Plan B (Non-thesis)

Students must complete a minimum of 30 credit hours, including:

- At least 18 credit hours of course work at the 600 level or above (excluding 699); and
- 6 to 9 credits of Directed Research (699); and
- Remaining credits are fulfilled by graduate level electives that are selected in consultation with the graduate advisor.

### Both Plan A and B

All students are required to pass an oral exam of basic knowledge in food science to advance to candidacy for the MS degree, and a final exam/oral defense of their Thesis Research (Plan A) or Directed Research (Plan B). Students are required to register for Seminar in Food and Nutritional Sciences (FSHN 681) during four semesters, and present a minimum two seminars for a letter grade (A-F) during their graduate program. The following courses are required as a core for graduate students in food science: FSHN 601, 607, 608, 681, 701, and a graduate-level statistics course. Each student will be required to serve as a teaching assistant (TA), in either a paid or non-paid status, for a minimum of one course for one semester. This experience must include a significant instructional component and evaluation by the instructor.

In both plans (in consultation with the student's graduate committee), the graduate credit hours will be selected from graduate courses offered in food science as well as other related disciplines such as biochemistry, nutrition, microbiology, genetics, biotechnology, cell and molecular biology, and statistics. Because of the diversity of specializations within food science, specific course requirements will vary among students. Further information is available at [www.ctahr.hawaii.edu/hnfas/degrees/grad/FSHN.html](http://www.ctahr.hawaii.edu/hnfas/degrees/grad/FSHN.html).

### PhD in Nutrition

In today's world, the relationship between diet and health is of great interest among consumers, medical professionals, research scientists, government policy makers, and private industries related to food, agriculture, and healthcare. To serve these clients and improve human health, especially in Hawai'i and the Asia-Pacific region, the PhD program in nutrition is designed to prepare future leaders and innovators who can expand our knowledge about food and health, solve nutrition-related problems, propose effective nutrition policies, guide new product and service development, and be ethical and effective researchers, communicators, and educators. To ensure that graduates are prepared for these roles, students will be expected to demonstrate:

1. Comprehensive understanding of core nutrition knowledge;
2. Advanced scholarship in a specialty area (i.e., expertise in a least one overlapping biomedical discipline e.g., biochemistry, physiology, cell and molecular biology, food science/functional foods, epidemiology, biostatistics, medicine, etc.);
3. Appropriate exposure to social and career-building disciplines (e.g., education, communications, information technology, technical writing, social sciences, etc.);
4. Ability to conduct original scholarly research, develop skills in research methodologies and grant writing, understand research ethics, and effectively disseminate research find-

ings via peer-reviewed publications, seminars, and practical applications such as teaching.

To accomplish these goals, the PhD program integrates faculty and resources from the instructional and research programs housed in the College of Tropical Agriculture and Human Resources (CTAHR), John A. Burns School of Medicine (JAB-SOM), and University of Hawai'i Cancer Center to create an inter-college PhD program that will produce highly marketable, interdisciplinary graduates that can assume leadership roles in the field of nutrition.

### Admission Requirements

The admission process is considered a critical step in insuring the success and quality of the program and its graduates; therefore, applicants will be carefully evaluated and selected. The admissions committee is chosen and led by the graduate chair and is made up of graduate faculty with proven records in mentoring successful graduate students. To insure consistent quality of training and financial support, the number of applicants admitted will be kept in line with the availability of high-quality dissertation advisors and available support. Students will not be admitted without a plan to support them and evidence of a faculty member's willingness to serve as a dissertation advisor.

Applicants should have a BS or MS degree in nutrition or a closely related biological science; however, highly motivated students with other degrees may be considered if they have excellent academic backgrounds and demonstrated strength in the biological sciences. Applicants are expected to demonstrate adequate preparation in nutrition, biochemistry, physiology, and statistics. If admitted without sufficient preparation in these areas, these prerequisites must be made up early in the student's program. The admissions committee will determine course deficiencies in an applicant's background.

Additional admission requirements include a minimum grade point average of 3.4 out of 4.0 for applicants with a BS, and 3.6 out of 4.0 for applicants with a MS or other advanced degree; submission of GRE general test scores that demonstrate performance above the 50% percentile in all areas; three letters of recommendation from individuals that can comment on academic and research potential, a personal resume, and a completed Graduate Admissions Application including a personal statement of objectives that includes reasons for wanting to attend graduate school, research interests, and career goals. Foreign applicants must obtain a minimum TOEFL score of 600 (paper), 250 (computer), or 100 (internet). Interviews (in person or by phone) are required of all applicants deemed admissible by the admissions committee. In selecting applicants for admission, particular attention will be paid to the quality and depth of the personal statement, the strength of the letters of recommendation (i.e., they must indicate exceptional potential), and the professional qualities and academic depth presented in the personal interview.

The deadline for receipt of all application materials are **February 1** for fall and **September 1** for spring applicants. The resume and personal statement of applicants should be sent electronically to the graduate chair PhD in Nutrition at [hnfas@ctahr.hawaii.edu](mailto:hnfas@ctahr.hawaii.edu).

Further information is available at [www.ctahr.hawaii.edu/hnfas/degrees/grad/NUTRphd.html](http://www.ctahr.hawaii.edu/hnfas/degrees/grad/NUTRphd.html).

## Degree Requirements

The principal requirements for the PhD degree are:

1. Pass a qualifying examination,
2. Complete required course work,
3. Pass a comprehensive exam to demonstrate advanced scholarship in the field, and
4. Defend a doctoral dissertation that presents original, independent research.

In addition, all PhD candidates are required to participate in a substantial teaching project with a graduate faculty mentor during at least one semester of their program (if entering with a BS, two semesters are required).

**Qualifying exam.** The purpose of the qualifying exam is to evaluate the student's basic knowledge in nutrition-related fields, determine if the student has a strong enough background to proceed successfully with their doctoral program, and enable advisors to assist the student in planning an appropriate program of study. The areas covered by the exam include basic nutrition, biochemistry, physiology, statistics, epidemiology, and experimental design. The exam may be oral and/or written as decided by the examining committee. The committee will consist of at least three members of the graduate faculty chosen by the student in consultation with their advisor, and must be approved by the graduate chair. The exam is repeatable once after successful petition to the graduate chair. Students failing the exam twice must withdraw from the program. Students entering the program with a BS degree will be required to pass the qualifying exam within the first two years of their program. Candidates entering with a MS or other advanced degree must pass the exam within one year. Extensions can be made for students with course deficiencies to make up. Students entering from the nutritional sciences MS program at UH Mānoa within five years of receiving their MS degree are exempt from the exam, as suitability for the PhD program will be assessed during their MS program via the candidacy exam and thesis defense/final exam.

**Dissertation proposal defense.** Students entering with a BS degree are required to defend their dissertation research proposal to the satisfaction of their dissertation advisor. They must do this after they pass their qualifying exam and after they have met all other requirements for the Plan A master's degree in nutritional sciences except the completion of a formal thesis. The proposal should consist of a written and oral presentation of the proposed dissertation research. This proposal defense serves as a capstone, similar to a MS thesis defense, and assures that the student can demonstrate sufficient research skills and knowledge of the research plan to proceed with the dissertation research. The dissertation committee will consist of the student's advisor and at least four members of the graduate faculty chosen by the student in consultation with their advisor, and must be approved by the graduate chair. The student must pass the proposal defense to be eligible for the comprehensive exam. The defense is repeatable once after successful petition to the graduate chair.

**Required course work.** PhD students are required to have at least 18 credits of graduate level course work (excluding research credits) beyond their MS degree. If entering with a BS degree, at least 36 credits of graduate level course work (excluding research credits) beyond the BS are required. These course requirements are described below.

Students entering with a BS degree are required to meet all requirements for the Plan A master's degree in nutritional sciences, excluding the production of a formal written thesis. The course requirements include any course deficiencies recommended by the admissions committee plus the following 18 credits of graduate level coursework:

- 11 credits of required nutrition courses [FSHN 601, 685, 689 and at least one of the following: FSHN 668, 682, 784, or 785], including 2 credits of FSHN 681
- 3 credits in statistics at the graduate level (e.g. PH 655)
- 4 credits of advisor-approved electives

In addition, at least 12 credits of 699 are required.

Students entering with a MS or other advanced degree are required to make up any course deficiencies in their background prior to taking the qualifying exam. Course deficiencies will be assessed by the admissions committee. Credits obtained by making up course deficiencies cannot be used to meet the 18 credit course requirements for the PhD.

After the above requirements are met by students entering with a BS or MS, all continuing PhD students must take a minimum of 18 credits of course work (excluding research credits) consisting of at least:

- 6 credits of graduate nutrition courses including 2 credits of FSHN 681
- 6 credits in graduate level courses that will foster development of a specialty area in a field overlapping with the discipline of nutrition. For example: biochemistry, cell and molecular biology, epidemiology, medicine, biostatistics, functional foods/food science.
- 6 credits in graduate level courses from career-building disciplines such as communications, education, information technology, technical writing, or social sciences.

The student in consultation with his or her dissertation advisor will decide on the specific courses used to meet the above 18-credit requirement. An example of a model course of study for a student entering with a BS in nutrition, and examples of available specialty area courses and career-building courses are available on our program website at: [www.ctahr.hawaii.edu/hnfas/degrees/grad/NUTRPhd.html](http://www.ctahr.hawaii.edu/hnfas/degrees/grad/NUTRPhd.html).

**Required teaching experience.** To foster teaching skills, all PhD candidates must participate in a substantial teaching project during at least one semester of their program. All students who are not paid teaching assistants are required to develop, with an instructor of their choice, an instructional experience equivalent to a quarter time teaching assistantship (10 hours per week) that includes in-class lectures/instructional activities, or laboratory instruction. At the conclusion of the experience, their instructional mentor must submit a written evaluation of their performance to the graduate chair. Unsatisfactory evaluations will result in the need to repeat the experience until a favorable evaluation is achieved. Students entering with a BS must additionally fulfill the instructional experience required as part of the MS in nutritional sciences (6 hours per week for one semester) prior to sitting for their dissertation proposal defense.

**Comprehensive exam.** When candidates have completed all, or most of their course work toward the PhD, they must pass a comprehensive exam to verify that they can function as a professional in the field. The timing of the exam will be decided upon by the student in consultation with their advisor. The purpose of this exam is to determine the student's comprehension of fundamental nutrition knowledge, expertise in an overlapping

discipline, and competence in research, communications, and critical thinking skills. The form of the exam is both written and oral. It will be conducted by an examination committee composed of at least three members of the graduate faculty (excluding the student's advisor) with collective expertise to cover the range of expectations listed above. The composition of the committee is proposed by the student in consultation with their advisor. To insure the quality and consistency of exam committees, its composition must be approved by the graduate chair. The time frame and grading of the exam will be decided by the committee. The examination criteria and procedures will conform to the Graduate Division's standards for all Mānoa doctorate programs. A student must pass this exam to achieve candidacy and remain in the PhD program. The exam is repeatable once after successful petition to the graduate chair. After passing the exam the student is eligible to formally select their doctoral committee as described below.

### Dissertation

All PhD candidates must conduct scholarly, independent, original research that contributes new knowledge to the field. The candidates develop and conduct research projects under the direction of their dissertation advisor and doctoral committee. The doctoral committee is selected by the student in consultation with their dissertation advisor, and must be approved by the graduate chair. The dissertation advisor (chair of the doctoral committee), and a majority of the committee members must come from the nutrition graduate faculty. The committee must have at least 5 members, with one member being from a graduate faculty outside the student's field of study and area of specialization. At the conclusion of the research process, students write a dissertation, i.e., a scholarly presentation of their research in publication form. The student's doctoral committee then conducts a final examination to assess the student's ability to orally present their dissertation in a seminar format, and defend their research and written dissertation. The final exam is repeatable once after successful petition to the graduate dean. The dissertation, final exam criteria and procedures will conform to the Graduate Division's standards for all UH Mānoa doctorate programs. Further information is available at: [www.ctahr.hawaii.edu/hnfas/degrees/grad/NUTRPhd.html](http://www.ctahr.hawaii.edu/hnfas/degrees/grad/NUTRPhd.html).

### Honors and Awards

The department has several teaching assistantships, research assistantships, and scholarships that are awarded to deserving qualified students.

## Molecular Biosciences and Bioengineering

Agricultural Science 218  
1955 East-West Road

### Faculty

- \*D. Christopher, PhD (Chair)—photosynthesis, plant biotechnology, gene regulation, genomics, protein folding
- \*H. Ako, PhD—aquaculture, environmental biochemistry and biotechnology
- \*J. P. Bingham, PhD—peptide synthesis, marine neurotoxins
- \*D. Borthakur, PhD (Graduate Chair)—plant-microbe interaction, plant biotechnology
- \*L. D. Gautz, PhD—bioproduction control and automation, electromechanical systems engineering
- \*A. Hashimoto, PhD—bioengineering, bioenergy
- \*D. M. Jenkins, PhD, PE—biosensors and bioinstrumentation
- E-S. Kan, PhD—environmental engineering, bioremediation, and bioenergy
- \*S. Khanal, PhD, PE—bioenergy and bio-based products; waste to energy heat and mass transport in chemically reacting ecosystems, energy conversion, bioremediation
- \*C. Kinoshita, PhD—heat and mass transport in chemically reacting systems, energy conversion, bioremediation
- \*Q. Li, PhD—bioremediation, environmental biotechnology
- \*P. Nerurkar, PhD—carcinogen-induced metabolic disorders and biochemical mechanisms of environmental carcinogenesis
- \*G. Presting, PhD—bioinformatics
- \*W-W. Winston Su, PhD—biochemical engineering, cell culture engineering

### Graduate Faculty in Molecular Biosciences and Bioengineering

All faculty of the department are regular graduate faculty in Molecular Biosciences and Bioengineering.

### Cooperating Graduate Faculty

- R. Allsopp, PhD—stem cells, regulation of telomerase expressor in cells
- A. Alvarez, PhD—plant-pathogen interactions, biocontrol of plant diseases
- A. S. Bachmann, PhD—tumor growth and cell differentiation
- M. Carbone, MD, PhD—cancer biology
- S. Chang, PhD—vaccine development, molecular immunology
- E. D. H. Cheng, PhD—hydrology, hydrolics, wind engineering
- M. Cooney, PhD—marine biotechnology
- H. G. de Couet, PhD—molecular biology, invertebrate biology, biotechnology
- M. Dunn, PhD—molecular nutrition
- T. Ernst, PhD—magnetic resonance imaging
- G. Grau, PhD—marine biology
- C-E. Ha, PhD—biochemistry, human serum albumin
- T. Hoang, PhD—molecular microbiology
- J. Hu, PhD—plant virology
- S. Jun, PhD—food engineering
- Y. S. Kim, PhD—animal biotechnology
- C. C. Liu, PhD—bioengineering
- P. S. Lorenzo, PhD—cancer biology

S. M. Masutani, PhD—thermal conversion of biomass  
 C. Morden, PhD—molecular systematics  
 V. Nerurkar, PhD—molecular virology and epidemiology  
 J. Ramos, PhD—cancer biology  
 C. Ray, PhD—ground water hydrology, bioremediation  
 R. Shohet, MD—molecular medicine  
 V. A. Stenger, PhD—magnetic resonance imaging  
 C. Tamaru, PhD—aquaculture  
 S. Q. Turn, PhD—biomass gasification  
 G. Wang, PhD—marine microbial biotechnology  
 A. A. Yanagihara, PhD—biochemistry, peptide toxins  
 J. Yang, PhD—animal molecular biology and biotechnology  
 J. Yu, PhD—bioengineering, marine bioproduct development

### Affiliate Graduate Faculty

H. H. Albert, PhD—plant molecular biology and biotechnology  
 P. H. Moore, PhD—sugarcane biotechnology, plant molecular biology  
 A. J. Stokes, PhD—cell biology  
 J. Zhu, PhD—plant transformation, biotechnology

**Degrees Offered:** BS in biological engineering, BS in molecular biosciences and biotechnology, MS in biological engineering, MS in molecular biosciences and bioengineering, PhD in molecular biosciences and bioengineering

### The Academic Program

The Molecular Biosciences and Bioengineering Department (MBBE) features a multidisciplinary faculty having a broad spectrum of interests in biotechnology, molecular biology, biochemistry, and biological engineering. The department's strong basic and applied research programs and its active, internationally recognized faculty combine to provide students with exciting learning opportunities. The department houses degree-granting programs in biological engineering (BS and MS) and in molecular biosciences and bioengineering (MS and PhD) and participates in the interdepartmental Plant and Environmental Biotechnology Program (BS).

### Biological Engineering Program

The mission of the biological engineering (BE) program is to provide engineering students a unique opportunity to study biological systems from the engineering perspective. The biological engineering program teaches the importance of the systems approach to problem solving. Undergraduate (BS) and graduate (MS) degrees are offered in biological engineering.

### Undergraduate Study

#### BS in Biological Engineering

The mission of the biological engineering program is to provide students a unique opportunity to study the fundamentals of engineering and biology and the application of engineering to biological systems. Example applications in biological engineering include processing of biomass for alternative energy uses or added value, bioreactor design for producing high-valued biologically-based products, bioremediation and biological treatment of wastes, and sensors and control engineering for biological systems. Undergraduates complete a comprehensive curriculum including the basic sciences (biology, chemistry, and physics), engineering mathematics, core engineering (civil, electrical, and mechanical), and fundamental and specialized biological engineering courses. Students receive integrated

training in biology and engineering, culminating in a two-semester engineering design sequence.

To fulfill its mission, the BE program has three educational objectives, each associated with several outcomes:

1. Graduates enter professional careers where they apply fundamental engineering concepts to solve real-world problems;
  - a. the graduate has the ability to solve physics problems involving mechanics, electromagnetics, and optics; chemistry problems involving inorganic and organic chemistry; problems involving general and microbiology;
  - b. the graduate has the ability to solve engineering problems related to statics, dynamics, fluid mechanics, and thermodynamics.
2. Graduates serve the needs of the society by designing, manufacturing, evaluating, and/or operating systems in which living organisms or biological products are a significant component; and
  - c. the graduate has the ability to design a system, component, or process in which biology plays a significant role;
  - d. the graduate has the ability to design and conduct experiments to gather information for engineering designs;
  - e. the graduate has the ability to use modern engineering techniques, skills, and tools to define, formulate, and solve engineering problems.
3. Graduates contribute to their communities by continuing to engage in professional development, ethical decision making, and thoughtful discourse on contemporary issues.
  - f. The graduate has the ability to function effectively on multi-disciplinary teams.
  - g. The graduate has the ability to identify professional and ethical responsibilities when practicing engineering.
  - h. The graduate has the ability to communicate effectively in large and small groups.
  - i. The graduate has the background to understand the impact of engineering solutions on the surrounding context.
  - j. The graduate recognizes the need to engage in life-long learning through participation in professional conferences, workshops, and courses, and by reading and writing in the relevant literature.
  - k. The graduate has the ability to intelligently discuss contemporary issues.

The bachelor of science in biological engineering is the only undergraduate degree offered by the program. Students benefit from small class size and one-on-one interactions with faculty.

### Requirements

#### General Education Requirements, including the following:

- ENG 100 or approved FW course (FW)
- Two approved courses in Global and Multicultural Perspectives (FG)
- ECON 120 or 130 or 131 (DS)
- CHEM 161/161L and 162/162L (DP/DY)
- PHYS 170/170L and 272/272L (DP/DY)
- BIOL 171/171L (DB/DY)
- MATH 241, 242, 243, and 244 (FS)
- One Social Science course (DS)
- Six credits Humanities, Arts, and Literatures course (DH, DA, or DL)
- One course with focus on Contemporary Ethical Issues (E)

- One course with focus on Hawaiian, Asian, or Pacific issues (H)
- One course with focus on Oral Communication (O)
- Five Writing Intensive courses (W)
- Hawaiian or Second Language (HSL) is not required for the Bioengineering degree

#### College Requirements:

- NREM 310

#### Basic Engineering Requirements:

- EE 160 and 211
- CEE 270 and 271
- ME 311
- CEE 320 or ME 322

#### Bioengineering Requirements:

- BIOL 172/172L or MICR 351/351L or BE 120
- Biology elective (BIOL 275/275L, MICR 351/351L, or MICR 485/485L)
- CHEM 272/272L
- BE 260, 350/350L, 373, 481, and 482
- At least 15 credits from courses BE 405, 410, 411, 420, 431, 437, 460, 470, CEE 355, or ME 371

Students must have completed a cumulative total of at least 124 credit hours and take (but not necessarily pass) the NCEES Fundamentals of Engineering exam in the semester they intend to graduate.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Graduate Study

### MS in Biological Engineering

The research areas in biological engineering open to MS students include management of wastes and wastewater; engineering for cell culture, fermentation, micropropagation, and bioconversion; engineering-intensive horticultural and aquatic biosystems; modeling and optimization of bioresource production and processing systems; water management and irrigation system design; spatial decision support systems for environmental protection and resource development; bioremediation; biological and thermochemical conversion; control, automation and mechanization of biological systems. Graduates of the program have entered careers in industry and public agencies or have undertaken further study in a PhD degree program. Intended candidates for the MS must present a bachelor's degree from an accredited engineering program or the equivalent.

#### Plan A Requirements

- 21 course credits and 9 thesis research credits.
- MBBE 699 and 700 cannot be used to satisfy course credit requirements.
- 12 or more course credits must be at 600 level or above.
- 12 or more course credits must be in biological engineering; of these 9 must be earned in courses numbered 600-698.
- One graduate seminar in biological engineering or equivalent.
- Pass a final oral examination administered by a committee of three or more graduate faculty, chaired by the student's thesis advisor.

- Enrolled in the graduation semester. If all other course work is completed, one credit of BE 700 must be taken in the graduation semester.

#### Plan B Requirements

- 27 course credits and 3 credits of MBBE 699 on a design or research project.
- 699 cannot be used to satisfy course credit requirements.
- 18 or more course credits must be at 600 level or above.
- 18 or more course credits must be in biological engineering; of these 12 must be earned in courses numbered 600-698.
- One graduate seminar in biological engineering or equivalent.
- Pass a final oral examination administered by a committee of three or more graduate faculty, chaired by the student's advisor.
- Enrolled in the graduation semester. If all other course work is completed, one credit of BE 500 must be taken in the graduation semester.

Email: [khanal@hawaii.edu](mailto:khanal@hawaii.edu)

### Graduate Program in Molecular Biosciences and Bioengineering

The Molecular Biosciences and Bioengineering graduate program offers both MS and PhD degrees. The MBBE research and graduate training center around understanding the biochemical, nutritional, and molecular-biological processes that underlie growth, development, bioenergy, photosynthesis, and stress, especially as related to tropical agriculture, aquaculture, plant and environmental biotechnology, and bioengineering. Many MBBE graduate students are supervised and supported by cooperating and affiliate graduate faculty from John A. Burns School of Medicine, University of Hawai'i Cancer Center, Pacific Biomedical Research Center, Queens Medical Center, Hawai'i Agricultural Research Center, Oceanic Institute, Sea Grant College Program, School of Ocean and Earth Science and Technology, College of Engineering, and several departments including microbiology, zoology, human nutrition, food and animal sciences, and plant and environmental protection sciences.

#### Entrance Requirements

- Minimum qualifications for admittance as a regular student are an undergraduate degree from an accredited U.S. college or university or equivalent degree from a recognized foreign institution of higher learning and a GPA of at least 3.0 on a 4.0 scale.
- All prospective students must submit scores from the GRE General Test. In cases where foreign students encounter difficulty in taking the examination, submission of scores may be delayed with permission from the Graduate Division. Foreign students must also submit TOEFL scores (see Graduate Bulletin for exceptions.) A minimum TOEFL score of 250 in computer-based test or 100 in internet-based test is required.

- All applicants are expected to have completed courses or equivalents in physics, chemistry, basic biology, genetics, biochemistry, physiology, and one additional upper division course in cellular or molecular biology. While not a requirement, physical chemistry is highly recommended. Students may be accepted with deficiencies in one or more of these areas, however, deficiencies must be made up during the first year as a graduate student. Such courses may not be used for graduate credit.

#### General Guidelines and Requirements for MS Plan A

- Minimum course requirements: 12 credits of 600-level courses (not including MBBE 699), 6 credits of 400 level courses (not including 499), 6 credits of 699 and 6 credits of 700. Graduate students are encouraged to take one credit seminar (610 or equivalent) each academic year. They require at least one seminar credit for MS degree. The thesis proposal or defense seminar cannot be used to meet this requirement. All courses must be approved by the committee and the graduate chair.
- Two-page proposal. Like PhD students, MS students also need to discuss with their major advisors about their research projects and write a two-page proposal within the first semester.
- A thesis proposal seminar: MS students need to present their preliminary results and the plan of work in a proposal seminar. MS students who conduct research in laboratories outside the Mānoa campus may present their proposal seminars in their laboratory locations.
- Presentation at the CTAHR symposium. MS Plan A students must make at least one presentation in the CTAHR symposium. They are encouraged to make presentations in other national and international conferences.
- Thesis defense. MS Plan A students must present a public presentation of work in the final semester. Students should consult with their committee and the graduate chair for a convenient date for this presentation at the middle of the final semester.
- Publication. Students are encouraged to publish a paper before defense.

#### General Guidelines and Requirements for MS Plan B

- Minimum course requirements: 18 credits of 600-level courses (not including MBBE 699), 9 credits of 400 level courses (not including 499), 3 credits of 699. Graduate students are encouraged to take one credit seminar (610 or equivalent) each academic year. They require at least one seminar credit for MS degree. The final research presentation cannot be used to meet this requirement. All courses must be approved by the graduate chair.
- Research report, final presentation and oral exam. The Plan B students also do a research project for at least one semester. The results of this research should be written as a 'research report' and submitted to a committee composed of the research advisor, another faculty, and the graduate chair. The results also must be presented as a seminar in the final semester. At the end of the presentation, the committee will ask questions about the research project and other related subject. The written report should be about 10–20 pages, double space, and should contain the following sections: abstract (200–300 words), introduction (background and justification, 1-page), literature review (3–7 pages), objec-

tives, materials and methods (3–7 pages), results and discussion (3–10 pages), and references. For graduation, a student must obtain satisfactory grades in the research report, oral presentation, and the oral exam.

#### General Guidelines and Requirements for PhD Degree

- A temporary committee: graduate chair appoints a temporary committee for each PhD student. The committee comprises the student's supervisor (major advisor), graduate chair, and a faculty member. The committee advises on course work and other academic and research related matters.
- Course work. Students are required to take a minimum of three high-level courses. The courses must be pre-approved by the major advisor and graduate chair. Graduate students are encouraged to take one credit seminar (610 or equivalent) each academic year. They require at least two seminar credits for PhD degree. The dissertation proposal or defense seminar cannot be used to meet this requirement.
- Two-page proposal. Students need to discuss with their major advisors about their research projects and write a two-page proposal. The proposal must be submitted to the graduate chair within the first semester. The proposal should have the following sections: (i) Introduction (background and justification), objectives, and approach. If the scope and objectives of the project are changed or modified later, the temporary committee should be informed and a copy of the revised proposal should be submitted to the graduate chair.
- Qualifying exam: PhD students have to take a qualifying exam within the first, second, or third semester. As a part of this exam, students are asked to write a manuscript from the results obtained within the first one or two semesters.
- Permanent committee: After completing the qualifying exam, a PhD student can form a permanent committee in consultation with his supervisor and the graduate chair.
- CTAHR Symposium: Students are encouraged to make a poster presentation in the CTAHR symposium in the first year. They must make a presentation in the second year and should continue to make presentations in subsequent years until graduation.
- Other presentations: Students are encouraged to make oral and poster presentations in other national and international conferences. A number of travel scholarships are available from the Graduate Student Organizations. Often the supervisors provide funds for student travel. Students can also make presentations in a number of research symposia organized at UH Mānoa. These include Tester Symposium, Microbiology Symposium, and BioMed Symposium.
- The first manuscript: Students should try to complete the manuscript that was started as a part of the qualifying exam and get it published as soon as possible.
- Committee meetings: Students should meet at least once a year with the committee.
- Proposal seminar: Frequent discussions are encouraged between the student and the major advisor about the progress and direction of research. When a student and the major advisor both agree that the project is going well and there are some good data, the student may be allowed to write a full proposal and then present a proposal seminar. All graduate faculty and students are invited to the proposal seminars. A proposal seminar must not be delayed beyond three years.

If it is delayed beyond three years, the graduate chair will discuss with the committee and consider transferring the student to the MS program.

- Revision of dissertation proposal. Sometimes, a project may not go as expected and run into unexpected problems. Under such a situation, the project may have to take a new direction and some of the objectives may have to be modified. The student should invite a committee meeting and present a revised proposal.
- Comprehensive exam: It is an oral exam given by the committee and the graduate chair. The graduate chair or a representative appointed by him serves as the moderator for the exam. The committee will ensure that the student has learnt molecular biosciences or bioengineering and mastered the subject well. The comprehensive exam must not be delayed beyond three years. If it is delayed beyond three years, the graduate chair will discuss with the committee and consider transferring the student to MS program.
- Review of literature: The students are encouraged to conduct an extensive literature review related to his or her research subject. He or she should discuss with his or her supervisor about the main focus of the “review of literature” chapter of his or her dissertation. This must be completed and forwarded to the committee within the first three years.
- Publications: Publications are essential requirements of a PhD degree in MBBE. Students are encouraged to publish several papers in refereed journals. There must be at least one publication as the first author in a standard refereed journal. Only under an exceptional situation, where research subject is very problematic, and the supervisor assures and convinces the committee and the graduate chair that a publication is forthcoming, a student may be considered for graduation without a publication on the day of defense.
- Submission of dissertation to the committee: Students are encouraged to write and submit the ‘Review of Literature’ chapter to the committee well in advance, preferably one year before submitting the complete dissertation. They can also write the chapters ‘Introduction’ and ‘Materials and Method’ in advance. All chapters of the dissertation must be first submitted to and corrected by the major advisor before submitting to the rest of the committee. The committee members may refuse to read the chapters if these were not previously read, corrected, and approved by the major advisor.
- Final dissertation defense: The final dissertation defense seminar is perhaps the most important event for PhD. Therefore, a student must prepare well for this presentation. A student must get approval of the major advisor and the committee for presenting a defense seminar. The Graduate Division must be notified in advance by the student through the graduate chair about the date, time, and place of dissertation defense. Graduate faculty and students must be invited to the defense seminar.

#### List of Approved Courses for MBBE Graduate Students

The following 400-level courses are recommended:

- MBBE 401, 402, 405, 408, 412, 483,
- BE 410, 420, 431, 460,
- BIOL 407

The 600-level courses can be selected from the following list of courses. Students can select other courses after obtaining approval from the committee and the graduate chair.

- MBBE 601, 620, 625, 650, 651, 683, 687,
- BE 606, 622, 625, 634, 638,
- CMB 621, 622,
- MICR 625, 632, 671,
- PEPS 630, 646, 681,
- TPSS 604, 614, 640

#### Financial Assistance

All students in the MBBE program are currently supported through teaching assistantships, research assistantships, or fellowships. In addition, tuition is waived for all assistantships and most fellowships. It is recommended that students interested in research assistantships contact faculty working in their area of interest regarding availability. Additional fellowship support is available from the East-West Center, which offers scholarships to Asian, Pacific, and American students for affiliation in one of their programs.

#### Contact Information

Dr. Gernot Presting  
Graduate Chair, Molecular Biosciences and Bioengineering  
University of Hawai‘i at Mānoa  
Phone: (808) 956-8861  
Fax: (808) 956-3542  
Email: gernot@hawaii.edu

## Molecular Biosciences and Biotechnology Program

Gilmore 211  
3050 Maile Way  
Honolulu, HI 96822-2279  
Tel: (808) 956-6997  
Fax: (808) 956-3706  
Email: acadaff@ctahr.hawaii.edu  
Web: [www.ctahr.hawaii.edu/site/programmmbb.aspx](http://www.ctahr.hawaii.edu/site/programmmbb.aspx)

#### Participating Faculty

- H. Ako, PhD (Coordinator)—biochemistry, aquaculture
- A. M. Alvarez, PhD—bacterial diseases
- D. Borthakur, PhD—molecular genetics of bacteria and their interactions with plants
- D. A. Christopher, PhD—plant molecular biology, regulation of gene expression
- J. S. Hu, PhD—transgenic disease resistance
- D. Jenkins, PhD—biosensors
- C. M. Kinoshita, PhD—bioremediation
- P. S. Leung, PhD—biotechnology economics
- Q. Li, PhD—environmental biochemistry
- R. M. Manshardt, PhD—tropical fruit breeding and genetics
- P. Nerurkar, PhD—metabolic disorders, signal transduction, alternative medicine
- W. W. Su, PhD—cell culture, biochemical engineering
- A. Wiczorek, PhD—molecular systematics, public education on biotechnology
- J. Yang, PhD—animal molecular biology and biotechnology
- J. Zhu, PhD—plant and biotechnology transformation biotechnology

**Degrees Offered:** BS in molecular biosciences and biotechnology

## Program Goals

- To provide education leading to biotechnology literacy;
- To provide broad training in the methods of biotechnology;
- To enable students to work as members of interdisciplinary teams; and
- To staff Hawai'i's emerging biotechnology industries.

## The Academic Program

Biotechnology is dramatically influencing the agricultural, environmental, and pharmaceutical sciences. Molecular Biosciences and Biotechnology (MBB) is an interdisciplinary Bachelor of Science degree program designed to educate students in the exciting and growing field of biotechnology, which promises to be a predominant science of the 21st century. MBB graduates will be qualified for employment in agricultural, pharmaceutical, environmental clean-up, forensics, and biotechnology industries; to work in government agencies, environmental groups, and consulting firms; to teach secondary education, or to embark on graduate studies to prepare for advanced research and teaching positions.

The program provides a thorough foundation in molecular biology, biochemistry, genetics, biotechnology, and the life sciences. It serves as excellent and rigorous training for graduate and professional school.

Students tailor their studies to meet their interests by choosing electives and senior research projects in the following subjects: environmental and microbial biotechnology, plant biotechnology, insect and pathogen biotechnology, and aquaculture and bioreactor biotechnology. Students participate in hands-on laboratory courses culminating in research and a senior thesis. Graduates are competent for employment using modern methods such as molecular diagnostics, forensics, tissue culture, genetic engineering, microbial detection, bioremediation, algal bioenergy, marine biotechnology, proteomic, bioinformatic, and genomic analyses. They will have the skills for employment in the burgeoning biotechnology industry and for entering graduate or professional school.

## Undergraduate Study

### BS in Molecular Biosciences and Biotechnology

#### Requirements

Students must fulfill the General Education Requirements of UH Mānoa and the college.

Among the courses they must include in these requirements are:

- PHYS 100/100L or 151/151L; 152/152L
- CHEM 161/161L; 162/162L; 272/272L
- BIOL 171/171L; 172/172L; 275/275L
- MATH 215 or 241
- NREM 220
- NREM 310

In addition, students must complete the following major core requirements:

- MBBE/BIOL 304
- ANSC 446 or PEPS/TPSS 371 or BIOL 375
- MBBE/BIOL 401
- MBBE 402
- MBBE 483
- MBBE 499

## Electives

Students are required to take 18 credits of electives in the various sciences related to their interests in the environment, animals, microbiology, plants, the health sciences, crop protection, or aquaculture. The following are the approved list of electives:

- BE 150 Introduction to Biological Engineering
- BE 373 Transport Phenomena
- BE 410 Biomass Conversion to Biofuels and Bioenergy
- BE 420 Sensors and Instrumentation for Biological Systems
- BE 431 Environmental Biotechnology
- BE 440 Bioremediation Principles and Practices
- BIOL 407 Molecular Cell Biology I
- BIOL 408 Molecular Cell Biology II
- BOT 101/101L General Botany
- BOT 470/470L Plant Physiology
- CHEM 273/273L Advanced Organic Chemistry
- MICR 351/351L Biology of Microbes
- MICR 461 Immunology
- MICR 475 Bacterial Genetics
- MICR 485/485L Microbes in the Environment
- MBBE 412 Environmental Biochemistry
- PEPS 363 General Entomology
- PEPS 405 Plant Pathogens and Disease
- PEPS 421 Foundations of Pest Management
- PEPS 422 Biocontrol of Invasive Species
- TPSS 453 Plant Breeding
- TPSS 440 Tissue Culture and Transformation
- ZOOL 320/320L Vertebrate Zoology

## Natural Resources and Environmental Management

Sherman Lab 101  
1910 East West Road  
Honolulu HI 96822  
Tel: (808) 956-7530  
Fax: (808) 956-6539  
Email: nrem@ctahr.hawaii.edu  
Web: www.ctahr.hawaii.edu/nrem/

#### Faculty

- \*C. Chan-Halbrecht, PhD (Chair)—agricultural and international development and environmental economics, marketing
- J. Azuma, PhD—remote sensing of global vegetation
- \*L. J. Cox, PhD—community economic development
- \*S. E. Crow, PhD—soil ecology and biogeochemistry
- \*C. I. Evensen, PhD—natural resource management, environmental quality
- \*J. B. Friday, PhD—tropical forestry/agroforestry extension
- \*P. V. Garrod, PhD—marketing and production economics
- \*S. E. Grow, PhD—soil ecology and biochemistry
- \*T. W. Idol, PhD—tropical forestry/agroforestry
- F. Inman-Narahari, PhD—tropical tree improvement and conservation genetics
- \*J. K. Leary, PhD—invasive species control
- \*C. Lepczyk, PhD—ecosystem management, wildlife ecology, landscape ecology
- \*P. S. Leung, PhD—production, fisheries, and aquaculture economics
- \*C. M. Litton, PhD—forest ecology and management, biogeochemistry

- \*T. Miura, PhD—geospatial analysis, remote sensing  
 S. Y. Nagano, MS—4-H youth program, county extension  
 \*K. L. Oleson, PhD—ecosystem service valuation, environmental ethics, policy analysis  
 A. Pierce, PhD—wildfire science and management  
 P. C. Selmants, PhD—forest ecology  
 A. Strauch, PhD—aquatic ecology  
 P. C. Trauernicht, PhD—wildfire management extension  
 M. D. B. Vaughan, PhD—collaborative resource management and environmental education  
 J. Wang, PhD—environmental remote sensing  
 \*J. F. Yanagida, PhD—production economics, price analysis, international trade  
 A. Youkhana, PhD—carbon sequestration and agroforestry

### Cooperating Graduate Faculty

- K. M. Burnett, PhD (SSRI)—invasive species assessment and management  
 J. Cusick, PhD (Environmental Center)—sustainable tourism  
 J. DeFrank, PhD (TPSS)—herbicide management  
 A. El-Kadi, PhD—groundwater hydrology  
 T. Giambelluca, PhD—climatology, hydrology  
 M. Habte, PhD (TPSS)—soil ecology, microbiology  
 N. V. Hue, PhD (TPSS)—organic cycling  
 Q. Li, PhD (MBBE)—environmental chemistry  
 Y. Li, (UH Hilo)—tropical forest ecology and management  
 T. Radovich, PhD (TPSS)—sustainable farming  
 C. Ray, PhD (CEE)—ground water hydrology and chemistry  
 H. Valenzuela, PhD (TPSS)—vegetation physiology and management

### Affiliate Graduate Faculty

- J. Fox, PhD (East-West Center)—social forestry  
 A. Friedlander, PhD (Charles Darwin Foundation)—biogeography, fisheries  
 S. Gray, PhD (U of Massachusetts)—human ecology  
 R. Mackenzie (USDA Forest Service)—aquatic ecology  
 M. Pan (NOAA Fisheries)—fishery economics  
 S. Pooley, PhD (NMFS)—marine resource economics

**Degrees and Certificates Offered:** BS, MS, and PhD in natural resources and environmental management.

## The Academic Program

The Natural Resources and Environmental Management (NREM) program emphasizes the science and management of natural resources and their interlinks to environmental quality. It provides students with scientific knowledge of the physical, chemical, biological, economic, social, and policy elements of natural resources management and allows them to understand the principles that underpin productive, sustainable natural resource use, and enhanced environmental quality. Graduating students will be able to solve contemporary resource use problems and assist in sound decision making for optimizing land use and managing agricultural and forestry systems, watersheds, coastal ecosystems, and landscapes in an ecologically sound manner. Graduates will also be skilled in addressing resource and environmental policy issues and the needs of diverse stakeholders and communities including policy makers and planners. Scientific objectivity will be emphasized as an important element of environmental planning. Thus, students will be trained in the use of quantitative models and such tools as decision aids for optimizing natural resource management and ecosystem stewardship.

## Undergraduate Study

### BS in Natural Resources and Environmental Management

The bachelor of science degree in natural resource and environmental management is a science-based interdisciplinary degree emphasizing the management of natural and environmental resources, that is, decision-making and actions to modify the resource base in order to achieve specified goals. The focus is on tropical island ecology and terrestrial and coastal ecosystems, with special consideration given to Hawai'i's unique physical and social environment. The program gives students the ability to conceptualize and critically analyze environmental problems, identify management options, implement suitable interventions, and evaluate their effectiveness. Students receive comprehensive training in basic and applied natural and social sciences, management skills and techniques, and real-life problem-solving including community experiences. Students also develop an individual specialization in an upper division study area of their choice. Graduates have challenging and rewarding career opportunities with government agencies, non-profit organizations, and private businesses in resource-based industries and environmental protection. The BS degree also provides solid academic preparation for post-baccalaureate professional training and graduate study in natural resources and related environmental fields.

### Advising

Undergraduate majors are required to report for advising prior to registration each semester. An entering student must meet with the undergraduate program chair to determine the student's interest and preparation for the NREM major. The student is then assigned to an advisor, with whom he or she meets every semester to plan courses and chart progress toward graduation. After a student decides on a track specialization, the advisor assists the student in arranging an internship (NREM 492), selection of elective courses, career advising, and his or her professional development.

### Entrance Requirements

Freshmen may be admitted directly into the program when they apply to UH Mānoa. Students transferring from another program in the UH System or other universities must have a minimum 2.5 GPA for transferable credits.

### Degree Requirements

The BS degree requires a total of 120 credit hours, with at least 45 credits in upper division (i.e., 300+ level). Regardless of selected specialization, all students must complete a set of basic core courses. Many of these courses also satisfy General Education Core requirements. Required basic courses include:

- CHEM 151/151L or 161/161L
- BIOL 171/171L and 172/172L
- One course from MATH 203, 215, 241, or NREM 203

All students must also complete an applied science program core, which requires the following courses:

- NREM 210
- NREM 220 or ECON 130
- NREM 301/301L, 302, and 310
- NREM 492/492L and 494

## Specializations and Their Requirements

Students have a choice between two tracks within which to develop an upper-division specialization. Both tracks require a set of specific courses and selected electives totaling 30 credits. Some electives, however, may require additional prerequisite courses and credits.

### Specialization in Resource Management and Conservation

This track focuses on the biological/physical and natural science aspects of resource management. Course requirements include:

- PHYS 151/151L
- CHEM 162/162L
- NREM/TPSS 304
- NREM 477
- 18 upper division credits in a natural resource specialization area, with at least one course that emphasizes analytical lab, or field research methods (course selection requires advisor approval).

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Specialization in Resource Development and Policy

This track emphasizes the social sciences and business/public management skills. Course requirements include:

- NREM 341 or 351 or 429
- FAMR 352 or NREM 420
- One course from NREM/TPSS/ECON 429, NREM 358 or 477, or GEOG 413
- 12 upper division credits from social science disciplines such as anthropology, economics, geography, political science, or sociology (course selection requires advisor approval)
- 3 upper division credits in social science analytical/field research methods or in advanced communication (COM, COMG, JOUR)
- 9 upper division credits in natural resource area(s) or field study methods

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Options for Meeting UH Mānoa Hawaiian/Second Language Requirement

As part of the graduation requirements for all undergraduate students at UH Mānoa, NREM majors will select one of the following three options for Hawaiian/Second Language study, in consultation with the faculty advisor:

**Option 1:** Show proficiency in Hawaiian/Second Language at a 202 course level. Native and bilingual speakers of a second language may be granted a waiver for the foreign language requirement by the College of Languages, Linguistics, and Literature.

**Option 2:** Show proficiency in Hawaiian/Second Language at a 102 course level and take one additional course each in the Social Sciences (3 credits) and in the Natural Sciences (3–4 credits).

**Option 3:** Take two additional courses each in the Social Sciences (total 6 credits) and in the Natural Sciences, including at least one course with a laboratory (total 7–8 credits). The additional Social and Natural Science courses can be chosen from any 100–200 level UH Mānoa courses in the respective area but cannot be used to meet other UH Mānoa General Educa-

tion requirements (except focus) or NREM major requirements.

## Graduate Study

NREM offers the following graduate degrees: MS (Plans A, B, and C), and PhD degrees in Natural Resources and Environmental Management; a university-wide Graduate Resource Management Certificate; and a university-wide graduate degree specialization in Ecology, Evolution, and Conservation Biology.

The NREM graduate program brings together natural and social scientists to offer an integrative and interdisciplinary program to understand and manage tropical and sub-tropical terrestrial and aquatic ecosystems. Emphasis is placed on island settings and their relevance to managing land and seascapes. Studies in NREM incorporate the various components and scales (spatial and temporal) that determine ecosystem structure and function, and that bear upon the social and economic welfare of residents in diverse communities and environmental settings. The NREM curriculum emphasizes the application of physical, biological, and social sciences to the conservation and sustainable management of natural, environmental, and economic resources. The program also provides a science-based foundation to assess the processes that control the structure and function of terrestrial and aquatic ecosystems, and the human behaviors and policies that impact those processes.

Students are expected to acquire quantitative reasoning, critical thinking, and other advanced skills that enable them to solve contemporary resource use and environmental problems and to assist in sound policy development and implementation. NREM graduates should be skilled in addressing natural resources and environmental policy and management issues of the competing needs of diverse clientele and communities. NREM graduates are expected to serve as professional leaders in natural resources and environmental management and policy, academic teaching and research, and applied research and extension in educational and governmental institutions, international, national, and state technical assistance and policy agencies, agricultural and forestry industries, consulting firms, and private nonprofit and non-governmental organizations.

Natural resources and environmental management issues are attracting considerable national and global attention, as well as growing donor interest, especially in the Asia-Pacific and tropical and subtropical regions. Graduate training, therefore, features collaboration with national and international institutions to foster programs that provide students with opportunities to learn about the ways in which people from other countries and cultures manage their natural resources and interact with their environments. As such, NREM has a diverse mix of domestic and international graduate students.

To underscore its integrative and global nature, the NREM Graduate Program features strong collaboration with other academic departments within and outside of CTAHR, as well as collaborating institutions in and outside of Hawai'i such as transitional economies in Asia, eastern Europe, and the Middle East. In addition, cooperating and affiliate graduate faculty in NREM complement and supplement departmental expertise.

### Specialization Areas

NREM is an interdisciplinary department that offers integrative graduate curricula necessary for quality decision-making and solution-oriented natural resource and environmental management. As a foundation for graduate training, all NREM

students are expected to acquire a common base of knowledge embodied in a set of core courses. Beyond that, students are expected to develop knowledge and skills within a chosen specialization area. This helps to ensure that students have the real-world skills needed to perform specific tasks, analyze resource management and policy issues, carry out original and meaningful research, and effectively perform outreach and educational activities.

Examples of specialization areas include, but are not limited to: aquaculture economics and management; coastal watershed management; contaminant hydrology; contaminant sources and transport in watersheds; ecological and environmental economics; economics of sustainable resource utilization; fishery economics and management; forest economics; forest ecosystem management; integrated resource management; irrigation and water management; land and water use policy assessment; land degradation processes and models; land resource inventory and interpretation; land, soil, and water conservation reclamation and remediation; landscape ecology; natural resource and environmental non-market valuation; restoration ecology; remote sensing and geospatial analysis; sustainable community economic development; sustainable land and resource management; tropical forestry and agroforestry; water quality; watershed hydrology; and wildlife.

The student's advisor and thesis/dissertation committee will assist in choosing appropriate coursework and research, or other activities, to develop a specialization area. Students are expected to declare a specialization area by the completion of their first year in the department.

### Admission and Deficiencies

Regular, probationary, and conditional status is determined based on student's academic performance at the time of application. If you are admitted as regular status, you may start your formal graduate program immediately. If you are admitted as probationary or conditional status, you have specific criteria that must be fulfilled such as a BS or MS degree, course deficiencies, expected minimum GRE score of 302–308 combined Verbal and Quantitative Reasoning (equivalent to 1,100–1,200 on the prior scale), or other documents. These criteria are specified in your letter of acceptance, and should be discussed immediately with your advisor upon matriculation. It is expected that a student will move from probationary and/or conditional status to regular status by the end of their first year by completing Form I. Applicants for the MS degree are required to have a BS or equivalent degree and applicants for the PhD degree are required to have an MS or equivalent degree (but see below for admission to the PhD degree without a BS degree).

The minimum required TOEFL score (for foreign applicants only) is: (a) MS student: 550, 213, or 80 for paper-based, computer-based, or internet-based examinations, respectively; and (b) PhD student: 600, 250, or 100 for paper-based, computer-based, or internet-based examinations, respectively. The TOEFL requirement applies to all foreign students, except those who are native speakers of English or have received a bachelor's degree or an advanced degree from an accredited/recognized college within the last five years in the U.S., U.K., Ireland, Canada, New Zealand, Singapore, or Australia are exempt from the TOEFL requirement. Students with low TOEFL scores are required to enroll in remedial ELI (English Language Institute, [www.hawaii.edu/eli/index.html](http://www.hawaii.edu/eli/index.html)) courses.

NREM requires prior completed coursework (with a grade of C or higher) that is equivalent to or higher than NREM 203, 220 (or ECON 130), 310, CHEM 151, and BIOL 171. Students who do not have coursework in one or more of these areas may be accepted into the program, but will be expected to make up course deficiencies within their first 1–2 semesters on campus and complete Form 1.

### Students Applying to PhD Program

#### (1) Admission to PhD After Finishing NREM MS

An NREM PhD student who also completed his or her MS in NREM and has subsequently been accepted into the NREM PhD program has the option to take directed reading (NREM 699) for half of the required elective credits (12 of the 24) if NREM courses that are applicable to the student's degree have already been taken as part of the MS degree plan. At least 6 of the non-NREM 699 credits must be for graduate research methods courses. Also, the student is still required to take all 7 credits of NREM PhD core classes. In the case where a student took some/all of these core credits as electives during their MS degree program, an equivalent number of 600-level credits (but not NREM 699) must be taken.

#### (2) Admission to PhD Without Finishing NREM MS

A currently enrolled NREM MS student can be admitted into NREM's PhD program prior to completing their MS degree if ALL of the following criteria are met:

- Unanimous approval by the student's MS committee
- Record of excellent academic achievement including, at a minimum:
  - Maintaining a GPA >3.5 in the MS NREM program
- The student has the proven ability to undertake independent research, which can be demonstrated by ALL of the following:
  - Authored/co-authored (student as 1st author) ≥ 1 presentation at a national or international professional conference
  - Authored/co-authored (student as 1st author) ≥ 1 peer reviewed journal article
  - Accrued ≥ 2 years of meaningful research experience at school, jobs etc.

#### (3) Admission to PhD From BS

A student with a BS degree can be admitted directly into NREM's PhD program if ALL of the following criteria are met:

- A faculty member agrees to advise the student and commits to at least 3 years of funding
- Record of excellent academic achievement including, at a minimum:
  - Undergraduate GPA >3.5
  - Average verbal, quantitative and written GRE scores >75th percentile
- The student has the proven ability to undertake independent research, which can be demonstrated by ALL of the following:
  - Authored/co-authored (student as 1st author) a minimum of 1 presentation at a national or international professional conference
  - Authored/co-authored (student as 1st author) a minimum of 1 peer reviewed journal article
  - Accrued at least 2 years of meaningful research experience at school, jobs, or internships

## Advising

Admitted students will check in with his or her advisor upon arriving on campus. An advisor has been identified for every student based on the student's stated interest and consent of the advisor. If you do not know who your advisor is, check with the NREM office staff or the graduate chair immediately. The primary responsibilities of the advisor during your first semester are to verify entrance and background deficiencies, prescribe remedial courses as early as possible in the student's program, and provide guidance in course selection. All of these items should be completed by the end of the student's first year. Submit Form I to the graduate chair upon fulfilling all deficiencies. If there are no deficiencies, Form I should be submitted at the beginning of the first semester.

## Degree Requirements

A "NREM graduate course" is defined as a NREM course at the 500-level or above. A maximum of six credits of upper-division (400-level) undergraduate course work can be used towards the "other than NREM graduate courses" degree requirement for MS Plan A, Plan C, and PhD students, or towards any of the concentration areas for MS Plan B students. For additional course applicability criteria, refer to: [manoa.hawaii.edu/graduate/content/course-applicability](http://manoa.hawaii.edu/graduate/content/course-applicability).

## MS in Natural Resource and Environmental Management

NREM offers three options for the MS degrees: Plan A is a thesis-driven research degree, and a student will be accepted into this plan if a faculty sponsor has agreed to advise the student; Plan B is a course driven, professional degree that also requires an integrating capstone experience; and Plan C is only for students with exceptional prior work experience that requires a minimum of two semesters of full-time resident study at UH Mānoa and a final written and oral comprehensive examination.

Once admitted, MS students must select a specialization (Plan A) or concentration (Plan B) area with the approval of their advisor. To meet the integrative, interdisciplinary intent of the NREM program, a set of graduate level courses (the Primary MS Core) will be required of every student, regardless of his or her selected Plan option or specialization/concentration area.

The course requirements for each plan are:

### Plan A

In addition to the Primary MS Core, a set of electives and thesis credits are required for a total of 30 credits. Electives provide background in research methods and depth in the student's area of specialization. The remaining credit requirements will be met with thesis credits (NREM 700) for conducting the research project. Once the thesis topic is finalized, a research proposal must be approved by the committee. An oral defense of the proposal in front of the thesis committee is also required for final approval of the thesis topic. A public thesis defense is also required, and an announcement with thesis abstract, defense date, and location must be sent to the graduate program chair, departmental secretary, and Graduate Division at least 2 weeks in advance.

### Primary MS Core (9 credits):

NREM 600 (3); 601 (3); 605 (2); 701 (1)

### Electives (15 credits):

Course in graduate research methods (3); NREM graduate courses (6); Other graduate courses for specialization from within or outside of NREM (6); a maximum of 6 credits of upper-division undergraduate course credits (400-level) allowed

### Thesis Option (6 credits):

NREM 700 Thesis (6)

### Plan B

Plan B is a course-driven professional degree that requires a total of 36 credits. Students are required to declare a concentration from one of four possible concentration areas (see below). Courses include the Primary MS Core (9 credits), research methods (3 credits), a minimum of 9 elective credits from the chosen concentration area, a minimum of 3 elective credits from each of the other three concentration areas, and a 6 credit capstone experience. Of the 18 elective credits required: (i) at least 12 credits must be NREM courses; and (ii) a maximum of 6 credits of upper-division undergraduate course credits (400-level) are allowed.

### Primary MS Core (9 credits):

Same as Plan A.

### Research Methods (3 credits):

course in graduate research methods (3).

### Concentration Areas (total 18 credits):

All students must select a concentration area from the following: Geospatial Analysis and Modeling, Natural Resources Economics and Environmental Planning, Land and Water Resource Management, and Applied Terrestrial Ecology. Students are required to take a minimum of 9 credits from their concentration area and 3 credits from each of the other areas. The list is not comprehensive, and substitutions will be considered via a written petition from the faculty advisor to the graduate committee.

#### Geospatial Analysis & Modeling

■ NREM 477, 664, 677, GEOG 470, 472, PLAN 673, GEOG/TPSS 680,

#### Environmental Policy and Economics

■ NREM 420, 611, 627, 637, 671, NREM/ECON/TPSS 429, GEOG 413, 621, 622, GEOG/PLAN 637, PLAN 620, 625, 628, 640, 671

#### Land & Water Resource Management

■ NREM 461, 463, 467, 612, 660, 662, 665, LWEV 588

#### Applied Terrestrial Ecology

■ NREM 450, 480, 680, 682, 685, NREM/BOT/ZOOL 690, TPSS 481, 604

### Capstone Experience (6 credits):

A capstone experience is required for all Plan B students. The capstone experience consists of: (i) NREM 695 (1 cr), to be taken when the student is preparing their proposal; and (ii) NREM 696 (3 cr) and NREM 699 (2 cr; register with faculty advisor), to be taken when the student has completed their capstone experience and is writing up their final document. All capstone experiences require approval from the Plan B Capstone Panel, which consists of the faculty advisor, the NREM 695 course instructor, and an at-large Panel member.

The Capstone Experience requirement may be fulfilled in a number of ways, based on each individual student's interests. In as much, it will vary from student to student, but typical

capstone experiences will involve: (i) an internship/coop/special field experience; (ii) an investigation of a special topic; and/or (iii) development of a project, directed readings/study, or a research project. Each student is expected to take the primary role in identifying and organizing their capstone experience. In meeting this requirement, it will be important for students to demonstrate that they are getting an “integrative” experience in natural resources and environmental management. Each student will be required to give a public proposal and defense presentation, and provide a written proposal and final document on their capstone experience, both of which will be evaluated by the Plan B Capstone Panel.

### Plan C

Students with exceptional prior work experience. Requirements include residence for two semesters of full-time study, a minimum of 18 graduate credit hours, and a final examination (written and oral). This option is only available to students who are mid-career professionals, having at least 5 years of relevant work experience in natural resources and environmental management.

#### Primary MS Core (9 credits):

Same as Plan A.

#### Electives (9 credits):

NREM graduate courses (with no more than 3 credits of NREM 699)

### PhD in Natural Resource and Environmental Management

The PhD degree in NREM is awarded only to students with outstanding scholarly achievement. Applicants for the PhD program with academic records that do not match NREM core requirements will be expected to incorporate these into their PhD program. To meet the integrative, multi-disciplinary intent of this program, a set of graduate level courses (Primary PhD Core) will be required of every student regardless of his or her selected specialization area. In addition, a set of electives will also be required. These electives are meant to provide background in research methods and depth in the student’s specialization area. The remaining degree requirements will be met by dissertation credits (NREM 800). All PhD students must pass a written and oral comprehensive examination (described below) before being advanced to candidacy. The student’s dissertation committee is responsible for designing and administering the comprehensive examination.

#### Primary PhD Core (7 credits)

- NREM 611 (3)
- NREM 612 (3)
- NREM 701 (1)

#### Electives (24 credits)

- Graduate research methods (6)
- NREM graduate courses (9)
- Other graduate courses for specialization from within or outside of NREM (9); a maximum of 6 credits of upper-division undergraduate course credits (400-level) allowed from within or outside of NREM

#### Dissertation (1 credit)

- NREM 800 (1)

### Comprehensive Examination

The final outcome of the comprehensive examination is the acceptance of the student to the PhD candidacy in NREM. Based on this examination, the student’s committee will determine if the student: (i) is ready, (ii) needs to take more courses to remediate deficiencies in her or his training, or (iii) that the student is not fit for the NREM PhD program. In the process of administering the examination, the committee will test the rigor of the student’s training as: (i) a scientist in general (that the student can follow the scientific method and procedure to address a research problem and also has the analytical skills to conduct research), (ii) a scientist in NREM (has in-depth knowledge of what makes her or him unique compared to other graduates of UH that might have similar interests; in other words, a NREM student focusing on hydrology should not only be trained to deal with a hydrology problem but also should be able to address the natural resources and environmental management implications of that problem as compared to a hydrology graduate from Civil and Environmental Engineering, Geology and Geophysics, or Geography), and (iii) a scientist in her or his specialty area (for example, a NREM PhD student with a specialty in hydrology should have more in-depth expertise in hydrology than other NREM PhD students working in other specialty areas).

Based on this understanding, the comprehensive examination questions can cover: (i) his or her specialty (i.e., hydrology, forest ecology and management), (ii) general topics related to NREM (i.e., core courses, background knowledge), (iii) knowledge of general research methods (i.e., statistics, analysis methods, etc.), and (iv) the proposed dissertation research.

### Faculty

- \*M. G. Wright, PhD (Chair)—integrated pest management, tropical fruits and nuts, insect ecology, biological control
- \*A. M. Alvarez, PhD—bacterial diseases
- \*W. B. Borth PhD—plant virology, micoplasmas
- R. H. Ebesu, MS—extension education (Kaua’i Cooperative Extension Service)
- \*S. A. Ferreira, PhD—crop protection, extension education
- \*J. K. Grace, PhD—urban entomology, termite and social insect biology and control, insect behavior
- R. T. Hamasaki, MS—fruit and vegetable crops extension education (Hawai’i Cooperative Extension Service)
- \*A. H. Hara, PhD—horticultural entomology, post-harvest insect control, regulatory entomology (Komohana Agricultural Research Center, Hilo)
- \*J. Hu, PhD—virology
- \*M. Kawate, PhD—pesticide registration
- \*P. Krushelnycky, PhD—entomology, invasion biology

- \*R. H. Messing, PhD—insect ecology and biological control (Kaua'i Agricultural Research Center)
- \*S. C. Nelson, PhD—epidemiology, extension education
- \*D. Rubinoff, PhD—insect systematics and ecology, invasive species, conservation biology
- K. T. Sewake, MS—extension education (Hawai'i Cooperative Extension Service)
- R. Shimabuku, MS—vegetable crops production and disease management extension education (Maui Cooperative Extension Service)
- \*B. S. Sipes, PhD—nematology, alternative control methods
- \*H. Spafford, PhD—integrated pest management, biological control
- J. S. Sugano, MS—extensions education (O'ahu Cooperative Extension Service)
- M. Tian, PhD—molecular pathogen, host interactions
- \*J. Y. Uchida, PhD—fungal pathology, biological control of diseases, environmental impacts
- \*H. Valenzuela, PhD—sustainable, organic products
- \*E. Villalobos PhD—pollinator management, honeybee health
- \*K. H. Wang, PhD—nematology, ecological pest management
- \*J. R. Yates III, PhD—urban pest management, termite biology and control

### Cooperating Graduate Faculty

- L. Arita-Tsutsumi, PhD—insect behavior, honeybee ecology (UH Hilo)
- D. Borthakur, PhD—molecular biology
- K. Hayes, PhD—evolution and conservation biology
- B. Holland, PhD—EECB
- K. Y. Kaneshiro, PhD—systematics, evolution, insect behavior
- M. Shintaku, PhD—virology (UH Hilo)

### Affiliate Graduate Faculty

- R. Cabos, PhD—nematology (USDA-ARS, Hilo)
- R-S. Chen, PhD—plant pathology (National Chiayi U, Taiwan)
- N. Evenhuis, PhD—systematics of Diptera (Bishop Museum)
- P. A. Follett, PhD—commodity quarantine treatments, tropical tree fruit IPM (USDA-ARS, Hilo)
- D. Gonsalves, PhD—plant virology (USDA-ARS, Hilo)
- C. R. R. Hooks, PhD—entomology (University of Maryland at College Park)
- F. G. Howarth, PhD—systematics (HDOA, Honolulu)
- E. B. Jang, PhD—insect physiology, fruit fly control (USDA-ARS, Hilo)
- L. Keith, PhD—phytobacteriology (USDA-ARS, Hilo)
- N. J. Reimer, PhD—ant biology and control, biological control of weeds (HDOA, Honolulu)
- R. I. Vargas, PhD—ecology, mass-rearing techniques (USDA-ARS, Hilo)

**Degrees Offered:** BS in plant and environmental protection sciences, MS in entomology, MS in tropical plant pathology, PhD in entomology, PhD in tropical plant pathology

### The Academic Program

Agriculture, urban, and natural environments are severely affected by established and invasive plants, animals, arthropods, and disease-causing organisms. Management of these pests and pathogens is essential to preserve the economic and ecological future of Hawai'i and the Pacific Basin. Societal concerns about protecting our natural resources and the environment have resulted in a plant and resource protection focus stressing biological control, integrated pest management, cultural, traditional, and genetically based methods. Hawai'i's location in the Pacific basin provides students with an ideal setting for tropical and environmental studies. The unique island ecosystem also encompass many cropping niches from humid tropical environ-

ments to arid temperate conditions. In addition, the multitude of agricultural and landscape plants produced provides a natural laboratory to study a diversity of urban and agricultural inputs. The multicultural aspect of the human population further adds to the intriguing plant, human, and pest interactions that are a part of the PEPS academic and research program. Students are presented with great educational opportunities to understand plant and environmental protection and pest management. Students will be prepared for employment in agricultural and urban pest management, science education, government, industry, and environmental resource management. Undergraduate students will be well prepared for professional and graduate studies.

### Affiliations

Studies in Plant and Environmental Protection Sciences (PEPS) at UH Mānoa are strengthened by cooperative relationships with Ecology, Evolution, and Conservation Biology Program; Harold L. Lyons Arboretum; Hawai'i Agriculture Research Center; B. P. Bishop Museum; Agricultural Research Service of the U.S. Department of Agriculture; Animal and Plant Health Inspection Service of the U.S. Department of Agriculture; U.S. Geological Service; and Hawai'i Department of Agriculture.

### Advising

Students are assigned an academic advisor upon acceptance into the PEPS program. Undergraduates are required to consult with their advisor prior to registration each semester.

### Undergraduate Study

#### BS Degree

PEPS is a multidisciplinary science degree that promotes the understanding of complex agricultural and urban problems created in the global ecosystem. Students receive interdisciplinary exposure to entomology, plant pathology, weed science, and environmental science and can focus on one of these areas in their upper division studies. This holistic program is developed so each student has the opportunity to learn pest management, crop protection, biotechnological approaches, environmental regulations, toxicology, and rural and urban sociology as these relate to their focus areas.

The instructional program is structured to achieve the following student learning outcomes: (1) students will demonstrate growth in the ability to analyze and communicate an environmental issue; (2) students will recognize and be able to explain the biology of at least 10 insect orders; (3) students will recognize and be able to describe biology and management methods for at least five significant plant pathogens in each category: fungi, viruses, bacteria, nematodes; (4) students will be able to describe the biology and damage of at least five invasive insects, pathogens, or plants (weeds), and explain the limitations and implications of control strategies; (5) students will be able to explain and provide examples of economic injury level and threshold based pest management options; (6) students will demonstrate ability to apply skills learned to a real world situation or employment experience and effectively describe the experience; and (7) students will demonstrate the ability to clearly communicate the results of self analysis and critical thinking.

## Requirements (120 credit hours)

PEPS offers a flexible and individualized degree program that allows students to select among several different options to fulfill university core requirements. In accord with their own particular interests and in consultation with their advisor, students also choose from a variety of departmental courses and general electives. PEPS 499 (Directed Research) is a unique requirement that provides students with the opportunity to work individually with faculty members throughout their program.

Specific requirements are:

- CHEM 161/161L, 162/162L
- BIOL 171/171L or BOT 101/101L or ZOOL 101/101L
- NREM 310 or FAMR 380/380L
- PEPS 210 or 250
- PEPS 363/363L, 405, 481 and 495; 2 courses numbered from 200 to 391; 6 credits of 499; and 9 credit hours of courses numbered from 400 to 491.
- 29 credit hours of approved electives based upon students' academic interests.
- Additional credit hours as necessary to meet UH Mānoa General Education Core and graduation requirements.
- Hawaiian/Second Language Requirement: Undergraduate students in PEPS, in consultation with their undergraduate advisor, will be asked to select one of the following three options:
  - Option 1: Show proficiency in a Hawaiian/Second Language at the 202 level;
  - Option 2: Show proficiency in a Hawaiian/Second Language at the 102 level, and take one additional 3-credit semester course in the Social Sciences and one additional 3 or 4-credit semester course in Natural Sciences;
  - Option 3: Take two additional 3-credit semester courses in Social Sciences and two additional 3 or 4-credit semester courses in Natural Sciences. One of the courses in the Natural Sciences must include a laboratory.

Prospective majors should consult with the department to design an appropriate curriculum tailored to their interests.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

## Graduate Study

### Entomology

MS and PhD degrees are offered in the entomology program. Courses are offered in biological control of insect and weed pests, insect ecology, insect physiology, insect transmission of plant pathogens, pest management, systematics, urban entomology, and tropical pest management. Thesis and dissertation research can be selected from any of these subject areas.

Students applying for graduate programs in entomology are expected to have acquired a bachelor's degree with credit hours in entomology and biology, including general biology, general entomology, integrated pest management; one year of chemistry; and an appropriate course in mathematics and/or statistics. Deficiencies in undergraduate preparation can be satisfied during the graduate program. The statement of objectives submitted with your application should describe your goals and interests in entomology. Applicants should also arrange to have three confidential letters of reference sent directly to the graduate program chair.

The MS and PhD degrees in entomology are recognized by the Western Interstate Commission for Higher Education (WICHE) regional graduate programs. Residents of Alaska, Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, Utah, Washington, and Wyoming are eligible, upon admission, to enroll at Hawai'i-resident tuition rates.

### Master's Degree

The MS degree program is offered under either Plan A (thesis) or Plan B (non-thesis). A total of 30 credit hours are required for each degree option. An advisory committee composed of at least three members of the graduate faculty provides guidance to the student. For a general description of these options, see "Requirements" for each option.

The program provides an education in general knowledge of entomology, including basic principles of insect identification, biology, and control and prepares the student for employment in private industry, government agencies, and research institutions. Expected student learning outcomes are: (1) acquire and demonstrate competency/skills as a biologist; (2) acquire and demonstrate entomological knowledge necessary for professional success; (3) acquire and demonstrate communication and literacy skills; (4) write and defend a thesis of entomological research; and (5) present findings of their research in oral and/or poster formats in scientific form and publish the results of their research in peer-reviewed journals. Students shall develop into competent and knowledgeable biologists. They demonstrate this competency by having a basic understanding of entomology, insect ecology, phylogeny, and pest management.

#### MS Plan A (Thesis)

- 16 credit hours of course work including seminars
- 2 credit hours of PEPS 690
- 12 credit hours of PEPS 700
- 2 credit hours of PEPS 799
- Final oral defense and submission of acceptable thesis

#### MS Plan B (Non-thesis)

Students preparing for a career in research or admission to a doctoral program are advised to enroll in MS Plan A (thesis).

- 23 credit hours of course work including seminars
- 2 credit hours of PEPS 690
- 1 credit hour of PEPS 799 (CR/NC) during the semester in which a proposal for the directed research project is given.
- Final defense of the directed research project and examination on other aspects of entomological training before the advisory committee.

### Doctoral Degree

Intended candidates for the PhD program should have earned the MS degree in entomology or equivalent from a recognized institution. Those with a BS or BA may petition for admittance into the PhD program only after enrolling in the MS program.

The goal of the PhD program is to have students possess broad general knowledge in all areas of entomology, in-depth knowledge in at least one area of specialization and develop the capability for original independent research. Employment options for PhD graduates are in teaching, research, and extension at universities and in research, consulting, or management with private industries and government agencies. Expected student learning outcomes are: (1) acquire and demonstrate compe-

tency/skills as a biologist; (2) acquire and demonstrate entomological knowledge necessary for professional success; (3) acquire and demonstrate communication and literacy skills; and (4) demonstrate the ability to apply creative and critical thinking in the independent development and conduct of research.

### Requirements

- 3 credit hours of PEPS 690
- 2 credit hours of PEPS 799 (CR/NC)
- 1 credit hour of PEPS 800 during semester of graduation
- Additional course work as determined by the doctoral advisory committee
- Oral, or oral and written comprehensive examination administered by the doctoral committee.
- Final oral defense of the dissertation research and submission of an acceptable dissertation.

### Tropical Plant Pathology

Plant pathology is the study of plant diseases, their causes, and the interactions with the environment. The primary thrust in the program focuses on agricultural crops of economic importance; however, opportunities exist for discovery research in natural ecosystems and the laboratory. The field consists of several sub-disciplines including phytopathology, plant virology, bacteriology, nematology, epidemiology, crop protection, and molecular biology of host-pathogen interactions.

Tropical plant pathology has three student learning outcomes. Students in the program will communicate effectively; write and defend a thesis of original phytopathological research; present findings of their research in oral and/or poster formats in scientific forums; publish the results of their research in peer-reviewed journals; and assist others in learning plant pathology. Students are competent and knowledgeable biologists. They demonstrate this competency by having a basic understanding of molecular biology and genetics; with a general knowledge of the four major pathogen groups, by possessing understanding of plant disease epidemiology; having strong knowledge of their specialized field of study; and conducting research in plant pathology. Students will propose and formulate research objectives to address relevant plant pathological questions; and will conduct research using appropriate design and methods.

Students should have their undergraduate preparation in botany, horticulture, agronomy, microbiology, or plant and environmental protection sciences. Plant pathology has its foundation in biology and agriculture and offers wide opportunities in both basic and applied areas of biology, plant sciences, and agriculture. The tropical plant pathology program at UH Mānoa offers students a unique opportunity to gain knowledge of plant diseases on a vast diversity of tropical crops and native plants as well as the impacts of plant protection practices on the environment.

Please see the Graduate Education website for general graduate admissions requirements and procedures. Applications for admission must include GRE scores for verbal and quantitative aptitude. Candidates may need to demonstrate evidence of adequate preparation in other subject areas as well. Deficiencies may be corrected during the graduate program. In addition, applicants must: (1) submit a Statement of Objectives describing their goals and interests in plant pathology directly to the graduate program chair, and (2) arrange to have three confi-

dential letters of reference sent directly to the graduate program chair.

### Master's Degree

The MS degree program is offered under either Plan A (thesis) or Plan B (non-thesis). A total of 30 credit hours are required for each degree option. An advisory committee composed of at least three members of the graduate faculty provides guidance to the student. For a general description of these options, see "Requirements" for each option.

The MS degree in tropical plant pathology provides a basic education and understanding of the pathogen groupings. Employment opportunities exist in industry, government agencies, research institutions, consulting, and farm management.

#### MS Plan A (Thesis)

- Research: 12 credits in PEPS 700 and submission of acceptable thesis.
- Courses: 16 credits in courses approved by the candidate's committee, including 10 credits in courses numbered 600-698, excluding 660 and 699, including at least 6 credits selected from 616, 630, 646.
- Seminars: Minimum of 2 credits in 660, which is required each semester except when enrolled in 799; 2 credits in 799 (CR/NC). CR/NC credits are not counted towards degree credit requirements.

#### MS Plan B (Non-thesis)

- Research: 6-9 credits in PEPS 699, preferably taken in 2-3 different laboratories.
- Courses: 19-22 credits in courses approved by the candidate's committee, including 16 credits in courses numbered 600-698, excluding 660 and 699, including at least 6 credits selected from 616, 630, 646.
- Seminars: Minimum of 2 credits in 660, which is required each semester except when enrolled in 799; 1 credit in 799 (CR/NC). CR/NC credits are not counted towards degree credit requirements.

### Doctoral Degree

Intended candidates for the PhD program should have earned the MS degree in plant pathology or equivalent from a recognized institution. Those with a BS or BA may petition for admittance into the PhD program only after enrolling in the MS program.

Employment options for PhD graduates are in teaching, research, and extension at universities and in research, consulting or management with private industries and government agencies.

### Requirements

- No minimum course requirement. A candidate's committee develops a course plan together with the student.
- 1 credit hour of PEPS 660 each semester, except when enrolled in 799.
- 2 credit hours of 799 (CR/NC).
- Comprehensive and final defense examinations.
- 1 credit hour of 800 during semester of graduation.
- Submission of acceptable dissertation.

\*R. S. Yost, PhD (TPSS Chair)—soil-plant relations, soil management, geospatial analysis  
\*A. M. Wieczorek, PhD (Graduate Chair)—molecular ecology, population genetics, biotechnology  
\*T. D. Amore, PhD—floriculture breeding  
H. C. Bittenbender, PhD—coffee, kava and cacao physiology and management  
\*J. L. Brewbaker, PhD—plant breeding, biochemical genetics  
\*K. T. Cheah, PhD—tissue culture, ornamental horticulture, business management  
\*R. A. Criley, PhD—floriculture, flowering physiology, plant propagation (Emeritus)  
\*J. Deenik, PhD—soil fertility, soil management (Emeritus)  
\*J. DeFrank, PhD—weed science  
\*M. Habte, PhD—soil microbiology-biochemistry  
\*N. V. Hue, PhD—soil chemistry  
\*A. Kaufman, MLA, PhD—landscape systems, design and management, environmental psychology  
\*H. J. Kim, PhD—floriculture, ornamental production  
\*K. D. Kobayashi, PhD—floriculture and fruit physiology, computer modeling  
B. A. Kratky, PhD—vegetable physiology and management (Emeritus)  
\*K. L. Leonhardt, PhD—floriculture  
\*R. M. Manshardt, PhD—tropical fruit breeding and genetics  
\*S. C. Miyasaka, PhD—alternative crops, plant nutrition  
M. A. Nagao, PhD—development physiology, growth regulation (Emeritus)  
\*M. Nickum, PhD—sustainable fruit and nut production  
\*R. Ogoshi, PhD—biofuels  
\*R. E. Paull, PhD—plant growth & development, postharvest handling  
\*T. Radovich, PhD—vegetables, sustainable farming  
Y. Sagawa, PhD—developmental morphology, cytogenetics, tissue culture (Emeritus)  
\*A. A. Saulo, PhD—food technology extension, food safety and quality  
\*B. Turano, PhD—biofuels

## Cooperating Graduate Faculty

D. Borthakur, PhD—plant-microbe interactions, plant biotechnology  
C. I. Evensen, PhD—water quality extension, environmental education  
A. El-Kadi, PhD—hydrology  
J. Leary, PhD—invasive weed management  
W. S. Sakai, PhD—ultrastructure, physiological plant anatomy  
M. J. Tanabe, PhD—in vitro propagation, turf management, plant propagation

## Affiliate Graduate Faculty

M. Austin, PhD—crop breeding, hybrid seed production  
M. M. Fitch, PhD—tissue culture, genetic engineering  
M. C. Jackson, PhD—biochemistry, economics  
T. Matsumoto, PhD—horticulture

J. J. McHugh, PhD—vegetable management, integrated pest management  
P. Moore, PhD—plant development, sugar metabolism  
C. N. Nagai, PhD—sugar cane genetics and tissue culture  
D. Ragone, PhD—ethnobotany, conservation  
C. Stiles, PhD—soil science  
F. Zee, PhD—plant breeding, genetics

**Degrees Offered:** BS, MS, and PhD in tropical plant and soil sciences, minor in plant production and management, agribusiness certificate

## Program Goals

Upon graduation, students will be able to:

- Integrate discipline- and thematic-specific knowledge of basic and applied plant and soil sciences for its analysis, evaluation and application in the improvement, management, and production of managed and natural ecosystems.
- Demonstrate an awareness of practices that minimize damage to the environment and ensure a safe food supply.
- Perform competitively in the diverse professions available to them and to take advantage of the opportunities afforded by changing situations.

## The Academic Program

The Tropical Plant and Soil Sciences (TPSS) program at UH Mānoa is unique. Students have an opportunity to take courses in tropical flower, fruit, and vegetable crop production, turf and landscape management, plant physiology, breeding and genetics, and soil science. They learn about the full spectrum of subjects and activities required to understand and responsibly manage land, water, crops, and their environments for the benefit of humankind. In addition, they learn about the adaptation and application of new technologies, such as molecular biotechnology, computer-based systems, and the internet, to enhance plant production systems, assure a safe food supply, and protect the environment.

Our students come from many backgrounds including those with little practical environmental or agricultural experience. They have in common a keen interest in applying science for the purpose of finding practical solutions to problems. Mature students are especially welcome. A host of career prospects await our students. The comprehensive undergraduate program affords students the opportunity to study molecules to whole plants to managed agro-ecosystems. Students majoring in TPSS prepare for careers including plant production and management, plant breeding and genetics, services, marketing, extension, research, and teaching. UH Mānoa students trained in tropical plant and soil sciences have embarked on successful careers in international organizations and governmental agencies, in ecological and environmental protection, in agricultural extension as individual entrepreneurs and teachers at all levels, in farming, in golf course/sports field management, park administration, landscape contracting, and as middle and upper management in corporate agriculture. They work in increasing the food supply, improving food quality, and assuring food safety while protecting the environment and improving the quality of life. Undergraduates are encouraged to obtain practical experience, which involves research under the direction of a faculty member and work in a commercial industry via our internship program. Students have found satisfaction in applying their course work and research studies to challenging

problems in business, environmental protection, land-use, and agricultural crop production.

### Advising

Tropical Plant and Soil Sciences  
St. John Hall Room 102  
3190 Maile Way  
Honolulu, HI 96822-2279  
Tel: (808) 956-8351  
Fax: (808) 956-3894  
Email: leonhard@hawaii.edu

Students are advised by the department's undergraduate advisor: Dr. Ken Leonhardt. Undergraduate options are detailed in the following section. Each student may identify a faculty member to act as a mentor in the student's area of interest and specialization. All students in TPSS must receive approval of their program of courses from their advisors prior to registration each semester.

Graduate students are advised initially by an advisor or by the department's graduate program chairman.

### Undergraduate Study

The program offers a BS degree in tropical plant and soil sciences with specializations in: (1) plant physiology and genetics, (2) plant production and management, (3) environmental soil science, and (4) landscape horticulture. A student is required to complete 128 credits to graduate with a BS in TPSS.

### Requirements

Students must complete the General Education Requirements (Core) of UH Mānoa. An updated list of the courses recommended to satisfy the UH Mānoa General Education Requirement is available from the undergraduate advisor. The UH's Hawaiian/Second Language graduation requirement can be met by language and certain natural science courses.

The College has a core consisting of the following courses:

- NREM 310 or FAMR 380/380L
- TPSS 492

### Option in Plant Physiology and Genetics

The option crosses the traditional boundaries that have separated genetics, plant physiology, molecular biology, and traditional crop production areas. The option links laboratory approaches and plant production systems through the application of plant biotechnology to solve multi-disciplinary problems. Students can select courses that allow concentration on genetic engineering to address real-world problems or to whole plant physiology and plant breeding.

Students selecting this option must take MATH 140 or NREM 203, BOT 101/101L, and CHEM 161/161L, 162/162L will fulfill the Natural Science requirement of the UH Mānoa General Education Requirement.

### Major Courses (Option in Plant Physiology and Genetics)

Take the following 2 courses:

- TPSS 200
- TPSS 351

Take a minimum of 12 credits from the following courses:

- TPSS 371
- TPSS 440
- TPSS 453
- TPSS 470

- BIOL 340
- MBBE 304
- MBBE 401

Additional supporting courses are available on the Bachelor Degree Program Sheet. For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Electives (variable number of elective credits)

While students may choose from the array of courses offered at UH Mānoa, an advising list of courses will be available to assist students in selecting courses that prepare students for a career in plant sciences and genetics.

The advising list includes courses in botany, chemistry, biology, physics, geography, business, history, and philosophy. Undergraduate advisors will assist students considering enrollment in graduate school in the selection of appropriate courses.

### Option in Plant Production and Management

This option prepares students to produce, manage, and market plants grown as crops or in landscapes. The aim is to enable graduates to perform competitively in their chosen profession and to have a sufficiently broad educational background to take advantage of the opportunities afforded by changing situations.

Students selecting this option need to take MATH 140 or NREM 203, BOT 101/101L, and CHEM 161/161L and 162/162L to fulfill the Natural Science requirement of the UH Mānoa core.

### Major Courses (Option in Plant Production and Management)

Take all 10 of these courses

- TPSS 200
- TPSS 300
- TPSS/NREM 304
- TPSS 351
- TPSS 364
- TPSS 420
- TPSS/PEPS 481
- PEPS 363
- PEPS 363L
- PEPS 405

The student must take 4 courses from a list of over 30 choices.

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Elective Courses (variable number of elective credits and other courses approved by the undergraduate advisor)

While students may choose from the array of courses offered at UH Mānoa, an advising list of courses will be available to assist students in selecting courses that prepare students for a career in horticultural crop production and management.

The advising list includes courses in botany, chemistry, biology, physics, geography, business, and courses in other departments; PEPS, MBBE, NREM, and HWST. Undergraduate advisors will assist students considering enrollment in graduate school in the selection of appropriate courses.

### Option in Environmental Soil Science

The environmental soil science option will prepare students to effectively manage soil for the production of agricultural

commodities and preserve this important natural resource for the benefit of man and the protection of the environment.

Students selecting this option need to take BOT 101/101L or BIOL 172, CHEM 161/161L and 162/162L (or their equivalent), PHYS 151, and Calculus I (MATH 215). Some of these courses will fulfill part of the Natural Science requirement of the UH Mānoa General Education Requirement. These courses are considered prerequisite to some courses in the major.

### Major Courses (Option in Environmental Soil Science)

The following courses need to be taken for this major.

- TPSS 200
- TPSS 300
- TPSS/NREM 304
- TPSS 351
- TPSS 435
- TPSS 450
- NREM 301

### Electives

The student must take 12 credits from following electives for this option:

- TPSS 460
- TPSS 463
- TPSS 499
- GEOG 101/101L
- ICS 101/ 101L
- MET 101
- NREM 461
- MICR 485

For information on a Bachelor Degree Program Sheet, go to [www.manoa.hawaii.edu/ovcaa/programsheets/](http://www.manoa.hawaii.edu/ovcaa/programsheets/).

### Option in Landscape Horticulture

The Department of Tropical Plant and Soil Science's Landscape Horticulture Option prepares students for exciting and diverse careers in the landscape industry. UH Mānoa is centered within the Pacific rim, and is the only U.S. landscape program for sub-tropical and tropical environments, making studying at UH Mānoa a unique experience.

The landscape horticulture option will prepare students to effectively design, install, and maintain landscapes that include trees, shrubs, flowers, house plants, and turf grass that are used to enhance the environment. Students of the program learn theoretical foundations, which lead to a practical understanding and implementation of how to produce environmentally and economically sustainable landscapes.

The landscape industry in Hawai'i is a multi-million dollar business incorporating landscape nurseries, landscape architects, landscape contractors, arborists, and landscape maintenance, and interior landscape companies. Hawai'i has lush resorts, parks, recreation and athletic fields, world-class golf courses, master planned residential communities, and a variety of commercial projects, which offer TPSS students excellent opportunities to choose from upon graduation.

Students selecting this option need to take MATH 140 or NREM 203, BOT 101/101L (or their equivalent) and CHEM 161/161L and CHEM 162/162L (or their equivalent) to fulfill the natural science requirement of the UH Mānoa Core. These are considered prerequisite to some upper division courses in the major.

### Major Requirements (Option in Landscape Horticulture)

The following courses need to be taken for this major:

- TPSS 200
- TPSS 304
- TPSS 351
- TPSS 463
- TPSS 481
- PEPS 363/363L
- PEPS 405

### Electives

The student must take 7 courses from a list of over 30 choices.

### Certificate in Agribusiness Management

This certificate fulfills business and management needs for undergraduate students in the technical fields of agriculture and for business/economics students who want to concentrate in agriculture. Faculty from four departments within the college coordinate and manage the program. The certificate is open to undergraduate majors in any CTAHR program, economics and business. NREM 220 or ECON 130 are prerequisites for the program.

The certificate program consists of courses concentrating on the applications of business, management, and economic principles to agribusinesses with particular emphasis on the factors that differentiate agriculture and related products and services from other businesses. The certificate program includes four core agribusiness courses:

### Core Courses (12 credits)

- TPSS 322 or BUS 312
- TPSS 341
- TPSS 351
- TPSS 429

### Academic Minor in Plant Production and Management

A minimum of 15 credits of upper division level courses must be completed with a grade of C (not C-) or higher for each course. Transfer credits toward the minor will be accepted if an appropriate UH Mānoa course is determined to be equivalent, and if the grade is C (not C-) or higher. Required courses are TPSS 200, 300, and 364. Several optional courses can be selected. See the TPSS academic advisor for details (Dr. Ken Leonhardt, email: [leonhardt@hawaii.edu](mailto:leonhardt@hawaii.edu)).

## Graduate Study

### Tropical Plant and Soil Sciences

In order to solve the complex problems facing agricultural plant production systems, many disciplines must be integrated successfully. Candidates may specialize in genetics and breeding of tropical fruits, vegetables, or ornamentals; physiology, culture, and management of tropical fruits, vegetables, or ornamentals; morphogenesis; crop and stress physiology; post-harvest physiology; growth regulation; plant biochemical genetics; plant cytogenetics; weed science; computer modeling; or turf and landscape management, cropping systems, plant-soil relationships, soil chemistry, soil physics, soil management, soil and water conservation, soil fertility, and soil microbiology. Courses offered in botany, biochemistry, plant pathology, food science, genetics, microbiology, and zoology, combined with courses offered in TPSS, will provide considerable flexibility

in the development of a program suited to a student's career objectives.

The department offers graduate study leading to MS (Plan A, Plan B, and Plan C) and PhD degrees. The TPSS graduate program offers a degree in TPSS and an option in TPSS (horticulture). The degrees emphasize the development of problem-solving skills that integrate molecular, biochemical, physiological, chemical, genetic, and ecological approaches to collaborative research in plant and soil sciences.

The TPSS degree aims to provide the student with a thorough hands-on understanding of the principles and techniques in the adaptation and application of biotechnology to tropical crop plant production, and the role of soils in supporting the whole system of crop production systems. The option requires understanding of fundamental biological processes, molecular and organism biology, genetics, plant physiology, chemistry, physics, and microbiology. Soil is studied both for intrinsic properties, as well as its role in supporting crop growth and as an environmental resource.

The horticulture option explores the many facets of tropical food and ornamental crop production and requires the understanding of agricultural systems, plant production, soil fertility, and protection of the environment, as well as supporting disciplines such as crop ecology, plant physiology, and molecular biology.

The MS and PhD in TPSS are recognized Western Interstate Commission for Higher Education (WICHE) regional graduate programs. Residents of Alaska, Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, Utah, Washington, and Wyoming are eligible, upon admission, to enroll at Hawai'i-resident tuition rates.

### Entrance Requirements

For admission to the TPSS graduate programs, applicants must present a bachelor's degree with a GPA of 3.0 (4.0 equals A scale) or the equivalent in the last four semesters or approximately 60 semester credits of the applicant's undergraduate record. The GRE is required for all applicants. A minimum CBT TOEFL score of 173 is required of all foreign students. All applicants must submit 2 letters of recommendation at the time of application.

### Transfer of Credits

The transfer of credits to meet the requirements of the MS or PhD is not automatic. The student must petition the graduate program chairman, certifying that the transfers make programmatic sense and that the courses to be transferred are equivalent in rigor and scholastic content to graduate-level (600 level) courses offered at UH Mānoa. The graduate program chairman may consult with the graduate faculty as to the certification. The maximum number of credits that can be transferred is 12.

Only those credits that have not been applied towards the fulfillment of a previous degree may be transferred. An exception may be made if the subject matter area could not be met by course offering at UH Mānoa, provided the courses transferred meet the rigor and programmatic appropriateness criteria described above.

### Graduate Committee

Upon entering the graduate program, students will meet with their advisor. If a faculty advisor has not been selected, the

graduate chairman or his representative will perform this function. The selection of an advisor must be made before the end of the first semester in residence. The advisor, with the approval of the graduate chairman, shall guide the student on course selection matters, insure progression in the program, and advise the student until the permanent graduate program committee is established.

Students shall meet their permanent graduate program committee at least once each semester to access academic and research progress and to establish goals for the next semester. It is the student's responsibility to schedule this meeting and to file the Academic Progress Report with the graduate chairman.

### Master of Science Degree , Plan A (thesis) and B (without thesis)

The intended study of the MS Plan A program is to further a student's graduate studies leading to the PhD degree or successful entry to careers as researchers and technicians. Graduates of the MS Plan B program typically enter careers in education, agribusiness, extension service, and other agricultural related occupations.

### Requirements

**Master of Science Plan A:** Students must complete a minimum of 24 credits hours of course work and 6 credit hours of thesis preparation. A final oral examination is also required.

**Master of Science Plan B:** Students must complete a minimum of 30 credits as follows: at least 6 credits in TPSS 600+; 6 credits in TPSS/CTAHR/Botany 600+ (see graduate chair for list of allowed courses), 6 credits in other 600+; 6 credits of 699; 6 credits in other 400/600 level classes

**Proposal defense:** Master of Science Plan A students are required to give a thesis proposal seminar, preferably in the second semester.

**Seminar:** All students must take TPSS 654 (Communications in Science) during their graduate study and register for TPSS 667 (Graduate Seminar) once every academic year in which they are registered as full-time student or equivalent. An exception can be made during the final semester, in which the dissertation defense or Plan B project report is given in place of TPSS 667.

**Lecture Requirement:** All MS students are required to give one lecture in a TPSS course during their program. The student will be evaluated by the faculty teaching the course, and this evaluation will be added to the student's file.

**Master of Science-Thesis Plan A:** See graduate chair on thesis preparation. Upon development of a thesis proposal in conjunction with your advisor and the selection of graduate committee, the student will advanced to candidacy. The thesis topic must be submitted and approved by your graduate committee prior to mid-term of the semester after you have been advanced to candidacy. You may register for TPSS 700 only after your thesis topic has been approved by your committee.

**Final Examination-Master of Science Plan A:** A final oral examination on course of study and project is required. The first part of the examination consists of a seminar presentation and defense of the research, which is open to the public and is one hour in length. Following the presentation, student will be examined in detailed on the conduct and results of the thesis by the committee.

**Final Examination-Master of Science Plan B:** A final oral examination on the thesis is required. The examination consists

of a seminar presentation which is open to the public and is one hour in length. The seminar will be presented on a topic agreed upon by the student and their advisor/committee chair. Topics presented included the research conducted under the advisor's direction in TPSS 699.

### **Master of Science Degree Plan C**

The Graduate Division and TPSS in CTAHR allow for a Plan C Masters degree. See the graduate chair for more information.

### **Doctor of Philosophy Degree**

PhD graduates are expected to enter careers as researchers and/or educators in institutions of higher learning, both in public and private institutions. The PhD is awarded only for original scholarly achievement. The dissertation, which is a significant original contribution to basic knowledge in the candidate's field is required. Only students with above average academic records in pre-doctoral programs will be accepted in the program.

#### **Requirements**

For all PhD students, a minimum of 12 credit hours in courses numbered 400 or above is required for the major, not including seminar, directed research, thesis/dissertation research. Course requirements are established by the student's Graduate Committee.

**Proposal defense:** PhD students are required to give a thesis proposal seminar within the first year of their program.

**Seminar:** Candidates must register for TPSS 667 (Graduate Seminar) once every academic year in which they are registered as full-time or equivalent. An exception is made in the final semester in which the dissertation defense can be substituted for seminar. All students must take TPSS 654 (Communications in the Sciences) or its equivalent during their first year as a substitute for one semester of TPSS 667.

**Lecture Requirement:** All PhD students are required to give three lectures in TPSS courses during the course of their program. The student will be evaluated by the faculty member teaching the course, and this evaluation will be added to the student's file.

**Comprehensive Examination:** An oral or oral and written comprehensive examination is conducted by your graduate committee for all PhD candidates. This examination may cover any subject thought pertinent by your committee members. The comprehensive examination may be repeated once at the option of your committee. If the student fails to pass the exam the second time, the student will be dropped from the program.

**Dissertation:** The PhD is awarded only for original scholarly achievement. The dissertation, which is a significant original contribution to basic knowledge in the candidate's field is required. For further information, see the graduate chair. The dissertation proposal must be submitted and approved by your graduate committee during the semester following completion of the qualifying examination. You may register for TPSS 800 (Dissertation Research) only after approval of your dissertation proposal.

**Final examination:** A final oral examination on student's dissertation is required. The first part of the examination consists of a seminar presentation and defense of your research, which is open to the public and is one hour in length. Following the open seminar presentation, there will be more thorough examination of the research and results of the dissertation by the members of your committee and any other members of the graduate faculty who wish to attend.

# Courses

This listing describes the large range of courses available. Please note that this list of courses changes due to the dynamic nature of academic disciplines.

Each semester, the courses available are listed in the *Registration Guide* (formerly *Schedule of Classes*) and online at [www.hawaii.edu/myuh/manoa/](http://www.hawaii.edu/myuh/manoa/). Summer classes are listed in the *Summer Session Catalog/MyUH Portal*.

The course headings are abbreviated and include a two- to four-letter department code, course number (including alpha suffix, if applicable), title, level, credits, description, repeatability, major restrictions, grade option, prerequisites, co-requisites, frequency, cross-listings, and core designation. For further clarification, please refer to the sample course description.

## Sample Course Description

**ABCD 123 Introduction to Courses (3) (2 Lec, 1 3-hr Lab)** This sample describes an introductory course. Open to nonmajors if space available. Repeatable one time. CR/NC only. Pre: 122, HIST 101 and COMG 188 (or concurrent); or consent. Co-requisite: 123L. (Cross-listed as DCBA 123) **DA**

**Course number** (ie. **123**) reflects course level (see “Course Numbering System” below). An “A” following the number designates a Selected Studies (honors) section. An “L” following the number designates a laboratory course that is companion to a lecture course bearing the same number. All other suffixes (“B–K,” “M–U,” and “W–Z”) mark separate sections of an “Alpha” course, each having a distinctive content that a student may earn credit toward the degree for each section taken.

**Course titles** will be entered exactly as they appear on UHM forms, so it is important to use appropriate punctuation and capitalization. Diacritical and other punctuation marks that are not included on a keyboard are not available in the online *Catalog*. Two or more courses within the same subject should not share the same title. An exception is for honors courses and their non-honors counterparts. The word “online” should not be included in a course title to indicate that the course is offered via the internet.

**Roman numerals (I, II)** indicate the level of a course in a sequence, e.g., Calculus II is a more advanced course following an introductory-level course.

**Credit hours** (ie. **(3)**) are shown in parentheses following the course title. Variable credit courses are designated “(V).” Some classes break down the time spent in lecture and laboratory. (e.g., 2 Lec, 1 3-hr Lab)

**Description** includes class size/format (e.g., lecture, discussion, seminar, lab, workshop, studio) and major subjects covered. Other features may include learning experiences (e.g., term papers, guest lecturers).

**Repeatable how many times** indicates that a course may be taken again for additional credit toward a degree.

**Grade option A-F only** indicates that the course is offered only for grade. **CR/NC only** indicates that the course is offered only for credit (CR) or no credit (NC). Credit is given if a student achieves a passing grade. **Satisfactory only** indicates

whether the course is satisfactory or unsatisfactory. **No Grading (NG)** is for graduate courses only.

**Pre:** indicates the **prerequisites necessary** to register for a course, which may include courses, general education designation, class standing, consent of the instructor or instructor approval (consent), or departmental approval. Some prerequisites may be taken concurrently. When a department has a prerequisite common to a large group of courses, that fact is noted in italics preceding these course listings as a blanket statement.

**Co-requisite** indicates that the course must be taken in conjunction with another course.

**Frequency of course** will determine how often the course is offered. **(Fall only)** means that the course is offered only in the fall, **(Spring only)** means the course is offered only in the spring. **(Alt. years)** means that the course is offered only every other year.

**Cross-listed courses** (Cross-listed as ABCD 123) indicates that the course fulfills a requirement in more than one department and specifies the alternate departmental course listing.

**Non-Introductory (NI)** courses are 200-level with an explicitly stated course prerequisite, or 300-level or higher.

**Upper Division Courses** Junior- and senior-level courses, numbered 300–499, which generally have prerequisites.

**General Education designation** (e.g., **DA**) indicates that the course meets a General Education Core requirement. See the key in the right column for designations. Courses that meet the Focus requirement are not designated in the *Catalog*. Focus-designations are in the *Registration Guide*.

## Course Numbering System

### Undergraduate Courses (1–499)

- 1–99 Courses not applicable for credit toward a bachelor’s degree
- 100–199 Initial or introductory courses
- 200–299 Second-year courses in a sequence or development in a field of study.
- 300–499 Third- and fourth-year courses in a sequence of courses or first courses in professional curricula. May be accepted by Graduate Division to fulfill graduate degree requirements (petition may be required). Courses numbered 300 or above are upper division and count toward the 45 upper division credit requirement.

### Post-Baccalaureate Courses (500–800)

- 500 Directed Study (master’s Plan B)
- 500–599 Courses applicable toward first professional degrees (architecture, law, and medicine) and in-service training programs in education
- 600–699 Graduate courses
- 700 Thesis Research (master’s Plan A)
- 700–799 Advanced graduate courses
- 800 Dissertation Research

**Special Numbers:** Courses ending in -99 are directed research or directed study. Experimental courses ending in -97 or -98 and single course offerings are **not** listed in the *Catalog*.

### General Education Designations

Courses that meet the UH Mānoa General Education Core Requirements are identified with one of the following designations at the end of the course description:

Biological Sciences - DB	Physical Sciences - DP	Laboratory (science) - DY
Animal Science (ANSC) (16)* p. 371	Anthropology (ANTH) (1) p. 372	Animal Science (ANSC) (2) p. 371
Anthropology (ANTH) (6)* p. 372	Architecture (ARCH) (1) p. 375	Anthropology (ANTH) (1)* p. 372
Biochemistry (BIOC) (2) p. 383	Astronomy (ASTR) (12)* p. 382	Astronomy (ASTR) (3)* p. 382

### Foundations Requirements

Written Communication .FW  
 Symbolic Reasoning .....FS  
 Global and Multicultural Perspectives .....FG  
**FGA, FGB, FGC** (see p. 27-28)

### Diversification Requirements

Arts ..... DA  
 Humanities ..... DH  
 Literatures ..... DL  
 Social Sciences.....DS  
 Biological Sciences .....DB  
 Physical Sciences ..... DP  
 Laboratory (science) ..... DY

### UH Mānoa

#### Graduation Requirements

Hawaiian/Second Language  
**HSL**

For more information, see the “Mānoa Undergraduate General Education Requirements” section of this *Catalog*.

#### Please Note:

- **Consult your college advisor for a list of updated General Education courses. Additional courses may have been approved after the publication of this *Catalog*.**
- **Some programs specify which courses their students must take to fulfill the Core requirements or to fulfill lower division college/school requirements. For these programs, students should consult an advisor from their intended college/ school, or department prior to selecting courses.**

## Academy for Creative Media (ACM)

*College of Arts and Humanities*

*A grade of C or better in the prerequisite courses is required for continuation.*

**ACM 215 3D Scene Design (3)** Students will design, build, light and render 3D elements for animation scenes. A-F only. Pre: consent.

**ACM 216 3D Animation (3)** Artistic/acting and technical/computer aspects of character animation. Special emphasis on techniques for imbuing computer generated characters with the illusion of life. Project-based. A-F only. Pre: consent.

**ACM 220 Advanced Rendering (3)** Computer animation directing and cinematography in a 3D environment. A-F only. Pre: 215 and 216.

**ACM 255 Cinema and Digital Media (3)** Introduction to the study of cinema and digital media: history, aesthetics and production of cinema, computer animation and video game design. A-F only. **DH**

**ACM 310 Cinematic Narrative Production (4)** Production-intensive course with collaborative as well as individual projects. Theories and application of basic digital cinema productions, including camera, lighting, sound, and editing. ACM majors only. A-F only. Pre: B or better in 255, or consent. **DA**

**ACM 312 Cinematography (3)** Comprehensive course in visual styles supporting screen narratives through a study of principles of camera elements, operations, lighting, color and composition. Professional role and responsibilities of cinematographer. Project-oriented. Must have access to manually controlled still camera. ACM majors only. A-F only. Pre: 310 or consent.

**ACM 315 Narrative Game Design (3)** Storytelling through computer games. Effect of interactivity on narrative. Interactive plot structures, conceptual design, artwork, audio, cinematography, two- and three-dimensional computer graphics. Design and programming of game narrative using scripting languages. ACM majors only. A-F only. Pre: 215 and 216 and B or better in 255, or consent.

**ACM 316 3D Character Animation (3)** Creating the illusion of life through the principles of animation. Application of theory to practical scene work with emphasis on acting and personality in animated characters. ACM majors only. A-F only. Pre: 215 and 216 and B or better in 255 and ART 113, or consent.

**ACM 317 3D Cinematography and Dynamics (3)** Computer animation directing and cinematography for the design and creation of visual effects. Using particles and dynamics systems to simulate natural phenomena. Compositing of visual layers. ACM majors only. A-F only. Pre: 215 and 216, or 215 and 310 and consent.

**ACM 318 Classical 2D Full Animation (3)** Hand drawn full animation techniques; rough animation, inbetweening, clean up animation and digital color processes. Digital line testing, sync dialog and other advanced skills for classical 2D full animation. ACM majors only. A-F only. Pre: 216 and 255 and ART 113, or consent.

**ACM 320 Computer Animation Production I (3)** 3D computer graphics production projects. Students will write, plan, execute, and deliver a 30 second computer-animated short film. Emphasis on visual storytelling and character animation. ACM majors only. A-F only. Pre: 316. (Fall only)

**ACM 325 Visual Effects (3)** Introduction to the history, theory, design and execution of visual effects for the screen. Project-based learning in traditional photographic and digitally-generated special effects. ACM majors only. A-F only. Pre: 215 and 216, or 310, or consent.

**ACM 350 Screenwriting (3)** Research, development, style and structure of the narrative and documentary for the screen. ACM majors only. A-F only. Pre: 310 (or concurrent) or 315 (or concurrent) or

316 (or concurrent), and minimum B- in FW or ENG 200; or consent.

**ACM 352 Screening Asian Americans (3)** Survey of Asian and Asian American representations in American film and television from the silent era to the present, with an emphasis on Orientalism and multiculturalism, as well as performance and spectatorship. ACM majors: A-F only. Pre: junior standing or consent. (Cross-listed as AMST 352) **DH**

**ACM 355 Oral Tradition to Screenplay (3)** Adapting the stories, styles, and cultural values of oral tradition storytelling to cinematic narratives. A-F only. Pre: 255 (or concurrent), or consent.

**ACM 360 Indigenous Aesthetics (3)** Aesthetic theories and practices of indigenous cultures of the Pacific and their adaptation to the screen in cinematic storytelling. A-F only. Pre: 255 (or concurrent), or consent.

**ACM 370 Directing the Actor on Screen (3)** Introduction of the screen-director to the craft of acting for the camera. Students will develop collaborative communication skills and learn practical techniques to elicit spontaneous and relaxed performances from actors. ACM majors only. A-F only. Pre: 310 (or concurrent).

**ACM 372 Editing for Cinema (3)** Advanced course examining the theory, techniques, and practices of motion picture editing; use of non-linear digital editing systems; and practical experience in digital editing projects. ACM majors only. A-F only. Pre: 310 (or concurrent) or 316 (or concurrent), or consent.

**ACM 374 Post Production Sound (3)** Practical course on the theory, art, and techniques of sound recording, editing, and design for cinema. Students work on projects involving dialogue and sound effects in post production. ACM majors only. A-F only. Pre: 310 or 316.

**ACM 375 Directing the Camera for the Screen (3)** Detailed analysis of cinematic grammar, placement, movement, focus, and effects of the camera to create the mise en scene. Practical exercises and projects to apply theory to individual creative work. ACM majors only. A-F only. Pre: 310 (or concurrent) or consent.

**ACM 380 Genre and Narrative Theory in Creative Media (3)** Focus on the concept of genre, genre films, genre film criticism and popular genres such as Western, film noir, documentary, and Chinese martial arts. A-F only. Pre: 255 or consent.

**ACM 382 Authors in Creative Media (3)** In-depth study of the auteur theory and specific application to authors in creative media, such as film directors, animators, screenwriters or game designers. A-F only. Pre: 255 or consent.

**ACM 384 Study Abroad (3)** Intensive study of selected topics, genres, filmmakers, or digital media production in the host country in a UH Mānoa- approved study abroad location. Repeatable one time. A-F only. Pre: 255 and consent.

**ACM 385 Topics in Creative Media (3)** Topics of interest to faculty and students; taught by regular and visiting faculty. Repeatable one time on different topics. ACM majors only. A-F only. Pre: 255 and junior standing, or consent.

**ACM 386 Techniques in Creative Media (3)** Specialized techniques in the creation of digital media: taught by regular and visiting faculty. Repeatable one time in different topics. ACM majors only. A-F only. Pre: 310 or 316, or consent.

**ACM 390 Workshop in Creative Media (V)** Short-term intensive workshop in focused area of media production. Repeatable up to six credits. ACM majors only. A-F only. Pre: 255 or consent.

**ACM 399 Independent Group Project (V)** Participation in a group production project under supervision of ACM faculty member. A-F only. Repeatable up to six credits. ACM majors only. Pre: 310 or 316, and 350, departmental approval, and consent.

**ACM 405 Documentary Production (3)** Analysis and practical knowledge of the documentary process including, but not limited to, research, organization and story structure, shooting, camera coverage, and editing. ACM majors only. A-F only. Pre: 310 and 350, or consent.

**ACM 410 Advanced Cinematic Production (4)** Production of a major cinematic/digital narrative project. Working in groups, each student takes on creative and technical role and responsibilities of a principle crew position. Emphasis on artistic form in narrative development; timely execution from pre- to post-production. Repeatable one time with instructor approval. ACM majors only. A-F only. Pre: 310 and 350, or consent.

**ACM 415 Computer Game Production (3)** Students will work as a team to produce to design and produce a computer game: 2D and 3D elements, animation, story, music, audio, and project software. ACM majors only. A-F only. Pre: 315 or ICS 313, or consent.

**ACM 420 Computer Animation Production II (3)** Student teams produce a short, animated film. Prior knowledge of 2D and 3D media authoring tools and animation techniques is necessary. ACM majors only. A-F only. Pre: 320 and 350 or consent.

**ACM 450 Advanced Screenwriting (3)** Application of narrative principles of character development, story structure and thematic spine to students' short and feature-length screenplays. ACM majors only. A-F only. Pre: 350 or consent.

**ACM 455 Indigenous Filmmaking (3)** Theories and studies of indigenous films and creation of a cinematic project based in indigenous cultural and value systems. Students must complete a certification workshop in camera and editing processes to be enrolled in this course. ACM majors only. A-F only. Pre: 310, and 350 or 355; or consent.

**ACM 460 Ethics and Film (3)** Ethical theory and dilemmas as reflected in film and filmmaking. Social responsibility for filmmakers. ACM majors only. A-F only. Pre: junior standing and 255.

**ACM 480 Oceanic Media and Culture (3)** Involves close textual analysis of film, TV and multimedia content. The course includes cinematic and television screenings. ACM majors only. A-F only. Pre: 255 or consent.

**ACM 482 The American Documentary (3)** In-depth study of the nature and impact of documentary filmmaking in America, focusing on the interplay between filmmaker, subject, and audience. Will critically examine documentaries for their use of rhetoric, ethics, and narrative voice. ACM majors only. Junior standing or higher. A-F only. Pre: 255.

**ACM 485 Seminar in Creative Media (3)** Intellectual issues in creative media. Conducted by regular and visiting faculty with extensive student participation and scholarly presentation. Repeatable one time on different topics. ACM majors only. A-F only. Pre: 255 and junior standing, or consent.

**ACM 490 Global Media (3)** Involves close textual analysis and strategic analysis of the globalism phenomenon, with an emphasis on transnational media corporations. ACM majors only. A-F only. Pre: 255 or consent. (Fall only)

**ACM 495 Creative Media Internship (V)** Internship in professional cinematic, television and/or digital media production company under professional and faculty supervision. Repeatable one time. ACM majors only. A-F only. Pre: 310 or 315 or 316, and 350, and consent.

**ACM 499 Directed Study (V)** Independent research or creative project under supervision of ACM faculty member. Repeatable two times. ACM majors only. Pre: 310 or 315 or 316, and 350, and consent.

## Accounting (ACC)

*Shidler College of Business*

**ACC 201 Introduction to Financial Accounting (3)** Introduction to financial accounting and meth-

ods used to record and report financial information to decision makers external to the firm. Use and limitations of financial reports. Pre: sophomore standing.

**ACC 202 Introduction to Management Accounting (3)** Introduction to managerial accounting and methods used to report information to decision makers internal to the firm. Cost accounting, budgeting, standard cost systems, reporting and analyzing performance. Pre: 201 with C- or better.

**ACC 305 Management Accounting (3)** Information for managerial decision-making, planning, and control: job order and process costing, direct and absorption costing, normal and standard cost systems. Problem solving and application. Pre: 202 with C- or better.

**ACC 321 Intermediate Financial Accounting I (3)** Accounting process and the application of GAAP to the recognition and measurement of cash, receivables, inventories, property plant and equipment, depreciation and depletion, intangibles, and current liabilities. Pre: 202 with C- or better.

**ACC 323 Intermediate Financial Accounting II (3)** Application of GAAP to the recognition and measurement of long-term liabilities, investments, contributed capital, retained earnings, accounting changes and errors, income recognition, accounting for income taxes, pensions, leases, and statement of cash flows. Pre: 321 with C- or better.

**ACC 395 Accounting Internship (V)** On-the-job experience in the accounting community. Term paper and meetings with faculty advisor required. C/NC only. Pre: consent.

**ACC 399 Directed Reading and Research (V)** Reading and research of a special area in major under direction of faculty member(s). Project must include statement of objectives, outline of activities planned, results expected, and how they are to be reported and evaluated. Must be approved in advance by the department chair and faculty advisor.

**ACC 401 Federal Individual Income Taxation (3)** Examines federal income tax concepts, such as gross income, exclusions, deductions, exemptions, and tax credits, especially for sole proprietors. Introduces taxation of property transactions. Development of professional writing skills is integral to this course. Pre: 202 or BUS 624 with C- or better.

**ACC 407 Taxation of Business Entities (3)** A survey of the general concepts, rules, and practices involved in the taxation of sole-proprietorships, corporations, partnerships, and subchapter S corporations. Pre: 401 with C- or better.

**ACC 409 Accounting Information Systems (3)** Accounting systems analysis, control and design in manual and computerized environments. Knowledge and skills of information technology for auditing AIS systems. Hands-on experience with microcomputers and a computerized accounting system. A-F only. Pre: 323 with C- or better (or concurrent).

**ACC 413 Law for the Accountant (3)** Intensive study of areas of law of importance to accountants. Particular attention is given to principles of law relating to contracts, sales, commercial paper, secured transactions, property, legal entities, agency, securities, and accountant's legal liability. Pre: BLAW 200 or consent.

**ACC 415 Advanced Financial Accounting (3)** Accounting topics relating to consolidation requirements and introduction to the fundamentals of fund accounting, including the general fund, restricted funds, debt service funds, enterprise funds, general long-term account group, general fixed assets accounting group, and accounting entries for encumbrances. Pre: 323 with C- or better.

**ACC 416 Special Topics in Accounting (3)** Addresses current issues impacting the accounting profession. Topics vary each semester. Repeatable three times. Pre: 323.

**ACC 418 Auditing (3)** Auditing concepts including standards, objectives and ethics for external auditors. Emphasis on reporting standards, internal control,

evidence, statistical sampling, IT audits and assurance. Development of professional writing skills is an integral part of this course. Pre: 323 and 409, both with C- or better.

**ACC 460 International and Managerial Accounting (3)** Integration of numerous elements of the accounting program from an international perspective. Examines information for managerial decision-making, planning and control. Current accounting issues discussed. Lectures, discussions, case analysis. Oral presentations with individual feedback required. ACC majors only. A-F only. Pre: 418 (or concurrent), no waiver.

**ACC 500 Master's Plan B/C Studies (1)** Enrollment for degree completion. Repeatable unlimited times. Pre: master's Plan B or C candidate and consent.

**ACC 581 Financial Accounting I (5)** Accounting process and the application of GAAP to the recognition and measurement of cash, receivables, inventories, property plant and equipment, depreciation and depletion, intangibles, current liabilities, and long-term liabilities. A-F only.

**ACC 582 Financial Accounting II (5)** Application of GAAP in recognition and measurement of investments, pensions, retained earnings, and other topics related to financial statements. Other topics include consolidation and mergers and acquisitions. A-F only. Pre: 581.

**ACC 583 Cost Accounting (5)** Information for managerial decision-making, planning and control, job order and process costing, direct and absorption costing, standard and normal cost systems. Will also cover Government and Not-for-profit topics. A-F only.

**ACC 584 Regulation and Accounting (5)** Will cover tax accounting topics for individuals, estates, and business entities. Also will cover business law and professional responsibility topics important for the professional accountant. A-F only. Pre: 581.

**ACC 585 Auditing and Attestation (4)** Concepts include standards, objectives, and ethics for external auditors. Emphasizes reporting standards, internal control, statistical sampling, EDP audits, and assurance. Also covers information systems and relevant measurement topics. A-F only. Pre: 581.

**ACC 609 Advanced Accounting Information Systems (3)** The development, implementation and operation of enterprise-wide resource planning systems, with an emphasis on implications to accounting information. Also covers current and emerging issues relating to accounting information systems. Pre: 409 with C- or better.

**ACC 616 Accounting Theory and Development (3)** History and theoretical background of accounting standards. Including accounting theories, formulating and testing theories; scientific, pragmatic, syntactic and semantic theories; normative and positive theories. Literature supportive and critical of accounting theories and standards. Pre: 323 or 582 with C- or better, or consent.

**ACC 619 Advanced Auditing (3)** Advanced auditing course using research, critical thinking and communication skills applied to contemporary accounting and auditing. Pre: 418 or 585 with C- or better, or consent.

**ACC 620 Global Accounting (3)** Theory and fundamental causes of international variations in accounting. Special emphasis on problems such variations create for financial reporting, control, and decision-making within multinational business enterprises. Pre: 323 or 582 with C- or better, or consent.

**ACC 625 Accounting and Tax Research (3)** In-depth examination of tax and accounting research, IRC, and SEC procedures. Extensive practice in issue identification, reading and analyzing primary authority, and communicating results. Credit not given for both 606 and 625. Pre: 401 or 584 with C- or better, orientation program, or consent.

**ACC 631 Tax of Partners/Partnerships (3)** Examines advanced topics in federal taxation of partners and partnerships regarding the contribution, operation, and distribution from partnerships and transfers of partnership interests. Pre: 407 with C- or better.

**ACC 635 Advanced Public Sector Accounting (3)** Provides the tools necessary for understanding the principles of fiscal accountability and reporting in governmental and not-for-profit organizations. Pre: 415 or 582 with C- or better, or consent.

**ACC 638 Estate and Gift Taxation and Planning (3)** Examines estate and gift tax provisions and basic estate planning techniques to save taxes and avoid probate. Overviews generation-skipping transfer taxes and income taxes on estates and trusts. Pre: 401 or 584 with C- or better, or consent.

**ACC 639 Multijurisdictional Taxation (3)** Examines international, state, and local tax issues. Topics include U.S. International taxation of in- and out-bound transactions, sourcing of income and deductions and nexus. Pre: 401 with C- or better.

**ACC 640 International Auditing and Assurance (3)** Advanced topics in assurance and audit in an international assurance and auditing standards environment. Subject matter includes evidential reasoning and decision making, audit planning, internal control frameworks, audit evidence, strategic systems audit, audit judgment and international group audits. A-F only. Pre: 418 with C- or better.
